The associations connected with salt in Eastern countries are important. As one of the most essential articles of diet, it symbolized hospitality; as an antiseptic, durability, fidelity, and purity. Hence the expression, "covenant of salt" (Lev. ii, 13; Numb. xviii, 19; 2 Chron. xiii, 5), as betokening an indissoluble alliance between friends (see *Gettysb. Evang. Rev.* Oct. 1867); and again the expression, "salted with the salt of the palace" (Ezra iv, 14), not necessarily meaning that they had "maintenance from the palace," as the A. V. has it, but that they were bound by sacred obligations of fidelity to the king. So in the present day, "to eat bread and salt together" is an expression for a league of mutual amity (Russell, *Aleppo*, i, 232); and, on the other hand, the Persian term for traitor is *nemekharam*, "faithless to salt" (Gesenius, *Thesaur.* p. 790). The same force would be given by the preservative quality of salt (Bahrdt, *De Fœdere Salis* [Lips. 1761]; Hallervordt, *id.* [ibid. 1701]; Zeibich, *id.* [Ger. 1760]; Thomson, *Land and Book*, ii, 42 sq.). See COVENANT. It was possibly with a view to keep this idea prominently before the minds of the Jews that the use of salt was enjoined on the Israelites in their offerings to God; for in the first instance it was specifically ordered for the meat-offering (Lev. ii, 13), which consisted mainly of flour, and therefore was not liable to corruption (see Pontanus, *De Sale Sacrific.* [Traj. 1703]; Spencer, *De Legis Rit.* i, 5, 1). The extension of its use to burnt-sacrifices was a later addition (Ezra xliii, 24; Josephus, *Ant.* iii, 9, 1), in the spirit of the general injunction at the close of Lev. ii, 13. Similarly the heathens accompanied their sacrifices with salted barley-meal, the Greeks with their οὐλοχώραι (Homer, *Il.* i, 449), the Romans with their *mola salsa* (Horace, *Sat.* ii, 3, 200) or their *salsæ fruges* (Virgil, *Æn.* ii, 133). Salt, therefore, became of great importance to Hebrew worshippers: it was sold accordingly in the Temple market, and a large quantity was kept in the Temple itself, in a chamber appropriated to the purpose (Maii *Diss. de Usu Salis Symbol. in Rebus Sacris* [Giess. 1692]; Wokenius, *De Salitura Oblationum Deo Factar.* [Lips. 1747]; Josephus, *Ant.* xii, 3, 3; *Middoth*, v, 3; Othon, *Lex. Robb.* p. 668). It may, of course, be assumed that in all of these cases salt was added as a condiment; but the strictness with which the rule was adhered to—no sacrifice being offered without salt (Pliny, xxxi, 41), and still more the probable, though perhaps doubtful, admixture of it in incense (Exod. xxx, 35, where the term rendered "tempered together" is by some understood as "salted"—leads to the conclusion that there was a symbolical force attached to its use (Josephus, *Ant.* iii, 9, 1; Philo, ii, 255; Hottinger, *Jur. Heb. Legg.* p. 168); as was certainly the case with the Greeks and Romans (Pliny, *Hist. Nat.* xxxi, 44; Ovid, *Fast.* i, 337; Spencer, *De Leg. Rit.* iii, 2, 2; Lukemacher, *Antiq. Græc. Sacr.* p. 350; Hottinger, *De Usu Salis*, etc. [Marburg, 1708]; Schickedanz, *id.* [Servest. 1758]; Maius, *id.* [Giess. 1692]; Mill, *id.* [Uit. 1734]). Our Lord refers to the sacrificial use of salt in Mark ix, 49, 50, though some of the other associations may also be implied. The purifying property of salt, as opposed to corruption, led to its selection as the outward sign in Elisha's miracle (2 Kings ii, 20, 21), and is also developed in the New Test. (Matt. v, 13; Col. iv, 6). The custom of rubbing infants with salt (Ezra xvi, 4) originated in sanitary considerations, but received also a symbolical meaning (Richter, *De*

Usu Salis apud Priscos Profano et Sacro [Zittau, 1766]).

SALT, ECCLESIASTICAL USE OF. It would appear from a sentence of Augustine that in the 4th century it was customary to use salt in baptism, at least in Milan. Salt was placed in some churches on the tongues of the catechumens, as an emblem of wisdom and an admonition to attain it. With salt, milk and honey were given. In the *Sacramentary* of Gregory the Great, after a form for the benediction and consecration of salt, it is said, "Hac oratione expleta, accipiat sacerdos de eodem sale, et ponat in ore infantis, dicendo, Accipe sal sapientiæ in vitam æternam" ("This benediction being finished, let the priest take a portion of the same salt and put it into the mouth of the infant, saying, Take the salt of wisdom to eternal life").

SALT, CITY OF (Heb. *Ir ham-Me'elach*, יִרְחַם־מֶלַח; Sept. αἱ πόλεις Σαδών, v. r. ἡ πόλις τῶν ἁλῶν; Vulg. *civitas Salis*), the fifth of the six cities of Judah which lay in the "wilderness" (Josh. xv, 62). Its proximity to Engedi, and the name itself, seem to point to its being situated close to, or at any rate in the neighborhood of, the Salt Sea. Dr. Robinson (*Bib. Res.* ii, 109) expresses his belief that it lay somewhere near the plain at the south end of that lake, which he would identify with the Valley of Salt (q. v.). This, though possibly supported by the reading of the Vatican Sept., "the cities of Sodom," is at present a mere conjecture, since no trace of the name or the city has yet been discovered in that position. On the other hand, Van de Velde (*Syr. and Pal.* ii, 99; *Memoir*, p. 111, and *Map*) mentions a *Nahr Maleh* which he passed in his route from Wady el-Rmail to Sebbeh, the name of which (though the orthography is not certain) may be found to contain a trace of the Hebrew. It is one of four ravines which unite to form the Wady el-Bedûn. Another of the four, Wady 'Amreh (*ibid.*), recalls the name of Gomorrah, to the Hebrew of which it is very similar. It seems most probable that it took its name from salt works or mines. At the south-western extremity of the Dead Sea stands a remarkable range of hills of pure salt, and near them "the City of Salt" was perhaps situated. There are ancient ruins at the mouth of Wady Zuweirah, at the northern end of the range; and others at Um-Baghek, five miles farther north. One or other of these places may mark the site of "the City of Salt" (Van de Velde, *Memoir*, p. 345; Tristram, *Land of Israel*, p. 318 sq.). See JUDAH.

SALT, COVENANT OF. See COVENANT; SALT.

SALT SEA, usually known as "the Dead Sea." This is the largest lake in Palestine, and in many respects the most remarkable in the world. Well known as it has always been, its peculiarities have scarcely yet been adequately explored.

I. Names.—This body of water has received a variety of designations from writers both ancient and modern; and, as they are characteristic, they demand a brief examination here.

1. "The Salt Sea" is the most common Scripture appellation (יָם הַמֶּלַח, *Yâm ham-Melach*; Sept. ἡ θάλασσα τῶν ἁλῶν, or ἁλός; also ἡ θάλασσα ἡ ἀλυκῆς; Vulg. *Mare Salis*). It is evidently a descriptive name, probably intended to indicate both the saltiness of its water and the character of the plain and hills along its southern margin (Reland, *Palæst.* p. 240). It occurs in the earliest books of the Bible, but is not found later than the time of Joshua (Gen. xiv, 3; Numb. xxxiv, 3; Deut. iii, 17; Josh. iii, 16; xv, 2, 5; xviii, 19). In the Talmudical books it is likewise called "the Sea of Salt" (יָם דִּמְלַחָה). See quotations from the Talmud and the Midrash Tehillim by Reland (*Palæst.* p. 237).

2. "The Sea of the Plain," or, more properly, of the *Arabah* (יָם הָאֲרָבָה, *Yâm ha-Arabâh*; Sept. [ἡ] Σαῖ-

λασσα [ῥῆς] Ἀραβία; Vulg. *Mare solitudinis*), is also a descriptive title, showing its geographical position in the centre of the great valley of the Arabah. It is first employed in combination with the preceding, as if Moses had heard it on his approach to Palestine (Deut. iii, 17); and possibly it may have afterwards supplanted the older name (iv, 49; 2 Kings xiv, 25), with which it is sometimes associated (Josh. iii, 16; xii, 3; Deut. i, 17). See ARABAH.

3. "The East Sea" is the only other name employed in Scripture *הַיָּם הַקְּדֹמוֹנִי*, *ha-Yām hak-Kadmoni*; Sept. ἡ θάλασσα ἡ πρὸς ἀνατολὰς; Vulg. *Mare Orientale*). It is used by Ezekiel (xlvii, 18), Joel (ii, 20), and Zechariah (xiv, 8, where the A. V. has "the former sea," although the Hebrew is the same), to distinguish it from the Mediterranean, which was called "the western" (הַיָּם הַמְּדִינִי, literally "latter," though when opposed to קְדֹמוֹנִי it means "western").

In one passage (Ezek. xlvii, 8) it is styled, without previous reference, "the Sea" (הַיָּם, *ha-Yām*), and distinguished from "the great sea"—the Mediterranean—(ver. 10).

4. The Sea of Sodom (יַם שֶׁל סְדוֹם) is found in the Talmud (Reland, p. 237, 243), no doubt because common tradition represented the city of Sodom as having been engulfed by it. Its connection with Sodom is first suggested in the Bible in the book of 2 Esdras (v, 7) by the name "Sodomitish sea" (*mare Sodomiticum*).

5. Josephus, and before him Diodorus Siculus (ii, 48; xix, 98), names it the *Asphaltic Lake*—ἡ Ἀσφαλτῖτις λίμνη (*Ant.* i, 9; iv, 5, 1; ix, 10, 1; *War.* i, 33, 5; iii, 10, 7; iv, 8, 2, 4), and once λ. ἡ ἀσφαλτοφόρος (*Ant.* xvii, 6, 5). Also (*ibid.* v, 1, 22) ἡ Σοδομίτις λίμνη. This name was adopted by Galen and other ancient writers, apparently because bitumen or asphaltum was often found floating on its surface or lying along its shores (Reland, p. 241).

6. The name *Dead Sea* appears to have been first used in Greek (θάλασσα νεκρά) by Pausanias (v, 7) and Galen (iv, 9), and in Latin (*mare mortuum*) by Justin (xxxvi, 3, 6), or, rather, by the older historian, Trogus Pompeius (B.C. cir. 10), whose work he epitomized. It is employed also by Eusebius (*Onomast.* s. v. Σόδομα). The expressions of Pausanias and Galen imply that the name was in use in the country; and this is corroborated by the expression of Jerome (*Comm.* on Dan. xi, 45), "Mare . . . quod nunc appellatur mortuum." The origin of this name is given by Jerome (*ad Ezek.* xlvii), "In quo nihil poterat esse vitale;" and in this respect modern research has to a large extent confirmed ancient tradition, proving that the name is appropriate. The Jewish writers appear never to have used it, but it has become established in modern literature from the belief in the very exaggerated stories of its deadly character and gloomy aspect, which themselves probably arose out of the name, and were due to the preconceived notions of the travellers who visited its shores, or to the implicit faith with which they received the statements of their guides. Thus Maundeville (ch. ix) says it is called the Dead Sea because it moveth not, but is ever still—the fact being that it is frequently agitated, and that when in motion its waves have great force. Hence also the fable that no birds could fly across it and live, a notion which the experience of almost every modern traveller to Palestine would contradict.

7. The Arabic name is *Bahr Lūt*, "the Sea of Lot." The name of Lot is also specially connected with a small piece of land, sometimes island, sometimes peninsula, at the north end of the lake. Another frequent designation among the modern inhabitants is *El-Baheiret el-Myetah*, "Dead Sea," suggested by its character.

II. *Physical Features.*—1. *General Position.*—The Dead Sea is situated in the lowest part of that great valley which stretches in a direct line due south from

the base of Hermon to the head of the gulf of Akabah. The valley is a chasm or fissure in the earth's crust, being for nearly 200 miles below the level of the ocean. The Dead Sea is the reservoir into which all its waters flow, and from which there is, and can be, no escape except by evaporation. It is the lowest and largest of the three lakes which interrupt the rush of the Jordan's downward course. It is, in fact, a pool left by the ocean in its retreat from what there is reason to believe was at a very remote period a channel connecting the Mediterranean with the Red Sea. As the most enduring result of the great geological operation which determined the present form of the country, it may be called, without exaggeration, the key to the physical geography of the Holy Land. It is therefore in every way an object of extreme interest.

The valley is shut in on the east and west by parallel ranges of mountains, having steep, rugged, and bare sides, furrowed by wild ravines. The eastern range is somewhat higher than the western. In the parallel of Jericho the ranges expand slightly, and the valley there attains its greatest breadth—about twelve miles; but they contract again at the northern end of the Dead Sea, and continue in parallel lines throughout its entire length. The cliffs which hem in the valley are here steeper, higher, and wilder than elsewhere, and the scenery is more bleak and desolate. The sea occupies the whole width of the valley, in many places washing the sides of the cliffs.

2. *Terrace Banks.*—It is deserving of special note that the mountain-sides and low plains on both the eastern and western shores of the Dead Sea are marked by a series of terraces, manifestly water-lines of some remote ages. The highest is very distinctly seen on the mountain-chain of Moab, extending along the tops of the cliffs like a huge shelf. Its elevation appears to be about 1300 feet; and on the western range, at various places, there is a corresponding terrace. This terrace has been frequently noticed by travellers, but special attention was recently given to it by Tristram who remarks: "These terraces in the old Secondary limestone must be about the present level of the Mediterranean, and they seem to tell of a period long antecedent to the Tertiary terraces and deposits below, when the old Indian Ocean wore the rocks and scooped out the caverns, as its unbroken tide swept up from the coasts of Africa; or when the Salt Sea formed one in a chain of African lakes" (*Land of Israel*, p. 247).

About 230 feet above the present level of the Dead Sea are traces of another ancient shore-line, marked by a strip of alluvial marl adhering to the rocks and cliffs, particularly at the north-west angle, and down as far as Ras el-Feshkiah (*ibid.* p. 256). It is also seen at Wady Derejah and Ain-Jidy. The deposit is mixed with shells of existing species, layers of gypsum, and gravel. Where there are ravines running down to the sea between high cliffs, the deposit reaches up their sides in places to a height of 400 feet, and then slopes away in a series of terraces to the present level of the sea, as if the water had gradually and slowly evaporated. At one point Tristram counted on the shore "no less than eight low gravel terraces, the ledges of comparatively recent beaches, distinctly marked. The highest of these was forty-four feet above the present sea-level" (p. 278). At Jebel Shukif, a short distance north of Engedi, Tristram, in addition to the lower terraces noted elsewhere, measured the elevations of three high terraces. The first at a height of 322 feet, marked by a deposit of marl on limestone; the second 665 feet, formed of hard limestone; and the third 1654 feet, of crystalline limestone (*ibid.* p. 295).

3. *Circuit of the Shore.*—The contour of the Dead Sea, as delineated in most maps, is regular, the shore-lines having few indentations, and the curves at the north and south being uniform. Recent researches—especially those of Lynch, Robinson, and Tristram—have shown that this regularity of outline is incorrect.

The western shore especially has long promontories and deep bays, and the curves at the north and south are very far from being so gracefully rounded as most cartographers have delineated them.

On the north, at the embouchure of the Jordan, a low promontory is in process of gradual formation by the muddy deposits brought down by the river. It is mostly bare, destitute of all vegetation, and, like the adjoining plain, covered with a nitrous crust. At present it projects into the lake more than a mile. When the water is very high, a portion is overflowed. To the westward lies a deep bay, and beyond it a long, low isthmus, covered with cairns of loose rounded stones. De Saulcy has given to this isthmus the name *Rejûm Lât*, "Lot's ruin;" but this name is not heard on the spot. The ruins are shapeless and desolate. They are of the highest antiquity, and may perhaps be of the æra of the "cities of the plain."

The shore-line now trends, with an easy curve, to the south-west, and then to the south, until it reaches the bold headland of *Ras el-Feshkhah*. So far it is flat and sandy, and the adjoining plain dreary and naked, save where, at long intervals, a little brackish spring rises, or a tiny streamlet flows, and there cane-brakes and shrubberies of tamarisk are seen. Ridges of drift mark the water-line, and are composed of broken canes and willow branches, with trunks of palms, poplars, and other trees, half imbedded in slimy mud, and all covered with incrustations of salt.

A few miles north of *Ras el-Feshkhah* are some confused heaps and long ridges of loose unhewn stones and mounds of earth, to which De Saulcy has given the name *Gumran*. Other travellers, however, have been unsuccessful in discovering here any traces of a ruined city, or of the name which the French savant has given to it (*Tristram*, p. 249; *Porter, Handbook*, p. 203).

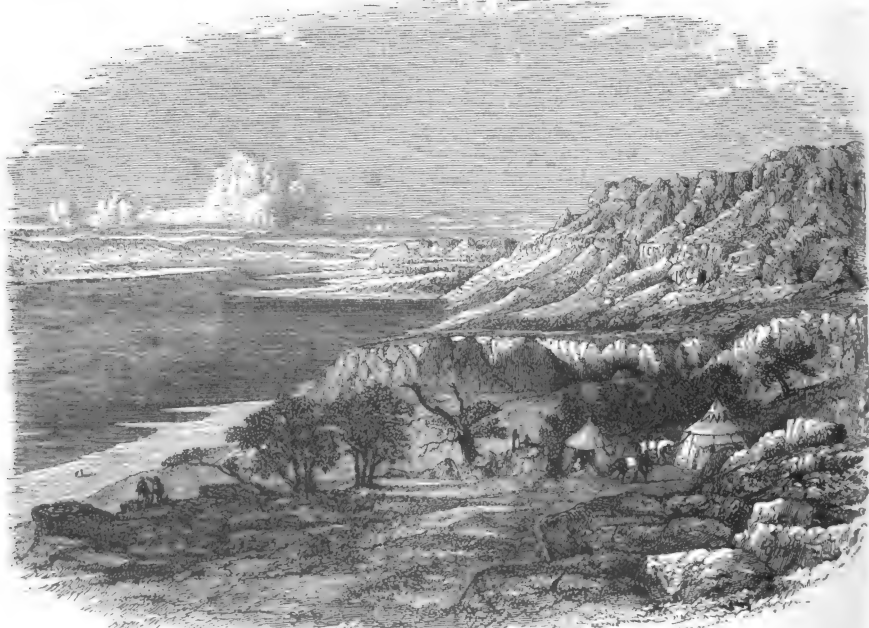

Ras el-Feshkhah is a bold headland of crystalline limestone, descending from a height of some 1500 feet in broken cliffs into the deep sea. It bars all passage along the shore; but *Tristram* by great exertions climbed round its face. It is cleft asunder by *Wady en-Nar*, the continuation of the *Kidron*. At the base of the cliff is a vein of bituminous limestone, largely used in the manufacture of little ornaments which are

sold to the pilgrims at Jerusalem. "The substance seemed to have been partially ejected in a liquid form, and to have streamed down the cliffs. It was generally mixed with flints and pebbles, sometimes covering the boulders in large splashes, and then, in the sea itself, formed the matrix of a very hard conglomerate of gravel and flints. When thrown into the fire, it burned with a sulphurous smell, but would not ignite at the flame of a lamp" (*Tristram*, p. 254).

South of *Ras el-Feshkhah* the cliffs retreat, leaving a plain along the shore, varying from one to two miles in breadth, and extending to *Ain-Terabeh*, about six miles distant. The plain is an alluvial deposit with layers of gravel, and having spits of pure sand projecting at intervals into the sea. It is partially covered with shrubberies of tamarisk, acacia, and retem (a species of broom; the *Genista rætam* of Forskal, abounding in the peninsula of Sinai), and towards the south with dense cane-brakes. The coating of alluvial marl which once covered it is now in many places worn away; and deep gullies rend it in all directions. Enough remains to show that its top, like that of the plains at the northern and southern ends of the lake, formed the old Tertiary level of the waters (*ibid.* p. 256).

In the plain is a copious brackish spring, with a temperature of 96° Fahr. Farther south is *Ain-Terabeh*, a small fountain, slightly brackish, oozing up from the sand a few feet from the shore. Between it and the cliffs is a dense thicket abounding with birds and beasts: ducks, teal, pochard, thrush, bulbul; with swine, leopard, jackal, fox, hare, and porcupine (*ibid.* p. 273).

From *Ain-Terabeh* to *Ras Mersed* (six miles) the coast plain is a mere strip, frequently interrupted by rocky headlands which dip into the waves. Bitumen is here abundant with pebbles imbedded. "In a little bay, just before reaching *Wady Shukif*, we were struck by a powerful sulphurous odor, and after some search found hot water bubbling through the gravel, at a temperature of 95° Fahr., only six inches from the sea. The smell of sulphur and rotten eggs was very strong, and while scooping in the gravel my hands became quite black, and my boots were covered with a yellow incrustation. Pebbles thrown in became incrustated with sulphur in a few minutes, and all the rocks in the sea,

The Dead Sea from *Ain-Jidy*, looking south.

which were here quite hot—of the temperature of 80° Fahr.—were covered with it. There must be an enormous discharge of this mineral water under the sea, as the heat of the water extends for two hundred yards, and the odor to a much greater distance. The ordinary temperature of the sea elsewhere was 62° (*ibid.* p. 279). On the south side of this spring is Jebel Shukif, a high, bold peak projecting into the sea. Two miles beyond it is the oasis of Engedi, a plain some two miles square, forming a delta to two glens which empty into it perennial streamlets of fresh water. These, with the “fountain of the kid” itself, make this spot a paradise in the midst of a dreary desert. See ENGEDI.

South of Engedi the plain becomes wider, but it is bare and desolate. The cliffs rise over it in broken masses of pale-brown limestone, divided by yawning chasms, while the alluvial deposits along their base are as white as snow. Two miles southward a spring of fetid water (Birket el-Khulil) oozes up on the margin of the sea, having a temperature of 88° Fahr. Other springs must exist beneath the waves, for the water near the shore is much hotter than elsewhere, and the whole surrounding air is filled with fumes of sulphuretted hydrogen. No traces of trap-rock are anywhere seen; but near Wady Khuderah are veins of crystalline limestone, and great quantities of flint, coated with oxide of iron. These De Saulcy and others mistook for lava torrents. The coast has the same general features as far as the hill and fortress of Sebbeh, the ancient Masada (q. v.). There, at the base of the hill, are the remains of a Roman camp; and beyond it the aspect of the plain is that of utter and even painful sterility. “Elsewhere the desolation is comparatively partial; here it reigns supreme. The two miles of rugged slope that lay between our path and the sea are difficult to describe. They are formed of a soft, white, and very salt deposit, torn and furrowed by winter torrents in every direction, which have left fantastic ruins and castles of olden shape, flat-topped mamelons, cairns, and every imaginable form into which a wild fancy could have moulded matter, standing in a labyrinth, north and south, before and behind us” (*ibid.* p. 315). The Birket el-Khulil just alluded to is a shallow depression on the shore, which is filled by the water of the lake when at its greatest height, and forms a natural salt-pan. After the lake retires the water evaporates from the hollow, and the salt remains for the use of the Arabs. They also collect it from similar though smaller spots farther south, and on the peninsula (Irby, June 2). One feature of the beach is too characteristic to escape mention—the line of drift-wood which encircles the lake, and marks the highest, or the ordinary high, level of the water. It consists of branches of brushwood, and of the limbs of trees, some of considerable size, brought down by the Jordan and other streams, and in course of time cast up on the beach. They stand up out of the sand and shingle in curiously fantastic shapes, all signs of life gone from them, and with a charred though blanched look very desolate to behold. Among them are said to be great numbers of palm-trunks (Poole, p. 69); some doubtless floated over from the palm-groves on the eastern shore already spoken of, and others brought down by the Jordan in the distant days when the palm flourished along its banks. The drift-wood is saturated with salt, and much of it is probably of a very great age.

Farther south the shore recedes, forming a bay some eight miles in length, the water in places almost washing the base of the cliffs. One wild glen, called Um-Baghek, breaks through the mountains, and sends out a tiny stream with a dense fringe of evergreens. Not far from it is another hot sulphur spring, which spreads its suffocating odors around. On the south the bay is bounded by the oasis of the Wady Zuweireh—a plain of some extent, sprinkled with tamarisks and acacias, and torn in all directions with torrent-beds, through which the winter rains and the streamlets from numer-

ous sulphurous and brackish springs find their way to the sea. The cliffs and peaks which rise over the oasis appear from a distance to exhibit traces of volcanic action, but closer inspection proves that there are no igneous rocks here or elsewhere along the western shore. Veins of ruddy limestone, blocks of ironstone, and multitudes of nodules of black flint look like trap-dikes and craters in the distance. There are, however, a few cinders and scoræ observable here and there along the shore.

A short distance south of the Wady Zuweireh is Jebel Usdum, a range of hills running from north to south a distance of seven miles, with an average elevation of three hundred feet, composed of a solid mass of rock-salt. The top and sides are covered with a thick coating of marl, gypsum, and gravel, probably the remains of the Post-tertiary deposit uplifted upon the salt. The declivities of the range are steep and rugged, pierced with huge caverns, and the summit shows a serried line of sharp peaks. The salt is of a greenish-white color, with lines of cleavage as if stratified, and its base reaches far beneath the present surface. The name of the range, Khashm Usdum, appears to preserve a memorial of the ancient guilty “city of the plain.” See SODOM.

At the mouth of the Wady Zuweireh are some heaps of rough stones and the shattered walls of a small tower, marked by De Saulcy as the remains of Sodom. That city may have stood in this region, but it requires some power of imagination to identify it with these insignificant ruins.

At the northern end of Jebel Usdum is the mouth of Wady Muhawât, which exhibits some very remarkable geological features. Its sides are cliffs of old limestone, showing here and there on their surface traces of Post-tertiary marl; “but since the marl has been washed out there has been a second filling-in of an extraordinary character, which is only now in course of denudation. There are exposed on the sides of the wady, and chiefly on the south, large masses of bitumen mingled with gravel. These overlies a thick stratum of sulphur, which again overlies a thicker stratum of sand so strongly impregnated with sulphur that it yields powerful fumes on being sprinkled over a hot coal.” Many blocks of the bitumen have been washed down the gorge, and lie scattered over the plain below along with huge boulders and other traces of tremendous floods. . . . The layer of sulphurous sand is generally evenly distributed on the old limestone base, the sulphur evenly above it, and the bitumen in variable masses. In every way it differs from the ordinary mode of deposit of these substances as we have seen them elsewhere. Again, the bitumen, unlike that which we pick up on the shore, is strongly impregnated with sulphur, and yields an overpowering sulphurous odor; above all, it is calcined, and bears the marks of having been subjected to extreme heat.” This discovery is exceedingly important; and the remarks of Tristram upon it will be read with the deepest interest by all students of the Bible. “Here, so far as I can judge, we have the only trace of anything approaching to volcanic action which we have met with in our careful examination of the northern, western, and southern shores. The only other solution of the problem—the existence of a bituminous spring when the supply of water was more abundant—would scarcely account for the regular deposition of sulphurous sand, and then of the sand with the bitumen superimposed. I have a great dread of seeking forced corroborations of scriptural statements from questionable physical evidence, for the sceptic is apt to imagine that when he has refuted the wrong argument adduced in support of a scriptural statement, he has refuted the scriptural statement itself; but, so far as I can understand this deposit, if there be any physical evidence left of the catastrophe which destroyed Sodom and Gomorrah, or of similar occurrences, we have it here. The whole appearance

points to a shower of hot sulphur, and an irruption of bitumen upon it, which would naturally be calcined and impregnated by its fumes; and this at a geological period quite subsequent to all the diluvial and alluvial action of which we have such abundant evidence. The catastrophe must have been since the formation of the wady, since the deposition of the marl, and while the water was at its present level; therefore, probably during the historic period" (p. 355-357).

The shore-line runs for nearly three miles southward along the base of Jebel Usdum, and then sweeps sharply round to the east, leaving on the south a naked, miry plain called Sabkah, ten miles long from north to south by about six wide. It is in summer coated with a saline crust, but is so low that when the water is high a large section of it is flooded. Numerous torrent-beds from the salt range on the west, and from the higher ground of the Arabah on the south, run across it, converting large portions into impassable swamps. On its southern border the old diluvium terrace rises like a white wall to a height of more than two hundred feet. It is only on getting close to it that the sides are seen to be rent and torn into a thousand fantastic forms by winter torrents and the wearing-away of the softer deposits. The Sabkah is bounded on the east by Wady Tufeileh, one of the principal drains of the Arabah, and containing a brackish, perennial stream. Beyond it the character of the surface completely changes. The ground rises in an easy slope to the foot of the Moab Mountains, and is covered with dense thickets of reeds, tamarisk, acacia, retem, zyziphus, and other shrubs, intermixed with fertile fields, cultivated by the Ghawari-neh Arabs (as the inhabitants of the Ghôr are called, here the worst representatives of their race), and producing abundant crops of wheat, maize, indigo, melons, and cucumbers. Tristram says: "The place positively swarmed with birds in countless myriads. There were doves by the score on every bush, large and small (*Turtur risorius* and *T. Egyptius*), bulbuls, the hopping-thrush, shrikes, the gorgeous little sun-bird resplendent in the light, and, once more, our new sparrow. The Abyssinian lark, pipits, and wagtails luxuriated in the moist rills at our feet, which were fringed by drooping tufts of caper (*Capparis Egyptiaca*) in full flower. All teemed with a prodigality of life" (p. 336).

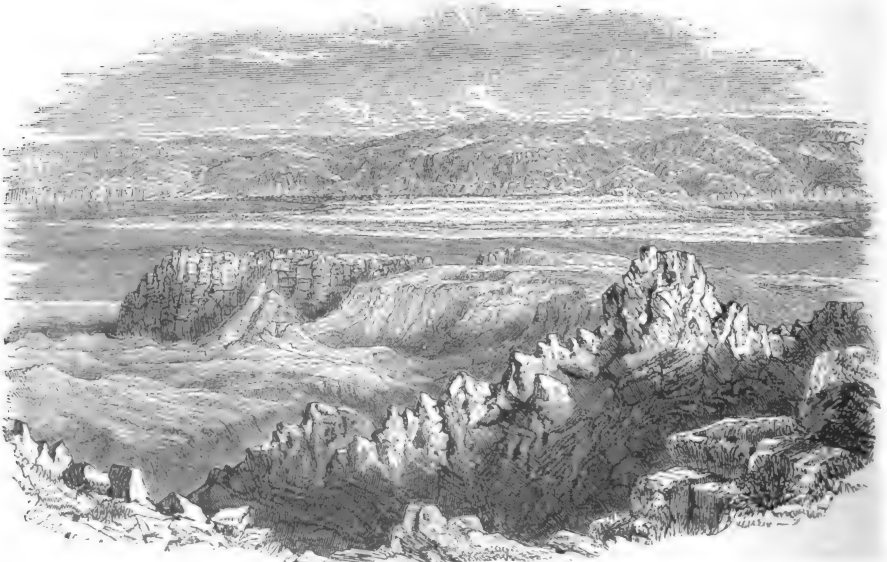

This fertile tract touches the south-eastern shore of the sea, and continues along it as it trends north-east

for some five miles to the mouth of the Wady Nimeireh, becoming gradually narrower as the shore-line approaches the rocky sides of the mountains. The geological formation of this eastern range is different from the western. The front cliffs are red sandstone, apparently overlying hard, crystalline limestone, and topped by more recent calcareous rock. Trap boulders and fragments of greenstone and sienite are strewn along the base.

Such are the great southern shores of the Dead Sea. The great valley is here narrower than at the northern shore, not because of any contraction in the mountain-ranges, but arising from the ridge of Usdum, which was evidently thrown up from the bottom of the valley at some period subsequent to the formation of the Arabah. The projecting base of Jebel Usdum on the west, and the high fertile region of Es-Safieh on the east, contract the southern end of the lake into the form of a semi-circular bay about six miles in diameter. A few miles farther north the shores on each side expand so much that the breadth of the sea is almost doubled. The general aspect of the shores is dreary and desolate in the extreme. The salt-incrusted plain, the white downs of the Arabah, the naked line of salt hills, the bare and scathed mountain-ranges on each side, all blazing under the rays of a vertical sun, form a picture of utter and stern desolation such as the mind can scarcely conceive.

On the northern side of Wady Nimeireh a narrow strip of saline plain, very low and very barren, intervenes between the shore and the mountains. Here and there, at a little fountain or at the mouth of a ravine, a clump of bushes or a cane-brake may be seen.

The *Peninsula of el-Lisân*, "the Tongue" [see *BAR*], is the most remarkable feature on the eastern shore. It juts out opposite the great ravine of Kerak. The neck connecting it with the mainland is a strip of low, bare sand, measuring five miles across. In outline the peninsula bears some resemblance to the human foot, the toe projecting northward and forming a sharp promontory. Its length is about nine miles, and from the heel or south-western point to the southern shore-line is seven miles. The main body is a Post-tertiary deposit composed of layers of marl, gypsum, and sandy conglomerate, manifestly coeval with the great diluvial terrace, and corresponding with it in elevation. The top is a table-land, broad towards the south, but gradually narrowing to a serried ridge at the northern end.

The Dead Sea from the heights behind Sebbeh (Masada), showing the wide beach on the western side of the lake and the tongue-shaped peninsula.

It is white and almost entirely destitute of vegetation. The surface is all rent and torn by torrent-beds; and the sides are worn away into pyramidal masses resembling lines and groups of white tents. It is worthy of special note that in the wadys and along the shores pieces of sulphur, bitumen, rock-salt, and pumice-stone are found in great profusion. Probably, if examined with care, geological phenomena similar to those in Wady Mahawât might be found on this peninsula, and some additional light thus thrown upon the destruction of the cities of the plain. Poole says "the soil appeared sulphurous" (*Journal R. G. S.* xxvi, 62-64).

The little plain at the mouth of Wady Draa, or Kerak, affords a striking contrast, in its thickets of evergreens and luxuriant corn-fields, to the arid desolation of the adjoining peninsula. It is here that the few inhabitants of the peninsula reside, in a wretched village called Mezra'ah.

The shore of the Dead Sea between the peninsula and the north-eastern angle has never been thoroughly explored. Seetzen, Irby and Mangles, De Saulcy, and more recently the party of the Duc de Luynes, visited a few places; and Lieut. Lynch and his officers touched at several points. A few miles north of el-Lisân the fertile plain called Ghor el-Mezra'ah terminates, and the mountains descend in sublime cliffs of red sandstone almost to the water's edge. Higher up, white, calcareous limestone appears, and forms at this place the main body of the range. Basalt also appears in places, sometimes overlying the limestone as on the plain of Bashan, at others bursting through the sandstone strata in dikes and veins. The ravines of Mojib (Armon) and Zerka Ma'n appear like huge rents in the mountains. Near the mouth of the latter veins of gray and black trap cut through the sandstone, and a copious fountain of hot, sulphurous water sends a steaming river into the sea amid thickets of palms and tamarisks. This is Callirrhœ, so celebrated in olden time for its baths. Between this point and the plain of the Jordan volcanic eruptions have produced immense flows of basaltic rock, portions of which had been overflowed into the valley of the Jordan. Among other smaller basaltic streams three were found bordering on the eastern edge of the Dead Sea to the south of the little plain of Zarah (M. Lartet's paper to French Academy of Sciences; see in *Journal of Sac. Lit.* July, 1865, p. 496).

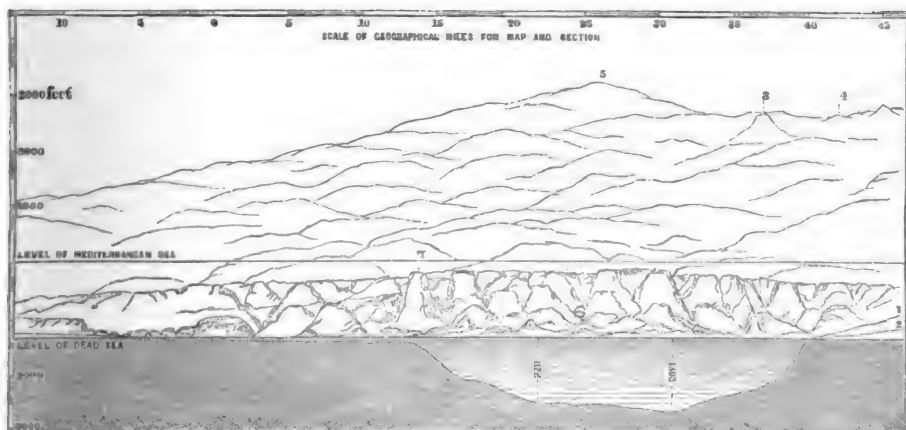

The plain between the mountains and the mouth of the Jordan is in general well watered, and covered with luxuriant vegetation and occasional thickets of tamarisk, retem, and acacia. At the ruins of Suweimeh, De Saulcy found a copious hot spring with a ruinous aqueduct (*Voyage en Terre-Sainte*, i, 317). Along

the shore pieces of pumice-stone, lava, and bitumen are found imbedded in the sand and mud as if washed up by the waves; and at this point are more distinct traces of volcanic action than elsewhere around the sea.

One remarkable feature of the northern portion of the eastern heights is a plateau which divides the mountains half-way up, apparently forming a gigantic landing-place in the slope, and stretching northward from the Wady Zerka Ma'n. It is very plainly to be seen from Jerusalem, especially at sunset, when many of the points of these fascinating mountains come out into unexpected relief. This plateau appears to be on the same general level with a similar plateau on the western side opposite to it, with the top of the rock of Sebbeh, and perhaps with the Mediterranean.

4. The dimensions of the Dead Sea have never yet been taken with sufficient accuracy. Its longest axis is situated nearly north and south. It lies between $31^{\circ} 6' 20''$ and $31^{\circ} 46'$ N. lat., nearly; and thus its water surface is from N. to S. as nearly as possible 40 geographical, or 46 English miles long. On the other hand, it lies between $35^{\circ} 24'$ and $35^{\circ} 37'$ E. long., nearly; and its greatest width (some three miles south of Ain-Jidy) is about 9 geographical miles, or $10\frac{1}{2}$ English miles. The ordinary area of the upper portion is about 174 square geographical miles; of the channel, 29; and of the lower portion, hereafter styled the lagoon, 46—in all, about 250 square geographical miles. It must be remembered that this varies considerably at different seasons of the year, and in different years. When the sea is filled up by winter rains, the flat plain on the south is submerged for several miles. The annual rainfall, too, is not uniform in Palestine. Some years it is more than double what it is in others, and this produces a corresponding effect on the volume of water in the sea, and consequently on its area. At its northern end the lake receives the stream of the Jordan; on its eastern side the Zerka Ma'n (the ancient Callirrhœ, and possibly the more ancient en-Eglaim), the Mojib (the Arnon of the Bible), and the Beni-Hemâd. On the south the Kurâhy or el-Ahsy, and on the west that of Ain-Jidy. These are probably all perennial, though variable, streams; but, in addition, the beds of the torrents which lead through the mountains east and west, and over the flat, shelving plains on both north and south of the lake, show that in the winter a very large quantity of water must be poured into it. There are also all along the western side a considerable number of springs, some fresh, some warm, some salt and fetid, which appear to run continually, and all find their way, more or less absorbed by the sand and shingle of the beach, into its waters.

The peninsula of Lisân divides the sea into two sec-

Section of the Dead Sea from North to South.

1. Jericho; 2. Ford of the Jordan; 3. The Frank Mountain; 4. Bethlehem; 5. Hebron; 6. Ain-Jidy; 7. Sebbeh (Masada).

tions: that on the north is an elongated oval in form, while that on the south is almost circular. The narrowest part of the channel between the peninsula and the mainland is not much more than two miles across. The northern section is a deep, regularly formed basin, the sides descending steeply and uniformly all round, as well on the north and south as on the east and west. This is one of the most remarkable features of the sea. Lynch ran seven lines of soundings across it from shore to shore, and found it deepest between Ain-Terabeh and Wady Mojib, that is, about the centre of the northern section. From this point the depth decreased gradually towards the Lisân on the south and the mouth of the Jordan on the north. The greatest depth found by Lynch was 1308 feet, but Lient. Molyneux records one sounding taken by him as 1350 feet. The deep part of the lake terminates at the peninsula. The greatest depth of the channel between the Lisân and the western shore is only thirteen feet, and no part of the southern section was more than twelve feet in depth (Lynch, *Official Report*, p. 43).

It appears that when the water is very low there are two practicable fords from the peninsula to the mainland—one across the narrow channel, and the other running from the isthmus to the northern point of Jebel Usdum (Seezter, *Reisen*, ii, 358; Irby and Mangles, *Travels*, p. 140).

5. The depression of the Dead Sea is without a parallel in the world. From experiments made by boiling water in 1837, Messrs. Moore and Beke supposed the depression to be about 500 feet. In the following year, Russegger with his barometer made it about 1400 feet. Symonds by trigonometrical survey, in 1841, calculated the depression at 1312 feet; and the level run by Dale, an officer of Lynch's expedition, gave a result of 1316 feet. A still more careful measurement has been recently made by the corps of English engineers under Capt. Wilson, with the following result: "The levelling from the Mediterranean to the Dead Sea has been performed with the greatest possible accuracy, and by two independent observers, using different instruments, and the result may be relied upon as being absolutely true to within three or four inches. The depression of the surface on March 12, 1865, was found to be 1292 feet; but from the line of drift-wood observed along the border of the Dead Sea, it was found that the level of the water at some period of the year—probably during the winter freshets—stands two feet six inches higher, which would make the least depression 1289.5 feet. Capt. Wilson also learned, from inquiry among the Bedouin, and from European residents in Palestine, that during the early summer the level of the Dead Sea is lower by at least six feet. This would make the greatest depression to be as near as possible 1298 feet. . . . The most recent observation before that now given, by the Duc de Luynes and Lient. Vignes, of the French navy, agrees with our result in a very remarkable manner, considering that the result was obtained by barometric observation, the depression given by them being 1286 feet on June 7, 1864, which at most differs only twelve feet from the truth, if we suppose the Dead Sea was then at its lowest" (Sir Henry James, in the *Athenæum*).

The exact amount of the depression will, of course, vary with the rise and fall of the waters at different seasons. Traces along the shore prove that the level has varied as much as fifteen feet within the past half century (Robinson, *Physical Geography*, p. 190). It is a singular coincidence that the depth and depression of the Dead Sea are very nearly equal, each about 1300 feet; the elevation of Jerusalem above the Mediterranean is about twice, and above the Dead Sea about three times that number (*ibid.* p. 190).

6. The water of the Dead Sea is more intensely salt than that of any other sea known. It has also a bitter, nauseous taste, and leaves upon the skin a slightly greasy feeling. Yet it is transparent as the water of the Mediterranean, and its color is the same—a delicate green.

Its specific gravity, and consequent buoyancy, is very great. Bathers float easily in an upright position with head and shoulders above the surface. Lynch says that eggs, which would have sunk in the ocean, floated here with only two thirds immersed. This peculiarity was well known to the ancients (Josephus, *War*, iv, 8, 4; Aristot. *Meteor.* ii, 3; see also in Reland, p. 241, 249). Of its weight and inertia the American expedition had also practical experience. In the gale in which the party were caught on their first day on the lake, between the mouth of the Jordan and Ain-Feshkhah, "it seemed as if the bows of the boats were encountering the sledge-hammers of the Titans." When, however, "the wind abated, the sea rapidly fell; the water, from its ponderous quality, settling as soon as the agitating cause had ceased to act" (Lynch, *Narrative*, p. 268). At ordinary times there is nothing remarkable in the action of the surface of the lake. Its waves rise and fall, and surf beats on the shore, just like the ocean. Nor is its color dissimilar to that of the sea. The water has an oily feel, owing possibly to the saponification of the lime and other earthy salts with the perspiration of the skin, and this seems to have led some observers to attribute to it a greasy look; but such a look exists in imagination only. It is quite transparent, of an opalescent green tint, and is compared by Lynch (*ibid.* p. 337) to diluted absinthe. Lynch (p. 296) distinctly contradicts the assertion that it has any smell, noxious or not. So do the chemists who have analyzed it. One or two phenomena of the surface may be mentioned. Many of the old travellers, and some modern ones (as Osburn, *Pal. Past and Present*, p. 443, and Churton, *Land of the Morning*, p. 149), mention that the turbid, yellow stream of the Jordan is distinguishable for a long distance in the lake. Molyneux (p. 129) speaks of a "curious broad strip of white foam which appeared to lie in a straight line nearly north and south throughout the whole length of the sea . . . some miles west of the mouth of the Jordan" (comp. Lynch, *Narrative*, p. 279, 295). "It seemed to be constantly bubbling and in motion, like a stream that runs rapidly through still water; while nearly over this track during both nights we observed in the sky a white streak like a cloud extending also north and south, and as far as the eye could reach." Lines of foam on the surface are mentioned by others, as Robinson (*Physical Geography*, i, 503), Borrer (*Journey*, etc., p. 479), Lynch (*Narrative*, p. 288). From Ain-Jidy a current was observed by Mr. Clowes's party running steadily to the north not far from the shore (comp. Lynch, *ibid.* p. 291). It is possibly an eddy caused by the influx of the Jordan. Both De Saulcy (*Narrative*, Jan. 8) and Robinson (*Physical Geography*, i, 504) speak of spots and belts of water remaining smooth and calm while the rest of the surface was rippled, and presenting a strong resemblance to islands (comp. Lynch, *Narrative*, p. 288; Irby, *Travels*, June 5). The haze or mist which perpetually broods over the water has already been mentioned. It is the result of the prodigious evaporation. Lynch continually mentions it. Irby (June 1) saw it in broad transparent columns, like waterspouts, only very much larger. Extraordinary effects of mirage, due to the unequal refraction produced by the heat and moisture, are occasionally seen (Lynch, *Narrative*, p. 320). The remarkable weight of this water is due to the very large quantity of mineral salts which it holds in solution. The details of the various analyses are given in the following table, accompanied by that of sea-water for comparison. From that of the United States expedition it appears that each gallon of the water, weighing 12½ lbs., contains nearly 3½ lbs. (3.319) of matter in solution—an immense quantity when we recollect that sea-water, weighing 10½ lbs. per gallon, contains less than ½ lb. Of this 3½ lbs. nearly 1 lb. is common salt (chloride of sodium), about 2 lbs. chloride of magnesium, and less than ½ lb. chloride of calcium (or muriate of lime). The most unusual ingredient is bromide of magnesium, which exists in a truly extraordinary quantity. To its

presence is due the therapeutic reputation enjoyed by the lake when its water was sent to Rome for wealthy invalids (Galen, in Reland, *Palest.* p. 242) or lepers flocked to its shores (Ant. Mart. § 10). Bousisingault (*Ann. de Chimie*, 1856, xlviii, 168) remarks that if ever bromide should become an article of commerce, the Dead Sea will be the natural source for it. It is the magnesian compounds which impart so nauseous and bitter a flavor to the water. The quantity of common salt in solution is very large. Lynch found (*Narrative*, p. 377) that while distilled water would dissolve $\frac{1}{57}$ of its weight of salt, and the water of the Atlantic $\frac{1}{3}$, the water of the Dead Sea was so nearly saturated as only to be able to take up $\frac{1}{17}$. The above differences in the analysis of the water of the Dead Sea must be expected. When the sea is flooded by freshets, the amount of salts in solution will be less; when low, after the evaporation of the summer, the amount will be more. The presence of these foreign ingredients in such quantities is easily accounted for. The washings of the salt range of Usdum, and numerous brackish springs along the shores, supply the salt; the great sulphur fountain at Callirrhoe, and many others on the north and west, with the sulphur, bitumen, iron, etc., found so abundantly in the later deposits, supply the other ingredients. It is known also that large masses of bitumen are occasionally forced up from the bed of the sea; and it may be that beneath its waves are fountains and deposits more numerous and more remarkable than those in the surrounding rocks and plains. Then, too, the constant evaporation takes away the pure water, but leaves behind all the salts, which are thus gradually increasing in quantity.

Of the temperature of the water more observations are necessary before any inferences can be drawn. Lynch (*Report*, May 5) states that a stratum at 59° Fahr. is almost invariably found at ten fathoms below the surface. Between Wady Zerka and Ain-Terabeh the temperature at surface was 76°, gradually decreasing to 62° at 1044 feet deep, with the exception just named (*Narrative*, p. 374). At other times, and in the lagoon, the temperature ranged from 82° to 90°, and from 5° to 10° below that of the air (*ibid.* p. 310-320; comp. Poole, Nov. 2). Dr. Stewart (*Tent and Khan*, p. 381), on March 11, 1854, found the Jordan 60° Fahr. and the Dead Sea (north end) 73°; the temperature of the air being 83° in the former case and 78° in the latter.

The water is fatal to animal life; and this fact, according to Jerome, originated the name *Dead Sea* (*Ad Ezech.* xlviii, 8; comp. Galen, *De Simpl.* iv, 19). Shells and small fish, in a dead or dying state, have been picked up along the northern shore, and are found in some of the little fountains along the western coast; but they are all of foreign importation. Recent investigations have led some to suppose that the Dead Sea does contain and support a few inferior organizations, but the fact has not as yet been established on conclusive evidence. Lying in this deep caldron, encompassed by naked white cliffs and white plains, exposed during a great part of the year to the unclouded beams of a Syrian sun, it is not strange that the shores of the Dead Sea should exhibit an almost unexampled sterility and a death-like solitude; nor is it strange that in a rude and unscientific age the sea should have become the subject of wild and wondrous superstitions. "Seneca relates that bricks would not sink in it. Early travellers describe the lake as an infernal region; its black and fetid waters always emitting a noisome smoke or vapor, which, being driven over the land, destroys all vegetation like a frost. Hence, too, the popular report that birds cannot fly over its deadly waters" (Robinson, *Physical Geography*, p. 199). Such stories are fabulous. It is true that the tropical heat causes immense evaporation, the exhalations from the sulphurous springs and marshes taint the air for miles, and the miasma of the swamps on the north and south gives rise to fevers, and renders the ordinary inhabitants feeble and sickly; but this has no necessary connection with the Dead Sea, or the character of its waters. The marshes of Iskanderûn are much more unhealthy than any part of the Ghôr. Wherever a copious fountain bubbles up along the shores, or a mountain stream-let affords water for irrigation, tangled thickets of tropical trees, shrubs, and flowers spread out their foliage. There birds sing as sweetly as in more genial climes, and the Arab pitches his tent like his brethren on the Eastern plateau, and an abundant harvest rewards the labors of the husbandman. Tristram exclaims with something of enthusiasm, "What a sanitarium Engedi might be made, if it were only accessible, and some enterprising speculator were to establish a hydropathic establishment! Hot water, cold water, and decidedly salt water baths, all supplied by nature on the spot, the hot sulphur springs only three miles off, and some of the

grandest scenery man ever enjoyed, in an atmosphere where half a lung is sufficient for respiration" (*The Land of Israel*, p. 295).

III. *Origin and History.*—It is a question of the highest importance, and one which has created much controversy among scientific and Biblical students, whether the present physical aspect of the Jordan valley and shores of the Dead Sea tends to throw any light upon its origin and changes, or upon the destruction of Sodom and Gomorrah. Our knowledge of the physical structure of the Jordan valley, and of the various strata and deposits along the shores of the Dead Sea, is not yet sufficiently extensive or minute to enable us to construct a satisfactory theory on the points at issue; but it may be well to state here in a few simple propositions what are the actual statements made in Scripture about the Dead Sea, and what are the facts which scientific investigation, so far as hitherto prosecuted, has established.

1. The references to the Dead Sea in Scripture are few, and mostly incidental. Three passages deserve special attention. (1.) In Gen. xiii, 10, where the sacred writer relates the story of the separation of Abraham and Lot, he represents the two as standing on the mountain-top east of Bethel. He then says, "Lot lifted up his eyes, and beheld all the plain (or circuit) of Jordan, that it was well watered everywhere, before the Lord destroyed Sodom and Gomorrah, even as the garden of the Lord, like the land of Egypt, as thou comest unto Zoar." It has been inferred from this that the cities of Sodom and Gomorrah, and the whole plain around them, must have been in sight at the time referred to, and must therefore have been situated at the northern end of the Dead Sea, which alone is visible from the height at Bethel. But a careful examination of the passage shows that this does not follow. The patriarchs looked towards "the circuit of the Jordan." It is not implied that they saw it all, nor is it said that Sodom and Gomorrah were in sight. They saw enough to give them a general idea of the whole region. One thing is evident from the statement: a remarkable change was effected in the plain at the time of the destruction of Sodom. It was fertile and well watered before that event, but manifestly not so, or not so much so, after it. This is corroborated by the narrative in Gen. xix, 24, 25.

(2.) The second passage is Gen. xiv, 2-10, which contains the story of Lot's capture. Ver. 3 is important: "All these (kings) were joined together in the vale of Siddim, which is the Salt Sea." There cannot be a doubt that the idea here expressed is that the district called in the time of Lot "the vale of Siddim" had become, in the time of the writer, "the Salt Sea," or at least constituted a part of that sea. The Hebrew phrase establishes the identity of the two just as certainly as the similar phrase in ver. 2 establishes the identity of Bela and Zoar. The clause is found in all the ancient MSS. and versions, and in the Targum of Onkelos. Its genuineness rests on the very same basis as the other portions of the narrative. It was manifestly the opinion of Moses that the vale of Siddim was submerged. Another point in the narrative demands attention. The route of the invading host is traced. They attacked the Rephaim in Bashan, then marched southward through Moab and Edom to Paran, on the west side of the Arabah, opposite Edom. There they turned, and after resting at the fountain of Kadesh, they swept the territory of the Amalekites on the south of Judah, and of the Amorites "who dwelt in Engedi." Having thus ravaged all the countries surrounding the cities of the plain, they descended upon their territory from the west. The inhabitants now came out against them, and were marshalled in the vale of Siddim. The exact locality of the vale is not described. It may have been north or it may have been south of Engedi. One thing, however, is certain: if the western shores of the sea were then as they are now, no army could have marched along them from Engedi to Jericho. On the other hand,

from Engedi there is a good path southward. It is said, moreover, that "the vale of Siddim was full of bitumen pits" (ver. 10). There is no part of the valley north of the sea to which this would apply; nor, indeed, is there any plain or vale along its shores "full of bitumen pits" at the present day. These facts render it impossible that the vale of Siddim could have been on the plain of Jericho, and they seem to confirm the previous statement that Siddim was submerged. See SIDDIM.

(3.) The third passage is Gen. xix, 24, 25: "Then the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord out of heaven; and he overthrew those cities, and all the plain, and all the inhabitants of the cities, and that which grew upon the ground." Abraham, when, on the succeeding morning, he reached the mountain-brow, "looked towards Sodom and Gomorrah, and towards all the land of the plain, and beheld, and lo, the smoke of the country went up as the smoke of a furnace" (ver. 28). As Abraham was at this time residing at Hebron, the view towards the south end of the Dead Sea would have been much more distinct than to the northern end, although the lake itself is visible from Beni-Naim (the traditional site of Abraham's interview with Jehovah) through gaps in the western mountains (Robinson, *Bib. Res.* ii, 189). See SODOM.

2. The physical facts ascertained by scientific research are as follows: The formation of the great valley of the Jordan must have been long antecedent to historic times, and coeval with the existing mountain-ranges; the valley was, at some remote period, filled with water to the level of the ocean; the water has gradually decreased, apparently by evaporation, and has left a number of shore-lines, traced by terraces along the mountain-sides, all antecedent to historic times; the portion of the Dead Sea north of el-Lisân forms a distinct basin, and appears to have done so from a time long anterior to Abraham. The southern section is different: it is very shallow; its bottom is slimy. "Sulphur springs stud its shores; sulphur is strewn, whether in layers or in fragments, over the desolate plains; and bitumen is ejected, in great, floating masses, from the bottom of the sea, oozes through the fissures of the rocks, is deposited with gravel on the beach, or, as in the Wady Mahawât, appears, with sulphur, to have been precipitated during some convulsion" (Tristram, p. 358), and that at a period long subsequent to the latest diluvial formation, and apparently within the historic period.

There can be no doubt that the destruction of the cities was miraculous. A shower of ignited sulphur was rained upon them. May we not connect this historic fact with the observed fact just stated? Again, it is said that "the plain of Siddim was filled with bitumen pits." Bitumen is inflammable, and, when ignited by the fiery shower, would burn fiercely. May we not also connect this with the phenomena of Wady Mahawât, of which Tristram says, "The whole appearance points to a shower of hot sulphur, and an eruption of bitumen upon it, which would naturally be calcined and impregnated with its fumes?" (p. 356). The sacred writer further says that the vale of Siddim became the Salt Sea, or was submerged. The southern part of the lake is now a muddy flat, covered with a few feet of water. Suppose the vale to have sunk a few feet, or the water to have risen a few feet, after the miraculous destruction of the cities: either supposition would accord with the Biblical narrative, would not be without a parallel in the history of countries exposed to earthquakes, and would not be opposed to any results of modern observation; it would accord, besides, with the views of ancient writers and with uniform Jewish tradition (Josephus, *Ant.* i, 9; *War.* iv, 8, 4; *Reland*, p. 254 sq.).

This was the view suggested by Dr. Robinson, and sanctioned by the distinguished geologist, Leopold von Buch. In his latest work, published since his death, Robinson says: "It seems to be a necessary conclusion that the Dead Sea extended no farther south than the

peninsula, and that the cities destroyed lay on the south of the lake as it then existed. Lot fled from Sodom to Zoar, which was *near* (Gen. xix, 20): and Zoar, as we know, was in the mouth of Wady Kerak as it opens upon the neck of the peninsula. The fertile plain, therefore, which Lot chose for himself, where Sodom was situated, and which was well watered, like the land of Egypt, lay also south of the lake 'as thou comest to Zoar' (Gen. xiii, 10, 11). Even to the present day, more living streams flow into the Ghôr at the south end of the sea, from wadys of the eastern mountains, than are found so near together in all Palestine besides. Tracts of exuberant fertility are still seen along the streams, though elsewhere the district around the southern bay is almost desert" (*Physical Geogr. of the Holy Land*, p. 213). Notwithstanding the arguments and almost contemptuous insinuations of some recent writers, not a single fact has been adduced calculated to overthrow this view; but, on the contrary, each new discovery seems as if a new evidence in its favor.

3. *Luter and Modern Notices.*—It does not appear probable that, with the above exception, the condition or aspect of the lake in ancient times was materially different from what it is at present. Other parts of Syria may have deteriorated in climate and appearance, owing to the destruction of the wood which once covered them; but there are no traces either of the ancient existence of wood in the neighborhood of the lake, or of anything which would account for its destruction, supposing it to have existed. A few spots—such as Ain-Jidy, the mouth of the Wady Zuweirah, and that of the Wady ed-Draa—were more cultivated, and, consequently, more populous, than they are under the discouraging influences of Mohammedanism. But such attempts must always have been partial, confined to the immediate neighborhood of the fresh springs and to a certain degree of elevation, and ceasing directly irrigation was neglected. In fact, the climate of the shores of the lake is too sultry and trying to allow of any considerable amount of civilized occupation being conducted there. Nothing will grow without irrigation, and artificial irrigation is too laborious for such a situation. The plain of Jericho, we know, was cultivated like a garden; but the plain of Jericho is very nearly on a level with the spring of Ain-Jidy, some 600 feet above the Ghôr el-Lisân, the Ghôr es-Safeh, or other cultivable portions of the beach of the Dead Sea. Of course, so far as the capabilities of the ground are concerned (provided there is plenty of water), the hotter the climate, the better; and it is not too much to say that if some system of irrigation could be carried out and maintained, the plain of Jericho, and still more the shores of the lake (such as the peninsula and the southern plain), might be the most productive spots in the world. But this is not possible, and the difficulty of communication with the external world would alone be (as it must always have been) a serious bar to any great agricultural efforts in this district.

When Machærus and Callirrhœ were inhabited (if, indeed, the former was ever more than a fortress, or the latter a bathing establishment occasionally resorted to), and when the plain of Jericho was occupied with the crowded population necessary for the cultivation of its balsam-gardens, vineyards, sugar-plantations, and palm-groves, there may have been a little more life on the shores. But this can never have materially affected the lake. The track along the western shore and over Ain-Jidy was then, as now, used for secret marauding expeditions, not for peaceable or commercial traffic. What transport there may have been between Idumæa and Jericho came by some other channel. Josephus appears to state that the Moabites crossed the sea to invade Judah (*Ant.* ix, 1, 2); and he informs us that the Romans used boats against the fugitive Jews (*War*, iv, 7, 6; comp. iv, 8, 4). A doubtful passage in Josephus (see Reland, *Palæst.* p. 252), and a reference by Edrisi (ed. Jaubert, in Ritter, *Jordan*, p. 700) to an occasional

venture by the people of "Zara and Dara" in the 12th century, are all the remaining allusions to the navigation of the lake known to exist, until Englishmen and Americans launched their boats on it for purposes of scientific investigation. The temptation to the dwellers in the environs must always have been to ascend to the fresher air of the heights, rather than descend to the sultry climate of the shores. It is not strange that the Dead Sea was never navigated to any extent: fish do not exist in it, and the sterile character of the shores made water transit of little importance.

Costigan, an Irish traveller, was the first, in modern times, to navigate this Sea of Death. Having descended the Jordan in a little boat, he crossed to the peninsula of Lisân. For three days he had no fresh water, and he was carried to Jerusalem to die. No record of his journey has been found. In 1837 Moore and Beek had a light boat conveyed from Jaffa. They succeeded in visiting some points, and making a few experiments with boiling-water, which were the first to prove that the lake was below the level of the ocean. Ten years later, Lieutenant Molyneux, of the British navy, took a boat down the Jordan, visited the peninsula, and took some soundings. He was able to return to his ship, but died shortly afterwards. A brief record of his voyage is given in the *Journal of the R. G. S.* vol. xviii. The expedition of Lynch, in 1848, was the only one crowned with success. This was in part owing to the superior organization and strength of the party, and in part to the fact that it was undertaken at a comparatively cool season—April and May. Even this, however, was too late; several of the party took fever, and one—Lieutenant Dale—died. The unfortunate expeditions of Costigan and Molyneux were made in July and August respectively. Winter is the proper season for any such undertaking. Rain seldom falls on the shores; the air, during the depth of winter, is fresh and balmy, and cold is almost unknown.

Josephus gives a brief description of the Dead Sea (*War*, iv, 8, 4); and several Greek and Roman authors, scientific as well as geographical, speak of its wonders. Extracts from the principal of these may be seen in Reland's *Palæstina* (p. 238–258). Among modern writers, the following may be consulted with advantage: Seetzen, in Zach's *Monatliche Correspondenz*, vols. xvii, xviii, xxvi, xxvii; Burckhardt, *Travels in Syria*; Irby and Mangles, *Travels*; Wilson, *Lands of the Bible*; Ritter, *Pal. and Syr.* ii, 557–780; Poole, in *Journal of R. G. S.* vol. xxvi. The books containing the fullest and latest accounts are: Robinson, *Bib. Res.* i, 501–523; ii, 187–192; and *Physical Geogr. of Pal.* p. 187–216; De Saulcy, *Voyage autour de la Mer Morte, and Voyage en Terre-Sainte*; Tristram, *The Land of Israel*, p. 242–366; *Land of Moab* (1873); Lynch, *Official Report*, which contains Anderson's *Geological Reconnaissance* (published at the National Observatory, Washington, 1852); Ridgaway, *The Lord's Land*, p. 344–464. There is an old monograph on the Dead Sea by Wähner, *De הַיָּם הַמֵּלַח* (Helmst. 1712); and a recent one by Fraas, *Das todtte Meer* (Stuttg. 1867). See DEAD SEA.

SALT, VALLEY OF (Heb. מִלְּחָם אֶרֶץ, *Gey Mëluch*, but twice with the article, מִלְּחָם הָאֶרֶץ; Sept. Γεβελίμ, Γεμελιῆ, κοιλὰς [or φάραγξ] τῶν ἀλῶν; v. r. Γημαλά, Γαιμελά; Vulg. *Vallis Salinarum*), a certain valley—or perhaps more accurately a "ravine," the Hebrew word *gey* appearing to bear that signification—in which occurred two memorable victories of the Israelitish arms.

1. That of David over the Edomites (2 Sam. viii, 13; 1 Chron. xviii, 12). It appears to have immediately followed his Syrian campaign, and was itself one of the incidents of the great Edomitish war of extermination. The battle in the Valley of Salt appears to have been conducted by Abishai (1 Chron. xviii, 12), but David and Joab were both present in person at the battle and in the pursuit and campaign which followed: and Joab was left behind for six months to consummate the

doom of the conquered country (1 Kings xi, 15, 16; Psal. lx, title). The number of Edomites slain in the battle is uncertain: the narratives of Samuel and Chronicles both give it at 18,000, but this figure is lowered in the title of Psal. lx to 12,000. See DAVID.

2. That of Amaziah (2 Kings xiv, 7; 2 Chron. xxv, 11), who is related to have slain 10,000 Edomites in this valley, and then to have proceeded with 10,000 prisoners to the stronghold of the nation at *has-Selu*, the Cliff, i. e. Petra, and, after taking it, to have massacred them by hurling them down the precipice which gave its ancient name to the city. See EDOM.

Neither of these notices affords any clue to the situation of the Valley of Salt, nor does the cursory mention of the name ("Gemela" and "Mela") in the *Onomasticon*. By Josephus it is not named on either occasion. Seetzen (*Reisen*, ii, 356) was probably the first to suggest that it was the broad, open plain which lies at the lower end of the Dead Sea, and intervenes between the lake itself and the range of heights which crosses the valley at six or eight miles to the south. The same view is taken (more decisively) by Dr. Robinson (*Bib. Res.* ii, 109). The plain is in fact the termination of the Ghôr or valley through which the Jordan flows from the Lake of Tiberias to the Dead Sea. Its north-west corner is occupied by the Khashm Usdum, a mountain of rock-salt, between which and the lake is an extensive salt marsh, while salt streams and brackish springs pervade, more or less, the entire western half of the plain. Without presuming to contradict this suggestion, which yet can hardly be affirmed with safety in the very imperfect condition of our knowledge of the inaccessible regions south and south-east of the Dead Sea, it may be well to call attention to some considerations which seem to stand in the way of the implicit reception which most writers have given it since the publication of Dr. Robinson's *Researches*. (So Van de Velde, *Memoir*, p. 346; also Keil on 2 Kings xiv, 7.) See SODOM.

(a.) The word *Gey* (גַּי), employed for the place in question, is not elsewhere applied to a broad valley or sunk plain of the nature of the lower Ghôr. Such tracts are denoted in the Scripture by the word *Emek* or *Bika'ah*, while *Gey* appears to be reserved for clefts or ravines of a deeper and narrower character. See VALLEY.

(b.) *A priori*, one would expect the tract in question to be called in Scripture by the peculiar name uniformly applied to the more northern parts of the same valley, *ha-Arabah*, in the same manner that the Arabs now call it *el-Ghôr*, "Ghôr" being their equivalent for the Hebrew "Arabah." See ARABAH.

(c.) The name "Salt," though at first sight conclusive, becomes less so on reflection. It does not follow, because the Hebrew word *mélach* signifies salt, that therefore the valley was salt. A case exactly parallel exists at el-Milh, the representative of the ancient Moladah, some sixteen miles south of Hebron. Like *mélach*, *milh* signifies salt; but there is no reason to believe that there is any salt present there, and Dr. Robinson (*Bib. Res.* ii, 201, note) himself justly adduces it as "an instance of the usual tendency of popular pronunciation to reduce foreign proper names to a significant form." Just as el-Milh is the Arabic representative of the Hebrew Moladah, so possibly was *Gey Mèlach* the Hebrew representative of some archaic Edomitish name.

(d.) What little can be inferred from the narrative as to the situation of the Gey Mèlach is in favor of its being nearer to Petra. Assuming Selah to be Petra (the chain of evidence for which is tolerably connected), it seems difficult to believe that a large body of prisoners should have been dragged for upwards of fifty miles through the heart of a hostile and most difficult country merely for massacre. See PETRA.

It would seem probable from the above considerations that the sacred writers do not refer to the Arabah,

or great plain south of the Dead Sea, but rather to one or other of the passes leading from it, either up into Judah, on the one side, or Edom, on the other. Wady Zuweireh, a well-known pass at the northern end of the salt range of Usdum, might be the one meant, though the scope of the narrative would rather seem to locate it nearer Edom. Schwarz (*Palest.* p. 21, 22) fixes the valley at the same point, the south-west extremity of the Dead Sea, and thinks that Zoar is called the "City of Salt" in Josh. xv, 62, because of the salt mountain near it. See SALT, CITY OF.

Salter, Richard, D.D., a Congregational minister of New England, was born in Boston, Mass., in 1723. In due time he entered Harvard College, from which he graduated with honor, 1739. He studied and practiced medicine, but afterwards chose the ministry for his life work. He was settled in Mansfield, Conn., and ordained, June 27, 1744. Not long after Salter's settlement, a serious difficulty commenced in his church, in consequence of some of the members declaring in favor of the "Separatists" (q. v.), and the difficulty was protracted through several years. Peace was restored only after twenty-four of the members were expelled. He continued actively engaged until 1787, when his strength began perceptibly to decline. In 1771 he was elected a fellow of Yale College, and was presented, 1782, by the same college with the degree of D.D. In 1781 he gave, by deed, a farm to Yale College "for encouraging and promoting the study of the Hebrew language, and other Oriental languages." He was twice married, but had no children. He preached the *Connecticut Election Sermon* (1768), which was published. He died in 1793. See Sprague, *Annals of the Amer. Pulpit*, i, 421 sq.

Salter, Samuel, D.D., a learned English divine, was born at Norwich, and educated at the free school of that city, at the Charter House, and at Benedict College, Cambridge, of which he was elected a fellow. He became rector of Burton College, Lincolnshire, and prebendary of Norwich; minister of Great Yarmouth, 1750; preacher at Charter House, 1754; rector of St. Bartholomew the Less, London, 1756; and master of the Charter House, 1761. He died 1772. Several sermons of his were published (Lond. 1755, 1762). See Darling, *Cyclop. Bibliog.* s. v.

Saltmarsh, JOHN, an Antinomian divine, was born in Yorkshire, England. He was educated at Magdalen College, Cambridge, became minister of Brasted, Kent, and chaplain in the army under Essex. He subsequently settled at Ilford, Essex, where he died in 1647. He published a number of works: *The Smoke in the Temple* (Lond. 1646, 4to); — *Free Grace* (ibid. 1645, 4to); — *Sparkles of Glory* (ibid. 1647, 12mo), and others. See Allibone, *Dict. of Authors*, s. v.

Saltzmann, FRIEDRICH RUDOLF, an eminent, and once very popular, Protestant author, was born at Strasburg, March 9, 1749. He studied in the gymnasium, and then in the University of Strasburg. After his graduation in 1773, he journeyed through Italy and Germany, and then took charge of the education of the young Baron (afterwards Prussian minister) von Stein. Subsequently he lectured on history in Strasburg, but without great success. He next edited a political paper, and thereby came into suspicion of aristocratic tendencies among the radicals and terrorists of the French Revolution. He was forced to flee and to live in disguise until the downfall of Robespierre, meantime suffering the seizure and appropriation of his large property in Strasburg. During this period of trials his religious life came to rapid maturity. Raised in strict Protestant principles, he now came into contact with French mystics and theosophists. At the close of the Revolution he returned to Strasburg, and began the publication of a series of religious and mystical works, which made him many friends, and which enjoyed a very wide circulation. Among these publications were, *Das christliche Erbauungsblatt*, which was issued for

many years, from 1805 and on:—*Es wird Alles neu werden* (1802–10), a work in seven instalments, consisting of essays upon, and extracts from, the chief mystics and theosophists—Rusbroeck, Terstegen, Catherine of Siena, Mesdames Bourignon, Guyon, Leade, and Browne, also Swedenborg, and Bromley:—*On the Last Things* (1806):—*Glances at God's Dealings with Man from the Creation to the End of the World* (1810), in which the author gives a survey of human history during the first six thousand years, and then, with the help of geology and astronomy, forecasts the consummation of all things, which will be preceded by the millennium and terminated by the restoration of Paradise:—*Religion der Bibel* (1811), relating largely to the millennium:—*Geist und Wahrheit* (1816), a work much esteemed by Schubert, and treating of the so-called double-sense of Scripture. In all of these writings Saltzmann manifests the highest reverence for the Bible and the most childlike faith in God. And yet, with all his Bible-study, he seems to find confirmation only for the views of the writers of the mystical school. But he is a mystic of the milder type; and he was entirely free from the "occult science" of a Böhme and a Schönherr. During his whole active career, Saltzmann continued his political editorship, and it was but his leisure moments that he gave to his theological studies. In his last years, when Schubert visited him in 1820, he had ceased all outward activity, and was patiently awaiting his call into the spirit-world. See *La Revue d'Alsace*, 1860; Herzog, *Real-Encykl.* xiii, 337–341. (J. P. L.)

Sal'u (Heb. *Salu'*, שָׁלוֹם, *weighed*; Sept. Σαλώ v. r. Σαλμών), a prince and head of a house among the children of Simeon; father of the Zimri who was slain by Phinehas for bringing the Midianitish woman into the camp of Israel (Numb. xxv, 14; see ver. 7 sq.). B.C. ante 1618.

Sal'um, a Greek form found in the Apocrypha of the Hebrew name SHALLUM (q. v.): *a.* (Σαλούμος v. r. Σαλήμος; 1 Esdr. viii, 1) the father of Hilkiah (Ezra vii, 2); *b.* (Σαλούμ; 1 Esdr. v, 28) a temple "porter" (Ezra ii, 42).

Salus (*health, prosperity, well-being*), in some degree synonymous with the Greek *Hygeia*, in Roman mythology, was primarily the goddess of physical health, but afterwards also of the public weal or prosperity of the state. A temple was built in her honor after the conclusion of the Samnite war by C. Junius Bubulcus.

Salut, an evening office, which took its origin in Southern Europe (Spain and Italy), consisting of an exposition of the Sacrament, accompanied with chanting and a brilliant display of tapers. It varies in different churches; at Lyons it is not followed by benediction, and in France generally is only used in a solemn form on the eves of great festivals. The Roman rite requires the sign of the cross to be made with the monstrance in silence; but in some parts of France the priest uses a form of benediction.

Salutation (from the Lat. *salus*, health, i. e. a wishing well; in the A. V. "salute" is the rendering of שָׁלוֹם, *barák*, to bless; שְׁאַל, *shaal*, to inquire; but more properly of שָׁלוֹם, *shalóm*, peace [q. v.]; in the N. T. of ἀσπάζομαι, to embrace), a term which, in the Bible, includes two classes or modes of address. These, however, were of course often continued under various circumstances. See COURTESY.

I. Conversation.—The frequent allusion in Scripture to the customary salutations of the Jews invests the subject with a higher degree of interest than it might otherwise claim; and it is therefore fortunate that there are few scriptural topics which can be better understood by the help of the illustrations derivable from the existing usages of the East.

1. The forms of salutation that prevailed among the Hebrews, so far as can be collected from Scripture, are the following:

(1.) The salutation at meeting consisted, in early times, of various expressions of *blessing*, such as "God be gracious unto thee" (Gen. xliii, 29); "Blessed be thou of the Lord" (Ruth iii, 10; 1 Sam. xv, 13); "The Lord be with you," "The Lord bless thee" (Ruth ii, 4); "The blessing of the Lord be upon you; we bless you in the name of the Lord" (Psa. cxxix, 8). Hence the term "bless" received the secondary sense of "salute," and is occasionally so rendered in the A. V. (1 Sam. xliii, 10; xxv, 14; 2 Kings iv, 29; x, 15), though not so frequently as it might have been (e. g. Gen. xxvii, 23; xlvii, 7, 10; 1 Kings viii, 66). Most of the expressions used in meeting, and also those which were used in parting, implied that the person who employed them interceded for the other. Hence the word בָּרַךְ, *barák*, which originally signified "to bless," meant also "to salute" or "to welcome," and "to bid adieu" (Gen. xlvii, 8–11; 2 Kings iv, 29; x, 13; 1 Chron. xviii, 10).

(2.) The blessing was sometimes accompanied with inquiries as to the *health* either of the person addressed or his relations. In countries often ravaged, and among people often ruined, by war, "peace" implied every blessing of life; and this phrase had, therefore, the force of "Prosperous be thou." This was the commonest of all salutations (Judg. xix, 20; Ruth ii, 4; 1 Sam. xxv, 6; 2 Sam. xx, 9; Psa. cxxix, 8). Hence the Hebrew term used in these instances שָׁלוֹם, *shalóm* has reference to general well-being, and strictly answers to our "welfare," as given in the text (Gen. xliii, 27; Exod. xviii, 7). It is used, not only in the case of salutation (in which sense it is frequently rendered "to salute," e. g. Judg. xviii, 15; 1 Sam. x, 4; 2 Kings x, 13), but also in other cases, where it is designed to soothe or to encourage a person (Gen. xliii, 23; Judg. vi, 23; xix, 20; 1 Chron. xii, 18; Dan. x, 19; comp. 1 Sam. xx, 21, where it is opposed to "hurt;" 2 Sam. xviii, 28, "all is well;" and 2 Sam. xi, 7, where it is applied to the progress of the war). The salutation at parting consisted originally of a simple blessing (Gen. xxiv, 60; xxviii, 1; xlvii, 10; Josh. xxii, 6); but in later times the term *shalóm* was introduced here also in the form "Go in peace," or, rather, "Farewell" (1 Sam. i, 17; xx, 42; 2 Sam. xv, 9). This was current at the time of our Saviour's ministry (Mark v, 34; Luke vii, 50; Acts xvi, 36), and is adopted by him in his parting address to his disciples (John xiv, 27). It had even passed into a salutation on meeting, in such forms as "Peace be to this house" (Luke x, 5), "Peace be unto you" (Luke xxiv, 36; John xx, 19).

The more common salutation, however, at this period was borrowed from the Greeks, their word χαίρειν (*to be joyful* or in good health) being used both at meeting (Matt. xxvi, 49; xxviii, 9; Luke i, 28) and probably also at departure. In modern times, the ordinary mode of address current in the East resembles the Hebrew: *Es-selám aleykúm*, "Peace be on you" (Lane, *Mod. Egypt.* ii, 7); and the term "salam" has been introduced into our own language to describe the Oriental salutation. Accordingly, we have the exclamation Χαίρε, χαίρειν, *Joy to thee! Joy to you!* rendered by *Hail!* an equivalent of the Latin *Ave! Salve!* (Matt. xxvii, 29; xxviii, 9; Mark xv, 18; Luke i, 28; John xix, 3).

A still stronger form of this wish for the health of the person addressed was the expression "Live, my lord" (חַיֵּה אֲדֹנָי, *Chai Adonai*), as a common salutation among the Phœnicians, and also in use among the Hebrews, but by them only addressed to their kings in the extended form of "Let the king live forever!" (1 Kings i, 31), which was also employed in the Babylonian and Persian courts (Dan. ii, 4; iii, 9; v, 10; vi, 6, 21; Neh. ii, 3). This, which in fact is no more than a wish for a prolonged and prosperous life, has a parallel in the customs of most nations, and does not differ from the "Vi-

vat!" of the Latin, the "Vive le roi!" of the French, or our own "— forever!"

2. *Use of these Expressions.*—The forms of greeting that we have noticed were freely exchanged among persons of different ranks on the occasion of a casual meeting, and this even when they were strangers. Thus Boaz exchanged greeting with his reapers (Ruth ii, 4), the traveller on the road saluted the worker in the field (Psa. cxxix, 8), and members of the same family interchanged greetings on rising in the morning (Prov. xxvii, 14). The only restriction appears to have been in regard to religion, the Jew of old, as the Mohammedan of the present day, paying the compliment only to those whom he considered "brethren," i. e. members of the same religious community (Matt. v, 47; Lane, *Mod. Egypt.* ii, 8; Niebuhr, *Descript.* p. 43). Even the apostle John forbids an interchange of greeting where it implied a wish for the success of a bad cause (2 John 11). In modern times the Orientals are famed for the elaborate formality of their greetings, which occupy a very considerable time; the instances given in the Bible do not bear such a character, and therefore the prohibition addressed to persons engaged in urgent business, "Salute no man by the way" (2 Kings iv, 29; Luke x, 4), may best be referred to the delay likely to ensue from subsequent conversation. This, perhaps, must not be understood literally, as it would be churlish and offensive. But there is so much insincerity, flattery, and falsehood in the terms of salutation prescribed by custom that our Lord rebuked them by requiring his followers, as far as possible, to avoid them (see Thomson, *Land and Book*, i, 533 sq.).

3. *Modern Parallels.*—As already intimated, the usages involved in these oral salutations seem not only similar to, but identical with, those still existing among the Arabians. These, indeed, as now observed, go upon the authority of religious precepts. But it is known that such enactments of the Koran and its commentaries merely embody such of the previously and immemorably existing usages as the legislature wished to be retained.

(1). *Oral Forms.*—Their most common greeting, as among the Jews, is, "Peace be on you!" to this the reply is, "On you be peace!" to which is commonly added, "and the mercy of God and his blessings!" This salutation is never addressed by a Moslem to one whom he knows to be of another religion; and if he find that he has by mistake thus saluted a person not of the same faith, he generally revokes his salutation: so also he sometimes does if a Moslem refuses to return his salutations, usually saying, "Peace be on us and on (all) the right worshippers of God!" This seems to us a striking illustration of Luke x, 5, 6; 2 John 11. Various set compliments usually follow this salam; which, when people intend to be polite, are very much extended and occupy considerable time. Hence they are evaded in crowded streets, and by persons in haste, as was the case, for the same reason doubtless, among the Jews (2 Kings iv, 29; Luke x, 4). Specimens of this conventional intercourse are given by Lane (*Mod. Egypt.* i, 253), who says that to give the whole would occupy a dozen of his pages. There are set answers, or a choice of two or three answers, to every question; and it is accounted rude to give any other answer than that which custom prescribes. They are such as those by which the Israelites probably prolonged their intercourse. If one is asked, "How is your health?" he replies, "Praise be to God!" and it is only from the tone of his voice that the inquirer can tell whether he is well or ill. When one greets another with the common inquiry, "Is it well with thee?" (see 2 Kings iv, 26) the answer is, "God bless thee!" or "God preserve thee!" An acquaintance on meeting another whom he has not seen for several days, or for a longer period, generally says, after the salam, "Thou hast made us desolate by thy absence from us;" and is usually answered, "May God not make us desolate by thy absence!"

Oriental Salutation by Bending or Prostration to a Superior.

(2). The *gestures* and inflections used in salutation varied with the dignity and station of the person saluted, as is the case with the Orientals at this day. See ATTITUDE. The obeisance with which this is accompanied varies according to the degree of respect designed to be shown to the person addressed, and this rises nearly according to the following scale: 1. Placing the right hand upon the breast; 2. Touching the lips and the forehead or turban (or the forehead and turban only) with the right hand; 3. Doing the same, but slightly inclining the head during the action; 4. The same as the preceding, but inclining the body also; 5. Still the same, with the addition of previously touching the ground with the right hand; 6. Kissing the hand of the person to whom obeisance is paid; 7. Kissing his sleeve; 8. Kissing the skirt of his clothing; 9. Kissing his feet; and 10. Kissing the carpet or ground before him. Persons distinguished by rank, wealth, or learning are saluted by many of the shopkeepers and passengers as they pass through the streets and market-places of Eastern cities, and are, besides, often greeted with a short ejaculatory prayer for the continuance of their life and happiness. Such were "the salutations and greetings in the market-place" of which the scribes were so extravagantly fond (see Mark xii, 28). When a very great man rides through the streets, most of the shopmen rise to him and pay their respects to him by inclining the head and touching the lips and forehead or turban with the right hand. It is usual for the person who returns the salutation to place at the same time his right hand upon his breast, or to touch his lips, and then his forehead or turban with the same hand. This latter mode, which is the most respectful, is often performed to a person of superior rank, not only at first with the salam, but also frequently during a conversation. In some cases the body is gently inclined, while the right hand is laid upon the left breast. A person of the lower orders in addressing a superior does not always give the salam, but shows his respect to high rank by bending down his hand to the ground, and then putting it to his lips and forehead. See BOWING.

It is a common custom for a man to kiss the hand of his superior instead of his own (generally on the back only, but sometimes on both back and front), and then to put it to his forehead in order to pay more particular respect. Servants thus evince their respect towards their masters. Those residing in the East find their own servants always doing this on such little occasions as arise beyond the usage of their ordinary service; as on receiving a present, or on returning fresh from the public baths. The son also thus kisses the hand of his father, and the wife that of her husband. Very often, however, the superior does not allow this, but only touches the hand extended to take his, whereupon the other puts the hand that has been touched to his own lips and forehead. The custom of kissing the

Oriental Salutation by Kneeling and Kissing the Hand to a Sovereign.

beard is still preserved, and follows the first and preliminary gesture; it usually takes place on meeting after an absence of some duration, and not as an everyday compliment. In this case the person who gives the kiss lays the right hand under the beard, and raises it to his lips, or rather supports it while it receives his kiss. This custom strikingly illustrates 2 Sam. xx, 9. In Arabia Petrea and some other parts it is more usual for persons to lay the right sides of their cheeks together. These acts involved the necessity of dismounting in case a person were riding or driving (Gen. xxiv, 64; 1 Sam. xxv, 23; 2 Kings v, 21). The same custom still prevails in the East (Niebuhr, *Descript.* p. 39). Among the Persians, persons in saluting often kiss each other on the lips; but if one of the individuals is of high rank, the kiss is given on the cheek instead of the lips. This seems to illustrate 2 Sam. xx, 9; Gen. xxix, 11, 13; xxxiii, 4; xlvi, 10–12; Exod. iv, 27; xviii, 7. See Kiss.

Oriental Salutation by Kissing or Bowing to a Respected Equal or Intimate Friend.

Another mode of salutation is usual among friends on meeting after a journey. Joining their right hands together, each of them compliments the other upon his safety, and expresses his wishes for his welfare by repeating, alternately, many times the words *selamât* (meaning, "I congratulate you on your safety") and *taiyibîn* ("I hope you are well"). In commencing this ceremony, which is often continued for nearly a minute before they proceed to make any particular inquiries, they join their hands in the same manner as is usually practiced by us; and at each alternation of the two expressions change the position of the hands. These circumstances further illustrate such passages as 2 Kings iv, 19; Luke x, 4. See HAND.

II. The *epistolary* salutations in the period subsequent to the Old Test. were framed on the model of the Latin style: the addition of the term "peace" may, however, be regarded as a vestige of the old Hebrew form (2 Macc. i, 1). The writer placed his own name first, and then that of the person whom he saluted; it

IX.—S

was only in special cases that this order was reversed (2 Macc. i, 1; ix, 19; 1 Esdr. vi, 7). A combination of the first and third persons in the terms of the salutation was not unfrequent (Gal. i, 1, 2; Philem. 1; 2 Pet. i, 1). The term used (either expressed or understood) in the introductory salutation was the Greek *χαίρειν* in an elliptical construction (1 Macc. x, 18; 2 Macc. ix, 19; 1 Esdr. viii, 9; Acts xxiii, 26); this, however, was more frequently omitted, and the only apostolic passages in which it occurs are Acts xv, 23 and James i, 1, a coincidence which renders it probable that James composed the letter in the former passage. A form of prayer for spiritual mercies was also used, consisting generally of the terms "grace and peace," but in the three pastoral epistles and in 2 John "grace, mercy, and peace," and in Jude "mercy, peace, and love." The concluding salutation consisted occasionally of a translation of the Latin *valete* (Acts xv, 29; xxiii, 30), but more generally of the term *ἀσπάζομαι*, "I salute," or the cognate substantive, accompanied by a prayer for peace or grace. Paul, who availed himself of an amanuensis (Rom. xvi, 22), added the salutation with his own hand (1 Cor. xvi, 21; Col. iv, 18; 2 Thess. iii, 17). The omission of the introductory salutation in the Epistle to the Hebrews is very noticeable. There are Latin monographs on the subject in general by Mayer (Gryph. 1708), Allgower (Ulm, 1728), Schmerschl (Jena, 1739), Heyrenbach (Vien. 1773), and Purmann (Frankf.-on-the-Main, 1749). See EPISTLE.

SALUTATION, RITUAL. In the Romish Church, the words of the angel to Mary are called the *Angelic Salutation*. The latter clause, "Sancta Maria, mater Dei, ora pro nobis peccatoribus," was added, they tell us, in the fifth century; but the last words, "Nunc et in hora mortis nostrae," were inserted by order of pope Pius V. It is sometimes repeated at the beginning of a sermon, ending with a prayer or a *pro nobis*, and bells are tolled to put people in mind of it. See SALVE REGINA.

In the Church-of-England service a species of salutation occurs. "Having all repeated our Creed, . . . we now prepare ourselves to pray. And since salutations have ever been the expressions and badges of that mutual charity without which we are not fit to pray, therefore we begin with an ancient form of salutation, taken out of the Holy Scripture; the minister commencing, salutes the people with 'The Lord be with you,' and they return it with a like prayer, 'And with thy Spirit.'"

Salutatorium (*place of salutation*), a room connected with an ancient church, where the bishop and clergy sat to receive the salutations of the people as they came to solicit prayers on their behalf or to consult them about important business.

Salvador, JOSEPH, a Jewish physician, was born at Montpellier, France, in 1796, and died at Versailles, March 17, 1873. He is the author of *Loi de Moïse, ou Système Relig. et Polit. des Hébreux* (Paris, 1822); republished under the title *Histoire des Institutions de Moïse et du Peuple Hébreu* (Paris, 1828, 3 vols.); German transl. *Geschichte der mosaïschen Institutionen*, etc., by Essena, with a preface by G. Riesser (Hamburg, 1836, 3 vols.);—*Jésus-Christ et sa Doctrine*, etc. (Paris, 1838, 2 vols.); German transl. by Jacobson, *Das Leben Jesu und seine Lehre* (Dresden, 1841, 2 vols.);—*Histoire de la Domination Romaine en Judée et de la Ruine de Jérusalem* (Paris, 1847, 2 vols.); German transl. by Eichler, *Geschichte der Römerherrschaft in Judäa*, etc. (Bremen, 1847, 2 vols.);—*Paris, Rome, Jérusalem, ou la Question Religieuse au XIXe Siècle* (Paris, 1860, 2 vols.). See FÜRST, *Bibl. Jud.* iii, 230; Winer, *Handbuch der theol. Literatur*, ii, 746; Zuchold, *Bibl. Theol.* p. 1109 sq.; *Zeitung des Judenthums*, 1873. (B. P.)

Salvation (properly *יְשׁוּעָה*, *σωτηρία*, both meaning originally *deliverance* or *safety*). No idea was more ingrained in the Jewish mind than the truth that God

was a Saviour, a Helper, a Deliverer, a Rescuer, a Defender, and a Preserver to his people. Their whole history was a history of salvation, and an unfolding of the nature and purposes of the Divine Being. Israel was a saved people (Deut. xxxiii, 29); saved from Egypt (Exod. xiv, 30), delivered from enemies on every side, preserved in prosperity, and restored from adversity—all by that One Person whom they had been taught to call Jehovah. Though human instruments were constantly used as saviors—as, for instance, the judges—the people were always taught that it was God who saved by their hand (2 Sam. iii, 18; 2 Kings xiii, 5; xiv, 27; Neh. ix, 27), and that there was not power in man to be his own savior (Job xl, 14; Psa. xxxiii, 16; xlv, 3, 7), so that he must look to God alone for help (Isa. xliii, 11; xlv, 22; Hos. xiii, 4, 10). This the Scriptures express in varied forms, usually in phrases, in which the Hebrews rarely use concrete terms, as they are called, but often abstract terms. Thus, instead of saying, God saves them and protects them, they say, God is their salvation. So, a voice of salvation, tidings of salvation, a word of salvation, etc., is equivalent to a voice declaring deliverance, etc. Similarly, to work great salvation in Israel signifies to deliver Israel from some imminent danger, to obtain a great victory over enemies. Most of these phrases explain themselves, while others are of nearly equal facility of apprehension, e.g. the application of "the cup of salvation" to gratitude and joy for deliverance (Psa. cxvi, 13); the "rock of salvation" to a rock where any one takes refuge, and is in safety (2 Sam. xxii, 47); "the shield of salvation" and "helmet of salvation" to protection from the attack of an enemy (Psa. xviii, 35; Isa. lix, 17); the "horn of salvation" to the power by which deliverance is effected (Psa. xviii, 2); "the garments of salvation" to the beauty and protection of holiness (Isa. lxi, 10); the "wells of salvation" to the abundant sources of the mercies of salvation, free, overflowing, and refreshing (Isa. xii, 3). See each of these associated terms in its alphabetical place.

"When we come to inquire into the nature of this salvation thus drawn from God, and the conditions on which it was granted during the Old-Test. dispensation, we learn that it implied every kind of assistance for body and soul, and that it was freely offered to God's people (Psa. xxviii, 9; lxix, 35); to the needy (Psa. lxxii, 4, 13), to the meek (Psa. lxxvi, 9), to the contrite (Psa. xxxiv, 18), but not to the wicked (Psa. xviii, 41) unless they repented and turned to him. Salvation consisted not only of deliverance from enemies, and from the snares of the wicked (Psa. xxxvii, 40; lix, 2; cvi, 20), but also of forgiveness (Psa. lxxix, 9), of answers to prayer (Psa. lxi, 13), of spiritual gifts (Psa. lxxviii, 19), of joy (Psa. li, 12), of truth (Psa. xxv, 5), and of righteousness (Psa. xxiv, 5; Isa. xlv, 8; xlvii, 13; li, 5). Many of the beautiful promises in Isaiah refer to an everlasting and spiritual salvation, and God described himself as coming to earth to bring salvation to his people (Isa. lxii, 11; Zech. ix, 9). Thus was the way prepared for the coming of him who was to be called Jesus, because he should save his people from their sins. See MESSIAH.

"In the New Testament the spiritual idea of salvation strongly predominates, though the idea of temporal deliverance occasionally appears. Perhaps the word 'restoration' most clearly represents the great truth of the Gospel. The Son of God came to a lost world to restore those who would commit themselves unto him to that harmony with God which they had lost by sin. He appeared among men as the Restorer. Disease, hunger, mourning, and spiritual depression fled from before him. All the sufferings to which the human race is subject were overcome by him. Death itself, the last enemy, was vanquished; and in his own resurrection Christ proclaimed to all believers the glad tidings that God's purpose of bringing many sons unto glory was yet to be carried out. During his lifetime Jesus Christ was especially a healer and restorer of the

body, and his ministrations were confined to the lost sheep of the house of Israel; but by his death for the sins of the whole world, and by his subsequent resurrection and exaltation, he was enabled to fulfil the mission for which he had taken our nature. He became generally the Saviour of the lost. All who come to him are brought by him to God; they have spiritual life, forgiveness, and peace, and they are adopted into the family of God. Their bodies are made temples of the Holy Ghost, by whose inworking power Christ is formed within them. Their heart being purified by faith in him as the Son of God, they receive from him the gifts and graces of God, and thus they have an earnest of the final inheritance, the complete restoration, which is the object of every Christian's hope. If it be asked *when* a man is saved, the answer is that the new life which is implanted by faith in Christ is salvation in the germ, so that every believer is a saved man. But during the whole Christian life salvation is *worked out*, in proportion to our faith, which is the connecting link between the Saviour and the saved—the vine and the branches. Salvation in its completion is 'ready to be revealed' in the day of Christ's appearing, when he who is now justified by Christ's blood shall be saved from wrath through him, and when there shall be that complete restoration of body and soul which shall make us fit to dwell with God as his children for evermore." See SAVIOUR.

SALVATION, INFANT. See INFANT SALVATION.

Salve. See MEDICINE; UNGUENT.

Salvè, caput cruentatum, is the beginning of one of Bernard's seven passion-hymns. The original, in fifty lines, in five stanzas, addressed to the face of Christ ("Ad faciem Christi in cruce pendentis"), is the best of the seven passion-hymns, and runs thus in the first stanza:

"Salvè, caput cruentatum,
Totum spinis coronatum,
Conquassatum, vulneratum,
Arundine sic verberatum.
Facie spūis illita.
Salvè, cuius dulcis vultus
Immutatus et incultus
Immutavit suum florem,
Totus versus in pallorem,
Quem cœli tremit cura."

There are different English renderings of this hymn, as by Mrs. Charles, *Christian Life in Song*, p. 159: "Hail, thou Head! so bruised and wounded," which is also found in Schaff's *Christ in Song*; by Alford in the *Year of Praise*, No. 102: "Hail! that Head with sorrows bowing;" by Baker, in *Hymns, Ancient and Modern*, No. 97: "O Sacred Head, surrounded." There are a number of German translations, but the best is that by Gerhardt: "O Haupt voll Blut und Wunden," which again has been translated into English by Alexander and others. (B. P.)

Salvè, festa dies, toto venerabilis ævo, is the beginning of a resurrection-hymn by Venantius Fortunatus. "In this sweet poem, the whole nature, born anew in the spring, and arrayed in the bridal garment of hope and promise, welcomes the risen Saviour, the Prince of spiritual and eternal life." The original, as given by Daniel (i, 170), has fourteen stanzas, of three lines each. Trench gives only ten lines, and so likewise Büssler, Rambach, and Simrock in their collections. Daniel remarks, "Ex hoc suavissimo poemate ecclesia decem versus sibi vindicavit, qui efficient canticum triumphale Paschatis." We give the first stanza:

"Salvè, festa dies, toto venerabilis ævo,
Qua Deus infernum vicit et astra tenet.
Salvè, festa dies, toto venerabilis ævo."

There are different English renderings, as by Mrs. Charles, *Christian Life in Song*, p. 135: "Hail, festal day! ever exalted high;" in *Lyra Eucharistica*, p. 16: "Hail, festal day! for evermore adored;" in Schaff, *Christ in Song*, p. 235: "Hail, Day of Days! in psalms of

praise." German translations are given by Rambach, Bässler, Simrock, and Forlage. (B. P.)

Salvè Jesu, SUMME BONUS, is the beginning of one of St. Bernard's passion-hymns, and is addressed to the side of Christ. It has been translated into English by Thompson in *Lyra Messianica*, p. 293:

"Jesu, hail! supremely Good,
On the branches of the Rood,
How thy limbs, all anguish-worn,
Bitterly were scorched and torn,
(B. P.) Thou that but too gracious art!"

Salve Regina (*Hail, O Queen*, i. e. Virgin Mary) is the name of an antiphony long in use in the Roman Catholic Church. Composer and date are unknown, though it is attributed to either Peter, bishop of Compostella in the 10th century, or to Hermannus Contractus, a Benedictine, in the 11th. The Chronicles of Spire state that St. Bernard, when at Spire in the capacity of apostolical delegate, added the closing words, "O clemens, O pia, O dulcis Virgo Maria!" by which it received its present form (*Chron. de Urbe Spirensi*, lib. xii). Pope Gregory directed, in 1239, that it be recited in the daily offices after the completorium (q. v.). In modern usage, it is employed during the interval between Trinity and Advent Sundays; and it also forms a part of the usual private devotions of believers, especially on Saturdays. In many dioceses the ritual in use directs the recitation of the *Salve Regina* at funerals, after the burial-service, with a view to supplicate the maternal intercession of the Blessed Virgin for the souls in purgatory. St. Bernard discusses the subject-matter of this antiphony in his works, laying special emphasis on the mercy and power of Mary as here set forth (*Opera* [Antw. 1616], p. 1756, s. v.).

Salvétè, flores martyrum, is the beginning of the famous hymn written by Prudentius of Spain (q. v.), and which is used in the Latin Church on Innocent's Day, the second day after Christmas. This hymn, of which the first stanza runs thus,

"Salvete, flores martyrum,
Quos lucis ipso in limine
Christi insecutor sustulit,
Ceu turbo nascentes rosas,"

has been translated into English by Chandler, *Hymns of the Primitive Church*, "Hail, infant martyrs! newborn victims, hail!" by Caswall, *Hymns and Poems, Original and Translated*, "Flowers of martyrdom, all hail!" and Neale, "All hail, ye infant martyr-flowers!" German translations are given in Bässler, Königsfeld, Rambach, and Simrock; while the original is found in Trench (p. 121), Daniel (i, 124), Simrock, Rambach, Bässler, and Königsfeld. (B. P.)

Salvi mundi SALUTARE, another of these passion-hymns, is addressed to the pierced feet of Christ, the original of which is given in Trench, *Sacred Latin Poetry*, p. 137, while Mrs. Charles, in *Christian Life in Song*, p. 161, has given an English rendering, "All the world's Salvation, hail!" to which we may add another translation by Kynaston in *Lyra Messianica*, p. 194, "Jesus, hail! the world's Salvation." A German rendering is found in Rambach, *Anthologie*, i, 275, and in Königsfeld, *Hymnen und Gesänge*, ii, 191. That part of the hymn which is addressed to the knees of the Saviour and commences, "Salve, salve, rex sanctorum," Thompson has rendered in *Lyra Messianica*, p. 288, "Hail, O hail! high King of Saints;" who also rendered that part addressed to the hands, and commencing, "Salve, salve, Jesu bone," in *Lyra Messianica*, p. 301, "Hail! O Jesu, kind and good." (B. P.)

Salvi, Giovanni Battista, an Italian painter of the Roman school, was born July 11, 1605. He studied at first with his father, at his home in Sassoferrato, and afterwards went to Rome and Naples. In the latter city he became a pupil of Domenichino, whom he resembled in many respects. Salvi died Aug. 8, 1685.

He left a great number of copies after Guido, Baraccio, and Raphael. Of his original compositions, there are, in the museum at Naples, a *Holy Family*, and *The Workshop of St. Joseph*.

Salvi, Niccolo, an Italian architect, was born, in 1699, at Rome. He was of wealthy parentage; and, having received a brilliant education, he applied himself in turn to poetry, mathematics, philosophy, and even medicine, but finally decided upon architecture, which had always been his favorite study. His master, Canevarius, leaving Rome, Salvi was left in charge of many important works. He designed several beautiful altars and constructed villas; but his great work is the Fountain of Trevi, which was commenced by order of Clement XII and finished under Benedict XIV. He died at Rome in 1751.

Salviānus, an elegant ecclesiastical writer of the 5th century, was born in the neighborhood of Treves. Whether reared as a Christian is uncertain; but shortly after his marriage with Palladia, a pagan lady of Cologne, they both appear as earnest Christians. After the birth of a daughter, he joined his wife in making a vow of monkish chastity. He now removed to the south of France, and acted as presbyter of the Church at Marseilles. Here he stood in close relations with bishop Eucherius of Lyons, to whose sons he gave instruction. The period of his death is uncertain, but he lived at least until 490, for Gennadius wrote of him in 490-495, "Vivit usque hodie senectute bona." Salvianus was a prolific author. Besides various treatises which have perished, the following are still extant: *Adversus Avaritiam Libri IV ad Ecclesiam Catholicam* (about 440 [it was printed by Sichardus, at Basle, in 1528; its object was to induce the laity to greater liberality to the Church]); *De gubernatione Dei et de Justo Presentique Judicio* (451-455 [it was printed by Frobenius, Basle, 1530; it was written at the time of the ravages of the Northern barbarians, and was designed, like the *Civitas Dei* of Augustine, to remove the doubts against the providence of God to which those calamities had given rise]); *Epistolæ IX*, which had been addressed to friends on various familiar topics. These letters were first printed, with the author's collective works, in 1580. The collective works of Salvianus were printed by P. Pitheous (Paris, 1580, 8vo), by Rittershusius (Altdorf, 1611), and by Balusius (ibid. 1663-69-84). See Heyne, *Opuscula Academica*, vol. vi: Smith, *Dict. of Biog. and Myth.* iii, 700, 701; Herzog, *Real-Encykl.* xiii, 342, 343. (J. P. L.)

Salviati, Alamanno, an Italian cardinal, was born at Florence, April 20, 1668. He was prothonotary of the Holy See, afterwards vice-legate of Avignon, and in 1717 was made legate of Urbino, which charge he held till he was created cardinal in 1730. He died at Rome, Feb. 24, 1783. This prelate was the author of a dedicatory epistle addressed to the grand-duke Jean Gaston, and which is at the beginning of the *Vocabolario* of the Academy of Crusca.

Salviati, Antonio Maria, an Italian cardinal, nephew of Bernardo and Giovanni, was born in 1507. In 1561 he became bishop of Saint-Papoul, a diocese which had been held by his two uncles; but he relinquished it in 1563, and was sent by Pius IV as ambassador to the court of France. Gregory XIII also employed him in various capacities, and in 1583 invested him with the purple. Salviati was afterwards legate at Bologna, and, on account of his virtues, was called the "great cardinal Salviati." He died at Rome, April 28, 1602.

Salviati, Bernardo, an Italian cardinal of the same family as the preceding, was born at Florence in 1492. As a knight of St. John of Jerusalem he took part in several expeditions against the barbaric corsairs, and reached the rank of general of the galleys. He undertook a campaign in the Peloponnesus when the island of Rhodes was in the hands of Soliman: he

laid Tripoli in ruins, destroyed the forts along the canal of Fagiera, besieged and took Cordón, in the Morea, and ravaged the island of Scio. Thus in a short time his name became a terror to the Turks. Being sent to Barcelona, to Charles V, he pleaded in vain for the liberty of his country, then torn by revolutions. Having gone to the court of France, he followed the advice of his relative, Catherine de' Medici, entered in ecclesiastical life, and was made almoner of the queen. In 1549 Salviati became bishop of Saint-Papoul, and, at the request of Catherine de' Medici, received from Pius IV the cardinal's hat, together with the bishopric of Clermont. He died at Rome, May 6, 1568.

Salviati, Francesco Rossi de' (called *Cecchino de' Salviati*), an Italian painter, was born at Florence in 1510. He was taught by his father, Filippo Rossi, but afterwards became a pupil of Bugiardini, and frequented the studios of the artists Raffaello da Brescia and Andrea del Sarto. After he had gained some reputation, he was called to Rome by cardinal Giovanni Salviati, who became his patron, and whose name he took. He died at Rome in 1563. In his frescos, Salviati shows a richness of invention and purity of design which have made him justly celebrated. His paintings are to be found in many of the principal cities of Europe. In the Louvre are a *Holy Family*, a *Visitation*, and *The Unbelief of Thomas*.

Salviati, Giovanni, an Italian cardinal, was born at Florence, March 24, 1490. He became cardinal in 1517, then administrator of the Church at Fermo, and, in 1520, bishop of Ferrara. His cousin, Clement VII, sent him to quiet the troubles in Parma, and also, in 1526, on a mission to Charles V at Madrid, to solicit the release of Francis I and the recall of the imperial troops which had invaded the Papal States. Not being able to prevent the sack of Rome by the soldiers of the constable de Bourbon, Salviati went to implore the aid of the king of France in favor of the Holy See. By his mediation the treaty of the Holy League was signed, May 29, 1527, between Clement VII, Francis I, and Henry VII; and, in spite of many obstacles, he also brought about a peace between Charles V and the Holy See. From Francis I he received, in 1520, the diocese of Oleron, and, in addition, that of Saint-Papoul, besides several rich abbeys. In 1543 he became bishop of Albano, and in 1546 of Porto. The home of Salviati at Rome was the resort of men of genius, who always found in him a generous patron. He died at Ravenna, Oct. 28, 1553.

Salvini, SALVINO, an Italian scholar, was born, in 1667, at Florence. He was educated at Pisa, and gave himself to the study of belles-lettres and the antiquities of his country. He was canon of the cathedral of Florence, and member of several literary associations. He died at Florence, Nov. 29, 1751. His works were numerous, but not of a religious character, as *Fasti Consolari dell' Accademia Fiorentina*.

Salzburgers, **THE**, is a term applied in Protestant history to the evangelical inhabitants of the duchy of Salzburg, who, after ages of persecution, finally, in 1731-32, gave up their property and homes, and found refuge in Eastern Prussia. Salzburg, in the Middle Ages, was a powerful archbishopric, and its archbishop the most important prelate of Germany. It lay in the mountains in the south-west of Austria. Its population was Christianized by St. Rupert in the 6th century. The doctrines of Huss early obtained a footing, but the severe measures of archbishop Eberhard III in 1420 suppressed them, though it is probable that the good leaven still worked secretly in many hearts; for at the first dawn of the Reformation Salzburg warmly welcomed it, and many of its priests began to teach as Luther. Eminent among these was the venerable friend

of Luther, Dr. Staupitz, who, in 1518, became the court preacher of the ducal archbishop of Salzburg. In 1520, however, he was silenced by the archbishop. Another eminent evangelical priest was Paul Speratus, who was driven into banishment. A third was Stephen Agricola, also a court preacher; after three years of imprisonment he escaped (1524), and became a pastor at Augsburg. A fourth was George Schärer, who was actually put to death for his earnest preaching of the Gospel. In 1588 archbishop Dietrich issued a decree that all non-Catholic Salzburgers should within one month either become Catholics or leave the duchy. As the most of them chose the latter, another decree was issued confiscating their lands. Under his successor a similar measure was executed in 1614. During the whole period of the Thirty-years' War (1618-48), Salzburg was relatively quiet, and actually increased in material prosperity, while disorder and ruin prevailed elsewhere. But a tolerant archbishop was a rare exception. Accordingly the harsh measures broke out afresh under Gandolph in 1685. This was occasioned by the discovery of a rural parish which was wholly Lutheran, save that occasionally it held a public mass. All the evangelical books of this society were at once gathered up and burned, and the single choice offered of submission to Rome or exile, with loss of property and children. More than a thousand persons saw themselves forced in midwinter to leave their homes and children. Earnest remonstrances were made by Prussia and other Protestant powers against this direct violation of the provisions of the Peace of Westphalia. While this diplomatic correspondence was taking place, the archbishop died (1686). Under his two successors there was less persecution, and the Lutheran-minded among the inhabitants practiced more caution, concealing their Bibles and other books in the mountains, and resorting to secret places in the night and celebrating their simple worship, armed with axes, and with outstanding guards. But the final storm came at last, when the miserly and ambitious Leopold Anton became archbishop (1728). This man was anxious for two things—to stand in high favor at Rome, and to fill his treasury. Both objects he thought would be reached by a severe course against all open or secret heresy. Accordingly he flooded his land with Jesuit spies. All heretics were at once arrested and cast into prison, and tormented with hunger and tortures. Meantime a few of the chief non-Catholics fled secretly to Ratisbon and to Prussia, in hope of effecting forcible intervention on their behalf. They were warmly welcomed by Frederick William I of Prussia, and were promised homes and protection for all who should be forced to abandon their country. But before their return the archbishop had resorted to a more extreme measure. The nonconformity of the non-Catholics was represented to Austria as rebellion, and from 4000 to 6000 troops were obtained, and then quartered on the persecuted Lutherans; and then, in order to terrify the rest into submission, some 800 of the most prominent members were violently arrested, and required within eight days to leave the country. But the effect was the contrary of what had been expected: they behaved so heroically and resolutely as to inspire the whole body of non-Catholics with a like enthusiasm. In December, 1731, they crossed the Bavarian frontier. A few days later another company of 500 followed them. By April, 1732, the number of the exiles had reached more than 14,000; and some of the best districts were almost desolated. The sole substantial help was given to the exiles by Prussia. The king issued a decree in February, 1732, requiring his officers to furnish them with money to make their journey, acknowledging them as Prussian subjects, pledging his government to see that recompense should be made for their lands, and threatening to confiscate Catholic property in his own dominions in case the archbishop did not proceed with more moderation. Denmark, Sweden, and Holland made similar remonstrances and threats in their behalf.

At the suggestion of George II of England a collection was taken up for the sufferers throughout Protestantism. It amounted to some 900,000 florins. The place of refuge assigned to them was in the wilds of Lithuania. The course of their march through Nuremberg, Erlangen, Leipsic, Halle, Wittenberg, Magdeburg, Potsdam, and Berlin was almost like a triumphal procession, so great was the sympathy which their long-endured sufferings had everywhere excited. At Potsdam the old king, Frederick William, received them into the palace gardens; and, with his queen, mingled among them very familiarly, asking them questions in regard to their faith, and giving them advice for the future. He was highly gratified with them, gave them money, and, assuring them that he would treat them in the best possible manner, bade them a hearty godspeed. From Berlin the exiles took their way to Stettin, where they took ship and sailed to Königsberg. Thence they marched by land to Lithuania, where wild lands awaited them, and which their industry speedily transformed into a flourishing colony of towns and farm-houses. The number who positively settled there was over 20,000. They cordially welcomed the Lutheran pastors who were furnished to them at Berlin. The several millions of thalers which the king spent upon them proved no less a wise commercial investment than had been the case with the help given to the banished Huguenots by his grandfather, the great elector.

While Prussia profited so richly from the persecutions of these Salzburger, the persecuting archbishop was foiled in his real, sole purpose. Instead of filling his treasury, he actually emptied it. It was only imperfectly that he could supply his deserted fields and mines with new laborers; and those whom he did obtain were, many of them, indolent and mendicant. In addition, there came upon him a debt of 11,000,000 florins for the Austrian troops which he had employed to oppress and expel his subjects. The results were an impoverished land and a heavier taxation upon the remaining Catholics, while the emigrants were entirely freed from all imposts and taxes for full ten years. Also other lands profited from this persecution. Würtemberg, Holland, Sweden, Russia, England, and America (Georgia) received large numbers of the exiles; so that the number actually lost to Salzburg by the folly of archbishop Anton was over 30,000. Since this era of persecution Salzburg has held a much less prominent place in European history. The territory was secularized in 1802. In 1815 the most of it was given to Austria. In 1849 it became a separate crown-land of Austria. See Göckling, *Emigrationsgeschichte von Salzburg* (Leips. 1734); Panse, *Geschichte der Auswanderung der evangelischen Salzburger* (ibid. 1827); Herzog, *Real-Encyklop.* xiii, 346-359. (J. P. L.)

SAM, CONRAD, known in German history as "the Reformer of Ulm," was born at Rothenacker in 1483. He studied Latin at Ulm, and in 1498 matriculated at Tübingen. In 1520 he was preacher at Brackenheim, near Heilbronn, and thoroughly devoted to the Reformation. Luther corresponded with him, and sent to him regularly his publications. Copies still exist with Luther's autograph: "An den Sam, Pf. zu Brackenheim, M. Luther, Dr." In 1524 he was driven away from Brackenheim, but found protection in Ulm, and an open door to preach the new doctrines. Here his labors resulted in the complete victory of Protestantism. His stentorian voice, his popular style and wit, filled the great cathedral with the eager populace. But soon great trials began. The eucharistic strife broke out. Sam gradually turned from Luther's views to the simpler and more radical doctrine of Zwingle, with whom, as also with Blarer, Bucer, and Ecolampadius, he entered into close correspondence. After many struggles, the local authorities of Ulm were brought to consent to a formal reformation of Church rites and doctrine. The mass was abolished, images removed, cloisters closed, and the Zwinglian doctrines accepted. But victory,

after seven years of valiant contest, was in its results for Sam fully as serious and full of danger as had been the open contest. So soon as the crown of victory was gained, the interest of the masses in religion cooled off; attendance on the sermons declined; vice reigned among high and low; the duties of Sam taxed his powers to the utmost; and, worse than all, the zeal of the oppressed party burst forth with new life. Romanists flocked out to every neighboring village to join in their old rites; and High Lutherans labored in the same direction. In 1533 the health of the laborious preacher began to break down. Twice he rose from his sick-bed to proclaim the Gospel afresh. It was too much. On June 20 he rested from his labors. See Keim, *Reform. der Reichsstadt Ulm* (1851); Herzog, *Real-Encyklop.* xx, 670-682. (J. P. L.)

Sam'aël (Σαμαήλ v. r. Σαλαμὴλ), a corrupt form (Judith viii, 1) of the Heb. name (Numb. i, 6) SHELU-MIEL (q. v.).

Samai'as (Σαμαΐς, but v. r. in Tobit Σεμείας, Σεμελάς, etc.), a Grecized form for the name SHEMALAH (q. v.): *a.* a Levite (1 Esdr. i, 9), in the reign of Josiah (2 Chron. xxv, 9); *b.* an Israelite (1 Esdr. viii, 39) of the "sons" of Adonikam (Ezra viii, 13); *c.* a "great" personage, father of Amnias and Jonathas (Tobit v, 13).

Samanæans, in Chinese mythology, are an order of saints who are given to self-contemplation. Fo, or Fohi, teaches that the essence of all things consists in the nothing and the vacuum, and that men return into the nothing, there first to attain to blessedness. The Samanæans occupy the last stage in the progress towards this nihilistic blessedness. He who has advanced to this stage need no longer worship the gods; he is delivered from his passions, lives in a state of constant self-contemplation, and dies only that he may be incorporated with the great soul of the world.

Samanéra is the name given to a novice among the Buddhists. It is derived from *sramana*, an ascetic. He must be at least eight years of age, and must have received the consent of his parents to his abandonment of the world. He cannot receive ordination until he is twenty years of age, nor before he has reached that age can he perform any religious rite, nor is he allowed to interfere in matters of discipline or government. The vow of a Samanéra is in no case revocable.

Sama'ria [strictly *Samari'a*], CITY OF (Heb. *Shomeron'*, שֹׁמֶרֹן, *watch*, so called probably from its commanding site, as well as by alliteration with its original owner's name; Chald. *Shomra'yin*, שֹׁמְרָיִן, Ezra iv, 10, 17; Sept., New Test., and Josephus, usually Σαμαρεία, as Ptolemy; but some copies of the Sept. often have Σαμαρία, and occasionally Σεμρών or Σομρών; and Josephus once [*Ant.* viii, 12, 1] Σεμαρών), an important place in Central Palestine, famous as the capital of the Northern Kingdom, and later as giving name to a region of the country and to a schismatic sect. Its boundaries, however, seem never to have been very definitely fixed. See ISRAEL, KINGDOM OF.

1. *History*.—The hill of the same name, which the city occupied, was purchased for two talents of silver from the owner, Shemer (q. v.), after whom the city was named (1 Kings xvi, 23, 24), by Omri (q. v.), king of Israel, for the foundation of his new metropolis, B.C. cir. 925. The first capital after the secession of the ten tribes had been Shechem itself, whither all Israel had come to make Rehoboam king. On the separation being fully accomplished, Jeroboam rebuilt that city (1 Kings xii, 25), which had been razed to the ground by Abimelech (Judg. ix, 45). But he soon moved to Tirzah, a place, as Dr. Stanley observes, of great and proverbial beauty (Cant. vi, 4), which continued to be the

royal residence until Zimri burned the palace and perished in its ruins (1 Kings xiv, 17; xv, 21, 33; xvi, 6-18). Omri, who prevailed in the contest for the kingdom that ensued, after "reigning six years" there, transferred his court and government to a new site, being under the necessity of reconstructing somewhere, and doubtless influenced by the natural advantages of the position, and desirous of commemorating his dynasty by a change of capital. Samaria continued to be the metropolis of Israel for the remaining two centuries of that kingdom's existence. During all this time it was the seat of idolatry, and is often as such denounced by the prophets (Isa. ix, 8; Jer. xxiii, 13, 14; Ezek. xvi, 46-55; Amos vi, 1; Mic. i, 1), sometimes in connection with Jerusalem (especially by Hosea). Ahab built a temple to Baal there (1 Kings xvi, 32, 33); and from this circumstance a portion of the city, possibly fortified by a separate wall, was called "the city of the house of Baal" (2 Kings x, 25). It was the scene of many of the acts of the prophets Elijah and Elisha (q. v.), connected with the various famines of the land, the unexpected plenty of Samaria, and the several deliverances of the city from the Syrians. Jehu broke down the temple of Baal, but does not appear to have otherwise injured the city (ver. 18-28). Samaria must have been a place of great strength. It was twice besieged by the Syrians, in B.C. 901 (1 Kings xx, 1) and in B.C. 892 (2 Kings vi, 24-vii, 20); but on both occasions the siege was ineffectual. On the latter, indeed, it was relieved miraculously, but not until the inhabitants had suffered almost incredible horrors from famine during their protracted resistance. The possessor of Samaria was considered to be *de facto* king of Israel (xv, 13, 14); and woes denounced against the nation were directed against it by name (Isa. vii, 9, etc.). Although characterized by gross voluptuousness, as well as other sins incidental to idolatry, its inhabitants did not entirely lose that generosity which had early characterized Ephraim, in evidence of which note the event that happened during the reign of the last but one of its kings (2 Chron. xxviii, 6-15). In B.C. 720 Samaria was taken, after a siege

Ancient Egyptian Representation of the People of Samaria.

of three years, by Shalmaneser (or, rather, by his successor Sargon), king of Assyria (2 Kings xviii, 9, 10), and the kingdom of the ten tribes was destroyed. The city doubtless was demolished by the conqueror. Col. Rawlinson, indeed, has lately endeavored to show that Samaria was not at once depopulated (*Athenæum* [Lond.], Aug. 22, 1863, p. 246); and this was doubtless true as regards the *country* around; but his application of the argument to the city itself (evidently in order to square with the hypothesis of a twofold invasion of Judah also during the reign of Hezekiah [q. v.]) is based upon reasons so obviously inconclusive that they need not be here examined in detail. See SAMARITAN. Samaria is only called *Beth-Khumri* in the earlier cuneatic inscriptions (q. v.), but from the time of Tiglath-Pileser II the term used is *Tsamrin* (Rawlinson, *Hist. Evidences*, p. 321). The people are figured on the Egyptian monuments among the captives with the hieroglyph *Amori* attached (Wilkinson, *Anc. Egyptians*, i, 403). See CAPTIVITY, ASSYRIAN.

After this capture Samaria appears to have continued, for a time at least, the chief city of the foreigners brought to occupy the places of the departed natives, although Shechem soon became the capital of the Samaritans as a religious sect. From this it would seem that the city of Samaria had meanwhile been but partially rebuilt.

We do not, however, hear especially of the place until the days of Alexander the Great, B.C. 333. That conqueror took the city, which seems to have somewhat recovered itself (Euseb. *Chron.* ad ann. Abr. 1684), killed a large portion of the inhabitants, and suffered the remainder to settle among their compatriots at Shechem (q. v.). He replaced them by a colony of Syro-Macedonians, and gave the adjacent territory (*Σαμαρείτις χώρα*) to the Jews to inhabit (Josephus, *c. Ap.* ii, 4). These Syro-Macedonians occupied the city until the time of John Hyrcanus. It was then a place of considerable importance, for Josephus describes it (*Ant.* xiii, 10, 2) as a very strong city (*πόλις ὀχυρωτάτη*). John Hyrcanus took it after a year's siege, and did his best to demolish it entirely. He intersected the hill on which it lay with trenches; into these he conducted the natural brooks, and thus undermined its foundation. "In fact," says the Jewish historian, "he took away all evidence of the very existence of the city." This story at first sight seems rather exaggerated, and inconsistent with the hilly site of Samaria. It may have referred only to the suburbs lying at its foot. "But," says Prideaux (*Connection*, B.C. 109, note), "Benjamin of Tudela, who was in the place, tells us in his *Itinerary* (no such passage, however, exists in that work) that there were upon the top of this hill many fountains of water, and from these water enough may have been derived to fill these trenches." It should also be recollected that the hill of Samaria was lower than the hills in its neighborhood. This may account for the existence of these springs. Josephus describes the extremities to which the inhabitants were reduced during this siege, much in the same way that the author of the book of Kings does during that of Benhadad (comp. *War*, i, 2, 7 with 2 Kings vi, 25). John Hyrcanus's reasons for attacking Samaria were the injuries which its inhabitants had done to the people of Marissa, colonists and allies of the Jews. This confirms what was said above of the cession of the Samaritan neighborhood to the Jews by Alexander the Great. The mention of Marissa in this connection serves to explain a notice in the earlier history of the Maccabees. The Samaria named in the present text of 1 Macc. v, 66 (*ἡ Σαμάρεια*; *Vulg. Samaria*) is evidently an error. At any rate, the well-known Samaria of the Old and New Testaments cannot be intended, for it is obvious that Judas, in passing from Hebron to the land of the Philistines (Azotus), could not make so immense a détour. The true correction is doubtless supplied by Josephus (*Ant.* xii, 8, 6), who has Marissa (i. e. Mareshah [q. v.]) a place which lay in the road from Hebron to the Philistine plain. One of the ancient Latin versions exhibits the same reading, which is accepted by Ewald (*Gesch.* iv, 361) and a host of commentators (see Grimm, *Kurzg. exeg. Handb.* on the passage). Drusius proposed Shaaraim; but this is hardly so feasible as Mareshah, and has no external support.

After this demolition (which occurred in B.C. 129), the Jews inhabited what remained of the city; at least, we find it in their possession in the time of Alexander Jannæus (Josephus, *Ant.* xiii, 15, 4), and until Pompey gave it back to the descendants of its original inhabitants (*τοῖς οἰκιστοῖσι*). These *οἰκιστοὶ* may possibly have been the Syro-Macedonians, but it is more probable that they were Samaritans proper, whose ancestors had been dispossessed by the colonists of Alexander the Great. By directions of Gabinius, Samaria and other demolished cities were rebuilt (*ibid.* xiv, 5, 3). But its more effectual rebuilding was undertaken by Herod the Great, to whom it had been granted by Augustus, on the death of Antony and Cleopatra (*ibid.* xiii, 10, 3; xv, 8, 5; *War*, i, 20, 3). He called it *Sebaste*, *Σεβαστή* = *Augusta*, after the name of his patron (Josephus, *Ant.* xv, 7, 7). Josephus gives an elaborate description of Herod's improvements. The wall surrounding it was twenty stadia in length. In the middle of it was a close, of a stadium and a half square, containing a magnificent temple dedicated to the Cæsar. It was colonized by 6000 veterans

and others, for whose support a most beautiful and rich district surrounding the city was appropriated. Herod's motives in these arrangements were probably, first, the occupation of a commanding position, and then the desire of distinguishing himself for taste by the embellishment of a spot already so adorned by nature (*ibid.* xv, 8, 5, *War*, i, 20, 3, 21, 2).

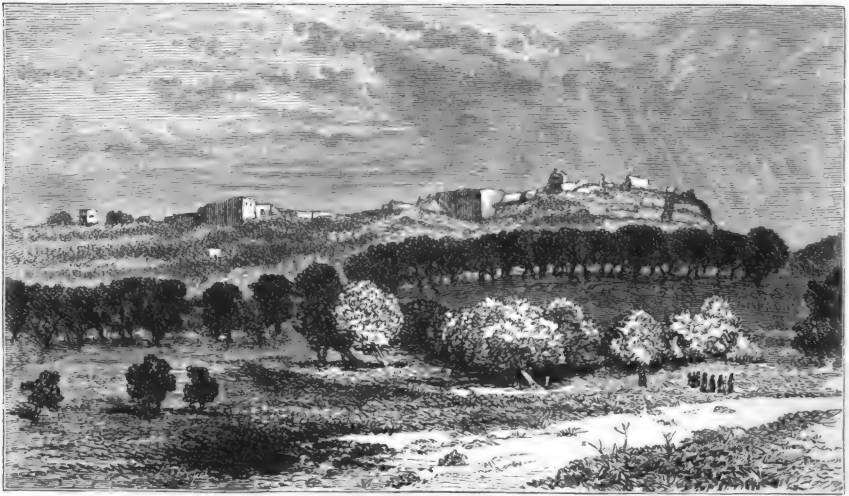

How long Samaria maintained its splendor after Herod's improvements, we are not informed. In the New Test. the city itself does not appear to be mentioned, but rather a portion of the district to which, even in older times, it had extended its name. Our version, indeed, of Acts viii. 5, says that Philip the deacon "went down to the city of Samaria;" but the Greek of the passage is simply εἰς πόλιν τῆς Σαμαρείας. It is hardly safe to argue, however, either from the absence of the definite article, or from the probability that, had the city Samaria been intended, the term employed would have been *Sebaste*, that some one city of the district, the name of which is not specified, was in the mind of the writer (as Olshausen, Neander, De Wette, Meyer, etc.); for the genitive is one of apposition (Winer), πόλις being sufficiently defined by it (Hackett), and the city was well known in that day by this name (see Josephus, *Ant.* xx, 6, 2). The evangelist would naturally have resorted first to the chief city, where also Simon Magus probably was. In ver. 9 of the same chapter "the people of Samaria" represents τὸ ἔθνος τῆς Σαμαρείας; and the phrase in ver. 25, "many villages of the Samaritans," shows that the operations of evangelizing were not confined to the city of Samaria itself (comp. Matt. x, 5, "Into any city of the Samaritans enter ye not;" and John iv, 4, 5, where, after it has been said, "And he must needs go through Samaria," obviously the district, it is subjoined, "Then cometh he to a city of Samaria called Sychar"). Henceforth its history is very unconnected, although it is occasionally noticed in the reigns of the Roman emperors (Ulpian, *Leg. l. de Censibus*, quoted by Dr. Robinson). Various specimens of coins struck on the spot have been preserved, extending from Nero to Geta, the brother of Caracalla (Vailant, in *Nunzio Imper.*, and Noris, quoted by Reland; Eckhel, iii, 440; Mionnet, *Méd. Antiq.* v, 513). Septimius Severus appears to have established there a Roman colony in the beginning of the 3d century (Cellarius, *Not. Orb.* ii, 432). Eusebius scarcely mentions the city as extant; but it is often named by Jerome and other writers of the same and a later age (adduced in Reland's *Palest.* p. 979-981). But it could not have been a place of much political importance. We find in the *Codez de Theodosius* that by A.D. 409 the Holy Land had been divided into Palestina Prima, Secunda, and Tertia. Palestina Prima included the country of the Philistines, Samaria (the district), and the northern part of Judæa; but its capital was not Sebaste, but Cæsarea. In an ecclesiastical point of view it stood rather higher. It was an episcopal see probably as early as the 3d century. At any rate, its bishop was present among those of Palestine at the Council of Nicea, A.D. 325, and subscribed its acts as "Maximus (al. Marinus) Sebastenus." The names of some of his successors have been preserved; the latest of them mentioned is Pelagius, who attended the synod at Jerusalem, A.D. 536. The title of the see occurs in the earlier Greek *Notitiæ* and in the later Latin ones (Reland, *Palest.* p. 214-229).

Jerome, whose acquaintance with Palestine imparts a sort of probability to the tradition which prevailed so strongly in later days, asserts that Sebaste, which he invariably identifies with Samaria, was the place in which John the Baptist was imprisoned and suffered death. (See below.) He also makes it the burial-place of the prophets Elisha and Obadiah (see various passages cited by Reland, *Palest.* p. 980, 981). Epiphanius is at great pains, in his work *Adv. Hæreses* (lib. i), in which he treats of the heresies of the Samaritans with singular minuteness, to account for the origin of their name. He

interprets it as שְׁמֶרֶת, φύλακες, or "keepers." The hill on which the city was built was, he says, designated *Somer*, or *Somoron* (Σωμήρ, Σωμόρων), from a certain Somoron the son of Somer, whom he considers to have been of the stock of the ancient Perizzites or Girgashites, themselves descendants of Canaan and Ham. But, he adds, the inhabitants may have been called Samaritans from their guarding the land, or (coming down much later in their history) from their guarding the law, as distinguished from the later writings of the Jewish canon, which they refused to allow. See SAMARITAN.

The city, along with Nablûs, fell into the power of the Moslems during the siege of Jerusalem, A.D. 614; and we hear but little more of it till the time of the Crusades. At what time the city of Herod became desolate no existing accounts state, but all the notices of the 4th century and later lead to the inference that its destruction had already taken place. The Crusaders established a Latin bishopric at Sebaste, and the title was continued in the Romish Church till the 14th century (Le Quien, *Oriens Christ.* iii, 1290). Saladin marched through it in A.D. 1184, after his repulse from Kerak (Abulfeda, *Annal.* A.H. 580). Benjamin of Tudela describes it as having been "formerly a very strong city, and situated on the mount, in a fine country, richly watered, and surrounded by gardens, vineyards, orchards, and olive-groves." He adds that no Jews were living there (*Itiner.* [ed. Asher] p. 66). Phocas and Brocardus speak only of the church and tomb of John the Baptist, and of the Greek church and monastery on the summit of the hill. Notices of the place occur in the travellers of the 14th, 16th, and 17th centuries; nor are they all so meagre as Dr. Robinson conceives. That of Morison, for instance, is full and exact (*Voyage du Mont Sinaï*, p. 230-233). The description of Sandys, likewise, is quite circumstantial (see Kitto, *Phys. Hist. of Palest.* p. cxvii sq.). Scarcely any traces of the earlier or later Samaria could then be perceived, the materials having been used by the inhabitants for the construction of their own mean dwellings. The residents were an extremely poor and miserable set of people. In the 18th century the place appears to have been left unexplored, but in the present century it has often been visited and described.

II. *Description.*—In the territory originally belonging to the tribe of Joseph, about six miles to the north-west of Shechem, there is a wide basin-shaped valley, encircled with high hills, almost on the edge of the great plain which borders upon the Mediterranean. In the centre of this basin, which is on a lower level than the valley of Shechem, rises a less elevated oblong hill, with steep yet accessible sides, and a long flat top. The singular beauty of the spot may have struck Omri, as it afterwards struck the tasteful Idumean (Josephus, *War*, i, 21, 2; *Ant.* xv, 8, 5). All travellers agree that it would be difficult to find in the whole land a situation of equal strength, fertility, and beauty combined. "In all these particulars," says Dr. Robinson, "it has greatly the advantage over Jerusalem" (*Bibl. Researches*, iii, 146). In the valley there is an abundance of excellent water all the year round, but on the hill itself there is not so much as a single fountain. This is its only and great disadvantage as a site for a city, and a most serious one it must have been, especially in the time of siege. This was a want which Samaria shared in common with the capital of Judah; but the deficiency in both cases was so amply supplied by cisterns under the houses and elsewhere that in the severe sieges we never read of either city suffering from a scarcity of water. See JERUSALEM. The hill of Samaria itself is of considerable elevation and very regular in form, and the broad deep valley in the midst of which it lies is a continuation of that of Nablûs (Shechem), which here expands into a breadth of five or six miles. Beyond this valley, which completely isolates the hill, the mountains rise again on every side, forming a complete wall around the city (as referred to in 2 Kings vi, 17). They are terraced to the

General View of Sebustiyeh (Samaria) from the south-east, showing the Ruins of the Church of St. John to the right and the Terraces of the Hill to the left. (From a photograph by the Editor.)

tops, sown in grain, and planted with olives and figs, in the midst of which a number of handsome villages appear to great advantage, their white stone cottages contrasting strikingly with the verdure of the trees. The hill of Samaria itself is cultivated from its base, the terraced sides and summit being covered with corn and with olive-trees. About midway up the ascent the hill is surrounded by a narrow terrace of level land, like a belt, below which the roots of the hill spread off more gradually into the valleys. Higher up, too, are the marks of slight terraces, once occupied, perhaps, by the streets of the ancient city. The ascent of the hill is very steep, and the narrow footpath winds among the mountains through substantial cottages of the modern *Sebustiyeh* (the Arabic form of *Sebaste*), which appear to have been constructed to a great extent of ancient materials, very superior in size and quality to anything which could at this day be wrought into an Arab habitation. The houses are all of stone, though erected with little or no regard to order and regularity. These, with their inmates, present the same unclean appearance that is met with among all the Felahin of the country; and the inhabitants are remarkably rude, but more industrious than most of their race. The view from the summit is most interesting. Beneath, to the north and east, lie its own immediate fertile valleys; and, turning westwardly, the eye wanders over rich plains to Sharon and the blue Mediterranean; and even in the present impoverished state of the country the scene fills the mind of the beholder with delight.

On the summit, the first object which attracts the notice of the traveller, and, at the same time, the most conspicuous ruin of the place, is the church dedicated to John the Baptist, erected on the spot which an old tradition (noticed above) fixed as the place of his burial, if not of his martyrdom. It is said to have been built by the empress Helena; but the architecture limits its antiquity to the period of the Crusades, although a portion of the eastern end seems to have been of earlier date. There is a blending of Greek and Saracenic styles, which is particularly observable in the interior, where there are several pointed arches; others are round. The columns follow no regular order, while the capitals and ornaments present a motley combination not to be found in any church erected in or near the age of Constantine. The length of the edifice is 153 feet inside, besides a porch of 10 feet; and the breadth is 75 feet. The eastern end is rounded, in the common Greek style; and, resting, as it does, upon a precipitous elevation of nearly 100 feet immediately above the val-

ley, it is a noble and striking monument. Within the enclosure is a common Turkish tomb; and beneath it, at a depth reached by twenty-one stone steps, is a sepulchre, three or four paces square, where, according to the tradition, John the Baptist was interred after he had been slain by Herod. There is no trace of this tradition earlier than the time of Jerome; and if Josephus is correct in stating that John was beheaded in the castle of Machærus, on the east of the Dead Sea (*Ant.* xviii, 5, 2), his burial in Samaria is very improbable. See JOHN THE BAPTIST.

On approaching the summit of the hill, the traveller comes suddenly upon an area once surrounded by limestone columns, of which fifteen are still standing and two prostrate. These columns form two rows, thirty-two paces apart, while less than two paces intervene between the columns. They measure seven feet nine inches in circumference; but there is no trace of the order of their architecture, nor are there any foundations to indicate the nature of the edifice to which they belonged. Some refer them to Herod's temple to Augustus, others to a Greek church which seems to have once occupied the summit of the hill. The descent of the hill on the W.S.W. side brings the traveller to a very remarkable colonnade, which is easily traceable by a great number of columns, erect or prostrate, along the side of the hill for at least one third of a mile, where it terminates at a heap of ruins, near the eastern extremity of the ancient site. The columns are sixteen feet high, two feet in diameter at the base, and one foot eight inches at the top. The capitals have disappeared; but the shafts retain their polish, and, when not broken, are in good preservation. Eighty-two of these columns are still erect, and the number of those fallen and broken must be much greater. Most of them are of the limestone common to the region; but some are of white marble, and some of granite. The mass of ruins in which this colonnade terminates towards the west is composed of blocks of hewn stone, covering no great area, on the slope of the hill, many feet lower than the summit. Neither the situation nor extent of this pile favors the notion of its having been a palace, nor is it easy to conjecture the design of the edifice. The colonnade, the remains of which now stand solitary and mournful in the midst of ploughed fields, may, however, with little hesitation, be referred to the time of Herod the Great, and must be regarded as belonging to some one of the splendid structures with which he adorned the city. In the deep ravine which bounds the city on the north there is another colon-

Ruins of Herod's Colonnade surrounding the Hill of Samaria. (From a photograph by the Editor.)

nade, not visited by Dr. Robinson, but fully described by Dr. Olin (*Travels*, ii, 371-373). The area in which these columns stand is completely shut in by hills, with the exception of an opening on the north-east; and so peculiarly sequestered is the situation that it is only visible from a few points of the heights of the ancient site, by which it is overshadowed. The columns, of which a large number are entire and several in fragments, are erect, and arranged in a quadrangle 196 paces asunder, which would give 170 columns as the whole number when the colonnade was complete. The columns resemble, in size and material, those of the colonnade last noticed, and appear to belong to the same age. These also probably formed part of Herod's city, though it is difficult to determine the use to which the colonnade was appropriated. Dr. Olin is possibly right in his conjecture that this was one of the places of public assembly and amusement which Herod introduced into his dominions. "A long avenue of broken pillars" (says dean Stanley), "apparently the main street of Herod's city, here, as at Palmyra and Damascus, adorned by a colonnade on each side, still lines the topmost terrace of the hill." But the fragmentary aspect of the whole place exhibits a present fulfilment of the prophecy of Micah (i, 6), though it may have been fulfilled more than once previously by the ravages of Shalmaneser or of John Hyrcanus: "I will make Samaria as a heap of the field, and as plantings of a vineyard: and I will pour down the stones thereof into the valley, and I will discover the foundations thereof" (Mic. i, 6; comp. Hos. xiii, 16).

See SAMARIA, REGION OF.

SAMARIA, REGION OF (usually Σαμαρία, the same as the city; but when distinguishing it from the latter, the Sept. and Josephus write Σαμαρείτις or Χώρα Σαμαρείων; sometimes Σαμαρί, as Ptolemy). This term at first included all the tribes over which Jeroboam made himself king, whether east or west of the river Jordan. Hence, even before the city of Samaria existed, we find the "old prophet who dwelt at Bethel" describing the predictions of "the man of God who came from Judah," in reference to the altar at Bethel, as directed not merely against that altar, but "against all the houses of the high-places which are in the cities of Samaria" (1 Kings xiii, 32), i. e., of course, the cities of which Samaria was, or was to be, the head or capital. In other places in the historical books of the Old Test. (with the exception of 2 Kings xvii, 24, 26, 28, 29) Samaria seems to denote the city exclusively. But the prophets use the word, much as did the old prophet of Bethel, in a greatly extended sense. Thus the "calf of Bethel" is called by Hosea (viii, 5, 6) the "calf of Samaria;" in Amos (iii, 9) the "mountains of Samaria" are spoken of; and the "captivity of Samaria and her daughters" is a phrase found in Ezekiel (xvi, 53).

But, whatever extent the word might have acquired, it necessarily became contracted as the limits of the kingdom of Israel became contracted. In all probability the territory of Simeon and that of Dan were very early absorbed in the kingdom of Judah. This would be one limitation. Next, in B.C. 771 and 740 respectively, "Pul, king of Assyria, and Tilgath-pilneser, king of Assyria, carried away the Reubenites, and the Gadites, and the half-tribe of Manasseh, and brought them unto Halah, and Habor, and Hara, and to the river Gozan" (1 Chron. v, 26). This would be a second limitation. But the latter of these kings went further: "He took Ijon, and Abel-beth-maachah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali, and carried them captive to Assyria" (2 Kings xv, 29). This would be a third limitation. Nearly a century before, B.C. 860, "the Lord had begun to cut Israel short," for "Hazeal, king of Syria, smote them in all the coasts of Israel: from Jordan eastward, all the land of Gilead, the Gadites, and the Reubenites, and the Manassites, from Aroer, which is by the river Arnon.

even Gilead and Bashan" (2 Kings x, 32, 33). This, however, as we may conjecture from the diversity of expression, had been merely a passing inroad, and had involved no permanent subjection of the country, or deportation of its inhabitants. The invasions of Pul and of Tilgath-pilneser were utter clearances of the population. The territory thus desolated by them was probably occupied by degrees by the pushing forward of the neighboring heathen, or by straggling families of the Israelites themselves. In reference to the northern part of Galilee, we know that a heathen population prevailed. Hence the phrase "Galilee of the nations" or "Gentiles" (Isa. ix, 1; 1 Macc. v, 15). No doubt this was the case also beyond Jordan. But we have yet to arrive at a fourth limitation of the kingdom of Samaria. It is evident from an occurrence in Hezekiah's reign that just before the deposition of Hoshea, the last king of Israel, the authority of the king of Judah, or, at least, his influence, was recognised by portions of Asher, Issachar, and Zebulun, and even of Ephraim and Manasseh (2 Chron. xxx, 1-26). Men came from all those tribes to the Passover at Jerusalem. This was about B.C. 726. In fact, to such miserable limits had the kingdom of Samaria been reduced, that when, two or three years afterwards, we are told that "Shalmaneser came up throughout the land," and after a siege of three years "took Samaria, and carried Israel away into Assyria, and placed them in Halah, and in Habor by the river Gozan, and in the cities of the Medes" (2 Kings xvii, 5, 6), and when again we are told that "Israel was carried away out of their own land into Assyria" (2 Kings xvii, 23), we must suppose a very small field of operations. Samaria (the city), and a few adjacent cities or villages only, represented that dominion which had once extended from Bethel to Dan northwards, and from the Mediterranean to the borders of Syria and Ammon eastwards. This is further confirmed by what we read of Josiah's progress, in B.C. 628, through "the cities of Manasseh and Ephraim and Simeon, even unto Naphtali" (2 Chron. xxxiv, 6). Such a progress would have been impracticable had the number of cities and villages been at all large. On the capture of the city of Samaria, and the final overthrow of the kingdom of Israel by Shalmaneser or Sargon (B.C. 720), the Jews were removed, and strangers were brought from Assyria "and placed in the cities of Samaria" (2 Kings xvii, 24; comp. Ezra iv, 10). These colonists took the name of their new country. See SAMARITANS. Instead of a kingdom, Samaria now became a province. Its extent cannot be exactly ascertained. The political geography of Palestine was undergoing changes every year, in consequence of incessant wars and conquests; and it was not until the period of Roman dominion that the boundaries of provinces began to be accurately defined. Josephus describes the province as follows: "The district of Samaria lies between Judæa and Galilee. Commencing at a village called Ginea, situated in the Great Plain, it terminates at the territory of the Acrabatenes" (*War*, iii, 3, 4). Ginea is identical with the modern Jenin, on the southern side of the plain of Esdraelon. It is evident, therefore, that the northern border of Samaria ran along the foot of the mountain-range, beginning at the promontory of Carmel on the west, and terminating at the Jordan, near the site of Succoth. Its southern border would probably correspond pretty nearly to a line drawn from Joppa eastward through Bethel to the Jordan (see *Reiland, Palest.*, p. 192). Thus it comprehended the ancient territory of Ephraim, and of those Manassites who were west of Jordan. "Its character," Josephus continues, "is in no respect different from that of Judæa. Both abound in mountains and plains, and are suited for agriculture, and productive, wooded, and full of fruits both wild and cultivated. They are not abundantly watered; but much rain falls there. The springs are of an exceedingly sweet taste; and, on account of the quantity of good grass, the cattle there produce more milk

than elsewhere. But the best proof of their richness and fertility is that both are thickly populated." The accounts of modern travellers confirm this description by the Jewish historian of the "good land" which was allotted to that powerful portion of the house of Joseph which crossed the Jordan, on the first division of the territory. The geographical position of the province is several times incidentally mentioned in the New Test. Thus in Luke xvii, 11 it is stated that our Lord, in proceeding to Jerusalem from northern Palestine, "passed through the midst of Samaria;" and again, when he left Judæa and went to Galilee, St. John says, "He must needs go through Samaria" (iv, 4). So also, when Paul and Barnabas were sent on a special mission from Antioch to Jerusalem, "they passed through Phenice and Samaria" (Acts xv, 3). They followed the road along the sea-coast, doubtless calling at the great cities of Sidon, Tyre, and Cæsarea.

After the time of Roman rule in Syria, the name of Samaria as a province appears to have passed away. It is used by Pliny and Ptolemy, and is mentioned by Jerome. It is not found, however, in the *Notitia Ecclesiastica*, nor in any later work; and it is now wholly unknown to the natives of the country. The name of the ancient city has even given place to the Arabo-Greek *Sebustiyeh*.—KITTO.

On the history and natural features of the region in question, see ISRAEL, KINGDOM OF; PALESTINE; SAMARIA, CITY OF.

Samar'itan (Heb. *Shomeroni*, שֹׁמֵרֹנִי, from *Shomerôn*, the Heb. name of Samaria; Sept., New Test., Josephus, and other Greek writers, Σαμαρείτης, fem. Σαμαρείτις; by the later Jews, שְׁמֵרִי, i. e. *Cuthites* [q. v.]; by themselves, שְׁמֵרִים, *Shomerim*, *watchers* [by a play upon their original name], i. e. keepers of the law, as interpreted by Epiphanius, *Hæres.* i, 9), a term which in its strictest sense would denote an inhabitant of the city of Samaria. But it is not found at all in this sense, exclusively at any rate, in the Old Test., nor perhaps elsewhere. In fact, it only occurs there once, and then in a wider signification, in 2 Kings xvii, 29. There it is employed to designate those whom the king of Assyria had "placed in (what are called) the cities of Samaria (whatever these may be) instead of the children of Israel." Were the word Samaritan found elsewhere in the Old Test., it would have designated those who belonged to the kingdom of the ten tribes, which in a large sense was called Samaria. As the extent of that kingdom varied, which it did very much, gradually diminishing to the time of Shalmaneser, so the extent of the word Samaritan would have varied. In the New Test. it is applied, strictly speaking, to the people or sect who had established an independent worship of their own in a temple or synagogue at Nablûs. Although a comparatively small and isolated community, their history and literature are so closely connected with those of the Hebrew people as to give them great importance in a Biblical point of view. See SECTS OF THE JEWS.

I. Origin of this People.—As we have seen in the preceding articles, Shalmaneser, or Sargon, his successor (2 Kings xvii, 5, 6, 26), carried Israel, i. e. the remnant of the ten tribes which still acknowledged Hosea's authority, into Assyria. This remnant consisted, as has been shown, of Samaria (the city) and a few adjacent cities and villages. Now (a), did he carry away all their inhabitants, or not? (b) Whether they were wholly or only partially desolated, who replaced the deported population? On the answer to these inquiries will depend our determination of the questions, Were the Samaritans a mixed race, composed partly of Jews, partly of new settlers, or were they purely of foreign extraction? Upon few Biblical questions have scholars arrived at conclusions more opposite.

1. Arguments in Favor of an Exclusively Heathen Origin of the Samaritans.—The great advocate of this view is Hengstenberg, who states not only the Biblical reasons, but continues the examination through Sirach

the Maccabees, and the New Test. (*Authentic des Pentateuch*, i, 3-28). In favor of the purely Assyrian origin of the people, Hengstenberg quotes Mill, Schultz, R. Simon, Reland, and Elmacin. To this list others add Suicer, Hammond, Drusius, Malkonatus, Hävernack, Robinson, and Trench (*Parables*, p. 310 sq.). In ancient times, Josephus, Origen, Eusebius, Epiphanius, Chrysostom, and Theodoret are quoted on the same side. The following is an outline of this position:

It has been asserted that the language of Scripture admits of scarcely a doubt. "Israel was carried away" (2 Kings xvii, 6, 23), and other nations were placed "in the cities of Samaria *instead* of the children of Israel" (2 Kings xvii, 24). There is no mention whatever, as in the case of the somewhat parallel destruction of the kingdom of Judah, of "the poor of the land being left to be vine-dressers and husbandmen" (2 Kings xxv, 12). It is added that, had any been left, it would have been impossible for the new inhabitants to have been so utterly unable to acquaint themselves with "the manner of the God of the land" as to require to be taught by some priest of the captivity sent from the king of Assyria. Besides, it was not an unusual thing with Oriental conquerors actually to exhaust a land of its inhabitants. Comp. Herod. iii, 149: "The Persians dragged (συνήνεσαντες) Samos, and delivered it up to Syloson, stripped of all its men;" and, again, Herod. vi, 31, for the application of the same treatment to other islands, where the process called *συνήνευν* is described, and is compared to a hunting-out of the population (ἐκ-σπρέειν). Such a capture is presently contrasted with the capture of other territories to which *συνήνευν* was not applied. Josephus's phrase in reference to the cities of Samaria is that Shalmaneser "transplanted all the people" (*Ant.* ix, 14, 1). A threat against Jerusalem, which was, indeed, only partially carried out, shows how complete and summary the desolation of the last relics of the sister kingdom must have been: "I will stretch over Jerusalem the line of Samaria, and the plummet of the house of Ahab; and I will wipe Jerusalem as a man wipeth a dish: he wipeth and turneth it upon the face thereof" (2 Kings xxi, 13). This was uttered within forty years after B.C. 721, during the reign of Manasseh. It must have derived much strength from the recentness and proximity of the calamity.

Hence it is concluded by the advocates of this view that the cities of Samaria were not partially, but wholly, evacuated of their inhabitants in B.C. 720, and that they remained in this desolated state until, in the words of 2 Kings xvii, 24, "the king of Assyria brought men from Babylon, and from Cuthah, and from Ava (Ivah, 2 Kings xviii, 34), and from Hamath, and from Sepharvaim, and placed them in the cities of Samaria instead of the children of Israel: and they possessed Samaria, and dwelt in the cities thereof." Thus the new Samaritans—for such we would now call them—were Assyrians by birth or subjugation, were utterly strangers in the cities of Samaria, and were exclusively the inhabitants of those cities. An incidental question, however, arises: Who was the king of Assyria that effected this colonization? At first sight, one would suppose Shalmaneser; for the narrative is scarcely broken, and the reappearing seems to be a natural sequence of the depopulation. Such would appear to have been Josephus's view; for he says of Shalmaneser, "When he had removed the people out of their land, he brought other nations out of Cuthah, a place so called (for there is still in Persia a river of that name), into Samaria and the country of the Israelites" (*Ant.* ix, 14, 1 and 3; x, 9, 7); but he must have been led to this interpretation simply by the juxtaposition of the two transactions in the Hebrew text. The Samaritans themselves (in Ezra iv, 2, 10) attributed their colonization, not to Shalmaneser, but to "Esar-haddon, king of Assur," or to "the great and noble Asnapper," either the king himself or one of his generals. It was probably on his invasion of Judah, in the reign of Manasseh, about B.C. 677, that

Esar-haddon discovered the impolicy of leaving a tract upon the very frontiers of that kingdom thus desolate, and determined to garrison it with foreigners. The fact, too, that some of these foreigners came from Babylon would seem to direct us to Esar-haddon, rather than to his grandfather Shalmaneser: it was only recently that Babylon had come into the hands of the Assyrian king. There is another reason why this date should be preferred: it coincides with the termination of the sixty-five years of Isaiah's prophecy, delivered B.C. 742, within which "Ephraim should be broken that it should not be a people" (Isa. vii, 8). This was not effectually accomplished until the very land itself was occupied by strangers. So long as this had not taken place, there might be hope of return; after it had taken place, no hope. Josephus (*Ant.* x, 9, 7) expressly notices this difference in the cases of the ten and of the two tribes. The land of the former became the possession of foreigners, the land of the latter not so.

These strangers, who are thus assumed to have been placed in "the cities of Samaria" by Esar-haddon, were, of course, idolaters, and worshipped a strange medley of divinities. Each of the five nations, says Josephus, who is confirmed by the words of Scripture, had its own god. No place was found for the worship of Him who had once called the land his own, and whose it was still. God's displeasure was kindled, and they were infested by beasts of prey, which had probably increased to a great extent before their entrance upon it. "The Lord sent lions among them, which slew some of them." On their explaining their miserable condition to the king of Assyria, he despatched one of the captive priests to teach them "how they should fear the Lord." The priest came accordingly; and henceforth, in the language of the sacred historian, they "feared the Lord, and served their graven images, both their children and their children's children: as did their fathers, so do they unto this day" (2 Kings xvii, 41). This last sentence was probably inserted by Ezra. It serves two purposes: 1st, to qualify the pretensions of the Samaritans of Ezra's time to be pure worshippers of God—they were no more exclusively his servants than was the Roman emperor, who desired to place a statue of Christ in the Pantheon, entitled to be called a Christian; and, 2dly, to show how entirely the Samaritans of later days differed from their ancestors in respect to idolatry. Josephus's account of the distress of the Samaritans, and of the remedy for it, is very similar, with the exception that, with him, they are afflicted with pestilence.

Such, according to one view of the history, was the origin of the post-captivity, or new Samaritans—men not of Jewish extraction, but from the farther East. "The Cuthæans had formerly belonged to the inner parts of Persia and Media, but were then called 'Samaritans,' taking the name of the country to which they were removed," says Josephus (*Ant.* x, 9, 7). Again, he says (*Ant.* ix, 14, 3) they are called, "in Hebrew, 'Cuthæans,' but in Greek, 'Samaritans.'" Our Lord expressly terms them *ἀλλογενεῖς* (Luke xvii, 18); and Josephus's whole account of them shows that he believed them to have been *μέτοικοι ἀλλοεθνῆς*, though, as he tells us in two places (*Ant.* ix, 14, 3; xi, 8, 6), they sometimes gave a different account of their origin.

2. *Arguments in Favor of a Mixed Origin of the Samaritans.*—The above views have been strongly combated by Kalkar (in the *Theologische Mittheilungen*, 1840, iii, 24 sq.); and weighty names are on this side, e. g. De Sacy, Gesenius, Winer, Döllinger (*Heidenthum u. Judenthum*, p. 739), Davidson, Stanley, Rawlinson, etc. The arguments for their views are substantially as follows:

(1.) It is evident that a considerable portion of the original Israelitish population must still have remained in the cities of Samaria; for we find (2 Chron. xxx, 1-20) that Hezekiah invited the remnant of the ten tribes who were in the land of Israel to come to the great Passover which he celebrated, and the different

tribes are mentioned (ver. 10, 11) who did or did not respond to the invitation. Later, Esar-haddon adopted the policy of Shalmaneser, and a still further deportation took place (Ezra iv, 2); but even after this, though the heathen element, in all probability, preponderated, the land was not swept clean of its original inhabitants. Josiah, it is true, did not, like Hezekiah, invite the Samaritans to take part in the worship at Jerusalem; but, finding himself strong enough to disregard the power of Assyria, now on the decline, he virtually claimed the land of Israel as the rightful appanage of David's throne, adopted energetic measures for the suppression of idolatry, and even exterminated the Samaritan priests. But what is of more importance as showing that some portion of the ten tribes was still left in the land is the fact that, when the collection was made for the repairs of the Temple, we are told that the Levites gathered the money "of the hand of *Manasseh and Ephraim, and of all the remnant of Israel*," as well as "of Judah and Benjamin" (2 Chron. xxxiv, 9). So, also, after the discovery of the book of the law, Josiah bound not only "all who were present in Judah and Benjamin" to stand to the covenant contained in it; but he "took away all the abominations out of all the countries that pertained to the *children of Israel*, and made all that were present in *Israel* to serve, even to serve Jehovah their God. All his days they departed not from serving Jehovah the God of their fathers" (2 Chron. xxxiv, 32, 33).

Later yet, during the viceroyalty of Gedaliah, we find still the same feeling manifested on the part of the ten tribes which had shown itself under Hezekiah and Josiah. Eighty devotees from Shechem, from Shiloh, and from Samaria, came with all the signs of mourning, and bearing offerings in their hand, to the Temple at Jerusalem. They thus testified both their sorrow for the desolation that had come upon it, and their readiness to take part in the worship there, now that order was restored. This, it may be reasonably presumed, was only one party out of many who came on a like errand. All these facts prove that, so far as was the intercourse between Judah and the remnant of Israel from being embittered by religious animosities, that it was the religious bond which bound them together. Hence it would have been quite possible during any portion of this period for the mixed Samaritan population to have received the law from the Jews.

This is far more probable than that copies of the Pentateuch should have been preserved among those families of the ten tribes who had either escaped when the land was shaven by the razor of the king of Assyria, or who had straggled back thither from their exile. If even in Jerusalem itself the book of the law was so scarce, and had been so forgotten, that the pious king Josiah knew nothing of its contents till it was accidentally discovered, still less probable is it that in Israel, given up to idolatry and wasted by invasions, any copies of it should have survived.

On the whole, we should be led to infer that there had been a gradual fusion of the heathen settlers with the original inhabitants. At first the former, who regarded Jehovah as only a local and national deity like one of their own false gods, endeavored to appease him by adopting in part the religious worship of the nation whose land they occupied. They did this in the first instance, not by mixing with the resident population, but by sending to the king of Assyria for one of the Israelitish priests who had been carried captive. But in process of time the amalgamation of races became complete, and the worship of Jehovah superseded the worship of idols, as is evident both from the wish of the Samaritans to join in the Temple worship after the captivity, and from the absence of all idolatrous symbols on Gerizim. So far, then, the history leaves us altogether in doubt as to the time at which the Pentateuch was received by the Samaritans. Copies of it *might* have been left in the northern kingdom after Shalmaneser's invasion, though this is hardly probable; or

they might have been introduced thither during the religious reforms of Hezekiah or Josiah. Till the return from Babylon there is no evidence that the Samaritans regarded the Jews with any extraordinary dislike or hostility. But the manifest distrust and suspicion with which Nehemiah met their advances when he was rebuilding the walls of Jerusalem provoked their wrath. From this time forward they were declared and open enemies. The quarrel between the two nations was further aggravated by the determination of Nehemiah to break off all marriages which had been contracted between Jews and Samaritans. Manasseh, the brother of the high-priest (so Josephus calls him, *Ant.* xi, 7, 2), and himself acting high-priest, was one of the offenders. He refused to divorce his wife, and took refuge with his father-in-law, Sanballat, who consoled him for the loss of his priestly privilege in Jerusalem by making him high-priest of the new Samaritan temple on Gerizim. With Manasseh many other apostate Jews who refused to divorce their wives fled to Samaria. It seems highly probable that these men took the Pentateuch with them, and adopted it as the basis of the new religious system which they inaugurated. See PENTATEUCH.

(2.) That the country should be swept clean of its inhabitants on the downfall of Samaria seems most improbable. It is true Eastern conquerors did sometimes utterly destroy cities, and occasionally extirpate whole islands (Herod. iii, 149). And some have thought that such was the general treatment of the conquered by the Assyrians (Layard, *Nineveh and its Remains*, ii, 374); but, as Rawlinson justly remarks, "it appears by the inscriptions that towns were frequently spared, and that the bulk of the inhabitants were generally left in the place" (*Five Great Monarchies*, i, 304, note). Should it be argued that the conduct of the residents of the city of Samaria was of a character to draw upon them the severest chastisement of their conquerors—an indiscriminate slaughter, with impalement or slavery awaiting the prisoners—there is no reason to suppose that the cities and towns of the provinces met with the same fate. According to the Assyrian inscriptions of Sargon, this removal consisted of only 27,280 families—amounting, let us say, to 200,000 individuals—which certainly would not exhaust the land.

It is popularly said and credited that those Assyrians were placed in Samaria by Shalmaneser soon after the fall of the kingdom; but this is a mistake. It arose probably from Josephus's statement, who, it seems, was led into this error from the juxtaposition in which the two events are related in the Hebrew text. It is doubtful whether Shalmaneser conducted the siege to its end, for there is a supposition that he was treacherously slain by the emissaries of Sargon, who had usurped the throne during his master's absence, and that the siege was terminated under the command of one of his leaders. The following expression is remarkable, and would tend to confirm this opinion: "Shalmaneser, king of Assyria, came up against Samaria and besieged it. And at the end of three years they took it" (2 Kings xviii, 9, 10). Sargon, according to the Assyrian inscriptions, claims the victory to himself, as well as the removal of the Samaritans to Assyria (Rawlinson, *Herodotus*, i, 472; comp. *Isa.* xx, 1). It is a curious and interesting fact, for the knowledge of which we are indebted to Sir H. Rawlinson, that Sargon penetrated far into the interior of Arabia, and, carrying off several Arabian tribes, settled them in Samaria. This explains how Geshem the Arabian came to be associated with Sanballat in the government of Judæa, as well as the mention of Arabians in the army of Samaria (*Illustrations of Egyptian History*, etc., in the *Trans. of the Roy. Soc. Lit.* 1860, i, 148, 149). See SARGON. Be this as it may, it is quite certain that some time elapsed from the fall of Samaria to the removal of the Assyrians into its cities. In the Assyrian inscriptions we have a list—probably a complete one—of the monarchs of the latter half of the

8th and the first half of the 7th century B.C., namely, Tiglath-pileser II, Shalmaneser II, Sargon, Sennacherib, and Esar-haddon. Now the Samaritans themselves attribute their removal to this last-named monarch, "Esar-haddon, king of Assur," "the great and noble Assnapper" (Ezra iv, 2, 10); and of this there can be no reasonable doubt. He invaded Judah in the reign of Manasseh, about B.C. 677, and probably it was this expedition that moved him to place these his subjects in Samaria. As he is conjectured to have died in B.C. 660, the transmigration must have taken place some time between these dates. Let us suppose that it occurred B.C. 670, and that king Josiah began his reformation B.C. 628. This would have given the strangers a residence of forty-two years. The question now arises, Were these colonists so numerous as to repeople the cities of Israel, from Bethel even to Naphtali? and was it over these that Josiah exercised his authority? Now, we have no means of arriving at any estimate of the number of these aliens; but, whatever it may have been, it is highly improbable that king Josiah would have had the imprudence to interfere with any subjects of the king of Assyria, especially as that government had already laid a heavy hand upon Judah (2 Kings xviii, 13-15). Neither had he any religious jurisdiction over them. It seems far more likely that Josiah carried out his reform ostensibly among the remaining Israelites, the majority of whom not unlikely placed themselves under his rule. Israel was not at any time all given to idolatry. In one of its unholiest periods (under Ahab) there were 7000 faithful men who had not bowed their knees unto Baal (1 Kings xix, 18). Again, when Hezekiah sent his delegates to visit the nation, although the majority of the people "mocked them, nevertheless divers of Asher and Manasseh and of Zebulun humbled themselves and came to Jerusalem" (2 Chron. xxx, 11). The residue of the ten tribes would be still more attached to the government of Judah after the destruction of their own.

(3.) On the whole, therefore, notwithstanding the force of the counter-arguments, we conclude that, although the city of Samaria itself was probably razed to the ground, and its population wholly carried away, yet a considerable remnant of the inhabitants of the adjoining country was left. Consequently in later times the people, in their origin, were a mixed race. Doubtless the heathen element prevailed, because the colonists were greatly superior in numbers. When they came, they found none but the dregs of the populace, whom the victors had left. All power was in the hands of the colonists. All that the words in 2 Kings xvii, 24 prove is that the colonists who had been transplanted thither took the place of the deported Israelites as owners of the soil. The Israelites were no longer the chief inhabitants. The petition of the heathen colonists does not show that the last remnant had been removed by the Assyrians. From the removal of all the *priests*, it does not follow that all the *inhabitants* had been carried away; and the petition of the inhabitants merely speaks of sending a *priest*, of whom it was thought that he alone could offer worship acceptable to a local deity. The people wanted priests to teach them the right worship of the God of the land; nor is aught said of giving the inhabitants the rudest idea of the manner of worshipping such a deity. According to the analogy of similar deportations, such as that of Judah by Nebuchadnezzar, we must suppose that the *principal* inhabitants of Israel—those fit for war, the priests, and others—were carried away; leaving the poor, weak, and aged, in the country districts, who had little or nothing to do with war. The prophetic expressions in Jeremiah and Zechariah speak only of the Israelites as a whole; of their rejection and banishment. The fact that the Samaritans in Ezra iv, 1, etc., do not mention their Israelitish origin is easily explained, because heathen blood had overpowered the Israelitish element. Had the latter retained its distinctive existence, they would

probably have referred to their origin; but as it had become almost extinct, the wiser policy was to make no allusion to descent. The very fact, however, of their application for admission to the national worship of the Jews, and all their subsequent history in connection with this people, imply an Israelitish element in their origin. Had they been of pure heathen descent, what propriety was there in the application? What had they to do with Jewish worship, on the supposition that they were mere heathens? How is it that the Samaritans always claimed descent from Ephraim and Manasseh? Have they been continuous liars in making this pretension? If so, their history proves an unaccountable imposture. Was there ever before a heathen people so desirous to unite with the worshippers of the true Jehovah as to become implacable enemies to their recusants? Moreover, the writers of the New Test., with the Jews of that period, looked upon them in the light of a schismatical community from themselves, rather than a distinct nation. Though the Saviour calls the Samaritan leper whom he healed a stranger, ἀλλόγενής, he used the expression more for the purpose of contrasting the unthankfulness of the nine Jews with the gratitude of the Samaritan, than of ethnological distinction (Luke xvii, 11-19). For it is certain that he did not class the Samaritans with the Gentiles, but made a marked distinction between them (Matt. x, 5). Notwithstanding the animosity of the two peoples, there are some few circumstances on record which indicate that they felt themselves to be in truth brethren and coreligionists. Thus, during the feasts they were admitted like the Jews to the Temple (Josephus, *Ant.* xviii, 2, 2). Their food also was by the Jew deemed *cosher*, or lawful (John iv, 8-40). Circumcision performed by a Samaritan was held to be valid. Down to the time of the Mishnic authors a Samaritan was regarded as a brother; nor did the Talmudists all agree in his condemnation, for while some looked upon him as a heathen, others treated him in every respect as an Israelite.

II. *History*.—As already seen, the new inhabitants of Samaria carried along with them their idolatrous worship. In the early period of their settlement they were attacked by lions, which they regarded as a judgment inflicted by the deity of the land, whom they did not worship. Accordingly, they applied to the Assyrian king Esar-haddon for an Israelitish priest to teach them the proper worship of the local god. The request was granted. One of the transported priests was despatched to them, who came and dwelt at Bethel, and instructed them in the worship of Jehovah. He was not a Levitical priest, but an Israelitish priest of the calves; because there had been no Levitical ones in the kingdom when the inhabitants were carried away, and because Bethel, where he settled, was the chief seat of the calf-worship.

On the return of the Jews from the Babylonian captivity, the Samaritans wished to join them in rebuilding the Temple at Jerusalem, saying, "Let us build with you: for we seek your God as ye do; and we do sacrifice unto him since the days of Esar-haddon, king of Assur, which brought us up hither" (Ezra iv, 2). It is curious, and perhaps indicative of the treacherous character of their designs, to find them even then called, by anticipation, "the adversaries of Judah and Benjamin" (Ezra iv, 1), a title which they afterwards fully justified. But, so far as professions go, they are not enemies; they are most anxious to be friends. Their religion, they assert, is the same as that of the two tribes; therefore they have a right to share in that great religious undertaking. But they do not call it a *national* undertaking. They advance no pretensions to Jewish blood. They confess their Assyrian descent, and even put it forward ostentatiously, perhaps to enhance the merit of their partial conversion to God. That it was but partial they give no hint. It may have become purer already, but we have no information

that it had. But the proffered assistance was declined. Thenceforward they threw all obstacles in the way of the returned exiles. Nor were their efforts to frustrate the operations of the Jews entirely unsuccessful. Two Persian kings were induced to hinder the Jews in their rebuilding; and their opposition was not finally overcome till the reign of Darius Hystaspis, B.C. 519.

The enmity which began at the time when the co-operation of the Samaritans in rebuilding the Temple was refused continued to increase till it reached such a height as to become proverbial in after-times. It is probable, too, that the more the Samaritans detached themselves from idols and became devoted exclusively to a sort of worship of Jehovah, the more they resented the contempt with which the Jews treated their offers of fraternization. Matters at length came to a climax. About B.C. 409, in the reign of Darius Nothus, one Manasseh, of priestly descent, was expelled from Jerusalem by Nehemiah for an illegal marriage, and took refuge with the Samaritans. Whether the temple on Mount Gerizim was actually built in the days of Manasseh is doubtful. Probably he labored to unite the people in a common worship. The temple is not said to have been erected till the time of Alexander the Great, who gave permission to build it. If so, it did not exist till about one hundred years after Manasseh. It is difficult to make a consistent and clear account of the matter out of Josephus, who has evidently fallen into error, since he is inconsistent with Neh. xiii, 28, etc. The establishment of a separate worship made the breach existing between the Jews and Samaritans irreparable. From this time malcontent Jews resorted to Samaria; and the very name of either people became odious to the other. About the year B.C. 129, John Hyrcanus, high-priest of the Jews, destroyed the city of the Samaritans. The Cuthæan Samaritans had possessed only a few towns and villages of the large area generally known as Samaria, and these lay almost together in the centre of the district. Shechem, or Sychar (as it was contemptuously designated), was their chief settlement, even before Alexander the Great destroyed the city of Samaria, probably because it lay almost close to Mount Gerizim. Afterwards it became more prominently so, and there on the destruction of the city of Samaria by Alexander they had built themselves a temple, which remained till the capture of Gerizim by John Hyrcanus (Joseph. *Ant.* xiii, 9, 1). See SHECHEM.

The only thing wanted to crystallize the opposition between the two races—viz. a rallying-point for schismatical worship—being now obtained, their animosity became more intense than ever. The Samaritans are said to have done everything in their power to annoy the Jews. They would refuse hospitality to pilgrims on their road to Jerusalem, as in our Lord's case. They would even waylay them in their journey (Joseph. *Ant.* xx, 6, 1); and many were compelled through fear to take the longer route by the east of Jordan. Certain Samaritans were said to have once penetrated into the Temple of Jerusalem, and to have defiled it by scattering dead men's bones on the sacred pavement (*ibid.* xviii, 2, 2). We are told, too, of a strange piece of mockery which must have been especially resented. It was the custom of the Jews to communicate to their brethren still in Babylon the exact day and hour of the rising of the paschal moon by beacon-fires commencing from Mount Olivet, and flashing forward from hill to hill until they were mirrored in the Euphrates. So the Greek poet represents Agamemnon as conveying the news of Troy's capture to the anxious watchers at Mycenæ. Those who "sat by the waters of Babylon" looked for this signal with much interest. It enabled them to share in the devotions of those who were in their fatherland, and it proved to them that they were not forgotten. The Samaritans thought scorn of these feelings, and would not unfrequently deceive and disappoint them by kindling a rival flame and perplexing the watchers on the mountains. "This fact," says Dr.

Trench, "is mentioned by Makrizi (see De Sacy, *Chrest. Arabe*, ii, 159), who affirms that it was this which put the Jews on making accurate calculations to determine the moment of the new moon's appearance (comp. Schöttgen, *Hor. Heb.* i, 344)." Their own temple on Gerizim the Samaritans considered to be much superior to that at Jerusalem. There they sacrificed a pass-over. Towards the mountain, even after the temple on it had fallen, wherever they were, they directed their worship. To their copy of the law they arrogated an antiquity and authority greater than attached to any copy in the possession of the Jews. The law (i. e. the five books of Moses) was their sole code; for they rejected every other book in the Jewish canon. They professed to observe it better than did the Jews themselves, employing the expression not unfrequently, "The Jews indeed do so and so; but we, observing the letter of the law, do otherwise." The Jews, on the other hand, were not more conciliatory in their treatment of the Samaritans. The copy of the law possessed by that people they declared to be the legacy of an apostate (Manasseh), and cast grave suspicions upon its genuineness. Certain other Jewish renegades, as already observed, had, from time to time, taken refuge with the Samaritans. Hence, by degrees, the Samaritans claimed to partake of Jewish blood, especially if doing so happened to suit their interest (Joseph. *Ant.* xi, 8, 6; ix, 14, 3). A remarkable instance of this is exhibited in a request which they made to Alexander the Great, about B.C. 332. They desired to be excused payment of tribute in the sabbatical year, on the plea that as true Israelites, descendants of Ephraim and Manasseh, sons of Joseph, they refrained from cultivating their land in that year. Alexander, on cross-questioning them, discovered the hollowness of their pretensions. (They were greatly disconcerted at their failure, and their dissatisfaction probably led to the conduct which induced Alexander to besiege and destroy the city of Samaria. Shechem was, indeed, their metropolis, but the destruction of Samaria seems to have satisfied Alexander.) Another instance of claim to Jewish descent appears in the words of the woman of Samaria to our Lord, John iv, 12: "Art thou greater than our father Jacob, who gave us the well?" a question which she puts without recollecting that she had just before strongly contrasted the Jews and the Samaritans. Very far were the Jews from admitting this claim to consanguinity on the part of these people. They were ever reminding them that they were, after all, mere Cuthæans, mere strangers from Assyria. They accused them of worshipping the idol-gods buried long ago under the oak of Shechem (Gen. xxxv, 4). They would have no dealings with them that they could possibly avoid. This prejudice had, of course, sometimes to give way to necessity, for the disciples had gone to Sychar to buy food while our Lord was talking with the woman of Samaria by the well in its suburb (John iv, 8). From Luke ix, 52 we learn that the disciples went before our Lord at his command into a certain village of the Samaritans "to make ready" for him. Perhaps, indeed (though, as we see on both occasions, our Lord's influence over them was not yet complete), we are to attribute this partial abandonment of their ordinary scruples to the change which his example had already wrought in them. "Thou art a Samaritan and hast a devil" was the mode in which the Jews expressed themselves when at a loss for a bitter reproach. Everything that a Samaritan had touched was as swine's flesh to them. The Samaritan was publicly cursed in their synagogues; could not be adduced as a witness in the Jewish courts; could not be admitted to any sort of proselytism; and was thus, so far as the Jew could affect his position, excluded from hope of eternal life. The traditional hatred in which the Jew held him is expressed in Eccles. i, 25, 26, "There be two manner of nations which my heart abhorreth, and the third is no nation: they that sit on the mountain of Samaria; and they that dwell

among the Philistines; and that foolish people that dwell in Sichem." So long was it before such a temper could be banished from the Jewish mind that we find even the apostles believing that an inhospitable slight shown by a Samaritan village to Christ would be not unduly avenged by calling down fire from heaven. "Ye know not what spirit ye are of," said the large-hearted Son of Man; and we find him on no one occasion uttering anything to the disparagement of the Samaritans. His words, however, and the records of his ministrations confirm most thoroughly the view which has been taken above—that the Samaritans were not Jews. At the first sending-forth of the twelve (Matt. x, 5, 6), he charges them, "Go not into the way of the Gentiles; and into any city of the Samaritans enter ye not, but go rather to the lost sheep of the house of Israel." So, again, in his final address to them on Mount Olivet, "Ye shall be witnesses to me in Jerusalem and in all Judæa, and in Samaria, and unto the uttermost part of the earth" (Acts i, 8). So the nine unthankful lepers, Jews, were contrasted by him with the tenth leper, the thankful stranger (ἀλλογενής), who was a Samaritan. So, in his well-known parable, a merciful Samaritan is contrasted with the unmerciful priest and Levite. And the very worship of the two races is described by him as different in character. "Ye worship ye know not what," this is said of the Samaritans: "We know what we worship, for salvation is of the Jews" (John iv, 22).

Such were the Samaritans of our Lord's day: a people distinct from the Jews, though lying in the very midst of the Jews; a people preserving their identity, though seven centuries had rolled away since they had been brought from Assyria by Esar-haddon, and though they had abandoned their polytheism for a sort of ultra-Mosaicism; a people who—though their limits had been gradually contracted, and the rallying-place of their religion on Mount Gerizim had been destroyed one hundred and sixty years before, and though Samaria (the city) had been again and again destroyed, and though their territory had been the battle-field of Syria and Egypt—still preserved their nationality, still worshipped from Shechem and their other impoverished settlements towards their sacred hill, still could not coalesce with the Jews.

Under Vespasian, the city of Sichem received the new name of Neapolis, which still remains in the Arabic form Nablûs. At the time of Pilate a tumult was excited among the Samaritans by an adventurer who persuaded the common people to follow him to the summit of Gerizim, where he pretended that Moses had buried the golden vessels. But Pilate dispersed the multitude with troops, and put the heads of the sedition to death. In consequence of the Samaritans complaining of his conduct to Vitellius, Pilate was deposed and sent to Rome (Joseph. *Ant.* xviii, 4, 1). Josephus relates (*War*, iii, 7, 32) that while Vespasian was endeavoring to subjugate the neighboring districts, the Samaritans collected in large numbers and took up their position on Mount Gerizim. The Roman general attacked and slew 11,600. Under Septimius Severus they joined the Jews against him; and therefore Neapolis was deprived of its rights. In the 3d and 4th centuries, notwithstanding their former calamities, they seem to have greatly increased and extended, not only in the East, but in the West. They appear to have grown into importance under Dositheus, who was probably an apostate Jew. Epiphanius (*Adv. Hæreses*, lib. i), in the 4th century, considers them to be the chief and most dangerous adversaries of Christianity, and he enumerates the several sects into which they had by that time divided themselves. They were popularly, and even by some of the fathers, confounded with the Jews, inasmuch that a legal interpretation of the Gospel was described as a tendency to Σαμαρειτισμός or Ἰουδαϊσμός. This confusion, however, did not extend to an identification of the two races. It was simply an assertion

that their extreme opinions were identical. But the distinction between them and the Jews was sufficiently known, and even recognised in the Theodosian Code. In the 5th century a tumult was excited at Neapolis, during which the Samaritans ran into the Christian church, which was thronged with worshippers, killing, maiming, and mutilating many. The bishop, Terebinthus, having repaired to Constantinople and complained to the emperor, the latter punished the guilty by driving them from Mount Gerizim and giving it to the Christians, where a church was erected in honor of the Virgin. Under Anastasius an insurrection headed by a woman broke out, and was soon suppressed. Under Justinian there was a more formidable and extensive outbreak. It is related that all the Samaritans in Palestine rose up against the Christians and committed many atrocities, killing, plundering, burning, and torturing. In Neapolis they crowned their leader, Julian, king. But the imperial troops were sent against them, and great numbers, with Julian himself, were slain. In the time of the Crusaders, Neapolis suffered, along with other places in Palestine. In 1184 it was plundered by Saladin. After the battle of Hattin, in 1187, it was devastated, and the sacred places in the neighborhood were polluted by Saladin's troops. Having been several times in the hands of the Christians, it was taken by Abu 'Aly in 1244, since which it has remained in the power of the Mohammedans. No Christian historian of the Crusades mentions the Samaritans; but they are noticed by Benjamin of Tudela in the 12th century, who calls them Cuthites, or Cuthæans. In the 17th century Della Valle gives an account of them; subsequently, Maundrell and Morison. After an interest in the people had been awakened by the reception of copies of their Pentateuch, their answers to the letters which Joseph Scaliger had sent to their communities in Nablûs and Cairo came into the hands of John Morin, who made a Latin translation of them. The originals and a better version were published by De Sacy in Eichhorn's *Repertorium*, vol. xiii. In 1671 a letter was sent by the Samaritans at Nablûs to Robert Huntington, which was answered by Thomas Marshall of Oxford. The correspondence thus begun continued till 1688. De Sacy published it entire in *Correspondance des Samaritains*, contained in *Notices et Extraits des MSS. de la Bibliothèque du Roi*, vol. xii. The correspondence between Ludolf and the Samaritans was published by Cellarius and Bruns, and is also in Eichhorn's *Repertorium*, vol. xiii. These letters are of great archæological interest, and enter very minutely into the observances of the Samaritan ritual. Among other points worthy of notice in them is the inconsistency displayed by the writers in valuing themselves on not being Jews, and yet claiming to be descendants of Joseph. In 1807 a letter from the Samaritans to Grégoire, the French bishop, came into De Sacy's hands, who answered it. This was followed by four others, which were all published by the eminent French Orientalist.

At Nablûs the Samaritans have still a settlement, consisting of about two hundred persons. Yet they observe the law, and celebrate the Passover on a sacred spot on Mount Gerizim, with an exactness of minute ceremonial which the Jews themselves have long intermitted. The people are very poor now, and to all appearance their total extinction is not far distant. In recent times many travellers have visited and given an account of the Samaritan remnant, such as Pliny Fisk, Robinson, and Wilson. See also Shelaby, *Notices of the Modern Samaritans* (Lond. 1855). One of the late notices is that of M. E. Rogers, in *Domestic Life in Palestine* (1863, 2d ed.), ch. x. Another and fuller account is given in Mill, *Three Months' Residence in Nablûs, and an Account of the Modern Samaritans* (1864, 12mo); see also Barges, *Les Samaritains de Naplouse* (Paris, 1855, 8vo). Mr. Grove has given an account of the ceremonial of their atonement, in *Vacation Tourists for*

1861; and Stanley, of their Passover, in *Lectures on the Jewish Church*, Append. iii, and still more minutely in *Sermons in the East*, Append. ii. For older monographs on the Samaritans, see Volbeding, *Index Programmatum*, p. 44. See SAMARITAN LANGUAGE, LITERATURE, AND LITURGY; SAMARITANS, MODERN.

SAMARITAN LANGUAGE. The Samaritan is chiefly a compound of the Hebrew, Chaldee, and Syriac. Among the words derived from these sources are to be recognised a great number of Cuthæan words, imported, doubtlessly, by the new colonists. We must therefore not be surprised that Greek, Latin, Persian, Arabic, and possibly other languages as well, have each contributed something to enrich the vocabulary. The grammar bears all the signs of irregularity which would characterize that of an illiterate people; the orthography is uncertain; there is a profusion of quiescents, and a complete confusion between the several gutturals and cognate letters respectively; the vowels are uncertain, the A sound being most prominent. Such is the dialect which was spoken in Samaria till the Arabian conquest of the country in the seventh century A.D., when the language of the victors was introduced, and by its superior vigor gradually overpowered its rival, till, probably by about the 8th or 9th century, it had entirely taken its place. The old language, however, still continued to be understood and written by the priests, so that, like the Jews, they had two sacred languages, which, however, they had not the skill completely to distinguish from each other. The "Hebrew," consequently, which appears in the correspondence of Samaritans with Europeans is largely impregnated with Aramaisms; Arabisms also are not by any means unfrequent.

Orthographic Elements.—The Samaritan language, or, as the Samaritans call it, the "Hebrew," like all Shemitic languages, is read from right to left. The alphabet consists only of consonants (twenty-two in number), as in the adjoining table.

Save some points and scanty orthographical signs, there are in Samaritan no accents or other diacritical marks, as in Hebrew. There are no vowel-points, as in other Shemitic languages; but in order to supply this want and to indicate somewhat the pronunciation, some consonants are used as vowels, viz.:

ā ā ḥ ḥ

ē ē ḥ

ī ḥ

ū (oo) ḥ

Of two consonants beginning a word, the first is pronounced as if it were a slight and indistinct vowel, similar to the Hebrew Sheva.

The only diacritical sign is a stroke over the consonant (e. g. ḥ) serving to distinguish two different words written in the same manner, or two different forms derived from one and the same root, or to indicate some letter added or omitted. When placed over ḥ or ḥ, the stroke indicates that these letters are real consonants, not representing vowels. Words cannot be separated at the end of the lines, hence the two letters ending the last word are separated from the others and placed at the end of the line; but in printing this is generally avoided by diminishing or enlarging the spaces between the words.

As to punctuation, a point is put by the side of the final letter of a word. Besides this, the following signs have been introduced by the transcribers:

: or · or ·: at the end of a sentence.

-- (also ·) at the end of part of a sentence, like our colon.

=: or —<: more seldom —: etc., or compound —<=: etc., at the end of a longer sentence or section.

<.: = =.:> or similar signs, sometimes again and again repeated, between the end of one section,

paragraph, or chapter, and the beginning of the other.

The numbers are written as in Hebrew.

Grammars.—Chr. Crinesius, *Lingua Samaritica ex Scriptura Sacra fideliter eruta* (Aldorphi, s. a.); Chr. Ravis, *A Discourse of the Oriental Tongues, viz. Ebrew, Samaritan, etc., together with a Grammar of the said Tongues* (Lond. 1649); Morini, *Opuscula Hebræo-Samaritana* (Paris, 1657); Hilligerius, *Summarium Lingue Aramææ, i. e. Chaldeo-Syro-Samaritanæ* (Witteb. 1679); Cellarius, *Horæ Samaritanæ* (Cizæ, 1682; Francof. et Jenæ, 1705); Otho, *Synopsis Institutionum Samaritanarum, Rabb. etc.* (Francof. 3d ed. 1735); Mascleff, *Grammatica Hebræica: access. tres Grammaticæ, Chaldaica, Syriaca, et Samaritana* (Paris, 2d ed. 1743, 2 vols. 12mo); Stöhr, *Theoria et Praxis Linguarum Sacrarum, sc. Samaritanæ, Hebrææ, et Syriacæ, eorumque Harmonia* (Aug. Vind. 1796); Uhlemann, *Institutiones Lingue Samaritanæ: accedit Chrestomathia Samaritana Glossario Locupletata* (Lips. 1837); Nicholls, *A Grammar of the Samaritan Language, with Extracts and Vocabulary* (Lond. 1858); Petermann, *Brevis Lingue Samaritanæ Grammatica, etc.* (Berolini, 1873).

SAMARITAN LITERATURE. Under this head we propose to enumerate the works known to European scholars, somewhat in distinction from those current with the Samaritans themselves, which will be found under **SAMARITANS, MODERN.**

1. *Grammar and Lexicography.*—In this department we have to mention three grammatical treatises, which were published from a MS. at Amsterdam, by Nöldeke, in the *Göttinger Nachrichten*, 1862, p. 337, 385. They are built entirely on the philological views of Arabic grammarians, some sections (such as those on transitive and intransitive verbs) being copied word for word from their works. From the transcriptions of Hebrew words into Arabic, we may judge of the Samaritan pronunciation of the eleventh century. As to the present system of pronunciation, Prof. Petermann, of Berlin, has transcribed the whole book of Genesis after the manner in which it is now read in the synagogue of Nablûs, and from this transcription the present system of pronunciation may be known, although it is difficult to decide whether the present system is due to genuine tradition, or whether it has become influenced by the Syriac and Arabic. According to Petermann's transcription, the first verse in Genesis would read thus: "Barasêt bara eluwêm it assâmêm wit aâres." (Comp. *Abhandlungen für die Kunde des Morgenlandes d. D. M. G.* 1868, vol. v, No. 1.)

In the matter of lexicography there is little information to give; of dictionaries proper none has as yet come to light. At Paris (Bibl. Nat. Anciens Fonds, 6, Peiresc) there is a concordance of forms occurring in the Scriptures with the corresponding Arabic and Samaritan words in parallel columns, and a similar one is preserved at Cambridge (Christ's College Library), in which, however, the Samaritan equivalent is omitted. Of late the Imperial Library at St. Petersburg has obtained fragments of grammatical works and of Hebrew-Arabic dictionaries, or "Tardeschemans" (interpreters), as they are termed by Samaritans and Arabs, which will be described in the catalogue to be issued by Mr. Harkavy.

2. *Calendars.*—In this branch there are some astronomical tables, two of which were published by Scaliger, and one was edited with a translation by De Sacy (*Not. et Extr.* xii, 135, 153). Several more MSS. have found their way to Europe—one written A.D. 1750, another written 1689, a third dated 1724 (see *Journ. Asiatique*, 1869, p. 467, 468). The Imperial Library of St. Petersburg also possesses several specimens.

3. *Legends.*—The British Museum possesses a MS. (Add. MS. 19,657), a commentary on the "legends ascribed to Moses." It has been translated by Dr. Leitner in Heidenheim's *Vierteljahrsschrift*, iv, 184 sq. It borrows largely from Jewish sources. Of a similar type is the *Jewelled Necklace in Praise of the Lord of the Human Race*, composed in 1537 by Ismail Ibn-Badr Ibn-Abu-l-'Izz Ibn-Rumaih (Brit. Mus. Add. MS. 19,021) in honor of Moses. It sets forth his divine nature, and extols the glories of his birth and miracles. With this may be classed a tract in which is contained a "complete explanation of the chapters on Balak" by Ghazâl Ibn-ad-'Duwaik (MS. xxvii, Bibl. Acad. Reg. Scient. Amst. p. 265-289); and another small tract (*ibid.* p. 292, 293), by the famous Abû Saïd, explaining the cause of the fear felt by Jacob on his way to Egypt (Gen. xlv, 1, 3), and by Abraham after the conquest of the five kings (*ibid.* xv, 1), with a third (p. 294-296), by an unknown author, in which the fifteen occasions are quoted from Exodus and Numbers when the Israelites, by their complaints and abuse of Moses and Aaron, tempted God, and the times are mentioned at which the divine glory appeared.

4. *Commentaries.*—Of great importance, especially for ascertaining the doctrinal views of the Samaritans, are their commentaries on the Pentateuch. The oldest extant is perhaps the one in the Bodleian Library (Add. MS. 4to, 99, and described by Neubauer in the *Journ. Asiatique*, 1873, p. 341 sq.), composed A.D. 1053 by an

unknown Samaritan for the benefit of a certain Abû Saïd Levi. In this commentary we find quotations from the Pentateuch, the former and later prophets, Nehemiah, the Mishna, etc., but not from the Samaritan Targum. All anthropomorphisms are avoided.

Another interesting and important commentary is one preserved at Berlin, from which large extracts were given by Geiger in the *Zeitschrift d. D. M. G.* xvii, 723 sq.; xx, 147 sq.; xxii, 532 sq. In it the national feeling as exhibited in opposition to the Rabbinic school of thought among the Jews is thoroughly represented.

An anonymous commentary on Genesis, brought from the East by bishop Huntington, and preserved in the Bodleian Library (Hunt. MS. 301), is of the same type as the preceding. The forty-ninth chapter was published by Schnurrer in *Eichhorn's Repertorium*, xvi, 151-199.

To this class we must also reckon a haggadic commentary on the Pentateuch containing Genesis and Exodus, termed the *Dissipater of Darkness from the Secrets of Revelation*, written in 1753-54 by Ghazâl Ibn-Abu-s-Surûr al-Ghazzi (Brit. Mus. Add. MS. 19,657), and another containing fragments of a commentary on Genesis, Exodus, and Leviticus, often quoted by Castellus in his notes on the Samaritan Pentateuch (Brit. Mus. Harl. MS. 5495).

A number of fragments of such commentaries are also preserved at St. Petersburg. Other writers seem to have devoted their energies to the same subject, but nothing now remains to us but their names and the titles of their books (Amst. MS. xxvii, p. 309, 314 sq.).

5. *Chronicles.*—Here we mention:

(a) *The Samaritan Chronicle or Book of Joshua*, sent to Scaliger by the Samaritans of Cairo in 1584. It was edited by Juynboll (Leyden, 1848), and his acute investigations have shown that it was redacted into its present form about A.D. 1300, out of four special documents, three of which were Arabic and one Hebrew (i. e. Samaritan). The Leyden MS. in 2 pts., which Gesenius (*De Sam. Theol.* p. 8, n. 18) thinks unique, is dated A.H. 764-919 (A.D. 1362-1513); the Cod. in the Brit. Museum, lately acquired, dates A.H. 908 (A.D. 1502). The chronicle embraces the time from Joshua to about A.D. 350, and was originally written in, or subsequently translated into, Arabic. After eight chapters of introductory matter begins the early history of "Israel" under "King Joshua," who, among other deeds of arms, wages war, with 300,000 mounted men—"half Israel"—against two kings of Persia. The last of his five "royal" successors is Shimshon (Samson), the handsomest and most powerful of them all. These reigned for the space of 250 years, and were followed by five high-priests, the last of whom was Usi (?=Uzzi, Ezra vii, 4). With the history of Eli, "the seducer," which then follows, and Samuel, "a sorcerer," the account by a sudden transition runs off to Nebuchadnezzar (ch. xlv), Alexander (ch. xlvii), and Hadrian (ch. xlviii), and closes suddenly at the time of Julian the Apostate. The Hebrew of this chronicle is given by Kirchheim in his *Karne Shomron*.

(b) *The El-Tholidoth*, or "The (book of) Generations." It professes to have been written by Eleazar ben-Amram in A.H. 544 (A.D. 1149), copied and continued by Jacob ben-Ismael 200 years later, and carried down by other hands to 1859, when the present MS. was written by Jacob ben-Aaron, the high-priest. It was published by Neubauer in the *Journal Asiatique* for 1869, p. 385 sq. He gives the Samaritan, or rather Hebrew, text with notes and translation, citing the Arabic translation when the sense is not clear. His text is that of the Bodleian MS. numbered Bodl. Or. p. 651, collated in some passages with one belonging to a private owner. A German translation with explanations has been given by Heidenheim in his *Vierteljahrsschrift für deutsch- und englisch-theolog. Forschung u. Kritik*, iv, 347 sq. The chronicle is of interest to geographers, as, while mentioning the various Samaritan families settled in Damascus, Palestine, and Egypt, it

incidentally introduces the names of a considerable number of places inhabited by them. As to the importance of this chronicle for comparison with the "Book of Jubilees," comp. Rönisch, *Das Buch der Jubiläen* (1874), p. 361.

(c.) *The Chronicle of Abulfath* is a compilation from the Samaritan chronicle, as well as from various sources, Jewish or Rabbinical. It is full of fables, and contains little useful matter. The history in it extends from Adam to Mohammed, and was composed in the 14th century—i. e. in 1355, or 756 A.H.—at Nablûs. Five MSS. of it are known—one at Paris, another at Oxford, procured by Huntington, and three in Berlin; but one of the last three consists of nothing but a few fragments. Schnurrer gave a long extract from the Oxford copy, with a German translation, in Paulus, *Neues Repertorium für biblische und morgenländische Literatur* (1790, Theil i, 120 sq.); and in Paulus, *Memorabilia* (1791, 2 vols.); so, too, De Sacy, in his *Arabic Chrestomathy*, and *Notices et Extraits des Manuscrits de la Bibliothèque du Roi*, tom. xii. With an English translation by R. Payne Smith, it was printed in Heidenheim's *Journal*, ii, 304 sq.; 432 sq. Recently it has been published by Vilmar, with the title, *Abulfathi Annales Samaritani, quos Arabice edidit, cum Proll. Latine veritè et Commentario illustravit* (Gothæ, 1865), after a collation of the various MSS., and with learned prolegomena.

6. *Miscellaneous*.—To this belongs a work of Abu-Hasan of Tyre, relating to lawful and forbidden meats, or "of force" (Bodl. MS. Hunt. 24; comp. also *Journal Asiat.* 1869, p. 468). In it the peculiar dogmas of the Samaritans as differing from those of the Jews are set forth and supported by arguments drawn from the Pentateuch. Closely resembling this is a work entitled "a book sufficing to those who desire the knowledge of the book of God," by Muhaddib Eddin Jussuf Ibn-Salamah Ibn-Jussuf al-Askari, commenced in A.D. 1041. It is an exposition of the Mosaic laws, and preserved in the Brit. Museum (Add. MS. 19,656 [2]).

Another work by Abu-l-Hasan relates to the future life, with arguments drawn from the Pentateuch (Bodl. MS. Hunt. 350 [1]).

An *Abridgment of the Mosaic Law according to the Samaritans*, by Abul Farag Ibn-Ishag Ibn-Kathâr, is preserved at Paris (Bibl. Nat. Anciens Fonds, 5, Peiresc); a work on penance, in Amst. (MS. xxvii, p. 304), which MS. also contains a treatise on the nature of God and man, etc. (ibid. p. 223), and questions and answers, with interpretations from the Pentateuch (ibid. p. 297).

The St. Petersburg collection also contains fragments of Samaritan law-books (F. iv, 18); twenty-two documents in Arabic, relating to civil matters, and ranging from the 17th to the 19th century; about seventy contracts of marriage; and six amulets.

See Petermann, *Versuch einer hebr. Formenlehre nach der Aussprache der heutigen Samaritaner* (Leips. 1868), introduction; Juynboll, *Commentarii in Historiam Gentis Samaritanæ* (Lugd. Bat. 1846), p. 58 sq.; Nöldeke, *Ueber einige samaritanisch-arab. Schriften, die hebr. Sprache betreffend* (Göttingen, 1862); Geiger, *Die hebräische Grammatik bei den Samaritanern*, in *Zeitschr. d. D. M. G.* (1863), xvii, 748; Heidenheim, *Vierteljahrsschrift*, in loc. cit.; Petermann, in Herzog, *Real-Encykl.* xiii, 376 sq.; *Theologisches Universal-Lexikon*, s. v. "Samaritanische Literatur;" Nutt, *A Sketch of Samaritan History*, p. 134 sq.; Relandi *Dissert. Miscell.* ii, 14; Smith, *Dict. of the Bible*, iv, 2814 sq.; Kitto, *Cyclop.* iii, 751; Kirchheim, *Karne Shomron* (Frankfort, 1851), p. 28 sq. (B. P.)

SAMARITAN LITURGY. Under this head we propose to treat of the formal ritual of the Samaritans, including their most important doctrines, usages, etc., as gathered from documentary sources; reserving some additional details as to their present practice for the art. SAMARITANS, MODERN.

I. *Ritual*.—The liturgical literature of the Samaritans is very extensive, and not without a certain poetical

value. It consists chiefly of hymns and prayers for Sabbath and feast days, and of occasional prayers at nuptials, circumcisions, burials, and the like. The British Museum possesses nineteen volumes of prayers and hymns, which are described by Heidenheim in his *Vierteljahrsschrift*, i, 279 sq.; 408 sq. Several have also been published by Heidenheim, e. g. *A Hymn for the Day of Atonement* (ibid. i, 290 sq.); *A Petition of Nanah ben-Marka* (ibid. p. 432); *A Petition of Meshal-ma of Daphne* (ibid. p. 438 sq.); *The Prayer of Ab. Gelugah*, from a Vatican MS. (ibid. ii, 213 sq.); *The Litany of Marka*, the end of which runs thus:

"Lord, for the sake of the three perfect ones!
For the sake of Joseph, the interpreter of dreams!
For the sake of Moses, chief of the prophets!
For the sake of the priests, the masters of the priests!
For the sake of the Torah, most sacred of books!
For the sake of Mount Gerizim, the everlasting hill!
For the sake of the hosts of angels!
Destroy the enemies and foes!
Receive our prayers!
O Everlasting!
Deliver us from these troubles!
Open to us the treasure of heaven;"

A Prayer of the High-Priest Pinchas for the Celebration of the New Moon (contained in Cod. 19,020 Add. MSS.); *Two Hymns for the Day of Atonement*, one by the priest Abraham, the other by the priest Tobias (ibid. iv, 110 sq.; contained in Cod. 19,009 Add. MSS.); *The Prayer of Marka and that of Amram*, both contained in the Vatic. MS. (ibid. iv, 237 sq.; 390 sq.). Of the hymns for the Passover we will speak farther on. In Gesenius, *Carmina Samaritana*, fragments of liturgies from Damascus were published, which Kirchheim has published with emendations in his *Karne Shomron*. One hymn on the Unity of God, and headed אלה אחד, i. e. "there is no God but one," runs thus:

1.
אלהים קצים The everlasting God,
רקצים עד לעלם Who liveth forever;
אלה על כל חילין God above all powers,
וממן כן לעלם And who thus remaineth forever.
2.
בחיילך רבה נתרין In thy great power shall we trust,
ראת הו מרן For thou art our Lord;
באלהיך דאנריה In thy Godhead; for thou hast created
עלמה מן רישא The world from beginning.
3.
נבחרת כסיה Thy power was hidden,
ונתתך ורחמיך And thy glory and mercy.
גלין גליאתה וכסיותה Revealed are both the things that are revealed, and those that are unrevealed,
בשלטן אלהיך וכו' Before the reign of thy Godhead, etc.

Petermann has published three "prayers of Moses and Joshua" and five "prayers of the angels" in his *Grammatica Samaritana*, p. 418 sq. A volume of prayers is also in the Paris Bibl. Nat. Anciens Fonds, 4, Peiresc. The present Samaritans have two collections, which they call *Durrân* ("string of pearls") and *Defter* ("book"), the latter comprising the former, the arrangement of which they ascribe to Amran-ez-Zeman or Amram-Dari. The language in which they are written varies; some are in almost classical Hebrew, others in a dialect resembling that of the Targums, containing an admixture of Arabisms and Hebraisms. The metre also differs considerably.

II. *Doctrines*.—From the various hymns and documents extant, it appears that the Samaritans had five principal articles of faith, viz.:

1. God is one, without partner or associate, without body and passions, the cause of all things, filling all things, etc.

2. Moses is the one messenger and prophet of God for all time, the end of revelation, the friend and familiar servant of God; none will arise like him.

3. The law is perfect and complete, destined for all time, never to be supplemented or abrogated by later revelation.

4. Gerizim is the one abode of God on earth, the home of eternal life; over it is Paradise, thence comes all rain.

5. There will be a day of retribution, when the pious will rise again; false prophets and their followers will then be cast into the fire and burned.

Other points in their creed may be noticed. From the prayer of Tobiah v, 24, it seems that the Samaritans believed in *original sin*. "For the sake of Adam and because of the end of all flesh, forgive and pardon the whole congregation." From a prayer for the Day of Atonement we see that the doctrine concerning the *Logos* was known among them, for which see Heidenheim, *Vierteljahrsschrift*, iv, 126 sq. They believe in angels and astrology, which may be seen from a prayer given by Heidenheim, *l. c.* p. 545 sq.

The belief in a coming Messiah, or "Restorer," who should be the son of Joseph, was current among the Samaritans at a very early age, and this belief is based upon such Messianic prophecies as Gen. xv, 17; xlix, 10; Numb. xxiv, 17; and Deut. xviii, 15. All that they had to say concerning this point is contained in the letter of Marchib Ibn-Jakub addressed to Thomas Marshall, where we read: "You have spoken of the arrival of the great Prophet. This is he who was announced to our father Abraham, as it is said there appeared 'a smoking furnace and a burning lamp' (Gen. xv, 17); 'to him shall the people submit themselves' (ibid. xlix, 10); of him also it is said (Numb. xxiv, 17), 'he shall destroy all the children of Sheth, and Israel shall do valiantly'; of him, 'the Lord thy God shall raise thee up from amidst thy brethren a prophet like unto me; unto him shall ye hearken' (Deut. xviii, 15). Our teachers have said on this point that this prophet shall arise, that all people shall submit to him and believe in him and in the law and Mount Gerizim; that the religion of Moses, son of Amram, will then appear in glory; that the beginning of the name of the prophet who will arise will be M; that he will die and be interred near Joseph, 'the fruitful bough'; that the Tabernacle will appear by his ministry and be established on Gerizim. Thus it is said in our books and in the book of Joshua, the son of Nun" (Eichhorn, *Repertorium*, ix, 11 sq.). What has been said in this and other letters and works is merely an extract from a hymn composed by the high-priest Abisha ben-Pinchas for the Day of Atonement, and contained in Cod. 19,651 Add. MSS. of the British Museum (comp. Heidenheim, v, 170 sq.). As to the time of his appearance the Samaritans were formerly uncertain. "No one knows his coming but Jehovah," says Ab Zehuta in 1589 (comp. Eichhorn, xiii, 266); "it is a great mystery with regard to Messiah who is to come and who will manifest his spirit; happy shall we be when he arrives," writes Salameh, in 1811 (see De Sacy, *Not. et Extr.* xii, 122). "The appearance of Messiah," writes Petermann, in 1860, "is to take place 6000 years after the creation, and these have just elapsed; consequently he now, though all unconsciously, is going about upon earth. In 1853 the Samaritans expected a great political revolution; but in 1863 the kings of the earth will, according to them, assemble the wisest out of all nations in order by mutual counsel to discover the true faith. From the Israelites, i. e. Samaritans, will one be sent, and he will be the Taëb. He will gain the day, lead them to Gerizim, where under the twelve stones they will find the ten commandments (or the whole Torah), and under the stone of Bethel the Temple utensils and manna. Then will all believe in the law, and acknowledge him as their King and Lord of all the earth. He will convert and equalize all men, live 110 years upon earth, then die and be buried near Gerizim; for upon that pure and holy mountain, which is fifteen yards higher than Ebal, no burial can take place. Afterwards will the earth remain some hundreds of years

more till the 7000 are completed, and then the last judgment will come in" (Herzog, *R.-Encykl.* xiii, 373 sq.).

III. *Usages*.—At the present day the Samaritans celebrate seven feasts in the year, although only one, the Passover, is observed with its former solemnities. A minute and interesting account of the ceremonies of this feast, as celebrated in 1853, is given by Petermann, in Herzog, *R.-Encykl.* xiii, 378; also by Stanley, *Hist. of the Jewish Church*, i, 513 sq. The liturgy for this feast is very rich; thus every evening during the feast the "dream of the priest Abisha" is read, to hear which only the elders are permitted. This dream is contained in Cod. 19,007 Add. MSS. Brit. Museum. There are Passover hymns composed by the high-priests Marka, Pinchas, and Abisha (q. v.), given by Heidenheim, iii, 94 sq., 357 sq., 475 sq. There exists also a *History of the Exodus*, a so-called *Pesach-Haggadah*, which Dr. S. Kohn published with a German translation in *Abhandlungen der D. M. G.* v, No. 4 (Leips. 1876).

The second feast, celebrated on the 21st of Nisan, or last day of Unleavened Bread, is marked by a pilgrimage to Gerizim. The third feast is Pentecost; the fourth that of Trumpets; the fifth is the Day of Atonement. The first and eighth days of Tabernacles count for the remaining feast-days. The Sabbath, moreover, is kept with great strictness; the years of jubilee and release are also still observed.

The Samaritans have two more days of assembly, though they do not count them as holidays, termed צמורת, *Summoth*, on which the number of the congregation is taken, and in return every male over twenty years of age presents the priest with half a shekel (three piasters), in accordance with Exod. xxx, 12-14, receiving from him a calendar for the coming six months prepared from a table in his possession—originally, it is said, composed by Adam and committed to writing in the time of Phinehas. From these offerings, the tenth of the incomes of the congregation, and other small gifts, the priest gains his living. He may consecrate any of his family that he pleases to the priesthood, provided the candidate be twenty-five years of age and never have suffered his hair to be cut. Like other Orientals, he never removes his turban, and thus is not easily to be distinguished from the rest of the congregation; but, in accordance with Lev. x, 6, he does not "rend his clothes" by wearing a slit on his sleeve as other Samaritans; and when the roll of the law is taken from the ark, he, like his assistants, places a cloth, which they call טלית, *tallith*, around his head. They wear white turbans; ordinarily they are compelled, by way of distinction from Mohammedans, to wear them of a pale-red color. They may cut their hair or not, as they please, but not their beards, this being forbidden in Lev. xix, 27; xxi, 5. Women must let their hair grow, and wear no earrings, because of them the golden calf was made. For fear of scandalizing the Mohammedans, none but the old ones venture to attend the synagogue. When a boy is born, great rejoicing is held; his circumcision always takes place on the eighth day after birth, even though it be a Sabbath. Boys marry as early as fifteen or sixteen, girls at twelve. The Samaritans may marry Christian or Jewish girls, provided they become Samaritans. When a man has a childless wife he may take a second; but if she also be barren, not a third. Divorces, though permitted, are uncommon. The dead are prepared for burial by their own friends; the whole body is washed, but especially the hands (thrice), mouth, nose, face, ears, both inside and out (all this in Mohammedan fashion), and lastly the feet. The burial takes place, if possible, before sunset the same day, accompanied with the recitation of the law and hymns. The following is a part of a litany for the dead:

אדני . יהוה . אלהים . ברחמיך . ובך . ובשמך .
ובכבודך . ובאדוניך . אברהם . יוצאק . ויעקב .
ואדוניך . משה . רבו "

Lord Jehovah, Elohim, for thy mercy, and for thine own sake, and for thy name, and for thy glory, and for the sake of our Lords Abraham, and Isaac, and Jacob, and our Lords Moses and Aaron, and Eleazar, and Ithamar, and Phinehas, and Joshua, and Caleb, and the Holy Angels, and the seventy Elders, and the holy mountain of Gerizim, Beth El. If thou acceptest [זָרַחָא] this prayer [מְרַחֵם] = reading], may there go forth from before thy holy countenance a gift sent to protect the spirit of thy servant, **פלן ابن פלן** [N. the son of N.], of the sons of [—], daughter [—] from the sons of [—]. O Lord Jehovah, in thy mercy have compassion on him [or] have compassion on her), and rest his (her) soul in the garden of Eden; and forgive him (or) her), and all the congregation of Israel who flock to Mount Gerizim, Beth El. Amen. Through Moses the trusty. Amen, Amen, Amen.

These readings are continued every day to the next Sabbath, the women of the family watching near the grave. On the Sabbath it is visited by the whole congregation (except the near relations), who eat there together, reciting part of the law and singing hymns, finishing the recitation later in the day with the relations.

From the usages among the Samaritans we see that, on the whole, they strictly adhere to Jewish customs, and yet we find numerous enactments against them in the Talmud. There is especially one whole treatise which bears upon this subject, entitled *Massecheth Kuthim*, which Kirchheim published with six others (Frankfort, 1851). From this treatise we see "that Jews are not allowed to suffer them to acquire immovable property, nor to sell them sheep for shearing, nor crops to cut, nor timber still standing. They are also forbidden to sell them weapons or anything which could damage persons, or to give or to take wives from them. A daughter of Israel may not deliver a Samaritan woman nor suckle her son, but a Samaritan woman may perform these offices for a daughter of Israel in her (the Israelite's) house." These are some of the main points contained in that treatise, which concludes in the following words:

"And why are the Cuthim not permitted to come into the midst of the Jews? Because they have mixed with the priests of the heights (idolaters). R. Ismael says: 'They were at first pious converts [גֵּרִי צַדִּיק] = real Israelites), and why is the intercourse with them prohibited? Because of their illegally begotten children, and because they do not fulfil the duties of יָבֵם (marrying the deceased brother's wife):' a law which they understand to apply to the betrothed only.

"At what period are they to be received (into the community)? 'When they abjure the Mount Gerizim, recognise Jerusalem (viz. its superior claims), and believe in the Resurrection.'

See Gesenius, *Samarit. Theolog.* (Halæ, 1822); *Anecdota Exon.* (Lipsie, 1824); Kirchheim, *Karne Shomron*, p. 16 sq.; Petermann, in Herzog, xiii, 376 sq.; Nutt, *Sketch of Samaritan History*, p. 65 sq., 142 sq.; Friedrich, *De Christologia Samar.* (Lipsie, 1821); Jost, *Gesch. d. Judenth. u. s. Secten*, i, 50 sq.; Westcott, *Introduction to the Study of the Gospels*, p. 172; Adams, *History of the Jews*, ii, 257 sq.; Langen, *Das Judenthum in Palästina* (Freiburg, 1866), p. 90 sq., 185 sq., 232 sq., 299 sq., 407 sq.; Appel, *Questiones de rebus Samaritanorum* (Götting, 1874), and *Ueber Samaritaner*, in *Jüd. Literaturblatt*, 1878, No. 14 sq.; Kitto, *Cyclop.* iii, 751 sq.; Smith, *Dict. of the Bible*, p. 2816 sq. (B. P.)

SAMARITAN PENTATEUCH. This is one of the most important relics of the Samaritan literature that have come down to our times. We therefore give it a large critical treatment, following the results of Gesenius's investigations, as they have been presented by Lee in his *Prolegomena*; Davidson, in Kitto's *Cyclop.*; and Deutsch, in Smith's *Dict. of the Bible*. The latter two, also giving the results of Kirchheim, we have especially used in this abstract, making such corrections and additions as appeared necessary. See PENTATEUCH.

I. History.—It had been well known to early Jewish and Christian writers that a recension of the Pentateuch, differing in important respects from that in use among the Jews, was in possession of the Samaritan community. But these writers regarded it in a different light respectively. Thus the Jews treated it with contempt as a forgery. "You have falsified your law"—זִרְפָּתָם—says R. Eliezer ben-Simeon (*Jer. Sotah*, vii, 8; *Sotah*, p. 33 b), "and you have not profited aught by it," referring to the insertion of the words "opposite Shechem" in Deut. xi, 30. On another occasion they are ridiculed on account of their ignorance of one of the simplest rules of Hebrew grammar, displayed in their Pentateuch, viz. the use of the ה locale (unknown, however, according to *Jer. Meg.* 6, 2, also to the people of Jerusalem). "Who has caused you to blunder?" said R. Simeon ben-Eliezer to them; referring to their abolition of the Mosaic ordinance of marrying the deceased brother's wife (Deut. xxv, 5 sq.)—through a misinterpretation of the passage in question, which enjoins that the wife of the dead man shall not be "without" to a stranger, but that the brother should marry her: they, however, taking הַחַיָּה (= להיִיף) to be an epithet of אִשָּׁה, "wife," translated "the outer wife," i. e. the betrothed only (*Jer. Jebam.* 1, 6; comp. Frankel, *Vorstudien*, p. 197 sq.).

Early Christian writers, on the other hand, speak of it with respect, in some cases even preferring its authority to that of the Mosaic text. Origen quotes it under the name of τὸ τῶν Σαμαρειτῶν Ἐβραϊκόν, giving its various readings in the margin of his *Hexapl.* (e. g. on Numb. xiii, 1; comp. xxi, 13, and Montfaucon, *Hexapl. Prelim.* p. 18 sq.). Eusebius of Cæsarea, noticing the agreement in the chronology of the Sept. and Samaritan text as against the Hebrew, remarks that it was written in a character confessedly more ancient than that of the latter (1 Chron. xvi, 1–11). Jerome (in *Preface to Kings*) also mentions this fact, and in his comment on Gal. iii, 10 he upholds the genuineness of its text over that of the Masoretic one, but in his *Quest.* in Gen. iv, 8 he speaks more favorably of the Hebrew; while Georgius Syncellus, the chronologist of the 8th century, is most outspoken in his praise of it, terming it "the earliest and best even by the testimony of the Jews themselves" (τὸ τῶν Σαμαρειτῶν ἀρχαιότατον καὶ χαρακτῆρσι διάλλαττον ὅ καὶ ἀληθὲς εἶναι καὶ πρῶτον Ἐβραῖοι καὶ Σαμωολογοῦσιν [*Chronogr.* p. 85]).

Down to within the last two hundred and fifty years, however, no copy of this divergent code of laws had reached Europe, and it began to be pronounced a fiction, and the plain words of the Church fathers—the better known authorities—who quoted it were subjected to subtle interpretations. Suddenly, in 1616, Pietro della Valle, one of the first discoverers also of the cuneiform inscriptions, acquired a complete codex from the Samaritans in Damascus. In 1623 it was presented by Achille Harley de Sancy to the Library of the Oratory in Paris, and in 1628 there appeared a brief description of it by J. Morinus in his preface to the Roman text of the Sept. Three years later, shortly before it was published in the Paris Polyglot—whence it was copied, with a few emendations from other codices, by Walton—Morinus, the first editor, wrote his *Exercitationes Ecclesiasticae in utrumque Samaritanorum Pentateuchum*, in which he pronounced the newly found codex, with all its innumerable variants from the Masoretic text, to be infinitely superior to the latter; in fact, the unconditional and speedy emendation of the received text thereby was urged most authoritatively. And now the impulse was given to one of the fiercest and most barren literary and theological controversies, of which more anon. Between 1620 and 1630 six additional copies, partly complete, partly incomplete, were acquired by Usher; five of which he deposited in English libraries, while one was sent to De Dieu, and has disappeared mysteri-

ously. Another codex, now in the Ambrosian Library at Milan, was brought to Italy in 1621. Peiresc procured two more, one of which was placed in the Royal Library of Paris, and one in the Barberini at Rome. Thus the number of MSS. in Europe gradually grew to sixteen. During the present century another, but very fragmentary, copy was acquired by the Gotha Library. A copy of the entire (?) Pentateuch, with Targum (?) Samaritan version), in parallel columns (4to), on parchment, was brought from Nablûs by Mr. Grove in 1861, for the count of Paris, in whose library it is. Single portions of the Samaritan Pentateuch, in a more or less defective state, are now of no rare occurrence in Europe. Of late the St. Petersburg Library has secured fragments of about three hundred Pentateuch MSS.

II. *Description*.—Respecting the external condition of these MSS., it may be observed that their sizes vary from 12mo to folio, and that no scroll, such as the Jews and the Samaritans use in their synagogues, is to be found among them. The letters, which are of a size corresponding to that of the book, exhibit none of those varieties of shape so frequent in the Masoretic text; such as majuscules, minuscules, suspended, inverted letters, etc. Their material is vellum or cotton-paper; the ink used is black in all cases save in the oldest scroll of the Samaritans at Nablûs, the letters of which are in purple. There are neither vowels, accents, nor diacritical points. The individual words are separated from each other by a dot. Greater or smaller divisions of the text are marked by two dots placed one above the other, and by an asterisk. A small line above a consonant indicates a peculiar meaning of the word, an unusual form, a passive, and the like; it is, in fact, a contrivance to bespeak attention. For example, *הָזָה* and *הָזָה*, *בָּרַךְ* and *בָּרַךְ*, *וְיָבֹרַךְ* and *וְיָבֹרַךְ*, *וְיָבֹרַךְ* and *וְיָבֹרַךְ*, *וְיָבֹרַךְ* and *וְיָבֹרַךְ*, the suffixes at the end of a word, the *ו* without a dagesh, etc., are thus pointed out to the reader (comp. Kirchheim, p. 34).

The whole Pentateuch is divided into nine hundred and sixty-four paragraphs, or *Kazzin*, the termination of which is indicated by these figures, =, ., or <. At the end of each book the number of its divisions is stated thus:

(250)	הַזֶּה סֵפֶר הָרִאשׁוֹן :	קִצִּין מֵאַתָּה וְנִי
(200)	הַשֵּׁנִי	מֵאַתָּה
(130)	הַשְּׁלִישִׁי	מֵאַתָּה וְשְׁלוּשִׁים
(215)	הָרְבִּיעִי	ר . וְיָ
(166)	הַחֲמִישִׁי	ק . וְסִי

The Samaritan Pentateuch is halved in Lev. vii, 15 (viii, 8, in Hebrew text),* where the words "Middle of the Torah" (*פְּלֶגֶת תּוֹרָה*) are found. At the end of each MS. the year of the copying, the name of the scribe, and also that of the proprietor are usually stated. Yet their dates are not always trustworthy when given, and very difficult to be conjectured when entirely omitted, since the Samaritan letters afford no internal evidence of the period in which they were written. To none of the MSS., however, which have as yet reached Europe can be assigned a higher date than the 10th Christian century. The scroll used in Nablûs bears—so the Samaritans pretend—the following inscription:

"I, Abisha, son of Phinehas, son of Eleazar, son of Aaron the priest—upon them be the grace of Jehovah—in his honor have I written this Holy Law at the entrance of the Tabernacle of Testimony on the Mount Gerizim, even Beth El, in the thirteenth year of the taking possession of

the land of Canaan, and all its boundaries around it, by the children of Israel. I praise Jehovah."

(Letter of Meshalimah ben-Ab Sechuah, Cod. 19,791, Add. MSS. Brit. Mus. in Heidenheim, i, 88. Comp. *Epist. Sam. Sicheimitarum ad Jobum Ludolphum* [Cizæ, 1688]; *Antiq. Eccl. Orient.* p. 123; Huntingtoni *Epist.* p. 49, 56; Eichhorn, *Repertorium f. bibl. und morg. Lit.* vol. ix, etc.) But no European has fully succeeded in finding it in this scroll, however great the pains bestowed upon the search (comp. Eichhorn, *Einleit.* ii, 599); and even if it had been found, it would not have deserved the slightest credence. It would appear, however (see archdeacon Tattam's notice in the *Parthenon*, No. 4, May 24, 1862), that Mr. Levysohn, who was attached to the Russian staff in Jerusalem, has found the inscription in question "going through the middle of the body of the text of the Decalogue, and extending through three columns." Considering that the Samaritans themselves told Huntington "that this inscription had been in their scroll once, but must have been erased by some wicked hand" (comp. Eichhorn, *ibid.*), this startling piece of information must be received with extreme caution. Nevertheless, Lieut. Conder speaks as if he had actually seen the inscription on the venerable MS. (*Tent Work in Palestine*, i, 50).

This venerable roll is written on parchment, in columns thirteen inches deep and seven and a half inches wide. The writing is in a good hand, but not nearly so large or beautiful as in many book-copies which they possess. Each column contains from seventy to seventy-two lines, and the whole roll contains a hundred and ten columns. The skins of which the roll is made are of equal size, and each measures twenty-five inches in length by fifteen inches in width. In many places it is worn out and patched with rewritten parchment, and in many other places where not torn the writing is illegible. About two thirds of the original writing is still readable. The name of the scribe, we are told, is written in a kind of acrostic, and forms part of the text running through three columns of the book of Deuteronomy. In whatever light this statement may be regarded, the roll has the appearance of very great antiquity.

III. *Critical Character*.—We have briefly stated above that the *Exercitationes* of J. Morin, which placed the Samaritan Pentateuch far above the received text in point of genuineness—partly on account of its agreeing in many places with the Sept., and partly on account of its superior "lucidity and harmony"—excited and kept up for nearly two hundred years one of the most extraordinary controversies on record. Characteristically enough, however, this was set at rest once for all by the very first systematic investigation of the point at issue. It would now appear as if the unquestioning rapture with which every new literary discovery was formerly hailed, the innate animosity against the Masoretic (Jewish) text, the general preference for the Sept., the defective state of Shemitic studies—as if, we say, all these put together were not sufficient to account for the phenomenon that men of any critical acumen could for one moment not only place the Samaritan Pentateuch on a par with the Masoretic text, but even raise it, unconditionally, far above it. There was, indeed, another cause at work, especially in the first period of the dispute; it was a controversial spirit which prompted J. Morin and his followers, Cappellus and others, to prove to the Reformers what kind of value was to be attached to their authority—the received form of the Bible, upon which, and which alone, they professed to take their stand. It was now evident that nothing short of the Divine Spirit, under the influence and inspiration of which the Scriptures were interpreted and expounded by the Roman Church, could be relied upon. On the other hand, most of the "Antimorinians"—De Muis, Hottenger, Stephen Morin, Buxtorf, Fuller, Leusden, Pfeiffer, etc.—instead of patiently and critically examining the subject and refuting their adversaries by arguments which were within their reach, as they are within ours,

* Mr. Deutsch, who copied here Kirchheim (p. 36), has overlooked the latter's note, viz. that Lev. viii, 8 contains the two words which, according to the Masorites, constitute the middle of all the words in the Pentateuch. As it stands now it would lead to the supposition that Lev. vii, 15 of the Samaritan Pentateuch corresponds to viii, 8 in the Hebrew text.

directed their attacks against the persons of the Morinians, and thus their misguided zeal left the question of the superiority of the new document over the old where they found it. Of higher value were, it is true, the labors of Simon, Le Clerc, Walton, etc., at a later period, who proceeded eclectically, rejecting many readings, and adopting others which seemed preferable to those of the old text. Houbigant, however, with unexampled ignorance and obstinacy, returned to Morinus's first notion—already generally abandoned—of the unquestionable and thorough superiority. He, again, was followed more or less closely by Kennicott, Alex. a St. Aquilino, Lobstein, Geddes, Bertholdt, and others. The discussion was taken up once more on the other side, chiefly by Ravius, who succeeded in finally disposing of this point of the superiority (*Exercit. Phil. in Houbig. Profl.* [Lugd. Bat. 1755]). It was from his day forward allowed, almost on all hands, that the Masoretic text was the genuine one; but that in doubtful cases, when the Samaritan had an "unquestionably clearer" reading, this was to be adopted, since a certain amount of value, however limited, did attach to it. Michaelis, Eichhorn, Jahn, and the majority of modern critics adhered to this opinion. Here the matter rested until 1815, when Gesenius (*De Pent. Sam. Origine, Indole, et Auctoritate*) abolished the remnant of the authority of the Samaritan Pentateuch. So masterly, lucid, and full are his arguments and his proofs that there has been, and will be, no further question as to the absence of all value in this recension, and in its pretended emendations. In fact, a glance at the systematic arrangement of the variations, of which he first of all be thought himself, is quite sufficient to convince the reader at once that they are for the most part mere blunders, arising from an imperfect knowledge of the first elements of grammar and exegesis. That others owe their existence to a studied design of conforming certain passages to the Samaritan mode of thought, speech, and faith—more especially to show that the Mount Gerizim, upon which their temple stood, was the spot chosen and indicated by God to Moses as the one upon which he desired to be worshipped. Finally, that others are due to a tendency towards removing, as well as linguistic shortcomings would allow, all that seemed obscure or in any way doubtful, and towards filling up all apparent imperfections either by repetitions or by means of newly invented and badly fitting words and phrases. It must, however, be premised that, except two alterations (Exod. xiii, 6, where the Samaritan reads "Six days shalt thou eat unleavened bread," instead of the received "Seven days," and the change of the word *רחיה* "There shall not be," into *רחיה*, "live," Deut. xxiii, 18), the Mosaic laws and ordinances themselves are nowhere tampered with.

We will now proceed to lay specimens of these once so highly prized variants before the reader, in order that he may judge for himself. We shall follow in this the commonly received arrangement of Gesenius, who divides all these readings into eight classes:

1. The first class, then, consists of readings by which emendations of a grammatical nature have been attempted.

(a.) The quiescent letters, or so-called *matres lectionis*, are supplied. Thus *ים* is found in the Samar. for *י* of the Masoretic text; *ית* for *י*; *י* for *י*; *אליהם* for *אלהם*; *מארות* for *מארות*; etc.; sometimes a *ו* is put even where the Heb. text has, in accordance with the grammatical rules, only a short vowel or a sheva: *תפני* is found for *תפני* (Lev. xvi, 12); *אנייה* for *אנייה* (Deut. xxviii, 68).

(b.) The more poetical forms of the pronouns, probably less known to the Sam., are altered into the more common ones. Thus *נחני*, *הם*, *האל*, become *אנחנו*, *המה*, *האלה*, *המה*.

(c.) The same propensity for completing apparently incomplete forms is noticeable in the flexion of the verbs. The apocopated or short future is altered into the regular future. In this manner *ותגד* becomes *ויגד* (Gen. xxiv, 22); *ותגד* is emended into *ויגד* (xxv, 18); *ותגד* (verb "ל") into *ויגד* (xli, 33); the final *ה*, of the 3d pers. fem. plur. fut., into *ה*.

(d.) On the other hand, the paralogical letters *ו* and *י* at the end of nouns are almost universally struck out by the Sam. corrector; e. g. *שיכני* (Deut. xxxiii, 16) is shortened into *שיכני* into *חית* (Gen. i, 24); and, in the ignorance of the existence of nouns of a common gender, he has given them genders according to his fancy. Thus masculine are made the words *לחם* (Gen. xlix, 20), *שני* (Deut. xv, 7, etc.), *בהנה* (Gen. xxxii, 9); feminine the words *ארץ* (Gen. xiii, 6), *דרך* (Deut. xxviii, 25), *נפש* (Gen. xli, 25, etc.); wherever the word *נר* occurs in the sense of "girl," a *ה* is added at the end (xxiv, 14, etc.).

(e.) The infin. absol. is, in the quaintest manner possible, reduced to the form of the finite verb; so *וישובו* *המים* and *וישובו* *המים*, "the waters returned continually," is transformed into *וישובו* *המים* and *וישובו* *המים*, "they returned, they went and they returned" (Gen. viii, 3). Where the infin. is used as an adverb, e. g. *הרחק* (xxi, 16), "far off," it is altered into *הרחיקה*, "she went far away," which renders the passage almost unintelligible; or it is changed into a participle, as *היורד נרע* (Gen. xliii, 7) into the meaningless *היורד נרע*.

For obsolete or rare forms, the modern and more common ones have been substituted in a great number of places. Thus *ערים* for *ערים* (Gen. iii, 10, 11); *ילד* for *ילד* (xi, 30); *צפורים* for the collective *צפור* (xv, 10); *אמהות*, "female servants," for *אמהות* (xx, 18); *טוב מנוחה כי טובה* for the adverbial *טוב ברחי* (Exod. xxvi, 26, making it depend from *נצח*); *מִשֵּׁשׁ*, in the unusual sense of "from it" (comp. 1 Kings xvii, 13), is altered into *מִמֶּנָּה* (Lev. ii, 2); *חיה* is wrongly put for *חיה* (3d pers. sing. masc. of *חיה* = *חי*); *נר*, the obsolete form, is replaced by

the more recent *עיר* (Numb. xxi, 15); the unusual fem. termination *ה* (comp. *אביגיל*, *אביגיל*) is elongated into *היה*; *היה* is the emendation for *היה* (Deut. xxii, 1); *היה* for *היה* (xxxiii, 15), etc.

2. The second class of variations consists of glosses or interpretations received into the text—glosses, moreover, in which the Sam. not unfrequently coincides with the Sept., the various versions, and Jewish commentaries, most of them therefore the result of exegetical tradition. Thus *איש ואשה*, "man and woman," used by Gen. vii, 2 of animals, is changed into *זכר ונקבה*, "male and female;" *שנאיו* (Gen. xxiv, 60), "his haters," becomes *אויביו*, "his enemies;" *מה* (indefin.) is substituted for *מאומה*, *ירא*, "he will see, choose," is amplified by a *לו*, "for himself;" *הַיָּד הַיָּד* is transformed into *הגר אשר יגור* (Lev. xvii, 10); *אלה* *אל* (Numb. xxiii, 4), "And God met Bileam," becomes with the Sam. *אנ* *אל*, "and an angel of the Lord found Bileam;" *על האשה* (Gen. xx, 3), "for the woman," is amplified into *אורח*, *האשה*, "for the sake of the woman;" *לנכד*, from *נכד* (obsol., comp. *נכד*), is put for *לנכד*, "those that are before me," in contradistinction to "those who will come after me;" *ותפס*, "and she emptied" (her pitcher into

the trough, Gen. xxiv, 20), has made room for וְהוֹרִידָהּ, "and she took down;" נִדְרַשְׁתִּי שָׁם, "I will meet there" (A. V. Exod. xxix, 43), is made שָׁם, "I shall be [searched] found there;" Numb. xxxi, 15, before the words הַחַיִּיתָם כָּל נִקְבָּה, "Have you spared the life of every female?" אֲלֶמָּה, "Why," is inserted (Sept.); for כִּי שֵׁם יְהוָה אֶקְרָא (Deut. xxxii, 3), "If I call the name of Jehovah," the Sam. has בָּשֵׁם, "In the name," etc.

3. The third class consists of conjectural emendations of difficulties; e. g. the elliptic use of יָלַד, frequent both in Hebrew and Arabic, being evidently unknown to the emendator, he alters the שָׁנָה יָלַדָהּ (Gen. xvii, 17), "shall a child be born unto him that is a hundred years old?" into אֲוֹלִידָהּ, "shall I beget?" Gen. xxiv, 62, בָּא מִבּוֹא, "he came from going" (A. V. "from the way") to the well of Lahai-roi, the Sam. alters into כְּמִדְבָּר, "in or through the desert" (Sept. *ὡς ἐκ τοῦ ἔρημου*). In Gen. xxx, 34, יִהְיֶה כְּדִבְרֶיךָ, "Behold, may it be according to thy word," the לוֹ (Arab. *lo*) is transformed into לֹא, "and if not—let it be like thy word." Gen. xli, 32, וְעַל הַשְּׁנִינֹת הַחֹלִים, "And for that the dream was doubled," becomes וְעַל שְׁנֵי הַ, "The dream rose a second time," which is both un-Hebrew and diametrically opposed to the sense and construction of the passage. Better is the emendation, Gen. xlix, 10, מִבֵּין רִגְלָיו, "from between his feet," into "from among his banners," מִבֵּין דִּגְלָיו. Exod. xv, 18, all but five of the Sam. codd. read לְעֹלָם, "forever and longer," instead of וְעַד, the common form, "evermore." Exod. xxxiv, 7, וְנִקְּחָהּ לָא, "that will by no means clear the sin," becomes וְנִקְּחָהּ לוֹ, "and the innocent to him shall be innocent," against both the parallel passages and the obvious sense. The somewhat difficult וְלֹא יָסַפּוּ, "and they did not cease" (A. V. Numb. xi, 25), reappears as a still more obscure conjectural וְלֹא יָסַפּוּ, which we would venture to translate, "they were not gathered in," in the sense of "killed:" instead of either the וְאִכְנְשׁוּ, "congregated," of the Sam. Vers., or Castell's "continuerunt," or Houbigant's and Dathe's "convenerant." Numb. xxi, 28, הָרָ, "Ar" (Moab), is emended into עַר, "as far as," a perfectly meaningless reading; except that the עַר, "city," it seems, was a word unknown to the Samaritan. The somewhat uncommon words (Numb. xi, 32) וְיִשְׁתַּחֲוּ לָהֶם שְׂטוֹת, "and they (the people) spread them all abroad," are transposed into וְיִשְׁתַּחֲוּ לָהֶם שְׂחִוֹתָה, "and they slaughtered for themselves a slaughter." Dent. xxviii, 37, לְשִׂמְחָה, "an astonishment" (A. V.), very rarely used in this sense (Jer. xix, 8; xxv, 9), becomes לְשֵׁם, "to a name," i. e. a bad name. Deut. xxxiii, 6, וְיִהְיֶה מִסְפַּר, "May his men be a multitude," the Sam., with its characteristic aversion to, or, rather, ignorance of, the use of poetical diction, reads מִסְפַּר, "May there be from him a multitude," thereby trying perhaps to encounter also the apparent difficulty of the word מִסְפַּר, standing for "a great number." Anything more absurd than the מִסְפַּר in this place could hardly be imagined. A few verses farther on, the uncommon use of מִן in the phrase מִן יִקְרִימוּן (Deut. xxxiii, 11), as "lest," "not," caused the no less unfortunate alteration מִן יִקְרִימוּן, so that the latter part of the passage, "smite through the loins of them that rise against him, and of them that hate him, that they rise not again," becomes "who will raise them?"—barren alike of mean-

ing and of poetry. For the unusual and poetical דְּבַחָהּ (Deut. xxxiii, 25; A. V. "thy strength"), רִבְרִךְ is suggested; a word about the significance of which the commentators are at a greater loss even than about that of the original.

4. The fourth class consists of those readings where the Sam. is corrected or supplied from parallel passages. Thus לֹא אֶנְשָׁה (Gen. xviii, 29) becomes לֹא אִשָּׁה, according to ver. 28. Proper names, which are variously written in Hebrew, are all conformed to one orthography, as יִרְרִי, Moses's father-in-law. In Gen. xi, 8, "and the tower" is added to the Hebrew text, taken from the fourth verse.

5. The fifth class consists of larger interpolations taken from parallels, in which whatever was said or done by Moses as recorded in a preceding passage is repeated; and whatever is said to have been commanded by God is repeated in as many words where it is recorded to have been carried into effect. In this way Exodus is much enlarged by interpolations from itself, or from Deuteronomy. Gesenius thinks that these insertions were made between the date of the Sept. and Origen, because the Alexandrian father mentions a passage of the kind (Pick, *Horæ Samaritane*).

6. The sixth class consists of corrections made in order to remove what was offensive in sentiment to the Samaritans, or what conveyed an improbable meaning in their view. Thus in the antediluvian times none begets his first son after he is 150 years of age. Hence, from Jared, Methuselah, and Lamech, 100 years are subtracted at the time they are said to have their first son. In the postdiluvian times none is allowed to beget a son till after he is fifty years old. Accordingly some years are subtracted from several patriarchs and added to others. To make this intelligible, we subjoin from our *Horæ Samaritane* the following table of the Hebrew and Samaritan chronology, and where the first column, marked A, gives the years before birth of son; the second, B, the rest of life; the third, C, the extent of whole life:

	ANTEDILUVIANS.			Samaritan.		
	Hebrew.			A	B	C
	A	B	C			
Jared.....	162	800	962	62	785	847
Enoch.....	65	300	365	65	300	365
Methuselah.....	187	732	919	67	653	720
Lamech.....	182	595	777	53	600	653
POSTDILUVIANS.						
Arphaxad.....	35	403	438	135	303	438
Eber.....	34	430	464	134	270	404
Peleg.....	30	209	239	130	109	239
Reu.....	32	207	239	132	107	239
Serug.....	30	200	230	130	100	230
Nahor.....	29	119	148	79	69	148

Under this head falls the passage in Exod. xii, 40: "Now the sojourning of the children of Israel who dwelt in Egypt was 430 years." The Sam. has "The sojourning of the children of Israel and their fathers who dwelt in the land of Canaan and in the land of Egypt was 430 years." The same reading is in the Sept. (cod. Alex. and Josephus; comp. also Gal. iii, 17). In Gen. ii, 2 הַשְּׁבִיעִי is altered into הַשְּׁשִׁי, the sixth.

7. The seventh class comprises what we might briefly call Samaritanisms, i. e. certain Hebrew forms translocated into the idiomatic Samaritan; and here the Sam. codices vary considerably among themselves—as far as the very imperfect collation of them has hitherto shown—some having retained the Hebrew in many places where the others have adopted the new equivalents. Thus the gutturals and *avehi* letters are frequently changed: אֶרֶב becomes אֶרֶב (Gen. viii, 4); בָּאִי is altered into בָּעִי (xxiii, 18); שָׁבַע into שָׁבָע (xxvii, 19); וְהָיָה stands for וְהָיָה (Deut. xxxii, 24); the הֵא is changed into הֵא in words like הֵא, which becomes הֵא, הֵא, הֵא; הֵא is altered into הֵא, which becomes הֵא, הֵא, הֵא. The י is frequently doubled (? as a mater lecti-

onis): הַיִּיטִיב is substituted for הַיִּטִּיב; אִירָא for אִירָא. Many words are joined together: מַרְדְּרוֹר stands for מַר דְּרוֹר (Exod. xxx, 23); כַּהֲנָן for כֹּהֵן אֵן (Gen. xli, 45); הַר גִּרְזִימִם is always גִּרְזִימִיזִמָּה. The pronouns אֲתָּה and אֲנִי, 2d pers. fem. sing. and plur., are changed into אַתָּה and אַתָּן (the obsolete Heb. forms) respectively; the suff. הָ into וָאֵךְ; וָאֵךְ into וָאֵךְ; the termination of the 2d pers. sing. fem. pret., הָ, becomes הָי, like the 1st pers.; the verbal form Aphel is used for the Hiphil; הַזְכַּרְתִּי for הַזְכַּרְתִּי; the medial letter of the עֵבֶר is sometimes retained as א or ר, instead of being dropped as in the Hebrew. Again, verbs of the form לִה have the י frequently at the end of the infin. fut. and part., instead of the ה. Nouns of the *schema* קֶטֶל (אֶבֶל, etc.) are often spelled קֶטֶר, into which the form קֶטֶל is likewise occasionally transformed. Of distinctly Samaritan words may be mentioned: הֵךְ (Gen. xxxiv, 31) = אֵיךְ, הֵיךְ (Chald.), "like;" חֲתִים, for the Heb. חֲתָם, "seal;" כַּפְרָחָה, "as though it budded," becomes כַּפְרָחָה = the Targ. כַּר אַפְרָחָה, etc.

8. Passages which have been conformed to the theology, hermeneutics, and worship of the Samaritans. Thus, to avoid the appearance of polytheism, the four passages where Elohim is construed with a plural are altered so as to present the singular (Gen. xx, 13; xxxi, 53; xxxv, 7; Exod. xxii, 9). Again, whatever savors of anthropomorphism, or is unsuitable to the divine majesty, is either removed or softened. Wherever the Almighty himself is brought immediately into view as speaking to and dealing with men, "the angel of God" is substituted. Reverence for the patriarchs and Moses led to the alteration of Gen. xlix, 7 and Deut. xxxiii, 12; for example, for "cursed is their anger," אִרְרוּ אַפָּם, the Sam. reads, "excellent is their anger," אִרְרוּ אַפָּם; and instead of "the beloved of the Lord shall dwell," יִדְרֵי יְהוָה, it has "the hand, the hand of the Lord makes him to dwell," which yields no sense. In like manner, *voes honestiores* are sometimes put when there is fancied immodesty, as in Deut. xxv, 11, מַבְשִׁירִי is changed into מַבְשִׁירִי.

Here Gesenius puts the notable passage Deut. xxvii, 4, where the Samaritans changed Ebal into Gerizim to favor their own temple. Some, as Whiston and Kennicott, have attempted to show that the Jews changed Gerizim into Ebal, but unsuccessfully (comp. on this point Lee's *Prolegomena*, p. 29).

From the immense number of these worse than worthless variations Gesenius has singled out four which he thinks preferable, on the whole, to those of the Masoretic text, viz. Gen. iv, 8, where the Sam. adds, "Let us go into the field;" Gen. xxii, 13, אַחֲרֵי, *a*, instead of אַחֲרֵי, *behind* (also found in five fragments of old Jewish MSS. at St. Petersburg; see *Journ. Asiat.* 1866, i, 542); Gen. xlix, 14, where גִּבְרָם, *a bone*, is גִּבְרָם, *bony*; and Gen. xiv, 14, וִירֵךְ, instead of וִירֵךְ, i. e. *he numbered*, for *he led forth*. Even these have been thought emendations, and rejected by the majority of critics (comp. Frankel, *Einfluss*, p. 242).

Frankel has treated of the subject more by way of supplement to Gesenius than from an independent point of view. His additions to the classes of the latter are small and unimportant, besides being pervaded by erroneous conceptions of the age when the Samaritan Pentateuch originated. He adduces—1. The use of the imperative for the third person, as יִקְרֶב for יִקְרַב (Exod. xii, 48); and to ignorance of the use of the infinitive absolute, as זָכַר וְזָכַר (xiii, 3), זָכַר, *for* זָכַר (Numb. vi, 23), etc. 2. The characteristics of

the Galilæo-Palestinian dialect, such as the interchange of the *ahewi* letters, and of ב for פ, of ז for צ, etc. But this peculiarity is simply owing to carelessness of transcription in the copyists, who wrote as they pronounced, and softened the hard gutturals which were difficult to their organs. 3. The Aramaean coloring and orthography, as קֶטֶל and קֶטֶר. This is likewise owing to transcription, and can hardly be called a characteristic of the Samaritan (Frankel, *Einfluss*, p. 238 sq.).

Another classification of the Samaritan characteristic readings is given by Kirchheim. He makes thirteen classes, הַיִּסּוּפּוֹת וְהַשְׁנוּיִם, as follows: 1. הַיִּסּוּפּוֹת וְהַשְׁנוּיִם, additions and alterations in favor of Mount Gerizim, e. g. Deut. v, 21. 2. הַיִּסּוּפּוֹת וְהַשְׁנוּיִם, additions to fill up. 3. הַבְּאָר, explications or glosses. 4. חֲלֻקַּת הַפְּעִלִים וְהַבְּנִינִים, change of verbs and conjugations. 5. חֲלֻקַּת הַשְּׁמוֹת, change of nouns. 6. הַהֲשׂוּאָה, assimilation, or bringing irregular forms into the same uniform type. 7. תַּמְרוּת, permutation of letters. 8. כְּנוּיִים, pronouns. 9. הַמִּין, gender. 10. אוֹתִיּוֹת הַנוֹסְפוֹת, letters added. 11. אוֹתִיּוֹת הַיִּסּוּפּוֹת וְהַהֲבָרָה, addition of qualifying letters, as articles, conjunctions, and prepositions. 12. הַקְּבוּץ וְהַפְּרִיד, junction and separation. 13. יְמוֹת עוֹלָם, chronological alterations (*Karme Shomron*, p. 32 sq.). Comp. for No. 13, Pick, *Horæ Samaritanæ* (Gen. v and xi, where the differences of the chronology in the Heb., Sept., Sam., and Josephus are exhibited).

A third division is that adopted by Kohn (*De Pent. Sam.* p. 9). He makes three divisions, viz. 1, Samaritan forms of words; 2, corrections and emendations; 3, glosses and corruptions for religious purposes; and perhaps, 4, blunders in orthography.

IV. *Origin and Age*.—In regard to these questions, opinions have been much divided. We shall enumerate the principal ones.

1. That the Samaritan Pentateuch came into the hands of the Samaritans as an inheritance from the ten tribes, whom they succeeded—so the popular notion runs. Of this opinion are J. Morinus, Walton, Cappellus, Kennicott, Michaelis, Eichhorn, Bauer, Jahn, Bertholdt, Steudel, Mazade, Stuart, Davidson, and others. Their reasons for it may be thus briefly summed up:

(1.) It seems improbable that the Samaritans should have accepted their code at the hands of the Jews after the Exile, as supposed by some critics, since there existed an intense hatred between the two nationalities.

(2.) The Samaritan canon has only the Pentateuch in common with the Hebrew canon: had that book been received at a period when the Hagiographa and the Prophets were in the Jews' hands, it would be surprising if they had not also received those.

(3.) The Samaritan letters, avowedly the more ancient, are found in the Samaritan code; therefore it was written before the alteration of the character into the square Hebrew—which dates from the end of the Exile—took place.

Since the above opinion—that the Pentateuch came into the hands of the Samaritans from the ten tribes—is the most popular one, we will now adduce some of the chief reasons brought against it; and the reader will see, by the somewhat feeble nature of the arguments on either side, that the last word has not yet been spoken in the matter.

(a.) There existed no religious animosity whatsoever between Judah and Israel when they separated; the ten tribes could not, therefore, have bequeathed such an animosity to those who succeeded them, and who, we may add, probably cared as little, originally, for the disputes between Judah and Israel as colonists from far-off coun-

has been used: The Samaritans had already brought out for their own use a Greek translation, known under the name of *τὸ Σαμαρειτικόν*; the Sept. finding this convenient for their purpose, took it for their basis, altering here and there after the Hebrew original to suit their own ideas (so Kohn, p. 38 sq.). But there is this objection to that theory: the Samaritan-Greek version was not translated before the 3d or 4th century A.D. Besides, it is hardly possible that a people like the Samaritans, who on all other occasions showed themselves powerless to invent, only capable of feeble imitation, should in this one instance have distanced their rivals in producing so great a literary work as a Greek translation of the Pentateuch. For this reason we must give up this explanation of the similarity of the two texts.

(b.) As to the second opinion, that mutual interpolations have taken place, or that the Samaritan Pentateuch was corrected from the Septuagint, it is true to a certain extent: many passages occur in the former which bear all the marks of being interpolations from the Alexandrine version, e. g. Gen. xxiii, 2, *בקרית עמק הארבע* = *ἐν πόλει Ἀρβόκ, ἥ ἐστιν ἐν τῷ κοιλάμωτι*; Gen. xxvii, 27, *מלך הכרם* = *ὡς ὁμοῦ ἀγροῦ πλῆρους*; Gen. xliii, 28, *האיש הזה* = *εὐλογημένος ὁ ἄνθρωπος ἐκεῖνος τῷ Θεῷ*; Exod. v, 13, *ההבן נהן* = *τὸ ἄχρον ἐδίδοδο ὅμιν*, etc. But how, moreover, on this supposition, are the equally numerous passages to be accounted for in which the Samaritan Pentateuch differs from the Sept., sometimes in these cases agreeing with the Hebrew, at others departing from it?

(c.) The third opinion, advocated by Gesenius, that both the Samaritan and the Sept. were formed from Hebrew MSS., has the most probability.

(d.) The fourth opinion, which claims that the Samaritan has, in the main, been altered from the Sept., will have few, if any, supporters, since, according to Frankel, this should have been accomplished through a Greek translation of a Targum and the Greek version of the Samaritan Pentateuch. See SEPTUAGINT.

VI. Copies.—1. The following is a list of the MSS. of the Samaritan Pentateuch now in European libraries (Kennicott):

No. 1. Oxford (Usher), Bodl., fol., No. 3127. Perfect, except the first 20 and last 9 verses.

No. 2. Oxford (Usher), Bodl., 4to, No. 3128, with an Arabic version in Samaritan characters. Imperfect. Wanting the whole of Leviticus and many portions of the other books. See NUMBERS and DEUTERONOMY.

No. 3. Oxford (Usher), Bodl., 4to, No. 3129. Wanting many portions in each book, especially in Numbers and Deuteronomy.

No. 4. Oxford (Usher, Laud), Bodl., 4to, No. 624. Defective in parts of Deuteronomy.

No. 5. Oxford (Marsh), Bodl., 12mo, No. 15. Wanting some verses in the beginning: 21 chapters obliterated.

No. 6. Oxford (Pocock), Bodl., 24mo, No. 5328. Parts of leaves lost; otherwise perfect.

No. 7. London (Usher), Br. Mus. Claud. B. 8vo. Vellum. Complete. 254 leaves. Of great value.

No. 8. Paris (Peiresc), Imp. Libr., Sam. No. 1. Recent MS. containing the Hebrew and Samaritan texts, with an Arabic version in the Samaritan character. Wanting the first 34 chapters, and very defective in many places.

No. 9. Paris (Peiresc), Imp. Libr., Sam. No. 2. Ancient MS., wanting first 17 chapters of Genesis, and all Deuteronomy from the 7th chapter. Nonbivalent, however, quotes from Gen. x, 11 of this codex—a rather puzzling circumstance.

No. 10. Paris (Harl. de Sancy), Oratory, No. 1. The famous MS. of P. della Valle.

No. 11. Paris (Dom. Nolin), Oratory, No. 2. Made-up copy.

No. 12. Paris (Libr. St. Genev.). Of little value.

No. 13. Rome (Peiresc and Barber.), Vatican, No. 106. Hebrew and Samaritan texts, with Arabic version in Samaritan character. Very defective and recent. Dated the 7th century (?).

No. 14. Rome (Card. Cobellertini), Vatican. Also supposed to be of the 7th century, but very doubtful.

No. 15. Milan (Ambrosian Libr.). Said to be very ancient; not collated.

No. 16. Leyden (Golius MS.), fol., No. 1. Said to be complete.

No. 17. Gotha (Ducal Libr.). A fragment only.

No. 18. London (Count of Paris's library). With version.

No. 19. St. Petersburg (Imp. Libr.).

A description of No. 19 is expected from Mr. Harkavy, while the others are described by Kennicott in his *Dissertatio Generalis*, reprinted by Blayney in his edition of the Samaritan Pentateuch.

All these are written on separate leaves; none are in the shape of rolls. At Nablûs, however, as is well known, there is still preserved in the synagogue, and only brought out with much solemnity on certain festivals, an ancient parchment roll, purporting, by its inscription, to have been written by the hand of the great-grandson of Aaron himself, thirteen years after the original settlement of the Israelites in Canaan. It is written on the hair side of the skins of some twenty rams that served as thank-offerings (so says the priest). They are of unequal size, some containing five, some six, columns of writing. Other old MSS. are also mentioned as existing there and elsewhere in Palestine; one has the date of A.H. 35 (= A.D. 655) inscribed on it.

2. Printed editions are contained in the Paris and Walton Polyglots; and a separate reprint from the latter was made by Blayney (Oxford, 1790). A fac-simile of the 20th chapter of Exodus, from one of the Nablûs MSS., has been edited, with portions of the corresponding Masoretic text, and a Russian translation and introduction, by Levysohn (Jerusalem, 1860); but the specimen is badly executed.

VII. Literature.—Besides the Introductions of Eichhorn, Bertholdt, Jahn, De Wette, Hävernick, Keil, and Bleek, and the articles in the dictionaries of Kitto and Smith (which we have freely used here), the reader is referred to Gesenius, *De Pent. Samarit. Origine, Indole, et Auctoritate* (Halæ, 1815, 4to); Journ. Sac. Lit. July, 1853, p. 298 sq.; Morini (J.) *Esercitations in utrumque Samarit. Pentateuchum* (Paris, 1631, 4to); Usher, *Syntagma de Sept. Interpretibus, Epistola ad L. Cappel-lum* (London, 1655, 4to); Poncet, *Nouveaux Eclaircissements sur l'Origine et le Pentateuque des Samaritains* (Paris, 1760, 8vo); Le Clerc, *Sentimens de quelques Théologiens de Hollande sur l'Histoire Critique du R. Simon* (Amsterdam, 1686, 8vo); Tychsen, *Disputatio Historico-philologico-critica de Pentateucho Ebræo-Samaritano, ab Ebræo eoque Masoretico Descripto Exemplari* (Butzovii, 1765, 4to); Prideaux, *Old and New Testament connected in the History of the Jews and Neighboring Nations* (London, 1719, 8vo); Walton, *Prolegomena* (ed. Dathe, Leipzig, 1777, 8vo), xi, 9, 11; Cappelli *Critica Sacra* (ed. Vogel and Scharfenberg, Halæ, 1775–86, 8vo); Hassencamp, *Der entdeckte wahre Ursprung der alten Bibelübersetzungen und der gerettete samar. Text* (Minden, 1775); Kennicott, *Second Dissertation* (Oxford, 1759); Rutherford, *Letter to the Rev. Mr. Kennicott, in which his Defence of the Samaritan Pentateuch is examined, and his Second Dissertation on the State of the Printed Hebrew Text of the O. T. is shown to be, in many instances, Injudicious and Inaccurate* (Cambridge, 1761, 8vo); Kennicott, *Answer to a Letter from the Rev. T. Rutherford, D.D.* (1761, 8vo); Rutherford, *Second Letter to the Rev. Dr. Kennicott, in which his Defence of the Second Dissertation is examined* (1763, 8vo); Bauer, *Critica Sacra* (Lipsiæ, 1795); Steudel, in Bengel's *Archiv*, iii, 626, etc.; R. Simon, *Histoire Critique du V. T.* (Paris, 1685, 4to); Fulda, in Paulus's *Memorabilia*, vii; Hasse, *Aussichten zu künftiger Aufklärung über das A. T.* (Jena, 1785, 8vo); Paulus, *Commentar über das N. T.* (Lübeck, 1804, 8vo), pt. iv; Hupfeld, *Beleuchtung einiger dunklen und missverstandenen Stellen der ältesten antiken Textgeschichte, in den Studien und Kritiken*, 1830, pt. ii; Mazade, *Sur l'Origine, l'Age, et l'Etat Critique du Pent. Samar.* (Geneva, 1830, 8vo); Hug, in the *Freiburg. Zeitschrift*, vol. vii; Hengstenberg, *Die Authentie des Pentateuches* (Berlin, 1836, 8vo), vol. i; Stuart, in the *North American Review* for 1826, and *American Biblical Repository* for 1832; Frankel, *Vorstudien* (Leipsic, 1841), and *Ueber den Einfluss der palästinischen Exegese auf*

die alexandrinische Hermeneutik (ibid. 1851, 8vo); Lee, *Prolegomena*, in *Biblia Sacra*, etc. (London, s. a.); Davidson, *Treatise on Biblical Criticism* (Edinburgh, 1852, 8vo); ברמ"י שומרון, *Introductio in Librum Talmudicum "De Samaritanis"*, scripsit Raphael Kirchheim, (Frankfort, 1851, 8vo); Walker, in the *Christ. Examiner*, May and September, 1840; *Zeitschrift d. D. M. G.* xiii, 275; xiv, 622; xviii, 582 sq.; xix, 611 sq.; Nutt, *Samaritan History*, p. 83 sq.; Kohn, *De Pentateucho Samaritano* (Lipsiæ, 1865; reviewed in Frankel's *Monatschrift*, 1865, p. 356 sq.); Geiger, *Nachgelassene Schriften* (Berlin, 1877), iv, 54 sq.; Pick, *Horæ Samaritanæ*, or, *A Collection of Various Readings of the Samaritan Pentateuch compared with the Hebrew and other Ancient Versions*, in *Biblioth. Sacra*, 1876-77-78. See SAMARITANS, MODERN. (B. P.)

SAMARITAN SECTS. The most important information on the subject is given by Epiphanius (*Hæres.* [i, 28], followed by John Damascus [*ibid.* p. 79], and Nicetas [*Thesaur.* i, 35]). Epiphanius mentions four different sects—the Essenes, Sebuseans, Gorthenians, and Dositheans. With regard to the first of these bodies nothing is known, nor is the information with regard to the Sebuseans (Σεβουαῖοι, שבועאי) more satisfactory. They are said to have distinguished themselves by commencing the year in the early autumn; soon after this they held the Feast of Unleavened Bread, Pentecost later, and that of Tabernacles in the spring, when the Jews were celebrating their Easter. Of the Gorthenians, termed by Nicetas Sorothenians, nothing whatever is known. With regard to the last of the four sects and their leader Dositheus, it is impossible to reconcile the discordant testimony of Jewish, Christian, Mohammedan, and Samaritan writers. Epiphanius relates of them that they were believers in the resurrection and austere in their manner of life, avoiding animal food, some marrying but once, others not at all. As to the observance of circumcision, the Sabbath, avoiding contact with others, fasting and penance, they were not distinguished from the other Samaritans. Their founder was, he continues, a Jew who, for his learning, aspired to be chief among his party, but being disappointed in his ambitious schemes, went over to the Samaritans and founded a sect: later he retired to a cave, and there starved himself to death out of affected piety.

What Epiphanius relates here concerning Dositheus fully accords with the account of Abûl-Fath concerning Dûsis; but the austere life of his adherents can only refer to those of Dostân, of whom we shall have to speak further on. It seems that Epiphanius has confounded the two together, which has also been done by later writers. The statement of Abûl-Fath is that a sect appeared calling themselves Dostân, or "the Friends," who varied in many respects the hitherto received feasts and traditions of their fathers. Thus they held for impure a fountain into which a dead insect (שרץ) had fallen; altered the time for reckoning the purification of women and commencement of feasts; forbade the eating of eggs which had been laid, allowing those only to be eaten which were found inside a slain bird; considered dead snakes and cemeteries as unclean; and held any one whose shadow fell upon a grave as impure for seven days. They rejected the words "Blessed be our God forever" (ברוך אלהינו לעולם), and substituted Elohim for Jehovah; denied that Gerizim had been the first sanctuary of God; upset the Samaritan reckoning for the feasts, giving thirty days to each month, rejecting the feasts and order of fasts, and the portions (due to the Levites). They counted the fifty days to Pentecost from the Sabbath the day after the first day of the Passover, like the Jews; not from the Sunday, like the other Samaritans. Their priests, without becoming impure, could enter a house suspected of infection as long as he did not speak. When a pure and an impure house stood side by side, and it was doubtful whether the impurity

extended to the former as well, it was decided by watching whether a clean or unclean bird first settled upon it. On the Sabbath they might only eat and drink from earthen vessels, which, if defiled, could not be purified; they might give no food or water to their cattle: this was done on the day previous. Their high-priest was a certain Zarâ, who had been turned out of his own community for immorality.

At a later period lived Dûsis. Being condemned to death for adultery, he was respited on the promise of sowing dissension among the Samaritans by founding a new sect. He went to 'Asker, near Nablûs, and formed a friendship with a Samaritan, distinguished for his learning and piety, by the name of ירדני. Compelled, however, to fly for his life on account of a false accusation which he had brought against his friend, he took shelter at Shueike with a widow woman named Amentu, in whose house he composed many writings; but, finding that a hot pursuit after him was still maintained, he retired to a cave, where he perished of hunger, and his body was eaten by dogs. Before his departure, however, he left his books with his hostess, enjoining her to let no one read them unless he first bathed in the tank hard by. Accordingly, when Levi, the high-priest's nephew—a pious, able man—arrived with seven others in search of him, they all bathed, one after the other, in the tank, and each, as he emerged from the water, exclaimed, "I believe in thee, Jehovah, and in Dûsis, thy servant, and his sons and daughters;" Levi adding, when his turn came, "Woe to us if we deny Dûsis, the prophet of God." They then took the writings of Dûsis, and found that he had made many alterations in the law—more, even, than Ezra. They concealed them, and on their return to Nablûs reported that Dûsis had disappeared before they arrived, they knew not whither. At the next Passover, Levi had to read out Exod. xii, 22 in the synagogue, but for "hyssop" (אֶזְוִיב) he substituted "thyme" (צִנְדִּיר). Corrected by the congregation, he still persevered, crying, "This is right, as God hath said by his prophet Dûsis, on whom be peace! Ye are all worthy of death for denying the prophetic office of his servant Dûsis, altering the feasts, falsifying the great name of Jehovah, and persecuting the second prophet of God, whom he hath revealed from Sinai! Woe unto you that you have rejected and do not follow him!" Levi was stoned. His friends dipped a palm-leaf in his blood, and ordained that whoever would read Dûsis's writings and see the leaf must first fast seven days and nights. They cut off their hair, shaved their beards, and at their funerals performed many strange ceremonies. On the Sabbath they would not move from their place, and kept their feasts only on this day, during which they would not remove their hands from their sleeves. When one of their friends died, they would gird him with a girdle, put a stick in his hand and shoes on his feet, saying, "If we rise, he will at once get up," believing that the dead man, as soon as he was laid in the grave, would rise and go to Paradise. As to the age in which Dûsis lived, it must have been long before Origen, for this father, in his *Commentary on John xiii*, 27 (ed. Lommatzsch, ii, 49), tells us that a "certain Dositheus arose and claimed to be the Messiah; his followers are called Dositheans, who have his books and tell wonderful stories of him, as if he had not died and is still alive somewhere." This agrees with the statement of Abûl-Fath concerning Dûsis. According to Origen, Dositheus must have lived long before him—probably in the 1st, or at least in the 2d century of the Christian era. That he was the teacher or pupil of Simon Magus, as some have asserted, is an untenable conjecture. See Petermann in Herzog, xiii, 387 sq.; Nutt, *Samaritan History*, p. 46 sq.; Basnage, *Histoire des Juifs* (Taylor's transl.), p. 94 sq.; Jost, *Gesch. des Judenth. u. s. Secten*, i, 62 sq.; De Sacy, *Chrestom. Arabe*, i, 334 sq. (B. P.)

SAMARITAN VERSIONS. There exist three dif-

In Deut. i, 44, we read דְּבָרִים, "bees," where the Samaritan renders מְלִירָה, "words," as if it read דְּכָרִים, which could not have been the case had it followed Onkelos, who renders it correctly by דְּבָרִיחָא, "bees." That the Samaritan Targum has not followed the version of Onkelos may be also seen from the number of difficult Hebrew words, which, although intelligible to the Samaritan translator, he would not have retained had he followed Onkelos, who explained the same. Of such difficult words Winer mentions: Gen. ii, 12, שָׁחַם; xlviii, 22, שָׁחַם; xlix, 10, שָׁחַם; ii, 29, יִרְיָ; Exod. i, 16, אֲצָנִים; viii, 21, עָרַב; xiii, 18, חֲמִשִּׁים; xxix, 28, צִרְעָה; xxvi, 6, קָרְסִי; xxvii, 4, מִכְכָּר; xxxviii, 8, חֲשֵׁב; xxxiii, 35, פָּרַע; Lev. i, 15, מִלֵּךְ; ii, 2, אֲזַכְרָהָ; ii, 14, עָרַשׁ; v, 21, תְּשׁוּבָה, etc. (comp. p. 39 sq.). Under these circumstances, we cannot but conclude that the Samaritan translator has not known the version of Onkelos, or that he has not perused it; and we can only suppose that single passages have been interpolated from Onkelos; for, as Eichhorn has justly remarked, "the Samaritan Paraphrase went through different hands, and was afterwards edited by one or more Samaritans" (*Introduction*, vol. i, § 305).

For purposes of exegesis the version is entirely useless. It is simply interesting as faithfully representing the religious ideas and literary progress of the Samaritans; it is valuable also for philological purposes, as being the most trustworthy monument of an important Semic dialect. The oldest MSS. hitherto known to exist are both at Rome—the Barberini Triglot and the Vatican. The former was bought by Peiresc at Damascus, in 1631, and bequeathed by him to cardinal Barberini, in whose library it still remains. It is imperfect; the oldest parts were written in A.D. 1226, and the end of Deuteronomy was supplied by a later hand in 1482.

The Vatican MS. was bought by Pietro della Valle at Damascus, in 1616. It is much later than the one just described; it is on paper, dated A.D. 1514, with considerable lacunæ of words, and even verses (comp. Assemani, *Bibl. Vat. Catal.* i, 464). This is the only text that has ever been published: it appeared in the Paris Polyglot of 1645, and was thence copied, without, however, a fresh collation of the MS., into the London Polyglot of 1657, from which A. Brüll reprinted it in Hebrew characters, and published it under the title תַּרְגוּם שְׁמִירָנִי עַל הַתּוֹרָה (Frankfort-on-the-Main, 1875). Petermann, of Berlin, intended to publish an edition from MSS. collated by him at Nablûs, but the first part only was published: *Pentateuchus Samaritanus, ad fidem Librorum Manuscriptorum apud Nablusianos Repertorum, edidit et varias Lectiones adscripsit H. Petermann. Fasciculus I, Genesis* (Berolini, 1872). *Fragments of a Samaritan Targum* (Lev. xxv, 26, to the end of that book, and parts of Numbers), from a Bodleian MS., were edited and published by Nutt (Lond. 1874). The Imperial Library of St. Petersburg contains also many fragments of the Samaritan-Arabic translation; as well as of the Samaritan Targum.

2. "The Samaritan" in Greek (τὸ Σαμαρειτικόν). In the fathers of the 3d and 4th centuries, as well as in MSS. containing the Sept., with fragments of Aquila, Symmachus, and Theodotion, we find scholia, or pieces of a Greek translation of the Pentateuch so designated. These fragments have been collected by Morin, Hotttinger, and Montfaucon, and are in Walton's *Prolegomena*. Castell, Vossius, and Herbst think that they are merely translated extracts from the Samaritan Version; while Gesenius, Winer, and Juynboll suppose them to be remains of a continuous Greek version of the Samaritan Pentateuch. On the other hand, Hengstenberg and Hävernick see in it only a corrected edition of certain passages of the Sept. The most probable of these opin-

ions seems to be that which looks upon the notes or scholia as the Samaritan corrections of certain places in the Sept.

3. In 1070 an Arabic version of the Samaritan Pentateuch was made by Abu Saïd in Egypt, on the basis of the Arabic translation of Saadiah Hag-gaon (q. v.). Like the original Samaritan, it avoids anthropomorphisms and anthropopathisms, replacing the latter by euphemisms, besides occasionally making some slight alterations, more especially in proper nouns. It appears to have been drawn up from the Samaritan text, not from the Samaritan Version, the Hebrew words occasionally remaining unaltered in the translation. Often, also, it renders the original differently from the Samaritan Version. Principally noticeable is its excessive dread of assigning to God anything like human attributes, physical or mental. For יהוה, אֱלֹהִים, "God," we find (as in Saadiah sometimes) *Malak Allah*, "the Angel of God;" for "the eyes of God" we have (Deut. ix, 12) "the beholding of God." For "bread of God," "the necessary," etc. Great reverence is shown for Moses and the tribe of Levi; but envy of the tribe of Judah (Gen. xlix, 10). It is written in the common language of the Arabs, and abounds in Samaritanisms. An edition of this version was commenced by Kuenen at Leyden. Genesis was published in 1851; Exodus and Leviticus in 1854. In Syria it would appear that the Samaritans still used Saadiah's even after Abu Saïd's had been made, for which reason Abul Baracat (about 1208) wrote scholia upon the latter in order to recommend it to the people. This must not be considered a new version, but a Syriac recension of the Arabic-Samaritan. The two recensions—the Syriac of Abul Baracat and the Egyptian of Abu Saïd—were mixed together in the MSS., and cannot now be properly separated. For further particulars we must refer to Juynboll and Eichhorn: the former in his *Orientalia*, ii, 115 sq.; the latter in the second volume of his *Eißeitung* to the Old Test. Van Vloten described a MS. of Abu Saïd's in the University of Leyden in 1803; and Juynboll notices the MSS. at Paris, especially Nos. 2 and 4, in the *Orientalia*, ii, 115 sq.

Literature.—Cellarius, *Horæ Samaritanæ* (Frankfort and Jena, 1705, 4to, 2d ed.), p. 1-68; Uhlemann, *Samaritan Chrestomathy* (Lipsiæ, 1837); Walton, *Prolegomena*, ed. (B. P.)

Samaritans, Modern. As already stated (under SAMARITAN), a small remnant of the old nation still dwell in their ancient capital, Shechem. There existed a tradition among them, which has yet hardly died out, that large numbers of their brethren were dwelling in various parts of the world—in England, France, India, and elsewhere—and they have instituted inquiries from time to time in the hope of becoming acquainted with these their brethren. In past ages we do find them

not only inhabiting various cities in Palestine, but even in Egypt and Constantinople (El-Masudi, *Hist. Encycl.* i, 114; Rabbi Benjamin, *Itinerary*). They are now, however, confined to Nablús, the ancient Shechem, and their sacred city through all ages. Here they live together, Ghetto-like, on the south-western side of the town, at the very foot of Gerizim, their sacred mount. They have dwindled down to a very small number, consisting only of some forty families; and before many generations more have passed away, the ancient Samaritan nation will have become extinct. In 1872 they numbered 135 souls, 80 of whom were males; by the defection of Jacob Shellaby and his family, they have been reduced to a total of 130 souls. Perhaps no people have been persecuted and oppressed from age to age more than they have, yet it has served to knit them the more closely together. In appearance they are superior to their circumstances, as also to all others around them—a straight and high forehead, full brow, large and rather almond-shaped eyes, aquiline nose, somewhat large mouth, and well-formed chin are their chief physiological characteristics; and, with few exceptions, they are tall and of lofty bearing. If the present small community is a fair specimen of what their nation was in ancient times, they must have been a fine race.

A deep interest is attached to this people, not only because they are the oldest and smallest sect in the world, but principally because they retain the opinions, ceremonies, and habits of their forefathers, and are, like their Jewish brethren, a living evidence of the truth of Bible history, especially that of the Pentateuch. Our object will be, therefore, to give a summary account of all the principal features of their life and manners, as exhibited by these remaining votaries; and for this purpose we chiefly follow Mills's abridgment (in Fairbairn's *Dictionary*) of his larger account (*Three Months in Nablús*, Lond. 1864).

1. *Domestic Life and Duties*.—1. *Circumcision*.—The first and most important is to admit the male child into the Abrahamic covenant by circumcision. This ceremony must be performed on the eighth day, even should that be the Sabbath, as it was undoubtedly the practice of the Jews of old (John vii, 22); and not in the synagogue, but always in the house of the parents. The performance of the rite devolves upon the priest; but should he happen to be absent, any one acquainted with the mode of operating may do it. During the celebration of the ceremony the name of the child is announced, as of old (Luke i, 59), and, when over, they celebrate it (as the Jews do) by a feast, enlivened by Arab music and singing. If the child be female, the only observance is that of naming, which takes place on the third day at the parents' house, without any particular rite or gathering of friends, the priest simply announcing it in the hearing of those who may happen to be present. Formerly, they used to redeem the first-born child, as the Jews still do, according to the commandment (Exod. xiii, 13), but now the ceremony is discontinued on account of the poverty of their people.

2. *Marriage*.—Like most Easterns, the Samaritans have a strong desire for offspring, a feeling which is probably intensified by the paucity of their number. This, together with an early development in such a climate, leads them, like all their neighbors, to marry at a very early age, the males being eligible at fourteen and the females at ten years of age. But they never intermarry with persons of another creed, whether circumcised or uncircumcised; and never marry but on a Thursday, this in their estimation being a peculiarly propitious day. They have no betrothing, and the marriage rite is very simple. Upon the appointed day, two men who are witnesses of the agreement conduct the bride and her friends at midday to the bridegroom's house, where the ceremony is performed by the priest. The service is in Hebrew—an unknown tongue to those most concerned—and consists of portions of the law interspersed with certain prayers; and the marriage agree-

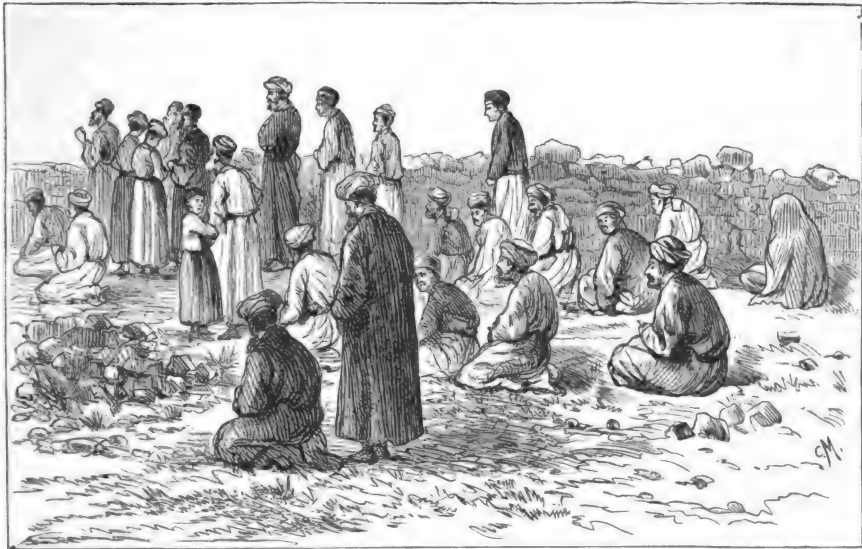

ment is read, by which the young bridegroom has to pay a fixed dowry to the father of the bride. In the evening a feast is made, followed by music, singing, and dancing, performed, however, not by themselves, but by hired Mussulmans. Here we may observe that they are not given to polygamy. There is nothing in their theology prohibiting it, but this virtue has grown upon them from necessity, on account of the unequal distribution of the sexes. Their present rule, and one which has existed for some ages past, is that any one may take an additional wife if the first wife be willing, but on that condition only.

3. *Divorce*.—The Samaritans are not given to divorcement, and in this matter they stand in singular contrast to their Jewish and Mohammedan neighbors. Their modern theology at least forbids it, except only for the cause of fornication; but their strict conformity to this dogma under all circumstances is very doubtful.

4. *Purifications*.—There are seven things that particularly defile a person, four of which relate to both sexes, the remaining three pertaining to the female: (1) the conjugal act; (2) nocturnal pollution; (3) touching any dead body; (4) touching unclean birds, quadrupeds, or reptiles; (5) a female from hemorrhage; (6) a female's menstrual discharge, when she remains unclean for seven days; (7) child-birth, when the mother is accounted unclean for forty-one days if the child be male, but if female for eighty days. On account of these defilements they purify themselves most scrupulously. Formerly, when sacrifices used to be offered, the ashes of a burned heifer were kept to be mixed with running water and sprinkled on the unclean person by one that was clean according to the law (Numb. xix, 17-19). Now running water only is used. The washing of hands as a rite of purification at rising and before eating, etc., as the Jews do, is never observed by the Samaritans; they simply do it for the purpose of cleansing, and not as a religious ceremony (comp. Mark vii, 3, 4).

5. *Morning and Evening Prayer*.—The first duty on rising is to repeat the morning prayer, which is long and tedious. It is generally offered by each individual in private, although there is no law against its being performed in the presence of the family. Any one is at liberty to repeat this or any other prayer as often as he pleases during the day, but the morning and evening orisons must on no account be neglected, and must be said in the early morning and at sunset. This, like all their other prayers, is a set one in the Hebrew tongue, and consequently not understood except by some one or two besides the priest. Still, the sacredness of the language, combined with the antiquity of the formula, imparts to it a kind of hallowedness, which has a strange hold upon the conscience of the people. During the prayer they always turn towards Mount Gerizim.

6. *Food*.—When they sit to eat, a blessing is pronounced before the food is served. This duty devolves upon the head of the family. They make the broadest distinction in articles of diet; adhering faithfully to the law of Moses, and attaching the greatest importance to its observance. They never eat the flesh of any beast that does not chew the cud and divide the hoof (Lev. xi, 3-8; Deut. xiv, 6-8), and swine are held in the greatest detestation. All kinds of poultry, except those notified as unclean (Lev. xi, 13-25), are considered lawful, as well as all fish that have fins and scales (Lev. xi, 9-12). Like the Jews, they never partake of flesh and butter (or milk) at the same meal, nor do they even place them on the table at the same time. Six hours must elapse after partaking of meat before milk or butter can be taken. The Jews found this custom on the passage, "Thou shalt not see a kid in his mother's milk" (Exod. xxiii, 19), but the Samaritans refuse it as the importance of a law of Moses, and only observe it as a sanitary rule laid down by their sages. They hold it unlawful to eat anything prepared by either Jews or Gentiles, therefore they make their own bread, cheese,

Samaritans at Prayer on Mount Gerizim. (From a Photograph.)

butter, etc. Cattle and poultry too must be slaughtered by their own *shochet*, or killer, who has to pass through a course of study and training before he is qualified to kill according to the numerous rules prescribed by their sages.

7. *Duties towards the Dead.*—The Samaritans, like the Jews, teach the dying person to say as his last words, "The Lord our God is one Lord." This last utterance must be in the Hebrew, therefore all their people, women and children, are most carefully taught this phrase. The relations of the dead never rend their clothes, as they consider it to be contrary to the will of God. Nor have they any fixed time to mourn, or formula to repeat over the departed. With them it is simply a matter of feeling; some mourn for a long and some for a shorter time. But to indulge in grief is discouraged, forasmuch as the high-priest was forbidden to mourn for the dead (Lev. xxi, 10); so they consider the restraint from it to be a proof of a more thorough obedience to the will of God and a higher religious state of mind. As anciently, the house wherein the dead body lies is rendered unclean (Numb. xix, 14), and the priest carefully avoids crossing its threshold (Lev. xxi, 11).

As soon as the dying person has expired, they perform the ceremony of *טהרה* (*taharah*), purification, by washing the body carefully with clean running water. This is done by individuals appointed to that duty from among themselves, after which it is wrapped in a cotton shroud (John xi, 44), and then placed in a wooden coffin. It is curious to observe that no other natives of any creed use coffins; the Samaritans, however, scrupulously follow the example set them by their father Joseph (Gen. i, 26). When a death is expected, the law is read in the chamber of the sick, not by the priest, but by one appointed for that purpose. As soon as all hope of recovery is given up, the reading begins, is continued to the patient's death, and again resumed after the *taharah*, and continued to Numb. xxx, 1. After arranging the funeral procession, the reading is once more proceeded with until the whole law be read.

II. *Religion.*—The Samaritan idea of religion is a national one. To them their faith and people are synonymous. In this sense they are, according to their own belief, the only peculiar people of God, with whom the Almighty has entered into covenants, and which covenants they faithfully keep. These are seven in number, and are as follows: *a*, the covenant of Noah

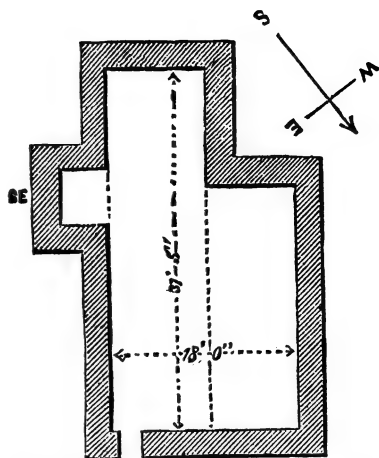

(Gen. ix, 14); *b*, the covenant of Abraham concerning circumcision (Gen. xvii, 9-14); *c*, the covenant of the Sabbath (Exod. xxxi, 12-17); *d*, the covenant of the two tables of the ten commandments (Exod. xx, 2-17); *e*, the covenant of salt (Numb. xviii, 19); *f*, the covenant of the Passover (Exod. xii, 2); *g*, the covenant of the priesthood (Numb. xxv, 12, 13). By virtue of these they are separated, on the one hand, from all the Gentiles, and, on the other hand, from the Jews, who, they assert, are cursed since the time of Eli.

1. *Constitution.*—Their people, according to the above idea, constitute a national religious community, over which two officers preside. The chief is the priest (*כֹּהֵן*). Upon him devolves the performance of all the duties prescribed in the law of Moses as pertaining to the priestly office. These are now but nominal, as they have no sacrifice because they have no temple; but certain prayers are offered instead of sacrifices. These, together with the priestly blessings, are given on all occasions by the priest himself, who is in reality but a Levite, for the last of the descendants of Aaron, according to their own chronicle, died in A.D. 1631. The second officer is the minister, *חַזָּן* (*chazan*), who is a member of a younger branch of the same family. It is his duty to read the public service generally, both in the synagogue and out of it. Upon him also falls the work of educating the children and instructing them in the law. These two officers sitting in assembly constitute their *בֵּית דִּין*, or *house of judgment*. The priest sits supreme and the minister second, and before this tribunal all Samaritan matters, whether social or religious, are settled. Should a question of any difficulty arise, the priest calls other members of the priestly family to assist in deciding the case; otherwise all kinds of questions are determined by the two officers alone.

2. *Creed.*—The Samaritans have no formula of belief or set articles of faith, excepting four great tenets: (1) to believe in Jehovah as the only God; (2) to believe in Moses as the only lawgiver; (3) to believe in the *תּוֹרָה* (*Torah*), Pentateuch, as the only divine book; (4) to believe in Mount Gerizim as the only house of God. These are the cardinal points of the Samaritan faith; but so far as a more detailed theological creed is concerned, the thirteen articles drawn up by Maimonides would as well express the Samaritan as the Jewish faith. These consist of a belief, in God as Creator and Governor; in one God only; in his not

being corporeal; in God being first and last of all things; in God as the only object of prayer; in the truth of prophecy; in the truthfulness and superiority of Moses; in the law as the enactment of Moses; in the unchangeableness of the law; in the omniscience of God; in rewards and punishments; in the coming of the Messiah; and in a general resurrection (*British Jews*, p. 68). Here it is important to observe that their only authority in theology is the Pentateuch—nothing is divine and binding but the *Torah*; all their dogmas are believed, whether rightly or wrongly, to be founded upon that sacred volume; and they are, in fact, strictly and wholly the disciples of Moses. It becomes, therefore, a subject of no little interest to the Biblical student to observe how many of the principal doctrines of revealed truth are held by the Samaritans to be the teaching of the law. For instance, they found the doctrine of a future state upon Exod. iii, 6—"I am the God of thy father, the God of Abraham, the God of Isaac, and the God of Jacob;" being the very passage quoted by the Saviour, and drawing from it the same conclusion that "he is not the God of the dead, but the God of the living" (Mark xii, 26, 27); and that of a resurrection they hold to be clearly revealed in Gen. ix, 5—"And surely your blood of your lives will I require; at the hand of every beast will I require it, and at the hand of man; at the hand of every man's brother will I require the life of man." But we cannot help thinking that the influence of Christianity is discernible in several points of modern Samaritanism, as well as of modern Judaism; and that some doctrines may be regarded as affiliated to the *Torah* rather than inducted therefrom. Their doctrine concerning the Messiah, although infinitely below the conception of the New Test., is yet far superior to that of the Jews. They never call him Messiah—that name not being in the law—but *Tahebah*, *הוֹבֵה*, or the Arabic equivalent, *Al-Mudy*, the Restorer. They believe him to be a man, a son of Joseph, of the tribe of Ephraim, according to the words of Moses (Deut. xxxiii, 16). The promise of his coming was made by Moses—"The Lord thy God will raise up unto thee a prophet from the midst of thee, of thy brethren, like unto me; unto him ye shall hearken" (Deut. xviii, 15). He is to be not a king and conqueror, but a great teacher. His mission is not to shed blood, but to heal the nations; not to make war, but to bring peace. He will restore the law to its purity, preach it to the world, and bring all the nations over to its practice. In fact, he will be a great reformer, expressly sent by the Almighty, and endowed with the necessary qualifications to perform so great and glorious a work. Following his direction, they believe that the congregation will repair to Gerizim, where, under the "twelve stones," they will find the Ten Commandments, and under the stone of Bethel the golden vessels of the temple and the manna. After one hundred and ten years the Prophet is to die and be buried beside Joseph in the valley. Soon afterwards, on the conclusion of seven thousand years from its foundation, the world is to come to an end.

3. *Synagogue*.—They themselves never call it synagogue. Sometimes they use the Arabic term *bit Allah*, house of God, but the common appellation is *kinshah*, קִנְשָׁה, place of assembly; equivalent to the Greek *συναγωγή*, and the Hebrew *בֵּית הַקִּבּוּץ*. At present they have but one, a small and unsightly building, but large enough for their community. Its extreme length measures thirty-seven feet five inches, with a breadth of eighteen feet. A part of the floor—namely, that of the right-hand division in the accompanying plan—is raised a foot higher than the remaining portion. On the left-hand side is a recess some four feet square. The ceiling is vaulted, and from it hang two very primitive chandeliers and a small oil-lamp. In the roof is a circular, dome-like window to admit light and air, the only opening besides the door. The small, square re-

Plan of the present Samaritan Synagogue.

cess is the *musbah*, or altar, which is considered to be the most sacred spot in the building. It is here the *Torah*, or Law of Moses, is kept, in the form of a roll, and in this respect the *musbah* answers to the Jewish *chel*. But it has a further sacredness attached to it. During the existence of the temple on Gerizim sacrifices were slain on the altar, but since its demolition they are considered unlawful; therefore the *musbah* takes the place of the altar, and prayer that of sacrifice. Its place in the synagogue, therefore, fronts the spot whereon the temple formerly stood, so that when the worshippers, during service, look towards the sacred recess their faces may be turned to Mount Gerizim. A large, square veil hangs continually in front of the *musbah*, in order to screen it from the gaze of the people, as no one is permitted to enter it but the two officials. The congregation consists of males only; but in this particular the Samaritans do not stand alone, as it is common to the natives of all creeds, with the exception of the few Christian Protestants in the country. Should the females wish to be present, they are at liberty to gather outside the building in the court and listen to the service, but no more. On this point Jews and Samaritans agree, but not with regard to the number necessary to constitute a congregation. With the first there must be a *minyān*—i. e. ten males of full age—present before the congregation is legal and the service can be read; but with the Samaritans there is no rule, but, like the Christian practice, it may be formed of any number met together to worship. They never assemble in the synagogue during week-days except on the feasts and fasts. On the Sabbath they have three services. The first is a short one at sunset on Friday, at which time their Sabbath commences. The second is early on the following morning, and is much the longest and most important, for during this service the law is shown. The minister takes it out of the *musbah*, removes its covering, opens the silver-gilt case in which it is kept, and exhibits to the congregation that column of the text which contains Aaron's blessing (Numb. vi, 24–27), when they step forward to kiss the sacred scroll. The last service is on Saturday afternoon a little before sunset, and consists of prayers interspersed with portions of the law, and arranged in one liturgy. The language being all Hebrew, the people understand the service but very imperfectly, the officials with one or two others excepted. It is performed in a kind of chant or cantillation most peculiar in its character. It differs nearly as much from the native Arab music as from that of Europeans, and seems to have an origin both ancient and peculiar. They have seventy different melodies, composed, according to their tradition, by the seventy elders of Israel in the time of

Moses, which they have preserved and still use on various occasions.

4. *Sacred Seasons*.—An important part of the Samaritan religion consists of the observance of certain sacred seasons. These are as follows:

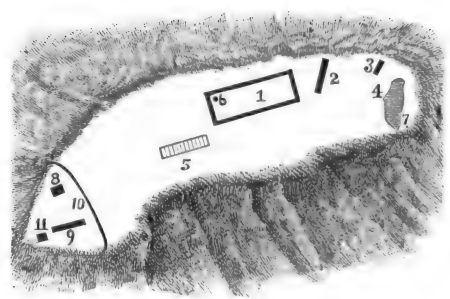

(1.) *The Sabbath*.—Like the Jews, they reckon their days from sunset to sunset, according to the expression in Genesis—"And the evening and the morning were the first day." The Sabbath, therefore, as already said, commences at sunset on Friday and ends at sunset on Saturday. This day they keep most strictly as a day of rest, upon which no manner of work is to be done, according to the words of the law in Exod. xx, 8-10. To this command they adhere most faithfully, accepting it in its literal fullness. Unlike the Jews, they employ no *goim*, or Gentiles, to light their fires or snuff their candles, but all within the gates keep the Sabbath alike. Consequently they never have any fire on that day, but scrupulously keep the command, "Ye shall kindle no fire throughout your habitations upon the Sabbath day" (Exod. xxxv, 3). Not a lamp or a candle ever burns in their houses or in the synagogue on that day. When darkness comes on during the reading of the opening service on Friday evening, they never introduce lights, but finish the service in the dark, and remain so in their houses until they retire to rest. Their first and great idea of keeping the Sabbath holy is to remain quiet—never to go out of their dwellings except to the synagogue; and the second is, to live more generously than on ordinary days, but the cooking is all prepared on Friday. Although they carefully abstain from all kind of work, even the most trifling actions, they keep no such guard on their language nor check on their thoughts, but feel at liberty to talk about anything and everything; and of a higher and purer mode of sanctifying the day they have no idea.

(2.) *The New Moon*.—Next in frequency, but not in importance, to the observance of the Sabbath is that of the new moon, the *rosh hadesh*, equivalent to the Jewish *rosh chodesh*. The new moon is sacredly watched for, and the afternoon immediately following its appearance, about half-past four, the Samaritans assemble in the synagogue to perform the appointed service. It consists of prescribed prayers composed for the occasion, intermixed with portions of the law, especially those referring to the beginning of months (Numb. x, 10; xxviii, 11-14). During the recital of the service, the whole of which lasts about two hours, the minister exhibits one of the roll-copies of the Pentateuch to the congregation.

(3.) *The Feasts and Fasts*.—The Samaritans are not given to festivals. In this they greatly differ from their Jewish brethren, as well as from some Christian communities. In the Jewish calendar there are above thirty such seasons of greater or less importance; but in the Samaritan only eight, six of which are commanded in the law, the other two being less important. These are the following:

(a.) *Karaban Aphsah*, or Jewish *הַיּוֹם הַזֶּה*, Passover. This is the memorial of their great national deliverance from Egypt (Exod. xii). The time of its celebration is the fifteenth day of their month Nisan, in the evening of the day; but should that happen to be a Sabbath, the feast is held on the previous day. Its place of celebration is Mount Gerizim, which they found upon Exod. iii, 18. Therefore, early on the morning of the fourteenth day the whole community, with few exceptions, close their dwellings in the city, and clamber up the Mount, on the top of which, and in front of the ruins of their ancient temple, they pitch their tents in a circle. The lambs, five or six in number, and "without blemish," are brought on the tenth day, and during the intervening days are carefully kept, and cleanly washed as a sort of purification to fit them for the paschal service (comp. John v, 2). On the sacred spot, near the tents, a fire is kindled, over which two

IX.—U

Plan of Mount Gerizim.

1. Fortress.
2. "Seven Steps of Adam out of Paradise."
3. "Scene of the Offering of Isaac"—a trough like that used for the paschal feast.
4. "Holy Place."
5. "Joshua's Twelve Stones."
6. "Tomb of Shalk Ghranem," or "Schechem ben-Hamor."
7. "Cave where the Tabernacle was built."
8. Hole where the paschal sheep are roasted.
9. Trench where they are eaten.
10. Platform for the celebration of the Passover.
11. Hole where the water is boiled.

caldrons full of water are placed. Another fire is kindled close by in a kind of circular pit sunk into the ground, where the lambs are to be roasted. At sunset the lambs are slaughtered by five or six young men dressed in blue robes of unbleached calico, having their loins girded, who dip their fingers in the streaming blood and with it mark the foreheads and noses of the children. The boiling water is carefully poured over the dead lambs, and, when fleeced, the right fore-legs, which belong to the priest, are removed and placed on wood already laid for the purpose, together with the entrails; salt is added, and they are then burned. The lambs are now spitted and lowered into the oven. The spit is a long pole thrust through from head to tail, near the end of which is placed a transverse peg to prevent the carcass from slipping off. At midnight the lambs are taken up, when the paschal feast commences. A large copper dish filled with unleavened cakes and bitter herbs rolled up together is brought in and distributed among the congregation, all the adults wearing a kind of girdle around their waist, with staves in their hands, according to the command (Exod. xii, 11). The lambs are then laid upon carpets and strewn over with bitter herbs, all the congregation, i. e. the men, standing in two rows, one on each side of the lambs. During all this time, a long and tedious service peculiar to the day is recited by the two officials in turn, and when the reading has arrived at a certain point, all the expectant auditors stoop at once, and, as if in haste and hunger, tear away the flesh piecemeal with their fingers, and carry portions to the females and little ones in the tents. In a few minutes the whole disappears except some fragments, which are carefully gathered up, not a particle being left, which, with the bones, are all burned in a fire kindled for that purpose (Exod. xii, 10). On the following day rejoicings continue; fish, rice, and eggs are eaten, wine and spirits are drunk, and hymns, generally impromptu, are sung. Here we may observe that those who are unable to keep the Passover on this day may do so on the same day of the following month; but this second celebration is not kept on the hill, but in their own quarter in the city.

(b.) *Moed Aphsah*, answering to the Jewish *הַיּוֹם הַזֶּה*, or Feast of Unleavened Cakes. Although this feast is intimately connected with the former, still, strictly speaking, they are two distinct solemnities, the Feast of the Passover commemorating the protection given them when the first-born of the Egyptians were slain, and that of the Unleavened Bread commemorating the beginning of their march out of Egypt. The distinction of the two feasts is more marked in the Samaritan than in the Jewish mode of their celebration. On the preceding day of the feast, every family removes all leaven-

ed bread out of its dwelling, and a most careful search is made, so that the least fragment may not remain. Thus by the evening of the fourteenth day, all leavened bread and fermented drink are laid aside, and unleavened bread alone must be used during the seven following days, according to the law (Exod. xii, 18-20). This bread they call *masut*, equivalent to the Hebrew *matsoth*; and the cake is made in the same form as the Jewish *matsoth*, except that it is a little larger, but of the same thickness. The Samaritans, like some of the strict Jews, hang up some of the cakes in their houses till the next Passover, believing them to have the power of charms in warding off evils and drawing many blessings upon the family. The first and seventh days of the feast are kept holy, according to Exod. xii, 16, but the seventh is considered the most sacred of the two. At early morn they form themselves into a procession and clamber up Gerizim, "in honor of God." There, on the sacred spot, the priest repeats the service for the day, which consists of lengthy portions of the law interspersed with prayers and songs.

(c.) *Chamsin*, the "fiftieth," equivalent to the Πεντηκοστή, *Pentecost*, of the New Test. It is thus called because it falls upon the fiftieth day after the morrow of the Sabbath of the Unleavened Bread. The Samaritans differ from the Jews in reckoning these days. The latter begin to count them from the second day of the Unleavened Bread, on whatever day of the week it may happen; but the Samaritans commence on the morrow of the Sabbath which falls within the days of that feast, and cite as their authority Lev. xxiii, 15, 16. It is kept as a day to "rejoice before the Lord their God," on account of the bounties of his providence and the liberty to enjoy them in their own promised land (Deut. xvi, 9-12). This day likewise they go up Gerizim in procession, and on the same place as before the service for the day is gone through, which contains all the references made in the law to the harvest, as well as prayers and songs.

(d.) *Arish-sheni*, similar to the Jewish *Rosh-hashanah*, and always falls on the 1st of Tisri, that month being the commencement of the civil year with the Samaritans as with the Jews. They keep this day as a holy convocation, in which no servile work is done (Lev. xxiii, 24). They attend synagogue, and the service lasts about six hours; but they neither have "blowing of trumpets," as in the Jewish synagogue, nor is the day regarded with the importance attached to it by the Jews.

(e.) *Kibburim*, equivalent to the Jewish *Yom Kippur*, יום הכיפורים, *Day of Atonement* of the Jews, which is held on the tenth day of Tishri, according to the command (Lev. xxiii, 27-32). In a strict point of view, this is the most important day in the Samaritan calendar. On the ninth day of the month, just two hours before sunset, all the community, both male and female, purify themselves by the free application of clean running water, after which they partake of the last meal before the *great fast*. The meal must be finished at least half an hour before sunset, when a rigid fast is observed until half an hour after sunset on the following day, making altogether a fast of twenty-five hours. During this time neither man, nor woman, nor child—not even the sick or suckling—is permitted to taste a morsel of bread or a drop of water. No indulgence, however trifling it may be, is permitted, and the whole fast is kept with such rigor that even medicine to the sick would on no account be administered. The day is therefore looked forward to with no little anxiety. They assemble at the synagogue a little before sunset, when the service commences and is kept up in solemn darkness through the night. It consists of the reading of the law, together with special prayers and supplications, portions of which are sung to their ancient melodies. The following morning they form a procession and visit the tombs of some of their proph-

ets, where they repeat a portion of the service, and on their return at noon it is resumed in the synagogue. As it draws to a conclusion the principal ceremony takes place—namely, the exhibition of the ancient roll of the law, believed by them to be written by Abishua, the great-grandson of Aaron. Before the roll is covered and replaced, all step forward with eagerness to kiss it, as the opportunity only occurs annually. The service is undertaken by the priest and minister alternately, with the occasional help of one of the congregation. A little after sunset the anxious and tedious duties of the solemn day are over.

(f.) *Sekuth*, the Jewish סוכות, *Tabernacles*. They begin this festival on the fifteenth day of the same month, and keep it for seven days, conforming literally to the injunctions in Lev. xxiii, 34-36, 40-43. On the eleventh day they begin the erection of the booths, which must be finished by the morning of the fourteenth. These are raised in the courts of their houses, in the open air. On each day of this feast service is held in the synagogue both morning and evening, and they make in procession a daily ascent of Gerizim, "in honor of God." No servile work is done, nor is any business transacted during these days, of which the eighth and last is held the most sacred.

Besides the sacred seasons already mentioned, they have two others of less important character. The first is *Reosh-ashena*, *Rosh-hashanah* of the Jews, the beginning of the year. It is held, not on the first day of Tishri, the beginning of the civil year, but on the first day of Nisan, the commencement of their ecclesiastical year. The day is not kept sacred, for they all follow their usual vocations; they simply attend a short service in the synagogue both morning and evening. The next is *Purim*, not, like that of the Jews, held in the month Adar to commemorate the national deliverance through queen Esther, but held in the preceding month, Shebat, in commemoration of the mission of Moses to deliver the Israelites out of Egypt.

4. *Sacred Places*.—The religious rites of Palestine, whether performed in honor of the true God or that of idols, were celebrated from the earliest ages on the top of the highest mountains. The Hebrew lawgiver felt it necessary to enjoin on the Israelites the duty of destroying all these sacred high places on their coming into possession of the land (Deut. xii, 2-5); but so deeply rooted was this form of worship in the religious feelings of Israel, as of the surrounding nations, that it proved a snare to them for many ages. It was these early sympathies that made Mount Gerizim so sacred to the children of Ephraim ever since the conquest, and in the same spirit have the Samaritans regarded it through all ages even to this day. Their great holy place is Gerizim. This mountain they hold to be the earth's centre, the house of God, the highest mountain on earth, the only one not covered by the flood, the site of altars raised by Adam, Seth, and Noah, the Mount Moriah of Abraham's sacrifice, the Bethel or Luz of Jacob's vision, and the place where Joshua erected first an altar, next the tabernacle, and finally a temple. On its slope the cave of Makkedah is also shown, though now closed up. Just as the Jew in all parts of the world turns his face in prayer towards the Temple mount at Jerusalem, so does the Samaritan to Gerizim, his temple mount. To him it is "the house of God," "the house of Jehovah," "the mountain of the world," "God's mountain," "the Sanctuary," "the mountain of the Divine Presence," and other such like titles—all flowing from their extravagant notions of its sacredness. They rarely write its name without the addition "the house of God." It was this same spirit that moved the woman of Samaria to answer the Saviour with such an air of pride—"Our fathers worshipped in this mountain" (John iv, 20). See GERIZIM.

But Samaritanism has other holy places. These are the tombs of their early prophets and holy men—viz.

Joseph, Eleazar, Ithamar, Phinehas, Joshua, Caleb, the seventy elders, and Eldad and Medad. All these, according to their tradition, are buried in the neighborhood of Shechem, and on certain occasions the congregation visit them, when portions of the law and prayers are repeated. This is especially the case with the tombs of Phinehas and Eleazar, but even more so with that of Joseph, which they visit frequently.

III. *Local Literature*.—Before giving a summary of the books of the modern Samaritans, it is necessary to remark that they are, to a certain extent, a trilingual people. Of these languages the first is Hebrew. The fact of its being the language of the Law of Moses makes it to them, as to the Jews, the *leshon hak-kodesh*, or holy tongue. All their sacred books and their religious services are therefore in Hebrew, although it is to them, with few exceptions, a dead language. The second is the Samaritan. Its basis was the Hebrew, and it was thoroughly Shemitic in framework; but its superstructure contained many anomalies, some of which were harsh and foreign. See SAMARITAN LANGUAGE. From what now remains of it, its general construction seems very simple, and not unfrequently lucid and forcible; and, as pronounced by the Samaritans, it is much more euphonious than the Arabic. Soon after the Mohammedan conquest of Palestine, it gradually lapsed into a dead language. The only literature now remaining in it consists of the forms of the Pentateuch and a few other works, above noticed. The third tongue is the Arabic, the language of their conquerors. This soon supplanted the Samaritan, and has ever since remained their vernacular, and most of their works have been translated into Arabic for the sake of such of their people as understand no other.

It is difficult, at this time, to determine to what extent the ancient Samaritan literature was developed, though there is enough evidence to show that much

mental activity existed among the people in former ages. Of their literary productions but little remains, owing in part to the destructive hand of time, but much more to the ravages they suffered during the first centuries of the Christian era, and again under the Mohammedan rule. The works now known as extant may be classified under four heads, and we arrange the lists according to the Samaritan dates, including some already enumerated under SAMARITAN LITERATURE.

1. *Theological*.—It is to this class most belong, and the first on the list is the Torah, or Law of Moses. See SAMARITAN PENTATEUCH.

Risalat Achbor Israil, a work explaining the feasts, their object, and manner of keeping them, by Eleazar, a priest who is said to have lived in the 5th century after the conquest of Palestine by the tribes. (Composed in Hebrew, of which there is an Arabic translation.)

Sharich, an exposition of the book of Exodus by various authors. (Written in Hebrew, with an Arabic translation. No date, but ancient.)

El-Amir, a commentary on portions of the law by Maraka, who flourished about fifty years before Christ. (Hebrew, with an Arabic translation.)

Sharich, an exposition of Genesis from the beginning to ch. xxviii: the author not known, but dates from the 2d century of our era. (Written in Hebrew, but, like the former, has an Arabic translation.)

El-Kafi. This is a work discussing the doctrines contained in the law, written by Joseph el-Askari, A.D. 700. (Hebrew and Arabic.)

Masail Chilaf, a work discussing the differences between the Jews and Samaritans, by Munaj Naphes ed-Din, who lived in the 12th century. (Hebrew and Arabic.)

El-Muhatal fi en-Nikahi, an explanation of the laws of marriage, by Abul-Barakat, who lived in the 12th century. (Hebrew and Arabic.)

Kitab el-Mirath, a work on the laws and regulations of wills and testaments. (Written by the same author, in Hebrew, with an Arabic translation.)

Sharich, a historical exposition of the law, showing how the ancients observed it: written by El-Habir Jacob in the 12th century. (In Hebrew only.)

Sharich, an exposition of the book of Exodus, by Ghazal ed-Dulk, of the 13th century. (In Hebrew and Arabic.)

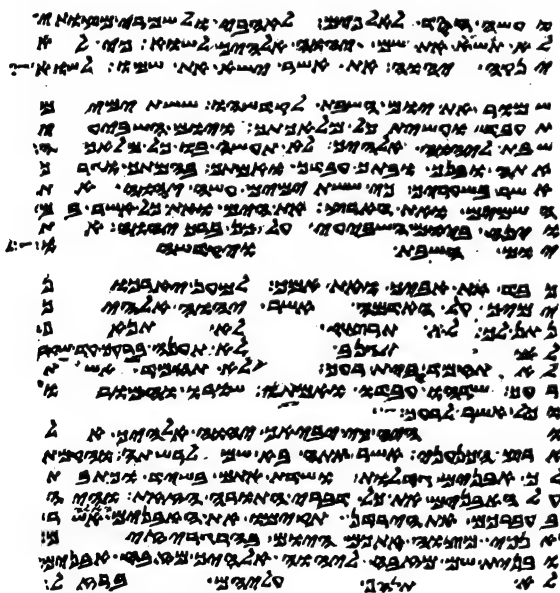

Sharich, a book explaining the blessings and cursings of the law, by Ibrahim el-Kaisi, of the 16th century. (Hebrew and Arabic.)

Risalat el-Arshad, a book on the days of the month upon which the feasts were to be held, written by Ibrahim el-Ahi, an author of the 18th century. (Hebrew and Arabic.)

Sharich, an exposition of the whole book of Genesis, written by Musalem el-Murjam, of the last century. (Hebrew and Arabic.)

Sharich, an exposition of the books of Leviticus and Numbers, by Ghazal el-Maturi, who lived in the last century. (Hebrew and Arabic.)

Sharich, a work concerning the Eternal, together with certain social points, principally marriage and the Sabbath, by Ghazal ibn-Rumiyyah. (Hebrew and Arabic, but without date.)

Specimen of an Ancient Samaritan Pentateuch. (From a Photograph.)

This is part of the so-called "Fire-tried Manuscript," belonging to a poor widow in Jerusalem named Mrs. Ducat. She lent it to a German savant named Dr. Jacob Frederic Kraus, and his essay on the manuscript is kept with it. The whole consists of 217 leaves, containing the Torah, or law, from Gen. 1, 29 to the blessing of Moses in Deuteronomy. Six leaves are added in a smaller hand on parchment at the beginning, the first being almost illegible. The real manuscript only begins at Gen. xi, 11; three leaves are added at the end for protection, after Deut. xxix, 30. The whole is much worn, and measures eleven inches by nine inches, and three inches in thickness. The text is divided into paragraphs, with verses, sentences, and words separated by a single dot. Words are not allowed to be broken by the line, but, in order to fill up the line, the last letters are farther apart, unless they form the word *Jekookah*, which is read *Eleem*. The letters are not so small as those of Abihuh's roll (the oldest at Nablis), nor so large as those of the later roll. The hand is steady and uniform. The Decalogue is not numbered by marginal letters (in this respect it resembles Abihuh's roll), and so, also, the paragraphs are neither numbered nor stated in either text. These points seem to show the Fire-tried Manuscript to be ancient (Conder, *Tent Work in Palestine*, i, 52).

2. *Liturgical*.—This class comprises all the books relating to their public and private services, such as the feasts and fasts, circumcision, marriage, and burial. They consist of passages from the Torah, interspersed with prayers and poetic compositions, the reading of which is principally performed with a kind of cantillation; hence the term *Tartil* generally applied to these books. This class is nearly as extensive as the theological, and contains much interesting matter and many beautiful passages, but the works have not yet received the attention they deserve. The most important are the services for the annual feasts and fasts, eleven in number—namely, one for the ordinary Sabbaths throughout the year; one for the two Sabbaths preceding Passover; one for the Passover; one for the days of Unleavened Bread; one for the fifty days following Passover; one for Pentecost; one for the 1st of Tisri; one for the Day of Atonement; one for the Tabernacles; one for the first day of the year, and one for the last day of the year.

All these liturgies exist only in Hebrew, as it would be unlawful to translate them into the vulgar tongue. They are all of ancient date, but the authors and compilers are unknown. See SAMARITAN LITURGY.

3. *Historical*.—In this class there are but few works; these are:

Tarik. This is the Samaritan book of Joshua, as it is generally called, and is pretty well known to European scholars since the time of Scaliger, who, in A.D. 1584, received a copy from the Samaritans of Cairo, an edition of which was brought out by Juyrboll (Leyden, 1848), with a Latin version and valuable annotations. It contains a brief history of themselves from the close of the Pentateuch down to modern times, and comprising some amount of valuable information mixed up with much that is fictitious and exaggerated.

Another historical work is extant, partly compiled from the above, by Abul-Fatah, an author of the 14th century, but is not held in esteem by the Samaritans themselves.

El-Tabak, a history of the Jews, principally relating the judgments that had befallen them; written by Abu Hassan es-Suri in the 12th century. (Hebrew and Arabic.)

Kitab es-Satir, a compendium of history from Adam to Moses. No author is named; but it is stated to have been written at the command of Moses. (Hebrew only.)

Ihlm Attawarik. This is simply a chronological table according to the Samaritan dates, extending from the creation of man to the present time. It is well known that the Samaritan copy of the Pentateuch differs in its dates from both the Jewish Hebrew text and the Sept. version, thus causing a difference in the date of all subsequent historical events. Independently of this, there is a further difference between this table and all other accepted data down to the commencement of the Christian era. For example, the entrance of the Israelites into Canaan took place, according to common chronology, in A.M. 2553; but, according to the Samaritan, it was in 2794, making a difference of 241 years. The same chronology gives the age of the world at the commencement of the Christian era as 4438-A.M., while the accepted date is 4004, thus making a difference of 434 years. But from this period the table generally agrees with our ordinary chronology.

4. *Scientific*.—Under this head may be comprised the following:

El-Chubs, an astronomical work treating of the rules regulating the first month of the year, and the conjunctions of the sun and moon. It was written, we are told, under the direction of Adam. (Hebrew.)

Risalat. This is a sort of exposition of the former work, written by several authors, but whose names and times are unknown. (Hebrew and Arabic.)

To the foregoing list may be added the following works extant and known in Europe, but not now in the possession of the Samaritans themselves—viz. Ghazal and Zadaka on parts of the law; Abul-Hassan and Zadaka el-Isra'ili on religion and ceremonies; and Abu Said and Abu Irshak Ibrahim on language and grammar.

Sam'atus (Σαματός; Vulg. *Semedius*), given in the Apocrypha (1 Esdr. ix, 34) as the name of the fourth of the six sons of Osora (i. e. Abiah or Mochnadebai) among those Israelites who had married foreign wives after the captivity; but the Heb. list (Ezra x, 41, 42) contains the names Shelemiah, Shemariah, and Shallum in the corresponding place.

Samavarti, in Hindû mythology, is an appellation of Dhâma, the god of the under-world, who judges the dead and separates the good from the wicked.

Samba, in Hindû mythology, was a son of Vishnu in the avatar of Krishna, born of Dshamty, the beautiful daughter of the king of the bears. Samba, guided by the counsel of his father, and in order to avert the infliction of a threatening curse to which he had imprudently exposed himself, built a city, to which he gave his own name, and introduced in it the worship of the sun, to which he gathered the priests by conveying them on the saddle-horse Garudha, which was sacred to Vishnu.

Sambation, a river mentioned in the Talmud as flowing during the first six days of every week and drying up on the Sabbath. The rabbins are not agreed as to the situation of the river, some placing it on the borders of Ethiopia and some in India. See SABBATICAL RIVER.

Sam-beid, or **Saman Veda**, is the Hindû title of the third section of the Vedas (q. v.).

Samber, in Hindû mythology, is an evil demon and king of giants, who brought under his power the beautiful Reti, consort of the god of love, and sought to win her for himself, but was defeated by Kamadewa, the son of Krishna.

Sambhara, synonymous with SAMBER (q. v.).

Sambhava, in Hindû mythology, is the third of the twenty-eight Buddhas who have hitherto appeared to save the world. His symbol is a horse, which therefore constantly appears with him in the representations.

Sambiasi, FRANCESCO, an Italian missionary to China, was born at Cosenza in 1582, and died in 1649.

Sa'mech (prop. *Sa'mek*, ס; fully סָמֶךְ, a prop), the fifteenth letter of the Heb. alphabet (Psa. cxix, 118). See ACROSTIC.

Same'ius (Σαμείος, v. r. Σαμαῖος and Θαμαῖος), a corrupt Greek form (1 Esdr. ix, 21) of the name SHEMAIAH (q. v.) of the Heb. text (Ezra x, 21).

Samerius, HENRY, a Jesuit, was born in France in 1540. For some time he was confessor to Mary queen of Scots. He died about 1610. He was the author of a work entitled *Chronologia Sacra*.

Sam'gar-ne'bo (Heb. *Samgar' Nebu'*, סַמְגַר־נְבוֹ, sword of Nebo, or perhaps conqueror of Nebo; Sept. Σαμαγάδ, v. r. Σαμαγῶς, Σαμαγάρ), one of the princes or commanders of Nebuchadnezzar's army against Jerusalem at its downfall (Jer. xxxix, 3). B.C. 589. The *Nebo* (q. v.) is the Chaldean Mercury; about the *Samgar*, opinions are divided. Von Bohlen suggested that from the Sanscrit *sangara*, "war," might be formed *sângara*, "warrior," and that this was the original of Samgar. Fürst suggests that *nebo* should perhaps be joined to the following word Sarsechim (q. v.), as in the Sept., since it is contrary to analogy for this to stand at the end of a name. See NEBUCHADNEZZAR, etc. As in ver. 13 the chief of the eunuchs is called NEBU-SHAS-BAN, it has been supposed that Nebu-Sarsechim is only another name of the same person, and that Samgar is but a name of his office. It may be compounded of the Persian *cham*, "a cup," and *kar*, a derivative particle, and so be equivalent to *cup-bearer*, or *Rabsakeh* (q. v.).

Sa'mi (Σαμί, v. r. Σαβεί, Τωβίς; Vulg. *Tobi*), a corrupt Greek form (1 Esdr. v, 28) of the name SHOBAI (q. v.) of the Heb. list (Ezra ii, 42).

Sami, a species of hard-wood which the Hindûs employ in kindling the sacrificial fire. They believe that it contains a mysterious internal heat which must be called forth by rubbing, and the fire for sacrificial uses is accordingly never produced by any other method.

Samia, in Greek mythology, is (1) a daughter of the river-god Meander, who was married to Anceus, the son of Neptune and Astypalea, and king of the Leleges, to whom she bore Perilaus, Enudus, Samus, and Alitherses—ancestral heroes of the Samians—and also Parthenope; (2) a surname of *Juno*, derived from Samos, where a primitive statue in the Egyptian style, the work of Smilis, was erected in her honor.

Sa'mis (Σαμῖς, v. r. Σομείς), a Greek form (1 Esdr. ix, 34) of the name SHIMEI (q. v.) of the Heb. list (Ezra x, 38).

Samius, in Greek mythology, is an appellation of Neptune, from his temple on Samos.

Sam'lah (Heb. *Samlah'*, סַמְלָה, a garment; Sept. Σαλαμά, Σαμαά, v. r. Σαμαδά, Σεβλά), a king who reigned in Edom before the Israelites had a king (Gen. xxxvi, 36, 37; 1 Chron. i, 47, 48). B.C. post 1618. He was the successor of Hadad or Hadar, and was of Masrekah, that being probably the chief city during his reign. This mention of a separate city as belonging to

each (almost without exception) of the "kings" of Edom suggests that the Edomitish kingdom consisted of a confederacy of tribes, and that the chief city of the reigning tribe was the metropolis of the whole.

Sammael, a daemon among the modern Jews, most commonly styled the Angel of Death. The rabbins allege that the removal from the present life of those who die in the land of Israel is assigned to Gabriel, whom they call an Angel of Mercy, while those who die in other countries are despatched by the hand of Sammael, the prince of demons. Several of the rabbins confidently assert that the latter has no power over the Jews, and God himself is represented as saying to him, "The world is in thy power except this people. I have given thee authority to root out the idolaters; but over this people I have given thee no power."

Sammans (SCHAMANS). See SHAMANS.

Sammim. See SPICE.

Sam'mus (Σαμμοῦς v. r. Σαμμού), a corrupt Greek form (1 Esdr. ix, 43) of the name ΣΗΜΑ (q. v.) of the Heb. text (Neh. viii, 4).

Samoan (or NAVIGATOR'S) **Islands**, a group of nine inhabited islands, with some islets, in the Pacific Ocean, lying north of the Friendly Islands; population in 1869, 35,107. The soil, formed chiefly by the decomposition of volcanic rock, is rich, and the climate is moist. Among the Polynesian Islands, the inhabitants of the Samoan group rank, in personal appearance, second only to the Tongese. They are well formed, and easy and graceful in their movements. Polygamy is customary, but two wives seldom live in the same house. Women are considered the equals of men, and both sexes join in the family labor. The ancient religion of the islanders acknowledged one great God, but less worship was paid to him than to some of their war-gods. They had, besides, a god of earthquakes, a god who upheld the earth, and gods of hurricanes, rain, and lightning, and also many inferior gods, who guarded certain localities. They also worshipped certain chiefs, to whose memory they erected carved blocks of wood and stone. The first missionaries landed in Savaii in 1830 from the Society Islands, and, in 1836, were joined by others from England. The first Roman Catholic missionaries arrived in 1846. The inhabitants are all now nominally Christians. There are schools and a church in every village. The children can generally read in their own language at the age of seven years, and most of the adult population can read and write. The Bible has been translated and printed, as have hymn-books and other works, at the missionary printing-office. In 1869, the population was divided, denominationally, as follows: Independents and Presbyterians, 27,021; Wesleyans, 5082; Roman Catholics, 3004.

Samoan Version. The Samoan belongs to the Polynesian or Malayan languages, and is spoken in Samoa, or Navigator's Islands. The translation of the Scriptures into that language appears to have been undertaken, in the first place, by the Rev. John Williams, assisted by other missionaries of the London Missionary Society, who, after the death of Williams, continued and completed it. In 1842 the Gospel of John was published, followed, in 1845, by the Gospel of Luke, translated by Macdonald, and the Epistle to the Romans, translated by Heath. In 1846, the entire New Test., including a revised translation of the Gospel of Matthew, was completed at press. In 1848, the missionaries sent a revised copy of the New Test. to London, and an edition of 15,000 copies was printed by the British and Foreign Bible Society. In the year 1855, the translation of the Old Test. was completed and printed; and as to the particulars concerning this great work, we will quote the words of the Report (1856, p. clxiv):

"Previous to the completion of the New Test. some

progress had been made in the translation of the Old; and, in 1848, an edition of 10,000 copies of the book of Psalms was put through the press, bound, and circulated.

"In 1849, editions of 10,000 each of the books of Genesis and Exodus were printed; and in 1850 Leviticus, Numbers, and Deuteronomy were also printed, in editions of 7000 copies each. The Pentateuch was then bound in one volume.

"In 1853, editions of 5000 each of the books from Joshua to 2 Samuel inclusive were printed, and in 1854 the remaining historical books; and the whole were bound up in one volume, forming the second volume of the historical books.

"In the same year, editions of 3500 each of the books of Solomon, the Lamentations, and the minor prophets were put through the press; and in March of the present year Ezekiel and Daniel were in circulation, Isaiah in the press, and Job ready for it. The only remaining book to be revised was Jeremiah; so that before this time the whole of the Old and New Test. will have been completed and printed. The book of Job, with those of Solomon and the Prophets, will, besides the book of Psalms, form the third volume of the Old Test.

"The plan adopted in translation has been to assign to individuals separate books or portions for most careful translation. These portions have been further submitted to the criticisms of the other members of our Mission, and finally revised for the press by a committee of not less than five, including the translators, and then printed in every respect according to the decision of the committee.

"In the Old Test., our translations have been made from the Hebrew text sent out to us by the British and Foreign Bible Society, and executed agreeably to the rules of the Society. Our English Authorized Version has been constantly before us, and adhered to as nearly as possible. Constant reference has been made to the Septuagint and Vulgate, and the best use made of the various Polynesian translations. With regard to the lexicography, criticism, and renderings of the sacred text, we have availed ourselves of the labors of Rosenmüller, Gesenius, Lee, Ainsworth, Blayney, Henderson, Lowth, Dathe, Patrick, Good, etc.

"These translations and revisions have cost the members of our Mission many years of patient thought and labor; and it is a cause of great and most devout thankfulness to God that some of us who commenced the work on the Samoan group, and have from the beginning taken a part in the translating of the Sacred Word into its language, have lived to be engaged in it to its completion. To the great Head of the Church, who has enabled us to put this invaluable boon into the hands of the Samoan people, be all the praise."

Since that time new revised editions have been published. The last edition of the entire Bible left the press at London in 1873, under the editorship of the Rev. Dr. Turner. (B. P.)

Samogitian Version. The Samogitian is a dialect of the Lithuanian language, spoken in three districts of Lithuania—namely, Telcha, Schaul, and Rosina. The Samogitians number about 112,000 individuals, and are, with few exceptions, of the Roman Catholic persuasion, whence it is also called the "Catholic dialect." In 1814, the New Test. had been for the first time translated into this dialect by prince Gedroitz, bishop of Samogitia, who designed to print one thousand copies at Wilna at his own expense. In 1816, a second edition left the press, and in 1831 a third one, printed by the monks in the monastery of St. Cazimir at Wilna. Of the Old Test. nothing has as yet been translated into this dialect. Comp. Dalton, *Das Gebet des Herrn in den Sprachen Russlands*, p. 41, 79; *The Bible of Every Land*, p. 313. (B. P.)

Samoiede (or **Samoyed**) **Mythology**, the religious system of three Arctic tribes which persist in heathenism, despite repeated efforts to convert them to Christianity. Their supreme being, who is regarded as the creator and director of the universe, is called *Num*. Innumerable subordinate spirits or gods, called *Tatebi*, are acknowledged, who combine both good and evil qualities in their natures. The priests govern the elements and control the health of human beings. They perform ceremonies in connection with births, marriages, and deaths. The Samoiede build temples, but do not set up representations of *Num* in them, as he is held to be invisible. The only images are those of subordinate deities.

Samokrestschentsi. See SAMOKRISCHITCHINA.

Samokrischtchina, a sect of Russian dissenters, whose name signifies "self-baptizers," and expresses the peculiarity by which they are distinguished from other Raskolniks.

Samonas, archbishop of Gaza, flourished about 1056. His known work is *Discussion with Achned concerning the Real Presence of Christ's Body and Blood in the Sacrament*, found in *Bibl. Max. Patr.* xviii, 577; *Gr. and Lat. in Bibl. Patr. Gullaudi*, xiv, 225.

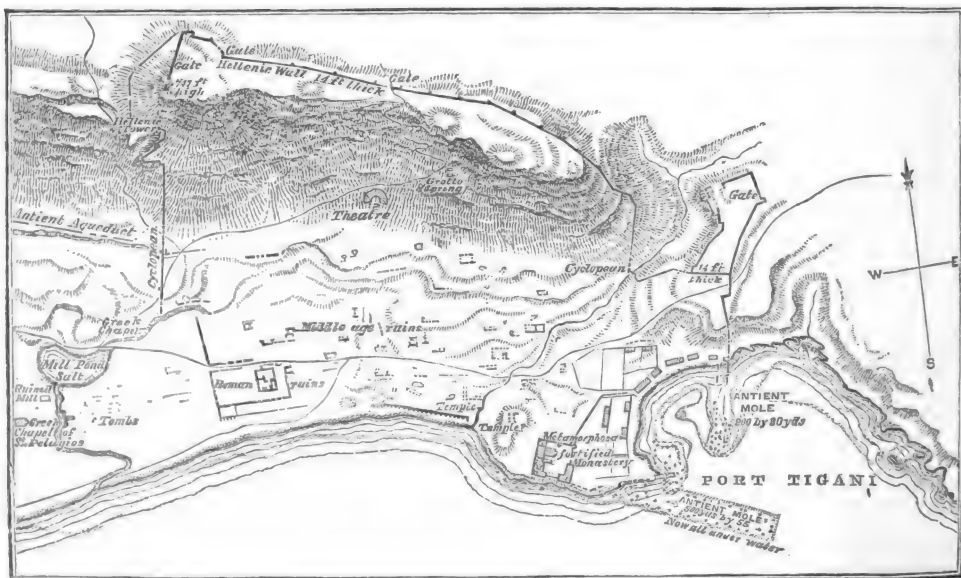

Sa'mos (Σάμος, distinguished), a noted island in the Ægean Sea, near the coast of Lydia, in Asia Minor, and separated only by a narrow strait from the promontory which terminates in Cape Trogyllium. This strait, in the narrowest part, is not quite a mile in width (Pliny, *Hist. Nat.* v, 34; Strabo, xiv, 634; comp. Leake, *Map of Asia Minor*). For its history, from the time when it was a powerful member of the Ionic confederacy to its recent struggles against Turkey during the war of independence, and since, we must refer to Smith's *Dict. of Gr. and Rom. Geog.* s. v. Samos is a very lofty and commanding island; the word, in fact, denotes a height, especially by the sea-shore: hence, also, the name of Samothracia, or "the Thracian Samos," for another similar island. Samos was illustrious at a period of remote antiquity, and was at one time mistress of the sea, but its greatness was of no long duration. Tradition ascribes the birth of Pythagoras to this island, and Creophilus, said to be the son-in-law of Homer, and himself a poet of no mean pretensions, was also a Samian. The period during which Samos enjoyed the greatest prosperity was that occupied by the government of Polycrates, who made himself master of many among the surrounding islands. The island fell subsequently under the Athenian dominion, and was considered as one of the most valuable dependencies of Athens. The people of Samos were especially worshippers of Juno or Hera, and her temple, called the Heraeion, was enriched by some of the finest works of art known in Greece, particularly statues by Myron, Polycleus, and Praxiteles. The chief manufacture carried on by the inhabitants was that of pottery, the Samian ware being celebrated all over the civilized world. It was made of a fine smooth clay of a deep red color, and many specimens of it remain to adorn the cabinets of archaeologists. It must be borne in mind, however, that the term Samian ware was soon applied to all of a similar character, wherever fabricated, just as at the present time all por-

celain is called by the general name of china. The island is sometimes stated to have been famous for its wines, but, in fact, the wine of Samos was in ill repute. Strabo says expressly that the island was *ὀκρὸν εἶδος*. It now, however, ranks high for its Levantine wine, which is largely exported, as are also grapes and raisins. Samos, which is still called *Samo*, contained, some years ago, about 60,000 people, inhabiting eighteen large villages and about twenty small ones. Vathi is the chief town of the island in every respect, except that it is not the residence of the governor, who lives at Colonna, which takes its name from a solitary column (about fifty feet high and six in diameter), a remnant of the ancient Temple of Juno, of which some insignificant remains are lying near. Various travellers (Clarke, Tournefort, Pococke, Dallaway, Ross) have described this island. See also Georgiannes, *Description of Samos*, etc. (Lond. 1678); Panofka, *Res Samiorum* (Berlin, 1822); and especially Guérin, *Description de l'Île de Patmos et de l'Île de Samos* (Paris, 1856).

Coin of Samos.

Samos is briefly referred to in two places in Scripture. The Romans wrote to the governor in favor of the Jews, in the time of Simon Maccabæus (1 Macc. xv, 23), and Paul touched there when going to Jerusalem, on his return from his third missionary journey (Acts xx, 15). He had been at Chios, and was about to proceed to Miletus, having passed by Ephesus without touching there. The topographical notices given incidentally by Luke are most exact. The night was spent at the anchorage of Trogyllium, in the narrow strait between Samos and the extremity of the mainland ridge of Mycale. This spot is famous both for the great battle of the old Greeks against the Persians in B.C. 479, and also for a gallant action of the modern Greeks against the Turks in 1824. Here, however, it is more natural (especially since we know, as above from 1 Macc. xv, 23, that Jews resided

Port Tigani, the Ancient Harbor of Samos.

Va., in Nov., 1814. At the age of sixteen he was placed in the family of his uncle, the Rev. Thornton Rogers, of Albemarle. Finding himself now in a religious atmosphere, he was induced to seek earnestly the salvation of his soul, made a profession of religion, and became a member of the Church in Charlottesville, Aug. 13, 1831. He graduated at the University of Virginia in 1836; subsequently studied theology at the Union Theological Seminary of Virginia; and, on the resignation of Prof. Ballantine, in the spring of 1838, was appointed teacher of Hebrew, and from that time continued to perform other duties of the Oriental department; was licensed by the East Hanover Presbytery in Oct., 1839, and ordained as an evangelist by the same presbytery in Oct., 1841. In the summer of 1848 he visited Europe, spending his time chiefly at the universities of Halle and Berlin in the prosecution of his Oriental studies, and returned in August, 1849. In Oct., 1848, he was elected professor of Oriental literature and languages in the Union Theological Seminary, Virginia, and in 1849 received the degree of D.D. from Hampden Sidney College. He died April 9, 1854. In 1851 Dr. Sampson delivered, at the University of Virginia, a lecture on *The Authority of the Sacred Canon, and the Integrity of the Sacred Text*, which was afterwards published, in connection with the series of which it formed a part; and in 1856 there was published, under the editorial supervision of his successor, Dr. Dabney, *A Critical Commentary on the Epistle to the Hebrews*. One of Dr. Sampson's most striking and valuable traits was his methodical industry. "That whatever is worth doing is worth doing well; that each task must be done with one's might in just so much time as is needed to do it perfectly, and no more; that no task is to be left till all is perfected which can be done to advantage—these were the rules of working which he carried with him from the time of his boyhood to the school, the university, the study, and the lecture-room." He was eminently conscientious in everything. Family prayers were, in his house, no hurried, unmeaning form. The whole air and tone of the exercise showed deep, conscientious sincerity and earnestness. As an instructor, Dr. Robert L. Dabney says of him, "I hesitate not to say that, as a master of the art of communicating knowledge, he was, in my view, unrivalled;" and again, "One of the foundation-stones of his success was his indisputable scholarship. No man ever passed through one of his classes without a profound and admiring conviction of this." See Sprague, *Annals of the American Pulpit*, iv, 795; Allibone, *Dict. of British and American Authors*, s. v. (J. L. S.)

Sampson, Henry, a Nonconformist divine, was born in Nottinghamshire, and studied at Leyden and Padua. He was ejected at the Reformation, and subsequently became an eminent London physician. He died in 1705. He published an edition of Porter on *Divine Grace*, and prepared materials for a history of Nonconformists.

Sampson, Richard, LL.D., Bishop of Chichester in 1536. He was transferred to Coventry and Lichfield, 1542-43, and died at Eccleshall, 1554. He is the author of *Commentary on Romans*, etc. (Lond. 1546, 8vo):—*Regii Sacelli* (4to).

Sampson, Thomas, a Puritan divine, was born (according to Strype) at Playford, in Suffolk, 1517, and educated at Oxford. He was ordained by archbishop Cranmer and bishop Ridley; was chaplain in the army of Lord Russell. In 1551 he was preferred to the rectory of All-hallows, London, and, in 1554, to the deanery of Chichester. During the reign of Mary he resided in Strasburg. Returning home on the accession of Elizabeth, he refused the bishopric of Norwich, because dissatisfied with the nature of the office. In Sept., 1560, he was made prebendary of Durham, and in Michaelmas term, 1561, he was installed dean of Christ Church, Oxford. So open and zealous was he against clerical

habits that in 1564 he was deprived of his deanery, and for some time imprisoned. Notwithstanding his non-conformity, he was presented, in 1568, with the mastership of Wigston Hospital at Leicester, and had, according to Wood, a prebend in St. Paul's. He resided at Leicester until his death, April 9, 1589. He married bishop Latimer's niece, by whom he had two sons, John and Nathaniel. Besides editing two *Sermons of John Bradford* (1574, 8vo), a translation into English of a *Sermon of St. Chrysostom* (1550, 8vo), he published several *Letters*, and a *Brief Collection of the Church and Ceremonies thereof* (1592, 16mo).

Sam'son (Heb. *Shimshon*, שִׁמְשׁוֹן, *sunlike, shining*; Sept. and N. T. Σαμψών, and so Josephus, *Ant.* v, 8, 4, according to whom, however, the word means "strong;" if the root *shemesh* has the signification of "awe," which Gesenius ascribes to it, the name Samson would seem naturally to allude to the "awe" and "astonishment" with which the father and mother looked upon the angel who announced Samson's birth [see Judg. xiii, 6, 18-20]), the name of the celebrated champion, deliverer, and judge of Israel, equally remarkable for his supernatural bodily prowess, his moral infirmities, and his tragical end (B.C. 1185-65). His career is one of romantic interest, and affords valuable lessons in the relations and condition of the Hebrew people.

1. *History*.—Samson was the son of Manoah, of the tribe of Dan, and was born, B.C. cir. 1200, of a mother whose name is nowhere given in the Scriptures. The circumstances under which his birth was announced by a heavenly messenger gave distinct presage of an extraordinary character, whose endowments were to be of a nature suited to the providential exigencies in which he was raised up. The burden of the oracle to his mother, who had long been barren, was that the child with which she was pregnant was to be a son, who should be a Nazarite from his birth, upon whose head no razor was to come, and who was to prove a signal deliverer to his people. She was directed, accordingly, to conform her own regimen to the tenor of the Nazarite law, and strictly abstain from wine and all intoxicating liquor, and from every species of impure food. According to the "prophecy going before upon him," Samson was born in the following year; and his destination to great achievements began to evince itself at a very early age by the illapses of superhuman strength which came, from time to time, upon him.

As the position of the tribe of Dan—bordering upon the territory of the Philistines—exposed them especially to the predatory incursions of this people, it was plainly the design of Heaven to raise up a deliverer in that region where he was most needed. The Philistines, therefore, became very naturally the objects of that retributive course of proceedings in which Samson was to be the principal actor, and upon which he could only enter by seeking some occasion of exciting hostilities that would bring the two peoples into direct collision. Such an occasion was afforded by his meeting with one of the daughters of the Philistines at Timnath, whom he besought his parents to procure for him in marriage, assigning as a reason that she "pleased him well"—Heb. יִשְׂרָאֵל בְּעֵינֵי הוּאָ, *She is right in mine eyes*; not beautiful, engaging, attractive, but right relative to an end, purpose, or object (see Gousset, *Lexicon*, s. v. יִשְׂרָאֵל, and comp. 2 Sam. xvii, 4; 1 Kings ix, 12; 2 Chron. xii, 30; Numb. xxviii, 27). That he entertained a genuine affection for the woman, notwithstanding the policy by which he was prompted, we may, doubtless, admit; but that he intended, at the same time, to make this alliance subservient to the great purpose of delivering his country from oppression, and that in this he was acting under the secret control of Providence, would seem to be clear from the words immediately following, when, in reference to the objection of his parents to such a union, it is said that

they "knew not that it was of the Lord that he sought an occasion against the Philistines." It is here worthy of note that the Hebrew, instead of "*against* the Philistines," has "*of or from* the Philistines," apparently implying that the occasion sought should be one that *originated* on the side of the Philistines. This occasion he sought under the immediate prompting of the Most High, who saw fit, in this indirect manner, to bring about the accomplishment of his designs of retribution on his enemies. His leading purpose in this seems to have been to *baffle the power of the whole Philistine nation by the prowess of a single individual*. The champion of Israel, therefore, was not appointed so much to be the leader of an army, like the other judges, *as to be an army in himself*. In order, then, that the contest might be carried on in this way, it was necessary that the entire opposition of the Philistines should be concentrated, *as far as possible, against the person of Samson*. This would array the contending parties in precisely such an attitude as to illustrate most signally the power of God in the overthrow of his enemies. But how could this result be brought about except by means of some *private quarrel* between Samson and the enemy with whom he was to contend? And who shall say that the scheme now projected was not the very best that could have been devised for accomplishing the end which God had in view? To what extent Samson himself foresaw the issue of this transaction, or how far he had a plan *distinctly laid*, corresponding with the results that ensued, it is difficult to say. The probability, we think, is that he had rather a *general strong impression*, wrought by the Spirit of God, than a *definite conception* of the train of events that were to transpire. It was, however, a conviction as to the issue sufficiently powerful to warrant both him and his parents in going forward with the measure. They were in some way assured that they were engaged in a proceeding which God would *overrule* to the furtherance of his designs of mercy to his people and of judgment to their oppressors. From this point commences that career of achievements and prodigies on the part of this Israelitish Hercules which, passing gradually from the wonderful to the miraculous, rendered him the terror of his enemies and the wonder of all ages.

(1.) On his first visit to his future bride, he slew a lion without weapons; and on his second visit, to espouse her, he found the skeleton, denuded of the flesh by the birds and jackals, occupied by a swarm of bees (Judg. xiv, 1-8). The strange incident of a Nazarite eating honey out of the carcass of a dead lion has been examined by Theodoret (*Quest. in Jud.* 22). We must not attribute too scrupulous views to the times of the Judges. It is worthy of remark, however, that Josephus (*Ant.* v, 8, 6) says nothing of the eating of this honey by Samson and his parents.

(2.) At his wedding-feast, the attendance of a large company of paranympths, or friends of the bridegroom, convened ostensibly for the purpose of honoring his nuptials, but in reality to keep an insidious watch upon his movements, furnished the occasion of a common Oriental device for enlivening entertainments of this nature. He propounded a riddle, the solution of which referred to his obtaining a quantity of honey from the carcass of a slain lion; and the clandestine manner in which his guests got possession of the clue to the enigma cost thirty Philistines their lives (Judg. xiv, 10-20).

(3.) The next instance of his vindictive cunning was prompted by the ill-treatment which he had received at the hands of his father-in-law, who, upon a frivolous pretext, had given away his daughter in marriage to another man, and was executed by securing a multitude of foxes, or rather *jackals* (שׁוּאִלִּים, *shualim*), and by tying firebrands to their tails, setting fire to the cornfields of his enemies. (See the Latin monographs on this subject by Hilliger [Viteb. 1674], Gasser [Halle, 1751], and Vriemot [Franc. 1738].) The indignation

of the Philistines, on discovering the author of the outrage, vented itself upon the family of his father-in-law, who had been the remote occasion of it, in the burning of their house, in which both father and daughter perished. This was a fresh provocation, for which Samson threatened to be revenged; and, thereupon falling upon them without ceremony, he smote them, as it is said, "hip and thigh, with a great slaughter" (Judg. xv, 1-8). The original, strictly rendered, runs, "he smote them leg upon thigh"—apparently a proverbial expression, and implying, according to Gesenius, that he cut them to pieces so that their limbs—their legs and thighs—were scattered and heaped promiscuously together; equivalent to saying that he smote and destroyed them *wholly, entirely*. Mr. Taylor, in his edition of Calmet, recognises in these words an allusion to some kind of *wrestling combat*, in which, perhaps, the slaughter on this occasion may have commenced.

(4.) Having subsequently taken up his residence in the rock Etam, he was thence dislodged by consenting to a pusillanimous arrangement on the part of his own countrymen, by which he agreed to surrender himself in bonds, provided *they* would not themselves fall upon him and kill him. He probably gave in to this measure from a strong inward assurance that the issue of it would be to afford him a new occasion of taking vengeance upon his foes. Being brought, in this apparently helpless condition, to a place called, from the event, *Lehi*, a *jaw*, his preternatural potency suddenly put itself forth; and, snapping the cords asunder, and snatching up the jawbone of an ass, he dealt so effectually about him that a thousand men were slain on the spot. That this was altogether the work, not of man, but of God, was soon demonstrated. Wearied with his exertions, the illustrious Danite became faint from thirst; and, as there was no water in the place, he prayed that a fountain might be opened. His prayer was heard: God caused a stream to gush from a hollow rock hard by; and Samson, in gratitude, gave it the name of *En-hakker*, a word that signifies "the well of him that prayed," and which continued to be the designation of the fountain ever after. The place received its name from the circumstance of his having then so effectually wielded the *jawbone* (לֶחִי, *Lehi*) (Judg. xv, 15 sq.; see Bauer, *Heb. Myth.* ii, 65; *Ausführl. Erklär. des W.* ii, 57; comp. Judg. iii, 31; 2 Sam. xxiii, 8, 18). The springing-up of a fountain in the jawbone (ver. 19) has given great trouble to the interpreters; and some would remove the passage from the text, or give it a very different meaning. The most common is to render *lechi*, לֶחִי, not *jawbone*, but *Lehi*, the name of a place in which the fountain sprang up; and *maktêsh*, מַכְתֶּשֶׁת, not *the socket of the tooth*, but the rift of the rock from which the water came. So the Targum, and Josephus (*Ant.* v, 8, 9; comp. Clericus in loc.; Orlob, *De Fonte Simsonis prope Maxillam* [Leips. 1703]; Deyling, *Observat. Sacr.* i, 113 sq.; Büsing, in the *Biblioth. Hagana*, ii, 505 sq.; Herder, *Geist der ebr. Poesie*, ii, 235, 255; Rosenmüller, *Schol.* in loc.). It would seem that *Lehi* refers back to ver. 15, and the rendering of *maktêsh* is assumed. It would be easier, with Studer, to take *Lehi* for the name of a wall of rock, an opening in which was called *maktêsh*, *tooth-cavity*. Yet it seems to be doubtful whether *maktêsh* alone could have this meaning. (See in general Gesenius, *Thesaur.* ii, 752.) Heine (*Dissertat. Sacr.* p. 241 sq.) opposes another exegetical attempt on this passage, and clings to the entire miracle. Comp. Bochart, *Hieroz.* i, 171 sq.). See LEHI.

(5.) The Philistines were from this time held in such contempt by their victor that he went openly into the city of Gaza, where he seems to have suffered himself weakly to be drawn into the company of a woman of loose character, the yielding to whose enticements exposed him to the most imminent peril (Judg. xvi, 1-3). His presence being soon noised abroad, an attempt was made during the night forcibly to detain him by clos-

ing the gates of the city, and making them fast; but Samson, apprised of it, rose at midnight, and, breaking away bolts, bars, and hinges, departed, carrying the gates upon his shoulders to the top of a neighboring hill *that looks towards Hebron* (כל פני חברון; Sept. ἐπὶ προσώπου τοῦ Χεβρών, *facing Hebron*). The common rendering, "before Hebron," is less appropriate, as the distance between the two cities is at least twenty miles. The hill lay, doubtless, somewhere between the cities, and in full view of both. See GAZA.

(6.) After this his enemies strove to entrap him by guile rather than by violence, and they were too successful in the end. Falling in love with a woman of Sorek, named Delilah, he became so infatuated by his passion that nothing but his bodily strength could equal his mental weakness. (But see Oeder, *De Simsone Casato* [Ould. 1718].) The princes of the Philistines, aware of Samson's infirmity, determined by means of it to get possession, if possible, of his person. For this purpose they propose a tempting bribe to Delilah, and she enters at once into the treacherous compact. She employs all her art and blandishments to worm from him the secret of his prodigious strength. Having for some time amused her with fictions, he at last, in a moment of weakness, disclosed to her the fact that it lay in his hair, which, if it were shaved, would leave him a mere common man. Not that his strength really lay in his hair; for this, in fact, had no natural influence upon it one way or the other. His strength arose from his relation to God as a Nazarite; and the preservation of his hair unshorn was the *mark*, or *sign*, of his Nazariteship, and a *pledge*, on the part of God, of the continuance of his miraculous physical powers. If he lost this sign, the badge of his consecration, he broke his vow, and consequently forfeited the thing signified. God abandoned him; and he was thenceforward no more, in this respect, than an ordinary man. His treacherous paramour seized the first opportunity of putting his declaration to the test. She shaved his head while he lay sleeping in her lap; and, at a concerted signal, he was instantly arrested by his enemies lying in wait. Bereft of his grand endowment, and forsaken of God, the champion of Israel could now well adopt the words of Solomon: "I find more bitter than death the woman whose heart is snares and nets, and her hands are bands; whoso pleaseth God shall escape from her; but the sinner shall be taken by her." Having so long presumptuously played with his ruin, Heaven leaves him to himself, as a punishment for his former guilty indulgence. He is made to reap as he had sown, and is consigned to the hands of his relentless foes. His punishment was indeed severe, though he amply revenged it, as well as redeemed, in a measure, his own honor, by the manner in which he met his death. The Philistines, having deprived him of sight, at first immured him in a prison, and made him grind at the mill like a slave (Judg. xvi, 4-21). As this was an employment which, in the East, usually devolves on women, to assign it to such a man as Samson was virtually to reduce him to the lowest state of degradation and shame. To grind corn *for others* was, even for a woman, a proverbial term expressive of the most menial and oppressed condition. How much more for the hero of Israel, who seems to have been made grinder-general for the prison-house! (See Lehmann, *De Simsone Molitore* [Viteb. 1711].)

(7.) In process of time, while remaining in this confinement, his hair recovered its growth, and with it such a profound repentance seems to have wrought in his heart as virtually reinvested him with the character and the powers he had so culpably lost. Of this fact his enemies were not aware. Still exulting in their possession of the great scourge of their nation, they kept him, like a wild beast, for mockery and insult. On one of these occasions, when an immense multitude, including the princes and nobility of the Philistines, were convened in a large amphitheatre to celebrate a

feast in honor of their god Dagon, who had delivered their adversary into their hands, Samson was ordered to be brought out to be made a laughing-stock to his enemies, a butt for their scoffs, insults, mockeries, and merriment. Secretly determined to use his recovered strength to tremendous effect, he persuaded the boy who guided his steps to conduct him to a spot where he could reach the two pillars upon which the roof of the building rested (see Thomson, *Land and Book*, ii, 343). Here, after pausing for a short time while he prefers a brief prayer to Heaven, he grasps the massy pillars, and, bowing with resistless force, the whole building rocks and totters, and the roof, encumbered with the weight of the spectators, rushes down, and the whole assembly, including Samson himself, are crushed to pieces in the ruin (Judg. xvi, 22 sq.).

Thus terminated the career of one of the most remarkable personages of all history, whether sacred or profane. The enrolment of his name by an apostolic pen (Heb. xi, 32) in the list of the ancient worthies, "who had by faith obtained an excellent reputation," warrants us, undoubtedly, in a favorable estimate of his character on the whole, while at the same time the fidelity of the inspired narrative has perpetuated the record of infirmities which must forever mar the lustre of his noble deeds. It is not improbable that the lapses with which he was chargeable arose, in a measure, from the very peculiarities of that physical temperament to which his prodigies of strength were owing; but while this consideration may palliate, it cannot excuse the moral delinquencies into which he was betrayed, and of which a just Providence exacted so tremendous a penalty in the circumstances of his degradation and death. (See Weissenborn, *De Morte Simsonis* [Jena, 1705]; Maichel, *Simson ab Crimine Vindicat.* [Tubing. 1739].)

His relatives, we are told (Judg. xvi, 31), went and recovered his body, and interred it in the burying-place of his father Manoah. The consternation produced at Gaza by the catastrophe connected with his death, we can easily conceive, would render this easier of accomplishment. See PHILISTINE.

2. *Representative Relations.*—Some of these have been in part touched upon in the foregoing narrative, but Samson was so striking a character that they need to be more specifically dwelt upon.

(1.) *As a judge* his authority seems to have been limited to the district bordering upon the country of the Philistines, and his action as a deliverer does not seem to have extended beyond desultory attacks upon the dominant Philistines, by which their hold upon Israel was weakened, and the way prepared for the future emancipation of the Israelites from their yoke. It is evident from Judg. xiii, 1, 5; xv, 9-11, 20, and the whole history, that the Israelites, or at least Judah and Dan, which are the only tribes mentioned, were subject to the Philistines through the whole of Samson's judgeship; so that, of course, Samson's twenty years of office would be included in the entire period of the Philistine dominion, which Usher and some others have hastily concluded was limited to the forty years of Eli's administration. From the angel's speech to Samson's mother (Judg. xiii, 5) it appears further that the Israelites were already subject to the Philistines at his birth; and, as Samson cannot have begun to be judge before he was twenty years of age, it has erroneously been supposed that his judgeship must about have coincided with the last twenty years of Philistine dominion. But when we turn to the first book of Samuel, and especially to vii, 1-14, we find that the Philistine dominion continued till the judgeship of Samuel. Hence it appears that Samson and Samuel were separated by the whole interval of Eli's judgeship and of Samuel's minority. See CHRONOLOGY. There are, however, several points in the respective narratives of the times of Samson and Samuel which indicate great similarity of circumstances. First, there is the general prominence

of the Philistines in their relation to Israel. Secondly, there is the remarkable coincidence of both Samson and Samuel being Nazarites (Judg. xiii, 5; xvi, 17; comp. 1 Sam. i, 11). It looks as if the great exploits of the young Danite Nazarite had suggested to Hannah the consecration of her son in like manner, or, at all events, as if for some reason the Nazaritish vow was at that time prevalent. No other mention of Nazarites occurs in the Scripture history till Amos ii, 11, 12; and even there the allusion seems to be to Samuel and Samson. Thirdly, there is a similar notice of the house of Dagon in Judg. xvi, 23 and 1 Sam. v, 2. Fourthly, the lords of the Philistines are mentioned in a similar way in Judg. xvi, 8, 18, 27, and in 1 Sam. vii, 7. The effect of Samson's prowess must have been more of a preparatory kind, by arousing the cowed spirit of his people, and shaking the insolent security of the Philistines, than in the way of decisive victory or deliverance. There is no allusion whatever to other parts of Israel during Samson's judgeship, except the single fact of the men of the border tribe of Judah, three thousand in number, fetching him from the rock Etam to deliver him up to the Philistines (Judg. xv, 9-13). The whole narrative is entirely local, and, like the following story concerning Micah (Judg. xvii, xviii) seems to be taken from the annals of the tribe of Dan. Still it does not follow that there were contemporary judges in other parts of the land. See JUDGE.

(2.) *As a Nazarite*, Samson exhibits the law in Numb. vi in full practice. The eminence of such Nazarites as Samson and Samuel would tend to give that dignity to the profession which is alluded to in Lam. iv, 7, 8. See NAZARITE.

(3.) *As an inspired person*, Samson is one of those who are distinctly spoken of in Scripture as endowed with supernatural power by the Spirit of the Lord. Those specimens of extraordinary prowess, of which even the slaying of the lion at Timnath without weapons was one, were doubtless the result of that special influence of the Most High which is referred to in Judg. xiii, 25—"And the Spirit of the Lord began to move him at times in the camp of Dan, between Zorah and Eshtaol." The import of the original word (לָפַץ) for *moved* is peculiar. As לָפַץ, the radical form, signifies *an anvil*, the metaphor is probably drawn from the repeated and somewhat violent strokes of a workman with his hammer. It implies, therefore, a peculiar *urgency*, an *impelling influence*, which he could not well resist in himself, nor others in him. But we do not know that this attribute, in its utmost degree, constantly dwelt in him. So, in later exploits, it is said, "The Spirit of the Lord came mightily upon him, and the cords that were upon his arms became as flax burned with fire;" "The Spirit of the Lord came upon him, and he went down to Ashkelon, and slew thirty men of them." But, on the other hand, after his locks were cut, and his strength was gone from him, it is said "He wist not that the Lord was departed from him" (Judg. xiii, 25; xiv, 6, 19; xv, 14; xvi, 20). The phrase "the Spirit of the Lord came upon him" is common to him with Othniel and Gideon (Judg. iii, 10; vi, 34); but the connection of supernatural power with the integrity of the Nazaritish vow, and the particular gift of great strength of body, as seen in tearing in pieces a lion, breaking his bonds asunder, carrying the gates of the city upon his back, and throwing down the pillars which supported the house of Dagon, are quite peculiar to Samson. Indeed, his whole character and history have no exact parallel in Scripture. It is easy, however, to see how forcibly the Israelites would be taught by such an example that their national strength lay in their complete separation from idolatry and consecration to the true God; and that he could give them power to subdue their mightiest enemies, if only they were true to his service (comp. 1 Sam. ii, 10). (See the *Eclectic Review*, Nov. 1861.)

(4.) *As to Mythological Coincidences*.—The narrative of Samson's deeds has often been compared with the mythical story of the Greek Hercules. (See especially Vogel, in the *Hall. Encyclop.* ii, § vi, 8 sq.; Riskoff, *Die Simsonsage u. d. Herakles-Mythus* [Leips. 1861].) Thus, his combat with the lion is compared with the conquest of the Nemean lion (Diod. Sic. iv, 11; Apollod. ii, 5, 1), and another fearful lion on Mt. Cithæron (Apollod. ii, 4, 9); his capture of the jackals with the capture of the stag of Diana (Diod. Sic. iv, 13; Apollod. ii, 5, 3), and of the Cretan bull (Apollod. ii, 5, 7; Diod. Sic. iv, 13); his slaughter of his paranympths' friends with the overthrow of the king of the Minyæ, Erginus, and his host, by Hercules, in a narrow pass (Apollod. ii, 4, 11; mentioned, too, by Herod. ii, 45); his carrying-off the gates of Gaza with the carrying-away of the Cretan bull (Diod. Sic. iv, 13); but, above all, the destruction of Samson by his beloved Delilah has been compared with the overcoming of Hercules through Omphale (Diod. Sic. iv, 31; Apollod. ii, 6, 3; comp. Senec. *Hippol.* p. 318 sq.); in fine, Samson's wonderful birth (Judg. xiii) with that of Hercules (see Bauer, *Hebr. Myth.* ii, 86 sq.). Those, however, have far less ground who identify Samson with the Phœnician Hercules, the sun-god. Basing the view on the etymology of the name (see Vatke, *Bibl. Theol.* i, 368 sq.), they labor, viewing the whole story of Samson as a myth, to explain the details by the course and operation of the sun (Borkhausen, in the *Coburg. Annal. d. Theol.* 1833, iii, 2, 3; iv, 1; comp. Jerome, *Ep. ad Philem.* vii, 752). There are many other striking parallels in the Greek mythology—e.g. in the Croton Milo and other strong men (Pliny, vii, 19); in the deeds of Theseus, especially the destruction of the wild boar at Crommyon (Diod. Sic. iv, 59), and the carrying-away of a living bull to Athens (Bauer, *l. c.* p. 91 sq.); of king Nisus in Megara, who lost his kingdom at the same time with his hair (Ovid, *Met.* viii, 8 sq., 84 sq.; Virgil, *Cir.* 120 sq.; Hygar. *Fab.* 198); of the fountain Aganippe, which sprang from the footstep of Pegasus, etc. But there is no reason for rejecting the historical existence of Samson; and his character and deeds accord well with the state of the Israelites in the time of the Judges. Yet the opinion is widely held that the traditions out of which the book of Judges is compiled have exaggerated his exploits (Bauer, *Hebr. Myth.* ii, 69 sq.; *Hebr. Gesch.* ii, 88 sq.). Hence some have undertaken to explain the account from natural causes and commonplace events most fruitlessly (Harenberg, in the *Brem. u. Verd. Biblioth.* ii, 302 sq.; Bern, in Semler's *Hall. Samml.* i, iv, 1 sq.; Hezel, *Schriftforsch.* i, 653 sq.; Justi, in Eichhorn's *Repert.* vii, 78 sq.; also in his *Verm. Abhandl.* i, 146 sq.; Diederich, *Zur Gesch. Sims.* [Gött. 1778]; Herder, *Geist.* d. *eb.* *Poes.* ii, 235 sq., 252 sq.). Yet more trifling is the hypothesis of Kaiser (*Commentar. in Priora Genes. Cap.* p. 188 sq.) that Samson was striving to mimic and mock the Philistine Hercules. Once more: "Hercules once went to Egypt, and there the inhabitants took him, and, putting a chaplet on his head, led him out in solemn procession, intending to offer him in sacrifice to Jupiter. For a while he submitted quietly; but when they led him up to the altar and began the ceremonies, he put forth his strength and slew them all" (Rawlinson, *Herod.* ii, 45).

The passage from Lycophron, with the scholion, quoted by Bochart (*Hieroz.* pars ii, lib. v, cap. xii), where Hercules is said to have been three nights in the belly of the sea-monster, and to have come out *with the loss of all his hair*, is also curious, and seems to be a compound of the stories of Samson and Jonah. To this may be added the connection between Samson, considered as derived from *Shemesh*, "the sun," and the designation of Moui, the Egyptian Hercules, as "Son of the Sun," worshipped also under the name *Sem*, which Sir G. Wilkinson compares with Samson. The Tyrian Hercules (whose temple at Tyre is described by Herod. ii, 44), he also tells us, "was originally the sun, and the

same as Baa!" (Rawlinson, *Herod.* ii, 44, note 7). The connection between the Phœnician Baal (called Baal Shemen, Baal Shemesh, and Baal Hamman) and Hercules is well known. Gesenius (*Thesaur.* s. v. בַּעַל) tells us that in certain Phœnician inscriptions, which are accompanied by a Greek translation, *Baal* is rendered *Herakles*, and that "the Tyrian Hercules" is the constant Greek designation of the Baal of Tyre. He also gives many Carthaginian inscriptions to Baal Hamman, which he renders Baal Solaris; and also a sculpture in which Baal Hamman's head is surrounded with rays, and which has an image of the sun on the upper part of the monument (*Mon. Phœn.* i, 171; ii, tab. 21). Another evidence of the identity of the Phœnician Baal and Hercules may be found in *Bauli*, near Baïæ, a place sacred to Hercules ("locus Herculis," Serv.), but evidently so called from Baal. Thirlwall (*Hist. of Greece*) ascribes to the numerous temples built by the Phœnicians in honor of Baal in their different settlements the Greek fables of the labors and journeys of Hercules. Bochart thinks the custom described by Ovid (*Fast.* liv) of tying a lighted torch between two foxes in the circus, in memory of the damage once done to the harvest by a fox with burning hay and straw tied to it, was derived from the Phœnicians, and is clearly to be traced to the history of Samson (*Hieroz.* pars i, lib. iii, cap. xiii). From all this, however, arises little probability that the Greek and Latin conception of Hercules in regard to his strength was derived from Phœnician stories and reminiscences of the great Hebrew hero Samson. Some learned men connect the name *Hercules* with *Samson* etymologically (see Wilkinson's note in Rawlinson's *Herod.* ii, 43; Patrick, *On Judg.* xvi, 30; Cornél. a Lapidé, etc.); but none of these etymologies are very convincing. Nevertheless, the following description of Hercules, given by C. O. Müller (*Dorians*, bk. ii, ch. xii), might almost have been written for Samson: "The highest degree of human suffering and courage is attributed to Hercules: his character is as noble as could be conceived in those rude and early times; but he is by no means represented as free from the blemishes of human nature; on the contrary, he is frequently subject to wild, ungovernable passions, when the noble indignation and anger of the suffering hero degenerate into frenzy. Every crime, however, is atoned for by some new suffering; but nothing breaks his invincible courage until, purified from earthly corruption, he ascends Mount Olympus." Again: "Hercules was a jovial guest, and not backward in enjoying himself. . . . It was Hercules, above all other heroes, whom mythology placed in ludicrous situations, and sometimes made the butt of the buffoonery of others. The Cercopes are represented as alternately amusing and annoying the hero. In works of art they are often represented as satyrs who rob the hero of his quiver, bow, and club. Hercules, annoyed at their insults, binds two of them to a pole, and marches off with his prize. . . . It also seems that mirth and buffoonery were often combined with the festivals of Hercules: thus at Athens there was a society of sixty men, who, on the festival of the Dio-mean Hercules, attacked and amused themselves and others with sallies of wit." The commentary of Adam Clarke presents us with the results of De Lavour, an ingenious French writer, on this subject, from which it will be seen that the coincidences are extremely striking, and such as would, perhaps, afford to most minds, an additional proof of how much the ancient mythologies were a distorted reflection of the Scripture narrative. Phœnician traders, it is imagined, might easily have carried stories concerning the Hebrew hero to the different countries where they traded, especially Greece and Italy; and such stories would have been moulded according to the taste or imagination of those who heard them.

Whatever is thought, however, of such coincidences, it is certain that the history of Samson is a historical,

and not an allegorical, narrative. It has also a distinctly supernatural element which cannot be explained away. The history, as we now have it, must have been written several centuries after Samson's death (*Judg.* xv, 19, 20; xviii, 1, 30; xix, 1), though probably taken from the annals of the tribe of Dan. Josephus has given it pretty fully, but with alterations and embellishments of his own, after his manner. The older writers on Samson contribute nothing to the interpretation of the history (e. g. Marck, in his *Dissert. Philol. Exeget.* p. 173 sq.). The effort to rid the story of its miraculous air appears already in Stackhouse (*Bibl. Hist.* iii, 776 sq.). The Wolfenbüttel Fragments (according to the specimens in Bayle and others) would simply degrade Samson; and Niemeyer (*Charak.* iii, 524 sq.) accomplishes nothing beyond showing that this wilful and rough hero of the olden time, judged by the moral law, is unworthy of comparison with Christ (see Hauke, *De Simsone Typo Christi* [Alt. 1740]). Samson was earnest and patriotic; to him his Naziritish consecration was not a mere religious veil, but a living impulse, and no one can properly deny him the dignity of a *shophet*, or judge (Bertheau, *Buch der Richter*, p. 14, *Einleit.*), unless he understands the word in a narrow and too modern sense. The moral significance of Samson's life has been first set forth by Ewald (*Gesch. Isr.* ii, 401 sq.), but he seems to have idealized his hero too much (comp. the excellent remarks of Bertheau, *op. cit.* p. 168 sq.). The only mention of Samson in the New Test. confirms his historical character, being that in Heb. xi, 32, where he is coupled with Gideon, Barak, and Jephthah, and spoken of as one of those who "through faith waxed valiant in fight, and turned to fight the armies of the aliens."

For other monographs on Samson, see Darling, *Cyclopædia Bibliographica*, col. 285.

Samson, BERNHARDIN, a Franciscan monk, who plied the traffic in indulgences in Switzerland at the time of Tetzels's exploits in Saxony, was a native of Milan, but the dates of his birth and death are not known. He is described by his contemporaries as an eloquent, insolent monk. He was employed in the indulgence traffic by cardinal Forli, to whom Leo X had farmed out the territory of Switzerland. He entered Switzerland in August, 1518, and passed from canton to canton with great success, assuming great state, and giving great offence to the local clergy. Meantime Zwingli was called as priest to Zurich. He had already raised his voice against the traffic, but now he was summoned by bishop Hugo to make a direct attack upon Samson. Others also were likewise summoned. As Samson had not duly presented his credentials to the bishop, the latter ordered his whole diocese to exclude him from their churches. Samson retired into Baden, and met with great success. In his zeal in urging the indulgences upon the people, he represented the souls thereby rescued from purgatory as flying to heaven by swarms: "Ecce volant! Ecce volant!" In Feb., 1519, he went to Bremgarten, but Henry Bullinger, the priest of the place, refused to admit him into his church. Thereupon Samson pronounced the ban against him, and threatened to complain against him to the government at Zurich. On reaching Zurich, however, he was peremptorily ordered to absolve Bullinger, and to quit the country. In answer to a complaint of the Swiss authorities, pope Leo X announced (April 30, 1519) that he had already recalled Samson, and that in case their complaints were found corroborated, he should punish him. After Samson's retiring to Italy, all trace of him is lost. See the authorities cited in Herzog, *Real-Encyklop.* xiii, 392-394. (J. P. L.)

Sam'uël (Heb. *Shemu'el*, שְׁמוּאֵל [on the significance, see below]; Sept. and New Test. *Σαμουήλ*), the last of those extraordinary regents that presided over the Hebrew commonwealth under the title of judges (q. v.), and the first of the line of the prophets (q. v.) specially so called (*Acts* xiii, 20). As such he possesses peculiar

interest in the history of the chosen people. See SAMUEL.

I. *Name*.—Of this different derivations have been given: (1) שְׁמוֹאֵל, "name of God;" so apparently Origen (Euseb. *H. E.* vi, 25), i. q. Θεοκλήτος. (2) שְׁמוּאֵל, "placed by God." (3) שְׁמוּאֵל, "asked of God" (1 Sam. i, 20). Josephus (who gives this interpretation, Σαμουήλος, *Ant.* v, x, 3) ingeniously makes it correspond to the well-known Greek name Θεαίητος. (4) שְׁמוּאֵל, "heard of God." This, which is the most obvious, may have the same meaning as the previous derivation, which is supported by the sacred text (1 Sam. i, 20).

II. *History*.—1. *Private Life*.—The circumstances of his birth were ominous of his future career. He was the son of Elkanah, an Ephrathite or Ephraimite, and Hannah or Anna. His father is one of the few private citizens in whose household we find polygamy. It may possibly have arisen from the irregularity of the period, but more probably from the sterility of his wife Hannah, whom, as she is always named first, and is known to have been the favorite, he probably married first. The usual effect of polygamy was felt in Elkanah's household. The sterility of Hannah brought upon her the taunts and ridicule of her conjugal rival, who "provoked her sore, to make her fret, because the Lord had shut up her womb" (1 Sam. i, 6). The jealousy of Peninnah was excited also by the superior affection which was shown to Hannah by her husband. "To Hannah he gave a worthy portion; for he loved Hannah" (ver. 5). More especially at the period of the sacred festivals did the childless solitude of Hannah create within her the most poignant regrets, when she saw her husband give portions to all the sons and daughters of Peninnah, who, exulting in maternal pride and fondness, took advantage of these seasons to subject the favorite wife to a natural feminine retaliation. Hannah's life was embittered, "she wept and did not eat" (ver. 7). See HANNAH.

The descent of Samuel's father, Elkanah, is involved in great obscurity. In 1 Sam. i, 1 he is described as an Ephraimite. In 1 Chron. vi, 22, 23 he is made a descendant of Korah the Levite (see the table below). Hengstenberg (on Psa. lxxviii, 1) and Ewald (ii, 433) explain this by supposing that the Levites were occa-

sionally incorporated into the tribes among whom they dwelt. The question, however, is of no practical importance, because, even if Samuel were a Levite, he certainly was not a regular priest by descent. In virtue of his semi-sacerdotal lineage as a Levite, and especially by the authority of his office as a prophet, he hesitated not to perform priestly functions, like Elijah and others. The opinion was, nevertheless, in former times very current that Samuel was a priest—nay, some imagine that he succeeded Eli in the pontificate. Many of the fathers inclined to this notion, but Jerome affirms (*Advers. Jovin.*), "Samuel propheta fuit, Judex fuit, Levita fuit, non pontifex, ne sacerdos quidem" (Ortlob, "Samuel Judex et Propheta, non Pont. aut Sacerd. Sacrificans," in the *Thesaurus Novus Theol. Philol.* Hasaei et Ikenii, i, 587; Selden, *De Success. ad Pontif.* lib. i, c. 4). The American translator of De Wette's *Introduction to the Old Testament* (ii, 21) says he was a priest, though not of Levitical descent, slighting the information of Chronicles, and pronouncing Samuel at the same time to be only a mythical character.

Samuel's birthplace is one of the vexed questions of sacred geography, as his descent is of sacred genealogy. See RAMATHAIM-ZOPHIM. All that appears with certainty from the accounts is that it was in the hills of Ephraim, and (as may be inferred from its name) a double height, used for the purpose of beacons or outlookers (1 Sam. i, 1). At the foot of the hill was a well (xix, 22). On the brow of its two summits was the city. It never lost its hold on Samuel, who in later life made it his fixed abode.

The combined family must have been large. Peninnah had several children, and Hannah had, besides Samuel, three sons and two daughters. But of these nothing is known, unless the names of the sons are those enumerated in 1 Chron. vi, 26, 27. It is on the mother of Samuel that our chief attention is fixed in the account of his birth. She is described as a woman of a high religious mission. Almost a Nazarite by practice (1 Sam. i, 15), and a prophetess in her gifts (ii, 1), she sought from God the gift of the child for which she longed with a passionate devotion of silent prayer, of which there is no other example in the Old Test.; and when the son was granted, the name which he bore, and thus first introduced into the world, expressed her sense of the urgency of her entreaty—*Samuel*, "the asked, or heard, of God." Living in the great age of vows, she had before his birth dedicated him to the office of a Nazarite. As soon as he was weaned, she herself, with her husband, brought him to the tabernacle at Shiloh, where she had received the first intimation of his birth, and there solemnly consecrated him. The form of consecration was similar to that with which the irregular priesthood of Jeroboam was set apart in later times (2 Chron. xiii, 9)—a bullock of three years old (Sept.), loaves (Sept.), an ephah of flour, and a skin of wine (1 Sam. i, 24). First took place the usual sacrifices (Sept.) by Elkanah himself; then, after the introduction of the child, the special sacrifice of the bullock. Then his mother made him over to Eli (vers. 25, 28), and (according to the Heb. text, but not the Sept.) the child himself performed an act of worship. The hymn which followed on this consecration is the first of the kind in the sacred volume. It is possible that, like many of the psalms, it may have been enlarged in later times to suit great occasions of victory and the like. But ver. 5 specially applies to this event, and vers. 7, 8 may well express the sense entertained by the prophetess of the coming revolution in the fortunes of her son and of her country.

From this time the child is shut up in the tabernacle. The priests furnished him with a sacred garment, an ephod, made, like their own, of white linen, though of inferior quality, and his mother every year, apparently at the only time of their meeting, gave him a little mantle reaching down to his feet, such as was worn only by high personages, or women, over the other dress, and

such as he retained, as his badge, till the latest times of his life. He seems to have slept near the holy place (1 Sam. iii, 3), and his special duty was to put out, as it would seem, the sacred candlestick, and to open the doors at sunrise.

2. *Samuel's Call.*—In this way his childhood was passed. It was while thus sleeping in the tabernacle that he received his first prophetic call. The stillness of the night, the sudden voice, the childlike misconception, the venerable Eli, the contrast between the terrible doom and the gentle creature who has to announce it, give to this portion of the narrative a universal interest. It is this side of Samuel's career that has been so well caught in the well-known picture of Sir Joshua Reynolds. The degeneracy of the people at this time was extreme. The tribes seem to have administered their affairs as independent republics; the national confederacy was weak and disunited; and the spirit of public patriotic enterprise had been worn out by constant turmoil and invasion. The theocratic influence was also scarcely felt, its peculiar ministers being withdrawn, and its ordinary manifestations, except in the routine of the Levitical ritual, having ceased. The "word of the Lord was precious in those days; there was no open vision" (1 Sam. iii, 1). The young devotee, "the child Samuel," was selected by Jehovah to renew the deliverance of his oracles. According to Josephus (*Ant.* v, 10, 4), he was at this time twelve years old. As he reclined in his chamber adjoining the sacred edifice, the Lord, by means adapted to his juvenile capacity, made known to him his first and fearful communication—the doom of Eli's apostate house. Other revelations speedily followed this. The frequency of God's messages to the young prophet established his fame, and the exact fulfilment of them secured his reputation. The oracle of Shiloh became vocal again through the youthful hierophant (1 Sam. iii, 19–21). From this moment the prophetic character of Samuel was established. His words were treasured up, and Shiloh became the resort of those who came to hear him (iii, 19–21). The fearful fate pronounced on the head and family of the pontificate was soon executed. Eli had indulgently tolerated, or leniently palliated, the rapacity and profligacy of his sons. Through their extortions and impiety "men abhorred the offering of the Lord," and Jehovah's wrath was kindled against the sacerdotal transgressors. They became the victims of their own folly, for when the Philistines invaded the land an unworthy superstition among the Hebrew host clamored for the ark to be brought into the camp and into the field of battle. Hophni and Phinehas, Eli's sons, indulging this vain and puerile fancy, accompanied the ark as its legal guardians, and fell in the terrible slaughter which ensued. Their father, whose sin seems to have been his easiness of disposition, his passive and quiescent temper, sat on a sacerdotal throne by the wayside, to gather the earliest news of the battle, for his "heart trembled for the ark of God;" and as a fugitive from the scene of conflict reported to him the sad disaster, dwelling with natural climax on its melancholy particulars—Israel routed and fleeing in panic, Hophni and Phinehas both slain, and the ark of God taken—this last and overpowering intelligence so shocked him that he fainted and fell from his seat, and in his fall, from the imbecile corpulence of age, "broke his neck and died" (iv, 18). In the overthrow of the sanctuary we hear not what became of Samuel. According to the Mussulman tradition, Samuel's birth was granted in answer to the prayers of the nation on the overthrow of the sanctuary and loss of the ark (D'Herbelot, s.v. Aschmouyl). This, though false in the letter, is true to the spirit of Samuel's life.

3. *Samuel's Civil Administration.*—When the feeble administration of Eli, who had judged Israel forty years, was concluded by his death, Samuel was too young to succeed to the regency; and the actions of this earlier portion of his life are left unrecorded. The

ark, which had been captured by the Philistines, soon vindicated its majesty, and, after being detained among them seven months, was sent back to Israel. It did not, however, reach Shiloh, in consequence of the fearful judgment upon Beth-shmesh (1 Sam. vi, 19), but rested in Kirjath-jearim for no fewer than twenty years (vii, 2). It is not till the expiration of this period that Samuel appears again in the history. Perhaps, during the twenty years succeeding Eli's death, his authority was gradually gathering strength; while the office of supreme magistrate may have been vacant, each tribe being governed by its own hereditary phylarch. This long season of national humiliation was, to some extent, improved. "All the house of Israel lamented after the Lord;" and Samuel, seizing upon the crisis, issued a public manifesto, exposing the sin of idolatry, urging on the people religious amendment, and promising political deliverance on their reformation. The people obeyed, the oracular mandate was effectual, and the principles of the theocracy again triumphed (1 Sam. vii, 4). The tribes were summoned by the prophet to assemble in Mizpeh; and at this assembly of the Hebrew comitia, Samuel seems to have been elected regent (vii, 6). Some of the judges were raised to political power as the reward of their military courage and talents; but Samuel was raised to the lofty station of judge, from his prophetic fame, his sagacious dispensation of justice, his real intrepidity, and his success as a restorer of the true religion. His government, founded not on feats of chivalry or actions of dazzling enterprise, which great emergencies only call forth, but resting on more solid qualities, essential to the growth and development of a nation's resources in times of peace, laid the foundation of that prosperity which gradually elevated Israel to the position it occupied in the days of David and his successors. This mustering of the Hebrews at Mizpeh on the inauguration of Samuel alarmed the Philistines, and their "lords went up against Israel." Samuel offered a solemn oblation, and implored the immediate protection of Jehovah. With a symbolical rite, expressive, partly of deep humiliation, partly of the libations of a treaty, the people poured water on the ground; they fasted; and they entreated Samuel to raise the piercing cry for which he was known in supplication to God for them. It was at the moment that he was offering up a sacrifice, and sustaining this loud cry (compare the situation of Pausanias before the battle of Plataea, Herod. ix, 61), that the Philistine host suddenly burst upon them. He was answered by propitious thunder, an unprecedented phenomenon in that climate at that season of the year (comp. 1 Sam. xii, 18: Josephus says [*Ant.* vi, 2, 2] that there was also an earthquake). A fearful storm burst upon the Philistines; the elements warred against them. "The Highest gave his voice in the heaven, hailstones and coals of fire." The old enemies of Israel were signally defeated, and did not recruit their strength again during the administration of the prophet-judge. Exactly at the spot where, twenty years before, they had obtained their great victory, a stone was set up, which long remained as a memorial of Samuel's triumph, and gave to the place its name of Eben-ezer, "the Stone of Help," which has thence passed into Christian phraseology, and become a common name of Nonconformist chapels (1 Sam. vii, 12). The old Canaanites, whom the Philistines had dispossessed in the outskirts of the Judæan hills, seem to have helped in the battle; and a large portion of territory was recovered (ver. 14). This was Samuel's first, and, as far as we know, his only, military achievement. But, as in the case of the earlier chiefs who bore that name, it was apparently this which confirmed him in the office of "judge" (comp. xii, 11, where he is thus reckoned with Jerubbaal, Bedan, and Jephthah, and Eccles. xlvi, 15–18). From an incidental allusion (1 Sam. vii, 14), we learn, too, that about this time the Amorites, the Eastern foes of Israel, were also at peace with them—another triumph of a gov-

ernment "the weapons of whose warfare were not carnal."

The presidency of Samuel appears to have been eminently successful. Its length is nowhere given in the Scriptures; but, from a statement of Josephus (*Ant.* vi, 13, 5), it appears to have lasted twelve years (B.C. 1105–1093), up to the time of Saul's inauguration. See CHRONOLOGY. From the very brief sketch given us of his public life, we infer that the administration of justice occupied no little share of his time and attention. He visited, in discharge of his duties as ruler, the three chief sanctuaries (Sept. *ἐν πᾶσι τοῖς ἁγιασμένοις τοῖς τοῖς*) on the west of the Jordan—Bethel, Gilgal, and Mizpeh (1 Sam. vii, 16). His own residence was still his native city, Ramah, or Ramathaim, which he further consecrated by an altar (ver. 17), after the patriarchal model, like Abraham. Such a procedure was contrary to the letter of the Mosaic statute; but the prophets had power to dispense with ordinary usage (*De Wette, Bib. Dogmat.* § 70; *Knobel, Der Prophetism. der Heb.* i, 39; *Köster, Der Prophetism. d. A. und N. T.* etc. p. 52). In this case, the reason of Samuel's conduct may be found in the state of the religious economy. The ark yet remained at Kirjath-jearim, where it had been left in terror, and where it lay till David fetched it to Zion. There seems to have been no place of resort for the tribes, the present station of the ark not having been chosen for its convenience as a scene of religious assembly. The shrine at Shiloh, which had been hallowed ever since the settlement in Canaan, had been desolate from the date of the death of Eli and his sons—so desolate as to become, in future years, a prophetic symbol of divine judgment (*Jer.* vii, 12–14; xxvi, 6). In such a period of religious anarchy and confusion, Samuel, a theocratic guardian, might, without any violation of the spirit of the law, superintend the public worship of Jehovah in the vicinity of his habitation (*Knobel, Der Prophetism. der Heb.* ii, 32).

At Ramah Samuel married; and two sons grew up to repeat, under his eyes, the same perversion of high office that he had himself witnessed in his childhood in the case of the two sons of Eli. One was Abiah, the other, Joel, sometimes called simply "the second" (*vashni*, 1 Chron. vi, 28). In his old age, according to the quasi-hereditary principle already adopted by previous judges, he shared his power with them; and they exercised their functions at the southern frontier in Beersheba (1 Sam. viii, 1–4). These young men possessed not their father's integrity of spirit, but "turned aside after lucre, took bribes, and perverted judgment" (ver. 3). The advanced years of the venerable ruler himself, and his approaching dissolution; the certainty that none of his family could fill his office with advantage to the country; the horror of a period of anarchy which his death might occasion; the necessity of having some one to put an end to tribal jealousies, and concentrate the energies of the nation, especially as there appeared to be symptoms of renewed warlike preparations on the part of the Ammonites (xii, 12)—these considerations seem to have led the elders of Israel to adopt the bold step of assembling at Ramah with the avowed purpose of effecting a revolution in the form of the government.

4. *Retirement from Public Office.*—Down to this point in Samuel's life there is but little to distinguish his career from that of his predecessors. Like many characters in later days, had he died in youth, his fame would hardly have been greater than that of Gideon or Samson. He was a judge, a Nazarite, a warrior, and (to a certain point) a prophet. But his peculiar position in the sacred narrative turns on the events which follow. He is the inaugurator of the transition from what is commonly called the theocracy to the monarchy. The misdemeanor of his own sons precipitated the catastrophe which had been long preparing. The people demanded a king. Josephus (*Ant.* vi, 3, 3) describes the shock to Samuel's mind "because of his inborn sense

of justice, because of his hatred of kings as so far inferior to the aristocratic form of government, which conferred a godlike character on those who lived under it." For the whole night he lay fasting and sleepless, in the perplexity of doubt and difficulty. In the vision of that night, as recorded by the sacred historian, is given the dark side of the new institution, on which Samuel dwells on the following day (1 Sam. viii, 9–18). The proposed change from a republican to a regal form of government displeased Samuel for various reasons. Besides its being a departure from the first political institute, and so far an infringement on the rights of the divine head of the theocracy, it was regarded by the regent as a virtual charge against himself, and might appear to him as one of those examples of popular fickleness and ingratitude which the history of every realm exhibits in profusion. Jehovah comforts Samuel in this respect by saying, "They have not rejected thee, but they have rejected me." Being warned of God to accede to their request for a king, and yet to remonstrate with the people, and set before the nation the perils and tyranny of a monarchical government (viii, 10), Samuel proceeded to the election of a sovereign. Saul, son of Kish, "a choice young man and a goodly," whom he had met unexpectedly, was pointed out to him by Jehovah as the king of Israel, and by the prophet was anointed and saluted as monarch. Samuel again convened the nation at Mizpeh, again with honest zeal condemned their project, but caused the sacred lot to be taken. The lot fell on Saul. The prophet now formally introduced him to the people, who shouted, in joyous acclamation, "God save the king!" Not content with oral explanations, this last of the republican chiefs not only told the people the manner of the kingdom, "but wrote it in a book, and laid it up before the Lord." What is here asserted of Samuel may mean that he extracted from the Pentateuch the recorded provision of Moses for a future monarchy, and added to it such warnings and counsels and safeguards as his inspired sagacity might suggest. Saul's first battle being so successful, and the preparations for it displaying no ordinary energy and promptitude of character, his popularity was suddenly advanced and his throne secured. Taking advantage of the general sensation in favor of Saul, Samuel cited the people to meet again in Gilgal, to renew the kingdom, to ratify the new constitution, and solemnly install the sovereign (xi, 14). The assembly was held at Gilgal, immediately after the victory over the Ammonites. The monarchy was a second time solemnly inaugurated, and (according to the Sept.) "Samuel" (in the Hebrew text, "Saul") "and all the men of Israel rejoiced greatly." Then takes place his farewell address. By this time the long, flowing locks, on which no razor had ever passed, were white with age (xii, 2). He appeals to their knowledge of his integrity. Whatever might be the lawless habits of the chiefs of those times—Hophni, Phinehas, or his own sons—he had kept aloof from all. No ox or ass had he taken from their stalls—no bribe to obtain his judgment (Sept. *ἔξιλασμα*)—not even a sandal (*ὑπόδημα*, Sept. and *Ecclus.* xlvii, 19). It is this appeal, and the response of the people, that have made Grotius call him the Jewish Aristides. He then sums up the new situation in which they have placed themselves; and, although "the wickedness of asking a king" is still strongly insisted on, and the unusual portent of a thunderstorm in May or June, in answer to Samuel's prayer, is urged as a sign of divine displeasure (1 Sam. xii, 16–19), the general tone of the condemnation is much softened from that which was pronounced on the first intimation of the change. The first king is repeatedly acknowledged as "the Messiah," or anointed of the Lord (vers. 3, 5); the future prosperity of the nation is declared to depend on their use or misuse of the new constitution; and Samuel retires with expressions of good-will and hope: "I will teach you the good and the right way . . . only fear the Lord . . ." (vers. 23, 24). It is the most signal example afforded

in the Old Test. of a great character reconciling himself to a changed order of things, and of the divine sanction resting on his acquiescence. For this reason it is that Athanasius is by Basil called the Samuel of the Church (Basil, *Ep.* 82). See MONARCHY.

5. *Residue of Samuel's Life.*—His subsequent relations with Saul are of the same mixed kind. The two institutions which they respectively represented ran on side by side. Samuel was still, by courtesy at least, judge. He judged Israel "all the days of his life" (1 Sam. vii, 15), and from time to time came across the king's path. But these interventions are chiefly in another capacity, which are unfolded below. The assertion may mean that even after Saul's coronation Samuel's power, though formally abdicated, was yet actually felt and exercised in the direction of state affairs (Hävernicks, *Einleit. in das A. T.* § 166). No enterprise could be undertaken without Samuel's concurrence. His was an authority higher than the king's. We find Saul, having mustered his forces, about to march against the Philistines, yet delaying to do so till Samuel consecrated the undertaking. He came not at the time appointed, as Saul thought, and the impatient monarch proceeded to offer sacrifice—a fearful violation of the national law. The prophet arrived as the religious service was concluded, and, rebuking Saul for his presumption, distinctly hinted at the short continuance of his kingdom. Again, we find Samuel charging Saul with the extirpation of the Amalekites. The royal warrior proceeded on the expedition, but obeyed not the mandate of Jehovah. His apologies, somewhat craftily framed for his inconsistencies, availed him not with the prophet, and he was by the indignant seer virtually dethroned. He had forfeited his crown by disobedience to God. Yet Samuel mourned for him. His heart seems to have been set on the bold athletic soldier. But the breach was irreconcilable, and they must separate. The parting was not one of rivals, but of dear though divided friends. The king throws himself on the prophet with all his force; not without a vehement effort (Josephus, *Ant.* vi, 7, 5) the prophet tears himself away. The long mantle by which he was always known is rent in the struggle; and, like Ahijah after him, Samuel saw in this the omen of the coming rent in the monarchy. They parted, each to his house, to meet no more. But a long shadow of grief fell over the prophet. "Samuel mourned for Saul." "It grieved Samuel for Saul." "How long wilt thou mourn for Saul?" (1 Sam. xv, 11, 35; xvi, 1). See ПРОПЬКЪ. But now the Lord directed him to make provision for the future government of the country (xvi, 1). To prevent strife and confusion, it was necessary, in the circumstances, that the second king should be appointed ere the first sovereign's demise. Samuel went to Bethlehem and set apart the youngest of the sons of Jesse, "and came to see Saul no more till the day of his death." Yet Saul and he came near meeting once again at Naioth, in Ramah (xix, 24), when the king was pursuing David. As on a former occasion, the spirit of God came upon him as he approached the company of the prophets with Samuel presiding over them, and "he prophesied and lay down naked all that day and all that night." A religious excitement seized him; the contagious influence of the music and rhapsody fell upon his nervous, susceptible temperament and overpowered him. See SAUL.

The remaining scriptural notices of Samuel are in connection with David's history. See DAVID.

6. *Decease and Traditions.*—The death of Samuel is described as taking place in the year of the close of David's wanderings. It is said with peculiar emphasis, as if to mark the loss, that "all the Israelites"—all, with a universality never specified before—"were gathered together" from all parts of this hitherto divided country, and "lamented him," and "buried him," not in any consecrated place, nor outside the walls of his city, but within his own house, thus in a manner consecrated by being turned into his tomb (1 Sam. xxv, 1). His

relics were translated "from Judæa" (the place is not specified), A.D. 406, to Constantinople, and received there with much pomp by the emperor Arcadius. They were landed at the pier of Chalcedon, and thence conveyed to a church near the palace of Hebdomon (see *Acta Sanctorum*, Aug. 20).

The situation of Ramathaim, as has been observed, is uncertain. But the place long pointed out as his tomb is the height, most conspicuous of all in the neighborhood of Jerusalem, immediately above the town of Gibeon, known to the Crusaders as "Montjoye," as the spot from whence they first saw Jerusalem, now called *Neby Samwil*, "the Prophet Samuel." The tradition can be traced back as far as the 7th century, when it is spoken of as the monastery of St. Samuel (Robinson, *Bib. Res.* ii, 142). See ZOPHIM. A cave is still shown underneath the floor of the mosque. "He built the tomb in his lifetime," is the account of the Mussulman guardian of the mosque, "but was not buried here till after the expulsion of the Greeks." It is the only spot in Palestine which claims any direct connection with the first great prophet who was born within its limits; and its commanding situation well agrees with the importance assigned to him in the sacred history. See MIZPEH.

His descendants were subsisting at the same place till the time of David. Heman, his grandson, was one of the chief singers in the Levitical choir (1 Chron. vi, 33; xv, 17; xxv, 5).

The apparition of Samuel at Endor (1 Sam. xxviii, 14; Eccclus. xlvii, 20) belongs to the history of Saul. We here follow the inspired narrative, and merely say that Saul strangely wished to see Samuel recalled from the dead, that Samuel himself made his appearance suddenly, and to the great terror of the necromancer, heard the mournful complaint of Saul, and pronounced his speedy death on an ignoble field of loss and massacre (Henderson, *On Divine Inspiration*, p. 165; Hales, *Chronology*, ii, 323; Scott, *On the Existence of Evil Spirits*, etc. p. 232).

It has been supposed that Samuel wrote a life of David (of course of his earlier years) which was still accessible to one of the authors of the book of Chronicles (1 Chron. xxix, 29); but this appears doubtful. Various other books of the Old Test. have been ascribed to him by the Jewish tradition—the Judges, Ruth, the two books of Samuel (the latter, it is alleged, being written in the spirit of prophecy). He is regarded by the Samaritans as a magician and an infidel (Hottinger, *Hist. Orient.* p. 52).

The Persian traditions fix his life in the time of Kai-i-Kobad, second king of Persia, with whom he is said to have conversed (D'Herbelot, *Biblioth. Orient.* s. v. "Kai-Kobad").

III. *Samuel's Character.*—So important a position did he hold in Jewish history as to have given his name to the sacred book, now divided into two, which covers the whole period of the first establishment of the kingdom, corresponding to the manner in which the name of Moses has been assigned to the sacred book, now divided into five, which covers the period of the foundation of the Jewish Church itself. In fact, no character of equal magnitude had arisen since the death of the great lawgiver.

1. Samuel's character presents itself to us as one of uncommon dignity and patriotism. His chief concern was his country's weal. Grotius compares him to Aristides, and Saul to Alcibiades (*Opera Theol.* i, 119). To preserve the worship of the one Jehovah, the God of Israel, to guard the liberties and rights of the people, to secure them from hostile invasion and internal disunion, was the grand motive of his life. His patriotism was not a Roman love of conquest or empire. The subjugation of other people was only sought when they disturbed the peace of his country. He was loath, indeed, to change the form of government, yet he did it with consummate policy. First of all, he resorted to

the divine mode of appeal to the Omniscient Ruler—a solemn sortilege—and brought Saul so chosen before the people, and pointed him out to them as peerless in his form and aspect. Then, waiting till Saul should distinguish himself by some victorious enterprise, and receiving him fresh from the slaughter of the Ammonites, he again confirmed him in his kingdom, while the national enthusiasm, kindled by his triumph, made him the popular idol. Samuel thus, for the sake of future peace, took means to show that Saul was both chosen of God and yet virtually elected by the people. This procedure, so cautious and so generous, proves how little foundation there is for the remarks which have been made against Samuel by some writers, such as Schiller (*Neue Thalia*, iv, 94), Vatke (*Bibl. Theol.* p. 360), and the infamous Wolfenbüttel Fragmentist (p. 200, ed. Schmidt).

But there are two other points which more especially placed him at the head of the prophetic order as it afterwards appeared. The first is brought out in his relation with Saul, the second in his relation with David.

2. He represents the independence of the moral law, of the Divine Will, as distinct from regal or sacerdotal enactments, which is so remarkable a characteristic of all the later prophets. As we have seen, he was, if a Levite, yet certainly not a priest; and all the attempts to identify his opposition to Saul with a hierarchical interest are founded on a complete misconception of the facts of the case. From the time of the overthrow of Shiloh, he never appears in the remotest connection with the priestly order. Among all the places included in his personal or administrative visits, neither Shiloh, nor Nob, nor Gibeon (the seats of the sacerdotal caste) is ever mentioned. When he counsels Saul, it is not as the priest, but as the prophet; when he sacrifices or blesses the sacrifice, it is not as the priest, but either as an individual Israelite of eminence, or as a ruler, like Saul himself. Saul's sin in both cases where he came into collision with Samuel was not simply that of intruding into sacerdotal functions, but of disobedience to the prophetic voice. The first was that of not waiting for Samuel's arrival, according to the sign given by Samuel at his original meeting at Ramah (1 Sam. x, 8; xiii, 8); the second was that of not carrying out the stern prophetic injunction for the destruction of the Amalekites. When, on that occasion, the aged prophet called the captive prince before him, and with his own hands hacked him limb from limb in retribution for the desolation he had brought into the homes of Israel, and thus offered up his mangled remains almost as a human sacrifice ("before the Lord in Gilgal"), we see the representative of the older part of the Jewish history. But it is the true prophetic utterance such as breathes through the psalmists and prophets when he says to Saul in words which, from their poetical form, must have become fixed in the national memory, "To obey is better than sacrifice, and to hearken than the fat of rams."

3. Samuel is the first of the regular succession of prophets: "All the prophets from Samuel and those that follow after" (Acts iii, 24); "Ex quo sanctus Samuel propheta cœpit, et deinceps donec populus Israel in Babyloniam captivus veheretur, . . . totum est tempus prophetarum" (Augustine, *Civ. Dei*, xvii, 1). Moses, Miriam, and Deborah, perhaps Ehud, had been prophets. But it was only from Samuel that the continuous succession was unbroken. This may have been merely from the coincidence of his appearance with the beginning of the new order of things, of which the prophetic office was the chief expression. Some predisposing causes there may have been in his own family and birthplace. His mother, as we have seen, though not expressly so called, was, in fact, a prophetess; the word *Zophim*, as the affix of Ramathaim, has been explained, not unreasonably, to mean "seers"; and Elkanah, his father, is, by the Chaldee paraphrast on 1 Sam. i, 1, said to be "a

IX.—X

disciple of the prophets." But the connection of the continuity of the office with Samuel appears to be still more direct. It is in his lifetime, long after he had been "established as a prophet" (1 Sam. iii, 20), that we hear of the companies of disciples, called in the Old Test. "the sons of the prophets," by modern writers "the schools of the prophets." All the peculiarities of their education are implied or expressed—the sacred dance, the sacred music, the solemn procession (x, 5, 10; 1 Chron. xxv, 1, 6). At the head of this congregation, or "church, as it were, within a church" (Sept. *τὴν ἐκκλησίαν*, 1 Sam. x, 5, 10), Samuel is expressly described as "standing appointed over them" (xix, 20). Their chief residence at this time (though afterwards, as the institution spread, it struck root in other places) was at Samuel's own abode, Ramah, where they lived in habitations (*Naioth*, xix, 19, etc.) apparently of a rustic kind, like the leafy huts which Elisha's disciples afterwards occupied by the Jordan (*Naioth* = "habitations," but more specifically used for "pastures"). See *NAIOTH*.

In those schools, and learning to cultivate the prophetic gifts, were some whom we know for certain, others whom we may almost certainly conjecture, to have been so trained or influenced. Two eminent individuals had a casual or remote connection with them. One was Saul. Twice at least he is described as having been in the company of Samuel's disciples, and as having caught from them the prophetic fervor to such a degree as to have "prophesied among them" (1 Sam. x, 10, 11) and on one occasion to have thrown off his clothes, and to have passed the night in a state of prophetic trance (xix, 24); and even in his palace the prophesying mingled with his madness on ordinary occasions (xviii, 9). Another was David. The first acquaintance of Samuel with David was when he privately anointed him at the house of Jesse. See *DAVID*. But the connection thus begun with the shepherd boy must have been continued afterwards. David, at first, fled to "Naioth in Ramah," as to his second home (xix, 19), and the gifts of music, of song, and of prophecy, here developed on so large a scale, were exactly such as we find in the notices of those who looked up to Samuel as their father. It is, further, hardly possible to escape the conclusion that David there first met his fast friends and companions in after-life, prophets like himself—Gad and Nathan. In the prospect of a regal form of government he seems to have made the prophetic office a formal institute in the Jewish nation. These academies were famous for the cultivation of poetry and music, and from among their members God might select his special servants (Gramberg, *Religions-Id.* ii, 264; Vitringa, *Synag. Vet.* i, 2, 7; Werenfels, *Diss. de Scholis Prophetar.*; De Wette, *Comm. üb. d. Psalm.* p. 9). For a different view of the schools, see Tholuck, *Literar. Anzeiger*, 1831, i, 38. We are informed (1 Chron. ix, 22) that the allocation of the Levites for the Temple-service was made by David and Samuel the seer; i. e. that David followed some plan or suggestion of the deceased prophet. It is stated also (xxvi, 28) that the prophet had made some munificent donations to the tabernacle, which seems to have been erected at Nob, and afterwards at Gibeon, though the ark was in Kirjath-jearim. Lastly (xxix, 29), the acts of David the king are said to be written in the book of Samuel the seer. See *PROPHETS, SCHOOLS OF*.

It is needless to enlarge on the importance with which these incidents invest the appearance of Samuel. He there becomes the spiritual father of the Psalmist king. He is also the founder of the first regular institutions of religious instruction, and communities for the purposes of education. The schools of Greece were not yet in existence. From these Jewish institutions were developed, by a natural order, the universities of Christendom. It may be added that with this view the whole life of Samuel is in accordance. He is the prophet—the only prophet till the time of Isaiah—of whom we

know that he was such from his earliest years. It is this continuity of his own life and character that makes him so fit an instrument for conducting his nation through so great a change.

Accordingly, Samuel is called emphatically "the Prophet" (Acts iii, 24; xiii, 20). To a certain extent this was in consequence of the gift which he shared in common with others of his time. He was especially known in his own age as "Samuel the Seer" (1 Chron. ix, 22; xxvi, 28; xxix, 29). "I am the seer," was his answer to those who asked "Where is the seer?" "Where is the seer's house?" (1 Sam. ix, 11, 18, 19). "Seer," the ancient name, was not yet superseded by "Prophet" (ch. ix). By this name, Samuel *Videns* and Samuel *ὁ βλέπων*, he is called in the *Acta Sanctorum*. Of the three modes by which divine communications were then made, "by dreams, Urim and Thummim, and prophets," the first was that by which the divine will was made known to Samuel (iii, 1, 2; Josephus, *Ant.* v, 10, 4). "The Lord uncovered his ear" to whisper into it in the stillness of the night the messages that were to be delivered. It is the first distinct intimation of the idea of "Revelation" to a human being (see Gesenius, *in voc.* רָאָה). He was consulted far and near on the small affairs of life; loaves of "bread," or "the fourth part of a shekel of silver," were gratuities offered for the answers (1 Sam. ix, 7, 8). See PRESENT.

From this faculty, combined with his office of ruler, an awful reverence grew up round him. No sacrificial feast was thought complete without his blessing (1 Sam. ix, 13). When he appeared suddenly elsewhere for the same purpose, the villagers "trembled" at his approach (xvi, 4, 5). A peculiar virtue was believed to reside in his intercession. He was conspicuous in later times among those that "call upon the name of the Lord" (Psa. xcix, 6; 1 Sam. xii, 18), and was placed with Moses as "standing" for prayer, in a special sense, "before the Lord" (Jer. xv, 1). It was the last consolation he left in his parting address that he would "pray to the Lord" for the people (1 Sam. xii, 19, 23). There was something peculiar in the long-sustained cry or shout of supplication, which seemed to draw down as by force the divine answer (vii, 8, 9). All night long, in agitated moments, "he cried unto the Lord" (xv, 11). The power of Samuel with God, as an intercessor for the people, is compared to that of Moses (Jer. xv, 1; Psa. xcix, 6). See Plumtre, *Life of Samuel* (Lond. 1842, 18mo); Anon. *Life and Times of Samuel* (ibid. 1863, 12mo).

SAMUEL, FIRST AND SECOND BOOKS OF. These two historical portions of Scripture, in all the editions of the original and versions, immediately precede the books of Kings, and are intimately connected with them. (In the present article we freely use the dictionaries of Kitto, Smith, and Fairbairn, particularly the last.)

I. Name and Division.—The books so called received this name (which is now customarily attached to them in Hebrew printed texts) subsequently to the completion of the Sept., in which their present name is *Βασιλειῶν Πρώτη, Βασιλειῶν Δευτέρα* (*First and Second of Kings*); and similarly in the Vulg. Hence they are entitled in the English version "The First [or Second] Book of Samuel, otherwise called the First [or Second] Book of the Kings." The name may in some measure be explained and justified on the ground that the early part of the first book is chiefly concerned about Samuel, and that the two kings Saul and David, whose reigns occupy all the rest of the books, were both anointed by Samuel to their office.

In Hebrew MSS. the work is one, and not two. The present division was first made in the Sept., and was thence adopted into the Vulg. But Origen, as quoted by Eusebius (*Hist. Eccles.* vi, 25), expressly states that they formed only one book among the Hebrews. Jerome (*Præfatio in libros Samuel et Malachim*) implies the same statement; and in the Talmud (*Baba Bathra*,

fol. 14, c. 2), wherein the authorship is attributed to Samuel, they are designated by the name of his book, in the singular number (שְׁמוֹת סֵפֶר סָמוּאֵל). After the invention of printing they were published as one book in the first edition of the whole Bible printed at Soncino in A.D. 1488, and likewise in the Complutensian Polyglot printed at Alcalá, A.D. 1502–1517; and it was not till the year 1518 that the division of the Sept. was adopted in Hebrew, in the edition of the Bible printed by the Bombergers at Venice. The work constitutes a separate and independent whole, and is not to be joined either with the book of Judges or with that of Kings, from which it differs by many important characteristics.

II. Contents.—The statements of the books of Samuel belong to an interesting period of Jewish history. The preceding book of Judges refers to the affairs of the republic as they were administered after the conquest, when the nation was a congeries of independent cantons, sometimes partially united for a season under an extraordinary dictator. As, however, the mode of government was changed, and remained monarchical till the overthrow of the kingdom, it was of national importance to note the time, method, and means of the alteration. This change happening under the regency of the wisest and best of their sages, his life became a topic of interest. The first book of Samuel gives an account of his birth and early call to the duties of a seer, under Eli's pontificate; describes the low and degraded condition of the people, oppressed by foreign enemies; proceeds to narrate the election of Samuel as judge; his prosperous regency; the degeneracy of his sons; the clamor for a change in the civil constitution; the installation of Saul; his rash and reckless character; his neglect of, or opposition to, the theocratic elements of the government. Then the historian goes on to relate God's choice of David as king; his endurance of long and harassing persecution from the reigning sovereign; the melancholy defeat and death of Saul on the field of Gilboa; the gradual elevation of the man "according to God's own heart" to universal dominion; his earnest efforts to obey and follow out the principles of the theocracy; his formal establishment of religious worship at Jerusalem, now the capital of the nation; and his series of victories over all the enemies of Judæa that were wont to molest its frontiers. The annalist records David's aberrations from the path of duty; the unnatural rebellion of his son Absalom, and its suppression; his carrying into effect a census of his dominions, and the divine punishment which this act incurred; and concludes with a few characteristic sketches of his military staff. The second book of Samuel, while it relates the last words of David, yet stops short of his death. As David was the real founder of the monarchy and arranger of the religious economy; the great hero, legislator, and poet of his country; as his dynasty maintained itself on the throne of Judah till the Babylonian invasion, it is not a matter of wonder that the description of his life and government occupies so large a portion of early Jewish history. The books of Samuel thus consist of three interlaced biographies—those of Samuel, Saul, and David. The following are the details:

1. Israel under Samuel (1 Sam. i–xii; B.C. 1120–1093).—The parentage, birth, and consecration of Samuel (ch. i); Hannah's prayer (ii, 1–10); the evil practices of the sons of Eli; a man of God predicts the troubles which shall befall Eli (ii, 10–33); God calls Samuel in the night, and reveals to him the judgment of the house of Eli, to whom Samuel declares it (iii, 1–18); Samuel is established to be a prophet in Shiloh (iii, 19–iv, 1); a battle of the Philistines with the Israelites between Aphek and Eben-ezer; the Israelites, being defeated, send for the ark from Shiloh; another battle ensues, in which Israel is again smitten, the ark is taken, and the two sons of Eli slain; the news is carried

to Eli, who dies; Ichabod is born (ch. iv); penalties inflicted on the Philistines on account of the ark of God; it is sent back with presents to Israel, first to Beth-she-mesh, and then to Kirjath-jearim (v-vii, 1); the reformation under Samuel and the national assembly at Mizpeh (vii, 2-6); the Philistines again invade Israel, but at the cry of Samuel the Lord discomfits them with thunder, and they are smitten before Israel; their conquests restored to Israel from Ekron to Gath, and peace established (vii, 7-14); Samuel judges Israel in a circuit of four cities yearly (vii, 15-17); becoming old, he makes his sons judges over Israel, but their conduct is bad (viii, 1-3); the elders of Israel come to Samuel at Ramah and demand a king; Samuel protests, but by divine direction yields at length (viii, 4-22); Saul, son of Kish, seeking the lost asses of his father, visits Samuel, who, forewarned by God of his coming, entertains him with honor, and on parting anoints him to be king, and gives him signs in confirmation, which come to pass; Samuel then calls an assembly at Mizpeh, and there Saul is publicly designated by lot to be king over Israel, but not acknowledged by all the people (ch. ix, x); the men of Jabesh-gilead, sending to Gibeah in their distress, Saul is roused to aid them, and gains a great victory over the Ammonites; then Saul is joyfully recognised as king by all the people at Gilgal, where Samuel renews the kingdom (ch. xi); there Samuel addresses the people, vindicates his own conduct, and exhorts them to fidelity to God and their king; the miracle of thunder and rain at wheat-harvest (ch. xii).

2. *Israel under King Saul* (1 Sam. xiii-xxxi; B.C. 1093-1053).—Saul forms an army of two thousand men under his own command at Michmash, and one thousand under Jonathan at Gibeah; Jonathan smites the Philistine garrison at Geba, and the Philistines gather a great army; Israel is greatly distressed; Saul awaits Samuel at Gilgal, but begins to offer sacrifice before his arrival, for which act of disobedience he is rejected of God (xiii, 1-14); in the extremity of the times Jonathan and his armor-bearer discomfit the Philistines at Michmash; in the general pursuit Jonathan tastes honey contrary to the command of Saul; his life is spared at the demand of the people (xiii, 15-xiv, 45); Saul's successes in war against the neighboring tribes; his children and relatives named (xiv, 46-52); Saul, commanded to exterminate Amalek, only partially obeys, and Samuel declares to him his rejection from the kingdom; Samuel and Saul finally part (ch. xv); Samuel is sent to Bethlehem to anoint David, son of Jesse, to be king (xvi, 1-13); in consequence of Saul's malady, David is sent for to cheer him with music (xvi, 14-23); the Philistines and the Israelites arrayed for battle in the valley of Elah; Goliath challenges Israel, and is killed by David (ch. xvii); Jonathan and David make a covenant of friendship; Saul retains David near him, and sets him over his men of war; the women-singers give greater honor to David than to Saul, who is displeased, and seeks to destroy David (ch. xviii); Jonathan takes David's part and Michal also; David flees to Samuel at Ramah; they go together to Naioth; Saul sends messengers, and then goes himself to fetch David; they all prophesy (ch. xix); David visits Jonathan; they renew their covenant; Jonathan makes known to David by the device of the arrows Saul's determination to kill him; their parting (ch. xx); David flees to Nob, where he obtains the shewbread, and proceeds to Achish, king of Gath, and feigns madness; then to the cave of Adullam, to Mizpeh of Moab, and to Hareth; Saul kills Ahimelech and the priests by the hand of Doeg the Edomite (ch. xxi, xxii); David saves Keilah from the Philistines, but leaves it on the approach of Saul, and abides in the wilderness of Ziph, where Jonathan visits him; Saul is recalled from the pursuit of David by an invasion of the Philistines (ch. xxiii); David in the wilderness of Engedi spares Saul's life (ch. xxiv); Samuel's death and burial; the narrative of Nabal and his wife Abigail (ch. xxv); David again spares the life of

Saul at Hachilah; he goes with six hundred men to Achish, king of Gath, who gives him Ziklag to dwell in; the Philistines encamp against Israel; Saul in vain seeks counsel from God, and then has recourse to the witch of Endor; the princes of the Philistines refuse David's aid in battle (ch. xxvi-xxix); David returns to Ziklag and finds it desolated; he pursues the Amalekites and recovers the spoil (ch. xxx); the battle of Gilboa; Saul and his three sons die (ch. xxxi); the news of Saul's death reaches David at Ziklag, and calls forth his touching dirge or lamentation over Saul and Jonathan (2 Sam. i).

3. *The Unsettled Succession*.—Ishbosheth king of Israel, David of Judah (2 Sam. ii-v, 3; B.C. 1053-1046).—David is anointed king of Judah at Hebron; Ishbosheth is made king of Israel; the fight between the followers of David and of Ishbosheth by the pool of Gibeon (ch. ii); David's power increases in Hebron; six sons born to him there; Abner forsakes Ishbosheth, and makes terms with David to transfer the kingdom of Israel to him; is slain by Joab; David's lamentation over him (ch. iii); the head of Ishbosheth is brought by Rechab and Baanah to David, who punishes them for the deed (ch. iv); the tribes of Israel make David their king (v, 1-3).

4. *Israel under King David* (2 Sam. v, 4-xxiv; B.C. 1046-1013).—David, after being king of Judah for seven years and a half, reigns thirty-three years in Jerusalem over all Israel; he captures the fortress of Zion from the Jebusite, forms a friendship with Hiram king of Tyre, defeats the Philistines at Baal-perazim, and again from Geba unto Gazer (ch. v); David brings up the ark of the Lord; the breach of Uzzah; the house of Obed-edom is blessed; the ark brought to Jerusalem; Michal derides David for dancing before the ark (ch. vi); David is forbidden to build a house for the Lord in a message brought to him by Nathan the prophet, who announces the establishment of his dynasty; David's prayer (ch. vii); his victories over the Philistines, Moabites, Edomites, etc., recited (ch. viii); his kindness to Mephibosheth (ch. ix); his victory over Bene-ammon (ch. x); his sin with Bathsheba and Uriah; Nathan's parable; punishment denounced; David's penitence: the child dies; Solomon is born; David captures Rab-bah of Bene-ammon (ch. xi, xii); the affair of Ammon and Tamar; Absalom's revenge and flight to Geshur; Joab artfully procures his return after three years' absence (ch. xiii, xiv); the rebellion of Absalom and the flight of David; the ark, the priests, and Hushai sent back to Jerusalem; the treachery of Ziba; the reviling of Shimei; conflicting advice given by Hushai and Ahitophel to Absalom, and Ahitophel's suicide (ch. xv-xvii); the battle in the forest of Ephraim; Absalom's death; David's great grief (ch. xviii); David's return to Jerusalem; the conduct of Shimei, Mephibosheth, and Barzillai; the rivalry between Judah and Israel in bringing back the king (ch. xix); the rebellion of Sheba; Joab slays Amasa; Sheba's head given to Joab at Abel (ch. xx); the three years' famine, and the appeasement of the Gibeonites; the burial of the bones of Saul and his sons; the giants of the Philistines slain by David's servants (ch. xxi); David's song (Psa. xviii) (ch. xxii); the last words of David; the names and exploits of his heroes (ch. xxiii); the numbering of the people and the pestilence (ch. xxiv).

III. *Origin and Structure*.—It is evident that Samuel could not be the author of the whole of these books, since his death is recorded in the 25th chapter of the first book, and the history continues after his death down to nearly the end of the reign of David, a period of perhaps forty-five years. There is a somewhat common opinion that the first twenty-four chapters were written by Samuel and the rest by Gad and Nathan—an opinion founded on 1 Chron. xxix, 29: "Now the acts of David the king, first and last, are they not written in the book of Samuel the seer, and in the book of Nathan the prophet, and in the book of Gad the seer?"

There is much in the general structure of the books, and in the relation of the several parts to each other, to render it probable that different writers, living at different times, were concerned in their production, notwithstanding the degree of uniformity which the style and language exhibit. The most reasonable supposition is that they were the work of one compiler, who used historical records of various sources. This opinion, though held by nearly all modern critics, as Thénius, and even by Hävernick and Keil, is not new, as Diodorus of Tarsus, Theodoret, St. Athanasius, and St. Gregory observed that the four books of Kings were historical abridgments of several books or memoirs of the prophets which are cited in them. The grounds on which this view of the origin of these books is based have, however, only in very recent times been fully expounded. Warning the reader against attaching undue importance to the evidence which has been adduced in proof of this position, his attention may nevertheless be directed to the following points:

1. There is considerable difference in the manner of the writers; some portions contrasting in their brief, fragmentary, chronological character with others which are more full and copious, and (in one part at least) minutely biographical (comp. 1 Sam. v, 1-16; viii; xx, 15-22; xxiii, 8-29, with 2 Sam. xi-xx).

2. In several places there may be perceived the conclusion of the original documents, to which additional matter has been attached, yet without being so joined as to appear like a natural continuation. In some places the compiler has placed *together* what he found narrated by *different* writers respecting the persons whose histories they wrote, without having so worked them up into one narrative as to harmonize all their parts (1 Sam. vii, 15-17; xiv, 47-52; 2 Sam. viii, 15-18; xx, 23-26).

3. Of some events there appear to be double accounts recorded, and occasionally these accounts are different, and sometimes, apparently at least, inconsistent; as, for instance, how Saul became king (1 Sam. ix-x, 16, and x, 17-27); how and why Saul was rejected (xxiii, 8-14, and xv, 10-26); how David became known to Saul (xvi, 14-21, and xvii, 55-xviii, 2); how David spared Saul's life (ch. xxiv and xxvi); how David went over to the Philistines (xxi, 10-15, and xxvii, 1-4); how the proverb "Is Saul also among the prophets?" arose (x, 9-13, and xix, 22-24). It should here be remarked that these alleged discrepant passages, as well as many more which sceptical critics have adduced, need to be explained, whatever opinion may be held respecting the authorship of these books. As, for instance, the statement that Samuel (vii, 15-17) was all his life long judge over Israel, but according to viii, 1-3 had surrendered the office to his sons (but see xii, 2); the occasion and the motives for demanding a king, as differently stated in viii, 5 and xii, 12; the two accounts of Goliath (xvii, 1-10, and 2 Sam. xxi, 19); the double record of Samuel's death (1 Sam. xxv, 1 and xxviii, 3); the two descriptions of the manner of Saul's death (xxxi, 1-6 and 2 Sam. i, 1-10); the twofold account of the battle with the Syrians (2 Sam. viii and x), etc. Such different, though not therefore discordant, portions of the work may probably be best explained on the assumption that the books consist of materials brought together from various sources. This origin may be granted, however, without admitting that there is any inconsistency or contradiction among the materials so joined together; just as in the case of the Gospel history, which is constituted by the separate narratives of four different, but not therefore discordant, writers. It is not the object of this article to *explain* the alleged inconsistencies, however completely that might be done. They are here mentioned only as they bear upon the question of authorship, and as they seem to indicate the use of a variety of materials by the author or compiler of these books.

4. The relation between the books of Chronicles and the books of Samuel is thought to point to the same

conclusion. It can scarcely be maintained that the author of the Chronicles has derived from the books of Samuel all the materials for the narratives which are common to both works. There are so many variations between the history as related by the chronicler and as related in Samuel as to render it probable, not that the chronicler derived everything from Samuel, but that he had access to the sources used also by the compiler of Samuel. This may be explained by a comparison of 2 Sam. v, 1-10 and xxiii, 8-39 with 1 Chron. xi, xii. The chronicler has placed in continuous narrative David's anointing as king of Israel at Hebron, the capture of Jerusalem, the building of the city of David, and the list of David's heroes, with their deeds, probably as he found them connected in the documents which he used; while in Samuel they are detached, the list of heroes being placed separately in the history of the latest period of the life of David. So in 1 Chron. iii, the list of David's children is given in a form probably drawn from some official register to which the writer of Samuel had access, as he gives the list in two portions to suit the course of his narrative (2 Sam. iii, 2-5; v, 14-16).

5. The hand of a compiler is thought to be perceptible in certain detached observations here and there occurring in the course of the history, in the way of explanation of some portion drawn from the documents; as for example, in 1 Sam. ix, 9, the expression *וְהָיָה* is explained: For "the prophet" of to-day was called formerly "the seer." 1 Sam. xvii, 14, 15, is regarded as an interposed remark, to connect this history with the account given in the previous chapter of the family of Jesse.

IV. *The Sources.*—Should these books then appear to be a compilation from several original documents, the interesting question arises, How far may it be possible to resolve the whole work into its constituent parts, so as to obtain some idea of the nature of the sources whence the parts were derived? Thénius has attempted to solve this difficult problem in the following way. On internal grounds he distinguishes five principal sources:

(a.) *A History of Samuel*, contained in 1 Sam. i-vii, which seems to conclude naturally as a separate and independent narrative, in which Samuel is altogether the principal person.

(b.) *A History of Saul*, comprised in the following portions: 1 Sam. viii; x, 17-27; xi; xii; xv; xvi; xviii, 6-14; xxvi; xxviii, 3-25; xxxi. The materials derived from this source are interwoven with others derived from a third source, viz.:

(c.) *A History of David*, from which have been derived the following portions: 1 Sam. xiv, 52; xvii; xviii, in part; xix; xx; xxi, in part; xxii; xxiii; xxiv; xxv; xxvii; xxviii, 1, 2; xxix; xxx; 2 Sam. i-v; vii; viii.

(d.) *Another History of Saul*, from which 1 Sam. ix; x, 1-16; xiii; and xiv have been drawn. This is regarded as an older and more strictly historical document than b, that being considered as of much later origin, and as founded on tradition.

(e.) *Lastly, a Biography of David*, embracing full details of the second half of his life, and recounting his family history (2 Sam. xi; xii, 1-25; xiii-xx).

The relation of 2 Sam. xxi-xxiv to the preceding portions seems to be that of a supplement or appendix of matters not related in chronological order, nor having any close connection with each other.

There is doubtless very much hypercriticism in this account of Thénius. So far as authorities or sources are quoted in the books themselves, the matter is much more simple. To only one work is direct reference made, viz. to the book of the upright (Jasher), *סֵפֶר הַיָּשָׁר* (2 Sam. i, 18), elsewhere also quoted only once (Josh. x, 13), and, as both the quotations are in verse, the work is thought to have been a book of poems. See JASHER, BOOK OF.

There are, however, certain parts of the books of Samuel which must have been derived either from verbal tradition or from some written documents, such, for instance, as the following poetical pieces: the song of Hannah (1 Sam. ii, 1-10); David's lamentation over Saul and Jonathan (2 Sam. i, 19-27); David's lament over Abner (iii, 33, 34); Nathan's parable (xii, 1-4); a song or psalm of David (xxii, 2-51 [Psalm xviii]); the last words of David (xxiii, 1-8). To these must be added the lists of names and genealogies, etc.

It is said in 1 Chron. xxix, 29, "Now the acts of David the king, first and last, behold, they are written in the book of Samuel the seer, and in the book of Nathan the prophet, and in the book of Gad the seer." The old opinion as to the authorship of Samuel, to which we have already alluded, was founded on this quotation. The prophets were wont to write a history of their own times. That Samuel did so in reference to the great events of his life is evident from the statement that he "wrote the manner of the kingdom in a book, and laid it up before the Lord" (1 Sam. x, 25). The phrase *סֵפֶר שְׁמוֹאֵל*, "words of Samuel," may not refer to our present Samuel, which is not so comprehensive as this collection seems to have been. It does not, like the treatise to which the author of Chronicles refers, include "the acts of David, first and last." The annals which these three seers compiled were those of their own times in succession (Kleiner, *Aechtheit d. Jes.* pt. i, p. 83); so that there existed a history of contemporary events written by three inspired men. The portion written by Samuel might include his own life, and the greater part of Saul's history, as well as the earlier portion of David's career. Gad was a contemporary of David, and is termed his seer. Probably also he was one of his associates in his various wanderings (1 Sam. xxii, 5). In the latter part of David's reign Nathan was a prominent counsellor, and assisted at the coronation of Solomon. We have, therefore, prophetic materials for the books of Samuel. Hävernick (§ 161) supposes there was another source of information to which the author of Samuel might resort, namely, the annals of David's reign—a conjecture not altogether unlikely, as may be seen by his reference to 2 Sam. viii, 17, compared with 1 Chron. xxvii, 24. The accounts of David's heroes and their mighty feats, with the estimate of their respective bravery, have the appearance of a contribution by Seruiah, the scribe, or principal secretary of state. Out of such materials—ample and authoritative, some of them written and some of them oral—the books of Samuel appear to be made up (Bunsen, *Bibelwerk*, pt. ii, p. 496; Karo, *De Fontibus Librorum que feruntur Samuelis* [1862]).

V. *Antiquity*.—The external evidence carries the book only to the age of the Ptolemies, when the Sept. version was made, or possibly to the age of Nehemiah, if we may trust the apocryphal account of the foundation of a library by the latter (2 Macc. ii, 13). But the *internal* evidence is much stronger. The high antiquity of the books of Samuel, or of the sources whence they were principally derived, in comparison with that of the Kings and Chronicles, appears from the absence of reference to older sources or authorities in the former, such as is frequently made in the latter. It hence appears that the compiler did not live at any great distance from the events which he relates, and therefore does not deem it needful to refer his readers to sources already known to them; while the original sources have for the most part all the marks of having been written by persons contemporaneous with the events described. Against this opinion as to the early age of the books of Samuel, various objections have been brought. The phrase "unto this day" is often employed in them to denote the continued existence of customs, monuments, and names whose origin has been described by the annalist (1 Sam. v, 5; vi, 18; xxx, 25). This phrase, however, does not always indicate that a long interval of time elapsed be-

tween the incident and such a record of its duration. It was a common idiom. Joshua (xxii, 3) uses it of the short time that Reuben, Gad, and the half-tribe of Manasse had fought in concert with the other tribes in the subjugation of Canaan. So, again, he (xxiii, 9) employs it to specify the time that intervened between the entrance into Canaan and his resignation of the command on account of his approaching decease. Matthew, in his Gospel (xxvii, 8, and xxviii, 15), uses it of the period between the death of Christ and the composition of his book. Reference is made in Samuel to the currency of a certain proverb (1 Sam. x, 12), and to the disuse of the term *seer* (ix, 9), but in a manner which by no means implies an authorship long posterior to the time of the actual circumstances. The proverb, "Is Saul also among the prophets?" was one which for many reasons would obtain rapid and universal circulation; and, if no other hypothesis be considered satisfactory, we may suppose that the remark about the term "seer" becoming obsolete may be the parenthetical insertion of a later hand; or, it may be that in Samuel's days the term *nabi* came to be technically used in his school of the prophets. See *PROPHET*. There is little reason for supposing that any part of the work was composed even so late as subsequently to the division of the kingdom. For the expression "Israel and Judah" (occurring 1 Sam. xi, 8; xvii, 52; xviii, 16; 2 Sam. iii, 10; v, 5; xxiv, 1), which is claimed as proof of an origin *after* the division of the kingdom under Rehoboam, has no such force (as must be obvious from 2 Sam. ii, 4, 9, 10, 17, 28; xviii, 6, 7, 16; xix, 9, compared with 12, 15, 16), from which it is clear that the phrase, if not already in use, originated in the circumstances that at first only the tribe of Judah adhered to David, while the remaining tribes under the common name of Israel formed a separate kingdom for seven years and a half, under Ishbosheth, and afterwards for a short time under Absalom. There is, however, one passage, 1 Sam. xxvii, 6, "Therefore hath Ziklag been to the kings of Judah till this day," which is not so clearly reconcilable with this view, unless it should prove to be a note added by a later hand.

With this claim to high antiquity the other internal evidence, so far as it goes, entirely agrees. In the unsettled times of the judges the observance of the ritual enjoined in the books of Moses had fallen greatly into disuse. Sacrifices which were lawful only before the door of the tabernacle were offered at many places, as at Mizpeh and Gilgal. No disapprobation of this practice is expressed in Samuel, though it very often is so in Kings. The Pentateuch seems to exert little influence on the habits of the people as described in Samuel, or on the ideas and language of the writers. There are, indeed, fewer allusions to Moses and his writings in Samuel than in any other of the early books of Scripture. But this may doubtless be in part accounted for by the disorganized and somewhat anomalous state into which matters fell in consequence of the capture of the ark by the Philistines, and the essentially new era which was shortly afterwards introduced by the institution of the kingdom, with the stirring events that followed in the personal histories of Saul and David. The name of Moses occurs fifty-six times in Joshua, in Judges three, in Samuel two, in Kings ten, in Chronicles thirty-one. The law of Moses is never once named in Samuel.

The language is distinguished by its purity, and this also is an argument for the early origin of these books. A considerable number of words and forms of words are peculiar to them, and several occur which are found only in one other book besides. But it is unnecessary here to give lists of them.

VI. *The Author or Compiler*.—With the exception of a brief expression in the Talmud (*Egyptian Gemara*, A.D. 500, *Baba Bathra*, fol. 14), שְׁמוֹאֵל כָּתַב סֵפֶר ("Samuel wrote his book"), there is no opinion expressed by antiquity respecting the name of the author. No

mention is made of it in the books of Samuel, Kings, or Chronicles, or in any part of the Bible. Nor is it named in the Apocrypha or in Josephus. The work is generally attributed to some competent historian, who availed himself of authentic documents in preparing it. Some writers, as Abarbanel and Grotius, ascribe it to Jeremiah, some to Ezra, and some to Isaiah. There is not nearly so much probability that Jeremiah compiled the books of Samuel (as is argued at some length by Hitzig, *Die Psalmen*, p. 48-85) as there is that he was the writer of the books of Kings. There is much greater dissimilarity of language, style, and spirit between Samuel and Jeremiah than between Kings and Jeremiah. The great number of words and forms of words peculiar to this work point out a distinct author and age, and it would seem most likely that it was compiled in an early period after the death of David, and previously to the rending of the kingdom under Rehobam; unless the opinion which has widely prevailed in the Christian Church should be finally adopted, that the work begun by Samuel was carried on and finished before the death of David by Nathan and Gad, or that it was the work of some member of the school of the prophets who had personal knowledge of the events which he narrates. If, however, this theory cannot be maintained, and there should be grounds for supposing that the compiler lived not earlier than the times of Rehobam (see Thienius on 2 Sam. viii. 7; xiv. 27), still it must be acknowledged that the materials which he used were of earlier date, and must for the most part have been written by persons who were contemporaneous with the events. It appears certain that memoirs were written by Samuel, Nathan, and Gad (see 2 Chron. xxix. 29), and perhaps also by other members of the schools of the prophets, although it may not be equally certain that those memoirs are identical with the present books of Samuel. The fact that a recorder or remembrancer (רִשְׁמָנִי, *rismani*), whose office it was to prepare memoirs or annals of passing events, is mentioned early among the household of David, is not without an important bearing on this question. It is clear that the authors of the original documents, if not of the work itself, must have occupied such positions of honor and influence as gave them ample opportunity of knowing the events of the times in which they wrote. Such minute details as we find, for instance, in the history of David, belonging rather to his private than to his public life—the story of Bathsheba, of David's behavior on the death of her child, of Amnon and Tamar, of the secret sending to the priests from Mahanaim, etc.—bespeak perfectly well instructed writers, who had access to the best sources of information.

Stähelin (*Einleit.* § 25, etc.) conjectures that a large portion of Samuel was written by the author of the Pentateuch and of the books of Joshua and Judges. But continuity of history in the same form does not prove identity of authorship, nor are the similar phrases found in these books sufficient in number or characteristic idiom to support the theory. Nay, Samuel is free from the so-called Chaldaisms of Judges and the archaisms of the Pentateuch. The peculiar theory of Jahn, on the other hand, is that the four books of Samuel and Kings were written by the same person, and at a date so recent as the 30th year of the Babylonian captivity. His arguments, however, as well as those of Eichhorn (*Einleit.* § 468), and Herbst (*Einleit.* ii. 1-139), who hold a similar view, are more ingenious than solid (introduction, § 46). The fact of all the four treatises being named "Books of Kings" is insisted on as a proof that they were originally undivided and formed a single work—a mere hypothesis, since the similarity of their contents might easily give rise to this general title, while the more ancient appellation for the first two was *The Books of Samuel*. Great stress is laid on the uniformity of method in all the books. But this uniformity by no means amounts to any proof of identity of author-

ship. It is nothing more than the same Hebrew historical style. The more minute and distinctive features, so far from being similar, are very different. Nay, the books of Samuel and Kings may be contrasted in many of those peculiarities which mark a different writer:

(a.) In Kings there occur not a few references to the laws of Moses; in Samuel not one of these is to be found.

(b.) The books of Kings repeatedly cite authorities, to which appeal is made, and the reader is directed to the "Acts of Solomon," "the book of the Chronicles of Kings of Israel," or "Judah." But in the books of Samuel there is no formal allusion to any such sources of information.

(c.) The nature of the history in the two works is very different. The plan of the books of Samuel is not that of the books of Kings. The books of Samuel are more of a biographical character, and are more limited and personal in their view.

(d.) There are in the books of Kings many later forms of language. For a collection of some of these the reader is referred to De Wette (*Einleit. in das A. T.* § 185, note e). Scarcely any of those more recent or Chaldaic forms occur in Samuel. Besides, some peculiarities of form are noted by De Wette (§ 180), but they are not so numerous or distinctive as to give a general character to the treatise (Hirzel, *De Chaldaismi Bibl. Origine*, 1830). Many modes of expression common in Kings are absent from Samuel (Keil, *Einleit.* § 53). See KINGS, BOOKS OF.

(e.) The concluding chapters of the second book of Samuel are in the form of an appendix to the work—a proof of its completeness. The connection between Samuel and Kings is thus interrupted. It appears, then, that Samuel claims a distinct authorship from the books of Kings. Stähelin, indeed, supposes that the present division between the two treatises has not been correctly made, and that the two commencing chapters of 1 Kings really belong to 2 Samuel. This he argues on philological grounds, because the terms *והזכירי* (1 Kings i. 38), *מלך נש* (i. 12), and *מלך נש* (i. 29) are found nowhere in Kings but in the first two chapters, while they occur once and again in Samuel. There is certainly something peculiar in this affinity, though it may be accounted for on the principle that the author of the pieces or sketches which form the basis of the initial portions of 1 Kings not only composed those which form the conclusion of Samuel, but also supervised or published the whole work which is now called by the prophet's name.

Thus the books of Samuel have an authorship of their own—an authorship belonging to a very early period. While their tone and style are very different from the later records of Chronicles, they are also dissimilar to the books of Kings. They bear the impress of a hoary age in their language, allusions, and mode of composition. The insertion of odes and snatches of poetry, to enliven and verify the narrative, is common to them with the Pentateuch. They abound in minute sketches and vivid touches. As if the chapters had been extracted from a diary, some portions are more fully detailed and warmly colored than others, according as the original observer was himself impressed. Many of the incidents, in their artless and striking delineation, would form a fine study for a painter.

VII. *The Object.*—So far as the compiler of these books might be conscious of a direct aim in his work, producing it, as doubtless he did, under the impulse and guidance of the Holy Spirit, it might be his endeavor to continue the history of the chosen people, and especially to record the remarkable change which was effected in the method of the divine government, when the God of Israel ceased to rule the people by judges, and permitted them to be governed by kings, as were the other nations of the earth. In pursuing this object the writer took care to point out the important distinction which

was to be maintained between the kings of Israel and those of other nations, in the separation of the civil from the ecclesiastical, or the secular from the religious authority; and also to describe the origin and influence of the prophetic order in relation both to the monarchy and to the people. The books of Kings are a history of the nation as a theocracy; those of Chronicles have special reference to the form and ministry of the religious worship, as bearing upon its re-establishment after the return from Babylon. Samuel is more biographical, yet the theocratic element of the government is not overlooked. It is distinctly brought to view in the early chapters concerning Eli and his house, and the fortunes of the ark; in the passages which describe the change of the constitution; in the blessing which rested on the house of Obed-Edom; in the curse which fell on the Bethshemites and Uzzah and Saul for intrusive interference with holy things.

VIII.—*Particular Relation to the Books of Chronicles.*—That portion of the history which is common to the books of Samuel and of Chronicles is found in 2 Sam. i–xxiv, and 1 Chron. x–xxi, beginning with the account of the death of Saul and ending with the story of the pestilence. Between these two narrations of the same period of history the following differences may be pointed out.

1. The book of Samuel contains, but that of Chronicles omits:

1. The story of David's kindness to Mephibosheth, 2 Sam. ix.
2. Of Bathsheba and Uriah, 2 Sam. xi, 2–xii, 25.
3. The rebellion of Absalom, 2 Sam. xiii, etc.
4. The surrender of seven of the sons of Saul to the Gibeonites, 2 Sam. xxi, 1–4.
5. A war with the Philistines, 2 Sam. xxi, 15–17.
6. David's song (Psa. cxviii), 2 Sam. xxii.
7. The last words of David, 2 Sam. xxiii.

2. The book of Samuel omits, but that of Chronicles contains:

1. A list of David's adherents.
2. A list of those who chose David to be king at Hebron.
3. David's preparation for building the Temple.
4. The arrangement of the Levites and priests for Temple service.
5. David's officers and heroes, etc.

3. The two works present several portions of the history in a different order, such as the following:

2 Sam. v, 11–25.....	1 Chron. xiv.
2 Sam. vi, 1–10.....	1 Chron. xi, 1–9.
2 Sam. vi, 3–11.....	1 Chron. xiii.
2 Sam. vi, 12–23.....	1 Chron. xv.
2 Sam. xxiii, 8–10.....	1 Chron. xi, 10–47.

4. The differences of verbal and grammatical forms in the narration of the same events in these two works are of such a nature as to indicate the greater antiquity of the books of Samuel. Nearly all the points in which Chronicles differ from Samuel may be distinctly explained by the more recent origin of the former. They are too numerous and minute to be here mentioned.

5. Many of the numbers in Samuel and Chronicles differ, as

2 Sam. x, 13, 18, 24, and 1 Chron. xix, 12, 18, 25.
2 Sam. xxiii, 8, " 1 Chron. xi, 11.
2 Sam. xxiv, 9, 13, " 1 Chron. xxi, 5, 12.

These discrepancies are doubtless to be accounted for on the ground of errors of transcription. Whether the numbers in Samuel are generally right, and those in Chronicles generally wrong, which is the common (but perhaps usually incorrect) opinion, or whether errors exist in both, cannot be determined until more careful attention shall have been given to the subject, and a more critical edition of the Hebrew text shall have been prepared. See CHRONICLES, BOOKS OF.

IX. *Chronology.*—One of the most striking points of difference between the books of Samuel and of Kings is the more sparing use of dates in the former. The means of determining the periods of time in which the various events recorded in them happened are exceedingly scanty. The most helpful are found in other parts of Scripture. Thus, in Acts xiii we find that Saul was

king "by the space of forty years." We know already that David reigned over Judah and all Israel forty years, and we have also calculated that Samuel must have lived about 110 years. If, then, Samuel died about five years before Saul, we find that the history covers a period of 155 years, except that brief portion of the life of David not contained in Samuel. These numbers agree with the usual dates assigned to the commencement and termination of the books of Samuel. See CHRONOLOGY.

X. *Canonicity, etc.*—The historical credibility and canonicity of these books need not be fully discussed in this place. The internal evidence of their truthfulness and the external evidence of their canonical authority are both complete. The style in which they are written is simple, natural, and bold. Places, times, and other minute details are freely and artlessly given. The course and connection of the history carry with them the proof of their truthfulness. The characters and events are in accordance with the times in which they are placed. Attempts to establish contradiction and discrepancy have not succeeded. The history contained in these books fits in and accords with the preceding and subsequent portions of the history of the Israelitish people, although the several portions were composed at long intervals and by different authors. Portions of them are quoted in the New Test. (2 Sam. vii, 14, in Heb. i, 5; 1 Sam. xiii, 14, in Acts xiii, 22). References to them occur in other sections of Scripture, especially in the Psalms, to which they often afford historic illustration. The old objections of Hobbes, Spinoza, Simon, and Le Clerc are well disposed of by Carpzov (*Introductio*, p. 215). Some of these supposed contradictions we have already referred to, and for a solution of others we refer to Davidson's *Sacred Hermeneutics*, p. 544, etc. Some of the objections of Vatke, in his *Bibl. Theol.*—"cujus mentio est refutatio"—are summarily disposed of by Hengstenberg (*Die Authentie des Pentat. ii*, 115). See, in addition to the ordinary Introductions to the Old Test.—such as those of Horne, Hävernick, Keil, De Wette—the following later works: Bleek, *Einleitung in das Alte Testament* (Berl. 1860), p. 355–368; Stähelin, *Specielle Einleitung in die kanonischen Bücher des Alten Testaments* (Elberfeld, 1862), p. 83–105; Davidson, *Introduction to the Old Testament* (Lond. and Edinb. 1862), p. 491–536.

XI. *Commentaries.*—The exegetical helps on the entire books of Samuel alone have not been numerous: Origen, *Selecta* (in *Opp.* ii, 479; also in Gallandii *Bibl. Patrum*, xiv); Ephrem Syrus, *Explanatio* (in *Opp.* iv, 331); Theodoret, *Questions* (in *Opp.* i, i); Gregory, *Expositiones* (in *Opp.* III, ii, 1); Jerome, *Questions* (in *Opp.* [Spur.], iii, 755); Eucherius, *Commentaria* (in *Bibl. Max. Patr.* vi); Procopius, *Scholía* [includ. other hist. books] (in Meursii *Opp.* viii, 1); Isidore, *Commentaria* (in *Opp.*); Bahe, *Expositio*, etc. (in various forms, in *Opp.*); Angelomus, *Enarrationes* (in *Bibl. Max. Patr.* xv); Hildebert, *Versio Metrica* (in *Opp.* p. 1191); Raban, *Commentarii* (in *Opp.*); Rupert, *Commentarii* (in *Opp.* i, 345); Hugo Victor, *Annotationes* (in *Opp.* i); Abrahanel, מִשְׁכָּל [includ. other hist. books] (s. l. et a. [Pesaro, 1522]; Naples, 1543, fol.; Leips. 1686, fol.); Bañolas, מִשְׁכָּל (Leiria, 1494, fol.; also in the Rabbinic Bibles); Bugenhagen, *Adnotationes* [includ. Deut.] (Basil. 1524; Argent. 1525, 8vo); Menius, *Commentarius* [on 1 Sam.] (Vitemb. 1532, 8vo); Brentius, *Commentaria* (in *Opp.* ii); Lambert, *Commentarius* (Argent. 1526; Francof. 1539, fol.); Caussin [R. C.], *Dissertationes* (Par. 1550, fol.; Colon. 1552, 4to); Weller, *Commentaria* [includ. 1 Kings] (Francof. 1555, 2 vols. 8vo); Peter Martyr, *Commentarii* (Tigur. 1567, fol.); Strigel, *Commentarius* [includ. Kings and Chron.] (Lips. 1569, 1583, fol.; Neost. 1591, 8vo); Borrbhaus, *Commentarius* [includ. other hist. books] (Basil. 1577, fol.); Allschul, מִשְׁכָּל (Cracow, 1595, fol., and later); Asewich,

מִצְוַת הַצִּדְקָה [includ. other hist. books] (Venice, 1601, 1620, fol., and later); Pflacker, *Predigten* (Tüb. 1602, fol.); Lañado, **כְּלִי רֶקֶר** [includ. other hist. books] (Venice, 1603, fol.); Bidemach, *Auslegung* (Tüb. 1605, fol.); Willet, *Harmony* (Cambr. 1606; Lond. 1607, 4to; ibid. 1614, fol.); Leonhart, *Hypomneme* [includ. Kings and Chron.] (Erf. 1608, 1614, 8vo); Serarius [R. C.], *Commentaria* [includ. other books] (Lugd. 1613; Mogunt. 1617, fol.); Laurent, *Auslegung* (Leips. 1615, 1616, fol.); Drusius, *Annotationes* [on parts, includ. other books] (Franc. 1618, 4to); Rangolius [R. C.], *Commentarii* (Par. 1621-24, 2 vols. fol.); De Mendoza [R. C.], *Commentaria* [on 1 Sam. i-xv] (Lugd. 1622-31, 3 vols. fol.); Sanchez [R. C.], *Commentarius* (Antw. 1624; Lugd. 1625, fol.); Crommius [R. C.], *Theses* (includ. other hist. books) (Lovan. 1631, 4to); De Vera [R. C.], *Commentaria* (Limæ, 1635, fol.); Bonfrère [R. C.], *Commentarius* [includ. Kings and Chron.] (Tornaci, 1643, 2 vols. fol., and later); Wulffer, *Predigten* (Nurem. 1670, 4to); De Naxera [R. Samuel BEN-DAVID OTOLENGO. See OTOLENGO.

Samuel BEN-ISAAC OCEDA. See OCEDA.

Samuel THE LITTLE (שְׁמִינָאֵל הַקָּטָן), a contemporary of Gamaliel II, is known in Jewish history as the author of the prayer against the *Minim*, or Jewish Christians. In the Talmud treatise *Berakoth*, fol. 28 b, we read: שְׁמוֹן מְקוֹלֵי הַסִּדֵּר שְׁמוֹנֵה עֶשְׂרֵה בְּרֻכּוֹת לְעַנִּי רֵבֶן גַּמְלִיאֵל עַל הַסֵּדֶר בִּרְבֵּנָה אָמַר לָהֶם רֵבִי גַמְלִיאֵל לְחַכְמִים כְּלוּם יֵשׁ אָדָם שְׂוִידָא לָחֶקֶן בְּרֻכָּה הַצְדֻקִּים? עַמֵּד שְׁמִינָאֵל הַקָּטָן וְהִקְנָה, i. e. "Simon Pakuli arranged the eighteen benedictions before rabban Gamaliel, in Jabne, in their present order. Rabban Gamaliel said to the sages, 'Is there none who knows to prepare a benediction against the Zaddukim or Sadducees?' Then arose Samuel the Little and prepared it." This *הַצְדֻקִּים*, or, as it is generally called, *ברכת המינים*, "the benediction against the *Minim*, or Jewish Christians," is the twelfth of the so-called *Sh'mone Esre*, or *Eighteen Benedictions* [comp. the art. SYNAGOGUE], and originally read *וְלִמְיָנִים* and *וְלִמְלַשְׁיָנִים* אל תְּהִי הַקִּיָּה לְחַכְמִים, i. e. "let there be no hope for the *Minim* and calumniators." That this prayer was directed against Jewish Christians is testified by Epiphanius (*Ep. adversus Hæres.* xxix, 9; ed. Petav. p. 124), who states: οὐ μόνον γὰρ οἱ τῶν Ἰουδαίων παῖδες πρὸς τοὺς [τοὺς Ναζωραίους] ἐκτεταγμένοι, ἀλλὰ ἀνιστάμενοι, ἔωσεν καὶ μέσης ἡμέρας καὶ περὶ τὴν ἱσπεράν, τρίς τῆς ἡμέρας ὅτε εὐχὰς ἐπιτελοῦσιν ἐαυτοῖς ἐν ταῖς συναγωγαῖς, ἐπαρῶνται αὐτοῖς καὶ ἀναθεματίζουσιν τρίς τῆς ἡμέρας φάσκοντες ὅτι Ἐπι καταράσι οὐ θεὸς τοὺς Ναζωραίους. With regard to these words of Epiphanius, Grätz remarks that Epiphanius, being by birth a Jew, is a competent witness that this formula was directed against the Jewish Christians.

It will be seen that the remark of Dr. Ginsburg, in *Kitto's Cyclop.* s. v. "Synagogue" (p. 906, note), is not justified either by the statement of Epiphanius or that of the Jewish historian Grätz. See Grätz, *Gesch. d. Juden*, iv, 434; Derenbourg, *Histoire de la Palestine*, p. 344-346; Schürer, *Lehrbuch der neutestamentlichen Zeitgeschichte*, p. 502. (B. P.)

Samuel MAROCCANUS. See MOROCCO, SAMUEL OF.

Samuel BEN-MEIR. See RASHBAM.

Samuel YERETZ, an Armenian historian, was born at Ani (Armenia Major), and lived in the 12th century. He was a disciple of George Melrig, and was requested by Gregory IV, patriarch of Armenia, to prepare a chronicle or universal history, which work he published under the title *Samuelis, Presb. Aniensis, temporum usque ad suam Ratio*. It is divided into two parts, commencing with the creation of the world and ending with the year 1179. It is really a mere abridgment of the chronicles of Eusebius increased by matter found in the *History of Armenia* by Moses of Choren, and in earlier writings now lost. The Latin translation was prepared by Dr. Zorab and Angelo May.

Samus, in Greek mythology, is an ancestral hero of the Samians, from whom both that people and the island Samos derived their names. He was the son of Ancæus, king of the Leleges, and Samia, daughter of Mæander. His brothers were Perilaus, Enudus, and Alitherses, and Parthenope was his sister.

Sanabas'sar (Σαναβάσσαρος, v. r. Σαναβάσσαρος, 1 Esdr. ii, 12, 15), or **Sanabas'sarus** (Σαναβάσσαρος, v. r. Σαβανάσσαρος, 1 Esdr. vi, 18, 20), the Greek form of the Heb. name SHESHBAZZAR in the corresponding passages (Ezra i, 8, 11; v, 14, 16).

Sanadon, NOËL-ÉTIENNE, a celebrated Jesuit, was born at Rouen, Feb. 16, 1676. At the early age of twelve he was admitted to the Order of Jesuits, and carried on his studies at Caen, where he afterwards taught rhetoric. His first literary attempt was a Latin poem entitled *Nicanor Moriens*. He subsequently wrote and translated many Latin poems, one of which, a translation of Horace, is considered his best work. In 1712 Sanadon was elected professor of rhetoric in the College of Louis the Great, and in 1728 he became librarian of the same institution. He died at Paris, Sept. 21, 1733.

Sanagen, in Hindû mythology, is a rajah of the children of the moon, the father of Darmatuwassa and grandfather of Kandikaiya.

Sanakadi Sampradayis, one of the Vaishnava sects among the Hindûs. They worship Krishna and Radha conjointly, and are distinguished from other sects by a circular black mark in the centre of the ordinary double streak of white earth, and also by the use of the necklace and rosary on the stem of the tulasai. The members of this sect are scattered throughout the whole of Upper India. They are very numerous about Mathura, and they are also among the most numerous of the Vaishnava sects in Bengal.

Sanarkumaren, in Hindû mythology, is one of the four perfect beings created by Brahma in order to recreate the destroyed human race; but as the pious offspring did not achieve that object, the evil spirit became the prevailing power in coition.

San'asib (Σανασιβ, v. r. Σαναβίς, Ἀνασιβίς), a head of the priests, "the sons of Jeddû, the son of Jesus," who are said to have returned, to the number of 972, with Zerubbabel from the captivity (1 Esdr. v, 24); evidently the 973 "children of Jedaiah, of the house of Jeshua," in the Heb. texts (Ezra ii, 36; Neh. vii, 39), the name *Sanasib* having been repeated for the "*Senaah*" (Esdras, "Annaas") of the preceding verse.

Sanat, in Finnish mythology, means songs of magical power which are chanted by the priests of the hea-

then Finns for the purpose of producing storms, curing the sick, causing favorable weather, bewitching cattle, etc.

Sanbal'lat (Heb. *Sanballat*, סַנְבַּלְאֵט, a name of which the latter part is of uncertain etymology, but the first syllable is probably the Sanscrit *san* [Greek *σύν*], indicative of *strength*; Sept. Σανβαλλάτ, Josephus, Σανβαλλήτης), a Horonite (q. v.), i. e. probably a native of Horonaim in Moab (Neh. ii, 10, 19; xiii, 28). There are two very different accounts of him.

All that we know of him from Scripture is that he had apparently some civil or military command in Samaria, in the service of Artaxerxes (Neh. iv, 2), and that, from the moment of Nehemiah's arrival in Judæa, he set himself to oppose every measure for the welfare of Jerusalem, and was a constant adversary to the Tirshatha. B.C. 445. His companions in this hostility were Tobiah the Ammonite and Geshem the Arabian (ii, 19; iv, 7). For the details of their opposition, see Neh. vi, where the enmity between Sanballat and the Jews is brought out in the strongest colors. The only other incident in his life is his alliance with the high-priest's family by the marriage of his daughter with one of the grandsons of Eliashib, which, from the similar connection formed by Tobiah the Ammonite (xiii, 4), appears to have been part of a settled policy concerted between Eliashib and the Samaritan faction. The expulsion from the priesthood of the guilty son of Joiada by Nehemiah must have still further widened the breach between him and Sanballat, and between the two parties in the Jewish state. Here, however, the scriptural narrative ends—owing, probably, to Nehemiah's return to Persia—and with it likewise our knowledge of Sanballat. See NEHEMIAH.

But on turning to the pages of Josephus a wholly new set of actions, in a totally different time, is brought before us in connection with Sanballat, while his name is entirely omitted in the account there given of the government of Nehemiah, which is placed in the reign of Xerxes. Josephus, after interposing the whole reign of Artaxerxes Longimanus between the death of Nehemiah and the transactions in which Sanballat took part, and utterly ignoring the very existence of Darius Nothus, Artaxerxes Mnemon, Ochus, etc., jumps at once to the reign of "Darius the last king," and tells us (*Ant.* xi, 7, 2) that Sanballat was his officer in Samaria, that he was a Cuthæan (i. e. a Samaritan) by birth, and that he gave his daughter Nicaso in marriage to Manasseh, the brother of the high-priest Jaddua, and consequently the fourth in descent from Eliashib, who was high-priest in the time of Nehemiah. He then relates that on the threat of his brother Jaddua and the other Jews to expel him from the priesthood unless he divorced his wife, Manasseh stated the case to Sanballat, who thereupon promised to use his influence with king Darius, not only to give him Sanballat's government, but to sanction the building of a rival temple on Mount Gerizim of which Manasseh should be the high-priest. Manasseh, on this, agreed to retain his wife and join Sanballat's faction, which was further strengthened by the accession of all those priests and Levites (and they were many) who had taken strange wives. But just at this time happened the invasion of Alexander the Great; and Sanballat, with seven thousand men, joined him and renounced his allegiance to Darius (*Ant.* xi, 8, 4). Being favorably received by the conqueror, he took the opportunity of speaking to him in behalf of Manasseh. He represented to him how much it was for his interest to divide the strength of the Jewish nation, and how many there were who wished for a temple in Samaria; and so obtained Alexander's permission to build the temple on Mount Gerizim, and make Manasseh the hereditary high-priest. Shortly after this, Sanballat died; but the temple on Mount Gerizim remained, and the Shechemites, as they were called, continued also as a permanent schism, which was continually fed

by all the lawless and disaffected Jews. Such is Josephus's account. If there is any truth in it, of course the Sanballat of whom he speaks is a different person from the Sanballat of Nehemiah, who flourished fully one hundred years earlier; but when we put together Josephus's silence concerning a Sanballat in Nehemiah's time, and the many coincidences in the lives of the Sanballat of Nehemiah and that of Josephus, together with the inconsistencies in Josephus's narrative (pointed out by Prideaux, *Connect.* i, 288, 290, 395, 466), and its disagreement with what Eusebius tells of the relations of Alexander with Samaria (who says that Alexander appointed Andromachus governor of Judæa and the neighboring districts; that the Samaritans murdered him; and that Alexander, on his return, took Samaria in revenge, and settled a colony of Macedonians in it, and the inhabitants of Samaria retired to Sichem [*Chron. Can.* p. 346]), and remember how apt Josephus is to follow any narrative, no matter how anachronistic and inconsistent with Scripture, we shall have no difficulty in concluding that his account of Sanballat is not historical. It is doubtless taken from some apocryphal romance, now lost, in which the writer, living under the empire of the Greeks, and at a time when the enmity of the Jews and Samaritans was at its height, chose the downfall of the Persian empire for the epoch, and Sanballat for the ideal instrument, of the consolidation of the Samaritan Church and the erection of the temple on Gerizim. To borrow events from some Scripture narrative and introduce some scriptural personage, without any regard to chronology or other propriety, was the regular method of such apocryphal books. (See 1 Esdras, apocryphal Esther, apocryphal additions to the book of Daniel, and the articles on them, and the story inserted by the Sept. after 2 Kings xii, 24, etc.). To receive as historical Josephus's narrative of the building of the Samaritan temple by Sanballat, circumstantial as it is in its account of Manasseh's relationship to Jaddua, and Sanballat's intercourse with both Darius Codomanus and Alexander the Great, and yet to transplant it, as Prideaux does, to the time of Darius Nothus (B.C. 409), seems scarcely compatible with sound criticism. See SAMARITAN.

San Benito, the garment worn by the victims of the Inquisition on the occasion of the auto-da-fé. It was a yellow frock, with a cross on the breast and on the back, devils and flames also being painted upon it. Those who were to be burned alive had the flames pointing upward, while those who had escaped this horrible fate had them pointing downward.

Sanborn, E. C., a minister of the Methodist Episcopal Church, was born in Bath, N. H., June 12, 1794. Early impressed that it was his duty to preach, he hesitated for some time. At length a portion of one of his hands became maimed for life; that hand, while yet bleeding, he held towards heaven, and promised God that he would no longer resist his convictions of duty. In 1833 he joined the Genesee Conference, and continued in effective work until 1844, when, through failing health, he was obliged to desist entirely from ministerial labor. He died at the residence of his son, Hon. L. R. Sanborn, Niagara County, N. Y., April 20, 1867. He entertained a high appreciation of the varied duties of the ministry, was a firm believer in the doctrines of his Church, and an ardent admirer of her polity. See *Minutes of Annual Conf.* 1867, p. 244.

Sanborn, Jacob, a minister of the Methodist Episcopal Church, was born in the town of Unity, N. H., May 16, 1788. His pious parents deeply impressed the mind of their son by their religious instructions, prayers, and holy life. At the age of seventeen years (1805), he was awakened, and found peace. Although of Baptist parentage, he united (Jan. 18, 1806) with the Methodist Episcopal Church. About five years after, he became impressed that it was his duty to preach, and on Aug. 14, 1811, he went to preach as a licentiate

on the Landaff Circuit, N. H. In June, 1812, he united on trial with the New England Conference, and from this time onward until 1850, with the exception of one year's location (1839-40), he performed effective labor. In 1850 he took a superannuated relation, which he retained until his death. He nevertheless continued to preach until May 10, 1863, when he delivered his last sermons in Pembroke. He died March 16, 1867. Mr. Sanborn was a more than ordinary man. He was a sound divine, good logician, able preacher, an eminently good pastor, a man of prayer, and of strict integrity of purpose and honesty of heart. See *Minutes of Annual Conf.* 1867, p. 59.

Sanbuki Codex is a Hebrew manuscript, now no more extant. Nothing is known of its author, the place where, and the time when it was written. According to Richard Simon (*Biblioth. Critic.* i, 367), the name Sanbuki (סנבוקי) is derived from the owner of the MS., a Hungarian family. According to Hottinger (in *Bibliothecario Quadripartito*, p. 158, ed. Turic.), the name ought to be זנבוקי instead of סנבוקי, which is equivalent to Zadduki, or Sadducee. For other conjectures, see Wolf (*Bibl. Hebr.* ii, 292, 293; iv, 79) and Tytsen (*Tentamen*, p. 249, 250). As to the codex itself, some of its readings are given in the margin of some MSS., as in Cod. Kennic. 415; Cod. Kennic. 8 (*Bibl. Bodl. Hunting.* 69; comp. Brunsius, *Ad Kenn. Diss. Gen.* p. 345). Besides, this codex is quoted three times by Menachem di Lonzano in his commentary *Or Thora*, as on Gen. ix, 14, בָּעֵנִי (fol. 2 b, fin. ed. Amstel): בהלל; בחנו, i. e. in the Codex Hillel, the nun has only the *sh'va* (:); but in the Codex Sanbuki the *sh'va* with the *patach*; Lev. xiii, 20, שָׁפֵל (fol. 14 b), שָׁפֵל בִּנְבוּקִי בַּחֲמָה, i. e. in the Codex Sanbuki the פ in שָׁפֵל is written with the *patach*; Lev. xxvi, 36, וַיִּבְחָתָהּ (fol. 15 b) וַאֲשַׁכְנוּ, i. e. in Spanish and German MSS. there is a *gaya* (i. e. a *metheg*) under ח, but not so in the Codd. Hillel, Jerusalem, and Sanbuki. See Strack, *Prolegomena Critica in Vetus Test. Hebr.* (Lips. 1873), p. 22. See MANUSCRIPTS, BIBLICAL. (B. P.)

Sanchez, Gaspar, a learned Jesuit, was born at Cifuentes, in New Castile, about 1553. He was appointed to teach the learned languages and belles-lettres in the Jesuit colleges at Orpesa, Madrid, and other places, and was at last chosen professor of divinity at Alcalá. Here he spent thirteen years in commenting on the Scriptures, the result of which he published in various volumes in folio. He died in 1628.

Sanchez, Pedro Antonio, a learned Spanish ecclesiastic, was born at Vigo, in Galicia, in 1740. He entered the Church, obtained a canonry in the Cathedral of St. James, and was likewise appointed professor of divinity in that city. His fame procured for him admission into many learned societies. He was celebrated as a preacher and admired for his benevolence, spending his income to aid the poor, so that, at his death in 1806, he left no more than was barely sufficient to defray the expenses of his funeral. Among his works are *Summa Theologia Sacre* (Madrid, 1789, 4 vols. 4to):—*Annales Sacra* (ibid. 1784, 2 vols. 8vo):—*Hist. of the Church of Africa* (ibid. 1784, 8vo):—*A Treatise on Toleration*, etc. (ibid. 1785, 3 vols. 4to), and others.

Sanchez, Thomas, a celebrated Roman casuist, was born at Cordova in 1550. Raised in Romish piety, he joined the Jesuits in his sixteenth year. He studied philosophy, law, and theology with great success; was punctual in the fulfilment of all Church duties; and, at an early age, enjoyed a high reputation throughout Spain and Italy. His fame as a casuist was so great that he was often personally applied to for the solution

of specific cases. He died at Granada in 1610. His work *De Sacramento Matrimonii* (Genue, 1592, 3 vols.) occupies a high place in Jesuitical casuistry. It treats of every variety of obscene and immoral questions, and is justly regarded as indirectly contributive to the very immorality which it formally condemns. Pope Clement VIII used the work in preparing a solution of a specific case, and pronounced upon it the highest praise. But others have vigorously assailed it, even in the Roman Church. Arnauld of St. Cyr attacked it in his *Vindicie Censuræ Facultatis Parisiensis* (see Bayle, *Dictionnaire* [art. "Sanchez"], iv, 134). After Sanchez's death appeared *Operis Moralis in Præceptis Dei Tomus I* (Venet. 1614):—*Consilia seu Opuscula Moralia* (Lugd. 1634). His complete works appeared at Venice in 1740, in 7 vols. See Wuttke, *Christian Ethics* (N. Y. 1873), i, 255-272; Herzog, *Real-Encyklop.* xiii, 413. (J. P. L.)

Sanchez de Arévalo, RODERIGO, generally known as *Rodericus Sanctus*, a Spanish prelate, was born at Santa Maria de Nieva, in the diocese of Segovia, in 1404. After receiving his classical education at the University of Salamanca, and obtaining the degree of doctor, he entered the Church, and was made successively archdeacon of Treviño (in the diocese of Burgos), dean of Leon, and dean of Seville. About 1440 John II of Castile sent him as ambassador to Frederick III, and he was afterwards sent by Henry IV of Castile to congratulate pope Calixtus III upon his accession. On the accession of Paul II, Sanchez, who had been prevailed upon by his predecessor to settle at Rome, was appointed by that pope governor of the Castle of St. Angelo and keeper of the jewels and treasures of the Roman Church, and in course of time promoted to the bishoprics of Zamora, Calahorra, and Palencia. He died at Rome Oct. 10, 1470, and was interred in the Church of Santiago dei Spagnuoli. He wrote the following works: *Speculum Vitæ Humanæ* (Rome, 1468, fol.):—*Epistola de Eapugnatione*, etc. (fol.):—*Compendiosa Historia Hispanica* (Rome, 1470, 4to; Frankfurt, 1603):—*Liber de Origine ac Differentia Principatus* (Rome, 1521). Many other works in MS. are in the Vatican Library. See Chalmers, *Biog. Dict.* s. v.; Hoefer, *Nouv. Biog. Générale*, s. v.

Sanchoniātho (Σανχουνιάθων), the supposed author of a Phœnician history of Phœnicia and Egypt, called Φοινικικά. He has been the subject of much discussion involving his place of birth, his works, and, indeed, his very existence. Our principal information respecting him is derived from Philo Byblius, a Greek writer at the beginning of the 2d century A.D. According to him, Sanchoniatho lived during the reign of Semiramis, and dedicated his book to Avibalus, king of Berytus. The general nature of the work is in itself sufficient to prove it to be a forgery, and yet the question remains whether the name Sanchoniatho was a pure invention of Philo or not. Movers supposes that it was the name of the sacred books of the Phœnicians, and that its original form was *San-Chon-i-āth*, which might be represented in the Hebrew characters by סֶן חֹן יָתָה, that is, "the entire law of Chon." On this etymology we offer no opinion. According to Suidas, he also wrote a book on the theology of the Egyptians.

Sancroft, WILLIAM, D.D., an English prelate, was born at Fressingfield, Suffolk, Jan. 13, 1616, and educated at the grammar-school of Bury St. Edmunds, and at Emanuel College, Cambridge. In 1642 Sancroft was elected a fellow of his college, but in the following year was deprived of his fellowship by the Puritans for refusing to subscribe to the famous "Engagement;" after which he went abroad. On the restoration of Charles II, 1660, he was appointed chaplain to Cosin, bishop of Durham. After several preferments he was (1668) made archdeacon of Canterbury, and in 1677

archbishop of Canterbury. When James II issued his declaration for liberty of conscience and required the clergy to sign it, Sancroft refused. With six other bishops who joined him in his refusal, he was sent to the Tower (1688). He refused to take the oath to William and Mary, and was deposed by an act of Parliament, Aug. 1, 1689; but his actual departure from Lambeth did not take place until June 23, 1691. He then retired to his native village, where he died, Nov. 24, 1693. He published some *Sermons*, and *Letters to Mr. North*. His *Modern Policies and Practices*, from Machiavelli and others, was published in 1757.

Sancta Sanctis. See TRISAGION.

Sancte-bell, SANCTUS-BELL, SAINTS'-BELL, MASS-BELL (old English forms, *Sacring-bell, Saunce-bell*), a small bell used in the Roman Catholic Church to call attention to the more solemn parts of the service of the Mass, as at the conclusion of the ordinary, when the words "Sanctus, Sanctus, Sanctus, Deus Sabaoth" are pronounced by the priest, and on the elevation of the host and chalice after consecration. It is now usually, if not always, a small hand-bell carried by an attendant, and was generally of this kind in England previous to the Reformation, made sometimes of silver; but in some instances a larger bell was used, and was suspended on the outside of the church in a small turret, made to receive it, over the archway leading from the nave into the chancel, and rung by a rope from within. Many of these turrets still exist, as at Isham, Rothwell, and Desborough, Northamptonshire; Boston, Lincolnshire; Bloxham, Brize-norton, Swalcliffe, and Coombe, Oxfordshire, etc.; a few still retain the bell, as at Long Compton, Warwickshire. Occasionally, also, a number of "little bells were hung in the middle of the church, which the pulling of one wheel made all to ring, which was done at the elevation of the hoste."

Sancti, Sanctissimi, usual epithets of the bishops, signifying *holy, most holy*. Other epithets were "beati, beatissimi," *blessed, most blessed*; "Deo carissimi," *dearly beloved by God*.

Sanctification, separation from ordinary use to a sacred purpose. The Hebrew word קֹדֶשׁ and the Greek word ἅγιος, rendered "holy," "hallowed," and "sanctified," are applied to certain times which were hallowed—as the Sabbath and the Hebrew festivals (Gen. ii, 3; Exod. xx, 8, 11; Lev. xxiii, 37; 2 Kings x, 20); to the things said to be hallowed, as the sacred incense or perfume (Exod. xxx, 36; Matt. vii, 6), the sacred vestments (Exod. xxviii, 2, 4), the sacred utensils (Exod. xxx, 29; 1 Chron. xxii, 10; 2 Tim. ii, 21), the holy bread (Lev. xxi, 22; 1 Sam. xxi, 5), the altar (Exod. xxix, 37; xxx, 1, 10; Matt. xxiii, 19), and portions of the sacrifices (Lev. ii, 3, 10). So, also, of places said to be hallowed (Exod. iii, 5; Acts vii, 53), as the holy city, i. e. Jerusalem (Neh. xi, 1; Isa. xlviii, 2; Matt. iv, 5; xxiv, 15; xxvii, 53; Acts vi, 13; xxii, 28), the holy mountain, i. e. Zion (Psa. ii, 6), the Tabernacle (Numb. xviii, 10); the Temple (Psa. cxxxviii, 2), the most holy place, the oracle (Exod. xxvi, 33; xxviii, 43; Heb. ix, 2, 3, 12; 1 Kings vi, 16; viii, 6; Ezek. xli, 23). So, also, men are said to be hallowed, as Aaron and his sons (1 Chron. xxiii, 13; xxiv, 5; Isa. xliii, 28), the first-born (Exod. xii, 2), and the Hebrew people (Exod. xix, 10, 14; Dan. xii), also the *pious* Hebrews, the "saints" (Deut. xxxiii, 3; Psa. xvi, 3; Dan. vii, 18), like the word קֹדֶשׁ, rendered "saint" (Psa. xxx, 4; xxxi, 23; xxxvii, 28; 1, 5; lii, 9; lxxix, 2; xcvi, 10), and "godly" (Psa. iv, 3).

The terms are also used of those who were ceremonially purified under the Mosaic law (Numb. vi, 11; Lev. xxii, 16, 32; Heb. ix, 13). But, though the external purifications of the Hebrews, when any one had transgressed, had to do with restoration to civil and national

privileges, they did not necessarily induce moral and spiritual holiness. They, however, reminded the sincere Hebrew that he was *unclean* in the sight of God; and that the ceremonial cleansings, by which he had been restored to his civil and political rights, were symbols of those "good things that were to come"—spiritual and eternal salvation—which should accrue through the sprinkling of the blood of Christ and the gift of the Holy Spirit. He was thus assured that "without holiness no man shall see the Lord" (Heb. ix, 14; xii, 14). Hence, sanctification is used to designate that state of mind induced by the indwelling of the Holy Spirit, thus producing internal and external holiness (John iii, 5; 1 Cor. vi, 11; Eph. v, 26; 1 Thess. iv, 3, 4, 7). It is true, sanctification is sometimes spoken of as the work of man himself (Exod. xix, 22; Lev. xi, 44; xx, 7, 8; 1 Pet. iii, 15). When a person solemnly and unreservedly gives himself to God, he then may be said to sanctify himself. He is then enabled to believe in Christ with his heart unto righteousness, and God instantly, by the communication of his Holy Spirit, sanctifies the believer. Thus the believer gives himself to God, and God, in return, gives himself to the believer (Ezek. xxxvi, 25-29; 1 Cor. iii, 16, 17; vi, 19; 2 Cor. vi, 16-18; Eph. ii, 22). This sanctification, which is received by faith, is the work of God within us.

In a general sense, "sanctification" comprehends the whole Christian life (Gal. v, 22, 23; 1 Pet. i, 15, 16, 22; Heb. xii, 10; James iv, 8). In 1 Thess. v, 23, the apostle prays for the sanctification of the *entire* Church in all its various departments. In 1 Cor. vii, 14, it is said, the unbelieving husband, or wife, is "sanctified"—that is, to be regarded not as *unclean*, but as specially claiming the attention of the Christian community. The term "sanctified" is also used in the sense of *expiation* (Heb. x, 10, 14, 29). See Hagenbach, *Hist. of Doctrines*, ii, 281, 288, 503; Oosterzee, *Christian Dogmatics*. See HOLINESS.

SANCTIFICATION, ENTIRE. One of the most interesting, and practically one of the most important, questions connected with the divine plan of salvation is, What degree of deliverance from sin is it scriptural for the believer to expect in this life?

1. *Preliminary Concessions and Distinctions.*—There are several points upon which all schools of theology agree.

1. One is that the complete sanctification of believers, their perfect deliverance from sin in every sense of the term, is an integral part of the great plan of redemption. Differ as they may in regard to the time when it shall be accomplished, they unite in pronouncing sin a thing to be abhorred, a defilement from the last touch or taint of which God's people are at some period to be delivered.

2. Again, all Christians agree that the true followers of Christ hate sin, loathe it, and struggle, and are bound ever to struggle, for complete deliverance from it. Whether continuous victory or daily defeat attend the contest, *that war* must go on.

3. All writers agree, also, in the conviction that no Christian in this life attains absolute perfection. Some, indeed, hold that through the grace of God the believer may attain what the Scriptures call *perfection*: consequently, the word itself is not to be condemned, seeing that it is employed by those who "speak not in the words which man's wisdom teacheth, but which the Holy Ghost teacheth." Nevertheless, the term *perfection* is applicable only in a restricted sense to any part of the Church militant. The holy law demands the absolute right, in word and deed, in thought and intention, in all obedience, love, and devotion. It requires payment of the debt, not only to "the uttermost farthing," but in coin in which there is no trace of alloy.

But such service as this can be rendered only where there is perfect knowledge, not simply of the letter of the law, but of its practical application to the endlessly diversified and complicated events and circumstances of

daily life. No mere man since the fall ever possessed such knowledge. The holiest of men are conscious that they are often at a loss to know what God and duty require at their hands, and that there are times when their uncertainty in matters of importance burdens and distresses them. Right and wrong sometimes seem to shade into each other, like the prismatic colors; and the sharpest eye cannot tell where the one ends or the other begins. The tenderest conscience takes alarm the soonest, and the better taught is the less liable to err; but the wisest and the most conscientious have occasion to pause now and then, waiting for clearer light, and, perhaps, wait in vain. When Paul and Barnabas at Antioch were planning a tour among the churches, Barnabas had a very positive desire that "John whose surname was Mark" should accompany them. Paul had an equally decided conviction that Mark ought not to go, seeing that he had "departed from them from Pamphylia, and went not with them to the work." Neither Paul nor Barnabas would yield; and "the contention was so sharp between them that they departed asunder, one from the other." Here one or both of them failed of the absolute right. Either Paul, without being conscious of it, was unjust to a fellow-disciple, or Barnabas, in his ignorance, was ready to imperil the work of the Lord by calling Mark to a position which he was not qualified to fill. Perhaps, in the sharp contention, *παροξυσμός*, they were unjust to each other, and thus another feature of wrong was introduced. If errors of judgment may thus lead to errors of action, when the holiest of men are counselling in regard to the holiest of causes, what may we expect of those who are immersed in the interests, prejudices, and collisions of common life?

Service may also be defective in degree. Justice, truth, and love are due to our fellow-men; but a still higher and nobler duty is required at our hands. We are invited to the fellowship of our Lord Jesus Christ, and God the Father, and the communion of the Holy Ghost; and called to love and serve "in holiness and righteousness before him all the days of our life." And who that ever by faith caught a glimpse of the glory of God, the great, the holy, and the good, "the Lord, the Lord God, merciful and gracious, long-suffering, and abundant in goodness and truth," did not bow down in lowliest self-abasement, in view of the poor service which he renders? The Christian never feels in this world that his service is all that he would have it. Though faith may never utterly fail, nor obedience be forgotten, nor love grow cold, nor devotion die, yet the most obedient, faithful, and devoted child of God will humble himself in the very dust at the remembrance of his infinite obligations to his Creator and Redeemer and the poor returns which he is daily making. Thus, if we assume that the intent is wholly right and the purpose all-controlling, the service rendered will be imperfect in character, marred by lack of knowledge and errors of judgment, and deficient in degree; and sinless obedience, in the absolute sense of the term, is utterly impossible.

4. Still another point needs recognition. As long as we remain in this world, however deep, fervent, and thorough our religious life, there are sources of danger within. There inhere in our nature as essential elements of it, at least in this present life, appetites, passions, and affections, without which man would be unfit for this present state of existence and would cease to be man. These, although innocent in themselves, are simply unreasoning impulses over which we need to keep constant watch and ward, ruling them by reason, conscience, and divine grace, else they lead to sin and death. By these "sin entered into the world, and death by sin." When Eve, in Eden, "saw that the tree was good for food, and that it was pleasant to the eyes, and a tree to be desired to make one wise," the temptation was a skillful appeal to elements in her nature which were pure from the hand of the Creator. The desire for

pleasant food is not sin; nor is the higher taste which finds enjoyment in contemplating beautiful forms and colors. Nor can we condemn the still more elevated instinct of the soul which delights in mental activity and the acquisition of knowledge. If these aptitudes and instincts had not existed in original human nature, the temptation of Satan would have had no power. "The deaf adder hears not the voice of the charmer, charm he never so wisely."

Consequently, in the work of sanctification, the various instincts and passions of original human nature do not need to be rooted out, but to be restrained, chastened, disciplined, made to obey reason and the voice of God. The due enjoyment of pleasant food is not the gluttony which the wise man condemns. A father may provide for his children by a wise foresight which is by no means the "covetousness which is idolatry." When foul outrage is done to the innocent and the defenceless, we may feel our souls flame with fiery indignation, and "be angry and sin not." God "setteth the solitary in families" by the affections with which he endowed man at the beginning; and nothing is more beautiful than the relations which grow out of them, where the divine intent rules, and nothing more debasing and destructive than their abuse.

These elements of our nature survive the deepest work of grace. When the wondrous change has come to the penitent believer and he has "put on the new man which, after God, is created in righteousness and true holiness," he is still human, still nothing less than man. The world appeals to him, Satan assails him, and in himself is the tinder which the glancing sparks of temptation tend to kindle. "There is no discharge in that war." Till life itself is done, some form of peril will remain. Youth may be tempted by fleshly lusts, manhood may become ambitious and proud, age misanthropic and avaricious. The innocent appetite to which, in Eden, the forbidden fruit appealed may be perverted into the despotic thirst of the inebriate; Eve's delight in beauty may be the germ from which shall spring a life given up to frivolity and empty show; and the nobler hunger for knowledge may break away from all authority and madly labor to reason God out of his own creation. Nevertheless, these possibilities of evil do not prove that God's children cannot in this world be saved from moral depravity, nor that the continuous commission of wilful sin must stain the lives of the holiest of them till the very hour of death. They are proof, rather, that conversion does not end probation; and that it behooves every man, whatever progress he may have made in divine things, to "keep his body under, lest that by any means he should be a castaway."

5. One more point needs to be stated. Discussion on this subject has often been rendered inconclusive and unsatisfactory by the misuse of terms. The Westminster Confession, as explained by the *Exposition* published by the Presbyterian Board of Publication, makes "original sin" include three wholly different things: (1) the guilt of Adam's sin; (2) the inherited depravity of soul; (3) the damage done the body. Wesley also uses the term sin in three different senses: (1) the depravity inherited from Adam; (2) "voluntary transgression of known law;" (3) involuntary infractions of the divine law. Owing to this confusion of terms, there have been hot controversies where there was little real difference of opinion; whole octavos have been wasted in refuting what nobody holds, and proving what nobody doubts; and theological champions fight imaginary foes, and are happy in imaginary victories. If matters not really belonging to the question of entire sanctification are ruled out, we shall find that just two points need investigation: (a) What scriptural ground is there for the belief that the Christian may in this life be delivered from the moral depravity which he inherited as a member of a fallen race? (b) How far and in what sense may the believer be kept in this life, through grace, from the commission of sin?

II. Different Ecclesiastical Views on the Subject.—

1. *The Romish Theory.*—The Council of Trent teaches that the sacrament of baptism, rightly administered, washes away guilt and depravity of every kind. It pronounces anathema against those who presume to think or dare to assert "that, although sin is forgiven in baptism, it is not entirely removed or totally eradicated, but is cut away in such a manner as to leave its roots still firmly fixed in the soul." The Council, however, declares that concupiscence, or the fuel of sin, remains. "Concupiscence is the effect of sin, and is nothing more than an appetite of the soul, in itself repugnant to reason. If unaccompanied with the consent of the will or unattended with neglect on our part, it differs essentially from the nature of sin."

The Catechism of the Council of Trent teaches also that "the commandments of God are not difficult of observance." "As God is ever ready by his divine assistance to sustain our weakness, especially since the death of Christ the Lord, by which the prince of this world was cast out, there is no reason why we should be disheartened by the difficulty of the undertaking. To him who loves nothing is difficult."

2. *The Calvinistic Theory.*—The Westminster Confession of Faith has the following chapter on sanctification:

"They who are effectually called and regenerated, having a new heart and a new spirit created in them, are further sanctified, really and personally, through the virtue of Christ's death and resurrection, by his word and spirit dwelling in them; the dominion of the whole body of sin is destroyed, and the several lusts thereof are more and more weakened and mortified; and they are more and more quickened and strengthened, in all saving graces, to the practice of true holiness, without which no man shall see the Lord.

"This sanctification is throughout the whole man, yet imperfect in this life: there abide still some remnants of corruption in every part, whence ariseth a continual and irreconcilable war, the flesh lusting against the Spirit, and the Spirit against the flesh.

"In this war, although the remaining corruption for a time may much prevail, yet, through the continual supply of strength from the sanctifying spirit of Christ, the regenerate part doth overcome; and so the saints grow in grace, perfecting holiness in the fear of the Lord."

In respect to the possibility of keeping the law, the following declarations of the Confession and the Larger Catechism of the Presbyterian Church are sufficiently explicit:

"No man is able, either by himself or by any grace received in this life, perfectly to keep the commandments of God, but doth daily break them in thought, word, and deed."—Catechism.

"This corruption of nature, during this life, doth remain in those that are regenerated; and although it be through Christ pardoned and mortified, yet both itself and all the motions thereof are truly and properly sin."—Confession, ch. vi.

Thus the Calvinistic standards answer the two questions by saying, in reply to the first, that as long as a man lives on the earth "there abide still some remnants of corruption in every part" of his nature; and, in reply to the second, that every man, notwithstanding all the grace received, "doth daily break" the law of God "in thought, word, and deed;" and that this residue of corruption, "and all the motions thereof, are truly and properly sin." Consequently there is no such thing as entire sanctification in this life, but the holiest of God's children must of necessity remain corrupt, at least in part, and go on in the constant commission of actual sin as long as they live. Indeed, it is not entirely clear how "the saints," as the Confession asserts, "grow in grace, perfecting holiness in the fear of the Lord," seeing that the highest attainments possible in this life still leave them with corruption within, and an outward life marred by the constant commission of sin, "in thought, word, and deed."

3. *Arminian Theories.*—(1.) Arminius himself seems to have taken no very decided position on the subject, his chief fields of battle lying in other directions. Nevertheless, among "certain articles to be diligently examined and weighed, because some controversy has arisen

concerning them, even among those who profess the Reformed religion," he makes a statement to the effect that "regeneration is not perfected in a moment, but by certain steps and intervals," and that the regenerate man "still has within him the flesh lusting against the Spirit;" nor does he speak of any complete deliverance in this life. On the other point, he affirms that "he who asserts that it is possible for the regenerate, through the grace of Christ, perfectly to fulfil the law in the present life, is neither a Pelagian, nor inflicts any injury on the grace of God, nor establishes justification through works." He cites Augustine himself as declaring the abstract possibility of a man's living in this world without sin, and as saying, "Let Pelagius confess that it is possible for man to be without sin in no other way than by the grace of Christ, and we will be at peace with him." Arminius can hardly be said to have held any well-defined theory on the subject.

(2.) *Wesley's Theory.*—Wesley's views on the subject of entire sanctification were long in the process of formation, and it is no difficult task to find early statements which contradict others made at a later period. As enunciated in the latter part of his life, his views may be defined thus. He taught in regard to the work wrought in us—

1. That man by nature is depraved, so that, aside from grace, he is unfitted for all good, and prone to all evil.
2. That, through the grace of God, this moral depravity may be removed in this life, and man live freed from it.
3. That regeneration begins the process of cleansing, but, except in some exempt cases possibly, does not complete it, a degree of depravity still remaining in the regenerate.
4. That the process of cleansing is in some cases gradual, the remains of the evil nature wearing away by degrees; in others instantaneous, the believer receiving the blessing of "a clean heart" a few days, or even hours only, after his regeneration.
5. That this great gift is to be sought for specifically, and is to be obtained by a special act of faith directed towards this very object.
6. That this second attainment is attested by the Holy Spirit, which witnesses to the completion of the cleansing, as it did to the regeneration which began it.
7. That this gracious attainment, thus attested by the Holy Spirit, should be confessed, on suitable occasions, to the glory of God.
8. That the soul may lapse from this gracious state, and become again partially corrupt, or even fall wholly away from God, and be lost forever.
9. That it is the high privilege of every one who is born of God to live from that moment free from the sins which bring the soul into condemnation: that is, from "voluntary transgressions of known law;" but that involuntary errors and mistakes, needing the atonement of Christ, remain to the end.

This last item in the statement of Wesley's views, as well as those numbered 1 and 2, is accepted by all classes of Methodist thinkers, and therefore need not be referred to again.

(3.) *The Theory of the English Wesleys.*—It is presumable that the *Compendium of Theology*, recently published by the Rev. Dr. Pope, theological tutor in the Didsbury College, a school established by the Wesleys for the training of the young men who are to enter their travelling ministry, may be taken as a standard of the general sentiment of the Wesleyan body at the present time. In several important points he differs from Wesley. He pronounces sanctification always a gradual work. "It must be remembered that this final and decisive act of the Spirit is the seal set upon a previous and continuous work. The processes may be hastened, or condensed into a small space; they must be passed through." Instead of lying within the reach of any novice, to be attained at any moment, "Christian perfection is the exceeding great reward of perseverance in the renunciation of all things for God; in the exercise of love to God, as shown in the passive submission to his will, and in the strenuous obedience of all his commandments." He intimates that the time when the work is completed is "known only to God;" or, "if revealed in the trembling consciousness of the believer, a secret that he knows not how to utter;" con-

sequently there is no place for the confession of it. Dr. Pope teaches also that after the highest point is attained there still remains "something of the peculiar concupiscence, or liability to temptation, or affinity with evil, which besets man in this world." His views are almost identical with those set forth by Wesley and the Conference of 1745, but are widely different from the doctrine which Wesley began to preach in 1760.

(4.) There is still another view, which expresses the convictions of not a few of the clearest thinkers in the Methodist Episcopal churches, and is accepted by many of the clergymen and people of other denominations. It is set forth in the following propositions:

1. Moral depravity is a real and positive quality of the unregenerate human spirit.
2. In the renewal of the soul at conversion, whereby man becomes a *new creature, a new man, which after God is created in righteousness and true holiness*, the inborn moral depravity is removed from the immortal nature, which, so far as the work of cleansing is concerned, is in that moment fitted for heaven itself.*
3. From the very hour of justification the renewed soul is summoned to live a holy life, a life of continuous victory over sin, and of freedom from condemnation, and is, through grace, equipped for such a life, so that he who falls thus to live falls below both his high privilege and his bounden duty.
4. Such a life—*holy, freed from sin, cleansed from all unrighteousness*—is the Christian life, to which every child of God is summoned.
5. The believer, thus renewed, is still human, nothing less than man, possessing all the innocent appetites, passions, and affections which belong to human nature; and that these, though in themselves innocent, need to be controlled by reason and conscience, else they lead to sin.
6. It is the privilege of the believer, thus renewed, to grow in grace and in the knowledge of God, gaining day by day more of spiritual strength and beauty, until he becomes a *perfect man*, and reaches the *measure of the stature of the fulness of Christ*; and that this is what is properly called maturity, or Christian perfection.

III. *Arguments on the Subject.*—The evangelical churches, therefore, divide on this line; the Calvinists holding that believers must of necessity remain in some degree depraved, and go on daily committing sin, "in thought, word, and deed," to the end of their lives; the Arminians, with some differences among themselves in regard to the time and the conditions, holding that entire sanctification, including the cleansing of the human spirit from moral depravity, and freedom from actual sin, in the sense of "voluntary transgression of known law," is attainable in this life.

In support of the Arminian doctrine of entire sanctification, the following arguments are brought forward:

1. To affirm that it is by the will of God that the Christian lives in sin, and sin lives in the Christian, and that God so orders it for his own glory and the good of men, is monstrous, being neither scriptural, nor good morals, nor good sense.
2. The Word of God nowhere represents death as the hour, or the agent, that shall cleanse the heart, or relieve believers from the necessity of sinning against God.
3. Scripture, reason, and the daily experience of God's children show that holiness is the great need of the Church and of the individual Christian.
4. The mission of Christ is to *save his people from their sins*, and to save them to the uttermost; and this salvation is set forth as attainable in this life.
5. God commands his children to be holy, and promises to help them to be holy, declaring that his *grace is sufficient* for their spiritual needs, and that he "will not suffer them to be tempted above that they are able" to bear.
6. Believers in general are everywhere in the Scriptures said to be *holy, sanctified, purified, saints, new men, new creatures, created anew in righteousness and true holiness*; and whenever any conduct inconsistent with this gracious state is charged upon any of them, it is to warn them of their lapsing from the grace of God, and endangering their souls.

* The great majority of Methodists, however, hold that this depravity is not wholly removed at conversion, but that its last remains are (usually at least) taken away by a subsequent act of grace.—En.

7. Not a few of God's faithful servants are named and described in the Scripture: Abel as *righteous*, Enoch as *walking with God*, Job as *perfect*, Zacharias and Elizabeth as *righteous before God, walking in all the commandments and ordinances of the Lord blameless*; and there is not a word in the history to compel us to take this description of them in any other than the exact, literal sense of the language employed.

IV. *Literature.*—Many books have been published on the subject of entire sanctification and Christian perfection, but most of them are devotional and practical manuals, rather than theological treatises. The following discuss the doctrine: Wesley, *Plain Account of Christian Perfection*; Pope, *Compendium of Theology*; Peck (G.), *Christian Perfection*; Foster, *Christian Purity*; Peck (J. T.), *The Central Idea of Christianity*; Boardman (H. A.), *The "Higher-Life" Doctrine of Sanctification*; Steele, *Love Enthroned*; Franklin, *A Critical Review of Wesleyan Perfection*; Huntington, *What is it to be Holy? or the Theory of Entire Sanctification*; Endsley and others, *Our Holy Christianity*, a series of essays; Crane, *Holiness the Birthright of all God's Children*; also, article in the *Meth. Quar. Rev.* Oct. 1878, on *Christian Perfection and the Higher Life*; Boardman (W. E.), *The Higher Christian Life*; See, *The Rest of Faith*; Atwater, *The Higher Life and Christian Perfection* (article in the *Presb. Quar. and Princeton Rev.* July, 1877); Simpson, *Encyclop. of Methodism*, s. v. "Perfection, Christian," p. 704. (J. T. C.)

Sanctimoniâles, a name given in early times to nuns on account of their profession of sacredness. They are also called *Virgines Dei*, *Virgines Christi*, *Ancille Dei*, *Sorores Ecclesiæ*, etc. They must not be confounded with the ancient deaconesses.

Sanction. See PRAGMATIC SANCTION.

Sanctuary is the occasional rendering, in the A. V., of two Heb. and one Greek term. A general term is קֹדֶשׁ, *kôdesh* ("sanctuary," Exod. xxx, 13, 24; xxxvi, 1, 3, 4, 6; xxxviii, 25, 26, 27; Lev. iv, 6; v, 15; x, 4; xxvii, 3, 25; Numb. iii, 28, 31, 32, 47, 50; iv, 12, 15; vii, 9, 13, 19, 25, 31, 37, 43, 49, 55, 61, 67, 73, 79, 85, 86; viii, 19; xvi, 3, 5, 10; 1 Chron. ix, 29; Psa. xx, 2; lxiii, 2; lxxviii, 24; lxxiv, 3; lxxvii, 13; cxv, 2; cl, 1; Isa. xliii, 28; Lam. iv, 1; Ezek. xli, 21, 23; xlii, 20; xlv, 27; xlv, 2; Dan. viii, 13, 14; ix, 26; Zeph. iii, 4), which properly means *holiness* (often so rendered, frequently as an attribute, and perhaps to be regarded as a concrete of the sacred edifice), and especially the "holy place" (as very often rendered). The more specific term is מִקְדָּשׁ, *mikdash* (invariably rendered "sanctuary," except Amos vii, 13, "chapel," and twice in the plur. "holy place" [Psa. lxxviii, 35; Ezek. xxi, 2]), which is from the same root, and signifies the local shrine. In the New Test. we have the corresponding ἅγιον ("sanctuary," Heb. vii, 2; ix, 1, 2; xiii, 11; elsewhere "holy place" or "holiest"), which is simply the neut. of ἅγιος, a general term for anything *holy*. See HOLY PLACE; TABERNACLE; TEMPLE.

SANCTUARY. In popish times the privilege of sanctuary was common in Scotland. Innes says: "In several English churches there was a stone seat beside the altar, where those fleeing to the peace of the Church were held guard by all its sanctity. One of these still remains at Beverley, another at Hexham. To violate the protection of the *frithstol* (the seat of peace), or of the *ferthe* (the shrine of relics behind the altar), was not, like other offences, to be compensated by a pecuniary penalty: it was *bût-leas*, beyond compensation. That the Church thus protected fugitives among ourselves we learn from the ancient canons of the Scotian councils, where, among the list of misdeeds against which the Church enjoined excommunication, after the laying of violent hands upon parents and priests, is denounced 'the open taking of thieves out of the protection of the Church.' The most celebrated, and probably the most

ancient, of these sanctuaries was that of the church of Wedale, a parish which is now called by the name of its village, 'the Stow.' There is a very ancient tradition that king Arthur brought with him from Jerusalem an image of the Virgin, 'fragments of which,' says a writer in the 11th century, 'are still preserved at Wedale in great veneration.' About the beginning of his reign, king William issued a precept to the ministers of the church of Wedale, and to the guardians of its 'peace,' enjoining them 'not to detain the men of the abbot of Kelso, who had taken refuge there, nor their goods, inasmuch as the abbot was willing to do to them, and for them, all reason and justice.'" See ASYLUM; CHURCH.

SANCTUARY, a name for the presbytery, or eastern part of the choir of a church, in which the altar is placed.

Sanctus, Sr., is said to have been a physician, and a native of Otriculum (or Oriculum), a city of Central Italy. He was put to death with great cruelty in the reign of M. Aurelius Antoninus, A.D. about 150, and his memory is celebrated on June 26.

Sancus, in Old-Italian mythology (in its complete form *Semo Sancus*, commensurable with *Fidius*), was an immigrant god who came from the Sabines to Rome and obtained a sanctuary on the Quirinal Hill. He was subsequently compared with Hercules, and called *Hercules Sabinus*.

Sancy, ACHILLE HARLEY DE, a French diplomat and prelate, was born in 1581. In early life he gave himself to study, and, having taken orders, was in a short time made bishop of Lavaur. But in 1601 he gave up his ecclesiastical life and entered the army. After taking part in several campaigns, he was made ambassador to Turkey. Here his conduct was such as to bring upon him the displeasure of the Turkish government, and he was bastinadoed. This closed his diplomatic career, and, returning to France, he devoted himself and his fortune to the cardinal Richelieu. Subsequently he went to England and was in favor with queen Henrietta. He died Nov. 20, 1646. He was a man of great learning, is said to be the author of several unimportant works in his native language, and collected many Oriental manuscripts which are now in the Richelieu Library.

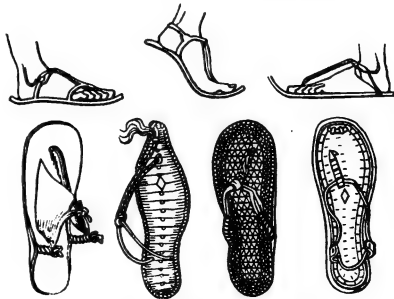

Sand (חֹל, *chól*, from its tendency to *slide* or *roll*; ἄμμος). A similitude taken from the aggregate sand of the sea is often used to express a very great multitude or a very great weight; or from a single sand, something very mean and trifling. God promises Abraham and Jacob to multiply their posterity as the stars of heaven and as the sand of the sea (Gen. xxii, 17; xxxii, 12). Job (vi, 3) compares the weight of his misfortunes to that of the sand of the sea. Solomon says (Prov. xxvii, 3) that though sand and gravel are very heavy things, yet the anger of a fool is much heavier. Ecclesiasticus says that a fool is more insupportable than the weight of sand, lead, or iron (Ecclus. xxii, 15). The prophets magnify the omnipotence of God, who has fixed the sand of the shore for the boundaries of the sea, and has said to it, "Hitherto shalt thou come; but here thou shalt break thy foaming waves, and shalt pass no farther" (Jer. v, 22). Our Saviour tells us (Matt. vii, 26) that a fool lays the foundation of his house on the sand; whereas a wise man founds his house on a rock. Ecclesiasticus says (xviii, 8) that the years of the longest life of man are but as a drop of water or as a grain of sand. Wisdom says (vii, 9) that all the gold in the world, compared to wisdom, is but as the smallest grain of sand. See DUST.

Sand, CHRISTOPH VON DEN (Lat. SANDIUS), a German theologian, was born at Königsberg Oct. 12, 1644. On account of his Socinian sentiments, and unwillingness to participate in the Lutheran services, he was exiled, and went to Holland, where he spent the greater part of his life. In later years his religious views seem

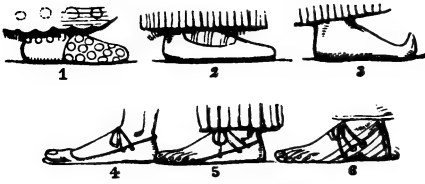

to have changed, as he became a firm Arminian. He died at Amsterdam Nov. 30, 1680. His principal works are: *Nucleus Historiæ Ecclesiasticæ*, etc.; — *Interpretationes Paradoxæ IV Evangeliorum*; — *Confession de Foy conformément à l'Ecriture*; — *Scriptura Trinitatis Revelatrix*; — *Bibliotheca Anti-Trinitariorum*. Sand also left a manuscript work, *Auctuarium Operis Vossiani de Historicis Lutinis*, and two shorter ones which prove his Arminian sentiments.

Sandacus, in Greek mythology, was a son of Asytynous and grandson of Phaethon, who came from Syria to Cilicia, and there founded the town of Celenderis. He married Pharnace, the daughter of Megessares, and by her had a son whom he named Cinyras.

Sandal occurs in the A.V. only, for the same Greek word *σανδάλιον*, Mark vi, 9; Acts xii, 8; but it more properly represents the Heb. נָעָל, *nál*; Sept. and New Test. ὑπέδημα; rendered "shoe" in the English Bible. There is, however, little reason to think that the Jews really wore shoes, and the expressions which Carpozov (*Apparat*, p. 781, 782) quotes to prove that they did (viz. "put the blood of war in his shoes," 1 Kings ii, 5; "make men go over in shoes," Isa. xi, 15), are equally adapted to the sandal—the first signifying that the blood was sprinkled on the thong of the sandal, the second that men should cross the river on foot instead of in boats. The shoes found in Egypt probably belonged to Greeks (Wilkinson, ii, 333). The sandal appears to have been the article ordinarily used by the Hebrews for protecting the feet. It was usually a sole of hide, leather, or wood, bound to the foot by thongs; but it may sometimes denote such shoes and buskins as eventually came into use. The above Hebrew term *nál* implies a simple sandal, its proper sense being that of confining or shutting in the foot with thongs; we have also express notice of the thong (סָרִיף; ἰμάς; A.V. "shoe-latchet") in several passages (Gen. xiv, 23; Isa. v, 27; Mark i, 7). The Greek term ὑπόδημα properly applies to the sandal exclusively, as it means what is bound under the foot; but no stress can be laid on the use of the term by the Alexandrine writers, as it was applied to any covering of the foot, even to the Roman *calceus*, or shoe, covering the whole foot. Josephus (*War*, vi, 1-8) so uses it of the *caliga*, the thick nailed shoe of the Roman soldiers. This word occurs in the New Test. (Matt. iii, 11; x, 10; Mark i, 7; Luke iii, 16; x, 4; John i, 27; Acts vii, 33; xiii, 25), and is also frequently used by the Sept. as a translation of the Hebrew term; but it appears in most places to denote a sandal. Similar observations apply to *σανδάλιον*, which is used in a general, and not in its strictly classical sense, and was adopted in a Hebraized term by the Talmudists. We have no description of the sandal in the Bible itself, but the deficiency can be supplied from collateral sources. Thus we learn from the Talmudists that the materials employed in the construction of the sole were either leather, felt, cloth, or wood (*Mishna*, *Jebam*. xii, 1, 2), and that it was occasionally shod with iron (*Sabb*. vi, 2). In Egypt various fibrous substances, such as palm-

leaves and papyrus stalks, were used in addition to leather (Herod. ii, 37; Wilkinson, ii, 332, 333), while in Assyria wood or leather was employed (Layard, *Nin.* ii, 323, 324). In Egypt the sandals were usually turned up at the toe like our skates, though other forms, rounded and pointed, are also exhibited. In Assyria the heel and the side of the foot were encased, and sometimes the sandal consisted of little else than this. This does not appear to have been the case in Palestine, for a heel-strap was essential to a proper sandal (*Jebam.* xii, 1). Ladies' sandals were made of the skin of an animal named *tachash* (Ezek. xvi, 10), whether a hyena or a seal (A. V. "badger") is doubtful; the skins of a fish (a species of *Halicore*) are used for this purpose in the peninsula of Sinai (Robinson, *Bibl. Res.* i, 116). Ladies of rank especially appear to have paid great attention to the beauty of their sandals (Cant. vii, 1); though if the bride in that book was an Egyptian princess, as most think, the exclamation, "How beautiful are thy feet with sandals, O prince's daughter!" may imply admiration of a luxury properly Egyptian, as the ladies of that country were noted for their sumptuous sandals (Wilkinson, *Anc. Egypt.* iii, 364). But this taste was probably general; for at the present day the dress slippers of ladies of rank are among the richest articles of their attire, being elaborately embroidered with flowers and other figures wrought in silk, silver, and gold. See DRESS. The thongs, those at least in Hebrew times, were handsomely embroidered (Judith x, 4; xvi, 9), as were those of the Greek ladies (Smith, *Dict. of Antiq.*

Ancient Greek and Roman Sandals.

s. v. "Sandalium"). Sandals were worn by all classes of society in Palestine, even by the very poor (Amos viii, 6), and both the sandal and the thong or shoe-latchet were so cheap and common that they passed into a proverb for the most insignificant thing (Gen. xiv, 23; Ecclus. xlii, 19). They were not, however, worn at all periods; they were dispensed with indoors, and were only put on by persons about to undertake some business away from their homes, such as a military expedition (Isa. v, 27; Eph. vi, 15), or a journey (Exod. xii, 11; Josh. ix, 5, 13; Acts xii, 8); on such occasions persons carried an extra pair, a practice which our Lord objected to as far as the apostles were concerned (Matt. x, 10; comp. Mark vi, 9, and the expression in Luke x, 4, "do not carry," which harmonizes the passages). An extra

pair might in certain cases be needed, as the soles were liable to be soon worn out (Josh. ix, 5), or the thongs to be broken (Isa. v, 27). During meal-times the feet were undoubtedly uncovered, as implied in Luke vii, 38; John xiii, 5, 6, and in the exceptions specially made in reference to the paschal feast (Exod. xii, 11); the same custom must have prevailed wherever reclining at meals was practised (comp. Plato, *Sympos.* p. 213). It was a mark of reverence to cast off the shoes in approaching a place or person of eminent sanctity: hence the command to Moses at the bush (Exod. iii, 5) and to Joshua in the presence of the angel (Josh. v, 15). In deference to these injunctions the priests are said to have conducted their ministrations in the Temple barefoot (Theodoret, *ad Ex.* iii, quæst. 7), and the Talmudists even forbade any person to pass through the Temple with shoes on (Mishna, *Berach.* 9, § 5). This reverential act was not peculiar to the Jews; in ancient times we have instances of it in the worship of Cybele at Rome (Prudent, *Peris.* 154), in the worship of Isis as represented in a picture at Herculaneum (*Ant. d'Ercol.* ii, 320), and in the practice of the Egyptian priests, according to Sil. Ital. (iii, 28). In modern times we may compare the similar practice of the Mohammedans of Palestine before entering a mosque (Robinson, *Bibl. Res.* ii, 36), and particularly before entering the Kaaba at Mecca (Burckhardt, *Arabia*, i, 270); of the Yezidis of Mesopotamia before entering the tomb of their patron saint (Layard, *Nin.* i, 282); and of the Samaritans as they tread the summit of Mount Gerizim (Robinson, ii, 278). The practice of the modern Egyptians, who take off their shoes before stepping on the carpeted *lewân*, appears to be dictated by a feeling of reverence rather than cleanliness, that spot being devoted to prayer (Lane, i, 35). It was also an indication of violent emotion, or of mourning, if a person appeared barefoot in public (2 Sam. xv, 30; Isa. xx, 2; Ezek. xxiv, 17, 23). This, again, was held in common with other nations, as instanced at the funeral of Augustus (Sueton. *Aug.* 100), and on the occasion of the solemn processions which derived their name of *Nudipedalia* from this feature (Tertull. *Apol.* 40). To carry or to unloose a person's sandal was a menial office, betokening great inferiority on the part of the person performing it; it was hence selected by John the Baptist to express his relation to the Messiah (Matt. iii, 11; Mark i, 7; John i, 27; Acts xiii, 25). The expression in Psa. lx, 8; cviii, 9, "over Edom will I cast out my shoe," evidently signifies the subjection of that country; but the exact point of the comparison is obscure, for it may refer either to the custom of handing the sandal to a slave, or to that of claiming possession of a property by planting the foot on it, or of acquiring it by the symbolical action of casting the shoe; or, again, Edom may be regarded in the still more subordinate position of a shelf on which the sandals were rested while their owner bathed his feet. The use of the shoe in the transfer of property is noticed in Ruth iv, 7, 8, and a similar significance was attached to the act in connection with the repudiation of a Levirate marriage (Deut. xxv, 9). Shoe-making, or rather strap-making (i. e. making the straps for the sandals), was a recognised trade among the Jews (Mishna, *Pesach.* 4, § 6). See SHOE.

Sandals, as insignia of office. They consisted of a sole so attached to the foot as to leave the upper part bare. Without these no priest was permitted to celebrate mass; but after the 7th and 8th centuries we find them expressly mentioned as an episcopal badge, distinct from that of the priests. They were supposed to indicate firmness in God's law and the duty of lifting up the weak.

Sandal-tree (*Santalum album*), a tree which yields an aromatic wood, much used in the pagodas for purposes of fumigation, and which is, therefore, an important article of commerce. The Hindis also grind it to a fine powder, which they dilute with water taken

from the Ganges until it becomes a thin paste, with which they mark the forehead and breast each day, after bathing, in accordance with the particular worship they profess.

Sandal-wood. See ALMUG.

Sandanam, in Hindû mythology, is one of the five trees which sprang from the bosom of the milk-sea when the mountain Mandu was turned in order to the preparing of the Amrita, and which bore the fruits of prosperity and abundance.

Sandanen, in Hindû mythology, was a celebrated king of the Middle Kingdom, friend to Siva, and ancestor of the Kurus and Pandus. He fell in love with Ganga, the wife of Siva, and was punished by being turned into an ape.

Sandanigen, in Hindû mythology, was one of the five sons borne by Drowadei, the wife of the five Pandus, to her husbands.

Sandeman, ROBERT, the founder of the Sandemanians (q. v.), was born at Perth, Scotland, in 1718. He studied two years at the University of Edinburgh, and then entered into business. He adopted Mr. Glas's views in opposition to all National Church establishments; and, taking up his residence in Edinburgh, he married one of Mr. Glas's daughters, joined the Glasites, and became an elder in the church that was formed in that city. In 1760 he removed to London, where he preached in various places, attracting much notice. He formed a congregation there in 1762, and in 1764 removed to the American colonies, where he continued till his death. His sympathy with the mother-country rendered him obnoxious to the colonists, and his prospects for usefulness were in a great measure blighted. After collecting a few small societies, he died at Danbury, Conn., 1771. He wrote, *Letters on Theron and Aspasio* (Edinb. 1757, 1803, 2 vols. 12mo):—*Correspondence with Mr. Pike*:—*Thoughts on Christianity*:—*Signs of the Prophet Jonah*:—*Honor of Marriage*, etc.:—*On Solomon's Song*.

Sandemanians, the followers of Robert Sandeman (q. v.). The leading doctrine of this sect is thus expressed in the epitaph on Mr. Sandeman's tomb in Danbury: "Here lies until the resurrection the body of Robert Sandeman, who, in the face of continual opposition from all sorts of men, long and boldly contended for the ancient faith that the bare death of Jesus Christ, without a deed or thought on the part of man, is sufficient to present the chief of sinners spotless before God." He describes justifying faith as nothing more nor less than "the bare belief of the bare truth" witnessed concerning the person and work of Christ. This, however, could only be entertained through divine teaching or illumination (see 1 Cor. ii, 14). The chief opinions and practices in which this sect differs from other Christians are their weekly administration of the Lord's supper; their love-feasts, of which every member is not only allowed, but required, to partake, and which consists in their dining together at each other's houses in the interval between the morning and afternoon services; their kiss of charity, used on the occasion of the admission of a new member, and at other times when they deem it necessary and proper; their weekly collection before the Lord's supper for the support of the poor, and paying their expenses; mutual exhortations; abstinence from blood and things strangled; washing each other's feet, when, as a deed of mercy, it might be an expression of love (the precept concerning which, as well as other precepts, they understand literally); community of goods, so far that every one is to consider all that he has in his possession and power liable to the calls of the poor and the Church; and the unlawfulness of laying up treasures upon earth, by setting them apart for any distant, future, and uncertain use. They allow of public and private diversions, so far as they are unconnected with circumstances really sinful;

IX.—Y

but, apprehending a lot to be sacred, disapprove of lotteries, playing at cards, dice, etc. They maintain a plurality of elders, pastors, or bishops in each church, and the necessity of the presence of two elders in every act of discipline and at the administration of the Lord's supper. In the choice of these elders, want of learning and engagement in trade are no sufficient objection, if qualified according to the instructions given to Timothy and Titus; but second marriages disqualify for the office, and they are ordained by prayer and fasting, imposition of hands, and giving the right hand of fellowship. In their discipline they are strict and severe, and think themselves obliged to separate from the communion and worship of all such religious societies as appear to them not to profess the simple truth for their only ground of hope, and who do not walk in obedience to it. We shall only add that in every transaction they esteem unanimity to be absolutely necessary. This sect in England has considerably diminished, so that in 1861 only six congregations were reported as belonging to the body, each having a very small attendance. They probably number less than 2000 throughout the world. See Glas, *Testimony of the King of Martyrs*; Sandeman, *Letters on Theron and Aspasio* (letter 11); Backus, *Discourse on Faith and its Influence*, p. 7-30; Adams, *View of Religions*; Bellamy, *Nature and Glory of the Gospel* (Lond. ed. notes), i, 65-125; Fuller, *Letters on Sandemanianism*; Hagenbach, *Hist. of Doctrines*, ii, 430, 431.

Sander, Antony, a Flemish ecclesiastic, was born at Antwerp in 1586, and died in 1664. He was the author of several religious and historical works in Latin.

Sander, Immanuel Friedrich Emil, Ph.D., a German divine, was born in 1797 at Schafstätt. For a time he preached in the University Church at Leipsic; then at Wichlinghausen, in Westphalia; and finally he was pastor at Elberfeld, where he died in 1861. Besides a great many *Sermons*, he published, *Der Kampf der evangelischen Kirche mit dem Rationalismus* (Barmen, 1830):—*Theologisches Gutachten über die Predigerbibel des Ed. Hülsmann* (ibid. 1836):—*Der Romanismus, seine Tendenzen u. seine Methodik* (Essen, 1843):—*Das Papstthum in seiner heutigen Gestalt*, etc. (Elberfeld, 1846):—*Die Abendmahlsgemeinschaft zwischen Lutherischen u. Reformisten* (ibid. 1859). See Zuchold, *Bibliotheca Theol.*, ii, 1113 sq.; Winer, *Handbuch der theol. Literatur*, p. 747; First, *Bibl. Judaica*, iii, 243. (B. P.)

Sandercrook, EDWARD, an English dissenting minister, was born in 1703. He was pastor of an independent congregation in Spittal Square, London, in 1727, at Bartholomew Close in 1730, and at Rotherhithe in 1738. He retired to York about 1762, where he died in 1770. He published, *Sermons* (Lond. 8vo).

Sanders, Billington McCarter, a Baptist minister, was born in Columbia County, Ga., Dec. 2, 1789; graduated at the South Carolina College Dec. 4, 1809; and about 1811 or 1812 was rector of the Columbia County Academy. He was for one year a member of the State Legislature, and afterwards for several years one of the judges of the Superior Court. Finally he turned his attention to the ministry, and was ordained Jan. 5, 1825. After preaching for a time at Williams Creek and at Pine Grove, he became in 1826 pastor of the Union Church in Warren County. In Dec., 1832, he commenced, by the desire of the Georgia Baptist Convention, to lay the foundation of the Mercer Institute, afterwards the Mercer University, of which he was appointed the first president. He resigned this office in 1839, after having conducted the institution successfully through the six years of its academic minority and the first year of its collegiate career. He occupied highly honorable positions in divers societies. He was for several years clerk of the Georgia Association, and for nine years its moderator. For six years he was president of the Georgia Baptist Convention, and for a much longer time a member of its executive board. He

was often a delegate to the General Triennial Convention, and, after the separation, was several times a delegate to the Southern Baptist Convention. He also edited for a year the *Christian Index*, and was an ardent supporter of temperance, foreign and domestic missions, Bible societies, and all kindred forms of Christian beneficence. He died March 12, 1854. See Sprague, *Annals of the Amer. Pulpit*, vi, 740.

Sanders, Daniel Clarke, D.D., a Unitarian Congregational minister, was born in Sturbridge, Mass., May 3, 1768. He was prepared for college by Rev. Samuel West, admitted at Harvard in 1784, and graduated in 1788. After his graduation he engaged in teaching. He was licensed to preach by the Denham Association, and was ordained and installed pastor of the Congregational Church in Vergennes, Vt., June 12, 1794. He continued in this charge about six years, when he became president of the University of Vermont, which position he held fourteen years. He was installed as pastor at Medfield, Mass., May 24, 1815. He was a member of the convention that revised the constitution of Massachusetts in 1820-21. He retired from his pastoral charge in 1829. He died at Medfield, Oct. 18, 1850. His published works consist of a *History of the Indian Wars*, etc. (Montpelier, Vt., 1812, 8vo), besides more than thirty *Sermons*. See Sprague, *Annals of the Amer. Pulpit*, viii, 226 sq.

Sanders, Edward, a minister of the Methodist Episcopal Church, was a native of Maryland, and grew up to manhood without religious influences. In early manhood, however, he was brought to see his condition, and found peace in believing. He entered the itinerant ministry as a member of the Philadelphia Conference in 1834, and continued in that Conference until the New Jersey Conference was set off. The remainder of his effective ministry was passed in the latter Conference. While in charge of the River Church, his health failed, and, taking a supernumerary relation, he settled in Pennington, N. J., where he died, Dec. 31, 1859. His life was a rebuke to infidelity and a comfort to Christians.—*Minutes of Annual Conf.* 1860, p. 39.

Sanders, Nicholas, a prominent Roman Catholic writer of the 16th century. He was born at Charlewood, in Surrey, about 1527, and educated at Winchester school, whence he removed to New College, Oxford. He was made fellow of his college in 1548, and in 1550 or 1551 took the degree of bachelor of laws. He declined the office of Latin secretary to queen Mary for the sake of study. In 1557 he was one of the professors of canon law, and delivered the *Stragglings Lectures* (lectures not endowed) until the accession of queen Elizabeth, when his principles induced him to leave England. He arrived at Rome in 1560, studied theology, became doctor of divinity, and was ordained priest by Dr. Thomas Goldwell, bishop of St. Asaph. Soon after cardinal Hosius made him a member of his family, using him as assistant in the Council of Trent. Returning to Flanders, he was settled at Louvain for twelve years, and in 1579 he arrived in Ireland as papal nuncio. He died in 1580 or 1581. Among his works are, *Supper of Our Lord* (Louvain, 1566-67, 4to):—*Treatise on the Images of Christ*, etc. (ibid. 1567, 8vo):—*The Rock of the Church* (ibid. 1566-67, 8vo):—*Treatise on Usury* (1566):—and others.

Sanderson, Robert, D.D., an English prelate, was born at Rotherham, Yorkshire, Sept. 19, 1587. Studied at Lincoln College, Oxford, became a fellow in 1606, and reader in logic in 1608; ordained deacon and priest in 1611. He was subrector in Lincoln College in 1613, 1614, and 1616; proctor of Oxford in 1616; bachelor of divinity in 1617; rector of Wilberton, Lincolnshire, in 1618, and of Boothby Pannell for more than forty years from 1619; prebendary of Lincoln in 1629; chaplain to Charles I in 1631; rector of Muston, Leicestershire, eight years from 1633; doctor of divinity in 1636. In 1642 he was prebendary of Southwell and of

Oxford, and regius professor of divinity, with the canonry of Christ Church. He was unable to enter the professorship until 1646; was ejected from the last two appointments in 1648, but restored in 1660, and consecrated bishop of Lincoln the same year. He died Jan. 29, 1662. The following are his principal works: *Logicæ Artis Compendium* (1615, 8vo; new ed. Lond. 1841, 12mo):—*Judicium Universitatis Ozoniensis* (ibid. 1648):—*De Obligatione Conscientiæ Prælectiones* (1647, 1660, 8vo; it has passed through several later editions—the last at Cambridge [1856, 8vo]). Besides other dissertations, he printed numbers of his *Sermons*, which were collected and published, together with his *Life* by Izaak Walton (Lond. 1689, fol.). See Cattermole, *Lit. of the Ch. of England*, ii, 10-34.

Sandes, in Persian mythology, was a fabled Persian hero, supposed to be identical with *Jemshid*, and by his deeds a counterpart of Hercules.

Sandford, Daniel, D.D., a Scotch prelate, was born at Delville, near Dublin, in 1766, and was educated at Christ Church, Oxford, where he won the prize for Latin composition in 1787. At Edinburgh, in 1792, he became minister of an Episcopal congregation for whom Charlotte Chapel was built in 1797. He joined the Episcopal Church of Scotland in 1803, and was ordained bishop of Edinburgh in 1806. He consecrated for his own congregation the newly erected Chapel of St. John in 1818. Bishop Sandford died in 1830. He published, *Lectures on Passion Week* (Edinb. 1797, 8vo; 1821, 12mo; 1826, 12mo):—*Sermons preached in St. John's Chapel* (ibid. 1819, 8vo):—*Remains and Sermons*, etc. (ibid. 1830, 2 vols. 8vo).

Sandford, David, an American Congregational minister, was born in New Milford, Conn., Dec. 11, 1737, and graduated at Yale College in 1755. Influenced by the wish of his father, he began the study of theology, but realizing that he had not the spiritual qualifications for the ministry, he relinquished his purpose in that direction. He settled upon a farm, where he remained a number of years, when, experiencing a change of life, he resumed the study of theology, and was ordained pastor of the church at Medway, Mass., April 14, 1773. Mr. Sandford served a short time as chaplain in the army. In 1807 he suffered severely from a stroke of paralysis, and never resumed his public labors. He died April 7, 1810. His only printed production is *Two Dissertations* (1810); one on *The Nature and Constitution of the Law given to Adam*, etc., the other on *The Scene of Christ in the Garden*, etc. See Sprague, *Annals of the Amer. Pulpit*, ii, 48.

Sandford, Peter P., D.D., a Methodist Episcopal minister, was born of respectable parents in Lodi, N. J., Feb. 28, 1781. At eighteen years of age he was converted, and still earlier had begun to hold religious services among his neighbors. In 1807 he entered the Philadelphia Conference, and in 1810 he was transferred to the New York Conference, in which he held some of the most important appointments till his death, Jan. 14, 1857. He "was a thorough divine, an able preacher, a judicious administrator of discipline, and an eminently honest Christian." See *Minutes of Annual Conferences*, 1857, p. 320.

Sandiadevi, in Hindû mythology, was a daughter of Brahma, to whom he gave birth from his own person, after having assumed a human form of extraordinary attractiveness, in order that he might people the world with gods.

Sandini, Anthony, an Italian ecclesiastical historian, was born June 31, 1692, and became, by the interest of his bishop, cardinal Rezzonico (who was afterwards pope Clement XIII), librarian and professor of ecclesiastical history at Padua, where he died, Feb. 23, 1751. He is known principally by his *Vite Pontificum Romanorum* (Ferrara, 1748; reprinted under the title of *Basis Historiæ Ecclesiasticæ*). He also wrote *Historia*

Familia Sacra: — *Hist. SS. Apostolorum*: — *Disputationes XX ex. Hist. Eccles.*, etc.:—and *Dissertations in Defence of his Hist. Fam. Sac.*, which father Serry had attacked.

Sandomir (also SENDOMIR) AGREEMENT (*Consensus Sendomiriensis*), an accommodation reached by the Protestant churches of Poland in 1570, at a synod held at Sandomir, now the capital of the government of Radom, by which existing differences were composed and a fraternal union was established.

The Protestantism of Poland was of three types: 1, the Lutheran, introduced from Germany, and taking root chiefly in what is now Prussian Poland; 2, the Swiss, or Reformed, dating its introduction nearly to the same period as the Lutheran, and prevailing chiefly in Cracow and the surrounding country; and, 3, the Bohemian, brought in by refugees from the persecutions which raged in their native land. The language and customs of these refugees resembled those of the country in which they sought a home, and their Church possessed further advantages in its compact organization, thorough government, and rich hymnology, by which it was enabled to make rapid advances. These successes gave rise to the first disagreements with which the Polish Reformation was troubled, and furnished evidence of a wide division between the Lutherans and the Bohemian churches, the former charging the Bohemian Brethren with erroneous teaching, particularly in respect to the doctrines of justification and the Lord's supper, and with intentional neglect of scientific culture; and the latter retorting with reflections upon the absence of Church discipline and of moral restraints among their opponents. The progress of the Reformation in Strasburg in the meantime furnished the Brethren with an opportunity to enter into relations with other Protestant churches; and a delegation from Bohemia, appointed in 1540 for that purpose, having been favorably received by Bucer, Hedio, Capito, Calvin, and other Reformers, served to establish an intimacy of friendship between the respective leaders which was carefully cherished by the Bohemian Church.

The necessity of conciliating the opposing parties was apparent. The machinations of Romanism threatened them with a common danger; and it became important, after 1551, to check the progress of the antitrinitarian movement headed by Lælius Socinus; and the efficient organization of the Bohemian congregations, together with the fact that many of the foremost personages in the state were at least their friends and patrons, indicated that a closer relation with them was essential to the stability and required for the defence of the Reformation. The earliest attempt of which we have authentic information was made by Felix Cruciger, a supporter of the Swiss Confession and evangelical superintendent in Little Poland, through the medium of discussions on the state of the Church with representative Bohemians. A compromise was ultimately effected at the general Synod of Kozminek in 1555, by which the Bohemian Confession was adopted, the liturgy of the Bohemians to be introduced, and their consent to be obtained to any undertaking. This agreement secured the approval of many theologians of the Reformed confessions in other lands, and of such men as Paul Vergerius and Brenz among the Lutherans. But the provisions of Kozminek were not executed with energy. John à Lasko, the eminent Reformer, whose high birth and former services gave him an assured influence, returned from exile (December, 1556) and discouraged further effort; and when, towards the close of the year 1557, opinions adverse to the proposed union were received from Calvin, Bullinger, Viret, and others of the Swiss Reformers, the compromise fell to the ground, having effected nothing that was expected from it, and leaving behind it the additional complication of excited feelings between the Reformed and the Bohemian parties.

To remedy this failure, Lasko now proposed that a

colloquy be held in Moravia for the purpose of discussing the objections raised against the Bohemian Confession, and the Brethren readily agreed. Leipnik was chosen as the place of meeting. Fifteen points were presented for discussion, bearing chiefly against the view of the Lord's supper taught by the Bohemian Church, and against the constitution of the Church itself, the latter presenting the more difficult problem to be solved. The constitution of the Bohemian Brotherhood had adopted the Romish principle of a clerocracy. The government of the churches was placed wholly in the hands of a regularly ordained and graded officary; and if the lay element was recognised in the fact that the clergy were required to depend for their support, in part, on secular occupations, this was counterbalanced by the imposition of celibacy on the priesthood, thus securing to persons of that class not only a distinctive character, but also an appearance of superior sanctity. To change the constitution of the Church in this respect was impossible without giving up the principle of an organization to which the Brotherhood owed its preservation in the most trying times of persecution. The requirement of celibacy from their priests was explained as a prudential measure dictated by the greater liability of that class to persecution; but the exclusion of the laity from the government of the Church admitted of no explanation satisfactory to a people whose nobles had been leaders in the Reformation and guides in the subsequent progress of the Church. The Conference of Leipnik closed without having effected any material result; and when a renewed effort to secure the approval of the Bohemian Confession by the Swiss theologians, Calvin and Musculus in particular, had failed, it was evident that all but hope was lost. The Synod of Xions (September, 1560), at which the Evangelical Church of Poland was constituted, did something, however, to keep that hope alive by admitting delegates from the Bohemian fraternity to its deliberations, and by adopting ecclesiastical terms peculiar to that Church, such as *senior* and *consenior*, into the new constitution.

In Great Poland, where Lutheranism predominated, the Melancthonian party, headed by the brothers Erasmus and Nicholas Gliczner, put forth earnest efforts in behalf of Protestant fraternity. A synod at Posen (1560), composed of representatives from the Evangelical and Bohemian churches, as well as of Lutherans, developed a plan of union which subsequently became the basis of the *Sandomir Agreement*. In the following year a discussion of doctrinal differences took place at Buzenin, the Lutherans being scantily represented, which led to the translation into Polish of the revised Bohemian Confession, and its submission for the approval of the Evangelical party; and it was resolved that delegates from either section should attend all synods without a formal invitation. The progress of the Antitrinitarian movement, headed by Lælius Socinus, together with the incursion of Anabaptist refugees from Bohemia and Moravia, likewise promoted the interests of fraternity among the Evangelicals by threatening to sweep away entire congregations from the orthodox faith. The Cracow congregation, acting under the advice of Calvin and Bullinger, met the emergency by adopting the Swiss Confession and form of government (1560), and was followed in this measure by most of the congregations in Little Poland, so that from this time the Poles must be regarded as Calvinists; and even the Lutherans of Great Poland and Lithuania took similar action by the substantial adoption of the resolutions of Xions, at a synod at Gostyn, in June, 1565, reserving only the teaching of the Augsburg Confession on the Lord's supper, and certain ecclesiastical usages.

The rigid Lutherans, whose leading representative was Benedict Morgenstern, resisted the union movement at every step, and profited by the organization of the Polish Lutheran Church by the synod of Gostyn to give the opposition a more definite and vigorous form; but the matter having—apparently by an oversight on

their part—been referred to the University of Wittenberg, a reply adverse to their purposes was received (Feb. 1568), which rendered futile further opposition. The nobles of the land, alarmed by the successes of Romanism, now urged the cessation of strife between the factions of Protestantism. Edicts from the throne, then occupied by the vacillating Sigismund Augustus, had pointed out the real unity of belief held by the conflicting parties by exempting them from a proscription decreed against sectaries; and when the diet of Lublin (1569), at which the union of Poland and Lithuania came to pass, convened, the evangelical nobles present decided that a synod should be called to prepare the way for establishing a national Evangelical Church. After a number of preliminary conferences had been held, the synod assembled at Sandomir, April 9, 1570, and continued its session until April 15. Various attempts to establish the confession of one party as the common faith were made and set aside, until a compromise was effected by which each party was pledged to maintain fraternal relations with the others, while guarding its own confession and independent Church life.

The Sandomir Agreement was not a measure designed to secure identity of doctrinal teaching, but a provision to effect a practical comity of intercourse between separate churches. It recognises the independence of the several churches, but removes the principal source of trouble—the doctrine of the Lord's supper—from the central position given to it by Lutheran polemics by emphasizing the agreement of the different confessions with respect to the leading doctrines of the faith. It provides that the ministry of either Church might conduct the worship and administer the sacraments in congregations of the other churches, though under restrictions intended to guard the usages and discipline of such congregations. It binds the contracting parties to avoid controversy and strife, and to make common cause against Romanism, sectarianism, and all other forces hostile to the Gospel; and it provides, in conclusion, that all important matters affecting the churches in Poland, Lithuania, and Samogitia should be regulated in common, and that deputies from all the churches should attend the general synods held by any one of them. A synod subsequently held (May 20, 1570), at Posen, and largely attended, took further measures to secure the practical operation of the *Consensus Sandomiriensis*; and the course of events from that time has proved that agreement as constituting the most important fact in the history of the evangelical churches in Poland. Some opposition to the compromise was manifested, and more or less uneasiness was betrayed from time to time; but the action of the general synod at Thorn, in 1595, in re-enacting the Sandomir resolutions, brought the dispute to a final settlement.

Sandoval, FRAY PRUDENCIO DE, a Spanish prelate and historian, was born at Valladolid about 1560. He was a Benedictine monk, and was appointed historiographer to Philip III, who employed him to continue the general history of Ambrosio Morales, which appeared under the title of *Historia de los Reyes de Castilla*

y de Leon. Among his other works are a *Historia de la Vida y Hechos del Emperador Carlos V.*, which is esteemed a standard work and has been translated into English, and a *Crónica del Emperador de España, Don Alonso VII.* Sandoval was made bishop of Tuy in 1608, and of Pampeluna in 1612. He died at Pampeluna, March 17, 1621. See Hoefer, *Nouv. Biog. Générale*, s. v.

Sands, ELISHA, a minister of the Methodist Episcopal Church, was born in the city of New York, 1830, and was converted under the ministry of R. S. Foster. He entered the New York East Conference, and labored in Orient, Greenport, Brooklyn (York and Warren streets), Jamaica, and Patchogue. By diligent study and natural gifts, he became an eloquent, impressive, and useful minister. He died in Brooklyn, N. Y., in 1868. See *Minutes of Annual Conferences*, 1869, p. 97.

Sandusky, JOHN, a minister of the Methodist Episcopal Church, South, was born in Jefferson (now Marion) County, Ky., Jan. 11, 1798. His connection with the ministry extended over a period of nearly, if not quite, fifty years, and embraced a time of arduous labor and little compensation. His death took place Oct. 15, 1874, at the house of his daughter, Catharine Logan, at which time Mr. Sandusky was a member of the Kentucky Conference. He was a man of marked character—brave, unselfish, just, and generous. He was master of the system of theology of the Church to which he belonged, clear and forcible in preaching, and greatly gifted in prayer. See *Minutes of Annual Conferences*, M. E. Ch., South, 1875, p. 223.

Sandwich Islands, or HAWAIIAN ISLANDS, the most northerly cluster of the Polynesian Archipelago, containing twelve islands. The chain extends about 360 miles from south-east to north-west, and lies in the Pacific Ocean between lat. 18° 55' and 22° 20' N., and long. 154° 55' and 160° 15' W. The largest island is Hawaii, containing 4040 square miles; but Oahu, more central and having a good harbor, is the seat of government and the commercial centre. The population of the islands was estimated by Cook at 400,000—doubtless an exaggeration. In 1832 the official census gave 130,313, in 1850, 84,165; in 1860, 69,800; and in 1872, 56,899. This decrease is due to many causes, of which those now principally active may be traced to their contact with the whites. "Before missionary operations commenced, the people were, if not in the lowest state of barbarism in which men are ever found, yet certainly in a very low state of intellectual, social, and moral debasement. With no written language; with no comfortable dwellings; with very little clothing; with the family constitution in ruins, unmitigated licentiousness universal, and every wild passion indulged without restraint; the people were 'a nation of drunkards,' with no laws or courts of justice. The people of all ranks were much under the influence of superstitious fears, and their religion, in connection with the cruel rites of idol-worship, was in a great measure a *tabu* system—i. e. a system of religious prohibitions and consecrations, which had extended itself very widely, and had become exceedingly burdensome under the direction of kings and priests who use the system to accomplish their own purposes" (Newcomb). Vancouver, who arrived with Cook in 1778, and returned in 1792, and again in 1794, made sincere attempts to enlighten the natives. His instructions were not forgotten, and, by a spontaneous movement, the whole nation rose up to destroy their idols and temples (1819-1820). The first missionaries to these islands were from America—Hiram Bingham and Asa Thurston, of Andover Theological Seminary. They arrived at Kailua, April 4, 1820, only a short time after the decisive battle had been fought which had subdued the party supporting idolatry. In 1822 the language was reduced to writing, since which time more than 200 works, mostly educational and religious, have been published in Hawaiian. The total number of Protestant missionaries sent to the islands, clerical

and lay, including their wives, is 156—at an expense, up to 1869, of \$1,220,000. The whole number of persons admitted to the Hawaiian Protestant churches up to 1873, inclusive, was 67,792; and the total membership of the same churches in 1873 was 12,283. In 1826, John Alexius Aug. Bachelot was appointed apostolic prefect of the islands, and arrived at Honolulu, July 7, 1827, with two other priests and four laymen. They landed without permission from the authorities, and countenanced and encouraged those who became their adherents in various violations of the laws. The government at last (Dec., 1831) sent them away to California; but in 1839 the French government sent a frigate to Honolulu, and compelled Kamehameha III to declare the Catholic religion free to all. The whole number of the Catholic population of the islands in 1872 was stated to be 23,000—probably an exaggeration. An English Reformed Catholic mission was sent out in 1862, and met with favor from Kamehameha V. An Anglican bishop of Hawaii was appointed, who remained until 1870. Since his return in that year the interest in the mission has decreased and its success is small. See *Appleton's New Amer. Cyclop.* s. v.; Newcomb, *Cyclop. of Missions*, s. v.

Sandys (or **Sandes**), **Edwin**, D.D., an English prelate. He was born at Hawkshead, Lancashire, England, in 1519, and educated at St. John's College, Cambridge, where he became influenced in favor of the Reformation. He was junior proctor of the university in 1542, was elected master of Catharine Hall in 1547, and was about the same time vicar of Haversham, Bucks; made doctor of divinity and prebend of the Cathedral of Peterborough in 1548, and of Carlisle in 1552; vice-chancellor of Cambridge in 1553. Having espoused the cause of Lady Jane Grey, he was thrown into the Tower in 1553, and remained there twenty-nine weeks. He escaped and fled to the Continent in 1554. On the death of Mary, he returned to England, and was appointed by Elizabeth one of the nine Protestant divines who were to hold a disputation before both houses of Parliament with the same number of the Romish persuasion. He was made bishop of Worcester in 1559, of London in 1570, and archbishop of York in 1576. He died July 10, 1588. He wrote *Sermons on Various Occasions* (Lond. 1585, 4to; 1616, 4to; Cambridge, 1841, 8vo). He assisted in the translation of the Scriptures known as the "Bishop's Bible," and was one of the commissioners appointed to revise the Liturgy. See Whitaker, *Life of Edwin Sandys*; Allibone, *Dict. Brit. and Amer. Authors*, s. v.

Sandys, Edwin, Sir, son of archbishop Sandys, was born at Worcestershire about 1561. He was educated, under Hooker, at Corpus Christi College, Oxford; made probationer fellow in 1579, and prebendary of York in 1581. Having supported the succession of James I, he was knighted by that monarch in 1603. He was an influential member of the second London Company for Virginia, and was its treasurer in 1619; but Spanish influence was exerted against him, and in 1620 king James forbade his re-election. He was the author of a work entitled *Europe Speculum, or a View on Survey of the State of Religion in the Western Part of the World*, etc. (1605, 4to, with numerous later editions):—*The Sacred Hymns, consisting of Fifty Select Psalms of David*, etc. (1615, 4to). It is uncertain whether this version was performed by Sir Edwin or by some other of the same name (Wood, *Athen. Oxon.* [Bliss's ed.], ii, 474). See Allibone, *Dict. Brit. and Amer. Authors*, s. v.; *Appleton's Cyclop.* s. v.

Sandys, George, an Oriental traveller, was the seventh and youngest son of archbishop Sandys, and was born at Bishopsthorpe in 1577. He entered St. Mary's Hall, Oxford, and travelled in the East from 1610 till 1612. In 1621 he succeeded his brother as colonial treasurer of Virginia, and while in that colony completed his translation of the *Metamorphoses* of Ovid. Returning to England in 1624, he was appointed a gen-

tleman of the king's privy chamber. He died at Bexley Abbey, Kent, the residence of his niece, lady Margaret Wyatt, in 1644.

San Erdeni, in Lamaism, is one of the seven sacred objects which are placed before the idols in the temples of the Mongols, Kalmucks, and Thibetans. It represents a white elephant, an animal regarded with the utmost veneration by those peoples, inasmuch that the loftiest title of the sovereigns of Birmah, China, and India (the former "Great Mogul") is "lord of the white elephant," and bloody wars have been waged to secure it as an exclusive right.

Sanford, David, a Congregational minister, was born at New Milford, Conn., Dec. 11, 1737, and graduated at Yale College in 1755. He was ordained pastor of the Church at Medway, Mass., in 1773, which connection he retained until his death in 1810. He published, *On the Nature and Constitution of the Law given to Adam in Paradise:—On the Scene of Christ in the Garden of Gethsemane* (Boston, 1810, 8vo).

Sanford, Hiram, a minister of the Methodist Episcopal Church, was born in Cheshire, Conn., Feb. 27, 1805. His parents removed to Homer, N. Y., while he was a child. While quite young, he professed conversion and united with the Church. After about eight years spent in teaching and studying in Buffalo, he joined the Genesee Conference Oct. 14, 1835. He became supernumerary in 1851, and remained in this relation until 1854, when he was superannuated, and so continued until his death, which occurred in Phelps, May 16, 1865. Mr. Sanford was modest, very industrious, and faithful in every place he occupied. See *Minutes of Annual Conf.* 1865, p. 240.

Sanford, Joseph, a Presbyterian minister, was born in Vernon, Vt., Feb. 6, 1797. He became a communicant in the Church at the age of thirteen; pursued part of his preparatory course at Granville, Washington County, N. Y., and part at Ballston, Saratoga County, N. Y.; graduated at Union College in 1820, and at Princeton Theological Seminary, N. J., in 1823; was licensed by the Presbytery of New York in April, 1823; was pastor of the First Presbyterian Church, Brooklyn, L. I., from 1823 till 1828, and of the Second Presbyterian Church, Philadelphia, from 1828 until his death, Dec. 25, 1831. Mr. Sanford's only publication was a *Farewell Sermon*, delivered at Brooklyn in 1829 (8vo). He was a model pastor and a most effective preacher. See *Memoirs of Joseph Sanford*, by the Rev. Robert Baird (Phila. 1836, 12mo); Sprague, *Annals of the Amer. Pulpit*, iv, 655; Allibone, *Dict. Brit. and Amer. Authors*, s. v. (J. L. S.)

Sanga, a name given to the sacred pilgrimage of Isje, a central province of Japan. In Isje is the grand *Mia*, or temple of *Tensio-Dai-Dsin*, which is the model after which all the other temples are built. To this place the religious sect of the Sintoists requires each of its adherents to make a pilgrimage once a year, or at least once in their life.

Sangallensis, CODEX. See GALL (St.) MS.

Sangarius (Σαγγάριος), a river-god, is described as the son of Oceanus and Tethys, and as the father of Hecube. The river Sangarius (in Phrygia) itself is said to have derived its name from one Sangas, who had offended Rhea, and was punished by her by being changed into water.

Sanger, ZEDEKIAH, D.D., a Unitarian Congregational minister, was born at Sherburne, Mass., Oct. 4, 1748; entered Cambridge July, 1767, and graduated with high honors in 1771. His theological studies were pursued under the direction of Rev. Jason Haven, of Dedham. On July 3, 1776, he was ordained and installed pastor of the church in Duxbury. He resigned his charge in April, 1786, on account of impaired eyesight, and engaged in secular pursuits for two or three years. On Dec. 17, 1788, he was installed as the col-

league of Rev. John Shaw, South Bridgewater, where he spent the rest of his days. He received the degree of D.D. from Brown University in 1807. He died, after a short illness, Nov. 17, 1820. His published works are *five Ordination Sermons (1792-1812)*. See Sprague, *Annals of the Amer. Pulpit*, viii, 99.

Sangha, an assembly or chapter of Buddhist priests.

San-Gimignano, VINCENZO DA, an Italian painter, was born in Tuscany, and flourished during the earlier part of the 16th century. He was one of the pupils of Raphael, who esteemed him very highly for the softness of his coloring and the beautiful paintings in wax with which he ornamented the façades of several palaces. During the sack of Rome in 1527, Vincenzo fled to San-Gimignano, having lost almost all his works and designs. He lived only a short time after this misfortune. His works are very rare, one being in the Museum at Dresden—a *Madonna with the Infant Jesus and St. John*.

San-Giorgio, GIANANTONIO DI, an Italian prelate, was born at Milan in 1439. Having completed his studies at the University of Pavia, he opened a school of canonical law in that city, but at the end of six years returned to Milan. He there became a member of the College of Jurists, afterwards provost of the basilica of St. Ambrose, and in 1479 was made bishop of Alexandria. In 1493 Alexander VI bestowed upon him the cardinal's hat, and transferred him in turn to Parma, Frascati, Albano, and Sabina. This prelate was employed by the popes in various negotiations, and was a man of prudence and great learning. He died at Rome, March 14, 1509. He published several works, as *Commentaria super quarto Decretalium*:—*De Appellationibus*:—*De Usibus Feudorum*:—*Lecturae super Decretales*.

Sangra, in Hindû mythology, was a daughter of Wiswakarma and wife of the Sun-god, who caused his long and shining hair to be clipped from his head in order that Sangra, who could not endure their brilliant light, might remain with him.

Sangrid, in Norse mythology, was one of the Walkures, or messengers of Odin, who elect the warriors to be slain in battle.

Sanhedrim (Hebraized [see Buxtorf, *Lex. Chalm. Talm.* s. v.] *Sanhedrin*, סנהדרין, from the Greek *Synedrion*, συνέδριον, as in the New Test. [Matt. v, 22; xxvi, 59; Mark xiv, 55; xv, 1; Luke xxii, 66; John xi, 47; Acts iv, 15; v, 21, 27, 34; vi, 12, 15; xxii, 30; xxiii, 1, 6, 15, 20, 28; xxiv, 20], and Josephus [*Life*, xii; *Ant.* xiv, 9, 3]; apocoped סנהדרין, plural סנהדרין), the supreme council of the Jewish nation in and before the time of Christ. In the Mishna it is also styled בית דין, *Beth-Din*, "house of judgment;" and in the Apocrypha and New Test. the appellations *epousia*, *senate*, and *πρεσβυτέριον*, *presbytery*, seem also to be applied to it (comp. 2 Macc. i, 10; Acts v, 21; xxii, 5; 1 Macc. vii, 33; xii, 35, etc.). As there were two kinds of Synedria, viz. the supreme or metropolitan Sanhedrim, called סנהדרין גדולה, the *Great Sanhedrim* (Mishna, *Sanhedrin*, i, 5), and provincial councils called סנהדרין קטנה, the *Small Sanhedrim* (*ibid.*)—differing in constitution and jurisdiction from each other—we shall describe their respective organizations and functions separately, and close with an account of their history, largely as contained in the treatise of the Talmud which is devoted to this subject.

I. *The Great Sanhedrim, or Supreme Council*.—1. *Number of Members and their Classification*.—The Great Sanhedrim, or the supreme court of justice (בית הדין הגדול) as it is called (Mishna, *Horajoth*, i, 5; *Sanhedrin*, xi, 4), or *kar' iḥṣayāh*, בית הדין, the court of justice, the judgment-hall, because it was the highest ecclesiastical and civil tribunal, consisted of seventy-one

members (Mishna, *Sanhedrin*, ii, 4; *Shebuoth*, ii, 2). This is the nearly unanimous opinion of the Jews as given in the Mishna (*Sanhedrin*, i, 6): "The Great Sanhedrim consisted of seventy-one judges. How is this proved? From Numb. xi, 16, where it is said, 'Gather unto me seventy men of the elders of Israel.' To these add Moses, and we have seventy-one. Nevertheless, R. Judah says there were seventy." The same difference made by the addition or exclusion of Moses appears in the works of Christian writers, which accounts for the variation in the books between seventy and seventy-one. Baronius, however (*Ad Ann.* 31, § 10), and many other Roman Catholic writers, together with not a few Protestants, as Drusius, Grotius, Prideaux, Jahn, Bretschneider, etc., hold that the true number was seventy-two, on the ground that Eldad and Medad, on whom it is expressly said the Spirit rested (Numb. xi, 26), remained in the camp, and should be added to the seventy (see Hartmann, *Verbindung des A. T.* p. 182; Selden, *De Synedr.* lib. ii, cap. iv.).

These members represented three classes of the nation, viz. (a) *The priests*, who were represented by their chiefs, called in the Bible the chief priests (ראשי הכהנים = πάντες οἱ ἀρχιερεῖς), of whom there were most probably four-and-twenty (1 Chron. xxiv, 4, 6; with Matt. xxvii, 1; John vii, 32; xi, 47; xii, 10). (b) *The elders*, זקנים = πρεσβύτεροι (Matt. xvi, 21; xxi, 23; xxvi, 3, 47, 59; xxvii, 1, 3, 12, 20, 41; xxviii, 12; Mark viii, 31; xi, 27; xiv, 43, 53; Luke ix, 22; xx, 1; xxii, 52; John viii, 9; Acts iv, 5, 23; vi, 12; xxiii, 14; xxv, 15); also called the elders of the people (ἀρχοντες τοῦ λαοῦ, Acts iv, 8, with ver. 5), because they were the heads of the families and tribes of the people, for which reason πρεσβύτεροι and ἀρχοντες are also synecdochically used for βουλή and συνέδριον (Luke xxiii, 13; xxiv, 20; Acts iii, 17, etc.); these elders, who most probably were also twenty-four in number (Rev. iv, 4), were the representatives of the laity, or the people generally. (c) *The scribes* (סופרים = γραμματεῖς), who, as the interpreters of the law in ecclesiastical and civil matters, represented that particular portion of the community which consisted of the literary laity, and most probably were twenty-two in number. As the chief priests, elders, and scribes constituted the supreme court, these three classes are frequently employed in the New Test. as a periphrasis for the word Sanhedrim (Matt. xxvi, 3, 57, 59; xxvii, 41; Mark viii, 31; xi, 27; xiv, 43, 53; xv, 1; Luke ix, 22; xx, 1; xxii, 66; Acts v, 21; vi, 12; xxii, 30; xxv, 15); while John, who does not at all mention the Sadducees, uses the term Pharisees to denote the Sanhedrim (i, 24; iv, 1; viii, 3; xi, 46, etc.).

2. *Qualification and Recognition of Members*.—The qualifications for membership were both very minute and very numerous. The applicant had to be mortal and physically blameless. He had to be middle-aged, tall, good-looking, wealthy, learned (both in the divine law and diverse branches of profane science, such as medicine, mathematics, astronomy, magic, idolatry, etc.), in order that he might be able to judge in these matters. He was required to know several languages, so that the Sanhedrim might not be dependent upon an interpreter in case any foreigner or foreign question came before them (*Menachoth*, 65 a; *Sanhedrin*, 17 a; Maimonides, *Iad Hu-Chezaka*, *Hilchoth Sanhedrin*, ii, 1-8). Very old persons, proselytes, eunuchs, and Nethinim were ineligible because of their idiosyncrasies; nor could such candidates be elected as had no children, because they could not sympathize with domestic affairs (Mishna, *Horajoth*, i, 4; *Sanhedrin*, 36 b); nor those who could not prove that they were the legitimate offspring of a priest, Levite, or Israelite, who played dice, lent money on usury, flew pigeons to entice others, or dealt in produce of the Sabbatical year (Mishna, *Sanhedrin*, iii, 3).

In addition to all these qualifications, a candidate for the Great Sanhedrim was required, first of all, to have been a judge in his native town; to have been transferred from there to the Small Sanhedrim, which sat at the Temple mount or at its entrance (הַיְּהוּדָה or הַיְּהוּדָה), thence again to have been advanced to the second Small Sanhedrim, which sat at the entrance of the Temple hall (הַיְּהוּדָה), before he could be received as member of the seventy-one (*Sanhedrin*, 32 a, 88 b; Maimonides, *Iad Ha-Chezaka, Hilchoth Sanhedrin*, ii, 8).

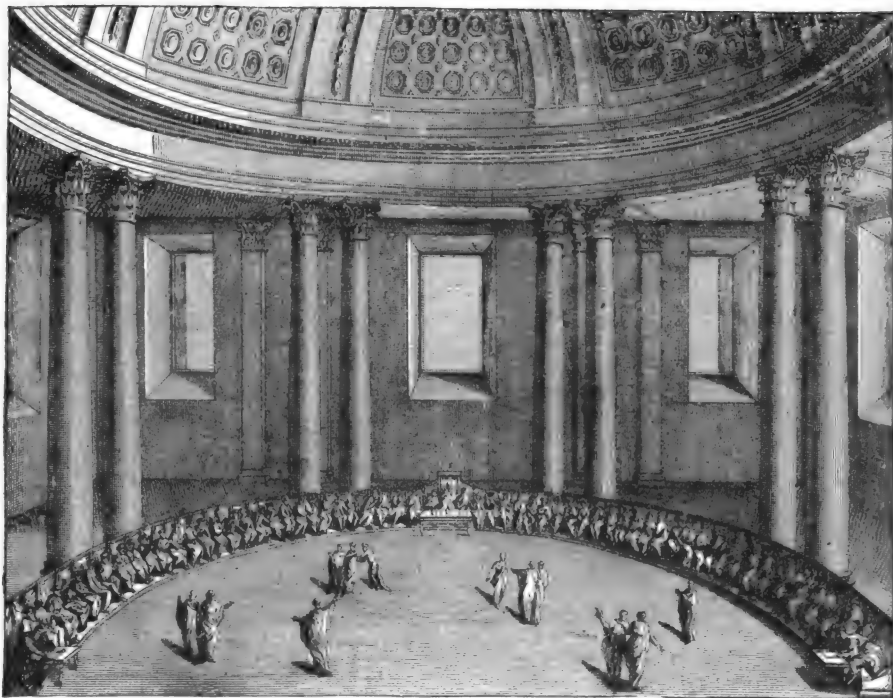

The ordination took place when the candidate was first appointed judge in his native place. In olden days every ordained teacher could ordain his disciples; afterwards, however, the sages conferred this honor upon Hillel I, B.C. 30; it was then decreed that no one should be ordained without the permission of the president of the Sanhedrim (נָשִׂיא); that the president and the vice-president should not ordain in the absence of each other, but that both should be present; and that any other member may ordain with the permission of the president and the assistance of two non-ordained persons, as no ordination was valid if it was effected by less than three persons (*Mishna, Sanhedrin*, i, 3). The ordination was effected, not by the laying-on of hands on the head of the elder, but by their calling him rabbi, and saying to him, "Behold, thou art ordained, and hast authority to judge even cases which involve pecuniary fines" (Maimonides, *ibid.* iv, 1-4).

The Sanhedrim was presided over by a president called *Nasi* (נָשִׂיא) = prince, patriarch, and a vice-president styled אָבִי בֵּית דִּין, the father of the house of judgment. The power of electing these high officials was vested in the corporate assembly of members, who conferred these honors upon those of their number who were most distinguished for wisdom and piety. The king was the only one disqualified for the presidential throne, because according to the Jewish law it is forbidden to differ from him or to contradict his statement; but the high-priest might be elected patriarch provided he had the necessary qualifications (*Sanhedrin*, 18 b; Maimonides, *Iad Ha-Chezaka, Hilchoth Sanhedrin*, ii, 3). After the death of Hillel I, however, the presidency became hereditary in his family for thirteen generations. See HILLEL I. The functions of the *Nasi* or the patriarch were more especially external. Being second to the king, the *Nasi* represented the civil and religious interests of the Jewish nation before the Roman government abroad, and before the different Jewish congregations at home; while in the Sanhedrim itself he was simply the reciting and first teacher. The vice-president, on the other hand, had his sphere of labor more especially within the Sanhedrim. It was his office to lead and control their discussions on disputed points; hence his appellation, "father of the house of judgment." Next to the vice-president, or the third in rank in the Sanhedrim, was the חָכָם, sage, referee, whose office it was to hear and examine the pending subject in all its bearings, and then to bring it before the court for discussion. This dignitary we first meet with under the presidency of Gamaliel II, the teacher of the apostle Paul [see GAMALIEL], and his son Simon II (*Horujoth*, 13; *Tosephta Sanhedrin*, cap. vii; Frankel, *Monatsschrift*, i, 348). Besides these high functionaries, there were sundry servants not members of the seventy-one, such as two judges' scribes (סוֹפְרֵי הַדִּינִין), or notaries, one of whom registered the reasons for acquittal, and the other the reasons for condemnation (*Mishna, Sanhedrin*, iv, 3); and other menial officials, denominated שְׂמַשְׁרֵי בֵּית דִּין = ὑπηρέτης, πράκτωρ (*Matt.* v, 25; xxvi, 58; *Mark* xiv, 54, 65; *Luke* xii, 58; *John* vii, 32, 45; xviii, 3, 12, 18, 22; xix, 6; *Acts* v, 22, 26; xxiii, 2, etc.).

3. *Place, Time, and Order in which the Sessions were held.*—There seems not to have been any prescribed place for holding the sessions in the early part of the Sanhedrim's existence. In all probability they were held in some place adjoining the Temple, as the neighborhood of the sanctuary was deemed specially appropriate for the solemn assemblies which had to decide upon the most momentous questions affecting life and death, time and eternity. It was Simon ben-Shetach (B.C. 110-65) who built the *Hall of Squares* (לְשַׁנְיָה, הַמִּשְׁכָּה), or, more briefly, the *Gazith* (גָּזִית), where both the Sanhedrim and the priests permanently held their meetings. This basilica, the floor of which was made of hewn square stones—whence its name (*Yoma*, 25 a)—was situated in the centre of the south side of the Temple court, the northern part extending to the court of the priests (קֹדֶשׁ), and the southern part to the court of the Israelites (חוּל); it was thus lying between these two courts, and had doors into both of them (*Mishna, Sanhedrin*, xi, 2; *Pea*, iii, 6; *Middoth*, v, 3, 4; *Herzfeld, Geschichte des Volkes Israel*, i, 394 sq.; *Jost, Geschichte des Judenthums*, i, 145, 275). See TEMPLE. This hall henceforth became the prescribed court for the sessions of the Sanhedrim. The assembling of the Sanhedrim in the high-priest's house was illegal. Equally illegal was the assumption of the presidency by this sacerdotal functionary over this supreme court recorded in the New Test. (*Matt.* xxvi, 3; *Acts* v, 21, 27; xxiii, 2), as Gamaliel I was then the legitimate president (*Pesachim*, 88 b). When it is remembered that this sacred office was at that time venial, and that the high-priest was the creature of the Romans, this priestly arrogance will not be matter of surprise. "Forty years before the destruction of the Temple [i.e. while the Saviour was teaching in Palestine], the sessions of the Sanhedrim were removed from the Hall of Squares to the Halls of Purchase" (*Sabbath*, 15 a; *Aboda Sara*, 8 b), on the east side of the Temple mount.

The Sanhedrim sat every day from the termination of the daily morning sacrifice till the daily evening sacrifice, with the exception of the Sabbath and festivals, when they retired to the synagogue on the Temple mount and delivered lectures (*Sanhedrin*, 88 b; Maimonides, *Iad Ha-Chezaka, Hilchoth Sanhedrin*, iii, 1). The order in which they sat was as follows: the president (נָשִׂיא) sat in an elevated seat; on his right hand sat the vice-president (אָבִי בֵּית דִּין), and at his left the *chakam* (חָכָם), or referee; while the members, seated on low cushions, with their knees bent and crossed in the Oriental fashion, were arranged, according to their age and learning, in a semicircle, so that they could see each other, and all of them be seen by the president and vice-president. The two notaries stood before them, one to the right and the other to the left. Before them sat three rows of disciples (תַּלְמִידֵיהֶם), in places appropriate to their respective attainments. From the first of these rows the ranks of the judges were always filled up. When those of the second row took their seat in the first, those of the third took the seats of the second, while members of the congregation generally were selected to fill the lowest places vacated in the third row (*Mishna, Sanhedrin*, iii, 3, 4; Maimonides, *ibid.* i, 3). Under ordinary circumstances all the seventy-one members were not required to be present in their seats, so that most of them could attend to their business, since twenty-three members formed a quorum. Less than this number during any part of the session was illegal; hence before one could go out he was obliged to look round in order to ascertain that there was the legal quorum without him (*Sanhedrin*, 88 b; *Tosephta Shekalim*, at the end; Maimonides, *Hilchoth Sanhedrin*, iii, 2).

4. *Jurisdiction of the Sanhedrim.*—Being both legislative and administrative, the functions of the Sanhedrim in the theocracy extended to the institution of or-

The Great Sanhedrim (according to Lamy).

dinances and the definition of disputed points in ecclesiastical matters, as well as to the adjudication of ecclesiastical and secular questions, including even political matters. The tribunal had, in the first place, to interpret the divine law, and to determine the extension or limitation of its sundry enactments, inasmuch as the members of the Sanhedrim were not only the most skilled in the written word of God, but were the bearers of the oral law which was transmitted to them by their predecessors, and which they again in succession handed down to the other members of this body. Thus the Sanhedrim had (a) to watch over the purity and legality of the priests who ministered in holy things. For this purpose they appointed trustworthy persons to keep family registers (סֵפֶר יִיחֻסִּין, *genealogies*) of the priests in Egypt, Babylon, and in all places where the Jews resided, stating the names, and giving all the particulars both of the head of the family and all his male descendants, and to supply every priest with such a document attested by the Sanhedrim, inasmuch as those priests who could not prove that they were not the issue of proscribed marriages were disqualified for ministering in holy things, and were ordered to divest themselves of their sacerdotal robes and put on mourning (Mishna, *Sanhedrin*, i, 5; *Middoth*, v, 4; *Bechoroth*, 45 a; *Tosephta Chagiga*, cap. ii; Josephus, *Cont. Apion.* i, 7). (b) To try cases of unchastity on the part of priests' daughters, and married women who were accused by their husbands of infidelity, which were questions of life and death (Mishna, *Sota*, i, 4; *Sanhedrin*, 52 a). (c) To watch over the religious life of the nation, and to try any tribe which was accused of having departed from the living God to serve idols (*ibid.* i, 5). (d) To bring to trial false prophets or any heretic who promulgated doctrines contrary to the tenets of the scribes or the Sanhedrim (דִּבְרֵי סוֹפְרִים): "Such a one is not to be executed by the tribunal of his native place, nor by the tribunal at Jabne, but by the supreme court of Jerusalem; he is to be kept till the forthcoming festival, and to be executed on the festival," as it is written:

(Deut. xvii, 13), "and all the people shall hear and fear, and do no more presumptuously" (Mishna, *Sanhedrin*, xi, 3, 4; comp. also Matt. xxvi, 65; xxvii, 63; John xix, 7; Acts iv, 2; v, 28; vi, 13). In accordance with this is the remark of our Saviour, "It cannot be that a prophet perish out of Jerusalem" (Luke xiii, 33, with Josephus, *Ant.* xiv, 9, 3). (e) To see that neither the king nor the high-priest should act contrary to the law of God. Thus the Talmud tells us that Alexander Janneus was summoned before the Sanhedrim to witness the trial of his servant, who had committed murder (B.C. 80), under the presidency of Simon ben-Shetach (*Sanhedrin*, 19 a), and we know that Herod had to appear before this tribunal to answer for his conduct (Josephus, *Ant.* xiv, 9, 4). (f) To determine whether a war with any nation contemplated by the king is to be waged, and to give the sovereign permission to do so (*Sanhedrin*, i, 5; ii, 4). (g) To decide whether the boundaries of the holy city or the precincts of the Temple are to be enlarged, inasmuch as it was only by the decision of the Sanhedrim that these additions could be included in the consecrated ground (*ibid.* i, 5; *Shebuoth*, 14 a). (h) To appoint the provincial Sanhedrim, or courts of justice (*Sanhedrin*, i, 5; Gemara, *ibid.* 63 b; *Tosephta Sanhedrin*, cap. vii; *ibid.* *Chagiga*, cap. ii; *Jerusalem Sanhedrin*, i, 19 b). (i) To regulate the calendar and harmonize the solar with the lunar year by appointing intercalary days (*Sanhedrin*, 10 b). This jurisdiction of the Sanhedrim was recognised by all the Jews both in Palestine and in foreign lands (Acts ix, 2; xxvi, 10; with Mishna, *Manoth*, vi, 10; *Tosephta Sanhedrin*, cap. vii; *Chagiga*, cap. ii). Thereby this supreme court secured unity of faith and uniformity of practice.

5. *Mode of Conducting Trials, Punishments, etc.*—The humane and benevolent feelings of the rulers towards the people whom they represented were especially seen in their administration of the law. They always acted upon the principle that the accused was innocent till he could be proved guilty. Hence they always manifested an anxiety, in their mode of conducting the trial, to clear the arraigned rather than secure his condemnation, es-

pecially in matters of life and death. Their axiom was that "the Sanhedrim is to save, not to destroy life" (*Sanhedrin*, 42 b). Hence no man could be tried and condemned in his absence (John vii, 51); and when the accused was brought before the tribunal, the president of the Sanhedrim at the very outset of the trial solemnly admonished the witnesses, pointing out to them the preciousness of human life, and earnestly beseeching them carefully and calmly to reflect whether they had not overlooked some circumstances which might favor the innocence of the accused (*Sanhedrin*, 37 a). Even the attendants were allowed to take part in the discussion, if a mild sentence could thereby be procured; while those members of the Sanhedrim who, during the debate, once expressed themselves in favor of acquitting the accused, could not any more give their votes for his condemnation at the end of the trial. The taking of the votes always began from the junior member and gradually went on to the senior, in order that the lowest members might not be influenced by the opinion of the highest (*ibid.* 32 a). In capital offences, it required a majority of at least two to condemn the accused; and when the trial was before a quorum of twenty-three, or before the *Small Sanhedrim*, which consisted of this number, thirteen members had to declare for the guilt (Mishna, *Sanhedrin*, iv, 1; Gemara, *ibid.* 2 a, 40 a). In trials of capital offences, the verdict of acquittal could be given on the same day, but that of *guilty* had to be reserved for the following day, for which reason such trials could not commence on the day preceding the Sabbath or a festival. No criminal trial could be carried through in the night (Mishna, *ibid.* iv, 1; Gemara, *ibid.* 32). The judges who condemned a criminal to death had to fast all day (*Sanhedrin*, 63 a). The condemned was not executed the same day on which the sentence was passed; but the votes pro and con having been taken by the two notaries, the members of the Sanhedrim assembled together on the following day to examine the discussion, and to see whether there was any contradiction on the part of the judges (Mishna, *Sanhedrin*, iv, 1; Gemara, *ibid.* 39 a). If on the way to execution the criminal remembered that he had something fresh to adduce in his favor, he was led back to the tribunal, and the validity of his statement was examined. If he himself could say nothing more, a herald preceded him as he was led to the place of execution, and exclaimed, "A, son of B, has been found guilty of death, because he committed such and such a crime according to the testimony of C and D; if any one knows anything to clear him, let him come forward and declare it" (Mishna, *ibid.* vi, 1). Clemency and humanity, however, were manifested towards him even when his criminality was beyond the shadow of a doubt, and when the law had to take its final course. Before his execution, a stupefying beverage was administered to the condemned by pious women to deprive him of consciousness and lessen the pain (*Sanhedrin*, 43 a, with Matt. xxvii, 48; Mark xv, 23, 36; Luke xxiii, 36; John xix, 29, 30). The property of the executed was not confiscated, but passed over to his heirs (*Sanhedrin*, 48 b). The only exception to this leniency was one who gave himself out as the Messiah, or who led the people astray from the doctrines of their fathers (מְרִידָא מִסִּיתָא=πλάνους; Matt. xxvii, 63; Luke xiii, 33; Acts iv, 2; v, 28). Such a one had to endure all the rigors of the law without any mitigation (*Sanhedrin*, 36 b, 67 a). He could even be tried and condemned the same day or in the night (*Tosephta Sanhedrin*, x; Matt. xxvii, 1, 2).

As to the different punishments which the Sanhedrim had the power to inflict, though they were commensurate with the gravity of the offences which fell within their jurisdiction to try, and embraced both corporal (Acts v, 40; Mishna, *Manoth*, iii, 1-5) and capital punishments, yet even this supreme court was restricted to four modes of taking life—viz. by stoning,

burning, beheading, and strangling (סְקִילָה שְׂרִיפָה חָרֵק וְחֹנֶק). These four modes of execution were the only legal ones among the Jews from time immemorial (Mishna, *Sanhedrin*, vii, 1), and could be inflicted either by the Great Sanhedrim or by the Small Sanhedrim. According to the Gospel of John, however, the Jews declare (ἡμῖν οὐκ ἔξεστιν ἀποκτεῖναι οὐδένα), "It is not lawful for us to put any man to death" (xviii, 31), which agrees with the remark in the Jerusalem Talmud that "forty years before the destruction of the Temple the power of inflicting capital punishment was taken away from Israel" (*Sanhedrin*, i, beginning; vii, 2, p. 24). But this simply means that without the confirmation of the sentence on the part of the Roman procurator, the Jews had not the power to carry the sentence of the Sanhedrim into execution. This is not only confirmed by Josephus, who tells us that the Pharisees complained to the procurator Albinus about the assumption to execute capital punishment on the part of the Sadducean high-priest (*Ant.* xx, 9, 1), but by the appeal of Paul to the chief captain (Acts xxii, 25-30), and especially by the whole manner in which the trial of Jesus was conducted. The stoning of Stephen (vii, 54, etc.) was the illegal act of an enraged multitude, as Josephus (*Ant.* xx, 9, 1) expressly declares the execution of the apostle James during the absence of the procurator to have been.

II. *The Small Sanhedrim*.—1. *Members, Constitution, etc.*—This judicial court consisted of twenty-three members, who were appointed by the Great Sanhedrim (Mishna, *Sanhedrin*, i, 5, 6), and a president (בִּישָׁלָא, *excellency*) as their head (*ibid.* i, 6; *Horajoth*, 4 b). They had the power not only to judge civil cases, but also such capital offences as did not come within the jurisdiction of the supreme court (Mishna, *Sanhedrin*, i, 4; iv, 1). Such provincial courts were appointed in every town or village which had no less than 120 representative men (מְצַמִּירִין)—i. e. twenty-three judges, three ranks of disciples of twenty-three persons each (=sixty-nine), ten constant attendants in the synagogue (עֲשָׂרָה בַּטְלָנִין שֶׁל בֵּית הַכְּנֶסֶת), two judges' notaries, the one to write down the arguments for and the other the arguments against the accused's innocence; two court servants to administer the forty stripes save one, and to wait upon the judges; two judges, two witnesses, two counter-witnesses, two witnesses to gainsay the counter-witnesses, two almoners, and one additional to distribute the alms, one physician, one scribe (לְכָלִי), and one schoolmaster for children—in all 120 (*Sanhedrin*, 17 b; Maimonides, *Iad Ha-Chezaka*, *Hilchoth Sanhedrin*, i, 10).

2. *Place, Time, and Order in which the Sessions were Held.*—In the provinces these courts of justice were at first held in the market-place, but afterwards in a room adjoining the synagogue (*Jerusalem Sanhedrin*, i, 1; *Baba Metsia*, li, 8), for the same reason which made the Great Sanhedrim hold their sittings in the Hall of Squares, in the inner court of the Temple. They sat every Monday and Thursday, being market-days (*Baba Rema*, 82 a; *Kathuboth*, 3 a), from the termination of morning prayer till the sixth hour (Maimonides, *Hilchoth Sanhedrin*, iii, 1). The order in which they were ranged was the same as that of the Great Sanhedrim. There were two of these lesser courts of justice in Jerusalem itself; one sat at the entrance to the Temple mount, and the other at the entrance to the Temple hall (Mishna, *Sanhedrin*, ix, 2), which on special occasions met together with the Great Sanhedrim (*Sanhedrin*, 88 b). There was no appeal to the Great Sanhedrim against the decision of this lesser Sanhedrim. Only when the opinion of the judges was divided did they themselves consult with the supreme court. The stripes to which offenders were sentenced were given in the synagogue by the officer already mentioned (Mark xiii, 9, with Matt. x, 17; xxiii, 34), and it is evidently to

such a local Sanhedrim that reference is made in Matt. v, 22; x, 17; Mark xiii, 9.

Besides these two courts, there was also one consisting of three judges. Within the jurisdiction of this court came suits for debts, robbery, bodily injuries, compensation for damages; thefts which involved a twofold, fourfold, or fivefold value to the proprietor (Exod. xxii, 1-9); rapes, seduction, slander, and all minor offences (Mishna, *Sanhedrin*, i, 1-3; iii, 1). There were in Jerusalem alone 390 such Sanhedrims.

III. *Origin, Development, and Extinction of the Sanhedrim*.—According to the most ancient Jewish tradition, the Sanhedrim was instituted by Moses, when he appointed, according to the command of God, seventy elders, who, together with him as their president, were to act as magistrates and judges (Numb. xi, 16-24), thus constituting the first Sanhedrim with its seventy-one members (Mishna, *Sanhedrin*, i, 6; Gemara, *ibid.* 2). Hence the so-called Jerusalem Targum paraphrases Exod. xv, 27, "And they came to Elim, and there were there twelve fountains of water, answering to the twelve tribes of Israel; and seventy palm-trees, answering to the seventy elders of the Sanhedrim of Israel," while the other Chaldee versions express the judicial courts and colleges of the remotest antiquity by the name Sanhedrim (comp. Targum, Isa. xxviii, 6; Ruth iii, 11; iv, 1; Psa. cxi, 10; Eccles. xii, 12). Hence, too, the offices of president and vice-president are traced to Moses (*Jerusalem Sota*, ix, 10). In the time of the kings, we are assured, Saul was president of the Sanhedrim in his reign, and his son Jonathan was vice-president (*Moed Katon*, 26 a); and these two functions continued during the time of the later prophets (*Pea*, 2 b; *Nasir*, 56 b; *Tosephta Yaduyim*, cap. xi). The Chaldee paraphrase on the Song of Songs tells us that the Sanhedrim existed even in the Babylonian captivity, and that it was reorganized by Ezra immediately after the return from the exile (comp. Song of Songs vi, 1). But though this view has also been entertained by some of the most learned Christian scholars (e. g. Selden, Leusden, Grotius, Reland), and though allusion is made in Jeremiah (xxvi, 8, 16) to the several distinct classes which we afterwards find constituting the Sanhedrim, while Ezekiel (viii, 11, etc.) actually mentions the existence of seventy elders in his time, yet there seems to be little doubt that this supreme court, as it existed during the second Temple, developed itself in the Greek rule over Palestine. Livy expressly states (xiv, 32), "Pronuntiatum quod ad statum Macedoniae pertinebat, senatores, quos *synedros* vocant, legendos esse, quorum consilio res publica administraretur." If the *ἐπονορία τῶν Ἰουδαίων* in 2 Macc. i, 10; iv, 44; xi, 27, designates the Sanhedrim—as it probably does—this is the earliest historical trace of its existence. The Macedonian origin of the Sanhedrim is corroborated by the following reasons: (a) The historical books of the Bible are perfectly silent about the existence of such a tribunal. (b) The prophets, who again and again manifest such zeal for justice and righteous judgment, never mention this court of justice, but always refer the administration of the law to the ruling monarch and the magnates of the land, thus showing that this central administration belongs to the period of the second Temple. (c) The name *συνεδριον*, *συνεδρεύειν*, by which it has come down to us, points to the fact that this synod originated during the Macedonian supremacy in Palestine. It is true that Josephus does not mention the Sanhedrim before the conquest of Judæa by Pompey (B.C. 63); but the very fact that it had such power in the time of Hyrcanus II as to summon Herod to answer for his unjust conduct (Josephus, *Ant.* xiv, 9, 4) shows that it must then have been a very old institution to have acquired such development and authority. Hence Frankel rightly remarks, "Upon more minute examination, we find that the chronicler gives a pretty plain sketch of the Great Sanhedrim, as he mentions the existence in Jerusalem of a supreme court consisting of priests, Levites, and

heads of families, with the high-priest as president (2 Chron. xix, 8, 11). . . . Now the chronicler, as Zunz has shown (*Gottesdienstliche Vorträge*, p. 32), lived as early as the beginning of the 2d century of the Seleucidæan æra, so that at that time the Sanhedrim did already exist, and its beginning is to be placed at the period in which Asia was convulsed by Alexander and his successors of the Ptolemean and Seleucidæan dynasties. Palestine, too, felt deeply the consequences of these recent convulsions, and to preserve its internal religious independence it required a thoroughly organized body to watch over both its doctrines and rights. This body manifested itself in the Sanhedrim, at the head of which was the high-priest, as is seen from Eccles. iv, 4, 5, and 2 Chron. xix, 8, 11. The Sanhedrim seems to have been dissolved in the time of the Maccabæan revolt in consequence of the unworthy high-priests (comp. 2 Macc.), but it was reconstructed after the overthrow of the Syrian yoke. As the people, however, were unwilling to leave the whole power in the hands of the Maccabees, who were already princes and high-priests, they henceforth placed at the head of the Sanhedrim a president and a vice-president" (*Der gerichtliche Beweis*, p. 68, note). This is, moreover, corroborated by the traditional chain of presidents and vice-presidents which is uninterruptedly traced from Jose ben-Joeser (B.C. 170), as well as by the statement that with Simon the Just terminated the Great Synagogue (*Aboth*, i, 2), from which the Sanhedrim developed itself. The transition from the Great Synagogue to the Great Sanhedrim is perfectly natural. "The Macedonian conqueror," as Frankel justly states (*Programm*, p. 6, 1834), "with all his clemency towards Palestine, which resisted him so long and so obstinately, effected changes in the internal government of the people, and dissolved the Great Synagogue, which to a certain extent conferred independence and a republican constitution upon the land. The people, however, valued highly their old institutions, and would not relinquish them. Hence most probably in the confusions which broke out after Alexander's death, when the attention of the fighting chiefs could not be directed towards Palestine, the supreme court was formed anew, assuming the name Synhedrion, which was a common appellation among the Greeks for a senate." It was this development of the Great Sanhedrim from the Great Synagogue which accounts for the similarity of the two names (סנהדרין גדולה, כנסת-הגדולה).

After the destruction of Jerusalem, when the holy city was no longer adapted to be the centre of religious administration, R. Johanan ben-Zakkai transferred the seat of the Sanhedrim to Jabne or Jamnia (A.D. 68-80); it was thence transferred to Usha (*Kethuboth*, 49; *Sabbath*, 15; *Rosh Ha-Shana*, 15 b), under the presidency of Gamaliel II, ben-Simon II (A.D. 80-116); conveyed back to Jabne and again to Usha; to Shafran, under the presidency of Simon III, ben-Gamaliel II (A.D. 140-163); to Beth-Shearim and Sepphoris, under the presidency of Jehudah I the Holy, ben-Simon III (A.D. 163-193; comp. *Kethuboth*, 103 b; *Nida*, 27 a); and finally to Tiberias, under the presidency of Gamaliel III, ben-Jehudah I (A.D. 193-220), where it became more of a consistory, but still retaining, under the presidency of Jehudah II, ben-Simon III (A.D. 220-270), the power of excommunication in case any Israelite refused to abide by its decisions; while under the presidency of Gamaliel IV, ben-Jehudah II (A.D. 270-300), it dropped the appellation Sanhedrim, and the authoritative decisions were issued under the name *Beth Ham-Midrash* (בית המדרש). Gamaliel VI (A.D. 400-425) was the last president. With the death of this patriarch, who was executed by Theodosius II for erecting new synagogues contrary to the imperial inhibition, the title of *Nasi*, the last remains of the ancient Sanhedrim, became wholly extinct in the year 425.

It was with reference to this Supreme Court that

Christ chose seventy disciples (Luke x, 1), answering to the seventy senators composing the Sanhedrim, just as he chose twelve apostles with reference to the twelve tribes of Israel (Matt. xix, 28; Luke xxii, 30), to indicate thereby to the Jews that the authority of their supreme religious court was now taken away and was vested in the seventy of his own choice, and over which he himself was the president and supreme Lord.

IV. *Literature*.—Mishna, *Sanhedrin*, and the Gemara on this tractate; excerpts of the Gemara tractate *Sanhedrin* have been translated into Latin with elaborate notes by John Coch (Amst. 1629); the monographs of Vorstius and Witsius, in Ugolino's *Thesaurus*, vol. xxv; Maimonides, *De Sanhedris et Pensis* (ed. Houting. Amst. 1695); Selden, *De Synedriis et Praefecturis Juridicis Veterum Ebraeorum* (Lond. 1650); Zunz, *Die gottesdienstlichen Vorträge der Juden*, p. 37 sq. (Berlin, 1832); *Israelitische Annalen*, i, 108, 131 sq. (Frankfort-on-the-Main, 1839); Frankel, *Der gerichtliche Beweis nach mosaisch-talmudischem Rechte*, p. 68 sq. (Berlin, 1846); Rapaport, *Erech Millin*, p. 2 (Prague, 1852); Frankel, *Monatsschrift für Geschichte und Wissenschaft des Judenthums*, i, 344 sq.; Levy, in Frankel's *Monatsschrift*, iv, 266 sq., 301 sq. (Leips. 1855); Herzfeld, *Geschichte des Volkes Israel*, ii, 380 sq. (Nordhausen, 1855); Krochmal, in the Hebrew essays and reviews entitled *He-Chaluz*, iii, 118 sq. (Lemberg, 1856); Jost, *Geschichte des Judenthums und seiner Secten*, i, 123 sq., 270 sq. (Leips. 1857); Grätz, *Geschichte der Juden*, p. 88 sq. (2d ed. Leips. 1863); Hartmann, *Die Verbindung des Alten Testaments mit dem Neuen* (Hamb. 1831). Comp. also SCHOOL, where all the presidents and vice-presidents of the Sanhedrim will be given in chronological order; and SYNAGOGUE, THE GREAT, where the development of the Sanhedrim from this institution will be traced. For monographs on the civil powers of the Sanhedrim in our Lord's time, see Volbeding, *Index Programmatum*, p. 58. See COUNCIL.

San-Jasis, one of the three classes of *Jagins*, which latter are Brahmanic anchorites. They affect great abstinence, and refrain from marriage, betel, and, indeed, pleasure in general. They are allowed to make but one meal a day, and to live on alms, carrying with them a cup of earthenware only. Their clothes are dyed with red earth, and they have a long bamboo cane in their hands. They are forbidden to touch either gold or silver, much less to carry any about them. They are not allowed to have any fixed residence, nor to lie two nights together in the same place, once a year excepted, when they are suffered to continue two months in the same place: they then select such a spot as is thought to be holy, and there they may remain for life if they wish. They are bound to be always ready to oppose six enemies, viz. *Cama*, lust; *Croota*, anger; *Lopa*, avarice; *Madda*, pride; the love of things of this world; and *Matsara*, thirst for revenge.

Sankara, or SANKARACHARYA, the name of one of the most renowned theologians of India. The time in which he flourished is unknown, tradition placing him at about B.C. 200, but H. H. Wilson assigns him to the 8th or 9th century after Christ. Most accounts agree in making him a native of Kerala or Malabar, and a member of the caste of the Namburi Brahmans. In Malabar he is said to have divided the four original castes into seventy-two, or eighteen subdivisions each. Towards the close of his life he repaired to Cashmere, and finally to Kedarnâth, in the Himalaya, where he died at the early age of thirty-two years. In the course of his career he founded the sects of the Dasnâmi-Dandins. His principal works, which are of considerable merit, and exercised a great influence on the religious history of India, are his commentary on the *Vedânta Sûtras*, on the *Bhaga-vadgita*, and the principal *Upanishads*. A number of works are current in the south of India relating to his life, among them the *Sankara-dig-vijaya*, or the conquest of the world by

Sankara. See Wilson, *Sketch of Religious Sects of the Hindûs*.

Sankhar, an evil spirit mentioned in the Jewish Talmud as having taken possession of the throne of Solomon.

Sankhyâ (Sanskrit, *synthetic reasoning*), the name of one of the three great systems of orthodox Hindû philosophy. Like the other systems, it professes to teach the means by which eternal beatitude, or the complete and perpetual exemption from every sort of ill, may be attained. This means is the discriminative acquaintance with *satwa*, or the true principles of all existence. Such principles are, according to the Sankhyâ system, twenty-five in number, as follows: (1) *Prakriti* or *Pradhâna*, substance or nature; it is the universal and material cause, eternal, productive but unproduced. Its first production is (2) *Mahat* (literally the great), or *Buddhi* (literally intellect). From it devolves (3) *Ahankâra* (literally the assertion of "I"), the function of which consists in referring the objects of the world to one's self. It produces (4-8) five *tanmâtâra*, or subtle elements, which produce the five gross elements [see (20-24)]. *Ahankâra* further produces (9-13) five instruments of sensation, viz. the eye, ear, nose, tongue, and skin; (14-18) five instruments of action, viz. the organ of speech, the hands, the feet, the excretory termination of the intestines, and the organ of generation; lastly (19), *manas*, or the organ of volition and imagination. The five subtle elements (4-8) produce (20-24) the five gross elements, viz. *akâsa*, space or ether, derived from the *sonorous tanmâtâra*; air, derived from the *aerial tanmâtâra*; fire, from the *igneous tanmâtâra*; water, from the *aqueous tanmâtâra*; lastly, earth, derived from the *terrene tanmâtâra*. The 25th principle is *Purusha*, or soul, which is neither produced nor productive; it is multitudinous, individual, sensitive, eternal, unalterable, and immaterial.

Creation results from the union of *Prakriti* (1) and *Purusha* (25), and is either material or intellectual. Besides the twenty-five principles, the Sankhyâ also teaches that nature has three essential *gunas*, or qualities, viz. *satwa*, the quality of goodness or purity; *rajas* (literally coloredness), the quality of passion; and, *tamas*, the quality of sin or darkness; and it classifies accordingly material and intellectual creation. From the foregoing summary it will be seen that the Sankhyâ proper does not teach the existence of a Supreme Being, by whom nature and soul were created, and by whom the world is ruled. Its opponents have therefore accused it of being atheistical; and it is the special object of the Yoga system to remove this reproach by asserting his existence and defining his essence. Its final object is not absorption in God, whether personal or impersonal, but "Moksha," deliverance of the soul from all pain and illusion, and recovery by the soul of its true nature. The Sankhyâ system underwent a mythological development in the Purânas (q. v.); thus *Prakriti*, or nature, is identified with *Mâyâ*, or the energy of Brahma; and the Matsya-Purâna affirms that *Buddhi*, or *Mahat*, the intellectual principle, through the three qualities goodness, passion, and sin, becomes the three gods—Brahma, Vishnu, and Siva. The most important development, however, of the Sankhyâ is that by the Buddhistic doctrine, which is mainly based on it.

The Sankhyâ philosophy is supposed to date from a period anterior to the 8th century B.C., and its reaction against Brahmanism became a popular movement in the 6th century in the Buddhistic reformation of Sankhyamuni, who taught the Yoga system with little change, and named its "deliverance of the soul from pain and illusion" the *Nîrvâna*. The reputed author of the actual Sankhyâ is Kapila (literally *tautny*), who is asserted to have been a son of Brahma; by others an incarnation of Vishnu. He taught his system in Su-

tras (q. v.), which, distributed in six lectures, bear the name of *Sankhyā-Prarachana*. The oldest commentary on this work is that by Aniruddha; another is that by Vijnānabhikṣu. They owe their preservation to Ishwara Krishna, who reduced them to writing, edited by H. H. Wilson. See Fitzedward Hall, Preface to his ed. of *Sankhyā-Prarachana*; H. T. Colebrooke, *Miscell. Essays* (Lond. 1837), i, 227 sq.; Max Müller, *Chips from a German Workshop*.

Sankrandanna, in Hindû mythology, is "the variable one," a surname of *Indra*, the god of the heavens and of the air.

Sanks, JAMES, a minister of the Methodist Episcopal Church, was born in Anne Arundel County, Md., June 12, 1806, and early removed to Virginia. In 1828 he was received on trial in the Baltimore Conference, where he labored until 1858, when he was transferred to the East Baltimore Conference and placed in charge of the Bellefonte district. In 1862 he was appointed to York, Pa., but soon sank under the influence of disease, and died in the borough of York, Pa., June 4, 1862. See *Minutes of Annual Conferences*, 1863, p. 11.

Sankuman, in Hindû mythology, is a wise and pious king, who secured the welfare of his realm and then became a penitent. He received from Vishnu the promise that the god would become incarnate in his family, which was fulfilled in his being born as Rama.

Sannah. See KIRJATH-SANNAH.

Sanngetal, in Norse mythology, is a surname of *Odin*.

Sannuwadi, in Hindû mythology, is one of the eight playmates of Ganga.

Sanquhar Declaration. After Hall of Haughhead had been killed at Queensferry, June 3, 1680, an unsigned paper was found in his possession, which was never recognised by the members of the Covenant. But on June 22, 1680, a party of twenty-one armed men boldly entered the little burgh of Sanquhar, and marched to the market cross, where they read and posted up a paper, throwing off all allegiance to the government, and proclaiming themselves in defiant rebellion. The Sanquhar paper was as follows: "It is not among the smallest of the Lord's mercies to this poor land that there have been always some who have given their testimony against every course of defection (that many are guilty of), which is a token for good that he doth not as yet intend to cast us off altogether, but that he will leave a remnant in whom he will be glorious, if they, through his grace, keep themselves clean still, and walk in his way and method, as it has been walked in and owned by him in our predecessors of truly worthy memory, in their carrying-on of our noble work of reformation in the several steps thereof, from popery, prelacy, and likewise Erastian supremacy, so much usurped by him who (it is true, so far as we know) is descended from the race of our kings; yet he hath so far departed from what he ought to have been, by his perjury and usurpation in Church matters, and tyranny in matters civil, as is known by the whole land, that we have just reason to account it one of the Lord's great controversies against us that we have not disowned him and the men of his practices (whether inferior magistrates or any other) as enemies to our Lord and his crown, and the true Protestant and Presbyterian interest in these lands, our Lord's espoused bride and Church. Therefore, although we be for government and governors, such as the Word of God and our covenant allow, yet we for ourselves, and all that will adhere to us, as the representatives of the true Presbyterian kirk and covenanted nation of Scotland, considering the great hazard of lying under such a sin any longer, do by these presents disown Charles Stuart, that has been reigning (or rather tyrannizing, as we may say) on the throne of Britain these years by-gone, as having any right, title to, or interest in the said crown of Scotland for government, as forfeit-

ed several years since by his perjury and breach of covenant both to God and his kirk, and usurpation of his crown and royal prerogatives therein, and many other breaches in matters ecclesiastic, and by his tyranny and breach of the very *leges regnandi* in matters civil. For which reason, we declare that several years since he should have been denuded of being king, ruler, or magistrate, or of having any power to act or to be obeyed as such. As also, we being under the standard of our Lord Jesus Christ, Captain of salvation, do declare a war with such a tyrant and usurper, and all the men of his practices, as enemies to our Lord Jesus Christ and his cause and covenants; and against all such as have strengthened him, sided with, or anywise acknowledge him in his tyranny, civil or ecclesiastic—yea, against all such as shall strengthen, side with, or anywise acknowledge any other in the like usurpation and tyranny—far more against such as would betray or deliver up our free reformed mother-kirk unto the bondage of antichrist, the pope of Rome. And by this we homologate that testimony given at Rutherglen, May 29, 1679, and all the faithful testimonies of those who have gone before, as also of those who have suffered of late. And we do disclaim that declaration published at Hamilton, June, 1697, chiefly because it takes in the king's interest, which we are several years since loosed from, because of the foresaid reasons, and others which may after this (if the Lord will) be published. As also we disown, and by this resent, the reception of the duke of York, that professed papist, as repugnant to our principles and vows to the most high God, and as that which is the great, though not alone, just reproach of our kirk and nation. We also by this protest against his succeeding to the crown; and whatever has been done, or any are essaying to do in this land (given to the Lord) in prejudice to our work of reformation. And, to conclude, we hope after this none will blame us for, or offend at our rewarding these that are against us, as they have done to us, as the Lord gives opportunity. This is not to exclude any that have declined, if they be willing to give satisfaction according to the degree of their offence. Given at Sanquhar, June 22, 1680." See QUEENSFERRY DECLARATION.

Sansan'nah (Heb. *Sansannah'*, סַנְסַנְנָה, palm-branch; Sept. Σανσαννὰ v. r. Σανσαννὰ), a town in the southern part of the territory of Judah (Josh. xv, 31). The corresponding lists of Simeon (Josh. xix, 5; 1 Chron. iv, 31) seem to call it HAZAR-SUSAH (q. v.). It is identified by Schwarz with the village of *Sinsum*, on a river of the same name, north-east of Gaza—a position which he acknowledges, however, to be rather in the lowlands than in the south of Judah (*Palest.* p. 101, 123); but the boundary-line can easily be accommodated to this location. See JUDAH, TRIBE OF. Wilton would identify it with the *Wady es-Suny* mentioned by Robinson (*Bibl. Res.* i, 299, 300), not far south of Gaza, which he supposes to have been the first resting-place for horses after leaving Gaza on the way to Egypt; and he thinks a confirmation is found for this in the circumstance that various travellers, in passing north from Egypt, have noticed that they first met with horses about that locality (*Negeb*, p. 210). Lieut. Conder thinks (*Tent-Work in Palest.* ii, 339) that it was at *Beit-susin*, east of the valley of Sorek; but this could not possibly have been within the territory of Simeon.

Sansbury (Sandsbury, or Sansbry), JOHN, a native of London, entered St. John's College, Oxford, in 1593, aged seventeen; vicar of the Church of St. Giles, Oxford, in 1607; bachelor of divinity in 1608; buried in Jan., 1609. He wrote, *Ilium in Italian*:—*Ozonica ad Protectionem Regis sui Omnium Optimi Filia*, etc. (Oxon. 1608, 16mo).

Sanscâra, or SANSKÂRA (Sanskrit, *completing*), the name of one of the ten essential rites or ceremonies of the Hindûs of the first three castes. They are the

cereemonies to be performed before and at the birth of a child; of naming the child on the tenth, eleventh, or one-hundred-and-first day; of carrying the child out to see the moon on the third lunar day of the third light fortnight, or to see the sun in the third or fourth month; of feeding him in the sixth or eighth month (or at other stated periods); the ceremony of the tonsure in the second or third year; of investiture with the string in the fifth, eighth, or sixteenth year, when he is handed to a *guru* to become a religious student; and the ceremony of marriage, after he has completed his studies and is fit to perform the sacrifices ordained by the sacred writings.

Sanskrit Versions. A translation of the New Test. into the Sanskrit, the ancient and classical language of India, was commenced in the year 1803 and finished at the press in 1808. The man who had immortalized his name by this translation was the well-known Dr. Carey (q. v.). He had also commenced a translation of the Old Test., when the disastrous fire at Serampore in 1812 interrupted his labors, destroying not only a dictionary of the Sanskrit and various Indian dialects, but also his MSS. of the second book of Samuel and the first book of Kings. In 1815 Dr. Carey received an associate in Dr. Yates, and both carried on the work of translating the Old Test., which was finally completed in 1822. In 1820 a second edition of the New Test. was undertaken at Serampore, the former edition, consisting of only 600 copies, having been completely exhausted. In 1827 a second edition of the Old Test. was in press, but various circumstances retarded its completion, and in 1834 the impression had been struck off only as far as the first book of Kings. As the first attempt of translating could only be defective, especially when undertaken at a period when the language had been little studied by Europeans, and no printed copies of the standard works were in existence, a statement as to the desirableness of a new and a more polished translation was laid before the committee of the Society for the Promotion of Christian Knowledge in 1835. The committee entered into communication on the subject with the bishop of Calcutta, and the new translation was undertaken by Dr. Yates, formerly the associate of Dr. Carey, upon whom the mantle of the venerable translator seemed to have fallen. Dr. Yates began the work in 1840 by the publication of the Psalms; in 1844 the Gospels were completed; and in 1846 the Proverbs and the New Test. were in the press. While prosecuting his work, Dr. Yates was overtaken by death in 1845. On examining the state of the version, it was found that the books of Genesis, Psalms, Proverbs, and Isaiah had all passed through the press, and that the rest of the Pentateuch, and the books of Job, Ecclesiastes, Canticles, and Daniel, had been prepared in MS. The work was now committed to the Rev. Mr. Wenger, the translator into the Bengalee, and in 1852 the second volume of the Old Test., containing the historical books from Judges to Esther inclusive, was completed. In 1858 a third volume, bringing the translation up to the Song of Solomon, was finished; in 1863 the translation was continued as far as the end of Isaiah; and in 1873 the translation of the whole Bible was announced as completed. Besides the translation into Sanskrit proper, there exist versions into

(a.) *Sanskrit-Bengalee*, i. e. reprints from the Sanskrit in Bengalee character—viz. Genesis (first published in 1855; 2d ed. 1860), Psalms (1857), Proverbs (1856), St. Luke (1855).

(b.) *Sanskrit-Devā Nāgarī*. With regard to the Devā Nāgarī character, the *Report of the British and Foreign Bible Society for 1877* states that "the Calcutta University has largely of late years so popularized this language and character that it has been thought desirable to print not only the book of Psalms, but also the book of Proverbs and the New Test." Only the Psalms have as yet been printed.

(c.) *Sanskrit-Orīya*. In this character the same parts as under (a) have been published.

See the *Bible of Every Land*, p. 86, and the *Annual Reports of the Brit. and For. Bible Society*. (B. P.)

Sansom, JAMES GREEN, a minister of the Methodist Episcopal Church, was born near Bedford, Bedford Co., Pa., May 18, 1794. So destitute was the place of educational and religious advantages, that Mr. Sansom did not hear a sermon nor enter a school-house until his thirteenth year. His early religious training was received from his mother, a member of the Presbyterian Church. In his seventeenth year he was brought into association with the Methodists, in 1818 was licensed to preach, and in 1819 was received on trial in the Baltimore Conference. In 1824 he went to Uniontown, Pa., which was soon after included in the Pittsburgh Conference, and he became one of its members. From 1819 till his death he was an earnest and effective minister, eighteen years serving as presiding elder. He died in Brownsville, Pa., May 4, 1861. He was of a genial spirit, interesting as a preacher, wise as a counsellor.—*Minutes of Annual Conf.* 1862, p. 44.

Sanson, JACQUES, a French ecclesiastical writer, was born at Abbeville, Feb. 10, 1596. He took orders as a Carmelite in 1619, under the name of *Ignace-Joseph de Jésus-Marie*. He was prior of the monastery at Paris, and afterwards had charge of the novices at Charenton and at Toulouse. While in the latter city he became confessor to the duchess of Savoy, and held the position until her death, in 1663. Returning to France, he assisted in founding two monasteries—one at Abbeville, the other at Amiens. He died at Charenton, Aug. 19, 1665. His writings are of very little account except those which give some history of the province of Ponthieu. These are, *Histoire Généalogique des Comtes de Ponthieu et des Maires d'Abbeville*, and *Histoire Ecclesiastique de la Ville d'Abbeville*.—Hoefler, *Nouv. Biog. Générale*, & v.

Sansovino, ANDREA CONTUCCI, an Italian sculptor and architect, was born in 1460 at Monte-Sansovino, in Tuscany. He was the son of a poor peasant, but was sent to Florence through the liberality of a fellow-townsmen, and studied under Antonio del Pollajuolo. At the age of thirty he was called to Portugal, where he remained nine years, and constructed various edifices for John II and Emmanuel I. In Rome are the tombs of cardinals Sforza and Basso, executed by Sansovino, and in the Church of St. Anna the group *The Madonna and St. Ann*, one of his best works. He also executed some beautiful bass-reliefs at Loretto. He died in 1529.

Santa Casa (*holy cottage*). See LORETTO, HOLY HOUSE AT.

Santa Croce, PROSPERO DI, an Italian prelate and diplomatist, was born at Rome in 1513. He studied law at Padua, and afterwards entered the Church. Paul III gave him the bishopric of Castel-Chisamo, on the island of Candia. He was employed as papal nuncio in Germany, Portugal, Spain, and France. While in the last-named country, he received, at the request of Catherine de' Medici, the bishopric of Arles, and in 1565 the cardinal's hat. In 1578 he gave up his see in favor of his nephew, Silvio di Santa Croce, and returned to Rome. Sixtus V made him bishop of Albano, but he lived only a few months after receiving the see. This cardinal introduced tobacco into Italy, and the name "Santa Croce" was given to the plant. He died at Rome, Oct. 2, 1589. He wrote the *Memoirs* of his life, and of the civil wars in France, in Latin. These have been published in the *Collectio Veterum Scriptorum* of Martenne and Durand, under the title *De Civilibus Gallie Dissensionibus Comm.* Besides this, there are *Decisiones Rotæ Romanæ*, *Constitutiones lucæ Artis in Urbe erectæ*, and many *Lettres* in French and Italian concerning the affairs of France, which are published in the *Synodes des Églises Réformées*.

Santali Version. Santali is the language spoken by the Santhals of North-western Bengal. In this lan-

guage the Gospel according to St. Matthew was for the first time printed in 1868, which was followed in 1873 by the Psalms, printed under the superintendence of the Calcutta Auxiliary Bible Society. In 1876 the *Report* of the British and Foreign Bible Society stated that the translation of St. Matthew had been revised, while the other Gospels and Acts were in the course of revision. In 1877 the *Report* stated that the Gospel of St. Mark had been printed, while St. Luke was in the press, and St. John and the Acts were ready for the press. All these portions were translated from the original by the missionaries of the Church Missionary Society. (B. P.)

Santarelli, ANTONIO, an Italian Jesuit, was born in 1569, at Atri, kingdom of Naples. At the age of sixteen he entered the Society of Jesus, and later taught belles-lettres and theology at Rome. He died there Dec. 5, 1649. He was the author of a work which at the time attracted much attention—*De Hæresi, Schismate, Apostasia, et Sollicitatione in Sacramento Penitentie, et de Potestate Summi Pontificis in his Delictis Punientis*. In 1626 it was censured by the Sorbonne, and the Parliament of Paris condemned it to the flames. Santarelli held that the power of the pope extended even above that of the sovereign, and the doctrine was even opposed by the Jesuits themselves when they saw their confrère denounced by the faculties of all the principal universities. Santarelli wrote some smaller works in Italian.

Santer, JOHN, a minister of the Methodist Episcopal Church, was born in the city of Tettwang, kingdom of Württemberg, Germany, May 18, 1812. He came to this country about 1835. Having been converted, he was licensed to preach, and in 1844 was sent to Rahway, N. J., and after three months to Newark, N. J., where he labored with success for three years. In 1845 he was received into the New Jersey Conference, and until 1868 was in active service, filling appointments successfully in the states of New York, New Jersey, Pennsylvania, and Maryland. From 1868 to 1874 he sustained a superannuated and superannuated relation. On March 17 he received injuries on the railroad that proved fatal, death taking place March 24, 1874. Mr. Santer was a good man, a diligent worker, a faithful pastor, and a safe adviser. See *Minutes of Annual Conf.* 1875, p. 44.

Santi (or **Sanzio**), GIOVANNI, an Italian poet and painter, was born at Colbordolo, duchy of Urbino. He was the father of the immortal Raphael, and his first master. It is supposed that the elder Sanzio studied under Mantegna. His designs, without being extremely delicate, are carefully studied. Many of his works have disappeared, but there may be seen in the Museum of Berlin his *Virgin Holding Jesus*, and a *Madonna with St. Thomas Aquinas and St. Catherine*. He also composed a *Chronicle* in rhyme, in honor of one of the dukes of Urbino. This is still preserved in the Library of the Vatican. He died Aug. 1, 1494.

Santo Volto (*holy countenance*). See HOLY HANDKERCHIEF.

Santos, João dos, a Portuguese missionary, was born at Evora, in the latter part of the 16th century. Belonging to the Order of St. Dominic, he obtained permission in 1596 to carry the Gospel to Eastern Africa. He travelled through Caffraria, the coast of Natal, Sofala, Mozambique, and penetrated some distance into the interior. After spending eleven years in spreading the Christian faith and founding new colonies, he returned to Europe, and published *Ethiopia Oriental e Varia Historia de Cousas Notaveis do Oriente*. Notwithstanding the credulity which Santos shows, his work was for a long time an authority upon geographical points, and he was the first to describe the manners of those countries of which he wrote. In 1617 he was sent to India and attached to the mission at Goa. He died there in 1622. His *Commentarios da Região dos Rios*

de Cuama have never been published. See Hoefler, *Nouv. Biog. Générale*, s. v.

Sanuto, MIRINO, called *Torsello*, an Italian chronicler, was born at Venice in the latter part of the 13th century. He was of an ancient family, which, under the name of Candiani, had for years occupied an important position in the republic. In early life he travelled extensively in the East, explored Cyprus, Rhodes, Armenia and other countries, and on his return wrote his *Liber Secretorum Fidelium super Terræ Sanctæ Recuperatione*, in which he described the countries he had visited, and the various wars with the infidels. The book contained also four maps of the Mediterranean, the Holy Land, and Egypt. Having finished his task, Sanuto went through Europe preaching a new crusade. All his efforts were useless, and he abandoned the project. He died about 1330. The book and letters of Sanuto were published in 1611 by Bongars, in *Gesta Dei per Francos*.

Sanyasi, a Hindû ascetic of the most extreme kind, who assumes a state of silence, and gives up the use of fire, eats little, and asks but once in the day for food. "At the time," says the Code of Manu, "when the smoke of the kitchen fires has ceased, when the pestle lies motionless, when the burning charcoal is extinguished, when people have eaten, and when dishes are removed, let the Sanyasi bid for food." He feeds upon roots and fruits. In order to fit him for immortality, he endeavors to reach a state of indifference and entire freedom from passion and emotion of every kind. He must never walk without keeping his eyes upon the ground for the sake of preserving minute animals; and, for fear of destroying insects, he must not drink water until it has been strained. The only occupation suitable to his situation is meditation.

Saon, in Greek mythology, was the son of Jupiter and a nymph, or of Mercury and Rhene, who is credited with having gathered the inhabitants of Samothrace into towns and villages, and with having divided them into five tribes named after his sons, besides giving them laws.

Saôtès, in Greek mythology, was the preserver. 1. A surname of *Jupiter*, applied to him in Thespie. A monstrous dragon devastated that territory, and the oracle had directed that a youth be given the monster each year. When the lot fell on Cleostratus, his friend Menestratus caused a brazen coat of mail to be studded with barbed hooks and points, in which the victim went out to meet his fate. He lost his life, but so did the dragon, and Thespie erected a bronze statue to its deliverer Jupiter. 2. A surname of *Bacchus*, under which he was worshipped at Trezene and about Lerna.

Sapandomad, in Persian mythology, was the genius of the earth, a female angel of the highest perfection, who, as one of the Amshaspands created by Ormuzd, is engaged in an incessant warfare with Astushad, one of the demons of Ahriman.

Saph (Heb. *id.* סַף, a threshold, or dish, as often; Sept. Σίφ v. r. Σέφ), a Philistine giant of the race of Rapha, slain by Sibbechai the Hushathite (2 Sam. xxi, 18). B.C. cir. 1050. In 1 Chron. xx, 4 he is called SIPPAL.

Saphat (Σαφάρ), **Saphat'ias** (Σαφαρίας v. r. Σοφορίας), and **Sapheth** (Σαφέθ v. r. Σαφούθ, Σαφύθ), Greek forms (respectively 1 Esdr. v, 9; viii, 34; and v, 33) of the name SHEPHATHIAH (q. v.) in the corresponding Heb. lists (respectively Ezra ii, 4; viii, 8; and ii, 57).

Saphir (Heb. *Shaphir*, שַׁפִּיר, fair; Sept. translates as *adverb*, καλῶς), a place in the kingdom of Judah, named only in Mic. i, 11. By Eusebius and Jerome (*Onomast.* s. v. "Saphir") it is described as "in the mountain district between Eleutheropolis and Ascalon." But in this description Dr. Robinson thinks that the *Ono-*

masticon incorrectly takes it for one of the Hazors of Josh. xv, 25, in the south of Judah (*Bibl. Res.* ii, 370). On the way from Jerusalem to Gaza, at Kuratiyeh, Robinson saw a place called by the Arabs *es-Sawāfir*, N. 32° W., which seems to be a plural form for Saphir (comp. Gesenius, *Thesaur.* s. v. שָׁפִיר). *Es-Sawāfir* lies seven or eight miles to the north-east of Ascalon, and about twelve west of Beit-Jibrin, to the right of the coast-road from Gaza (Van de Velde, *Syr. and Pal.* p. 159). Tobler prefers a village called *Saber*, close to Sawāfir, containing a copious and apparently very ancient well (*Dritte Wanderung*, p. 47). "In one important respect, however, the position of neither of these agrees with the notice of the *Onomasticon*, since it is not near the mountains, but on the open plain of the Shefelah. But as Beit-Jibrin, the ancient Eleutheropolis, stands on the western slopes of the mountains of Judah, it is difficult to understand how any place could be westward of it (i. e. between it and Ascalon), and yet be itself in the mountain district, unless that expression may refer to places which, though situated in the plain, were for some reason considered as belonging to the towns of the mountains. See KEILAH; NEZIB, etc. Schwarz, though aware of the existence of Sawāfir (p. 116), suggests as a more feasible identification the village of *Safriyeh*, a couple of miles north-west of Lydda (*Palest.* p. 136). The drawback to this is, that the places mentioned by Micah appear, as far as we can trace them, to be mostly near Beit-Jibrin, and, in addition, that Safriyeh is in clear contradiction to the notice of Eusebius and Jerome" (Smith). Van de Velde inclines to identify Saphir with one of the two other villages named *es-Sawāfir* south by east of Esdūd, and nearer to it (*Memoir*, p. 346).

Sapp, RESIN, a minister of the Methodist Episcopal Church, was born in Mt. Vernon, O., Feb. 9, 1816. He was licensed to preach in 1837; and in 1838 he was admitted to the Michigan Conference, then embracing a part of Ohio. For more than thirty-four years Sapp served the Church, twenty-three of which were spent in the regular pastorate, and ten in the presiding eldership. His last sermon was preached at Alaska, Mich., Jan. 12, 1873, and on May 5 he died, in holy triumph, at Grand Rapids. He was a laborious and able member of the General Conferences held at Boston, Indianapolis, Buffalo, and Brooklyn. He was also a valuable contributor to the periodical literature of his church. See *Minutes of Annual Conf.* 1873, p. 96.

Sapphī'ra (Σαπφείρα, a *sapphire stone*, or *beautiful*), the wife of Ananias, and his accomplice in the sin for which he died (Acts v, 1-10). A.D. 30. Unaware of the judgment which had befallen her husband, she entered the place about three hours after, probably to look for him; and, being there interrogated by Peter, repeated and persisted in the "lie unto the Holy Ghost" which had destroyed her husband; on which the grieved apostle made known to her his doom, and pronounced her own—"Behold, the feet of them who have buried thy husband are at the door and shall carry thee out." On hearing these awful words, she fell dead at his feet. The cool obstinacy of Sapphira in answering as she did the questions which were probably designed to awaken her conscience deepens the shade of the foul crime common to her and her husband, and has suggested to many the probability that the plot was of her devising, and that, like another Eve, she drew her husband into it. The interval of three hours that elapsed between the two deaths, Sapphira's ignorance of what had happened to her husband, and the predictive language of Peter towards her are decisive evidences as to the supernatural character of the whole transaction. The history of Sapphira's death thus supplements that of Ananias, which might otherwise have been attributed to natural causes. See ANANIAS.

Sapphire (שָׁפִיר, *sappir* [according to Gesenius,

from its capacity for *engraving*; but according to Fürst, from its *brilliancy*]; Sept. and N. T. σάπφειρος; Vulg. *sapphirus*), a precious stone, apparently of a bright-blue color; see Exod. xxiv, 10, where the God of Israel is represented as being seen in vision by Moses and the elders with "a paved work of a *sappir* stone, and as it were the body of heaven in its clearness" (comp. Ezek. i, 26). The *sappir* was the second stone in the second row of the high-priest's breastplate (Exod. xxviii, 18); it was extremely precious (Job xxviii, 16); it was one of the precious stones that ornamented the king of Tyre (Ezek. xxviii, 13). In the Apocalyptic vision it formed the second foundation-wall of the New Jerusalem (Rev. xxi, 19). Notwithstanding the identity of name between our sapphire and the σάπφειρος and *sapphirus* of the Greeks and Romans, it is generally agreed that the *sapphir* of the ancients was not our gem of that name, viz. the azure or indigo-blue crystalline variety of corundum, but our *lapis-lazuli* (ultramarine); for Pliny (*N. H.* xxxvii, 9) thus speaks of the *sapphirus*: "It is refulgent with spots of gold, of an azure color sometimes, but not often purple. The best kind comes from Media; it is never transparent, and is not well suited for engraving upon when intersected with hard, crystalline particles." The account of Theophrastus is similar (*De Lapid.* 23). This description answers exactly to the character of the lapis-lazuli; the "crystalline particles" of Pliny are crystals of iron pyrites, which often occur with this mineral. It is, however, not so certain that the *sappir* of the Hebrew Bible is identical with the lapis-lazuli; for the scriptural requirements demand transparency, great value, and good material for the engraver's art, all of which combined characters the lapis-lazuli does not possess in any great degree. Pliny calls it "inutilis sculpturæ." King (*Antique Gems*, p. 44) says that intagli and camei of Roman times are frequent in the material, but rarely any works of much merit. Again, the *sappir* was certainly pellucid: "sane apud Judæos," says Braun (*De Vest. Sac.* p. 680, ed. 1680), "saphiros pellucidus notas fuisse manifestissimum est, adeo etiam ut pellucidum illorum philosophis dicatur שָׁפִיר, *saphir*." Beckmann (*Hist. of Invent.* i, 472) is of opinion that the *sappir* of the Hebrews is the same as the lapis-lazuli; Rosenmüller and Braun argue in favor of its being our sapphire or precious corundum.

The Oriental sapphire is a pellucid gem, little inferior in hardness to the diamond. The best are found in Pegu, and in the sand of the rivers of Ceylon. They are very seldom found of a large size. Their color is blue, varying through all the intermediate shades down to colorless. The deep blue are called male sapphires; the lighter, water sapphires, or female sapphires. The sapphire has been sometimes found red, and has then been mistaken for ruby. There is a gem called sapphiro-rubinus, which is a sapphire part blue, part ruby-colored: it is called by the Indians *nilecundi*. Precious stones were considered by the ancients to be emblematical of some faculty or virtue. Pope Innocent III sent to king John a present of four rings: the sapphire, denoting hope; the emerald, faith; the garnet, charity; the topaz, good works. The sapphire is the stone which, in the high-priest's breastplate, bore the name of Issachar. According to the Cabalists, the sapphire was fatal to serpents. The rabbins also have an absurd story about the engraving of the gem on the high-priest's breastplate by means of a singular worm (see the Talmudical treatises *Sopha* and *Gittin*). The ancients as well as moderns had many other superstitions and speculations concerning this stone. (See Jungendres, *De Sapphiro* [Alt. 1705].) See GEM.

Sappir Codex. See SHAPIRA MANUSCRIPT.

Sa'ra (Σάρρα), a Græcized form of the Heb. name Sarah (q. v.), applied to two women in the Apocrypha and New Test.

1. The wife of Abraham (Heb. xi, 11; 1 Pet. iii, 6).

2. The daughter of Raguel and Edna, betrothed to her cousin Tobias, a native of Ecbatana in Media, in the apocryphal history of Tobit. As the story goes, she had been married to seven husbands, who were all slain on the wedding night by Asmodæus, the evil spirit, who loved her (Tob. iii, 7). This spirit the rabbins call Ashmedai, and say he was the incestuous offspring of Tubal-Cain by his sister Naama, who became the mother of many devils; and that he was enamoured of the beauty of Sara as the angels were of the daughters of men (Gen. v). See ASMODÆUS. The breaking of the spell and the chasing-away of the evil spirit by the "fishy fume," when Sara was married to Tobias, with whom she afterwards lived in peace, are told in ch. viii. See TOBIT.

Sarab. See BRIER.

Sarabaites, a vagrant class of monks among the Egyptians in the 4th century, designated *Remboth*. They lived together in very small communities, chiefly in cities where everything they did might attract attention. They turned religion into an art, and made a gain by the exhibition of pretended miracles. Their dress was most disgusting and their conduct immoral (Jerome, *Ep. 22 ad Eustoch.*).

Sarab'as (Σαραβίας), a Greek form (1 Esdr. ix, 48) of the name SHEREBIAH (q. v.) in the Heb. text (Neh. viii, 7).

Saracens, originally the name of an Arab tribe, then applied to the Bedouin, and later to all the Moorish or Mohammedan people who invaded Europe, and against whom the Crusaders fought. The true derivation of the word was long a puzzle to philologists: Du Cange deduced it from Sarah, the wife of Abraham; Hottinger (*Biblioth. Orient.*) from the Arab *saraca*, to steal; Forster (*Journey*) from *sahra*, a desert; others from the Hebrew *sarak*, poor. The opinion most generally prevalent is that the word was originally *Sharkeyn* (Arab. *Eastern people*), corrupted by the Greeks into Σαρακεννοι, from which the Romans derived their word *Saraceni*. See CRUSADES; MOORS; SPAIN.

Sa'rah, the name of two women in the Old Test., whose Hebrew names, however, are different.

1. The wife of Abraham and mother of Isaac.

1. *Her Name.*—The Hebrew form of Sarah is שָׂרָה, *Sarâh*, which is the regular feminine of שָׂר, *sar*, a *prince*, often so used and rendered (Sept., Josephus, and New Test. Σάρρα, "Sara" in the A. V. of the N. T.). Her original name, however, was SARAI (q. v.), which is usually regarded as of kindred etymology. The change of her name from "Sarai" to "Sarah" was made at the same time that Abram's name was changed to Abraham, on the establishment of the covenant of circumcision between him and God. That the name "Sarah" signifies "princess" is universally acknowledged. But the meaning of "Sarai" is still a subject of controversy. The older interpreters (as, for example, Jerome, in *Quæst. Hebr.*, and those who follow him) suppose it to mean "my princess;" and explain the change from Sarai to Sarah as signifying that she was no longer the queen of one family, but the royal ancestress of "all families of the earth." They also suppose that the addition of the letter ר, as taken from the sacred tetragrammaton Jehovah, to the names of Abram and Sarai, mystically signified their being received into covenant with the Lord. Among modern Hebraists there is great diversity of interpretation. One opinion, keeping to the same general derivation as that referred to above, explains "Sarai" as "noble," "nobility," etc., an explanation which, even more than the other, labors under the objection of giving little force to the change. Another opinion supposes Sarai to be a contracted form of שָׂרָה (Serayâh), and to signify "Jehovah is ruler." See SARATAH. But this gives no force whatever to the change, and, besides, introduces the element *Jah* into

a proper name too early in the history. A third (following Ewald, *Heb. Gram.* § 324) derives it from שָׂרָה, a root which is found in Gen. xxxii, 28; Hos. xii, 4, in the sense of "to fight," and explains it as "contentious" (*streitsüchtig*). This last seems to be, etymologically, the most probable, and differs from the others in giving great force and dignity to the change of name (see Gesenius, *Thesaur.* p. 1338 b; Pfeiffer, in the *Stud. u. Krit.* 1871, i, 145 sq.). See PROPER NAME.

2. *Her Parentage.*—She is first introduced in Gen. xi, 29 as follows: "Abram and Nahor took them wives: the name of Abram's wife was Sarai; and the name of Nahor's wife was Milcah, the daughter of Haran, the father of Milcah, and the father of Iscah." In Gen. xx, 12 Abraham speaks of her as his sister, the daughter of the same father, but not the daughter of the same mother. The common Jewish tradition, taken for granted by Josephus (*Ant.* i, 6, 6) and by Jerome (*Quæst. Hebr. ad Genesin*, iii, 323 [ed. Ben. 1735]) is that Sarai is the same as Iscah, the daughter of Haran and the sister of Lot, who is called Abraham's "brother" in Gen. xiv, 14, 16. Judging from the fact that Rebekah, the granddaughter of Nahor, was the wife of Isaac, the son of Abraham, there is reason to conjecture that Abraham was the youngest brother, so that his wife might not improbably be younger than the wife of Nahor. It is certainly strange, if the tradition be true, that no direct mention of it is found in Gen. xi, 29. But it is not improbable in itself; it supplies the account of the descent of the mother of the chosen race, the omission of which in such a passage is most unlikely; and there is no other to set against it, except the assertion of Abraham himself that Sarai was his half-sister, "the daughter of my father, but not the daughter of my mother" (Gen. xx, 12); but this is held by many to mean no more than that Haran her father was his half-brother; for the colloquial usage of the Hebrews in this matter makes it easy to understand that he might call a niece a sister, and a granddaughter a daughter. In general discourse "daughter" comprised any and every female descendant, and "sister" any and every consanguineous relationship. (See Stempel, *De Abrahamo Matrimonium Dissimulante* [Vitemb. 1714].) In that case Abraham was really her uncle as well as husband. See BROTHER.

3. *Her History.*—This is substantially, of course, that of Abraham. She came with him from Ur to Haran, from Haran to Canaan, and accompanied him in all the wanderings of his life. Her only independent action is the demand that Hagar and Ishmael should be cast out, far from all rivalry with her and Isaac; a demand symbolically applied in Gal. iv, 22-31 to the displacement of the Old Covenant by the New. The times in which she plays the most important part in the history are the times when Abraham was sojourning, first in Egypt, then in Gerar, in both which cases Sarah shared his deceit towards Pharaoh and towards Abimelech. On the first occasion, about the middle of her life, her personal beauty is dwelt upon as its cause (Gen. xii, 11-15); on the second, just before the birth of Isaac, at a time when she was old (thirty-seven years before her death), but when her vigor had been miraculously restored, the same cause is alluded to as supposed by Abraham, but not actually stated (xx, 9-11). In the former case the commendations which the princes of Pharaoh bestowed upon the charms of the lovely stranger have been supposed by some to have been owing to the contrast which her fresh, Mesopotamian complexion offered to the dusky hue of their own beauties. But, so far as climate is concerned, the nearer Syria could offer complexions as fair as hers; and, moreover, a people trained by their habits to admire "dusky" beauties were not likely to be inordinately attracted by a fresh complexion. In both cases, especially the last, the truthfulness of the history is seen in the unfavorable contrast in which the conduct both of Abraham and Sarah stands to that of Pharaoh and Abimelech. She died at He-

bron at the age of one hundred and twenty-seven years, twenty-eight years before her husband, and was buried by him in the cave of Machpelah, B.C. 2027. Her burial-place, purchased of Ephron the Hittite, was the only possession of Abraham in the Land of Promise. It has remained, hallowed in the eyes of Jews, Christians, and Mohammedans alike, to the present day; and in it the "shrine of Sarah" is pointed out opposite to that of Abraham, with those of Isaac and Rebekah on the one side, and those of Jacob and Leah on the other (see Stanley's *Lect. on Jewish Church*, app. ii, p. 484-509). See ABRAHAM.

4. *Her Character*.—This is no ideal type of excellence, like that of Abraham, but one thoroughly natural and truly feminine, both in its excellences and its defects. Her natural motherly affection is seen in her touching desire for children, even from her bondmaid, and in her unforgiving jealousy of that bondmaid when she became a mother; in her rejoicing over her son Isaac, and in the spirit which resented the slightest insult to him and forbade Ishmael to share his sonship. It makes her cruel to others as well as tender to her own, and is remarkably contrasted with the sacrifice of natural feeling on the part of Abraham to God's command in the last case (Gen. xxi, 12). To the same character belong her ironical laughter at the promise of a child, long desired, but now beyond all hope; her trembling denial of that laughter, and her change of it to the laughter of thankful joy, which she commemorated in the name of Isaac. It is a character deeply and truly affectionate, but impulsive, jealous, and impatient in its affection.

Sarah, however, is so rarely introduced directly to our notice that it is difficult to estimate her character justly for want of adequate materials. She is seen only when her presence is indispensable; and then she appears with more of submission and of simplicity than of dignity, and manifests an unwise but not unusual promptitude in following her first thoughts, and in proceeding upon the impulse of her first emotions. Upon the whole, Sarah scarcely meets the idea the imagination would like to form of the life-companion of so eminent a person as Abraham. Nevertheless, we cannot fail to observe that she was a most attached and devoted wife. Her husband was the central object of all her thoughts; and he was not forgotten even in her first transports of joy at becoming a mother (Gen. xxi, 7). This is her highest eulogium.

It is asked whether Sarah was aware of the intended sacrifice of Isaac, the son of her long-deferred hopes. The chronology is uncertain and does not decide whether this transaction occurred before or after her death. She was probably alive; and if so, we may understand from the precautions employed by Abraham that she was not acquainted with the purpose of the journey to the land of Moriah, and, indeed, that it was the object of these precautions to keep from her knowledge a matter which must so deeply wound her heart. He could have the less difficulty in this if his faith was such as to enable him to believe that he should bring back in safety the son he was commanded to sacrifice (Heb. xi, 19). As, however, the account of her death immediately follows that of this sacrifice, some of the Jewish writers imagine that the intelligence killed her, and that Abraham found her dead on his return (*Targ. Jonath.*, and Jarchi on Gen. xxiii, 2; *Pirke Eliezer*, c. 52). But there seems to be no authority for such an inference.

Isaiah is the only prophet who names Sarah (li, 2). Paul alludes to her hope of becoming a mother (Rom. iv, 19); and afterwards cites the promise which she received (ix, 9); and Peter eulogizes her submission to her husband (1 Pet. iii, 6).

2. (Heb. *Se'rach*, שֶׂרַח; Sept. Σάρα, "Sarah," Numb. xxvi, 46; being there "in pause" *Sārach*, שָׂרַח) the daughter of the patriarch Asher, elsewhere (Gen. xlvii,

17; 1 Chron. vii, 30) more properly Anglicized SERAH (q. v.).

Sa'rai (Heb. *Saray'*, שָׂרַי; Sept. Σάρα; Vulg. *Sa-rai*), the original name of Sarah, the wife of Abraham. It is always used in the history from Gen. xi, 29 to xvii, 15, when it was changed to Sarah at the same time that her husband's name from Abram became Abraham, and the birth of Isaac was more distinctly foretold. The meaning of the name appears to be, as Ewald has suggested, "contentious." See SARAH.

Sarai'as (Σαραίας v. r. [in No. 2] 'Αζαραίας), the Greek form of SERAIAH (q. v.), namely: (a) the high-priest (1 Esdr. v, 5); (b) the father of Ezra (1 Esdr. viii, 1; 2 Esdr. i, 1).

Sar'amel (Σαραμὲλ v. r. 'Ασαραμὲλ), the place where the assembly of the Jews was held at which the high-priesthood was conferred upon Simon Maccabæus (1 Macc. xiv, 28). The fact that the name is found only in this passage has led to the conjecture that it is an imperfect version of a word in the original Hebrew or Syriac from which the present Greek text of the Maccabees is a translation. Some (as Castelli) have treated it as a corruption of *Jerusalem*; but this is inadmissible, since it is inconceivable that so well-known a name should be corrupted. Other conjectures are enumerated by Grimm in the *Kurzgef. exegetisches Handb.* on the passage. A few only need be named here, but none seem perfectly satisfactory. All appear to adopt the reading *Asaramel*. (1.) *Ha-hatsar Millo*, "the court of Millo," Millo being not improbably the citadel of Jerusalem. See MILLO. This is the conjecture of Grotius, and has at least the merit of ingenuity. (2.) *Ha-hatsar Am-El*, "the court of the people of God, that is, the great court of the Temple." This is due to Ewald (*Gesch.* iv, 387), who compares with it the well-known *Sarbeth Sabanai-El*, given by Eusebius as the title of the Maccabean history. See MACCABEÆ. (3.) *Has-shaar Am-El*, "the gate of the people of God," adopted by Winer (*Realwb.*). (4.) *Has-sar Am-El*, "prince of the people of God," as if not the name of a place, but the title of Simon, the "in" having been inserted by puzzled copyists. This is adopted by Grimm himself. It has in its favor the fact that without it Simon is here styled high-priest only, and his second title, "captain and governor of the Jews and priests" (ver. 47), is then omitted in the solemn official record—the very place where it ought to be found. It also seems to be countenanced by the Peshito-Syriac version, which certainly omits the title of "high-priest," but inserts *Rabba de-Israel*, "leader of Israel." None of these explanations, however, can be regarded as entirely satisfactory.

Saran, in Hindû mythology, is a superlative bow belonging to Vishnu, whose arrows never fail to reach their mark and return of themselves to Vishnu.

Sarantari, in the Greek Church, are masses for the dead during forty days.

Saraph. See SERAPHIM; SERPENT.

Sa'raph (Heb. *Saraph'*, שָׂרַף, *burning*; Sept. Σαράφ v. r. Σαία), named as one of the sons or descendants of Shelah the son of Judah (1 Chron. iv, 22), and he seems to have lived about the time of the Eisode, as he is said to have had the dominion in Moab. B.C. cir. 1618. "Burrington (*Geneal.* i, 179) makes Saraph a descendant of Jokim, whom he regards as the third son of Shelah. In the Targum of R. Joseph, Joash and Saraph are identified with Mahlon and Chilion, 'who married (שָׂרַף) in Moab.'"

Sarasa, ALPHONSE ANTOINE DE, a Flemish Jesuit of the last century, was born at Nieuwpoort of Spanish parents. At the age of fifteen he entered the Society of Jesus, and afterwards taught in the College of Gaud. Later he gave himself to the study of mathematics,

which he had studied under the famous Gregory de St. Vincent, and passed the remainder of his life in retirement. He died at Anvers, July 5, 1667. He wrote *Ars Semper Gaudendi*, etc., which has been translated into French under the title *L'Art de se Tranquilliser dans les Evénements de la Vie*. This work was held in high regard by Leibnitz, Wolf, and others of their school.

Saraswātī (or SARASVĀTĪ) is, in Hindū mythology, the name of the wife, or the female energy, of the god Brahman, the first of the Hindū Trimūrti, or triad. She is also the goddess of speech and eloquence, the patroness of music and the arts, and the inventress of the Sanscrit language and the Devanāgarī letters. She was induced to bestow these benefits on the human race by the sage Bharata, who, through his penance, caused her to descend from heaven, and to divulge her inventions. Hence she is called *Bhārati*. She is also very white, hence another of her names, *Mahāsveta*, or *Mahāsukla* (from *mahat*, great, and *sveta*, white).—*Chambers's Encyclop.* s. v.

Sarasrātī is also the name of a stream which flows into the Ganges at Hoogly. According to the myth, the goddess, being pursued, hid herself under the earth, and in the character of a stream forced her way until she reached the Ganges, her lover, with whom she was united. Another tradition makes Sarasvātī the daughter of Brahman, whose beauty captivated the god himself. As she concealed herself behind him, he assumed five heads in order to look for her; but Siva, becoming angry, cut off one of them. She is usually represented as seated by the side of Brahman.

Saravia, HADRIAN A., classed among the English divines, although of Spanish extraction, was born at Hisslin, in Artois, France, in 1531. In 1582 he became professor of divinity and preacher to the French Church at Leyden. Influenced, doubtless, by his preference for episcopal government, he went to England in 1587, where he was well received by the prelates and divines. He first settled in Jersey, where he taught school and preached to his exiled countrymen there; afterwards he was master of the free grammar-school at Southampton. He was successively promoted to a prebend in the churches of Gloucester (1591), Canterbury (1595), and Westminster (1601). He showed great learning in defending the episcopacy against Beza, when the latter recommended its abolition in Scotland. He died in 1613, and was interred in Canterbury Cathedral. A collective edition of all his works, which were in Latin, was published in 1611 (Lond. 1 vol. 4to), under the title of *Diversi Tractatus Theologiæ: De Diversis Gradibus Ministrorum Evangelii*. See Hagenbach, *Hist. of Doctrines*, ii, 168, 186.

Sarcerius, Erasmus, an able practical theologian of the 16th century, was born at Annaberg, in Saxony, in 1501. He studied first at Leipsic, then at the feet of Luther and Melancthon in Wittenberg. In 1530 he left the university and became co-rector of a Latin school at Lubeck. Laboring here with some interruption until 1536, he then took charge of a similar school in Nassau. From 1538 he gave his attention exclusively to the work of reforming the Church of Nassau, presiding at synods, instructing the clergy, and furnishing them with written works on practice and doctrine. But, unwilling to sanction the Interim (1548), he resigned his position, retired to Annaberg, and in 1549 became a pastor in Leipsic. In 1553 he was called to be Church superintendent in Eisleben. In 1559 he accepted a call as preacher at St. John's in Magdeburg; but the high Lutheran clergy scented heresy in his mild and genial sermons, and assailed him in pamphlets. Worn out with labor, he speedily succumbed. He died in 1559 at the age of fifty-eight. In character, Sarcerius was firm, conscientious, blameless. A stranger to flattery, he walked among princes as an equal, and

never quailed before a foe. His works were highly esteemed and much studied. We mention only, *Anweisung die heilige Schrift zu interpretiren* (Basle, 1528):—*Tractatus de Ratione Discendæ Theologiæ* (1539):—*Conciones Annua* (1541, 4 vols.):—*De Consensu Veræ Ecclesiæ et S. Patrum*:—also *Loci Communes Theologiæ* (1542?):—*Pastorale* (1559). (J. P. L.)

Sarcerius, Wilhelm, the only son of the preceding, was pastor at Eisleben, but lost his position because of holding the opinions of Flacius (q. v.). He went, thereupon, to Mansfeld, where he died as court-preacher. He published, *Leichen-, Lauf-, und Wasser-Predigten*:—*Geistliches Herbarium*:—*Fechtschule Jesu Christi*:—*Höllischer Trauergesung*. See Herzog's *Real-Encyclop.* xx, 682-686.

Sarched'onus (Σαρχέδωνος, v. r. Σαχερδωνός, Σαρχεράν), a Græcized form (Tob. i, 21) for the name of the Assyrian king ESAR-HADDON (q. v.).

Sardæ'us (Σαρδαίος, v. r. Σαρδαίος, Ζεραλίας), a corrupt Greek form (1 Esdr. ix, 28) of the name AZIZA (q. v.) of the Heb. list (Ezra x, 27).

Sardessus, in Greek mythology, is an appellation of *Jupiter*, derived from the city of Sardessus, in Lycia.

Sardica, in Illyria. A council was held at this place in 347, by order of the emperors Constantius and Constans, whom Athanasius, persecuted by the Eusebians, had petitioned to convoke a council. Twenty canons were drawn up, and regulations made concerning Easter.

Sardine (σάρδιος, apparently an adjective from *σάρδιον*, which has the same signification), the name of a gem (Rev. iv, 3). See SARDIUS.

Sar'dis (Σάρδεις, of uncertain etymology), a city of Asia Minor, the capital of the ancient kingdom of Lydia. It was situated about two miles to the south of the river Hermus, just below the range of Tmolus (Bos Dagh), on a spur of which its acropolis was built, in a fine plain watered by the river Pactolus (Herod. vii, 31; Xenophon, *Cyrop.* vii, 2-11; Pliny, *Hist. Nat.*; Strabo, xiii, 625). It is in lat. 38° 30' N., long. 27° 57' E. Sardis was a great and ancient city, and from its wealth and importance, was the object of much cupidity and of many sieges.

1. *Ancient History*.—The Lydians, or Ludim, whose metropolis Sardis was, were the descendants of Lud the son of Shem, and must not be confounded with the Ludim, the children of Lud the son of Misraim the son of Ham, who dwelt and settled in Egypt. These latter were the nation alluded to by Jeremiah (xlvii, 9) when he speaks of "the Lydians that handle the bow;" the distinction will appear the more clearly from the fact that the Lydians and the Libyans are mentioned together as embracing the same cause. The Shemitic Ludim were a warlike, active, and energetic people, and established an empire extending as far east as the river Halys. The city of Sardis, although of more recent origin than the Trojan war (Strabo, xiii, 625), was very ancient, being mentioned by Æschylus (*Pers.* 45); and Herodotus relates (i, 84) that it was fortified by a king Meles, who (according to the *Chron.* of Eusebius) preceded Candaules. The city itself was, at least at first, built in a rude manner, and the houses were covered with dry reeds, in consequence of which it was repeatedly destroyed by fire; but the acropolis, which some of the ancient geographers identified with the Homeric *Hydæ* (Strabo, xiii, 626; comp. Pliny, v, 30; Eustath. *ad Dion. Per.* 830), was built upon an almost inaccessible rock. In the reign of Ardys, Sardis was taken by the Cimmerians, but they were unable to gain possession of the citadel. Over this realm a series of able princes ruled, the last of whom, Cræsus, obtained a world-wide fame for his wealth, his misfortunes, and his philosophy. The earlier part of his reign was one of unusual glory; he extended his dominion over the

whole of Asia Minor with the exception of Lycia and Cilicia, and displayed as much ability as an administrator as he had done as a conqueror. But the rising power of Cyrus soon came into collision with his own, and, by the capture of Sardis, the Persian prince brought the Lydian rule to a close. Croesus is said to have advised the victor to discourage the martial spirit of the Lydians by restraining them from all warlike occupations, and employing them in those arts only which minister to luxury and sensuality. Cyrus is reported to have taken the disgraceful advice, and the result was that, from ranking among the bravest and hardest nations of antiquity, the Lydians became the most helpless and effeminate.

After its conquest, the Persians always kept a garrison in the citadel, on account of its natural strength, which induced Alexander the Great, when it was surrendered to him in the sequel of the battle of the Granicus, similarly to occupy it. Sardis recovered the privilege of municipal government (and, as was alleged several centuries afterwards, the right of a sanctuary) upon its surrender to Alexander the Great, but its fortunes for the next three hundred years are very obscure. It changed hands more than once in the contests between the dynasties which arose after the death of Alexander. In the year B.C. 214 it was taken and sacked by the army of Antiochus the Great, who besieged his cousin Achæus in it for two years before succeeding, as he at last did through treachery, in obtaining possession of the person of the latter. After the ruin of Antiochus's fortunes, it passed, with the rest of Asia on that side of Taurus, under the dominion of the kings of Pergamus, whose interests led them to divert the course of traffic between Asia and Europe away from Sardis. Its productive soil must always have continued a source of wealth; but its importance as a central mart appears to have diminished from the time of the invasion of Asia by Alexander. After their victory over Antiochus it passed to the Romans, under whom it still more rapidly declined in rank and prosperity.

In the time of the emperor Tiberius, Sardis was desolated by an earthquake (Strabo, xii, p. 579), together with eleven, or, as Eusebius says, twelve other important cities of Asia. The whole face of the country is said to have been changed by this convulsion. In the case of Sardis the calamity was increased by a pestilential fever which followed; and so much compassion was in consequence excited for the city at Rome that its tribute was remitted for five years, and it received a benefaction from the privy purse of the emperor (Tacitus, *Ann.* ii, 47). This was in the year A.D. 17. Nine years afterwards the Sardiens are found among the competitors for the honor of erecting, as representatives of the Asiatic cities, a temple to their benefactor. See SMYRNA. On this occasion they plead, not only their ancient services to Rome in the time of the Macedonian war, but their well-watered country, their climate, and the richness of the neighboring soil; there is no allusion, however, to the important manufactures and the commerce of the early times. In the time of Pliny it was included in the same *conventus juridicus* with Philadelphia, with the Caduani, a Macedonian colony in the neighborhood, with some settlements of the old Mæonian population, and a few other towns of less note. These Mæonians still continued to call Sardis by

its ancient name, *Hydê*, which it bore in the time of Omphale.

2. *Biblical Notice.*—The inhabitants of Sardis bore an ill repute among the ancients for their voluptuous habits of life. Hence, perhaps, the point of the phrase in the Apocalyptic message to the city, "Thou hast a few names, *even in Sardis*, which have not defiled their garments" (Rev. iii, 4). The place that Sardis holds in this message, as one of the "Seven Churches of Asia," is the source of the peculiar interest with which the Christian reader regards it. From what is said, it appears that it had already declined much in real religion, although it still maintained the name and external aspect of a Christian Church, "having a name to live, while it was dead" (Rev. iii, 1).

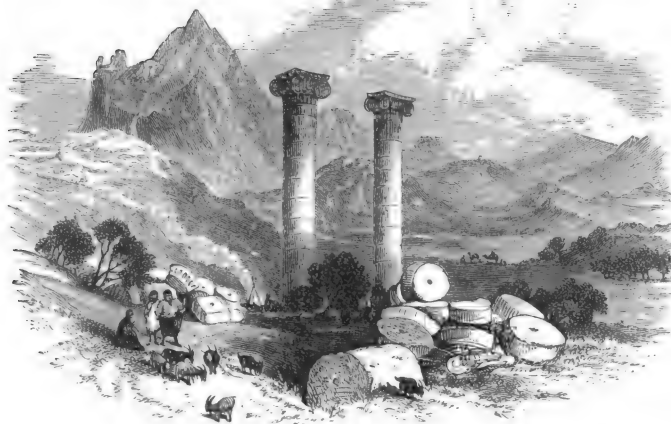

3. *Description and Modern Remains.*—Sardis was in very early times, both from the extremely fertile character of the neighboring region and from its convenient position, a commercial mart of importance. Chestnuts were first produced in the neighborhood, which procured them the name of *βάλανοι Σαρδιανοί*. The art of dyeing wool is said by Pliny to have been invented there; and, at any rate, Sardis was the entrepôt of the dyed woollen manufactures, of which Phrygia, with its vast flocks (*πολυπροβατωτάτη*, Herod. v, 49), furnished the raw material. Hence we hear of the *φοινικίδες Σαρδιαναί*; and Sappho speaks of the *ποικίλος μάσ-Σλης Αἰδίων καλὸν ἔργον*, which was perhaps, something like the modern Turkish carpets. Some of the woollen manufactures, of a peculiarly fine texture, were called *ψιλοτάπιδες*. The hall through which the king of Persia passed from his state apartments to the gate where he mounted on his horse was laid with these, and no foot but that of the monarch was allowed to tread on them. In the description given of the habits of a young Cyprian exquisite of great wealth, he is represented as reposing upon a bed of which the feet were silver, and upon which these *ψιλοτάπιδες Σαρδιαναί* were laid as a mattress. Sardis, too, was the place where the metal *electrum* was procured (Sophocles, *Antig.* 1037); and it was thither that the Spartans sent in the 6th century B.C. to purchase gold for the purpose of gilding the face of the Apollo at Amyclæ. This was probably furnished by the auriferous sand of the Pactolus, a brook which came from Tmolus and ran through the *agora* of Sardis by the side of the great temple of Cybele. But, though its gold-washings may have been celebrated in early times, the greatness of Sardis in its best days was much more due to its general commercial importance and its convenience as an entrepôt. This seems to follow from the statement that not only silver and gold coins were there first minted, but there also the class of *κάνηλοι* (stationary traders, as contradistinguished from the *ἐμποροί*, or travelling merchants) first arose. It was also, at any rate between the fall of the Lydian and that of the Persian dynasty, a slave-mart.

Successive earthquakes and the ravages of the Saracens and Turks have reduced this once flourishing city to a heap of ruins, presenting many remains of its former splendor. The habitations of the living are confined to a few miserable cottages, still found on the true site of Sardis, at the foot of Mount Tmolus, or Bûz-dag, as the Turks call it. Two or three shepherds inhabited a hut, and a Turk with two servants a mill, at the time of Arundel's visit in 1826. In 1850 no human being found a dwelling in the once mighty and populous Sardis. The modern name of the ruins at Sardis is *Sert-Kalesi*. Travellers describe the appearance of the locality on approaching it from the north-west as that of complete solitude. The Pactolus is a mere thread of water, all but evanescent in summer-time. The Wadis-tchai (Hermus), in the neighborhood of the town, is between fifty and sixty yards wide and nearly three feet deep; but its waters are turbid and disagreeable, and are not only avoided as unfit for drinking, but have the local reputation of generating the fever which is the scourge of the neighboring plains. A countless number of se-

Coin of Sardis.

pulchral hillocks, beyond the Hermus, heighten the desolateness of a spot which the multitudes lying there once made busy by their living presence and pursuits. The acropolis seems well to define the site of the city. It is a marked object, being a tall distorted rock of soft sandstone, rent as if by an earthquake. The acropolis is very difficult of ascent; it has a few fragments of ruinous walls on the summit, but no remains are visible of the temple which Alexander built there in honor of the Olympian Jove. The almost perpendicular wall towards the south was considered impregnable, and Cæsar therefore, in defending his capital against Cyrus, omitted to guard it; but a Persian soldier, seeing a Lydian descend by a path of steps cut in the rock in order to regain his helmet, which had fallen down, watched his proceedings, and led a body of Persian troops into the acropolis itself.

Ruins of Sardis.

The remains of the ancient city are few and inconsiderable. The gerusia—called also the house of Cæsar—lies westward of the acropolis. Arundel measured one of its halls, and found it one hundred and fifty-six feet in length by forty-three in breadth, and having walls ten feet in thickness. There are some portions of a theatre and of two churches, one of which, said to be dedicated to the Virgin, was carefully examined by Col. Leake, and found to consist almost wholly of fragments of earlier edifices; and from more recent investigations it appears that these were chiefly taken from the Temple of Cybele, and if so they are among the oldest monuments now existing in the world, the temple having been built only three hundred years after that of Solomon. Of the few inscriptions which have been discovered, all, or nearly all, belong to the time of the Roman empire. Yet there still exist considerable remains of the earlier days. The massive Temple of Cybele still bears witness in its fragmentary remains to the wealth and architectural skill of the people that raised it. Mr. Cockerell, who visited it in 1812, found two columns standing with their architrave, the stone of which stretched in a single block from the centre of one to that of the other. This stone, although it was not the largest of the architrave, he calculates must have weighed twenty-five tons. The diameters of the columns supporting it are six feet four and a half inches at about thirty-five feet below the capital. The present soil (apparently formed by the crumbling-away of the hill which backs the temple on its eastern side) is more than twenty-five feet above the pavement. Such proportions are not inferior to those of the columns in the Heræum at Samos, which divides, in the estimation of Herodotus, with the Artemisium at Ephesus the palm of pre-eminence among all the works of Greek art. And as regards the details, "the capitals appeared," to

Cockerell, "to surpass any specimen of the Ionic he had seen in perfection of design and execution." On the north side of the acropolis, overlooking the valley of the Hermus, is a theatre near four hundred feet in diameter, attached to a stadium of about one thousand. This probably was erected after the restoration of Sardis by Alexander. In the attack of Sardis by Antiochus, described by Polybius (vii, 15-18), it constituted one of the chief points on which, after entering the city, the assaulting force was directed. The temple belongs to the æra of the Lydian dynasty, and is nearly contemporaneous with the Temple of Zeus Panhellenius in Ægina, and that of Herè in Samos. To the same date may be assigned the "Valley of Sweets" (γλυκὺς ἀγκών), a pleasure-ground, the fame of which Polycrates endeavored to rival by the so-called Laura at Samos.

4. *Authorities*.—Ancient: Athenæus, ii, 48; vi, 231; xii, 514, 540; Arrian, i, 17; Pliny, *H. N.* v, 29; xv, 23; Stephanus Byz. s. v. "Ἰόνη; Pausanias, iii, 9, 5; Diodorus Sic. xx, 107; Scholiast, Aristoph. *Pac.* 1174; Herodotus, i, 69, 94; iii, 48; viii, 105; Strabo, xiii, § 5; Tacitus, *Annal.* ii, 47; iii, 63; iv, 55. See also Smith, Hartley, Macfarlane, Arundel, and Svoboda, severally, *On the Seven Churches of Asia*; Storch, *Dissert. de Sept. Urb. Asiæ in Apocal.*; Richter, *Walfahrten*, p. 511 sq.; Prösch, *Denkwürdigk.* ii, 31 sq.

Sard'ite (Heb. *Sardi'*, סַרְדִּי, used as a plur. with the art. prefixed; Sept. Σαρδί), the patronymic title (Numb. xxvi, 26) of the descendants of Sered (q. v.), the son of Zebulon.

Sardius (Heb. סַרְדִּי, *o'dem*; Sept. and New Test., σάρδιον), one of the precious stones in the breastplate of the high-priest (Exod. xxviii, 17; xxxix, 10). So also Josephus (*War*, v, 5, 7), who, however, in *Ant.* iii, 7, 6, makes it the sardonix (σάρδονιξ). Still, as this latter-named mineral is merely another variety of agate, to which also the sard or sardius belongs, there is no very great discrepancy in the statements of the Jewish historian. See **SARDONYX**. The *odem* is mentioned by Ezek. (xxviii, 13) as one of the ornaments of the king of Tyre. In Rev. iv, 3, John declares that he whom he saw sitting on the heavenly throne "was to look upon like a jasper and a sardine stone." The sixth foundation of the wall of the heavenly Jerusalem was a *sardius* (Rev. xxi, 20). There can scarcely be a doubt that either the sard or the sardonix is the stone denoted by *odem*. The authority of Josephus in all that relates to the high-priest's breastplate is of the greatest value; for, as Braun (*De Vest. Sac. Heb.* p. 635) has remarked, Josephus was not only a Jew, but a priest, who might have seen the breastplate with the whole sacerdotal vestments a hundred times, since in his time the Temple was standing. The Vulgate agrees with his nomenclature. In Jerome's time the breastplate was still to be inspected in the Temple of Concord; hence it will readily be acknowledged that this agreement of the two is of great weight. The sard, which is a superior variety of agate, has long been a favorite stone for the engraver's art. "On this stone," says King (*Ant. Gems*, p. 5), "all the finest works of the most celebrated artists are to be found; and this not without

good cause, such is its toughness, facility of working, beauty of color, and the high polish of which it is susceptible, and which Pliny states that it retains longer than any other gem." Sardis differ in color. There is a bright-red variety which, in Pliny's time, was the most esteemed; and perhaps the Hebrew *odem*, from a root which means "to be red," points to this kind. There is also a paler or honey-colored variety; but in sards there is always a shade of yellow mingling with the red (see King, *Ant. Gems*, p. 6). The sardius is the stone now called the *carnelian*, from its color (*a carne*), which resembles that of raw flesh. The Hebrew name is derived from a root (סרס) which signifies *redness*. The sardius or carnelian is of the flint family, and is a kind of chalcedony. The more vivid the red in this stone, the higher is the estimation in which it is held. It was anciently, as now, more frequently engraved on than any other stone. The ancients called it *sardius*, because Sardis in Lydia was the place where they first became acquainted with it; but the sardius of Babylon was considered of greater value (Pliny, *Hist. Nat.* xxxvii, 7). The Hebrews probably obtained the carnelian from Arabia. In Yemen there is found a very fine dark-red carnelian, which is called *el-Akik* (Niebuhr, *Beschreib.* p. 142). The Arabs wear it on the finger, on the arm above the elbow, and in the belt before the abdomen. It is supposed to stop hemorrhage when laid on a fresh wound. See Theophr. *De Lapid.* c. 43; Cleaveland, *Mineral.* p. 250; Moore, *Anc. Mineral.* p. 153.

Sardo, in Greek mythology, was the daughter of Sthenelus, whose name was given to the city of Sardis.

Sar'donyx (σαρδόνυξ, from σάρδιον, the *sardius*, and *onyx*) is mentioned in the New Test. once only—viz. in Rev. xxi, 20—as the stone which garnished the fifth foundation of the wall of the heavenly Jerusalem. "By sardonyx," says Pliny (*N. H.* xxxvii, 6), who describes several varieties, "was formerly understood, as its name implies, a sard with a white ground beneath it, like the flesh under the finger-nail." The sardonyx consists of "a white opaque layer, superimposed upon a red transparent stratum of the true red sard" (King, *Ant. Gems*, p. 9). It is, like the sard, merely a variety of agate, and is frequently employed by engravers for the purposes of a signet-ring. It is a species of onyx, distinguished from the common stone of that name by having its different colors, red and white, disposed in alternate bands. But there is another stone so called, whose tint is reddish yellow or orange, with sometimes a tinge of brown (Moore, *Anc. Mineral.* p. 153).

Sardus, in Greek mythology, was the son of Maecris, who was known as Hercules among the Libyans and Egyptians. He led a colony of Libyans to the island of Ichnusa, who settled there without driving away the original inhabitants. The Libyans subsequently sent a statue of Sardus as a votive offering to Delphos, and gave his name to the island, which thereafter was known as Sardinia.

Sa'reä (Vulg. *id.*, for the Greek text is not extant), one of the five scribes "ready to write swiftly" whom Esdras was commanded to take (2 Esdr. xiv, 24).

Sarep'ta (Σάρεπτα; Vulg. *Sarepta*; Syriac, *Tsar-path*), the Greek form of the name which in the Hebrew text of the Old Test. appears as ZAREPHATH (q. v.). The place is designated by the same formula on its single occurrence in the New Test. (Luke iv, 26) that it is when first mentioned in the Sept. version of 1 Kings xvii, 9, "Sarepta of Sidonia."

Sareseok, in Persian mythology, is a bullock formed by Ormuzd out of the generative powers of the primitive ox which was slain by Ahriman. Sareseok supplied the world with animals, and became one of the greatest benefactors of mankind.

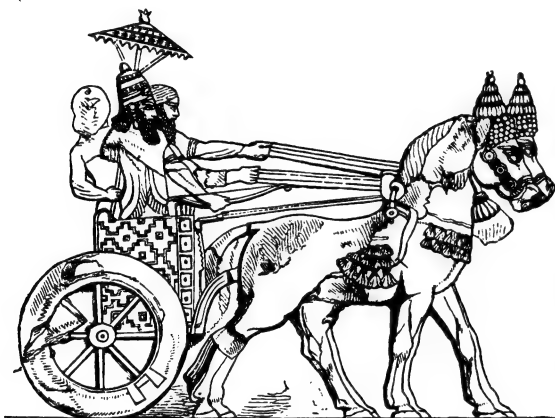

Sar'gon (Heb. *Sargon*, שַׂרְגֹּן, either *prince of the*

sun [Gesenius] or *firm king* [Rawlinson]; Sept. Ἀργὼν v. r. *Napvā*), a king of Assyria, whose general, Tartan, in the time of Hezekiah, besieged Ashdod, the key of Egypt, with the view of then invading that country (Isa. xx, 1, 4 sq.). B.C. 715.

Sargon was one of the greatest of the Assyrian kings. His name is read in the native cuneiform inscriptions (q. v.) as *Sargina* (see Layard, *Nin. and Bab.* p. 148), while a town which he built and called after himself (now Khorsabad) was known as Sarghūn to the Arabian geographers. He is mentioned by name only once in Scripture (as above), and then not in a historical book, which formerly led historians and critics to suspect that he was not really a king distinct from those mentioned in Kings and Chronicles, but rather one of those kings under another name. Vitrings, Offerhaus (*Spicilæg.* p. 125 sq.), Eichhorn, and Hupfeld (*De Rebus Assyrior.* p. 51) identified him with Shalmaneser; Grotius, Lowth, and Keil (comp. also Schröer, *Imper. Babyl.* p. 152) with Sennacherib; Perizonius, Kalinsky, and Michaelis with Esar-haddon. All these conjectures are now shown to be wrong by the Assyrian inscriptions, which prove Sargon to have been distinct and different from the several monarchs named, and fix his place in the list—where it had been already assigned by Paulus, Rosenmüller, Gesenius, Knobel, Ewald, and Winer—between Shalmaneser and Sennacherib. He was certainly Sennacherib's father, and there is no reason to doubt that he was his immediate predecessor (see *Jour. of Sac. Lit.* July, 1854, p. 398 sq.). He ascended the throne of Assyria, as we gather from his annals, in the same year that Merodach-Baladan ascended the throne of Babylon, which, according to Ptolemy's canon, was B.C. 721. This is Col. Rawlinson's date (*Lond. Athenæum*, Aug. 22, 1863, p. 245). But the synchronism with the Hebrew annals [see HEZEKIAH; SAMARIA] would locate Sargon's accession in B.C. 720. G. Smith puts it in B.C. 722 (*Hist. of Assyria*, ch. ix), and so Prof. Rawlinson (*Ancient Monarchies*, ii, 141). He seems to have been a usurper, and not of royal birth, for in his inscriptions he carefully avoids all mention of his father. It has been conjectured that he took advantage of Shalmaneser's absence at the protracted siege of Samaria (2 Kings xvii, 5) to effect a revolution at the seat of government, by which that king was deposed and he himself substituted in his room. See SHALMANESER. It is remarkable that Sargon claims the conquest of Samaria, which the narrative in Kings appears to assign to his predecessor. He places the event in his first year, before any of his other expeditions. Perhaps, therefore, he is the "king of Assyria" intended in 2 Kings xvii, 6 and xviii, 11, who is not said to be Shalmaneser, though we might naturally suppose so from no other name being mentioned. Or perhaps he claimed the conquest as his own, though Shalmaneser really accomplished it, because the capture of the city occurred after he had been acknowledged king in the Assyrian capital. At any rate, to him belongs the settlement of the Samaritans (27,280 families, according to his own statement) in Halah and on the Habor (Khabôr), the river of Gozan, and (at a later period, probably) in the cities of the Medes.

Sargon was undoubtedly a great and successful warrior. In his annals, which cover a space of fifteen years, he gives an account of his warlike expeditions against Babylonia and Susiana, on the south; Media, on the east; Armenia and Cappadocia, towards the north; Syria, Palestine, Arabia, and Egypt, towards the west and southwest (see *Records of the Past*, vii, 25 sq.). In Babylonia he deposed Merodach-Baladan and established a viceroy; in Media he built a number of cities which he peopled with captives from other quarters; in Armenia and the neighboring countries he gained many victories; while in the far west he reduced Philistia, penetrated deep into the Arabian peninsula, and forced Egypt to submit to his arms and consent to the payment of a tribute. In this last direction he seems to

have waged three wars—one in his second year, for the possession of Gaza; another in his sixth year, when Egypt itself was the object of attack; and a third in his ninth, when the special subject of contention was Ashdod, which Sargon took by one of his generals. This is the event which causes the mention of Sargon's name in Scripture. Isaiah was instructed at the time of this expedition to "put off his shoe, and go naked and barefoot," for a sign that "the king of Assyria should lead away the Egyptians prisoners, and the Ethiopians captives, young and old, naked and barefoot, to the shame of Egypt" (Isa. xx, 2-4). We may gather from this either that Ethiopians and Egyptians formed part of the garrison of Ashdod, and were captured with the city, or that the attack on the Philistine town was accompanied by an invasion of Egypt itself, which was disastrous to the Egyptians. The year of the attack, it is thought, would fall into the reign of the first Ethiopian king, Sabaco I (Rawlinson, *Herodotus*, i, 386, note 7, 2d ed.), and it is in agreement with this Sargon speaks of Egypt as being at this time subject to Meroë. Besides these expeditions of Sargon, his monuments mention that he took Tyre, and received tribute from the Greeks of Cyprus, against whom there is some reason to think that he conducted an attack in person. The statue of Sargon, now in the Berlin Museum, was found at Idalion in Cyprus. It is not very likely that the king's statue would have been set up unless he had made the expedition in person.

Sargon in his Chariot. (From the Sculptures at Khorsabad.)

It is not as a warrior only that Sargon deserves special mention among the Assyrian kings. He was also the builder of useful works and of one of the most magnificent of the Assyrian palaces. He relates that he thoroughly repaired the walls of Nineveh, which he seems to have elevated from a provincial city of some importance to the first position in the empire; and adds, further, that in its neighborhood he constructed the palace and town which he made his principal residence. This was the city now known as "the French Nineveh," or "Khorsabad," from which the valuable series of Assyrian monuments at present in the Louvre was derived almost entirely. Traces of Sargon's buildings have been found also at Nimrud and Koyunjik; and his time is marked by a considerable advance in the useful and ornamental arts, which seem to have profited by the connection that he established between Assyria and Egypt. He left the throne to his son, the celebrated Sennacherib (q. v.). The length of Sargon's reign is variously reckoned by Assyriologists as from fifteen to nineteen years. See CHRONOLOGY. Comp., in addition to the above, the following monographs by Oppert: *Les Fautes de Sargon* (Paris, 1863); *Les Inscriptions des Sargonides* (ibid. eod.); also Strachey, *Time of Sargon and Sennacherib* (Lond. 1856). See ASSYRIA.

Sa'rid (Heb. *Sarid*, שָׂרִיד, *survivor*, as often [First, place of refuge]; Sept. Σαρίδ v. r. Σαρδιδ, Σαρδούχ, etc.), the point of departure on the southern boundary of Zebulun, lying west of Chisloth Tabor, and south of Daberath and Japhia (Josh. xix, 10, 12). It was unknown to Eusebius and Jerome (*Onomast.* s. v. "Sarith"), and the name has not been discovered by modern research. Knobel, holding the word to mean an "incision," thinks it designates merely the southern opening of the deep and narrow wady which comes down from the basin of Nazareth (q. v.), between two steep mountains (Seetzen, ii, 151 sq.; Robinson, iii, 183). Keil more definitely suggests that it may be found in one of the two heaps of ruins on the south side of the modern "Mount of Precipitation," namely those near el-Mezrach, on the north-west. See TRIBE; ZEBULON.

Sarigani. An Arabian sect of this name is mentioned by Asseman. He considers them to have been a branch of the Mendæans (q. v.). They held the opinions of Paul of Samosata and of Arius, but were converted and admitted to Catholic communion by Maranames, metropolitan of Adjabenus, in the year 760. Some, however, were found a hundred years later in Babylon.

Sarmentitii, one of the numerous opprobrious epithets with which the enemies of the early Christians accosted them. It is derived from the word *sarmenta*, *sarmina*, the piles of fagots around the stake to which the martyr was fastened.

Sa'ron (ὁ Σαρών v. r. ἁσάρωνα, i. e. שָׂרֹן, *the Sharon*), the district in which Lydda stood (Acts ix, 35); the Greek form of the name SHARON (q. v.) of the Old Test. "The absence of the article from Lydda, and its presence before Saron, is noticeable, and shows that the name denotes a district—as in 'The Shefelah,' and in our own 'The Weald,' 'The Downs.'"

Saron, in Greek mythology, was a king of Trozene, who was fond of the chase, and built a temple to Diana. While pursuing a deer he fell into the gulf which was from that time known as the Saronian Gulf. He was buried in the grove of Diana.

Sarōnis (Σαρωνίς), a surname of *Artemis* at Trozene, where an annual festival was celebrated in her honor under the name of Saronia. See SARON.

Saro'thiē (Σαρωθί v. r. Σαρωθί; Vulg. *Caroneth*), a person named (1 Esdr. v, 34) as one of the heads of the families of "Solomon's servants" who returned from Babylon with Zerubbabel; but see the Hebrew lists (Ezra ii, 57; Neh. vii, 59).

Sarpēdon, in Greek mythology, was (1) a son of Jupiter and Europa, who quarrelled with his brother Minos and was compelled to leave Crete. He took possession of Lycia, and was permitted by Jupiter to live the period of time allotted to three generations of men.

(2) A son of Jupiter and Laodamia, the daughter of Bellerophon. His uncles were engaged in a protracted dispute for the possession of the crown of Lycia, which was decided by the agreement that the realm should be awarded to him who should shoot a ring from the breast of a child without injuring the child. Laodamia presented her son for this trial, and the generosity of the mother led to his being appointed king. When the Trojan war broke out, both parties sought his aid. He decided in favor of Priam, and inflicted great injury on the Greeks when they landed and afterwards. He slew Tlepolemus (being at the same time severely wounded himself), led the fifth part of the army in the storming of the fortifications, mounted the wall, slew Alcæon and opened the way for the advance of the Trojans, and

covered Hector when stricken down by Ajax, but ultimately fell by the hand of Patroclus. His horses and armor became the spoil of the Greeks, but his body was, by Jupiter's command, borne to Lycia for honorable interment by the hands of Sleep and Death.

(3.) A son of Neptune and brother of Poltys, who lived in Thrace and was given to deeds of violence. He was slain by Hercules.

Sarpedonia (Σαρπηδόνια), a surname of *Artemis*, derived from Cape Sarpedon, in Cilicia, where she had a temple with an oracle (Strabo, xiv, p. 676).

Sarpedonius, a surname of *Apollo* in Cilicia.

Sarpi. See PAUL (*Father*).

Sarritor, in Roman mythology, was a god of husbandry whose province was the hoeing and cultivating of the growing crops.

Sar'sechim (Heb. *Sarsekim'*, סַרְסַקִּים, probably *prince of the eunuchs*; Sept. [with great confusion] *Ναβουάχαρ* v. r. *Ναβουσαρσάχιμ*, etc.; Vulg. *Sarsachim*), one of the generals of Nebuchadnezzar's army at the taking of Jerusalem (Jer. xxxix, 3), B.C. 588. He appears to have held the office of chief eunuch, for *Rab-saris* (q. v.) is probably a title and not a proper name. In Jer. xxxix, 13, Nebushasban is called *Rab-saris*, "chief eunuch," and the question arises whether Nebushasban and Sarsechim may not be names of the same person. Gesenius conjectures (*Thesaur.* s. v.) that Sarsechim and *Rab-saris* may be identical, and both titles of the same office. See SAMGAR-NEBO.

Sartaba (סַרְטָבָא), the name of a mountain on which the Jews anciently lighted the beacon-fire (the one next to the Mount of Olives) to herald the new moon (Reland, *Palæst.* p. 346). In one passage it is erroneously written *Sartan*, סַרְטָן (Schwarz, *Palæst.* p. 162). It is undoubtedly the present *Kurn Sartabuh* (Horn of Sartaba), on the edge of the Ghôr, or Jordan valley, not far north of Jericho (Robinson, *Bibl. Res.* iii, 242, new ed.). The summit still retains traces of the platform erected for building the beacon-fires, which Lieut. Conder of the English Engineers has mistaken for the remains of the memorial altar of Josh. xxii, 10 (*Quar. Report of "Pal. Explor. Fund,"* Oct. 1874, p. 241 sq.).

Sarto, ANDRÉ VANNUCCHI, called *Del Sarto*, an Italian painter, was born at Florence about 1488. Having shown a taste for drawing, he was placed with a goldsmith to learn engraving on plate. Giovanni Barile, a painter, persuaded his father to intrust him to his care, and he remained with Barile three years; he was then placed by him with Pietro Cosimo. Leaving the school of Cosimo, he formed an intimacy with Francisco Bigio, with whom he executed some works in the public buildings of Florence, which gained him considerable reputation. We are told by Vasari that Sarto passed some time in Rome. After his return, he painted for the Monastery of the Salvi his admired pictures of the *Descent of the Holy Ghost*, the *Birth of the Virgin*, and the *Last Supper*. Francis I, king of France, desirous of procuring specimens of Italian art, Sarto was commissioned to paint a picture for his majesty, and sent in a *Dead Christ*, with the Virgin, St. John, and other figures, which are now among the chief ornaments of the Gallery of the Louvre. The king invited him to Paris, where he obtained employment from Francis and the nobility. His wife urging his return to Florence, he obtained leave of absence, and was intrusted with a considerable sum of money for the purchase of statues, pictures, etc. Having spent the king's money, as well as his own, he sank into poverty, and died of the plague in 1530. The churches, convents, and palaces of Florence contain many of his best works. In the National Gallery are two pictures by him, the *Holy Family* and his own portrait.

Sartorius, ERNST WILHELM CHRISTIAN, one of the ablest, most fruitful, and genial theologians of modern orthodox Lutheranism, was born at Darmstadt, May 10, 1797, and died at Königsberg June 13, 1859. While studying at Göttingen (1815-18), he fell under the earnest religious influence of Planck. In 1819 he began to lecture in the University, and to produce the first of those numerous genial writings which have induced some to call him the St. John of Lutheranism. The first that appeared was three essays—one on the *Purpose of Jesus in Founding the Church*; the second on the *Origin of the Gospels* (afterwards disavowed); and the third on the *Doctrine of Grace and Faith*. Next followed (1821) the *Lutheran Doctrine of Human Inability*, in which he opposed Schleiermacher. In 1821 he became professor of theology at Marburg. Here he issued two works, *The Doctrine of Protestants as to the Respect due to the Civil Magistracy*, and *Religion Outside of the Limits of Mere Reason*. In 1824 he received the doctorate and accepted a call to Dorpat. Here appeared successively his *Contributions to Evangelical Orthodoxy*, in which he opposed Rühr, Bretschneider, and Rationalism in general. In 1831 he issued his *Discussion of the Person and Work of Christ*, which speedily passed through seven editions, and was translated into other languages. These two works attracted to him very general attention, as did also his contributions to Hengstenberg's *Church Journal*, in which appeared from 1834 to 1836 his vigorous assaults upon Möhler's *Symbolik*. After eleven years of academic labor at Dorpat, he was called to Prussia in 1835, and appointed to the position of superintendent-general of the province of Prussia and director of the royal consistory. He entered upon his duties with a sermon in the royal court-church at Königsberg in December. In 1840 he began his work on moral theology, *Die Lehre von der heiligen Liebe*, which, with its modifications and its revisions for new editions, occupied him until 1856, and which he justly regarded as his chief title to a place in the world of theology. The movements of the fanatical "Friends of Light" induced Sartorius to issue, in 1845, a work on the *Necessity and Obligatoriness of the Creeds*. In 1852 appeared his work on *Primitive Worship, the Priesthood, and the Sacraments*; in 1853 his *Defence of the Augsburg Confession*; and in 1855 his *Meditations on the Glorious Manifestations of God in his Church and on the Presence of the Glorified Body of Christ in the Eucharist*. After a ministry of twenty-four years, he died in the midst of his labors. The day before his decease he had labored upon a large polemical work against Romanism, published afterwards (1860) by his son, under the title *Soli Deo Gloria! A Comparison of Lutheranism and Romanism in the Light of the Augsburg and the Tridentine Confessions, with Special Reference to Möhler's Symbolik*. Up to the end of his life he was a zealous contributor to Hengstenberg's *Church Journal*. Some of his later papers were of a very severe polemical character. Only a few of his sermons have been printed. See Kurtz, *Church History* (Eng. transl.), ii, 372; Wuttke, *Christian Ethics*, i, 374; Herzog, *Real-Encyclop.* xiii, 426-428; Hagenbach, *Hist. of Doctrines*, ii, 414, 406, 494. (J. P. L.)

Sa'rush (Σαρούχ), the Greek form (Luke iii, 35) of the name of the patriarch SERUG (q. v.), son of Reu.

Saruk, MENACHEM, IBN-, an early Jewish scholar, was born about 910 at Tortosa, in Spain, and died about 970 at Cordova. He is the author of a Biblical dictionary called סִ' אֲנִיָּהּ or סִ' הַפִּזְרִין, also מִנְחָם מַחְבֵּרֶת, including the Aramean of Daniel and Ezra, with explanations in Hebrew. A grammatical introduction precedes each letter (מִחְבֵּרֶת), and introductions relating to the preliminary grammatical studies, divided into ten chapters, supply in it the place of a grammar. Against this work Dunash ben-Labrat (q. v.) wrote a critique, which elicited a rejoinder from Saruk. Saruk's *Lexicon* has been edited by Philipowski (Lond. 1854). See Fürst,

Bibl. Jud. iii, 248 sq.; *Introd. to his Hebrew and Chaldee Dict.* p. xxvi; Grätz, *Gesch. d. Juden*, v, 336 sq.; Braunschweiger, *Geschichte*, p. 25 sq.; Kimchi, *Liber Radicum*, p. xxxi sq. (ed. Biesenthal and Lebrecht); De Rossi, *Dizionario Storico*, p. 287 (Germ. transl.); Kämpf, *Nichtandalusische Poesie*, p. 155 sq.; Pick, *Menachem Ibn-Saruk* (in *Heb. Chr. Witness*, Lond. 1877), p. 324 sq.; Gross, *Menachem ben-Saruk* (Breslau, 1872); and Geiger, *Jüdische Zeitschrift*, 1872, p. 81 sq. (B. P.)

Sarum, Use of. In former times each bishop had the power of making some improvements in the liturgy of his Church. In process of time different customs arose, and several became so established as to receive the names of their respective churches. The "use" or custom of Sarum derives its origin from Osmund, bishop of that see in A.D. 1078, and chancellor of England. Influenced by difficulties arising from an attempt to do away with the ancient Gregorian chanting, Osmund collected together the clergy, and composed a book for the regulation of ecclesiastical offices, which was entitled the *Custom Book*. The substance of this was probably incorporated into the missal and other ritual books of Sarum, and ere long almost the whole of England, Wales, and Ireland adopted it. When the archbishop of Canterbury celebrated the liturgy in the presence of the bishops of his province, the bishop of Salisbury (probably in consequence of the general adoption of the "use" of Sarum) acted as *precentor* of the College of Bishops, a title which he still retains. See **USE**.

Sarvagna, in Hindû mythology, is the *all-seeing one*, a surname of Siva.

Sarvastivâdas, or **Sarvastivâdins** (literally, *those who maintain the reality of all existence*), is the name of one of the four divisions of the *Vaibhushika* system of Buddhism. Its reputed father was Râhula, the son of the Buddha Sakyamuni. See Köppen, *Die Religion des Buddha* (Berlin, 1857); Wassiljew, *Der Buddhismus und seine Dogmen* (St. Petersburg, 1860).

Sas. See **WORM**.

Sasnett, WILLIAM JEREMIAH, a minister of the Methodist Episcopal Church, South, was born in Hancock County, Ga., April 29, 1820, and graduated at Oglethorpe University in 1839. After graduation he studied law, but very early entered the ministry. His active work was soon interfered with by rheumatism. He then engaged in the work of education, and accepted, in 1849, the chair of English Literature in Emory College, which he filled until 1858, when he became president of La Grange Female College. In Sept., 1859, he opened the East Alabama Male College, as its president. At a very early day its halls were filled with young men, but the war coming on, so many of them entered the army that college exercises were necessarily suspended. Dr. Sasnett retired to his farm in Georgia, where he remained until his death, Nov. 3, 1865. As a scholar, the attainments of Dr. Sasnett were varied and extensive. As a preacher, his gifts were far from ordinary. Besides a large number of contributions to the periodical press, he published, *Progress* (1855):—*Discussions in Literature* (1860). See *Minutes of Annual Conf. of Meth. Epis. Church, South*, 1865, p. 574.

Sason, AARON BEN-JOSEPH. See AARON BEN-JOSEPH SASON.

Sasportas, JACOB BEN-AARON, a Jewish writer, was born in 1610 at Oran, North Africa. Very little is known about his early youth. In 1634 he became chief rabbi of six African communities, which position he held for two decades, when he was obliged to leave the country. In 1654 he arrived at Amsterdam, and a year later he was recalled by the emperor of Morocco, and charged with the ambassadorship to Spain. In 1664 he appeared as chief rabbi of London, which he left in 1672 for Hamburg. In the same year he was

called to Amsterdam, and so likewise in 1680, where he went in 1693, to be gathered to his fathers in 1698. He is best known as the author of *חולדות יצחק*, or index of Biblical passages which are explained in haggadic manner in the Jerusalem Talmud, being a supplement to the *חולדות אהרן* of Ah. Pesaro (q. v.). He also wrote against the Pseudo-Messiah, Sabbatai Zebi (q. v.), in his *ציצת נובל צברי* (Amst. 1737). See Fürst, *Bibl. Jud.* iii, 251; Jost, *Gesch. d. Judenth.* u. s. Section, iii, 168; Grätz, *Gesch. d. Juden*, x, p. 110 sq. (B. P.)

Sassanîdæ, the dynasty which succeeded that of the Arsacids on the throne of Persia (q. v.). See Müller, *Chips from a German Workshop*.

Sassi, FRANCISCO GIROLAMO, a noted monk, was born at Milan in 1678. He took orders in the brotherhood of the Oblates, and was made general of the order in 1700. He died at Milan, Nov. 2, 1731. He gave his life to religious instruction, and published several devotional works, among them *Christi Laudes* and *Mariæ Laudes*.

Sa'tan, the Scripture term for the chief of fallen spirits, and the arch-principle of evil. The doctrine of Satan and of satanic agency is to be made out from revelation, and from reflection in agreement with revelation. The obscurity of the subject need not deter us from a candid investigation of it.

I. Scripture Names or Titles of Satan.—Besides *Satan*, he is called the *Devil*, the *Dragon*, the *Evil One*, the *Angel of the Bottomless Pit*, the *Prince of this World*, the *Prince of the Power of the Air*, the *God of this World*, *Apollyon*, *Abaddon*, *Belial*, *Beelzebub*. "*Satan*" and "*devil*" are the names by which he is oftener distinguished than by any other, the former being applied to him about forty times and the latter about fifty times. See each term.

Satan is the Hebrew word שָׂטָן, *satân'*, transferred to the English. It is derived from the verb שָׂטַן, which means "to lie in wait," "to oppose," "to be an adversary;" hence, the noun denotes an *adversary*, or opposer. The word in its generic sense occurs in 1 Kings xi, 14: "The Lord raised up an adversary (*satân*) (Sept. *σατάν*) against Solomon," i. e. Hadad the Edomite. In the 23d verse the word occurs again, applied to Rezan. It is used in the same sense in 1 Sam. xxix, 4, where David is termed an adversary, and in Num. xxii, 22, where the angel "stood in the way for an adversary (*satân*) to Balaam," i. e. to oppose him when he went with the princes of Moab. See also 2 Sam. xix, 22, 1 Kings v, 4, xi, 25, Psa. cix, 6, where the Sept. has ἐπίβουλος, ἀντικαίμενος, διάβολος, etc. In Zech. iii, 1, 2, the word occurs in its specific sense as a proper name. "And he showed me Joshua the high-priest standing before the angel of the Lord, and Satan standing at his right hand to resist. And the Lord said unto Satan, The Lord rebuke thee, O Satan." Here it is manifest, both from the context and the use of the article, that some particular adversary is denoted. In Job i, ii, the same use of the word with the article occurs several times. The events in which Satan is represented as the agent confirm this view. He was a distinguished adversary and tempter. See also 1 Chron. xxi, 1. In all these latter passages the Sept. has *σατάν*, and the Vulg. *Satan*.

When we pass from the Old to the New Test., this doctrine of an invisible evil agent becomes more clear. With the advent of Christ and the opening of the Christian dispensation, the great opposer of that kingdom, the particular adversary and antagonist of the Saviour, would naturally become more active and more known. The antagonism of Satan and his kingdom to Christ and his kingdom runs through the whole of the New Test., as will appear from the following passages and their contexts: Matt. iv, 10; xii, 26; Mark iv, 15; Luke x, 18; xxii, 3, 31; Acts xxvi, 18; Rom. xvi, 20; 2 Cor. xi, 14; Rev. ii, 13; xii, 9. Peter is once called

Satan, because his spirit and conduct, at a certain time, were so much in opposition to the spirit and intent of Christ, and so much in the same line of direction with the workings of Satan. This is the only application of the word in the New Test. to any but the prince of the apostate angels. In the New Test. the word is *σατανᾶς*, followed by the Vulg. *Satanas*, except in 2 Cor. xii, 7, where *σατάν* is used. It is found in twenty-five places (exclusive of parallel passages), and the corresponding word *ὁ διάβολος* in about the same number. The title *ὁ ἄρχων τοῦ κόσμου τούτου* is used three times; *ὁ πονηρός* is used certainly six times, probably more frequently, and *ὁ πειράζων* twice.

Devil (*διάβολος*) is the more frequent term of designation given to Satan in the New Test. Both "Satan" and "devil" are in several instances applied to the same being (Rev. xii, 9), "That old serpent, the devil and Satan." Christ, in the temptation (Matt. iv), in his repulse of the tempter, calls him Satan; while the evangelists distinguish him by the term "devil." Devil is the word *διάβολος* transferred from the verb *διαβάλλω*, "to thrust through," "to carry over," and, tropically, "to inform against," "to accuse." He is also called the accuser of the brethren (Rev. xii, 10). The Hebrew term Satan is more generic than the word *devil*, at least by its etymology. The former expresses his character as an opposer of all good; the latter denotes more particularly the relation which he bears to the saints, as their traducer and accuser. *διάβολος* is the uniform translation which the Sept. gives of the Hebrew *Satan* when used with the article. Farmer says that the term Satan is not appropriated to one particular person or spirit, but signifies an adversary, or opponent in general. This is to no purpose, since it is also applied to the "devil" as an adversary in particular. There are four instances in the New Test. in which the word "devil," *diabolos*, is applied to human beings. In three out of the four it is in the plural number, expressive of quality and not personality (1 Tim. iii, 11; 2 Tim. iii, 3; Titus ii, 3). In the fourth instance (John vi, 70), Jesus says to his disciples, "Have not I chosen you twelve, and one of you is *a devil*?" This is the only instance in the New Test. of its application to a human being in the singular number; and here Dr. Campbell thinks it should not be translated "devil." The translation is, however, of no consequence, since it is with the use of the original word that this article is concerned. The obvious reasons for this application of *διάβολος* to Judas, as an exception to the general rule, go to confirm the rule. The rule is that, in the New-Test. usage, the word in the singular number denotes individuality, and is applied to Satan as a proper name. By the exception, it is applied to Judas, from his resemblance to the devil, as an accuser and betrayer of Christ, and from his contributing to aid him in his designs against Christ. With these exceptions, the *usus loquendi* of the New Test. shows *ὁ διάβολος* to be a proper name, applied to an extraordinary being, whose influence upon the human race is great and mischievous (Matt. iv, 1-11; Luke vii, 12; John viii, 44; Acts xiii, 10; Eph. vi, 11; 1 Pet. v, 8; 1 John iii, 8; Rev. xii, 9). See DEMON.

The term "devil," which is in the New Test. the uniform translation of *διάβολος*, is also frequently the translation of *dæmon*, *δαίμων*, and *dæmonion*, *δαμόνιον*. Between these words and *διάβολος* the English translators have made no distinction. The former are almost always used in connection with demoniacal possessions, and are applied to the possessing spirits, but never to the prince of those spirits. On the other hand, *διάβολος* is never applied to the *dæmons*, but only to their prince, thus showing that the one is used definitely as a proper name, while the others are used indefinitely as generic terms. The sacred writers made a distinction, which in the English and most modern versions is lost. See DEMON.

II. *Personality of Satan.*—We determine this point by the same criteria that we use in determining whether

Cæsar and Napoleon were real, personal beings, or the personifications of abstract ideas, viz. by the tenor of history concerning them, and the ascription of personal attributes to them. All the forms of personal agency are made use of by the sacred writers in setting forth the character and conduct of Satan. They describe him as having power and dominion, messengers and followers. He tempts and resists; he is held accountable, charged with guilt; is to be judged, and to receive final punishment. On the supposition that it was the object of the sacred writers to teach the proper personality of Satan, they could have found no more express terms than those which they have actually used. To suppose that all this semblance of a real, veritable, conscious moral agent is only a trope, a *prosopopeia*, is to make the inspired penmen guilty of employing a figure in such a way that, by no ascertained laws of language, it could be known that it was a figure—in such a way that it could not be taken to be a figure, without violence to all the rhetorical rules by which they on other occasions are known to have been guided. A personification protracted through such a book as the Bible, even should we suppose it to have been written by one person, is altogether anomalous and inadmissible. But to suppose that the several writers of the different books of the Bible, diverse in their style and intellectual habits, writing under widely differing circumstances, through a period of nearly two thousand years, should each, from Moses to John, fall into the use of the same personification, is to require men to believe that the inspired writers, who ought to have done the least violence to the common laws of language, have really done the most.

But there are other difficulties than these general ones by which the theory of personification is encumbered. This theory supposes the devil to be the *principle of evil*. Let it be applied in the interpretation of two or three passages of Scripture. "Then was Jesus led up of the Spirit into the wilderness to be tempted of the devil" (Matt. iv, 1-11). Was Jesus tempted by a real, personal being? or was it by the principle of evil? If by the latter, in whom or what did this principle reside? Was it in Jesus? Then it could not be true that in him was no sin. The very principle of sin was in him, which would have made him the tempter of himself. This is bad hermeneutics, producing worse theology. Let it also be remembered that this principle of evil, in order to be moral evil, must inhere in some conscious moral being. Sin is evil only as it implies the state or action of some personal and accountable agent. Again: "He was a murderer from the beginning, and abode not in the truth: he is a liar and the father of it" (John viii, 44). With what propriety could these specific acts of guilt be charged upon an abstraction? An abstraction a murderer! a liar! Seriously to affirm such things of the mere abstraction of evil is a solemn fiction; while to assert them of a fallen angel, who beguiled Eve by falsehood, and brought death upon all the race of man, is an intelligible and affecting truth.

It would be a waste of time to prove that, in various degrees of clearness, the personal existence of a Spirit of Evil is revealed again and again in Scripture. Every quality, every action, which can indicate personality, is attributed to him in language which cannot be explained away. It is not difficult to see why it should be thus revealed. It is obvious that the fact of his existence is of spiritual importance, and it is also clear, from the nature of the case, that it could not be discovered, although it might be suspected, by human reason. It is in the power of that reason to test any supposed manifestations of supernatural power, and any asserted principles of divine action which fall within its sphere of experience ("the earthly things" of John iii, 12). It may by such examination satisfy itself of the truth and divinity of a Person or a book; but, having done this, it must then accept and understand, without being able to test, or to explain, the disclosures of this divine authority upon

subjects beyond this world (the "heavenly things," of which it is said that none can see or disclose them, save the "Son of Man who is in heaven").

It is true that human thought can assert an *a priori* probability or improbability in such statements made, based on the perception of a greater or less degree of accordance in principle between the things seen and the things unseen, between the effects, which are visible, and the causes, which are revealed from the regions of mystery. But even this power of weighing probability is applicable rather to the fact and tendency than to the method of supernatural action. This is true even of natural action beyond the sphere of human observation. In the discussion of the plurality of worlds, for example, it may be asserted without doubt that in all the orbs of the universe the divine power, wisdom, and goodness must be exercised; but the inference that the method of their exercise is found there, as here, in the creation of sentient and rational beings is one at best of but moderate probability. Still more is this the case in the spiritual world. Whatever supernatural orders of beings may exist, we can conclude that in their case, as in ours, the divine government must be carried on by the union of individual freedom of action with the overruling power of God, and must tend finally to that good which is his central attribute. But beyond this we can assert nothing to be certain, and can scarcely even say of any part of the method of this government whether it is antecedently probable or improbable.

Thus, on our present subject, man can ascertain by observation the existence of evil—that is, of facts and thoughts contrary to the standard which conscience asserts to be the true one, bringing with them suffering and misery as their inevitable results. If he attempts to trace them to their causes, he finds them to arise, for each individual, partly from the power of certain internal impulses which act upon the will, partly from the influence of external circumstances. These circumstances themselves arise, either from the laws of nature and society, or by the deliberate action of other men. He can conclude with certainty that both series of causes must exist by the permission of God, and must finally be overruled to his will. But whether there exist any superhuman but subordinate cause of the circumstances, and whether there be any similar influence acting in the origination of the impulses which move the will, this is a question which he cannot answer with certainty. Analogy, from the observation of the only ultimate cause which he can discover in the visible world—viz. the free action of a personal will—may lead him, and generally has led him, to conjecture the affirmative; but still the inquiry remains unanswered by authority.

The tendency of the mind in its inquiry is generally towards one or other of two extremes. The first is to consider evil as a negative imperfection arising, in some unknown and inexplicable way, from the nature of matter, or from some disturbing influences which limit the action of goodness on earth; in fact, to ignore as much of evil as possible, and to decline to refer the residuum to any positive cause at all. The other is the old Persian or Manichæan hypothesis, which traces the existence of evil to a rival creator, not subordinate to the Creator of good, though perhaps inferior to him in power, and destined to be overcome by him at last. Between these two extremes the mind varied through many gradations of thought and countless forms of superstition. Each hypothesis had its arguments of probability against the other. The first labored under the difficulty of being insufficient as an account of the anomalous facts, and indeterminate in its account of the disturbing cause; the second sinned against that belief in the unity of God and the natural supremacy of goodness, which is supported by the deepest instincts of the heart. But both were laid in a sphere beyond human cognizance; neither could be proved or disproved with certainty.

The revelation of Scripture, speaking with authority, meets the truth and removes the error inherent in both

these hypotheses. It asserts in the strongest terms the perfect supremacy of God, so that under his permission alone, and for his inscrutable purposes, evil is allowed to exist (see, for example, Prov. xvi. 4; Isa. xlv. 7; Amos iii. 6; comp. Rom. ix. 22, 23). It regards this evil as an anomaly and corruption, to be taken away by a new manifestation of divine love in the incarnation and atonement. The conquest of it began virtually in God's ordinance after the fall itself, was effected actually on the cross, and shall be perfected in its results at the judgment-day. Still Scripture recognises the existence of evil in the world, not only as felt in outward circumstances ("the world"), and as inborn in the soul of man ("the flesh"), but also as proceeding from the influence of an evil spirit, exercising that mysterious power of free-will, which God's rational creatures possess, to rebel against him, and to draw others into the same rebellion ("the devil").

In accordance with the "economy" and progressiveness of God's revelation, the existence of Satan is but gradually revealed. In the first entrance of evil into the world, the temptation is referred only to the serpent. It is true that the whole narrative, and especially the spiritual nature of the temptation ("to be as gods"), which was united to the sensual motive, would force on any thoughtful reader the conclusion that something more than a mere animal agency was at work; but the time had not then come to reveal, what afterwards was revealed, that "he who sinneth is of the devil" (1 John iii. 8), and that "the old serpent" of Genesis was "called the devil and Satan, who deceiveth the whole world" (Rev. xii. 9; xx. 23).

Throughout the whole period of the patriarchal and Jewish dispensations, this vague and imperfect revelation of the source of evil alone was given. The Source of all Good is set forth in all his supreme and unapproachable majesty; evil is known negatively as the falling away from him; and the "vanity" of idols, rather than any positive evil influence, is represented as the opposite to his reality and goodness. The law gives the "knowledge of sin" in the soul, without referring to any external influence of evil to foster it; it denounces idolatry, without even hinting, what the New Test. declares plainly, that such evil implied a "power of Satan."

The book of Job stands, in any case, alone (whether we refer it to an early or a later period) on the basis of "natural religion," apart from the gradual and orderly evolutions of the Mosaic revelation. In it, for the first time, we find a distinct mention of Satan, the adversary of Job. But it is important to remark the emphatic stress laid on his subordinate position, on the absence of all but delegated power, of all terror, and all grandeur in his character. He comes among the "sons of God" to present himself before the Lord; his malice and envy are permitted to have scope, in accusation or in action, only for God's own purposes; and it is especially remarkable that no power of spiritual influence, but only a power over outward circumstances, is attributed to him. All this is widely different from the clear and terrible revelations of the New Test.

The captivity brought the Israelites face to face with the great dualism of the Persian mythology, the conflict of Ormuzd with Ahriman, the co-ordinate spirit of evil. In the books written after the captivity we have again the name of Satan twice mentioned; but it is confessed by all that the Satan of Scripture bears no resemblance to the Persian Ahriman. His subordination and inferiority are as strongly marked as ever. In 1 Chron. xxi. 1, where the name occurs without the article ("an adversary," not "the adversary"), the comparison with 2 Sam. xxiv. 1 shows distinctly that, in the temptation of David, Satan's malice was overruled to work out the "anger of the Lord" against Israel. In Zech. iii. 1, 2, Satan is ὁ ἀντίδικος (as in 1 Pet. v. 8), the accuser of Joshua before the throne of God, rebuked and put to silence by him (comp. Psa. cix. 6). In the case, as of the good angels, so also of the evil one, the

presence of fable and idolatry gave cause to the manifestation of the truth. See ANGEL. It would have been impossible to guard the Israelites more distinctly from the fascination of the great dualistic theory of their conquerors.

It is perhaps not difficult to conjecture that the reason of this reserve as to the disclosure of the existence and nature of Satan is to be found in the inveterate tendency of the Israelites to idolatry—an idolatry based, as usual, in great degree, on the supposed power of their false gods to inflict evil. The existence of evil spirits is suggested to them in the stern prohibition and punishment of witchcraft (Exod. xxii, 18; Deut. xviii, 10), and in the narrative of the possession of men by an "evil" or "lying spirit from the Lord" (1 Sam. xvi, 14; 1 Kings xxii, 22); the tendency to seek their aid is shown by the rebukes of the prophets (Isa. viii, 19, etc.). But this tendency would have been increased tenfold by the revelation of the existence of the great enemy concentrating round himself all the powers of evil and enmity against God. Therefore, it would seem, the revelation of the "strong man armed" was withheld until "the stronger than he" should be made manifest.

In the New Test. this reserve suddenly vanishes. In the interval between the Old and New Test. the Jewish mind had pondered on the scanty revelations already given of evil spiritual influence. But the Apocryphal books (as, for example, Tobit and Judith), while dwelling on "dæmons" (*δαμόνια*), have no notice of Satan. The same may be observed of Josephus. The only instance to the contrary is the reference already made to Wisd. ii, 24. It is to be noticed also that the Targums often introduce the name of Satan into the descriptions of sin and temptation found in the Old Test., as, for example, in Exod. xxxii, 19, in connection with the worship of the golden calf (comp. the tradition as to the body of Moses, Deut. xxxiv, 5, 6; Jude 9). See MICHAEL. But, while a mass of fable and superstition grew up on the general subject of evil spiritual influence, still the existence and nature of Satan remained in the background, felt, but not understood.

The New Test. first brings it plainly forward. From the beginning of the Gospel, when he appears as the personal tempter of our Lord, through all the Gospels, Epistles, and Apocalypse, it is asserted or implied, again and again, as a familiar and important truth. To refer this to mere "accommodation" of the language of the Lord and his apostles to the ordinary Jewish belief is to contradict facts and evade the meaning of words. The subject is not one on which error could be tolerated as unimportant, but one important, practical, and even awful. The language used respecting it is either truth or falsehood; and unless we impute error or deceit to the writers of the New Test., we must receive the doctrine of the existence of Satan as a certain doctrine of revelation. Without dwelling on other passages, the plain, solemn, and unmetaphorical words of John viii, 44, must be sufficient: "Ye are of your father the devil. . . . He was a murderer from the beginning, and abides (*ἔσθην*) not in the truth. . . . When he speaketh a lie, he speaketh of his own, for he is a liar and the father of it." See DÆMONIAC.

III. *Natural History*.—1. Of the original nature and state of Satan, little is revealed in Scripture. Most of the common notions on the subject are drawn from mere tradition, popularized in England by Milton, but without even a vestige of Scriptural authority. He is spoken of as a "spirit" in Eph. ii, 2; as the prince or ruler of the "dæmons" (*δαμόνια*) in Matt. xii, 24-26; and as having "angels" subject to him in Matt. xxv, 41; Rev. xii, 7, 9. The whole description of his power implies spiritual nature and spiritual influence. We conclude, therefore, that he was of angelic nature, a rational and spiritual creature, superhuman in power, wisdom, and energy; and not only so, but an archangel, one of the "princes" of heaven. See ARCHANGEL.

The class of beings to which Satan originally be-

longed, and which constituted a celestial hierarchy, is very numerous: "Ten thousand times ten thousand stood before him" (Dan. vii, 10). They were created and dependent (John i, 3). Analogy leads to the conclusion that there are different grades among the angels as among other races of beings. The Scriptures warrant the same. Michael is described as one of the chief princes (Dan. x, 13); as chief captain of the host of Jehovah (Josh. v, 14). Similar distinctions exist among the fallen angels (Col. ii, 15; Eph. vi, 12). It is also reasonable to suppose that they were created susceptible of improvement in all respects except moral purity, as they certainly were capable of apostasy.

2. As to the time when they were brought into being, the Bible is silent; and where it is silent, we should be silent, or speak with modesty. Some suppose that they were called into existence after the creation of the world; among whom is Dr. John Dick. Others have supposed that they were created just anterior to the creation of man, and for purposes of a merciful ministration to him. It is more probable, however, that as they were the highest in rank among the creatures of God, so they were the first in the order of time; and that they may have continued for ages in obedience to their Maker, before the creation of man, or the fall of the apostate angels.

We cannot, of course, conceive that anything essentially and originally evil was created by God. We find by experience that the will of a free and rational creature can, by his permission, oppose his will; that the very conception of freedom implies capacity of temptation; and that every sin, unless arrested by God's fresh gift of grace, strengthens the hold of evil on the spirit till it may fall into the hopeless state of reprobation. We can only conjecture, therefore, that Satan is a fallen angel, who once had a time of probation, but whose condemnation is now irrevocably fixed.

3. The Scriptures are explicit as to the apostasy of some, of whom Satan was the chief and leader. But of the time, cause, and manner of his fall, Scripture tells us scarcely anything. It limits its disclosures, as always, to that which we need to know. The passage on which all the fabric of tradition and poetry has been raised is Rev. xii, 7, 9, which speaks of "Michael and his angels" as "fighting against the dragon and his angels," till the "great dragon, called the devil and Satan," was "cast out into the earth, and his angels cast out with him." Whatever be the meaning of this passage, it is certain that it cannot refer to the original fall of Satan. The only other passage which refers to the fall of the angels is 2 Pet. ii, 4, "God spared not the angels, when they had sinned, but having cast them into hell, delivered them to chains of darkness (*σεραῖς ζόφου ταραρώσας παρίδωκεν*), reserved unto judgment," with the parallel passage in Jude 6, "Angels, who kept not their first estate (*τὴν ἑαυτῶν ἀρχήν*), but left their own habitation, he hath reserved in everlasting chains under darkness unto the judgment of the great day." In these mysterious passages, however, there is some difficulty in considering Satan as one of the rest, for they are in chains and guarded (*τρητημένους*) till the great day; he is permitted still to go about as the tempter and the adversary, until his appointed time be come. This distinction, nevertheless, may be due to Satan's eminence among his fellows. Those who adhered to Satan in his apostasy are described as belonging to him. The company is called "the devil and his angels" (Matt. xxv, 41). The relation marked here denotes the instrumentality which the devil may have exerted in inducing those called his angels to rebel against Jehovah and join themselves to his interests. Aside from these passages, we have still to consider the declaration of our Lord in Luke x, 18, "I beheld (*ἑώρακον*) Satan, as lightning, fall from heaven." This may refer to the fact of his original fall (although the use of the imperfect tense and the force of the context rather refer it figuratively to the triumph of the disciples over the

evil spirits); but, in any case, it tells nothing of its cause or method. There is also the passage already quoted (John viii, 44), in which our Lord declares of him, that "he was a murderer from the beginning," that "he stands not (*ἵστηκε*) in the truth, because there is no truth in him," that "he is a liar, and the father of it." But here it seems likely the words *ἀπ' ἀρχῆς* refer to the beginning of his action upon man; perhaps the allusion is to his temptation of Cain to be the first murderer—an allusion explicitly made in a similar passage in 1 John iii, 9-12. The word *ἵστηκε* (wrongly rendered "abode" in the A. V.) and the rest of the verse refer to present time. The passage therefore throws little or no light on the cause and method of his fall. Perhaps the only one which has any value is 1 Tim. iii, 6, "lest being lifted up by pride he fall into the condemnation (*κρίμα*) of the devil." It is concluded from this that pride was the cause of the devil's condemnation. The inference is a probable one; it is strengthened by the only analogy within our reach, that of the fall of man, in which the spiritual temptation of pride, the desire "to be as gods," was the subtlest and most deadly temptation. Still it is but an inference; it cannot be regarded as a matter of certain revelation.

How Satan and his followers, being created so high in excellence and holiness, became sinful and fell is a question upon which theologians have differed, but which they have not settled. The difficulty has seemed so great to Schleiermacher and others that they have denied the fact of such an apostasy. They have untied the knot by cutting it. Still the difficulty remains. The denial of mystery is not the removal of it. Even philosophy teaches us to believe sometimes where we cannot understand. It is here that the grave question of the introduction of evil first meets us. If we admit the fact of apostasy among the angels, as by a fair interpretation of Scripture we are constrained to do, the admission of such a fact in the case of human beings will follow more easily, they being the lower order of creatures, in whom defection would be less surprising.

4. In his *physical nature*, Satan is among those that are termed spiritual beings; not as excluding necessarily all idea of matter, but as opposed rather to the *animal nature*. The good angels are all ministering spirits, *πνεύματα* (Heb. i, 14). Satan is one of the angels that kept not their first principality. The fall produced no change in his physical or metaphysical nature. Paul, in warning the Ephesians against the wiles of the devil, tells them (Eph. vi, 12) that they contended not against flesh and blood, mere human enemies, but against principalities and powers; against the rulers of the darkness of this world; against spiritual wickedness in high places, in which the contrast is between human and superhuman foes, the latter being spiritual natures, or spirits, in opposition to flesh and blood (Rosenmüller, *ad loc.*). Satan is immortal, but not eternal; neither omniscient nor omnipresent, but raised high above the human race in knowledge and power. The Persian mythology in its early stage, and subsequently the Gnostics and Manichæans, ranked the evil principle as coeval and co-ordinate, or nearly so, with God, or the good principle. The doctrine of the Jewish Church always made him a dependent creature, subject to the control of the Almighty. By the modifications which Zoroaster subsequently introduced, the Persian angelology came more nearly to resemble that of the Jews. Some have ascribed to Satan the power of working miracles, contending that there are two series of antagonistic miracles running through the Bible. To the miracles of Moses were opposed those of the Egyptian magicians; and to those of Christ and his apostles, the signs and wonders of false prophets and Antichrists—the divine and the satanic. Olshausen maintains this view, as do some of the older commentators (*Biblischen Commentar*, i, 242). The evidence in support of such a belief has not been sufficient to procure for it general acceptance (see Rosenmüller and Calvin on Matt. xxiv,

24; 2 Thess. ii, 9; Hengstenberg, *Egypt and the Books of Moses*, ch. iii; also Rosenmüller and Bush on Exod. ch. vii). With a substantial presence in only one place at one time, yet, as the head of a spiritual kingdom, he is virtually present wherever his angels or servants are executing his will.

5. Scripture describes to us distinctly the *moral character* of the Evil One. This is no matter of barren speculation to those who, by yielding to evil, may become the "children of Satan" instead of "children of God." The ideal of goodness is made up of the three great moral attributes of God—love, truth, and purity, or holiness—combined with that spirit which is the natural temper of a finite and dependent creature, the spirit of faith. We find, accordingly, that the opposites to these qualities are dwelt upon as the characteristics of the devil. In John viii, 44, compared with 1 John iii, 10-15, we have hatred and falsehood; in the constant mention of the "unclean" spirits, of which he is the chief, we find impurity; from 1 Tim. iii, 6, and the narrative of the temptation, we trace the spirit of pride. These are especially the "sins of the devil;" in them we trace the essence of moral evil and the features of the reprobate mind. Add to this a spirit of restless activity, a power of craft, and an intense desire to spread corruption, and with it eternal death, and we have the portraiture of the spirit of evil as Scripture has drawn it plainly before our eyes.

More particularly, Satan's character is denoted by his titles, Satan, Adversary, Diabolos, False Accuser, Tempter, etc. All the representations of him in Scripture show him to have unmixed and confirmed evil as the basis of his character, exhibiting itself in respect to God in assuming to be his equal, and in wishing to transfer the homage and service which belong only to God to himself; and, in respect to men, in efforts to draw them away from God and attach them to his kingdom. The evil develops itself in all possible ways and by all possible means of opposition to God, and to those who are striving to establish and extend his dominion. The immutability of his evil character precludes the idea of repentance, and, therefore, the possibility of recovering grace. "He possesses an understanding which misapprehends exactly that which is most worthy to be known, to which the key fails without which nothing can be understood in its true relations—an understanding darkened, however deep it may penetrate, however wide it may reach. He is thereby necessarily unblessed; torn away from the centre of life, yet without ever finding it in himself; from the sense of inward emptiness, continually driven to the exterior world, and yet with it, as with himself, in eternal contradiction; forever fleeing from God, yet never escaping him; constantly laboring to frustrate his designs, yet always conscious of being obliged to promote them; instead of enjoyment in the contemplation of his excellence, the never satisfied desire after an object which it cannot attain; instead of hope, a perpetual wavering between doubt and despair; instead of love, a powerless hatred against God, against his fellow-beings, against himself" (Twisten).

IV. *Satan's Power and Action.*—Both these points, being intimately connected with our own life and salvation, are treated with a distinctness and fulness remarkably contrasted with the obscurity of the previous subjects.

The agency of Satan extends to all that he does or causes to be done. To this agency the following restrictions have generally been supposed to exist: It is limited, first, by the direct power of God; he cannot transcend the power on which he is dependent for existence; secondly, by the finiteness of his own created faculties; thirdly, by the established connection of cause and effect, or the laws of nature. The miracles, which he has been supposed to have the power of working, are denominated lying signs and wonders (2 Thess. ii, 9). With these restrictions, the devil goes about like a roaring lion.

His agency is moral and physical. First, moral. He beguiled our first parents, and thus brought sin and death upon them and their posterity (Gen. iii). He moved David to number the people (1 Chron. xxi, 1). He resisted Joshua the high-priest (Zech. iii, 1). He tempted Jesus (Matt. iv); entered into Judas, to induce him to betray his master (Luke xxii, 3); instigated Ananias and Sapphira to lie to the Holy Ghost (Acts v, 3); and hindered Paul and Barnabas on their way to the Thessalonians (1 Thess. ii, 18). He is the spirit that now worketh in the children of disobedience (Eph. ii, 2); and he deceiveth the whole world (Rev. xii, 9).

The means which he uses are variously called wiles, darts, depths, snares, all deceivableness of unrighteousness. He darkens the understandings of men, to keep them in ignorance. He perverts their judgments, that he may lead them into error. He insinuates evil thoughts, and thereby awakens in them unholy desires. He excites them to pride, anger, and revenge; to discontent, repinings, and rebellion. He labors to prop up false systems of religion, and to corrupt and overturn the true one. He came into most direct and determined conflict with the Saviour in the temptation, hoping to draw him from his allegiance to God, and procure homage for himself; but he failed in his purpose. Next, he instigated the Jews to put him to death, thinking thus to thwart his designs and frustrate his plans. Here, too, he failed, and was made to subserve the very ends which he most wished to prevent. Into a similar conflict does he come with all the saints, and with like ultimate ill success. God uses his temptations as the means of trial to his people, and of strength by trial; and points them out as a motive to watchfulness and prayer. Such are the nature and mode of his moral influence and agency.

But his efforts are directed against the bodies of men, as well as against their souls. That the agency of Satan was concerned in producing physical diseases the Scriptures plainly teach (Job ii, 7; Luke xiii, 16). Peter says of Christ that he went about doing good and healing all that were oppressed of the devil (Acts x, 38). Hymenæus and Alexander were delivered to Satan, that they might learn not to blaspheme (1 Tim. i, 20), where physical suffering by the agency of Satan, as a divine chastisement, is manifestly intended.

The power of Satan over the soul is represented as exercised either directly or by his instruments. His direct influence over the soul is simply that of a powerful and evil nature on those in whom lurks the germ of the same evil, differing from the influence exercised by a wicked man in degree rather than in kind; but it has the power of acting by suggestion of thoughts, without the medium of actions or words—a power which is only in a very slight degree exercised by men upon each other. This influence is spoken of in Scripture in the strongest terms as a real external influence, correlative to, but not to be confounded with, the existence of evil within. In the parable of the sower (Matt. xiii, 19), it is represented as a negative influence, taking away the action of the Word of God for good; in that of the wheat and the tares (ver. 39), as a positive influence for evil, introducing wickedness into the world. Paul does not hesitate to represent it as a power permitted to dispute the world with the power of God; for he declares to Agrippa that his mission was “to turn men from darkness to light, and from the power (*ἐξουσία*) of Satan unto God,” and represents the excommunication, which cuts men off from the grace of Christ in his Church, as a “deliverance of them unto Satan” (1 Cor. v, 5; 1 Tim. i, 20). The same truth is conveyed, though in a bolder and more startling form, in the epistles to the churches of the Apocalypse, where the body of the unbelieving Jews is called a “synagogue of Satan” (Rev. ii, 9; iii, 9), where the secrets of false doctrine are called “the depths of Satan” (ii, 24), and the “throne” and “habitation” of Satan are said to be set up in opposition to the Church of Christ. Another and even more remarkable expres-

sion of the same idea is found in the Epistle to the Hebrews, where the death of Christ is spoken of as intended to baffle (*καταργεῖν*) “him that hath the power (*τὸ κράτος*) of death, that is, the devil;” for death is evidently regarded as the “wages of sin,” and the power of death as inseparable from the power of corruption. Nor is this truth only expressed directly and formally; it meets us again and again in passages simply practical, taken for granted as already familiar (see Rom. xvi, 20; 2 Cor. ii, 11; 1 Thess. ii, 18; 2 Thess. ii, 9; 1 Tim. v, 15). The Bible does not shrink from putting the fact of satanic influence over the soul before us in plain and terrible certainty.

Yet, at the same time, it is to be observed that its language is very far from countenancing, even for a moment, the horrors of the Manichean theory. The influence of Satan is always spoken of as temporary and limited, subordinated to the divine counsel, and broken by the incarnate Son of God. It is brought out visibly, in the form of possession, in the earthly life of our Lord, only in order that it may give the opportunity of his triumph. As for himself, so for his redeemed ones, it is true that “God shall bruise Satan under their feet shortly” (Rom. xvi, 20; comp. Gen. iii, 15). Nor is this all, for the history of the book of Job shows plainly, what is elsewhere constantly implied, that satanic influence is permitted in order to be overruled to good, to teach humility, and therefore faith. The mystery of the existence of evil is left unexplained; but its present subordination and future extinction are familiar truths. So accordingly, on the other hand, his power is spoken of as capable of being resisted by the will of man, when aided by the grace of God. “Resist the devil and he will flee from you” is the constant language of Scripture (James iv, 7). It is indeed a power to which “place” or opportunity “is given” only by the consent of man’s will (Eph. iv, 27). It is probably to be traced most distinctly in the power of evil habit—a power real, but not irresistible, created by previous sin, and by every successive act of sin riveted more closely upon the soul. It is a power which cannot act directly and openly, but needs craft and dissimulation in order to get advantage over man by entangling the will. The “wiles” (Eph. vi, 11), the “devices” (2 Cor. ii, 11), the “snare” (1 Tim. iii, 7; vi, 9; 2 Tim. ii, 26) “of the devil” are expressions which indicate the indirect and unnatural character of the power of evil. It is therefore urged as a reason for “soberness and vigilance” (1 Pet. v, 8), for the careful use of the “whole armor of God” (Eph. vi, 10-17); but it is never allowed to obscure the supremacy of God’s grace, or to disturb the inner peace of the Christian. “He that is born of God keepeth himself, and the wicked one toucheth him not” (1 John v, 18).

Besides his own direct influence, the Scriptures disclose to us the fact that Satan is the leader of a host of evil spirits, or angels, who share his evil work, and for whom the “everlasting fire is prepared” (Matt. xxv, 41). Of their origin and fall we know no more than of his, for they cannot be the same as the fallen and imprisoned angels of 2 Pet. ii, 4, and Jude 6; but one passage (Matt. xii, 24-26) identifies them distinctly with the *δαίμονια* (A. V. “devils”) who had power to possess the souls of men. The Jews there speak of a Beelzebub (*Βεελζεβοὺλ*), “a prince of the demons,” whom they identify with, or symbolize by, the idol of Ekron, the “god of flies” [see BEELZEBUB], and by whose power they accuse our Lord of casting out demons. His answer is, “How can Satan cast out Satan?” The inference is clear that Satan is Beelzebub, and therefore the demons are “the angels of the devil;” and this inference is strengthened by Acts x, 38, in which Peter describes the possessed as *καταδυναστυωμένους ὑπὸ τοῦ Διαβόλου*; and by Luke x, 18, in which the mastery over the demons is connected by our Lord with the “fall of Satan from heaven,” and their power included by him in the “power of the enemy” (*τοῦ ἐχθροῦ*; comp. Matt. xiii, 39). For their nature, see DEMON. They

are mostly spoken of in Scripture in reference to possession; but in Eph. vi, 12 they are described in various lights, as "principalities" (*ἀρχαί*), "powers" (*ἐξουσίαι*), "rulers of the darkness of this world," and "spiritual powers of wickedness in heavenly places" (or "things") (*τὰ πνευματικὰ τῆς πονηρίας ἐν τοῖς ἐπουρανίοις*); and in all as "wrestling" against the soul of man. The same reference is made less explicitly in Rom. viii, 38 and Col. ii, 15. In Rev. xii, 7-9 they are spoken of as fighting with "the dragon, the old serpent called the devil and Satan," against "Michael and his angels," and as cast out of heaven with their chiefs. Taking all these passages together, we find them sharing the enmity to God and man implied in the name and nature of Satan; but their power and action are but little dwelt upon in comparison with his. That there is against us a power of spiritual wickedness is a truth which we need to know, and a mystery which only revelation can disclose; but whether it is exercised by few or by many is a matter of comparative indifference.

But the evil one is not only the "prince of the *dæmons*," but also he is called the "prince of this world" (*ὁ ἀρχὼν τοῦ κόσμου τούτου*) in John xii, 31; xiv, 30; xvi, 11, and even the "god of this world" (*ὁ θεὸς τοῦ αἰῶνος τούτου*) in 2 Cor. iv, 4; the two expressions being united in the words *τοὺς κοσμοκράτορας τοῦ σκότους τοῦ αἰῶνος τούτου*, used in Eph. vi, 12. (The word *κόσμος*, properly referring to the system of the universe, and so used in John i, 10, is generally applied in Scripture to human society as alienated from God, with a reference to the "pomp and vanity" which make it an idol [see, e. g., 1 John ii, 15]; *αἰών* refers to its transitory character, and is evidently used above to qualify the startling application of the word *θεός*; a "god of an age" being of course no true God at all. It is used with *κόσμος* in Eph. ii, 2.) This power he claimed for himself as a delegated authority in the temptation of our Lord (Luke iv, 6), and the temptation would have been unreal had he spoken altogether falsely. It implies another kind of indirect influence exercised through earthly instruments. There are some indications in Scripture of the exercise of this power through inanimate instruments, of an influence over the powers of nature, and what men call the "chances" of life. Such a power is distinctly asserted in the case of Job, and probably implied in the case of the woman with a spirit of infirmity (in Luke xiii, 16), and of Paul's "thorn in the flesh" (2 Cor. xii, 7). It is only consistent with the attribution of such action to the angels of God (as in Exod. xii, 23; 2 Sam. xxiv, 16; 2 Kings xix, 35; Acts xii, 23), and, in our ignorance of the method of connection of the second causes of nature with the supreme will of God, we cannot even say whether it has in it any antecedent improbability; but it is little dwelt upon in Scripture in comparison with the other exercise of this power through the hands of wicked men, who become "children of the devil," and accordingly "do the lusts of their father." (See John viii, 44; Acts xiii, 10; 1 John iii, 8-10; and comp. John vi, 70.) In this sense the Scripture regards all sins as the "works of the devil," and traces to him, through his ministers, all spiritual evil and error (2 Cor. xi, 14, 15), and all the persecution and hindrances which oppose the Gospel (Rev. ii, 10; 1 Thess. ii, 18). Most of all is this indirect action of Satan manifested in those who deliberately mislead and tempt men, and who at last, independent of any interest of their own, come to take an unnatural pleasure in the sight of evil-doing in others (Rom. i, 32).

The method of his action is best discerned by an examination of the title by which he is designated in Scripture. He is called emphatically *ὁ διάβολος*, "the devil." The derivation of the word in itself implies only the endeavor to break the bonds between others and "set them at variance" (see, e. g., Plato, *Symp.* p. 222 c, *διαβάλλειν ἑμὲ καὶ Ἀγάθωνα*); but common usage adds to this general sense the special idea of "setting at variance by slander." In the New Test. the word

διάβολοι is used three times as an epithet (1 Tim. iii, 11; 2 Tim. iii, 3; Tit. ii, 3), and in each case with something like the special meaning. In the application of the title to Satan both the general and special senses should be kept in view. His general object is to break the bonds of communion between God and man, and the bonds of truth and love which bind men to each other—to "set" each soul "at variance" both with men and God, and so reduce it to that state of self-will and selfishness which is the seed-plot of sin. One special means by which he seeks to do this is slander of God to man and of man to God.

The slander of God to man is seen best in the words of Gen. iii, 4, 5: "Ye shall not surely die: for God doth know that in the day that ye eat thereof your eyes shall be opened, and ye shall be as gods, knowing good and evil." These words contain the germ of the false notions which keep men from God, or reduce their service to him to a hard and compulsory slavery, and which the heathen so often adopted in all their hideousness, when they represented their gods as either careless of human weal and woe or "envious" of human excellence and happiness. They attribute selfishness and jealousy to the giver of all good. This is enough (even without the imputation of falsehood which is added) to pervert man's natural love of freedom till it rebels against that which is made to appear as a hard and arbitrary tyranny, and seeks to set up, as it thinks, a freer and nobler standard of its own. Such is the slander of God to man, by which Satan and his agents still strive against his reuniting grace.

The slander of man to God is illustrated by the book of Job (Job i, 9-11; ii, 4, 5). In reference to it, Satan is called the "adversary" (*ἀντιδικός*) of man in 1 Pet. v, 8, and represented in that character in Zech. iii, 1, 2; and more plainly still designated in Rev. xii, 10 as "the accuser of our brethren, who accused them before our God day and night." It is difficult for us to understand what can be the need of accusation, or the power of slander, under the all-searching eye of God. The mention of it is clearly an "accommodation" of God's judgment to the analogy of our human experience; but we understand by it a practical and awful truth, that every sin of life, and even the admixture of lower and evil motives which taints the best actions of man, will rise up against us at the judgment to claim the soul as their own, and fix forever that separation from God to which, through them, we have yielded ourselves. In that accusation Satan shall in some way bear a leading part, pleading against man, with that worst of slander which is based on perverted or isolated facts; and shall be overcome, not by any counter-claim of human merit, but "by the blood of the lamb" received in true and steadfast faith.

But these points, important as they are, are of less moment than the disclosure of the method of Satanic action upon the heart itself. It may be summed up in two words—temptation and possession.

The subject of temptation is illustrated, not only by abstract statements, but also by the record of the temptations of Adam and of our Lord. It is expressly laid down (as in James i, 2-4) that "temptation," properly so called, i. e. "trial" (*πειρασμός*), is essential to man, and is accordingly ordained for him and sent to him by God (as in Gen. xxii, 1). Man's nature is progressive; his faculties, which exist at first only in capacity (*δυνάμεις*), must be brought out to exist in actual efficiency (*ἐνεργεῖα*) by free exercise. His appetites and passions tend to their objects, simply and unreservedly, without respect to the rightness or wrongness of their obtaining them; they need to be checked by the reason and conscience, and this need constitutes a trial in which, if the conscience prevail, the spirit receives strength and growth; if it be overcome, the lower nature tends to predominate, and the man has fallen away. Besides this, the will itself delights in independence of action. Such independence of physical compulsion is its high

privilege; but there is over it the moral power of God's law, which, by the very fact of its truth and goodness, acknowledged as they are by the reason and the conscience, should regulate the human will. The need of giving up the individual will, freely and by conviction, so as to be in harmony with the will of God, is a still severer trial, with the reward of still greater spiritual progress if we sustain it, with the punishment of a subtler and more dangerous fall if we succumb. In its struggle the spirit of man can only gain and sustain its authority by that constant grace of God, given through communion of the Holy Spirit, which is the breath of spiritual life.

It is this tentability of man, even in his original nature, which is represented in Scripture as giving scope to the evil action of Satan. He is called the "tempter" (as in Matt. iv, 3; 1 Thess. iii, 5). He has power (as the record of Gen. iii shows clearly), first, to present to the appetites or passions their objects in vivid and captivating forms, so as to induce man to seek these objects against the law of God "written in the heart;" and next, to act upon the false desire of the will for independence, the desire "to be as gods, knowing" (that is, practically, judging and determining) "good and evil." It is a power which can be resisted, because it is under the control and overruling power of God, as is emphatically laid down in 1 Cor. x, 13; James iv, 7, etc.; but it can be so resisted only by yielding to the grace of God, and by a struggle (sometimes an "agony") in reliance on its strength.

It is exercised both negatively and positively. Its negative exercise is referred to in the parable of the sower, as taking away the word, the "engrafted word" (James i, 21) of grace, i. e. as interposing itself, by consent of man, between him and the channels of God's grace. Its positive exercise is set forth in the parable of the wheat and the tares, represented as sowing actual seed of evil in the individual heart or the world generally; and it is to be noticed that the consideration of the true nature of the tares (*ζιζάνια*) leads to the conclusion, which is declared plainly in 2 Cor. xi, 14, viz. that evil is introduced into the heart mostly as the counterfeit of good.

This exercise of the tempter's power is possible, even against a sinless nature. We see this in the temptation of our Lord. The temptations presented to him appeal, first, to the natural desire and need of food; next, to the desire of power, to be used for good, which is inherent in the noblest minds; and, lastly, to the desire of testing and realizing God's special protection, which is the inevitable tendency of human weakness, under a real but imperfect faith. The objects contemplated involved in no case positive sinfulness; the temptation was to seek them by presumptuous or by unholy means; the answer to them (given by the Lord as the Son of Man, and therefore as one like ourselves in all the weakness and finiteness of our nature) lay in simple faith, resting upon God, and on his word, keeping to his way, and refusing to contemplate the issues of action, which belong to him alone. Such faith is a renunciation of all self-confidence, and a simple dependence on the will and on the grace of God.

But in the temptation of a fallen nature Satan has a greater power. Every sin committed makes a man the "servant of sin" for the future (John viii, 34; Rom. vi, 16); it therefore creates in the spirit of man a positive tendency to evil, which sympathizes with, and aids the temptation of the evil one. This is a fact recognised by experience; the doctrine of Scripture, inscrutably mysterious, but unmistakably declared, is that, since the fall, this evil tendency is born in man in capacity, prior to all actual sins, and capable of being brought out into active existence by such actual sins committed. It is this which Paul calls "a law," i. e. (according to his universal use of the word) an external power "of sin" over man, bringing the inner man (the *νοῦς*) into captivity (Rom. vii, 14-24). Its power is broken by the atonement and

the gift of the Spirit, but yet not completely cast out; it still "lusts against the spirit" so that men "cannot do the things which they would" (Gal. v, 17). It is to this spiritual power of evil, the tendency to falsehood, cruelty, pride, and unbelief, independently of any benefits to be derived from them, that Satan is said to appeal in tempting us. If his temptations be yielded to without repentance, it becomes the reprobate (*ἀδόκιμος*) mind, which delights in evil for its own sake (Rom. i, 28, 32), and makes men emphatically "children of the devil" (John viii, 44; Acts xiii, 10; 1 John iii, 8, 10) and "accursed" (Matt. xxv, 41), fit for "the fire prepared for the devil and his angels." If they be resisted, as by God's grace they may be resisted, then the evil power (the "flesh" or the "old man") is gradually "crucified" or "mortified" until the soul is prepared for that heaven where no evil can enter.

This twofold power of temptation is frequently referred to in Scripture as exercised chiefly by the suggestion of evil thoughts, but occasionally by the delegated power of Satan over outward circumstances. To this latter power is to be traced (as has been said) the trial of Job by temporal loss and bodily suffering (Job i, ii), the remarkable expression used by our Lord as to the woman with a "spirit of infirmity" (Luke xiii, 16), the "thorn in the flesh," which Paul calls the "messenger of Satan" to buffet him (2 Cor. xii, 7). Its language is plain, incapable of being explained as metaphor or poetical personification of an abstract principle. Its general statements are illustrated by examples of temptation. (See, besides those already mentioned, Luke xxii, 5; John xxiii, 27 [Judas]; Luke xxii, 31 [Peter]; Acts v, 3 [Ananias and Sapphira]; 1 Cor. vii, 5; 2 Cor. ii, 11; 1 Thess. iii, 5.) The subject itself is the most startling form of the mystery of evil; it is one on which, from our ignorance of the connection of the first cause with second causes in nature, and of the process of origination of human thought, experience can hardly be held to be competent either to confirm or to oppose the testimony of Scripture.

It is of no avail that there are difficulties connected with the agency ascribed to Satan. Objections are of little weight when brought against well-authenticated facts. Any objections raised against the agency of Satan are equally valid against his existence. If he exists, he must act; and if he is evil, his agency must be evil. The fact of such an agency being revealed as it is, is every way as consonant with reason and religious consciousness as are the existence and agency of good angels. Neither reason nor consciousness could by itself establish such a fact; but all the testimony they are capable of adducing is in agreement with the Scripture representation on the subject.

On the subject of dæmonical possession (q. v.) it is sufficient here to remark that although widely different in form, yet it is of the same intrinsic character as the other power of Satan, including both that external and internal influence to which reference has been made above. It is disclosed to us only in connection with the revelation of that redemption from sin which destroys it—a revelation begun in the first promise in Eden, and manifested in itself at the atonement in its effects at the great day. Its end is seen in the Apocalypse, where Satan is first "bound for a thousand years," then set free for a time for the last conflict, and finally "cast into the lake of fire and brimstone . . . for ever and ever" (xx, 2, 7-10).

V. *Traditions.*—According to the Mohammedans, who have derived their account from Jewish traditions, Satan, or, as they sometimes call him, *Eblis*, was an archangel whom God employed to destroy the Jinns or Genii, a race intermediate between men and angels, who tenanted the earth before the creation of Adam. In riches, power, and magnificence, the pre-Adamite sultans of the Jinns far surpassed any height to which monarchs of the human race have attained; but the pride with which such glories inspired them filled them with impiety, and

their monstrous crimes at length provoked the wrath of the Omnipotent. Satan was then commissioned to destroy them; he exterminated the greater part of the perfidious race, and compelled the rest to seek refuge in the caves beneath the mighty Kaf, or mountain framework which supports the universe. This victory filled Satan with pride; and when God, after the creation of Adam, required all the celestial intelligences to worship the new being, Satan and his adherents peremptorily refused, upon which he was driven from heaven, and the faithful angels threw great stones at him to accelerate his flight. Hence the common Mohammedan saying, "God preserve us from Satan who was stoned!" In revenge for this misfortune, Satan resolved to procure the expulsion of our first parents from paradise; but when he presented himself at the gate of the garden, he was refused admittance by the guard. On this he begged each of the animals, one after another, to carry him in, that he might speak to Adam and his wife; but they all refused him except the serpent, who took him between two of his teeth and thus carried him in. See D'Herbelot, *Biblioth. Orientale*, s. v. See SUPERSTITION.

VI. *Literature*.—Lists of works on this subject are given by Danz, *Theol. Wörterbuch*, s. vv. "Satan," "Teufel;" Darling, *Cyclop. Bibliogr.* col. 1384, 1680 sq.; and Malcom, *Theolog. Index*, s. v. See also Tweedie, *Satan as revealed in Scripture* (Edinb. 1862); Snopce, *Satanic Influence* (Lond. 1854); Cowan, *Idem* (ibid. 1861); and the monographs referred to under DÆMON; DEVIL; POSSESSED.

SATAN, DEPTHS OF (Rev. ii, 24), probably were the mysteries of the Nicolaitans, the Simonians, and other early Gnostics, who concealed their errors under deep abstruseness derived from wild speculations of Oriental philosophy, spoke of certain intelligences which created the world, but were in opposition to the Creator. They taught a profound knowledge of the nature of angels and their different degrees. They seem to have had secret books, written in an abstruse and mysterious style. See Gnostics.

SATAN, SYNAGOGUE OF (Rev. ii, 9, 13), probably denotes the unbelieving Jews at Smyrna, the false zealots for the law of Moses, who at the beginning were the most eager persecutors of the Christians. They were very numerous at Smyrna, where Polycarp was bishop, to whom John writes. See SMYRNA.

Satanaël, a being whom the Bogomiles (q. v.) of the 12th century regarded as the first-born son of the supreme God, who sat at the right hand of God, holding the second place after him. To each of the higher spirits they believed that God had committed a particular administration, while Satanael was placed over all his universal vicegerents; but, having apostatized, he persuaded his companions in apostasy to create a new heaven and a new earth, which should be an empire independent of the supreme God. He ruled in the world which he had created, bringing many thousands to ruin by his seductive wiles. But the good God resolved to rescue men from the dominion of Satanael and to deprive him of power. This was accomplished by the Logos, who became incarnate, or, rather, took an ethereal body, which resembled an earthly body only in its outward appearance. Satanael was deprived by Christ of his divine power, and obliged to give up the name of *El* and retain only that of *Satan*. This doctrine has a marked resemblance to that of the Euchites.

Satanámis, a Hindû sect who profess to adore the true name alone, the one God, the cause and creator of all things. They borrow their notions of creation from the Vedantic philosophy. Worldly existence is with them illusion, or the work of Maya. They acknowledge the whole of the Hindû gods, and, although they profess to worship but one God, they pay reverence to what they consider manifestations of his nature visible in the Avatars, particularly Rama and Krishna.

They use distinctive marks, and wear a double string of silk bound around the right wrist. They do not uniformly employ frontal lines, but some make a perpendicular streak with ashes of a burnt-offering to Hanuman. Their moral system approaches that of the Hindû Quietists or the Greek Stoics, consisting chiefly of a spirit of rigid indifference to the world, its pleasures and its pains, advantages and disadvantages;—and a strict adherence to all ordinary social and religious duties, combined with the calm hope of final absorption into the one spirit which pervades all things.

Satanians, a branch of the Messalians, who appeared about A.D. 390. They derived their name from the theory which they are alleged to have held, that the power of Satan over men makes it right for them to pray that he will not exercise it to their harm. This opinion seems to be the same as that on which the worship of the Yezedees (q. v.) is grounded.

Satanniâni. Heretics of this name are mentioned by the author of *Prædestinatus* as having derived their name from Satanianus, and as maintaining the opinion that the resurrection of the dead will be a restoration of bodies and souls to exactly the same condition in which they exist during the present life. This seems to be the same heresy which is numbered the *eightieth* by Philaster and the *sixty-seventh* by Augustine, and to whose adherents the name *Æternales* is given by Daneus in his tract on Augustine's treatise on heresies.

Satanow, ISAAC HA-LEVI, a Jewish writer, was a native of Satanow, in Russian Poland, where he was born in the year 1732. In 1772 he came to Berlin, where he began to issue those works for which he had prepared himself in his native place, and which have secured him a lasting memorial in Hebrew literature and Biblical exegesis. His works are, a short Hebrew grammar, entitled שפירי רננות, *The Joyful Lips* (Berl. 1773);—שפה אמה, a Hebrew dictionary in the manner of Kimchi's ס'השרשים (ibid. 1787; Prague, 1804):—דבררים אחרים, on the synonyms and homonyms of the Hebrew language (Berl. 1787; Prague, 1804):—שפה אמה, a Hebrew dictionary, also called ס'השרשים (Berl. 1787):—A Hebrew commentary on and German translation of Job (ibid. 1799). Besides these, Satanow has also written several works of gnomes and apothegms in imitation of the Psalms and Proverbs, as well as grammatical notes on all the difficult passages of the Old Test. which have not as yet been published. Satanow died in 1802. See Fürst, *Bibl. Jud.* iii, 251 sq.; Delitzsch, *Zur Geschichte d. jüdischen Poesie*, p. 115 sq.; Jost, *Gesch. d. Judenth. u. s. Secten*, iii, 398, etc.; Kitto, *Cyclop.* s. v.; Etheridge, *Introduct. to Hebrew Lit.* p. 395; Grätz, *Gesch. d. Juden*, xi, 132 sq.; Steinschneider, *Bibliograph. Handb.* p. 124; *Catalogus Libr. Hebr. in Biblioth. Bodl.* p. 2502. (B. P.)

Satervis, in Persian mythology, is a prince of the stars and good genius who protects the region of the west, and is a leader in the contest with Ahriman. He raises the water from the sea and spreads it over the land in the form of rain.

Sathrabuza'nès (Σαθραβουζάνης), a Græcized form (1 Eedr. vi, 3, 7, 27 [vii, 1]) of the Chaldee name (Ezra v, 3, 6; vi, 6, 13) SHETHAR-BOZNAI (q. v.).

Satisfaction (expressed in Hebrew by מַלֵּא, *to fill*; מַשְׂבֵּר, *to satiate*; and נָתַן, *to glut*; in Greek [according to the A. V.] by less distinctive terms, χορραΐω, *to fodder*; once [Col. ii, 23] πλησμονή, *satiety*), in general, signifies the act of giving complete or perfect pleasure. In the Christian system it denotes that which Christ did and suffered in order to satisfy divine justice, to secure the honors of the divine government, and thereby make an atonement for the sins of his people (Heb.

כַּפַּר, to atone for). This use of the word *satisfaction* is taken from the sense of the word in the Roman law, viz. contenting an aggrieved person by some consideration consistent with a remission of the debt or offence for which the satisfaction is offered. The death of Christ as an expiatory sacrifice was the satisfaction for the sins of the world (1 John ii, 2; Rom. v, 11). Satisfaction is, in fact, propitiation and atonement. Christ's satisfaction is vicarious and expiatory, being made for us and instead of us or our act, we having ourselves no power of offering satisfaction to the offended majesty of heaven. Satisfaction is distinguished from merit thus: The satisfaction of Christ consists in his answering the demands of the law on man, which were consequent on the breach of it. These were answered by suffering its penalty. The merit of Christ consists in what he did to fulfil what the law demanded before man sinned, which was obedience. The satisfaction of Christ is to free us from misery, and the merit of Christ is to procure happiness for us. See Owen, *On the Satisfaction of Christ*; Gill, *Body of Div. s. v.*; Stillington, *On Satisfaction*; Watts, *Redeemer and Sanctifier*, p. 28, 32; Hervey, *Theron and Aspasio*. See ATONEMENT; PROPITIATION.

SATISFACTION, ROMISH. The catechism of the Council of Trent defines "satisfaction" as "the compensation made by man to God by doing something in atonement for the sins which he has committed." The satisfaction which Christ makes on the cross, it is declared, "gives to man's actions merit before God." "Canonical satisfaction" is something—prayer, fasting, or alms-deeds—"which is imposed by the priest, and must be accompanied with a deliberate and firm purpose carefully to avoid sin for the future." This satisfaction is directed by the Council of Trent to be proportioned to the nature of the offence and the capability of the offender. It directly opposes the doctrine of justification by faith only, and is closely connected with the Romish notion of the merits of good works. See Penance.

Satnius, in Greek mythology, was a son of Enops and the naiad or nymph of the stream Satniois. He was slain by Ajax, the son of Oileus.

Satrap (Heb. *achashdarpēn*, אַחַשְׁדָּרְפֵּן; Sept. *σατραπης* and *σαραπηός*; Vulg. *satrapes*; A. V. "ruler of provinces;" Esth. iii, 12; viii, 9; ix, 3; and with the Chaldee termination, Dan. iii, 2, 3, 27; vi, 2, 3). The genuine form of this name has been found in Indian inscriptions to be *ksatrapa*, i. e. *warrior of the host* (see Benfey, in *Gött. Gel. Anz.* 1839, p. 805 sq.; Lassen, *Zeitschrift f. d. Morgenl.* iii, 161), to which the Greek *ἑξαρχαίας* or *ἑξαπάτης* corresponds (Böckh, *Corp. Inscr.* No. 2691 c), from which the softer form *satrapes* gradually arose and passed into modern languages (Gesenius, *Thesaur.* s. v.). "These satraps are known in ancient history as the governors or viceroys of the provinces into which the Persian empire was divided. Strictly speaking, they had an extended civil jurisdiction over several smaller provinces, each of which had its own **פַּהַל**, or governor. Thus Zerubbabel and Nehemiah were 'governors' of Judea under the Persian satraps of Syria (Ezra iv, 3, 6; Neh. ii, 9). The power and functions of the Persian satraps were not materially different from those of the modern Persian governors and Turkish pashas; and, indeed, the idea of provincial government by means of viceroys intrusted with almost regal powers in their several jurisdictions, and responsible only to the king, by whom they are appointed, has always been prevalent in the East. The important peculiarity and distinction in the ancient Persian government, as admirably shown by Heeren (*Researches*, i, 489 sq.), was that the civil and military powers were carefully separated—the satrap being a very powerful civil and political chief, but having no immediate control over the troops and garrisons, the commanders of which were re-

sponsible only to the king. The satraps, in their several provinces, employed themselves in the maintenance of order and the regulation of affairs; and they also collected and remitted to the court the stipulated tribute, clear of all charges for local government and for the maintenance of the troops (Xenoph. *Cyrop.* viii, 6, § 1-3). In later times this prudent separation of powers became neglected in favor of royal princes and other great persons (Xenoph. *Anab.* i, 1, § 2), who were intrusted with the military as well as civil power in their governments—to which cause may be attributed the revolt of the younger Cyrus, and the other rebellions and civil wars, which, by weakening the empire, facilitated its ultimate subjugation by Alexander." See PERSIA.

Satrāpēs, in Greek mythology, was a name under which a bronze statue was erected to Neptune, first at Samicum, and afterwards in Elis, which was constantly covered with a robe of woollen, another of linen, and a third of byssus.

Satshi, in Hindû mythology, was the wife of the sun-god Indra.

Satterlee, ALFRED BROWN, a Baptist missionary, was born at Sheldon, N. Y., Oct. 26, 1823, and was a graduate of Brown University, in the class of 1852. He pursued his theological studies at the Rochester Theological Seminary, and received his appointment as a missionary of the American Baptist Missionary Union in 1853, and was set apart for the Arracan mission. He reached the field of his labors, Akyab, in Sept., 1855. He was not permitted to perform much service for his Master. At the early age of thirty-two he died of the cholera, July 1, 1856. (J. C. S.)

Satterpai, in Persian mythology, is the heaven of the fixed stars supposed to be situated below the heaven of the moon, and presided over by twelve genii of the twelve signs of the zodiac.

Sattiwodi, in Hindû mythology, is a daughter of the king Dassarayen, who was first married to Paras-en and afterwards to Sandanen.

Saturday (*Saturn's day*) was, next to the Lord's day, held by the ancient Christians in great veneration, and, especially in the Eastern parts, honored with all the public solemnities of religion. This observance of the day was, doubtless, out of respect to the feelings of the Jews, who were generally the first converts to the Christian faith, and who still retained great reverence for the Sabbath. The Western Church regarded it as a fast, but the Greek Church observed it as a festival, one Sabbath (Saturday) only excepted. This was called the Great Sabbath, between Good-Friday and Easter-day, when our Saviour lay buried, upon which account it was kept as a fast throughout the whole Church. Athanasius (*Hom. de Semete*, tom. i, p. 1060) tells us that they assembled on Saturdays—not that they were infected with Judaism, but only to worship Jesus Christ, the Lord of the Sabbath. So far as concerns public worship, Saturday was made in all things conformable to that of the Lord's day. The Scriptures were read, as on the Lord's day, sermons preached, and the communion administered. A preference, however, was given to the Lord's day, for there were no laws forbidding lawsuits, pleadings, public shows, and games on that day. Nor were men obliged to abstain wholly from bodily labor, but, on the contrary, the Council of Laodicea (August. *Ep.* 118) has a canon forbidding Christians to Judaize, or rest on the Sabbath, any further than was necessary for public worship. The reason for the Latin Church keeping Saturday as a fast is given by pope Innocent in his epistle to the bishop of Eugubium: "If we commemorate Christ's resurrection not only at Easter, but every Lord's day, and fast upon Friday because it was the day of his passion, we ought not to pass by Saturday, which is the middle-time between the days of grief and joy." He therefore concludes that Saturday ought to be kept as a fast (*Innocent. Ep. ad Decimum Eugubini*, c. 4). This

was the general practice, and yet in Italy itself it was otherwise at Milan, where Saturday was a festival. The Saturdays in Ember weeks are called "in XII Lections," from the six Gospels read both in Latin and Greek. See Bingham, *Antiq. of the Christ. Church*, p. 1137 sq.; Riddle, *Christ. Antiq.* p. 652 sq.; Walcott, *Sacred Archaeol.* s. v.

Saturn, or **Kronos**, was a principal deity in Greek and Roman mythology. The old Italic Saturn, whose name indicates that he was a god of harvests, and the old Grecian Kronos, a thoroughly symbolic being, which, like his brothers, the Titans, is suggestive of the primeval and uniform forces of nature, and has a probable though partial connection with the Phœnician Moloch (q. v.), are deities of two religions which often diverge from each other; and a modern learned mythology, which everywhere intermixes Greek and Roman elements, has met with but indifferent success in the endeavor to combine the two gods into one. Kronos, the son of Uranus and Gæa, was the most cunning of the Titans. His mother had given birth to the Centimani and the Cyclops, and Uranus had confined them in the underworld on account of their monstrous shapes and strength. Enraged by this action, Gæa proposed to her younger children to avenge their brothers; but they all shrank from laying violent hands on their father, with the exception of Kronos, who hid himself, and at night emasculated Uranus and threw the generative organs down upon the earth, thereby fructifying it. Kronos then married the Titaness Rhea, from whom sprang the entire race of the gods who ruled the world. To avoid a prophecy by his parents which foretold that one of his children should dethrone him, he swallowed all his children immediately after their birth, excepting Jupiter, whom Rhea saved by giving Kronos a stone wrapped in cloths instead. The child grew rapidly, and attained in a single year to extraordinary size and strength. Metis (cunning) now gave him an emetic, which he administered to Kronos, with the result that he cast up all the children he had swallowed, together with the stone. The latter was placed for a memorial at the foot of Mount Parnassus, and Jupiter conspired with his brothers and sisters to dethrone their father, whom he mutilated as Uranus had been; but when he sought to secure the throne for himself the Titans resisted, with the result that after ten years' war Jupiter released the Centimani and the Cyclops, and with their aid overcame the Titans, whom he imprisoned in the dungeon where the Cyclops had lain. The division of authority was then determined among the Kronidæ by lot, Pluto receiving the earth, Neptune the sea, and Jupiter the heavens and supreme authority over all. The dethroned Kronos or Saturn, it is said, now fled to Italy and inaugurated the golden age. Men lived, like the gods, without care, in uninterrupted happiness, health, and strength; they did not grow old; and to them death was a slumber which relieved them of their present nature and transformed them into dæmons. The earth yielded every kind of fruit, and gave up all its treasures without cultivation and labor. Under the reign of Saturn men lived the life of paradise. To keep alive the recollection of this primitive life of innocence, freedom, and equality, the festival of the Saturnalia was instituted at Rome, which began on Dec. 17, and continued, first a single day, but afterwards for longer periods, until in the time of the emperors it extended over an entire week. During its continuance all business was interrupted; all distinctions between masters and slaves were laid aside, so that slaves sat at the sumptuous table and masters waited on them, and every form of recreation was allowed. In Greece Kronos or Saturn possessed temples of extremely ancient date. His temple at Rome stood at the foot of the Capitol, and served as an archive of the State and also as its treasury. The god is usually represented as bearing a sickle. The scythe, wings, and hour-glass, which are likewise often in-

troduced in such representations, are added notions of more recent date, and resulted from a change in the mode of conceiving of the god. The Persians gave this deity an almost wholly animal representation: the lower parts of the body resemble those of swine, a human body with arms is added, and an animal head with crown completes the figure.

Figure of Saturn.

Saturn, the planet, seems to be named as an object of worship in Amos v, 26, under the title *Kiyun'*, קִיּוּן, where it is said of the Israelites in the wilderness, "Ye have borne the tabernacle of your Moloch and *Chizun*, your images," etc.; for a similar word is the name of this star in both Syriac and Arabic (comp. Aben-Ezra, *ad loc.*), and it is known that the ancient Arabians strove to propitiate Saturn as a star of evil influence (see Pococke, *Spec. Hist. Arab.* p. 103, 120, ed. nov.; comp. Norberg, *Onomast. Cod. Nas.* p. 78 sq.; Ephrem Syr. *Opp.* ii, 458; Propert. iv, 1, 104; Lucan, i, 652; Juvenal, vi, 569). On account of its distance from the sun it was considered by the ancient astronomers as having a cold nature (Pliny, ii, 6, p. 75 ed. Hard.), and they ascribed to it heavy storms of rain (*ibid.* ii, 39; see Harduin, *ad loc.*; see also, on its evil influence, Macrobius, *Saturn*, i, 19, p. 95, 97 Bip.; see also MOLOCH). The Sept. has 'Pau-phân'; comp. Acts vii, 43, where the MSS. vary much (see Griesb. *ad loc.*; comp. O. Müller, in the *Bibl. Lubec.* vii, 469 sq.), but the best read 'Pηphân'. This is a Coptic word, as Kircher has shown from an Arabico-Coptic inscription (*Ling. Æg. Restit.* p. 49; *Ædip. Æg.* p. 1, 386 sq.). Seyffarth would derive it from *Pe*, to make or be, and *ovoeiv*, light, i. e. shining (comp. Tatius Isag. in *Arati Phæn.* c. 17). Jablonski, however (*Remph. Ægypt. Deus* [Frankfort and Leips. 1731], also in his *Opusc.* ii, 1 sq., and in *Ugolini Thesaur.* xxiii), would deny that this and the other names of planets associated with it in the inscription are Egyptian, and renders the word as Ethiopic, *king of heaven*, i. e. *sun* (comp. *Opusc.* i, 230 sq.), from *ro*, "king," and *phēh*, "heaven." [Hence the true reading would be 'Popphâ.'] Then we must understand the passage in Amos to refer to the worship of Osiris. But there is little evidence for the reading with μ . Ign. Rossi (*Etymol. Ægypt.* [Rome, 1808] p. 176) explains 'Pēphâ as meaning *inhabitant of heaven*, from *phēh*, "heaven," and *rem*, "inhabitant" (comp. Coptic version of 1 Cor. xv, 48 sq.). But this is not striking. More recently, Hengstenberg agrees with Jablonski in re-

jecting all glosses, and has returned to the old view that 'Πηδάν is the mistake of a scribe for *Kiyun*, or *Riyun* (*Authent. des Pentat.* i, 110 sq.); yet this seems too hasty; and Kircher's view is supported by some well acquainted with the Coptic, and is defended by Baur (*Comment. ad loc.*) and Winer, who considers the rendering of Hengstenberg (*Gestell eurer Bilder*, i. e. *the frame or support of your images*) as without force, though Hitzig and Ewald adopt it. Gesenius (*Thesaur.* ii, 669 sq.) renders *statuam idolorum vestrorum*, i. e. *statue of your idols*, which is without good reason. (Comp., in gen., Braun, *Selecta Sacra*, p. 477 sq.; Maius and Schwab, in Ugolini *Thesaur.* xxiii [but these are unimportant]; Schröder, *De Tabernac. Mol. et Stella Dei Rempha* [Marb. 1745].) Rosenmüller denies that the Sept. renders *Kiyun* by 'Πηδάν, but refers it as a word of explanation to *elohékem*, אֱלֹהֵיכֶם, *your gods*. But this is with little reason. An attempt has been made to connect Saturn with the Jewish Sabbath, as the *day of Saturn*. See, *contra*, Bähr, *Symbol.* ii, 584. Wolff's *Diss. l. de Chiun et Remph.* (Leips. 1741) is unimportant. See CHIUN.

Saturnalia, the festival of Saturnus, to whom the people of Latium attributed the introduction of agriculture and the arts of civilized life. It was kept towards the end of December, as a sort of harvest-home, during which business was suspended; courts and schools were closed; no war was commenced or malefactor punished; slaves were relieved from ordinary labor, and, dressed in their masters' clothes, were waited upon by them at the table. Saturnus being an ancient national god of Latium, the institution of the Saturnalia is lost in the most remote antiquity. One legend ascribes it to Janus, another (by Varro) to the Pelasgi, while a third tradition represented certain followers of Hercules, whom he had left behind on his return to Greece, as the authors of the festival. At first only one day was set apart for the sacred rites of Saturnus, but additions were gradually made until it occupied seven days. In reality, during the empire, three different festivals were celebrated. First came the *Saturnalia* proper, commencing on XVI Kal. Dec., followed by the *Opalia*, anciently coincident with the *Sigillaria*, so called from little earthenware figures (*sigilla oscilla*) exposed for sale at this season.

Saturnia and **Saturninus**, in Greek mythology, were appellatives of *Juno* and *Jupiter*, derived from their father Saturn.

Saturninians, **Saturnians**, or **Saturnines**, an early sect of Syrian Gnostics, followers of Saturninus (q. v.) or Saturnilus. The theories of Saturninus are only known through the work of Irenæus *Against Heresies*. In this he states that Saturninus, like Menander, taught that there is one supreme Unknown, the Father (Πατήρ ἄγνωστος). The Father, he taught, was without origin, bodiless and formless, and never had in reality appeared to men; the God of the Jews was only an angel. A number of spiritual beings were created by him in successive gradations, in the lowest of which came the spirits of the seven planets. These seven, of whom the God of the Jews was chief, created the world, man, and all things. They had not power to make man an erect being, and so he continued to crawl upon the earth like a worm until the Supreme sent forth a spark of life, which gave him an erect posture, compacted his joints, and made him to live. Man now for the first time becomes possessed of a soul, and the godlike germ is destined to unfold itself in those human natures where it has been implanted, to distinct personality, and to return after a determinate period to the original Fountain of Life. Saturninus taught that the Saviour, whom he calls *Æon*, νοῦς, came to destroy the Demiurge, who was the God of the Jews; that he was without birth, without body, without figure, and only in appearance a man. He accounted for the existence of good and evil men by affirming that they were originally created of

two kinds, the one good, whom Christ came to save, the other wicked, whom the devils succor, and whom Christ will destroy. The Saturninians considered marriage to be of Satan; they abstained from animal food, and taught that some prophecies came from the spirits who made the world, and some from Satan. Their doctrines led to a strict asceticism, and also to the celibacy of following times; they were based on dualism, and resembled those of the Docetæ. As these heretics are not mentioned by St. Clement of Alexandria, it is probable that they were not much known out of Syria, and that they were few in number. See Blunt, *Hist. of Sects*, s. v.; Gardner, *Faiths of the World*, s. v.; Ueberweg, *Hist. of Philos.* i, 280 sq.

Saturninus, a native of Antioch, in Syria, and a disciple of Menander. He was founder of a sect of Gnostics, called after him *Saturninians* (q. v.). He flourished A.D. 117–138.

Saturninus, a Christian martyr under Diocletian, was a priest of Albitina, in Africa, who, having been informed against for officiating in his clerical capacity, was apprehended and sent to Carthage to be examined before Amelinus. On his examination, Saturninus vindicated the Christian religion with great eloquence. By command of the proconsul he was tortured and remanded to prison, where he died of starvation, about A.D. 305. See Fox, *Book of Martyrs*, p. 48.

Satyr, the rendering in Isa. xiii, 21; xxxiv, 14, of the Heb. word שַׁיִר, *sair*, which properly means *hair*; hence a *goat*, especially a *he-goat* (comp. Lat. *hircus*, from *hirsutus*, *hirtus*), and is so rendered in Lev. iv, 24; 2 Chron. xxix, 23, and often. The Sept. has, in the passages in Isaiah, δαίμόνιον, *dæmon*; and so the Eng. A. V., in 2 Chron. xi, 15, "devil." These beings are mentioned in Isaiah as the inhabitants of desert places, but particularly the ruins of Babylon and Petra, where they dance and call to each other. The Greeks probably derived their belief in the existence of beings half men and half goats from the Eastern nations, whose mythology abounds with such fabulous animals, but there is no reason to believe that they formed any part of the Jewish superstitions. Yet it has been supposed by some that Isaiah alludes to the spectral beings which the ancient Persians, the Jews, and the Mohammedans believe to haunt the ruins of Babylon. See SUPERSTITION. But in those passages where the prophet predicts the desolation of Babylon, there is probably no allusion to any species of goat, whether wild or tame. According to the old versions, and nearly all the commentators, our own translation is correct, and satyrs—that is, *dæmons* of woods and desert places, half men and half goats—are intended. Comp. Jerome (*Comment. ad Isa. xiii*): "Seirim vel incubones vel satyros vel sylvestres quosdam homines quos nonnulli fatuos ficarios vocant, aut dæmonum genera intelligunt." This explanation receives confirmation from a passage in Lev. xvii, 7, "They shall no more offer their sacrifices unto *seirim*," and

Cynocephalus (from the Egyptian monuments).

from a similar one in 2 Chron. xi, 15. The Israelites, it is probable, had become acquainted with a form of goat-worship from the Egyptians (see Bochart, *Hieroz.* iii, 825; Jablonski, *Pant. Egypt.* i, 273 sq.). The opinion held by Michaelis (*Supp.* p. 2342) and Lichtenstein (*Commentat. de Simiarum*, etc. § 4, p. 50 sq.), that the *seirim* probably denote some species of ape, has been sanctioned by some modern scientists from a few passages in Pliny (*Hist. Nat.* v, 8; vii, 2; viii, 54). See APE. That some species of *cynocephalus* (dog-faced baboon) was an animal that entered into the theology of the ancient Egyptians is evident from the monuments and from what Horapollo (i, 14-16) has told us. The other explanation, however, has the sanction of Gesenius, Bochart, Rosenmüller, Parkhurst, Maurer, Fürst, and others. As to the "dancing" satyrs, comp. Virgil, *Ecl.* v, 73. See GOAT.

Satyrs, in Greek mythology, were daemonic companions of Bacchus, who represented the unrestrained and luxurious life in the Bacchic circle. They are not mentioned in Homer, and Hesiod does not describe their form, though he speaks of them as a useless race having no adaptability to labor. Later writers furnish a description about as follows: Bristly hair, a short, thick, and turned-up nose, pointed ears, the neck often marked with small lumps resembling horns, a horse-tail, sometimes a goat-tail over the coccyx. The endowment of these beings with horns and goats' feet was a misconception of later days by which they were identified with pans, panics, and fauns. The satyrs were said to be sons of Mercury and Iphthime, or of the naiads. The oldest and most prominent of them was named Silenus, and the older satyrs are called *Sileni* collectively. Marseyas, too, was a satyr. In substance, the satyrs were companions of Bacchus; they were excessively fond of wine, and are accordingly represented as drinking, as reeling with the *thyrsus*, as overcome with sleep, as wine-pressers, or as playing on the flute or cymbal. Their attributes were the flute, the *thyrsus* staff, pandean pipes, the shepherd's staff, drinking-vessels, and bottles. They were clothed in skins of beasts and crowned with vine-branches, ivy, and pine-twigs. They have frequently been the subject of artistic representation, and always in company with Bacchus. The Latin word *satira* (a satire), originally *saturna*, has not the remotest connection with the Greek *Satyr*i, and should not be in any way referred to them.

Sauces, a Coptic name, according to Jerome, given to the Cœnobites, as distinct from the Anchores. The name is sometimes Anglicized *Sauces*. See Bingham, *Antiq. of the Christ. Church*, i, 243.

Sauches. See SAUCES.

Saukwimir, in Norse mythology, was one of the strongest jots, or giants. Odin slew his son, and at a subsequent visit to the jots narrated that he had killed the son of a giant and afterwards enjoyed the hospitality of the father, without having discovered his true character, or even having excited the suspicions of his host.—Vollmer, *Wörterb. d. Mythol.* s. v.

Saumur, a Protestant theological seminary, located in a town of the same name, in the department of the Maine-et-Loire. It was suppressed in 1685, but during its continuance exerted considerable influence upon Protestant thought in France. Its tendency was towards Arminianism. See Hagenbach, *Hist. of Doctrines*, § 222, n. 15, 225, 225 a, 247.

Saul (Heb. *Shaul'*, שָׁאֹל, *desired*; Sept. and New Test. *Σαουλ*; Josephus, *Σάουλ*), the name of several men, the following three of whom are thus known in the A. V. For the others see SHAUL.

1. An early king of the Edomites, successor of Samlah at Rehoboth (Gen. xxxvi, 37, 38), elsewhere called "Shaul" (1 Chron. i, 48, 49). B.C. post 1618.

2. The first king of Israel (B.C. 1093-1053). As such

his career possesses a peculiar interest in the history and relations of the chosen people.

I. *The Name*.—This first becomes prominent here in the history of Israel, though found before in the Edomitic prince already mentioned, and in a son of Simeon (Gen. xlii, 10; A. V. "Shaul"). It also occurs among the Kohathites in the genealogy of Samuel (1 Chron. vi, 24, "Shaul"), and in Saul, like the king, of the tribe of Benjamin, better known as the apostle Paul (see below). Josephus (*War*, ii, 18, 4) mentions a Saul, father of one Simon who distinguished himself at Scythopolis in the early part of the Jewish war. The name in its application to the present character seems almost like a mockery of his history.

II. *His Family*.—On the following page is a general view of Saul's pedigree.

In this genealogy may be observed—1. The repetition in two generations of the names of Kish and Ner, of Nadab and Abi-nadab, and of Mephibosheth. 2. The occurrence of the name of Baal in three successive generations; possibly in four, as there were two Mephibosheths. 3. The constant shiftings of the names of God, as incorporated in the proper names: (a) *Ab-iel*=*Jehiel*; (b) *Malchi-shua*=*Je-shua*; (c) *Esh-baal*=*Ish-bosheth*; (d) *Mephi-* (or *Meri-*) *baal*=*Mephi-bosheth*. 4. The long continuance of the family down to the times of Ezra. 5. Is it possible that Zimri (1 Chron. ix, 42) can be the usurper of 1 Kings xvi—if so, the last attempt of the house of Saul to regain its ascendancy? The time would agree.

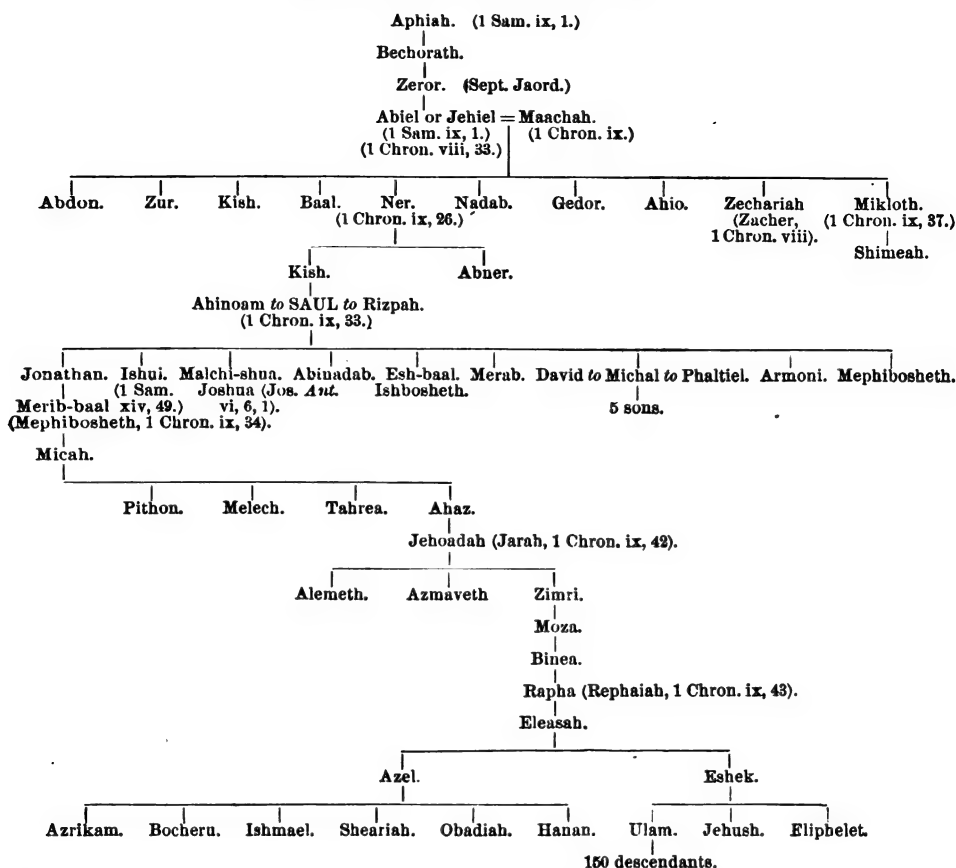

There is a disagreement between the pedigree in 1 Sam. ix, 1 and xiv, 51, which represents Saul and Abner as the grandsons of Abiel, and 1 Chron. viii, 33 and ix, 39, which represents them as his great-grandsons. If we adopt the more elaborate pedigree in the Chronicles, we must suppose either that a link has been dropped between Abiel and Kish, in 1 Sam. ix, 1, or that the elder Kish, the son of Abiel (1 Chron. ix, 36), has been confounded with the younger Kish, the son of Ner (1 Chron. ix, 39). The pedigree in 1 Chron. viii is not free from confusion, as it omits among the sons of Abiel, Ner, who in 1 Chron. ix, 36 is the fifth son, and who in both is made the father of Kish. See ABIEL.

Saul's more particular genealogy and lineage (so far as given) is as follows:

III. *Saul's History*.—1. *Up to his Coronation*.—The birthplace of Saul is not expressly mentioned; but as Zelah was the place of Kish's sepulchre (2 Sam. xxi), it was probably his native village. There is no warrant for saying that it was Gibeah, though, from its subsequent connection with him, it is called often "Gib-

GENERAL VIEW OF SAUL'S LINEAGE.

eah of Saul." See GIBEAH. (When Abiel, or Jehiel [1 Chron. viii, 29; ix, 35], is called the father of "Gibeon," it probably means founder of Gibeah.)

His father, Kish, was a powerful and wealthy chief, though the family to which he belonged was of little importance (1 Sam. ix, 1, 21). A portion of his property consisted of a drove of asses. In search of these asses, gone astray on the mountains, he sent his son Saul, accompanied by a servant (שֶׂפֶל) who acted also as a guide and assistant of the young man (ver. 3-10). After a three days' journey (ver. 20), which it has hitherto proved impossible to track with certainty [see RAMAH], through Ephraim and Benjamin [see SHALIM; SHALISHA; ZUPH], they arrived at the foot of a hill surrounded by a town, when Saul proposed to return home, but was deterred by the advice of the servant, who suggested that before doing so they should consult "a man of God," "a seer," as to the fate of the asses, securing his oracle by a present (*backshish*) of a quarter of a silver shekel. They were instructed by the maidens at the well outside the city to catch the seer as he came out of the city to ascend to a sacred eminence, where a sacrificial feast was waiting for his benediction (1 Sam. ix, 11-13). At the gate they met the seer for the first time—it was Samuel. A divine intimation had indicated to him the approach and the future destiny of the youthful Benjamite. Surprised at his language, but still obeying his call, they ascended to the high place, and in the inn or caravansary at the top (Sept. *ῥο καράλυμα*, ver. 27) found thirty or (Sept. and Josephus, *Ant.* vi, 4, 1) seventy guests assembled, among whom they took the chief place. In anticipation of some distinguished stranger, Samuel had bidden the

cook reserve a boiled shoulder, from which Saul, as the chief guest, was bidden to tear off the first morsel (Sept. 1 Sam. ix, 22-24). They then descended to the city, and a bed was prepared for Saul on the housetop. At day-break Samuel roused him. They descended again to the skirts of the town, and there (the servant having left them) Samuel poured over Saul's head the consecrated oil, and with a kiss of salutation announced to him that he was to be the ruler and (Sept.) deliverer of the nation (ix, 25-x, 1). From that moment, as he turned on Samuel the huge shoulder which towered above all the rest (Sept. x, 9), a new life dawned upon him. He returned by a route which, like that of his search, it is impossible to make out distinctly; and at every step homeward it was confirmed by the incidents which, according to Samuel's prediction, awaited him (x, 9, 10). At Rachel's sepulchre he met two men, who announced to him the recovery of the asses—his lower cares were to cease. At the oak of Tabor [see PLAIN; TABOR] he met three men carrying gifts of kids and bread and a skin of wine, as an offering to Bethel. Two of the loaves were offered to him as if to indicate his new dignity. At "the hill of God" (whatever may be meant thereby, possibly his own city, Gibeah) he met a band of prophets descending with musical instruments, and he caught the inspiration from them as a sign of his new life (Ewald, iii, 28-30).

This is what may be called the private, inner view of his call. The outer call, which is related independently of the other, was as follows. An assembly was convened by Samuel at Mizpeh, and lots (so often practised at that time, see Aristot. *Polit.* vi, 11; Virgil, *Æn.* ii) were cast to find the tribe and the family which was

to produce the king. Saul was named, and, by a divine intimation, found hidden in the circle of baggage which surrounded the encampment (1 Sam. x, 17-24). His stature at once conciliated the public feeling, and for the first time the shout was raised, afterwards so often repeated in modern times, "Long live the king!" (ver. 23, 24) and he returned to his own Gibeah, accompanied by the fighting part (לְחִימָה) of the people, of whom he was now to be the especial head. The murmurs of the worthless part of the community who refused to salute him with the accustomed presents were soon dispelled by an occasion arising to justify the selection of Saul. The words which close 1 Sam. x, 27 are, in the Hebrew text, "he was as though he were deaf;" in Josephus, *Ant.* vi, 5, 1, and the Sept. (followed by Ewald), "and it came to pass after a month that . . ."

The corrupt administration of justice by Samuel's sons furnished an occasion to the Hebrews for rejecting that theocracy of which they neither appreciated the value, nor, through their unfaithfulness to it, enjoyed the full advantages (1 Sam. viii). The prospect of the event related below seems also to have conspired with the cause just mentioned and with a love of novelty in prompting the demand for a king (xii, 12)—an officer evidently alien to the genius of the theocracy, though contemplated as a historical certainty, and provided for by the Jewish lawgiver (ver. 17-20; Deut. xvii, 14-20; on which see Grotius's note; also *De Jure Belli*, etc. i, 4, 6, with the remarks of Gronovius, who [as Pufendorf also does] controverts the views of Grotius). An explanation of the nature of this request, as not only an instance of ingratitude to Samuel, but of rebellion against Jehovah, and the delineation of the manner in which their kings—notwithstanding the restrictions prescribed in the law—might be expected to conduct themselves (לְחִימָה וְשִׁשְׁמִי, Sept. *δικαίωμα τοῦ βασιλέως*; 1 Sam. viii, 11; x, 25), failed to move the people from their resolution. See SAMUEL. Both previously to that election (ver. 16), and subsequently, when insulted by the worthless portion of the Israelites, he showed that modesty, humility, and forbearance which seem to have characterized him till corrupted by the possession of power. The person thus set apart to discharge the royal function possessed, at least, those corporal advantages which most ancient nations desiderated in their sovereigns—what Euripides calls the *worthy form of royalty*. His person was tall and commanding, and he soon showed that his courage was not inferior to his strength (ix, 1; x, 23). His belonging to Benjamin also, the smallest of the tribes, though of distinguished bravery, prevented the mutual jealousy with which either of the two great tribes, Judah and Ephraim, would have regarded a king chosen from the other.

2. *Confirmation of Saul's Appointment.*—He was (having, apparently, returned to his private life) on his way home, driving his herd of oxen, when he heard one of those wild lamentations in the city of Gibeah, such as mark in Eastern towns the arrival of a great calamity. It was the tidings of the threat issued by Nahash, king of Ammon, against Jabesh-gilead. See AMMON. For, in the meantime, the Ammonites, whose invasion had hastened the appointment of a king, having besieged Jabesh in Gilead, and Nahash their king having proposed insulting conditions to them, the elders of that town, apparently not aware of Saul's election (1 Sam. xi, 3), sent messengers through the land imploring help. The inhabitants of Jabesh were connected with Benjamin by the old adventure recorded in Judg. xxi. It was as if this one spark was needed to awaken the dormant spirit of the king. "The Spirit of the Lord came upon him," as on the ancient judges. The shy, retiring nature which we have observed vanished never to return. In this emergency, he had recourse to the expedient of the earlier days

by the message of the flesh of two of the oxen from the herd which he was driving. Saul thus acted with wisdom and promptitude, summoning the people, *en masse*, to meet him at Bezek; and having, at the head of a vast multitude, totally routed the Ammonites (ver. 11) and obtained a higher glory by exhibiting a new instance of clemency, whether dictated by principle or policy—"Novum imperium inchoantibus utilis clementiæ fama" (Tacitus, *Hist.* iv, 63), "For lowliness is young ambition's ladder"—he and the people betook themselves, under the direction of Samuel, to Gilgal, there with solemn sacrifices to reinstall the victorious leader in his kingdom (1 Sam. xi). If the number set down in the Hebrew text of those who followed Saul (ver. 8) can be depended on (the Sept. more than doubles them, and Josephus outgoes even the Sept.), it would appear that the tribe of Judah was dissatisfied with Saul's election, for the soldiers furnished by the other tribes were 300,000, while Judah sent only 30,000; whereas the population of the former, compared with that of Judah, appears, from other passages, to have been as about five to three (2 Kings xxiv, 9). Yet it is strange that this remissness is neither punished (1 Sam. xi, 7) nor noticed. At Gilgal Saul was publicly anointed and solemnly installed in the kingdom by Samuel, who took occasion to vindicate the purity of his own administration—which he virtually transferred to Saul—to censure the people for their ingratitude and impiety, and to warn both them and Saul of the danger of disobedience to the commands of Jehovah (ch. xii). The effect of this military success was instantaneous on the people; the punishment of the murmurers was demanded, but refused by Saul, and the monarchy was inaugurated anew (xi, 1-15). It should be observed, however, that, according to 1 Sam. xii, 12, the affair of Nahash preceded and occasioned the election of Saul. He became king of Israel. But he still so far resembles the earlier judges as to be virtually king only of his own tribe, Benjamin, or of the immediate neighborhood. Almost all his exploits are confined to this circle of territory or associations.

These were the principal transactions that occurred during the first decade of Saul's reign (which we venture to assign as the meaning of the first clause of ch. xiii—"the son of a year was Saul in his reigning;" the emendation of Origen, "Saul was thirty years old," being required by the chronology, for he seems, at the next event, to have been forty years old); and the subsequent events happened in the second decade, which may be the meaning of the latter clause.

3. *Saul's First Trial and Transgression.*—Samuel, who had up to this time been still named as ruler with Saul (1 Sam. xi, 7, 12, 14), now withdrew, and Saul became the acknowledged chief. The restrictions on which he held the sovereignty had (x, 25) been fully explained as well to Saul as to the people, so that he was not ignorant of his true position as merely the lieutenant of Jehovah, king of Israel, who not only gave all the laws, but whose will, in the execution of them, was constantly to be consulted and complied with. The first occasion on which his obedience to this constitution was put to the test brought out those defects in his character which showed his unfitness for his high office, and incurred a threat of that rejection which his subsequent conduct confirmed (xiii, 13). Saul could not understand his proper position, as only the servant of Jehovah speaking through his ministers, or confine himself to it; and in this respect he was not, what David with many individual and private faults and crimes was—a man after God's own heart, a king faithful to the principles of the theocracy.

In the twentieth year of his reign (as the age of Jonathan evidently requires; the text being corrupt; see Keil, *ad loc.*) Saul began to organize an attempt to shake off the Philistine yoke which pressed on his country; not least on his own tribe, where a Philistine officer had long been stationed even in his own field (1

Sam. x, 5; xiii, 3). Having collected a small standing army, part of which, under Jonathan, had taken a fort (or slain the officer) of the Philistines, Saul summoned the people to withstand the forces which their oppressors, now alarmed for their dominion, would, upon this signal, naturally assemble. But so numerous a host came against Saul that the people, panic-stricken, fled to rocks and caverns for safety—years of servitude having extinguished their courage, which the want of arms, of which the policy of the Philistines had deprived them, still further diminished. The number of chariots, 30,000, seems a mistake; unless we suppose, with Le Clerc, that they were not war-chariots, but baggage-wagons (an improbable supposition), so that 3000 may be the true number. Apparently reduced to extremity, and the seventh day having come, but not being ended, the expiration of which Samuel had enjoined him to wait, Saul at least ordered sacrifices to be offered—for the expression (ver. 9) does not necessarily imply that he intruded into the priest's office (2 Sam. vi, 13; 1 Kings iii, 2-4), though that is the most obvious meaning of the text. Whether that which Saul now disregarded was the injunction referred to (1 Sam. x, 8) or one subsequently addressed to him, this is evident, that Saul acted in the full knowledge that he sinned (xiii, 12); and his guilt, in that act of conscious disobedience, was probably increased by its clearly involving an assumption of authority to conduct the war according to his own judgment and will. But just after the sacrifice was completed Samuel arrived and pronounced the first curse on his impetuous zeal (ver. 5-14). Samuel, having denounced the displeasure of Jehovah and its consequences, left him, and Saul returned to Gibeah (the addition made to the text of the Sept. ver. 15, where, after "from Gilgal," the clause, "and the rest of the people went up after Saul to meet the enemy from Gilgal to Gibeah," etc., being required apparently by the sense, which, probably, has been the only authority for its insertion). Left to himself, Saul's errors multiplied apace. See SAMUEL.

Meanwhile the adventurous exploit of his son brought on the crisis which ultimately drove the Philistines back to their own territory. Jonathan, having assaulted a garrison of the Philistines (apparently at Michmash [1 Sam. xiv, 31], which therefore must have been situated near Migron in Gibeah [ver. 1], and within sight of it [ver. 15]), Saul, aided by a panic of the enemy, an earthquake, and the co-operation of his fugitive soldiers, effected a great slaughter; but by a rash and foolish denunciation, he (1) impeded his success (ver. 30), (2) involved the people in a violation of the law (ver. 33), and (3), unless prevented by the more enlightened conscience of the people, would have ended with putting Jonathan to death for an act which, being done in total ignorance, could involve no guilt. See JONATHAN. This campaign was signalized by two remarkable incidents in the life of Saul. One was the first appearance of his madness in the above rash vow which all but cost the life of his son (ver. 24, 44). The other was the erection of his first altar, built either to celebrate the victory, or to expiate the savage feast of the famished people (ver. 35). This success against the Philistines was followed, not only by their retirement for a time within their own territory, but by other considerable successes against the other enemies of his country—Moab, Ammon, Edom, the kings of Zobah, the Amalekites, and the Philistines—all of whom he harassed, but did not subdue. These wars may have occupied two or three years, about the middle of Saul's reign (B.C. 1073-71).

4. *Saul's Second Transgression.*—The expulsion of the Philistines (although not entirely completed [1 Sam. xiv, 52]) at once placed Saul in a position higher than that of any previous ruler of Israel. Probably from this time was formed the organization of royal state, which contained in germ some of the future institutions of the monarchy. The host of 3000 has

been already mentioned (xiii; xxiv, 2; xxvi, 2; comp. 1 Chron. xii, 29). Of this Abner became captain (1 Sam. xiv, 50). A body-guard of young, tall, and handsome Benjamites (Josephus, *Ant.* vi, 6, 6; vii, 14) was also formed of runners and messengers (see 1 Sam. xvi, 15, 17; xxii, 14, 17; xxvi, 22). Of this David was afterwards made the chief. These two were the principal officers of the court, and sat with Jonathan at the king's table (xx, 25). Another officer is incidentally mentioned—the keeper of the royal mules—the *comes stabuli*, the "constable" of the king—such as appears in the later monarchy (1 Chron. xxvii, 30). He is the first instance of a foreigner employed about the court—being an Edomite or (Sept.) Syrian, of the name of Doeg (1 Sam. xxi, 7; xxii, 9). According to Jewish tradition (Jerome, *Qu. Heb.* ad loc.) he was the servant who accompanied Saul in his pursuit of his father's asses—who counselled him to send for David (1 Sam. ix, xvi), and whose son ultimately killed him (2 Sam. i, 10). The high-priest of the house of Ithamar (Ahimelech or Ahijah) was in attendance upon him with the ephod, when he desired it (1 Sam. xiv, 3), and felt himself bound to assist his secret commissioners (xxi, 1-9; xxii, 14). The king himself was distinguished by a state not before marked in the rulers. He had a tall spear of the same kind as that described in the hand of Goliath, and the same that now marks the Bedouin sheik. This never left him—in repose (xxviii, 10; xix, 9), at his meals (xx, 33), at rest (xxvi, 11), in battle (2 Sam. i, 6). In battle he wore a diadem on his head and a bracelet on his arm (i, 10). He sat at meals on a seat of his own facing his son (1 Sam. xx, 25; Sept.). He was received on his return from battle by the songs of the Israelitish women (xxviii, 6), among whom he was on such occasions specially known as bringing back from the enemy scarlet robes, and golden ornaments for their apparel (2 Sam. i, 24).

The warlike character of his reign naturally still predominated, and he was now able not merely, like his temporary predecessors, to act on the defensive, but to attack the neighboring tribes of Moab, Ammon, Edom, Zobah, and finally Amalek (1 Sam. xiv, 47). The war with Amalek is twice related, first briefly (ver. 48), and then at length (xv, 1-9). Its chief connection with Saul's history lies in the disobedience to the prophetic command of Samuel, shown in the sparing of the king, and the retention of the spoil (B.C. 1070). In this event another trial was afforded Saul before his final rejection—namely, by the command to extirpate the Amalekites, whose hostility to the people of God was inveterate (Deut. xxv, 18; Exod. xvii, 8-16; Numb. xiv, 42-45; Judg. iii, 13; vi, 3), and who had not by repentance averted that doom which had been delayed 550 years (1 Sam. xiv, 48). The extermination of Amalek and the subsequent execution of Agag belong to the general question of the moral code of the Old Test. See AGAG. There is no reason to suppose that Saul spared the king for any other reason than that for which he retained the spoil—namely, to make a more splendid show at the sacrificial thanksgiving (xv, 21). Such was the Jewish tradition preserved by Josephus (*Ant.* vi, 7, 2), who expressly says that Agag was spared for his stature and beauty, and such is the general impression left by the description of the celebration of the victory. Saul rides to the southern Carmel in a chariot (Sept.), never mentioned elsewhere, and sets up a monument there (Heb. "a hand" [2 Sam. xviii, 18]), which in the Jewish traditions (Jerome, *Qu. Heb.* ad loc.) was a triumphal arch of olives, myrtles, and palms. In allusion to his crowning triumph, Samuel applies to God the phrase, "The victory (Vulg. *triumphator*) of Israel will neither lie nor repent" (1 Sam. xv, 29; and comp. 1 Chron. xxix, 11). The apparent cruelty of this commission was not the reason why it was not fully executed, as Saul himself confessed when Samuel upbraided him, "I feared the people and obeyed their voice" (1 Sam. xv, 24). This stubbornness in persisting to rebel against the direc-

tions of Jehovah was now visited by that final rejection of his family from succeeding him on the throne which had before been threatened (xiii, 13, 14; xv, 23), and which was now significantly represented, or mystically predicted, by the rending of the prophet's mantle. The struggle between Samuel and Saul in their final parting is also indicated, as he tears himself away from Saul's grasp (for the gesture, see Josephus, *Ant.* vi, 7, 5), and by the long mourning of Samuel for the separation—"Samuel mourned for Saul." "How long wilt thou mourn for Saul?" (1 Sam. xiv, 35; xvi, 1). After this second and flagrant disobedience, accordingly, Saul received no more public countenance from the venerable prophet, who now left him to his sins and his punishment; "nevertheless the Lord repented that he had made Saul king" (xv, 35). See SAMUEL.

5. *Saul's Conduct towards David.*—The rest of Saul's life is one long tragedy. The frenzy which had given indications of itself before now at times took almost entire possession of him. It is described in mixed phrases as "an evil spirit of God" (much as we might speak of "religious madness"), which, when it came upon him, almost choked or strangled him from its violence (1 Sam. xvi, 14; Sept.; Josephus, *Ant.* vi, 8, 2). The denunciations of Samuel sank into the heart of Saul, and produced a deep melancholy, which either really was, or which his physicians (1 Sam. xvi, 14, 15; comp. Gen. 1, 2) told him was, occasioned by a supernatural influence; unless we understand the phrase רָחַק רִי, an *evil spirit*, subjectively, as denoting the condition itself of Saul's mind, instead of the cause of that condition (Isa. xxix, 10; Numb. v, 14; Rom. xi, 8). We can conceive that music might affect Saul's feelings, might cheer his despondency, or divert his melancholy; but how it should have the power to chase away a spiritual messenger whom the Lord had sent to chasten the monarch for his transgressions is not so easily understood. Saul's case must probably be judged of by the same principles as that of the *dæmoniacs* mentioned in the New Test. See DÆMONIAC. In this crisis David was recommended to him by one of the young men of his guard (in the Jewish tradition groundlessly supposed to be Doeg [Jerome, *Qu. Hæb.* ad loc.]) on account of his skill as a musician (1 Sam. xvi, 16-23). But the narrative of his introduction to Saul, his subsequently killing Goliath, Saul's ignorance of David's person after he had been his attendant and armor-bearer, with various other circumstances in the narrative (xvi, 14-23; xvii; xviii, 1-4), present difficulties which neither the arbitrary omissions in the Sept. nor the ingenuity of subsequent critics has fully succeeded in removing, and which have led many eminent scholars to suppose the existence of extensive dislocations in this part of the Old Test. The change proposed by Hales and others seems to be the most ready, which would place the passage xvi, 14-23 after xviii, 9; yet why should Saul's attendants need to describe so minutely a person whom he and all Israel knew so well already? Also, how can we conceive that Saul should love so much (xvi, 21) a person against whom his jealousy and hatred had been so powerfully excited as his probable successor in the kingdom? (xviii, 9). Besides, David had occupied already a much higher position (ver. 5); and, therefore, his being made Saul's armor-bearer must have been the very opposite of promotion, which the text (xvi, 21) supposes it was. The most rational solution of the difficulty appears to be the supposition that David had in the interim grown so much that the monarch did not now recognise him. See DAVID.

Though not acquainted with the unction of David, yet having received intimation that the kingdom should be given to another, Saul soon suspected, from his accomplishments, heroism, wisdom, and popularity, that David was his destined successor; and, instead of concluding that his resistance to the divine purpose would only accelerate his own ruin, Saul, in the spirit of jeal-

ousy and rage, commenced a series of murderous attempts on the life of his rival that must have lost him the respect and sympathy of his people, which they secured for the object of his malice and envy, whose noble qualities also they both exercised and rendered more conspicuous. He attempted twice to assassinate him with his own hand (1 Sam. xviii, 10, 11; xix, 10); he sent him on dangerous military expeditions (xviii, 5, 13, 17); he proposed that David should marry first his elder daughter, whom yet he gave to another, and then his younger, that the procuring of the dowry might prove fatal to David; and then he sought to make his daughter an instrument of her husband's destruction; and it seems probable that unless miraculously prevented he would have imbrued his hands in the blood of the venerable Samuel himself (xix, 18), while the text seems to intimate (xx, 33) that even the life of Jonathan was not safe from his fury, though the subsequent context may warrant a doubt whether Jonathan was the party aimed at by Saul. The slaughter of Ahimelech the priest (ch. xxii), under pretence of his being a partisan of David, and of eighty-five other priests of the house of Eli, to whom nothing could be imputed, as well as the whole inhabitants of Nob, was an atrocity perhaps never exceeded; and yet the wickedness of the act was not greater than its insatiation, for it must have inspired his subjects not only with abhorrence of their king as an inhuman tyrant, but with horror of him as an impious and sacrilegious monster. This crime of Saul put David in possession of the sacred lot, which Abiathar, the only surviving member of Eli's priestly family, brought with him, and by which he was enabled to obtain oracles directing him in his critical affairs (xxii, 21-23; xxiii, 1, 2).

Having compelled David to assume the position of an outlaw, around whom gathered a number of turbulent and desperate characters, Saul might persuade himself that he was justified in bestowing the hand of David's wife on another, and in making expeditions to apprehend and destroy him. A portion of the people were base enough to minister to the evil passions of Saul (1 Sam. xxiii, 19; xxvi, 1), and others, perhaps, might color their fear by the pretence of conscience (xxiii, 12). But his sparing Saul's life twice, when he was completely in his power, must have destroyed all color of right in Saul's conduct in the minds of the people, as it also did in his own conscience (xxiv, 3-7; xxvi), which two passages, though presenting many points of similarity, cannot be referred to the same occasion without denying to the narrative all historic accuracy and trustworthiness. Though thus degraded and paralyzed by the indulgence of malevolent passions, Saul still acted with vigor in repelling the enemies of his country, and in other affairs wherein his jealousy of David was not concerned (xxiii, 27, 28). In Saul's better moments, also, he never lost the strong affection which he had contracted for David. "He loved him greatly" (xvi, 21). "Saul would let him go no more home to his father's house" (xviii, 2). "Wherefore cometh not the son of Jesse to meat?" (xx, 27). "Is this thy voice, my son David? . . . Return, my son David; blessed be thou, my son David" (xxiv, 16; xxvi, 17, 25). Occasionally, too, his prophetic gift returned, blended with his madness. He "prophesied" or "raved" in the midst of his house—"he prophesied and lay down naked all day and all night" at Ramah (xix, 24). But his acts of fierce, wild zeal increased. The massacre of the priests, with all their families—the massacre, perhaps at the same time, of the Gibeonites (2 Sam. xxi, 1), and the violent extirpation of the necromancers (1 Sam. xxviii, 3, 9), are all of the same kind.

6. *Saul's Last Offence and Death.*—At length the monarchy itself, which he had raised up, broke down under the weakness of its head. The Philistines re-entered the country, and with their chariots and horses occupied the plain of Esdraelon. Their camp was pitched on the southern slope of the range now called

Little Hermon, by Shunem. On the opposite side, on Mount Gilboa, was the Israelitish army, clinging, as usual, to the heights which were their safety. It was near the spring of Gideon's encampment, hence called the spring of Harod, or "trembling;" and now the name assumed an evil omen, and the heart of the king as he pitched his camp there "trembled exceedingly" (1 Sam. xxviii, 5). The measure of Saul's iniquity, now almost full, was completed by an act of direct treason against Jehovah the God of Israel (Exod. xxii, 18; Lev. xix, 31; xx, 27; Deut. xviii, 10, 11). Saul, probably in a fit of zeal and perhaps as some atonement for his disobedience in other respects, had executed the penalty of the law on those who practised necromancy and divination (1 Sam. xxviii, 3). Now, however, in the loss of all the usual means of consulting the divine will, he determined, with that wayward mixture of superstition and religion which marked his whole career, to apply to one of the necromancers who had escaped his persecution. Forsaken of God, who gave him no oracles, and rendered, by a course of wickedness, both desperate and infatuated, he requested his attendants to seek him a woman who had a familiar spirit (which is the loose rendering in the English Bible of the expression occurring twice in ver. 7, אִשָּׁה בְּעֵלְזָה, *a woman a mistress of Ob*; Sept. *ἐγγαστριμύθοσ*, i. e. a ventriloquist; Vulg. *habens Pythonem*, i. e. a Pythoness [see NECROMANCY]), that he might obtain from her that direction which Jehovah refused to afford him. She was a woman living at Endor, on the other side of Little Hermon. According to the Hebrew tradition mentioned by Jerome, she was the mother of Abner, and hence her escape from the general massacre of the necromancers (see Leo Allatius, *De Engastrimytho*, cap. 6 in *Critici Sacri*, vol. ii). Volumes have been written on the question whether in the scene that follows we are to understand an imposture or a real apparition of Samuel. Eustathius and most of the fathers take the former view (representing it, however, as a figment of the devil); Origen, the latter view. Augustine wavers (*ibid. ut supra*, p. 1062-1114). The Sept. of 1 Sam. xxvii, 7 (by the above translation) and the A. V. (by its omission of "himself" in xxviii, 14, and insertion of "when" in ver. 12) lean to the former. Josephus (who pronounces a glowing eulogy on the woman, *Ant. vi*, 14, 2, 3) and the Sept. of 1 Chron. x, 13, to the latter. At this distance of time it is impossible to determine the relative amount of fraud or of reality, though the obvious meaning of the narrative itself tends to the hypothesis of some kind of apparition. She recognises the disguised king first by the appearance of Samuel, seemingly from his threatening aspect or tone as towards his enemy. Saul apparently saw nothing, but listened to her description of a godlike figure of an aged man wrapped round with the royal or sacred robe. On hearing the denunciation which the apparition conveyed, Saul fell the whole length of his gigantic stature (see 1 Sam. xxviii, 20, margin) on the ground, and remained motionless till the woman and his servants forced him to eat.

Assured of his own death in the coming engagement, and that of his sons, of the ruin of his army and the triumph of his most formidable enemies, whose invasion had tempted him to try this unhallowed expedient—all announced to him by that same authority which had foretold his possession of the kingdom, and whose words had never been falsified—Saul, in a state of dejection which could not promise success to his followers (comp. Thomson, *Land and Book*, ii, 168), prepared as best he could to meet the enemy in Gilboa, on the extremity of the great plain of Esdraelon (on the localities of this battle, etc., see Hackett, *Illustrations of Script.* p. 178 sq.).

The next day the battle came on, and, according to Josephus (*Ant. vi*, 14, 7), perhaps according to the spirit of the sacred narrative, his courage and self-devotion

returned. The Israelites were driven up the side of Gilboa. The three sons of Saul were slain (1 Sam. xxxi, 2). Saul himself with his armor-bearer was pursued by the archers and the charioteers of the enemy (ver. 3; 2 Sam. i, 6). He was wounded in the stomach (Sept. 1 Sam. xxxi, 3). His shield was cast away (2 Sam. i, 21). In his extremity, having in vain solicited death from the hand of his armor-bearer (Doeg the Edomite—the Jews say, "a partner before of his master's crimes and now of his punishment"), Saul perished at last by his own sword (1 Sam. xxxi, 4). According to another account (less trustworthy, or, perhaps, to be reconciled with the former by supposing that it describes a later incident), an Amalekite came up at the moment of his death-wound (whether from himself or the enemy) and found him "fallen" but leaning on his spear (2 Sam. i, 6, 10). The dizziness of death was gathered over him (ver. 9), but he was still alive; and he was, at his own request, put out of his pain by the Amalekite, who took off his royal diadem and bracelet and carried the news to David (ver. 7-10). Not till then, according to Josephus (*Ant. vi*, 14, 7), did the faithful armor-bearer fall on his sword and die with him (1 Sam. xxxi, 5). The body, on being found by the Philistines on the morrow, was stripped and decapitated. The armor was sent into the Philistine cities, as if in retribution for the spoliation of Goliath, and finally deposited in the temple of Astarte, apparently in the neighboring Canaanitish city of Bethshan; and over the walls of the same city was hung the naked, headless corpse with those of his three sons (ver. 9, 10). The head was deposited (probably at Ashdod) in the temple of Dagon (1 Chron. x, 10). The corpse was removed from Bethshan by the gratitude of the inhabitants of Jabesh-gilead, who came over the Jordan by night, carried off the bodies, burned them, and buried them under the tamarisk at Jabesh (1 Sam. xxxi, 13). It is pleasing to think that even the worst men have left behind them those in whom gratitude and affection are duties. Saul had those who mourned him, as some hand was found to have strewn flowers on the newly made grave of Nero. After the lapse of several years, his ashes and those of Jonathan were removed by David to their ancestral sepulchre at Zelah in Benjamin (2 Sam. xxi, 14).

IV. *Saul's Character.*—There is not in the sacred history, or in any other, a character more melancholy to contemplate than that of Saul. Naturally humble and modest, though of strong passions, he might have adorned a private station. In circumstances which did not expose him to strong temptation, he would probably have acted virtuously. But his natural rashness was controlled neither by a powerful understanding nor a scrupulous conscience; and the obligations of duty and the ties of gratitude, always felt by him too slightly, were totally disregarded when ambition, envy, and jealousy had taken possession of his mind. The diabolical nature of these passions is seen, with frightful distinctness, in Saul, whom their indulgence transformed into an unnatural and bloodthirsty monster, who constantly exhibited the moral infatuation, so common among those who have abandoned themselves to sin, of thinking that the punishment of one crime may be escaped by the perpetration of another. In him, also, is seen that moral anomaly or contradiction, which would be incredible did we not so often witness it, of an individual pursuing habitually a course which his better nature pronounces not only flagitious, but insane (1 Sam. xxiv, 16, 22). Saul knew that that person should be king whom yet he persisted in seeking to destroy, and so accelerated his own ruin. For it can hardly be doubted that the distractions and disaffection occasioned by Saul's persecution of David produced that weakness in his government which encouraged the Philistines to make the invasion in which himself and his sons perished. "I gave thee a king in mine anger, and took him away in my wrath" (Hos. xii, 11). In

the prolonged troubles and disastrous termination of this first reign, the Hebrews were vividly shown how vain was their favorite remedy for the mischiefs of foreign invasion and intestine discord.

Saul's character is in part illustrated by the fierce, wayward, fitful nature of the tribe [see BENJAMIN], and in part accounted for by the struggle between the old and new systems in which he found himself involved. To this we must add a taint of madness, which broke out in violent frenzy at times, leaving him with long lucid intervals. His affections were strong, as appears in his love both for David and his son Jonathan, but they were unequal to the wild accessions of religious zeal or insanity which ultimately led to his ruin. He was, like the earlier Judges, of whom in one sense he may be counted as the successor, remarkable for his strength and activity (2 Sam. i, 23); and he was, like the Homeric heroes, of gigantic stature, taller by head and shoulders than the rest of the people, and of that kind of beauty denoted by the Hebrew word "good" (1 Sam. ix, 2), and which caused him to be compared to the gazelle—"the gazelle of Israel." It was probably these external qualities which led to the epithet which is frequently attached to his name, "chosen"—"whom the Lord did choose"—"*See ye* (i. e. Look at) him whom the Lord hath chosen!" (1 Sam. ix, 17; x, 24; 2 Sam. xxi, 6).

V. *Literature*.—See the treatises referred to in Darling, *Cyclop. Bibliograph.* col. 290-302; Stanley, *Jewish Ch. ii*, lect. xxi; Ewald, *Hist. of Israel*, ii, 15 sq.; Niemeyer, *Charak.* v, 75 sq.; Hasse, *König Saul* (Gries. 1854); Richardson, *Saul, King of Israel* (Edinb. 1858); Miller, *Saul, First King of Israel* (2d ed., Lond. 1866); Brooks, *King Saul* ([a tragedy], N. Y. 1871); and the monographs on his interview with the witch cited by Fürst, *Bibliotheca Judaica*, iii, 236. See KING.

3. The Jewish name of Paul (q. v.). This was the most distinguished name in the genealogies of the tribe of Benjamin, to which the apostle felt some pride in belonging (Rom. xi, 1; Phil. iii, 5). He himself leads us to associate his name with that of the Jewish king by the marked way in which he mentions Saul in his address at the Pisidian Antioch: "God gave unto them Saul the son of Cis, a man of the tribe of Benjamin" (Acts xiii, 21). These indications are in harmony with the intensely Jewish spirit of which the life of the apostle exhibits so many signs. The early ecclesiastical writers did not fail to notice the prominence thus given by Paul to his tribe. Tertullian (*Adv. Marc.* v, 1) applies to him the dying words of Jacob on Benjamin. And Jerome, in his *Epitaphium Paulæ* (§ 8), alluding to the preservation of the six hundred men of Benjamin after the affair of Gibeah (Judg. xx, 49), speaks of them as "trecentos [sic] viros propter Apostolum reservatos." See BENJAMIN.

Nothing certain is known about the change of the apostle's name from Saul to Paul (Acts xiii, 9). Two chief conjectures prevail concerning the change. (1) That of Jerome and Augustine, that the name was derived from Sergius Paulus, the first of his Gentile converts. (2) That which appears due to Lightfoot, that Paulus was the apostle's Roman name as a citizen of Tarsus, naturally adopted into common use by his biographer when his labors among the heathen commenced. The former of these is adopted by Olshausen and Meyer. It is also the view of Ewald (*Gesch.* vi, 419, 420), who seems to consider it self-evident, and looks on the absence of any explanation of the change as a proof that it was so understood by all the readers of the Acts. However this may be, after Saul has taken his place definitively as the apostle to the Gentile world, his Jewish name is entirely dropped. Two divisions of his life are well marked by the use of the two names.

Saunders, WILLIAM T., a minister of the Methodist Episcopal Church, was born, of Roman Catholic parents, in Dublin, Aug. 16, 1836. In his sixteenth year he emigrated to America, landing at New Orleans, April

13, 1852. In Sept., 1853, he was converted at a camp-meeting, and joined the Methodist Episcopal Church. He spent one term at Meadville College, but for five years after led an unsettled life. In 1859 he was admitted on trial in the South-eastern Indiana Conference and appointed to Vernon Circuit. He also served at New Washington; Patriot Circuit; Bellevue; as chaplain of the Eighty-third Indiana Volunteers; Roberts and Trinity churches, Madison; Vevay; and Rising Sun. He continued to fill his pulpit until within four weeks of his death, which took place July 29, 1871. Mr. Saunders was a man of diligent study, careful preparation for the pulpit, faithful as a pastor, while his piety was of the healthy, fruit-bearing kind. See *Minutes of Annual Conferences*, 1871, p. 184.

Sauqua Behkr (*Socquabekr*), in Norse mythology, was the stream of death, a place where Saga dwelt, and which Odin visited each day in order to become drunk on the precious mead which she possessed, and to enjoy her love.

Sauras, a Hindû sect who worship only Suryapati, or the sun-god. They are few in number, and scarcely differ from the rest of the Hindûs in their general observances. Their mark on the forehead is made in a particular manner, with red sandalwood, and their necklace is of crystal. They eat one meal without salt every Sunday, and on every occasion of the sun's entrance into a sign of the zodiac; and they cannot eat till they have noticed the sun.

Saure, CONRAD, a minister of the German Reformed Church, was born in Germany, and emigrated to this country in 1845. He studied theology privately, and commenced preaching in Cincinnati in 1856; two years later he was regularly ordained, and installed as pastor of the Salem church. His first sermon, it is said, was preached to six hearers. At the time of his death, in 1873, his congregation numbered between seven and eight hundred members. He was an acceptable and earnest preacher, and a faithful, laborious, and successful pastor. See the *Ref. Ch. Mess.* June 4, 1873. (D. Y. H.)

Saurin, Élie, a French Protestant theologian, was born Aug. 28, 1639, at Useau, Dauphiny. He was the son of a village pastor, who conducted his education, and at last sent him to study theology at Geneva. Admitted to the ministry in 1661, he preached first at Vente-rot, and was called to the church at Embrun in the succeeding year. Having refused to uncover his head before a priest who was carrying the sacrament to a sick person, Saurin was banished from the country. He retired to Holland, where he took charge of a church at Delft, in 1665. He was employed to examine the religious opinions of the mystic Labadie, and offered to refute them publicly. So well did Saurin succeed that he procured the deposition of his opponent, and, in order that he should not be suspected of any personal interest in the affair, obtained for Labadie the church at Middleburg. In 1671 Saurin accepted the place of Wolzogen at Utrecht. Here he lived for two years, during the French occupation, in continual agitation caused by his disputes with Jurieu. He began the contest by stating that some of the doctrines of Jurieu were heterodox and very dangerous. Efforts were made to reconcile the two pastors, and the synod of Leeuwarden forbade their writing against each other on pain of excommunication, but all to no effect. The last years of Saurin were devoted to the publication of theological works. He died at Utrecht, on Easter-Sunday, 1703. We have from his pen, *Examen de la Théologie de Jurieu:—Défense de la Doctrine de l'Eglise Réformée*, etc.;—*Traité de l'Amour de Dieu:—Réflexions sur les Droits de la Conscience*;—and a posthumous work, *Traité de l'Amour du Prochain*.

Saurin, Jacques, the most eloquent preacher of French Protestantism, was born at Nîmes Jan. 6, 1677.

In his eighth year his family, fleeing from the persecutions of Louis XIV, settled in Geneva. Quitting school at the age of sixteen, he joined a regiment of Savoyards in the general war against the French tyrant, and served nearly four years, till the Peace of Ryswick, in 1697. On his return, he took up the study of theology under Tronchin, Pictet, and Turretin. It was only after many inner struggles that he conquered his frivolity and scepticism, and passed through the throes of the new birth. Once clearly converted, his life and influence were radically changed. His subsequent renown for eloquence began to take form even before his graduation. His mere schoolboy exercises in sermonizing attracted great attention. Entering the ministry in 1700, he took charge of a society of French Walloons in London, and preached with great success for four years. In 1705, while on a journey of recreation in Holland, he preached a few sermons and made such an impression as to occasion a call to labor at the Hague. This call he accepted; and here, for the remainder of his life—twenty-five years—he labored with equal fame and usefulness. He soon became known as “the great Saurin,” the “Chrysostom of Protestantism.” The large church in which he preached was constantly overcrowded. It was not merely his eloquence, his fine manner, his melodious voice, which thus held and charmed for a quarter of a century all classes of society, but it was chiefly the weighty substance of what he said and the holy earnestness with which he said it. Learned men (Clericus) and cold critics often went to hear him with deep prejudice, but uniformly they came away glad and captivated. The celebrated Abbadie exclaimed, after first hearing him, “Is it a man, or is it an angel!” Saurin was not a mere preacher, but also an organizer. He founded schools and asylums, and planned a grand scheme of missionary work throughout the Dutch colonies. He was also a systematic writer. In 1722 he issued an educational work, *Abrégé de la Théologie et de la Morale Chrétienne*. In 1724 he issued his *Catéchisme*, which enjoyed a long popularity in Holland and at Geneva. In 1725 appeared at the Hague *L'État du Christianisme en France*, a collection of letters in favor of his fellow-Protestants of France. A work which appeared between 1720 and 1728, *Discours Historiques, Critiques, Théologiques et Morceaux sur les Événements les plus Mémorables du Vieux et du Nouveau Testament*, though an able work in itself, had the unfortunate result of calling upon Saurin such a series of envious criticisms from his fellow-pastors as to embitter his last years and even to hasten his death. It is a memorable instance of the well-known *odium theologicum*. It had no other basis or pretext than a few unguarded expressions in regard to the so-called falsehood of necessity.

But the posthumous fame of Saurin rests upon his *Sermons*. Of these he himself published (1707–25) five volumes. After his death, his son edited, from his papers, seven additional volumes. The whole twelve volumes have been several times reissued. The best edition is that of the Hague, in 1749; the most recent is that of Paris, in 1835. A good selection was published by Weiss, at Paris, in 1854, *Sermons Choisis de Saurin, avec une Notice sur sa Vie*. Most of these sermons have enjoyed great popularity in other languages. Five volumes of the *Sermons* were published in English by R. Robinson, in 1775. As to the form of Saurin's sermons, they are too systematic and scholastic for the taste of the present; they are encumbered with too much of learned citation. Much that they contain would be more appropriate in the professor's chair than in the pulpit. As compared with the great Catholic sermonizers, Saurin lacks the exquisite polish of Bossuet; nor does he search the secret recesses of the heart with as sharp an eye as Bourdaloue; nor are his appeals as pathetic as those of Massillon; but he surpasses them all in this, that he preaches the whole Gospel of Christ, and that he is unconscious of dependence on any other external authority than the simple Word of God. In

manner, Saurin was impetuous in the extreme; greater self-control would have given him greater power. He sometimes spent so much force of voice in his opening prayer and exordium as to be very much exhausted before the close. Sometimes his voice would almost fail. The chief defect in his manner was a certain lack of unction. The understanding was convinced, the conscience was awakened, the will was aroused, but the heart was not fully subdued. After Saurin's death, his great work, *Discours* (2 vols. fol.), was continued by Roques and Beausobre, so that the whole consisted of six volumes. See Van Oosterzee, *Jacques Saurin* (Brus. 1856); Sayous, *Hist. de la Littér. Franç. à l'Étr.*; Weiss, *Hist. des Réf. Prot. de France*; Herzog, *Real-Encykl.* xiii, 437–444. (J. P. L.)

Saurus, in Greek mythology, was a noted highway robber on the borders of Elis, who was killed by Hercules.

Saussay, ANDRÉ DE, a French prelate, was born at Paris in 1589, and died Sept. 9, 1675, at Toul. His parents being poor, he was educated at the Hospital of the Holy Spirit, and on completing his studies took orders. He employed himself in preaching and controversy; was in favor at the court; and became curé of Saint-Leu, apostolic prothonotary, almoner of the king, and grand vicar of the Church of Paris. Elected bishop of Toul in 1649, he did not take possession of his see until 1657, on account of ecclesiastical troubles with its chapter. He held this office till his death. Saussay was the author of several religious works in Latin, which show great learning, but little judgment or critical acumen—as *Généalogie des Hérétiques Sacramentaires*, etc.:—*De Sacro Ritu Præferendi Crucem*, etc.

Sautrantika is the name of the second of the four great schools or systems of Buddhism, the three others being called *Vaibhashika*, *Madhyamika*, and *Yogachâra*. They recognise the authority of the *Sûtras* (q. v.), but reject that of the *Abhidharma*. See Köppen, *Die Religion des Buddha* (Berlin, 1857); Wassiljew, *Der Buddhismus, seine Dogmen, Geschichte und Literatur* (St. Petersburg, 1860).

Savagarad is the cap of an Armenian priest, made of cloth of gold, with an orb and cross on the top.

Savage, Henry, D.D., an English divine, was born at Eldsfield, Worcestershire, in 1604. He entered Balliol College, Oxford, as a commoner in 1621; took the degree of B.A. in Nov., 1625; in 1628 was made probationer fellow; and in 1630 completed his master's degree. On the commencement of the Rebellion, he travelled into France with William (lord) Sandys, whose sister, lady Mary, he afterwards married. He obtained the mastership of his college Feb. 20, 1650, and took his degree of D.D. the next year. He was made prebendary of Gloucester in 1665, and rector of Bladen, in Oxfordshire. He died, master of Balliol College, June 2, 1672, and was buried in the chapel. He published some pamphlets on infant baptism against John Tombes, and on Church reformation against Cornelius Burgess; but is best known by his *Baliofergus*; or, *A Commentary upon the Foundation, Founders, and Affairs of Balliol College* (Oxon. 1668, 4to).

Savage, Isaac Aylsworth, a minister of the Methodist Episcopal Church, was born in Edinburgh, Saratoga County, N. Y., Dec. 28, 1814. He embraced religion at the age of sixteen, graduated at the Wesleyan University in Aug., 1841, and, having been already received on trial in the New England Conference, went immediately to South Boston. He was ordained deacon in 1843 and elder in 1845. He occupied appointments in Lowell, Springfield, Boston, and Holliston until 1854, when, after a protracted illness, he fell asleep on Feb. 16. Mr. Savage was an excellent scholar, an able and faithful minister, a devoted friend. See *Minutes of Annual Conf.* 1854, p. 359.

Savage, John, D.D., an English divine of the last century, was a member of Emanuel College, Cambridge, where he took his degrees, and was D.D. of both universities. He was rector, first of Bygrave, then of Clothall, Herts, and lecturer of St. George's, Hanover Square, London. He was at one time president of the famous club at Royston. He died March 24, 1747, from a fall. Besides a visitation and an assize sermon, there are attributed to him the following: *The Turkish History* (abridged from Knolles and Rycant [1701, 2 vols. 8vo]): — *Collection of Letters of the Ancients*, etc. (1703, 8vo).

Savage, John Adams, D.D., a Presbyterian divine, was born in Salem, Washington County, N. Y., Oct. 9, 1800. He received his preparatory training in Salem Academy; graduated at Union College, Schenectady, N. Y., in 1822; studied theology privately; was licensed to preach by Washington Associate Reformed Presbytery in 1825, and ordained by the same presbytery in 1827. His first charge was at Fort Covington, Franklin County, N. Y., where he remained until 1832, when he was called to the church in Ogdensburg, N. Y. Here his labors were abundant and successful. He remained at Ogdensburg nearly twenty years, and probably no man ever exerted so wide and powerful an influence for religion and for Presbyterianism in Northern New York as he. In 1850, at the earnest solicitation of Dr. Van Rensselaer, then corresponding secretary of the Board of Education, he went to Wisconsin, and took charge of Carroll College, at Waukeeta, then in its infancy. Here he labored arduously in founding and building up a college in a new country. The charter had been obtained, and some little progress made in the enterprise before his arrival, but properly Dr. Savage is to be regarded as the founder of Carroll College. He died Dec. 13, 1864. Dr. Savage was a man of great sagacity, deep piety, and excellence of character; as a preacher, able and instructive; as a theologian, clear, sound, and scriptural, well meriting the honorary degree of D.D. conferred on him by his alma mater after his assumption of the presidency of the college. See Wilson, *Presb. Hist. Almanac*, 1866, p. 167. (J. L. S.)

Savage, Samuel Morton, D.D., a learned Independent minister, was born in London in 1721, and educated under Dr. Jennings. He became professor of divinity at Hoxton; assistant minister of St. Mary Axe, London, in 1747; and sole pastor in 1756. He died in 1791. He published *Sermons* on several evangelical and practical subjects (Taunton, 1796, 8vo).

Savage, Thomas, a Presbyterian minister, was born in Boston, Mass., Sept. 2, 1794. He pursued his preparatory studies at Phillips Academy, in Andover; graduated with honor at Harvard University, Cambridge; and studied theology at the divinity school connected with that institution. In 1815 he accepted an invitation to become a private tutor in Louisiana, in the vicinity of Baton Rouge, where he continued to teach and preach for nearly seven years. In 1824 he returned to Boston, and on July 5, 1826, was installed pastor of the church in Bedford, N. H., which pastorate lasted forty years. He died May 8, 1866. Mr. Savage possessed a truly symmetrical character. His ministry was in conformity with such a character. He was a practical and impressive preacher, and an accurate scholar—excelling perhaps in the classics, but familiar with the best models of his native tongue. See Wilson, *Presb. Hist. Almanac*, 1867, p. 196. (J. L. S.)

Sav'aran (Σαυαράν v. Ἀβαραν), an erroneous form (1 Macc. vi, 43) for AVARAN (q. v.), an epithet of the Maccabee Eleazar (q. v.).

Savary, N., a French writer and traveller. In 1776 he visited Egypt, and studied the antiquities and manners of the country. On his return he visited the Archipelago, and in 1780 published his translation of the Koran, which was succeeded by his *Travels in Egypt, Letters on Greece*, and a *Grammar of the Modern Arabic*. He died in 1788.

Savastano, FRANCESCO EULALIA, an Italian poet, was born in 1657 at Naples, where he died Oct. 23, 1717. He was a Jesuit, preached successfully, and taught rhetoric, philosophy, and theology in the College of Naples. He is the author of a Latin poem entitled *Botanicorum Liber*.

Savi'as (Σαβιά), a corrupt Græcized form (1 Esdr. viii, 2) of the Heb. name UZZI (q. v.), the ancestor of Ezra (Ezra vii, 4).

Savigni, ORDER OF, a religious body connected with the Romish Church, founded in the 12th century by Vitalis de Mortain, a disciple of the famous Robert of Arbriscelle, who instituted the Order of Fontevraud. The Order of Savigni, after continuing for a time, became merged in that of the Cistercians (q. v.).

Saviour, a title applied in Scripture, in its highest sense, to Jesus Christ, but in a subordinate way to earthly deliverers. We present a comparatively brief abstract of this very extensive subject. See SOTERIOLOGY.

1. *The Word itself.*—The term "Saviour," as applied to our Lord Jesus Christ, represents the Greek *soter* (σωτήρ), which in turn represents certain derivatives from the Hebrew root *yashá* (יָשָׁא), particularly the participle of the Hiphil form *moshia* (מוֹשִׁיעַ), which is usually rendered "Saviour" in the A. V. (e. g. Isa. xlvii, 15; xlix, 26). In considering the true import of "Saviour," it is essential for us to examine the original terms answering to it, including in our view the use of *soter* in the Sept., whence it was more immediately derived by the writers of the New Test., and further noticing the cognate terms "to save" and "salvation," which express respectively the action and the results of the Saviour's office. See JESUS.

1. The term *soter* is of more frequent occurrence in the Sept. than the term "Saviour" in the A. V. of the Old Test. It represents not only the word *moshia* above mentioned, but also very frequently the nouns *yésha* (יְשָׁע) and *yeshuah* (יְשׁוּעָה), which, though properly expressive of the abstract notion "salvation," are yet sometimes used in a concrete sense for "Saviour." We may cite as an example Isa. lii, 11, "Behold, thy salvation cometh, his reward is with him," where evidently "salvation" = *Saviour*. So again in passages where these terms are connected immediately with the person of the Godhead, as in Psa. lxxviii, 20, "the God our Saviour" (A. V. "God of our salvation"). Not only in such cases as these, but in many others where the sense does not require it, the Sept. has *soter* where the A. V. has "salvation;" and thus the word "Saviour" was more familiar to the ear of the reader of the Old Test. in our Lord's age than it is to us.

2. The same observation holds good with regard to the verb *σώζειν*, and the substantive *σωτηρία*, as used in the Sept. An examination of the passages in which they occur shows that they stand as equivalents for words conveying the notions of well-being, succor, peace, and the like. We have further to notice *σωτηρία* in the sense of recovery of the *bodily* health (2 Macc. iii, 32), together with the etymological connection supposed to exist between the terms *σωτήρ* and *σῶμα*, to which Paul evidently alludes in Eph. v, 23; Phil. iii, 20, 21.

3. If we turn to the Hebrew terms, we cannot fail to be struck with their comprehensiveness. Our verb "to save" implies, in its ordinary sense, the rescue of a person from actual or impending danger. This is undoubtedly included in the Hebrew root *yashá*, and may be said to be its ordinary sense, as testified by the frequent accompaniment of the preposition *min* (מִן; comp. the *σώσει ἀπό* which the angel gives in explanation of the name Jesus, Matt. i, 21). But *yashá*, beyond this, expresses *assistance* and *protection* of every kind—assistance in aggressive measures, protection against attack; and, in a secondary sense, the results of such assistance—victory, safety, prosperity, and happiness. We may

cite as an instance of the *aggressive* sense, Deut. xx, 4, "To fight for you against your enemies, to save you;" of *protection* against attack, Isa. xxvi, 1, "Salvation will God appoint for walls and bulwarks;" of *victory*, 2 Sam. viii, 6, "The Lord preserved David," i. e. gave him victory; of *prosperity and happiness*, Isa. lx, 18, "Thou shalt call thy walls Salvation;" Isa. lxi, 10, "He hath clothed me with the garments of salvation." No better instance of this last sense can be adduced than the exclamation "Hosanna," meaning, "Save, I beseech thee," which was uttered as a prayer for God's blessing on any joyous occasion (Psa. cxviii, 25), as at our Lord's entry into Jerusalem, when the etymological connection of the terms Hosanna and Jesus could not have been lost on the ear of the Hebrew (Matt. xxi, 9, 15). It thus appears that the Hebrew and Greek terms had their positive as well as their negative side; in other words, that they expressed the presence of blessing as well as the absence of danger, actual security as well as the removal of insecurity. The Latin language possessed in the classical period no proper equivalent for the Greek σωτήρ. This appears from the introduction of the Greek word itself in a Latinized form, and from Cicero's remark (*in Verr. Act. 2*, ii, 63) that there was no one word which expressed the notion *qui salutem dedit*. Tacitus (*Ann. xv*, 71) uses *conservator*, and Pliny (*xxii*, 5) *servator*. The term *salvator* appears appended as a title of Jupiter in an inscription of the age of Trajan (Gruter, p. 19, No. 5). This was adopted by Christian writers as the most adequate equivalent for σωτήρ, though objections were evidently raised against it (Augustine, *Serm.* 299, § 6). Another term, *salutificator*, was occasionally used by Tertullian (*De Resurr. Carn.* 47; *De Carn. Chr.* 14).

4. The historical personages to whom the terms are applied further illustrate this view. The judges are styled "saviours," as having rescued their country from a state of bondage (Judg. iii, 9, 15, A. V. "deliverer;" Neh. ix, 27); a "saviour" was subsequently raised up in the person of Jeroboam II to deliver Israel from the Syrians (2 Kings xiii, 5); and in the same sense Josephus styles the deliverance from Egypt a "salvation" (*Ant.* iii, 1, 1). Joshua, on the other hand, verified the promise contained in his name by his conquests over the Canaanites: the Lord was his helper in an aggressive sense. Similarly, the office of the "saviours" promised in Obad. 21 was to execute vengeance on Edom. The names Isaiah, Jeshua, Ishi, Hosea, Hoshea, and, lastly, Jesus, are all expressive of the general idea of *assistance* from the Lord. The Greek *soter* was in a similar manner applied in the double sense of a deliverer from foreign foes, as in the case of Ptolemy Soter, and a general protector, as in the numerous instances where it was appended as the title of heathen deities.

5. There are many indications in the Old Test. that the idea of a spiritual salvation, to be effected by God alone, was by no means foreign to the mind of the pious Hebrew. In the Psalms there are numerous petitions to God to save from the effects of sin (e. g. xxxix, 8; lxxix, 9). Isaiah, in particular, appropriates the term "saviour" to Jehovah (xliii, 11), and connects it with the notions of justice and righteousness (xlv, 21; lx, 16, 17): he adduces it as the special manner in which Jehovah reveals himself to man (xlv, 15): he hints at the means to be adopted for effecting salvation in passages where he connects the term "saviour" with "redeemer" (*go'el*), as in xli, 14; xlix, 26; lx, 16, and again with "ransom," as in xliii, 3. Similar notices are scattered over the prophetic books (e. g. Zech. ix, 9; Hos. i, 7), and though in many instances these notices admitted of a reference to proximate events of a temporal nature, they evidently looked to higher things, and thus fostered in the mind of the Hebrew the idea of a "Saviour" who should far surpass in his achievements the "saviours" that had as yet appeared. The mere sound of the word would conjure up before his imagination visions of deliverance, security, peace, and prosperity.

II. *The Work of the Saviour*.—This we propose to trace as developed in the several portions of the New Testament.

1. The first three evangelists, as we know, agree in showing that Jesus unfolded his message to the disciples by degrees. He wrought the miracles that were to be the credentials of the Messiah; he laid down the great principles of the Gospel morality, until he had established in the minds of the Twelve the conviction that he was the Christ of God. Then, as the clouds of doom grew darker, and the malice of the Jews became more intense, he turned a new page in his teaching. Drawing from his disciples the confession of their faith in him as Christ, he then passed abruptly, so to speak, to the truth that remained to be learned in the last few months of his ministry, that his work included suffering as well as teaching (Matt. xvi, 20, 21). He was instant in pressing this unpalatable doctrine home to his disciples from this time to the end. Four occasions when he prophesied his bitter death are on record, and they are probably only examples out of many more (ver. 21). We grant that in none of these places does the word "sacrifice" occur; and that the mode of speaking is somewhat obscure, as addressed to minds unprepared, even then, to bear the full weight of a doctrine so repugnant to their hopes. But that he must (*dei*) go and meet death; that the powers of sin and of this world are let loose against him for a time, so that he shall be betrayed to the Jews, rejected, delivered by them to the Gentiles, and by them be mocked and scourged, crucified, and slain; and that all this shall be done to achieve a foreseen work, and accomplish all things written of him by the prophets—these we do certainly find. They invest the death of Jesus with a peculiar significance; they set the mind inquiring what the meaning can be of this hard necessity that is laid on him. For the answer we look to other places; but at least there is here no contradiction to the doctrine of sacrifice, though the Lord does not yet say, "I bear the wrath of God against your sins in your stead; I become a curse for you." Of the two sides of this mysterious doctrine—that Jesus dies for us willingly, and that he dies to bear a doom laid on him as of necessity, because some one must bear it—it is the latter side that is made prominent. In all the passages it pleases Jesus to speak, not of his desire to die, but of the burden laid on him, and the power given to others against him.

2. Had the doctrine been explained no further, there would have been much to wait for. But the series of announcements in these passages leads up to one more definite and complete. It cannot be denied that the words of the institution of the Lord's supper speak most distinctly of a sacrifice: "Drink ye all of this, for this is my blood of the new covenant;" or, to follow Luke, "the new covenant in my blood." We are carried back by these words to the first covenant, to the altar with twelve pillars, and the burnt-offerings and peace-offerings of oxen, and the blood of the victims sprinkled on the altar and on the people, and the words of Moses as he sprinkled it: "Behold the blood of the covenant which the Lord hath made with you concerning all these words" (Exod. xxiv). No interpreter has ever failed to draw from these passages the true meaning: "When my sacrifice is accomplished, my blood shall be the sanction of the new covenant." The word "sacrifice" is wanting; but sacrifice, and nothing else, is described. And the words are no mere figure used for illustration, and laid aside when they have served that turn. "Do this in remembrance of me." They are the words in which the Church is to interpret the act of Jesus to the end of time. They are reproduced exactly by Paul (1 Cor. xi, 25). Then, as now, Christians met together, and by a solemn act declared that they counted the blood of Jesus as a sacrifice wherein a new covenant was sealed; and of the blood of that sacrifice they partook by faith, professing themselves thereby willing to enter the covenant and be sprinkled with the blood.

3. So far we have examined the three "synoptic" Gospels. They follow a historical order. In the early chapters of all three the doctrine of our Lord's sacrifice is not found, because he will first answer the question about himself, "Who is this?" before he shows them "What is his work." But at length the announcement is made, enforced, repeated; until, when the feet of the betrayer are ready for their wicked errand, a command is given which secures that the death of Jesus shall be described forever as a sacrifice and nothing else, sealing a new covenant and carrying good to many. Lest the doctrine of atonement should seem to be an after-thought, as, indeed, De Wette has tried to represent it, John preserves the conversation with Nicodemus, which took place early in the ministry; and there, under the figure of the brazen serpent lifted up, the atoning virtue of the Lord's death is fully set forth. "As Moses lifted up the serpent in the wilderness, even so must the Son of Man be lifted up; that whosoever believeth in him should not perish, but have eternal life" (John iii, 14, 15). As in this intercessory act the image of the deadly, hateful, and accursed (Gen. iii, 14, 15) reptile became by God's decree the means of health to all who looked on it earnestly, so does Jesus in the form of sinful man, of a deceiver of the people (Matt. xxvii, 63), of Antichrist (xii, 24; John xviii, 33), of one accursed (Gal. iii, 13), become the means of our salvation; so that whoever fastens the earnest gaze of faith on him shall not perish, but have eternal life. There is even a significance in the words "lifted up;" the Lord used, probably, the word *רָفָא*, which, in older Hebrew, meant to "lift up" in the widest sense, but began in the Aramaic to have the restricted meaning of "lifting up for punishment." With Christ the lifting-up was a seeming disgrace, a true triumph and elevation. But the context in which these verses occur is as important as the verses themselves. Nicodemus comes as an inquirer; he is told that a man must be born again, and then he is directed to the death of Jesus as the means of that regeneration. The earnest gaze of the wounded soul is to be the condition of its cure; and that gaze is to be turned, not to Jesus on the mountain or in the temple, but on the cross. This, then, is no passing allusion, but it is the substance of the Christian teaching addressed to an earnest seeker after truth.

Another passage claims a reverent attention—"If any man eat of this bread, he shall live forever: and the bread that I will give is my flesh, which I will give for the life of the world" (John vi, 51). He is the bread; and he will give the bread. If his presence on earth were the expected food, it was given already; but would he speak of "drinking his blood" (ver. 53), which can only refer to the dead? It is on the cross that he will afford this food to his disciples. We grant that this whole passage has occasioned as much disputing among Christian commentators as it did among the Jews who heard it; and for the same reason—for the hardness of the saying. But there stands the saying; and no candid person can refuse to see a reference in it to the death of him that speaks.

In that discourse, which has well been called the prayer of consecration offered by our High-priest, there is another passage which cannot be alleged as evidence to one who thinks that any word applied by Jesus to his disciples and himself must bear in both cases precisely the same sense, but which is really pertinent to this inquiry—"Sanctify them through thy truth: thy word is truth. As thou hast sent me into the world, even so have I also sent them into the world. And for their sakes I sanctify myself that they also might be sanctified through the truth" (John xvii, 17-19). The word *ἁγιάζω*, "sanctify," "consecrate," is used in the Sept. for the offering of sacrifice (Lev. xxii, 2) and for the dedication of a man to the divine service (Numb. iii, 16). Here the present tense, "I consecrate," used in a discourse in which our Lord says he is "no more

in the world," is conclusive against the interpretation "I dedicate my life to thee;" for life is over. No self-dedication, except that by death, can now be spoken of as present. "I dedicate myself to thee, in my death, that these may be a people consecrated to thee;" such is the great thought in this sublime passage, which suits well with his other declaration that the blood of his sacrifice sprinkles them for a new covenant with God. To the great majority of expositors from Chrysostom and Cyril the doctrine of reconciliation through the death of Jesus is asserted in these verses.

The Redeemer has already described himself as the Good Shepherd who lays down his life for the sheep (John x, 11, 17, 18), taking care to distinguish his death from that of one who dies against his will in striving to compass some other aim—"Therefore doth my Father love me, because I lay down my life that I might take it again. No man taketh it from me, but I lay it down of myself. I have power to lay it down, and I have power to take it again."

Other passages that relate to his death will occur to the memory of any Bible reader. The corn of wheat that dies in the ground to bear much fruit (John x, 24) is explained by his own words elsewhere, where he says that he came "to minister, and to give his life a ransom for many" (Matt. xx, 28).

4. Thus, then, speaks Jesus of himself. What say his witnesses of him? "Behold the Lamb of God," says the Baptist, "which taketh away the sin of the world" (John i, 29). Commentators differ about the allusion implied in that name. But take any one of their opinions, and a sacrifice is implied. Is it the paschal lamb that is referred to? Is it the lamb of the daily sacrifice? Either way the death of the victim is brought before us. But the allusion, in all probability, is to the well-known prophecy of Isaiah (ch. liii), to the Lamb brought to the slaughter, who bore our griefs and carried our sorrows. See this passage discussed fully in the notes of Meyer, Lange (*Bibelwerke*), and Alford. The reference to the paschal lamb finds favor with Grotius and others; the reference to Isaiah is approved by Chrysostom and many others. The taking-away of sin (*αἰρεῖν*) of the Baptist, and the bearing it (*φέρειν*, Sept.) of Isaiah, have one meaning and answer to the Hebrew word *נָשָׂא*. To take the sins on himself is to remove them from the sinners; and how can this be through his death except in the way of expiation by that death itself?

5. The apostles, after the resurrection, preach no moral system, but a belief in and love of Christ, the crucified and risen Lord, through whom, if they repent, men shall obtain salvation. This was Peter's preaching on the day of Pentecost (Acts ii); and he appealed boldly to the prophets on the ground of an expectation of a suffering Messiah (iii, 18). Philip traced out for the eunuch, in that picture of suffering holiness in the well-known chapter of Isaiah, the lineaments of Jesus of Nazareth (Acts viii; Isa. liii). The first sermon to a Gentile household proclaimed Christ slain and risen, and added "that through his name whosoever believeth in him shall receive remission of sins" (Acts x). Paul at Antioch preaches "a Saviour Jesus" (xiii, 23); "through this Man is preached unto you the forgiveness of sins, and by him all that believe are justified from all things from which ye could not be justified by the law of Moses" (ver. 38, 39). At Thessalonica all that we learn of this apostle's preaching is "that Christ must needs have suffered and risen again from the dead; and that this Jesus, whom I preach unto you, is Christ" (xvii, 3). Before Agrippa he declared that he had preached always "that Christ should suffer, and that he should be the first that should rise from the dead" (xxvi, 23); and it was this declaration that convinced his royal hearer that he was a crazed fanatic. The account of the first founding of the Church in the Acts of the Apostles is concise and fragmentary; and

sometimes we have hardly any means of judging what place the sufferings of Jesus held in the teaching of the apostles; but when we read that they "preached Jesus," or the like, it is only fair to infer from other passages that the cross of Christ was never concealed, whether Jews or Greeks or barbarians were the listeners. And this very pertinacity shows how much weight they attached to the facts of the life of our Lord. They did not merely repeat in each new place the pure morality of Jesus as he uttered it in the Sermon on the Mount: of such lessons we have no record. They took in their hands, as the strongest weapon, the fact that a certain Jew crucified afar off in Jerusalem was the Son of God, who had died to save men from their sins; and they offered to all alike an interest, through faith, in the resurrection from the dead of this outcast of his own people. No wonder that Jews and Greeks, judging in their worldly way, thought this strain of preaching came of folly or madness, and turned from what they thought unmeaning jargon.

6. We are able to complete from the epistles our account of the teaching of the apostles on the doctrine of atonement. "The Man Christ Jesus" is the mediator between God and man, for in him the human nature, in its sinless purity, is lifted up to the divine, so that he, exempt from guilt, can plead for the guilty (1 Tim. ii, 5; 1 John ii, 1, 2; Heb. vii, 25). Thus he is the second Adam that shall redeem the sin of the first; the interests of men are bound up in him, since he has power to take them all into himself (Eph. v, 29, 30; Rom. v, 12, 17; xii, 5; 1 Cor. xv, 22). This salvation was provided by the Father, to "reconcile us to himself" (2 Cor. v, 18), to whom the name of "Saviour" thus belongs (Luke i, 47); and our redemption is a signal proof of the love of God to us (1 John iv, 10). Not less is it a proof of the love of Jesus, since he freely lays down his life for us—offers it as a precious gift, capable of purchasing all the lost (1 Tim. ii, 6; Tit. ii, 14; Eph. i, 7; comp. Matt. xx, 28). But there is another side of the truth more painful to our natural reason. How came this exhibition of divine love to be needed? Because wrath had already gone out against man. The clouds of God's anger gathered thick over the whole human race; they discharged themselves on Jesus only. God has made him to be sin for us (who knew no sin (2 Cor. v, 21); he is made "a curse" (a thing accursed) for us that the curse that hangs over us may be removed (Gal. iii, 13); he bore our sins in his own body on the tree (1 Pet. ii, 24). There are those who would see on the page of the Bible only the sunshine of the divine love; but the muttering thunders of divine wrath against sin are heard there also; and he who alone was no child of wrath meets the shock of the thunder-storm, becomes a curse for us and a vessel of wrath; and the rays of love break out of that thunder-gloom and shine on the bowed head of him who hangs on the cross, dead for our sins.

7. We have spoken, and advisedly, as if the New Test. were, as to this doctrine, one book in harmony with itself. That there are in the New Test. different types of the one true doctrine may be admitted without peril to the doctrine. The principal types are four in number.

(1.) In the Epistle of James there is a remarkable absence of all explanations of the doctrine of the atonement; but this admission does not amount to so much as may at first appear. True, the key-note of the epistle is that the Gospel is the law made perfect, and that it is a practical moral system in which man finds himself free to keep the divine law. But with him Christ is no mere lawgiver appointed to impart the Jewish system. He knows that Elias is a man like himself, but of the person of Christ he speaks in a different spirit. He calls himself "a servant of God and of the Lord Jesus Christ," who is "the Lord of glory." He speaks of the Word of Truth of which Jesus has been the utterer. He knows that faith in the Lord of glory is in-

consistent with time-serving and "respect of persons" (James i, 1, 18; ii, 1). "There is one lawgiver," he says, "who is able to save and to destroy" (iv, 12); and this refers, no doubt, to Jesus, whose second coming he holds up as a motive to obedience (v, 7-9). These and like expressions remove this epistle far out of the sphere of Ebionitish teaching. The inspired writer sees the Saviour, in the Father's glory, preparing to return to judge the quick and dead. He puts forth Christ as prophet and king, for he makes him teacher and judge of the world; but the office of the priest he does not dwell on. Far be it from us to say that he knows it not. Something must have taken place before he could treat his hearers with confidence, as free creatures able to resist temptations, and even to meet temptations with joy. He treats "your faith" as something founded already, not to be prepared by this epistle (i, 2, 3, 21). His purpose is a purely practical one. There is no intention to unfold a Christology such as that which makes the Epistle to the Romans so valuable. Assuming that Jesus has manifested himself and begotten anew the human race, he seeks to make them pray with undivided hearts, and be considerate to the poor, and strive with lusts, for which they, and not God, are responsible; and bridle their tongues, and show their fruits by their works (see Neander, *Pflanzung*, b. vi, c. 3; Schmid, *Theologie des N. T.* pt. ii; and Dorner, *Christologie*, i, 95).

(2.) In the teaching of Peter the doctrine of the person of our Lord is connected strictly with that of his work as Saviour and Messiah. The frequent mention of his sufferings shows the prominent place he would give them; and he puts forward as the ground of his own right to teach that he was "a witness of the sufferings of Christ" (1 Pet. v, 1). The atoning virtue of those sufferings he dwells on with peculiar emphasis, and not less so on the purifying influence of the atonement on the hearts of believers. He repeats again and again that Christ died for us (ii, 21; iii, 18; iv, 1); that he bare our sins in his own body on the tree (ii, 24). He bare them; and what does this phrase suggest but the goat that "shall bear" the iniquities of the people off into the land that was not inhabited? (Lev. xvi, 22), or else the *feeling the consequences* of sin, as the word is used elsewhere (xx, 17, 19)? We have to choose between the cognate ideas of sacrifice and substitution. Closely allied with these statements are those which connect moral reformation with the death of Jesus. He bare our sins that we might live unto righteousness. His death is our life. We are not to be content with a self-satisfied contemplation of our redeemed state, but to live a life worthy of it (1 Pet. ii, 21-25; iii, 15-18). In these passages the whole Gospel is contained; we are justified by the death of Jesus, who bore our sins that we might be sanctified and renewed to a life of godliness. And from this apostle we hear again the name of "the lamb," as well as from John the Baptist; and the passage of Isaiah comes back upon us with unmistakable clearness. We are redeemed "with the precious blood of Christ, as of a lamb without blemish and without spot" (i, 18, 19, with Isa. liii, 7). Every word carries us back to the Old Test. and its sacrificial system: the spotless victim, the release from sin by its blood (elsewhere [1 Pet. i, 2] by the *sprinkling* of its blood), are here; not the type and shadow, but the truth of them; not a ceremonial purgation, but an effectual reconciliation of man and God.

(3.) In the inspired writings of John we are struck at once with the emphatic statements as to the divine and human natures of Christ. A right belief in the incarnation is the test of a Christian man (1 John iv, 2; John i, 14; 2 John 7); we must believe that Jesus Christ is come in the flesh, and that he is manifested to destroy the works of the devil (1 John iii, 8). And, on the other hand, he who has come in the flesh is the one who alone has been in the bosom of the Father, seen the things that human eyes have never seen, and has come to de-

clare them unto us (i, 2; iv, 14; John i, 14-18). This person, at once divine and human, is "the propitiation for our sins," our "advocate with the Father," sent into the world "that we might live through him;" and the means was his laying down his life for us, which should make us ready to lay down our lives for the brethren (1 John i, 7; ii, 1, 2; iii, 16; iv, 9, 10; v, 6, 11-13; John xi, 51). And the moral effect of his redemption is that "the blood of Jesus Christ cleanseth us from all sin" (1 John i, 7). The intimate connection between his work and our holiness is the main subject of his first epistle, "Whosoever is born of God doth not commit sin (iii, 9). As with Peter, so with John; every point of the doctrine of the atonement comes out with abundant clearness. The substitution of another, who can bear our sins, for us who cannot; the sufferings and death as the means of our redemption, our justification thereby, and our progress in holiness as the result of our justification.

(4.) To follow out as fully, in the more voluminous writings of Paul, the passages that speak of our salvation would far transcend the limits of our paper. Man, according to this apostle, is a transgressor of the law. His conscience tells him that he cannot act up to that law, which, the same conscience admits, is divine, and binding upon him. Through the old dispensations man remained in this condition. Even the law of Moses could not justify him: it only by its strict behests held up a mirror to conscience that its frailness might be seen. Christ came, sent by the mercy of our Father who had never forgotten us; given to, not deserved by us. He came to reconcile men and God by dying on the cross for them, and bearing their punishment in their stead (2 Cor. v, 14-21; Rom. v, 6-8). He is "a propitiation through faith in his blood" (iii, 25, 26; comp. Lev. xvi, 15) (*ἱλαστήριον* means "victim for expiation")—words which most people will find unintelligible, except in reference to the Old Test. and its sacrifices. He is the ransom, or price paid, for the redemption of man from all iniquity (Titus ii, 14). Still stronger in 1 Tim. ii, 6, "ransom instead of" (*ἀντίλυτρον*); also Eph. i, 7 (*ἀπολύτρωσις*); 1 Cor. vi, 20; vii, 23. The wrath of God was against man, but it did not fall on man. God made his Son "to be sin for us," though he knew no sin; and Jesus suffered, though men had sinned. By this act God and man were reconciled (Rom. v, 10; 2 Cor. v, 18-20; Eph. ii, 16; Col. i, 21). On the side of man, trust and love and hope take the place of fear and of an evil conscience; on the side of God, that terrible wrath of his, which is revealed from heaven against all ungodliness and unrighteousness of men, is turned away (Rom. i, 18; v, 9; 1 Thess. i, 10). The question whether we are reconciled to God only, or God is also reconciled to us, might be discussed on deep metaphysical grounds; but we purposely leave that on one side, content to show that at all events the intention of God to punish man is averted by this "propitiation" and "reconciliation." See RECONCILIATION.

Different views are held about the authorship of the Epistle to the Hebrews by modern critics, but its numerous points of contact with the other epistles of Paul must be recognised. In both the incompleteness of Judaism is dwelt on; redemption from sin and guilt is what religion has to do for men, and this the law failed to secure. In both, reconciliation and forgiveness and a new moral power in the believers are the fruits of the work of Jesus. In the Epistle to the Romans, Paul shows that the law failed to justify, and that faith in the blood of Jesus must be the ground of justification. In the Epistle to the Hebrews the same result follows from an argument rather different: all that the Jewish system aimed to do is accomplished in Christ in a far more perfect manner. The Gospel has a better priest, more effectual sacrifices, a more profound peace. In the one epistle the law seems set aside wholly for the system of faith; in the other the law is exalted and glorified in its Gospel shape; but the aim is precisely the

same—to show the weakness of the law and the effectual fruit of the Gospel.

8. We are now in a position to see how far the teaching of the New Test. on the effects of the death of Jesus is continuous and uniform. Are the declarations of our Lord about himself the same as those of James and Peter, John and Paul? and are those of the apostles consistent with each other? The several points of this mysterious transaction may be thus roughly described:

(1.) God sent his Son into the world to redeem lost and ruined men from sin and death, and the Son willingly took upon him the form of a servant for this purpose; and thus the Father and the Son manifested their love for us.

(2.) God the Father laid upon his Son the weight of the sins of the whole world, so that he bore in his own body the wrath which men must else have borne, because there was no other way of escape for them; and thus the atonement was a manifestation of divine justice.

(3.) The effect of the atonement thus wrought is that man is placed in a new position, freed from the dominion of sin, and able to follow holiness; and thus the doctrine of the atonement ought to work in all the hearers a sense of love, of obedience, and of self-sacrifice.

In shorter words, the sacrifice of the death of Christ is a proof of divine love and of divine justice, and is for us a document of obedience.

Of the four great writers of the New Test., Peter, Paul, and John set forth every one of these points. Peter, the "witness of the sufferings of Christ," tells us that we are redeemed with the blood of Jesus, as of a lamb without blemish and without spot; says that Christ bore our sins in his own body on the tree. If we "have tasted that the Lord is gracious" (1 Pet. ii, 3), we must not rest satisfied with a contemplation of our redeemed state, but must live a life worthy of it. No one can well doubt, who reads the two epistles, that the love of God and Christ, and the justice of God, and the duties thereby laid on us, all have their value in them; but the love is less dwelt on than the justice, while the most prominent idea of all is the moral and practical working of the cross of Christ upon the lives of men.

With John, again, all three points find place. That Jesus willingly laid down his life for us, and is an advocate with the Father; that he is also the propitiation, the suffering sacrifice, for our sins; and that the blood of Jesus Christ cleanseth us from all sin, for that whoever is born of God doth not commit sin—all are put forward. The death of Christ is both justice and love, both a propitiation and an act of loving self-surrender; but the moral effect upon us is more prominent even than these.

In the epistles of Paul the three elements are all present. In such expressions as a ransom, a propitiation, who was "made sin for us," the wrath of God against sin, and the mode in which it was turned away, are presented to us. Yet not wrath alone. "The love of Christ constraineth us; because we thus judge that if one died for all, then were all dead: and that he died for all, that they which live should not henceforth live unto themselves, but unto him which died for them and rose again" (2 Cor. v, 14, 15). Love in him begets love in us, and in our reconciled state the holiness which we could not practice before becomes easy.

The reasons for not finding in James similar evidence we have spoken of already.

Now, in which of these points is there the semblance of contradiction between the apostles and their Master? In none of them. In the gospels, as in the epistles, Jesus is held up as the sacrifice and victim, draining a cup from which his human nature shrank, feeling in himself a sense of desolation such as we fail utterly to comprehend on a theory of human motives. Yet no one takes from him his precious redeeming life; he lays it down of himself, out of his great love for men. But men are to deny themselves, and take up their cross and

tread in his steps. They are his friends only if they keep his commands and follow his footsteps.

We must consider it proved that these three points or elements are the doctrine of the whole New Test. What is there about this teaching that has provoked in times past and present so much disputation? Not the hardness of the doctrine—for none of the theories put in its place are any easier—but its want of logical completeness. Sketched out for us in a few broad lines, it tempts the fancy to fill it in and lend it color; and we do not always remember that the hands that attempt this are trying to make a mystery into a theory, an infinite truth into a finite one, and to reduce the great things of God into the narrow limits of our little field of view. To whom was the ransom paid? What was Satan's share of the transaction? How can one suffer for another? How could the Redeemer be miserable when he was conscious that his work was one which could bring happiness to the whole human race? Yet this condition of indefiniteness is one which is imposed on us in the reception of every mystery. Prayer, the incarnation, the immortality of the soul, are all subjects that pass far beyond our range of thought. Here we see the wisdom of God in connecting so closely our redemption with our reformation. If the object were to give us a complete theory of salvation, no doubt there would be in the Bible much to seek. The theory is gathered by fragments out of many an exhortation and warning; nowhere does it stand out entire, and without logical flaw. But if we assume that the New Test. is written for the guidance of sinful hearts, we find a wonderful aptness for that particular end. Jesus is proclaimed as the saviour of our fears, as the founder of our moral life, as the restorer of our lost relation with our Father. If he had a cross, there is a cross for us; if he pleased not himself, let us deny ourselves; if he suffered for sin, let us hate sin. And the question ought not to be, What do all these mysteries mean? but Are these thoughts really such as will serve to guide our life and to assuage our terrors in the hour of death? The answer is twofold—one from history and one from experience. The preaching of the cross of the Lord even in this simple fashion converted the world. The same doctrine is now the ground of any definite hope that we find in ourselves of forgiveness of sins and of everlasting life. See Thomson, essay on the "Death of Christ," in *Aids to Faith*.

Saviour, St., ORDER OF, a name applied to the Order of St. Bridget (q. v.), because it was pretended that our Saviour personally dictated to the founders the rules and constitution of the order.—Gardner, *Faiths of the World*, s. v.

Savonarola, GIROLAMO, an Italian monk, reformer, and martyr, the leader of an incipient reformation of the Church in the latter half of the 15th century, a man whose eventful life and tragic death have called forth the most contradictory judgments, and whose real character is even to this day a matter of dispute with certain historians. Savonarola was born of an honorable family at Ferrara, Sept. 21, 1452. His education was carefully conducted. It was intended that he should devote himself to natural and medical science, but his early religious development turned him into another course. He was fond of solitude, and avoided the public walks of the ducal palace. Impressed with terror at the wickedness which he saw about him, he finally, in his twenty-third year, fled from his home and friends and took refuge in a Dominican cloister at Bologna. Two days after his arrival in Bologna he wrote to his parents, begging their forgiveness and blessing, and averring as his excuse that he was utterly unable to endure the spectacle of the wickedness of Italian society. He also declared that he had simply followed out a divine impulse given him in prayer, and that he felt that he should be ready to suffer anything, even death, rather than disobey the voice of duty.

At first Savonarola desired to be simply a lay brother,

and to perform the commonest menial services; but his superior saw his gifts, and charged him from the start with the teaching of what was then called philosophy and physics. His chief authorities in this teaching were the great Dominican theologian Thomas Aquinas, the Church father St. Augustine, and, above all, the Holy Scriptures. The latter he knew almost by heart. He was particularly fond of the Old-Test. prophets and of the Apocalypse. It was in the study of these that his spiritual imagination nurtured itself, and attained such an intense vividness as to make it easy for him to assume to himself too much of the prophetic character. His first attempts at preaching were without special results. His voice was harsh, his gestures awkward, his language clumsy and scholastic. His audience was not attracted. But, while on a visit to Brescia, his power broke forth suddenly, as waters from a pent-up fountain. The people flocked to him in great crowds to hear his imaginative exposition of the Apocalypse; and the impression was not lessened when he made definite inferences ("non per rivelazione, ma per ragione delle Scritture") as to calamities which were soon to fall upon Italy. But his politico-reformatory labors began only in his thirty-eighth year (1490), when he was appointed as *lector* in the Dominican cloister of San Marco, Florence. His two leading thoughts now were, reformation of the Church and emancipation of Italy. In carrying out these, he shook to its foundations the Florentine government, raised against himself the anathemas of the hierarchy, and finally fell himself a victim to the task. See Rule, *Dawn of the Reformation* (Lond. 1855).

The family of the Medici had raised Florence to a high degree of prosperity, and were enjoying princely power under the forms of a republic. Cosmo de' Medici (died 1464) was the Rothschild of the age. His gifted nephew Lorenzo (died 1492) followed in his footsteps, promoted commerce, letters, and philosophy, and made Florence the temporary centre of a golden age. But beneath the outward polish of refined culture, the moral corruption of high and low festered as an ulcer. In 1492 Lorenzo's son Pietro II followed him as master of Florence, while his younger son, Giovanni—who was made a cardinal at the age of twelve, four years before his father's death—aimed at the papal chair. Such was the condition of Florence at the time when Savonarola began his efforts at political and ecclesiastical reform. He began his lectures in the cloister; then transferred them to the cloister garden; and, when the multitude overflowed this, he repaired to a spacious church. Here, on Aug. 1, 1491, he commenced his elucidation of the Apocalypse before an immense multitude. "The Church must be renewed," said he; "but previously God will send severe judgments upon Italy, and that, too, speedily." He tore off the thin disguise of glory from the much-boasted Medicean age, and exposed the great gulf of moral rottenness beneath. He spared neither rank nor sex nor age; neither pope nor monk nor layman. "Your sins," exclaimed he, "make me a prophet! Hitherto I have been but as Jonah warning Nineveh. But, if you heed not my words, I shall be as Jeremiah, predicting your destruction, and weeping over the ruins: for God will renew his Church, and that will not take place without blood."

It was not a doctrinal, but a moral reformation, which he more immediately contemplated; and closely with this he connected the restoration of the former liberties of the republic. In the main he was in accord with Catholic orthodoxy, and he carried the monkish principles of abstinence and self-denial to an intense extreme. But he laid great emphasis on certain doctrines which the clergy of the age had greatly neglected, viz. that the Scriptures lead us chiefly to Christ, and not to the saints; that without the forgiveness of God no priestly absolution is of any avail; and that salvation comes of faith and submission to the Redeemer, and not from outward works or educational polish. Still there was felt throughout his sermons rather more of the earnestness

of the law than of the gentleness of the Gospel. One year after his arrival in Florence he was made prior of San Marco. Contrary to all precedent, Savonarola omitted to call and pay his respects to the civil ruler of the city, Lorenzo. This was all the more singular as Lorenzo had made large gifts to San Marco, and had always shown all respect to the priesthood. But Savonarola saw in him simply the incarnation of worldliness, and the robber of his country's liberties. He feared his friendship more than his hatred. Lorenzo resorted to all the arts of cunning and flattery, but in vain; he did not win the smiles of the stern preacher of righteousness. Lorenzo died April 8, 1492. On his death-bed he sent for Savonarola and desired absolution. Savonarola exacted three things: faith in Christ; the restoration of all ill-gotten property; and the re-establishment of the city's liberties. To the first two he cheerfully assented; to the latter he demurred. Thereupon the stern prior of San Marco departed. This third demand is not mentioned by Politian; it may be apocryphal.

The death of Lorenzo was the signal for the outbreak of the storm. He was succeeded by his rash and arbitrary son, Pietro II. The same year the notorious cardinal Borgia ascended the papal throne as Alexander VI. Savonarola continued his exhortations to repentance and his predictions of speedy judgments. "A storm will break in," said he, "a storm that will shake the mountains; over the Alps there will come against Italy one like Cyrus of whom Isaiah wrote." Soon thereafter Charles VIII of France actually came with a great army, not to reform the Church, however, but to take the vacant throne of Naples. Pietro Medici capitulated without resistance. Thereupon the wrath of the people broke out, and the Medici were forced to fly to Bologna. The senate pronounced them traitors, and set a price on their heads. But, as the aristocratic faction still desired to retain all political offices, Savonarola summoned a great popular assembly in the cathedral, and assumed the rôle of a theocratic tribune. By general consent he became the legislator of Florence. As the foundation of the new order of things, he proposed four principles: (1) fear God; (2) prefer the weal of the republic to thine own; (3) a general amnesty; (4) a council after the pattern of Venice, but without a doge. His political maxims he borrowed mostly from Aquinas. He was not opposed to monarchy, but he believed that circumstances called for a democracy in Florence. "God alone will be thy king, O Florence!" exclaimed he; "even as he was king in Israel under the old covenant." The ruling element in this "city of God" was to be, not self-seeking, but love—love to God and love to the neighbor. "How can we have peace with God if we have it not with each other?" *Viva Cristo, viva Firenze!* responded the people to the proposition of the enthusiastic monk, and, in the beginning of 1495, committed to him the remodelling of the state. With the details of the new order of things he did not, however, concern himself. His attitude was rather that of a judge in Israel, or of a Roman censor with dictatorial power. He regarded himself as the organ of Christ for the Christocratic republic. He guided it with his counsels, and breathed into it from his throne, the pulpit, a deep moral and religious earnestness. His influence over the people lasted for three years, and was of unprecedented power. This is the testimony not only of the prudent historian Guicciardini, but of the deep-seeing Machiavelli. The latter ascribes his downfall to the envy of the people, who can never long endure the spectacle of one great character towering above all the others.

With the new constitution, a new spirit took possession of the people. Unrighteous gains were given up; deadly enemies embraced each other in love; secular sports came to an end; vows of continence were made by husbands and wives; profane love songs gave place to hymns of love for Christ; artists cast their nude paintings into the fire; fasting became a delight; the

communion was partaken of daily; never-wearying crowds thronged to the great cathedral, over whose pulpit were inscribed the words: "Jesus Christ, the King of Florence;" committees traversed the city gathering up and destroying bad books, cards, and instruments of music; the carnival gave place to a Palm-Sunday procession in which thousands of children and of adults, dressed in white, indulged in sacred dances and sang very odd Christian songs, of which the following verse is a fair sample:

"Non fu mai più bel solazzo,
Più giocondo ne maggiore,
Che per zelo e per amore
Di Gesù divenir pazzo.
Ognun grida com' io grido,
Semper pazzo, pazzo, pazzo."

This popular excess Savonarola justified on the Monday after Holy Week, 1496, by citing the example of David dancing before the ark, and by the phenomena of Pentecost after the ascension.

But all this was but a transient enthusiasm of an excitable populace. The general character of levity had been too deeply implanted by ages of prosperity and submission to demagogues to be able now to assume suddenly the self-control and steadfastness which are so essential to a religious and free government, and a reaction was inevitable. It came only too soon. The worldly spirit reasserted itself in the form of opposition to the monk's régime at home and of alliance with the pope from without. No more violent contrast could be imagined than the austere Savonarola and the profligate and infamous pope Alexander VI. It was impossible that these two could live in peace at the head of neighboring states. Savonarola hesitated not to attack the character of the papal court as it deserved; and he openly proclaimed his hope that the reform begun in Florence would eventually embrace the whole of Italy. The papal court saw the necessity of putting down so bold a foe. Strategy was at first resorted to. Savonarola was invited to come to Rome; and a cardinal's hat and the archbishopric of Florence were offered to him. He answered the pope in strangely prophetic words: "I desire none of your gifts; I will have no other red hat than that which you have given to other servants of Christ—the red hat of martyrdom." Then Alexander commanded him to come to Rome. Savonarola excused himself on the ground of his feeble health; and he continued to preach against Rome. Thereupon the pope (in the autumn of 1496) forbade him further preaching on pain of excommunication, until the termination of his trial for heresy, which was now to be commenced. At the same time, the jealousy of the Franciscan order, at the prominence of this Dominican, fell upon him. Savonarola ceased preaching for a time; but then, unable to restrain the spirit within him, recommenced. "The pope," said he, "is ill-informed and misguided. It is not the ideal pope who has forbidden me to preach; the true pope is the incarnation of the spirit of Christ; and Christ cannot be against the spirit of love, otherwise he would be against himself. This wicked order is, therefore, not from the pope. I must preach, because God has called me thereto." So reasoned Savonarola; so endeavored he to reconcile disobedience to the visible pope with obedience to the Catholic Church. Meantime political affairs took an unfavorable turn for Savonarola. Charles VIII was forced to retire from Italy in inglorious failure. Combined Italy was hostile to Florence because of its alliance with the French. Also a pestilence and famine broke out in Florence (June, 1497), against which Savonarola could furnish no miraculous remedy. The party of the Medici made an attempt to seize the government; this failed, and ended with the execution (Aug. 21, 1497) of five prominent men. The avengers of their blood now watched for Savonarola's life. His followers now surrounded him with an armed guard; it was only thus that he could reach his pulpit.

The pope, learning of the decline of Savonarola's popularity, excommunicated him, first in May, 1497, and

then more emphatically in October, forbidding all Christians to have any intercourse with him, and threatening the city with the interdict. Savonarola, encouraged by a favorable council which was elected Jan. 1, 1498, ascended the cathedral pulpit, denied the charge of heresy, declared null and void the excommunication, and appealed from the human pope to the heavenly head of the Church. He also boldly summoned the crowned heads of all Christendom to unite in calling a general council, to depose this pretended pope, and to heal the wounds of the Church. And yet Savonarola plainly foresaw the fatal result to himself of the present contest. "To the *cause* there can be no other outcome than victory; but to *me* it will be death." An incautious step which Savonarola now took precipitated the end. From the balcony of San Marco he asked God to consume him with fire if he had acted from unchristian motives. A Franciscan monk offered to stand the ordeal of fire against him. Savonarola hesitated. An enthusiastic monk of San Marco offered to undergo the test in Savonarola's place; then the whole body of Dominicans declared themselves also ready. Savonarola consented. The issue in controversy was the righteousness of Savonarola and the invalidity of his excommunication. A monk was selected from each order. Two great ranges of fire, close beside each other, were prepared on the great square. The two orders of monks marched in with song and banners through the innumerable multitude; but, just as the moment arrived for the test, a violent disagreement arose as to whether the parties standing the ordeal should bear the crucifix and host. The contest lasted until evening, when a violent rain put out the remnant of the fire. The people dispersed amid loud murmurs, and the whole weight of their displeasure fell upon Savonarola. The fickle people now charged him with being an impostor and a coward, and it was due to his armed guards that he left the spot alive. On the next day—Palm-Sunday, 1498—his enemies besieged him in San Marco; he disdained earthly weapons, and fell upon his face in prayer. As he was taken and conducted to judgment he was greeted with all manner of abuse. His adherents were expelled from the council, and a hasty trial was entered upon. On six successive days he was dragged forth and examined under the severest tortures. During the few days of his imprisonment he wrote a beautiful exposition of the 51st Psalm, which Luther afterwards published as a tract. He was then examined again, by torture, before a clerical tribunal; it was but a mere form. He was sentenced to be hanged and burned. He was thus executed with and between two of his friends, May 23, 1498. At the foot of the scaffold he had administered the eucharist to himself and his two friends. "My Lord was pleased to die for my sins; why should not I be glad to give up my poor life out of love to him?" With such words he closed his eyes upon the world and yielded to the gibbet and the flames.

The Dominican order endeavored in later years to effect his canonization. Luther said that God had already canonized him. Though not a dogmatic reformer in the sense of Luther, Zwingli, or Calvin, Savonarola yet holds a most honorable place by the side of Wycliffe, Huss, and Wessel, as a forerunner of the great Reformation. Monuments were erected to Savonarola in San Marco, Florence, in 1873, and in Ferrara, May 23, 1875. Savonarola left numerous writings. In his *Triumphus Crucis* (*Trionfo della Croce* [1597]), he tries to turn the Church away from its modern corruptions to Christ as the centre of all moral power. In his *De Divisione Omnium Scientiarum* he opposes pagan writers and praises the riches of the fathers. Recently (1845) his sermons (*Prediche*) were printed at Florence; also his poems (*Poesie*) in 1862. A portion of his works was published at Lyons, in six volumes, in 1633-40. His *Life* has been written by Carle (Paris, 1842); by Madden (Lond. 1853); by Perrens (Paris, 1853, 2 vols.; 3d ed. 1859); by Villari (Florence, 1859-61, 2 vols.); of the

latter, a French translation by G. Gruyer (1874, 2 vols). His earlier biographers were: Burlamachi (died 1519), G. F. Picodella Mirandola, and Bartoli. Excellent modern German biographers are: Rudelbach [A. G.], *Savonarola* (Hamb. 1835); Meier [F. K.], *Savonarola* (Berl. 1836); Hase, *Neue Propheten* (Leips. 1851). See the historical works of Guicciardini, Nardi, Roscoe, Machiavelli, Sismondi, and especially Villari, *History of Savonarola* (from the Italian, by Horner [Lond. 1863, 2 vols. 8vo]); Madden, *Life of Savonarola* (Lond. 1853, 2 vols. 8vo); also the *Brit. Quarterly*, Oct. 1849; *Eclectic Review*, Dec. 1853; *Christian Remembrancer*, Oct. 1858; *Prot. Episc. Review*, Oct. 1860; *Baptist Quarterly*, Oct. 1873; *London Quar. Rev.* July, 1856; *Methodist Quar. Rev.* Oct. 1867; Schaff in Herzog, *Real-Encyclop.* xiii, 444, 455. (J. P. L.)

Savor (usually סַוּר, *sāṭṭā*, a *smell* or *scent*, as elsewhere rendered; סָמָה, elsewhere "odor;" but a perfume is חַלְדִּית, *chaldith*, *incense*; שֶׁשֶׁם, and a stink is Heb. בָּצָח. Besides its literal sense, this word is used metaphorically to imply character or reputation, and also the degree of acceptance with which any person or thing is received (2 Cor. ii, 14, etc.). In Matt. xvi, 23; Mark viii, 33, *φρονέω*, to *think*, is rendered "savor," in the sense of being *flavored* with (or, as the old Saxon use of the verb seems to warrant, in the entirely different signification of *being mended*; see *Bible Educator*, iv, 208). So in Matt. v, 13, *μωραίνω*, to *become foolish*, is applied to the loss of that sharp quality in salt by which it renders other bodies agreeable to the taste. See SALT.

Savory Meat (סַוּרִים, *matammim*, from טָעַם, to *taste*, Gen. xxvii, 4 sq.; and so סַוּרִים, *matammóth*, "dainties," Prov. xxiii, 3, 6). The patriarchal cookery, like that of the modern Arabs, appears to have been generally very simple, but in dressing a favorite joint the latter frequently use every variety of fruits and vegetables which they can procure. "Among the more common dishes," says Mr. Lane, "are the following: lamb or mutton, cut into small pieces, and stewed with various vegetables, and sometimes with peaches, apricots, or jujubes and sugar; cucumbers, etc.; small gourds, or the fruit of the black or white egg-plant stuffed with rice and mince-meat, etc.; vine-leaves, or pieces of lettuce-leaf and cabbage-leaf, enclosing a similar composition; small morsels of lamb, or lamb and mutton, roasted on skewers, and called *kéebáb*; fowls simply roasted or boned and stuffed with raisins, pistachio-nuts, crumbled bread, and parsley; and various kinds of pastry and other sweets. The repast is frequently commenced with soup, and is generally ended with boiled rice mixed with a little butter and seasoned with salt and pepper; or after this is served a watermelon or other fruit, or a bowl of sweet drink composed of water with raisins, and sometimes other kinds of fruit, boiled in it, and then sugar, and with a little rose-water added to it when cool. The meat, having generally little fat, is cooked with clarified butter, and is so thoroughly done that it is easily divided with the fingers" (*Mod. Egyptians*, i, 214). See FOOD.

Savoy, CONFERENCE OF. See CONFERENCE, SAVOY.

Savoy, CONFESION OF, a declaration of faith and order on the part of the Independents, agreed upon at a meeting in the Savoy in 1658. Chapters i to xix of the *Savoy Confession* correspond verbally to the *Westminster Confession*; but chapter xx, "Of the Gospel and the Extent of the Grace thereof," is additional: "in which chapter, what is dispersed and inserted by intimation in the Assembly's confession is here brought together, and more fully, under one head." Chapters xxi to xxvii correspond to chapters xx to xxvi of the *Westminster*, with the following exceptions: Clause four of chapter xx, clauses five and six of chapter xxiv, and the third clause of chapter xxvi are omitted; the third clause of chapter xxiii is modified; and chapter xxv is materially altered, a clause being added relating to the expectations of the Church. Chapters xxx and xxxi are

omitted; but the remaining chapters correspond. The *Westminster* has thirty-three chapters; the *Savoy* thirty-two. See INDEPENDENCY.

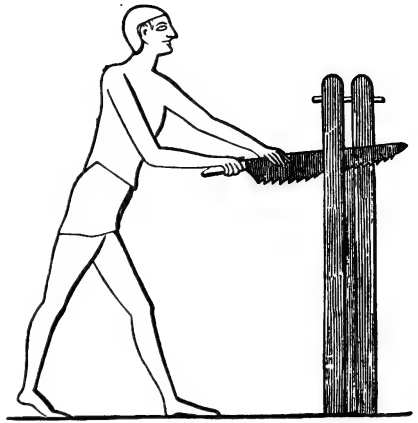

Saw (מִגְרָה, *meğerâh*, 2 Sam. xiii, 31; 1 Kings vii, 9; 1 Chron. xx, 3; מַשְׁוִיר, *massôr*, Isa. x, 15; elsewhere מִגְרָר, *garâr*, in the Pual; *πίπλον* and *πίζω*). The Hebrews knew and used not only wood-saws, but stone-saws also (1 Kings vii, 9; comp. Pliny, xxxvi, 29; xlv, 48), both being of great antiquity (Rosellini, *Monum.* ii, 35). Prisoners of war, especially leaders and princes, were sometimes executed with iron saws (2 Sam. xii, 31; 1 Chron. xx, 3; comp. Heb. xi, 37; and Sept. in Amos i, 3), and according to a tradition in the *Anabaticon Jes.* (ed. Lawrence, v, 11-14), and in the Church fathers (Justin Martyr, Origen, Epiphanius, Lactantius), this fate befell the prophet Isaiah also, under King Manasseh (comp. Gesen. *Jes.* i, 12 sq.). This terrible punishment was also known in other ancient nations, e.g. the Egyptians (Herod. ii, 139), the Persians (Ctesias, *Pers.* 54; Rosenmüller, *Morgenl.* v, 96), the Thracians (Val. Max. ix, 2, extr. 4). There were even some instances of it under the Roman emperors (Sueton. *Calig.* 27), inflicted on Jews (Dio Cass. lxxviii, 32). See CARPENTER.

Ancient Egyptian Saw. (From a bas-relief in the Great Temple at Thebes.)

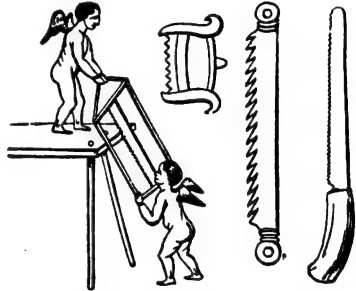

Ancient Egyptian saws, so far as has yet been discovered, were single-handed, though Jerome has been thought to allude to circular saws. As is the case in modern Oriental saws, the teeth usually incline towards the handle instead of away from it, like ours. They have, in most cases, bronze blades apparently attached to the handles by leathern thongs, but some of those in the British Museum have their blades let into them like our knives. A double-handed iron saw has been found at Nimrûd; and double saws strained with a cord, such as modern carpenters use, were in use among the Romans. In sawing wood, the Egyptians placed the wood perpendicularly in a sort of frame and cut it downwards. No evidence exists of the use of the saw applied to stone in Egypt, nor without the double-handed saw does it seem likely that this should be the case; but we read of sawn stones used in the Temple (1 Kings vii, 9; Gesen. *Thesaur.* p. 305; Wilkinson, *Anc. Egypt.* ii, 114, 119; Brit. Mus. *Egypt. Room*, No. 6046; Layard, *Nin. and Bab.* p. 195; Jerome, *Comm. in Is.* xxviii, 27). The saws "under" or "in" which David is said to have placed his captives were of iron. The expression in 2 Sam. xii, 31 does not necessarily imply torture, but the word "cut" in 1 Chron. xx, 3 can hardly be understood otherwise (Gesen. *Thesaur.* p. 1326; Thenius on 2 Sam. xii and 1 Chron. xx). A case of sawing asunder, by placing the criminal between boards and then beginning at the head, is mentioned by Shaw, *Trav.* p. 254. See HANDICRAFT.

However simple the idea of such an instrument, it was not among the most ancient of inventions, doubtless because it was one of the few which required from the very first to be constructed with iron. For this reason it is not known among savages; nor were even the comparatively cultivated nations of South America, being without iron, acquainted with its use. Beckmann states that, "In early periods, the trunks of trees were

Ancient Egyptian Saw in Use.

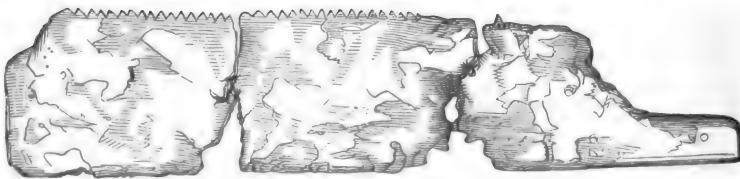

split with wedges into as many and as thin pieces as possible; and if it was found necessary to have them still thinner, they were hewn on both sides to the proper size." This simple but wasteful process has continued in use down to a rather recent period, even where the saw has been known, in countries (Norway and Northern Russia, for instance) where wood is abundant, under the correct impression that boards thus hewn are much more durable, from having greater cohesion and solidity, than those which have had their fibres separated by the saw. Probably the jawbone of a fish suggested the first idea of a saw. So the Grecian fable states, in which the

Ancient Greek and Roman Saws.

process of this invention is described. This fable, in its various versions, assigns the invention to the famous artist Dædalus, or rather to his nephew (called Talus by some, by others Perdix, while others leave him unnamed), who, having found the jawbone of a fish (or of a serpent according to others), was led to imitate it by filing teeth in iron, and thus forming a saw. The process is very probable; but there is nothing to say for the claim which the Greeks make to the honor of this invention. It does not appear to have been known to them in the time of Homer; for in the minute account of the proceedings of Ulysses in building his boat, there is not the least mention of a saw, although, if such an instrument had been then known, Calypso could as easily have supplied it as she did the axe, the adze, the augers, and whatever else he required.

The Greeks, probably, in common with other neighboring nations, borrowed the saw from the Egyptians, to whom it was known at a very early period, as is proved by its appearance on their ancient sculptures. The ultimate improvement which

Half of a Double-handed Ancient Assyrian Saw.

Modern Egyptian Wood-Sawyers.

the saw received in ancient times approximates it very nearly to the state in which we continue to use it. In the *Antiquités d'Herculanum*, i, pl. 100, there is an engraving, after an ancient painting, which shows this in a very interesting manner. Beckmann (*Inventions*, i, 366) has very accurately described it (see the cut): "Two genii (or winged Cupids) are represented at the end of a bench, which consists of a long table that rests upon two legs, like a stool." Montfaucon gives, from Gruter, representations of two kinds of saws: one of them is without a frame, but has a handle of a round form; and the other has that high frame of wood which we see in the saws of our stone-sawyers. This reminds us to observe that Beckmann, following Pliny, cannot find an instance of cutting stone with saws earlier than the 4th century B.C.; overlooking the text 1 Kings vii, 9, where it is said that some parts of Solomon's palace were constructed with "costly stones, according to the measure of hewed stones, *sawed with a saw*." See MECHANIC.

Sawa, in Arabic mythology, is a female deity, said to have been worshipped by the Arabs prior to the deluge—a statement not to be reconciled with the fact that those people are descended from Ishmael, the son of Abraham and Hagar.—Vollmer, *Wörterb. d. Mythol.* s. v.

Sawaku, in Caribbean mythology, is the man who first caused fire and lightnings. He was very powerful; but, in order to prevent pursuit, he transformed himself first into a bird, and then into a star. The lightnings are still occasioned by his blowing the celestial fire through a reed, so that it darts about to great distances.

Sawamangala, in Hindh mythology (*the highest blessedness*), is a surname of *Parvati*, the consort of *Siva*.

Sawyer, Cyrus, a Methodist Episcopal minister, was born in Lower Canada Dec. 22, 1811, but the next year his parents removed to Western New York. He was converted in 1822, licensed to preach in 1837, and received into the Michigan Conference, which then embraced Knox County, O., where he resided. The range of his itinerant labors was within the limits of the North Ohio Conference. He died at Delaware, O., in January, 1848. Mr. Sawyer's life was one of great excellence

and moral beauty, and his ministry was eminently useful. See *Minutes of Conferences*, iv, 266. (J. L. S.)

Sawyer, Isaac, a Baptist minister, was born in Hoosick, N. Y., Nov. 22, 1770. He was left an orphan at the age of fourteen, and two years after bound himself out to a man who soon after removed to Monkton, Vt., where there was little or no religious influence. He was converted in 1793, and became a Baptist, serving in the capacity of deacon until he began to preach. In 1797 the Church called upon him to "exercise his gift," but he delayed a long time, because of a sense of his own unfitness. On June 29, 1799, a council was called, and Mr. Sawyer was ordained. He filled the following churches: Monkton, Vt., 1799–1812; Fairfield, Vt., March, 1812–13; Orwell, Vt., 1813–17; Brandon, Vt., 1818–25; Bethel, Vt., 1825–28; Westport, N. Y., 1828–34; Knowlesville, N. Y., 1834; and was for a short time at Stockton, N. Y., and Lewiston, N. Y. He died Sept. 30, 1847. He baptized during his ministry upwards of 1100 persons. He was the first president of the Vermont Baptist Convention, and a friend of education and temperance. See Sprague, *Annals of the Amer. Pulpit*, vi, 369.

Sawyer, James W., a minister of the Methodist Episcopal Church, was born in Palmyra, Me., Sept. 16, 1838. He removed when a child to Portland, where he was converted at the age of fifteen years. He was licensed to preach

April 19, 1862, and was received on trial in the Maine Conference in April, 1864. His ministerial life was short, terminating with death, Dec. 23, 1869. Mr. Sawyer was a deeply pious man, and a good preacher. See *Minutes of Annual Conferences*, 1870, p. 147.

Sawyer, John, D.D., an eminent Congregational minister, was born at Hebron, Conn., Oct. 9, 1755. In 1777 he entered the Revolutionary army, and, after serving for some years, entered Dartmouth College in 1781. He graduated in 1786, then devoted himself to theology, and commenced preaching within one year after leaving college. In October, 1787, he accepted a call to become pastor of the Church at Oxford, Coos County, N. H., on the condition of that Church relinquishing the practice of baptizing children on what was termed the half-way covenant (q. v.). He afterwards became successively pastor of a Church in Boothbay, Me., in 1796; of New Castle in 1806, in which latter place he commenced travelling in all directions as a home missionary; of Bangor in 1812, where he acted both as preacher and as schoolmaster; and finally of Garland, where he remained until his death, Oct. 14, 1858. Religion was the supreme governing principle of his life, and for nearly eighty years he labored faithfully in bringing souls to God. See *Amer. Cong. Year-book*, 1859, p. 131.

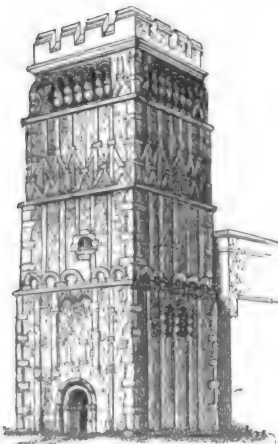

Sawyer, Seymour B., a Methodist Episcopal minister, was born in North Carolina Dec. 8, 1808. He was converted Oct. 1, 1821, under the ministry of the Cumberland Presbyterians, to which body he attached himself. In 1827 he was licensed to preach among them; but, dissenting from some of their doctrines, he returned his license, and removed to Mississippi, where he joined the Methodist Episcopal Church, and in 1830 was licensed as a local preacher. In 1832 he was admitted on trial in the travelling connection, and stationed in Montgomery. He filled with great acceptability and usefulness many of the most important charges, until his death, which occurred Sept. 23, 1843. Mr. Sawyer was a man of mild and gentle disposition. As a pastor, he was specially diligent and affectionate. His sermons were remarkable for their simplicity and spirituality. See *Minutes of Conferences*, iii, 593.

Saxe, ALFRED, a Methodist Episcopal minister, was

born Sept. 5, 1814. He was converted in 1830, licensed to preach in 1832, and graduated at the Wesleyan University in 1838. The succeeding eighteen months he was principal of the Middletown Preparatory School, after which he became principal of the high-school in that city, where he remained until 1843, when he was received on trial by the New York Conference, transferred to the Troy Conference, and appointed to Ferry Street Station, Albany. In 1845 he was appointed to North White Creek, and in 1846, on account of declining health, was placed on the superannuated list. He died Oct. 8, 1846. Mr. Saxe was a sound and practical preacher, a diligent and laborious pastor, and a most affable man. In his last illness he enjoyed the consolations of religion, and appeared cheerful and happy even while passing through the vale of death. See *Minutes of Conferences*, iv, 131. (J. L. S.)

Saxnot, in German mythology, was a god whose name occurs in the oath taken by the Saxons after their violent conversion to Christianity by Charlemagne, by which they renounced the worship of Thunar (Thor), Woden, and Saxnot. He is supposed to have been the god of war, since the word Sax (Sachs), from which the Saxons took their name, denoted a sword. Anglo-Saxon genealogies point to a Saxneat, who was Woden's son.

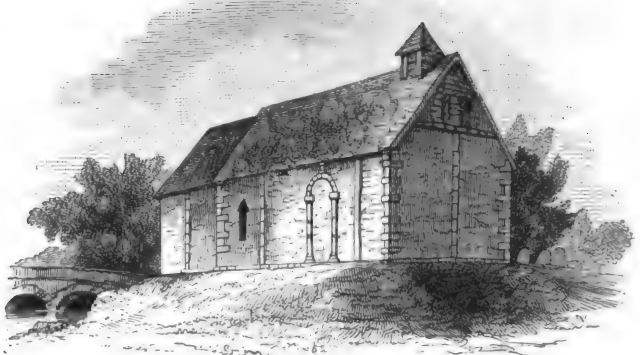

Saxon Architecture. The buildings of the Anglo-Saxons were usually of wood, rarely of stone until the 11th century, and consequently we must not expect to find any great number of remains. The only dated examples of this style are about the middle of the 11th century, as at Deerhurst, Gloucestershire; with the exception of some slight remains at the mouth of the Tyne, which are of an earlier and distinct character, and Brixworth, which is possibly Roman work restored. The style agrees in many respects with that of the 11th century on the Continent, where the work has not been ornamented with sculpture in the 12th, as has been very frequently the case. There are, however, some peculiarities about the buildings of this class which entitle them to the name of the Anglo-Saxon style, or, more correctly, perhaps, the primitive English style; for it has been observed that they are far more numerous in the Danes' land, or the eastern counties, than in other parts of England. In the neighborhood of Lincoln and Gainsborough almost all the

Earl's Barton, Northamptonshire.

old country churches partake of this character. It has also been observed that the earlier examples are more like the work of carpenters than of masons. Such a tower as that of Earl's Barton, for instance, has all the appearance of being copied from a wooden tower, and this may very probably have been the case. Ordericus Vitalis, who lived in the 11th century, mentions that Siward, the cousin of Edward the Confessor, built a wooden church at Shrews-

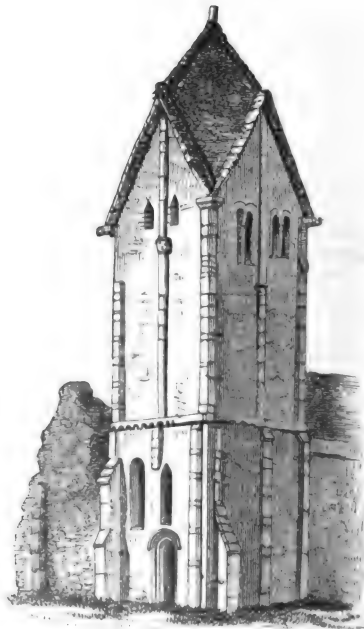

bury, which was used as the parish church. This is material evidence, considering that it was built by a royal prince in a town of so much importance. This church was existing in 1082, when a stone church was commenced by the father of Ordericus Vitalis, who records these facts. It is not improbable that these primitive English churches may be among the earliest stone churches of Western Europe after the time of the Romans. The Roman art of building had become extinct in all this part of Europe, and almost extinct in Rome itself, by the 10th century, and the most ready

Corhampton Church, Hampshire.

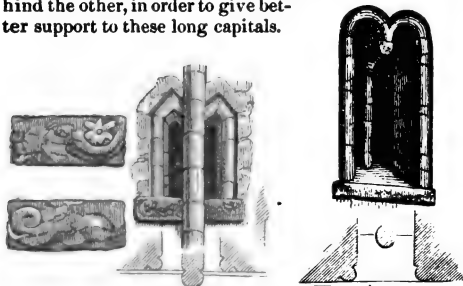

models which the English had to copy in the 11th century were their own wooden churches. It was just at that time that Canute ordered churches to be built of stone and lime in all the places where his father or himself had burned the wooden churches of the Anglo-Saxons.

The class of buildings referred to as being considered to belong to this style contain some rather unusual features. The execution is rude and coarse: the walls are built either of rag or rubble, sometimes partly of herring-bone work, without buttresses, and in many cases, if not always, have been plastered on the outside. The quoins are usually of hewn stones placed alternately flat and on end—a kind of construction to which the

Tower, Sompting, Sussex.

name "long and short" has been given; the walls are often ornamented externally with flat vertical strips of stone projecting slightly from the surface, resembling wooden framing, generally of the same "long and short" construction as the quoins. On towers there are sometimes several tiers of these, divided from each other by plain strings or bands. Semicircular arches and triangles formed of similar strips of stone are also sometimes used as ornaments; and plain projecting blocks are frequently associated with these, either as impost, or as bases for the vertical strips which often stand above them. The jambs of door-ways and other openings are very commonly of "long and short" work; and when imposts are used, as they generally are, they are usually rude, and often extremely massive, sometimes consisting of plain blocks and sometimes moulded. Round the arch there is very often a projecting course occupying the situation of a hood-moulding, which sometimes stops upon the imposts, but more frequently runs down the jambs to the ground, forming a kind of pilaster on each side of the opening. It is usually flat, but is sometimes rounded and occasionally notched on the edges, as at Dunham Magna, Norfolk: in some instances the impost is arranged so as to form a capital to each of these projections on the jambs, and they are sometimes provided with bases either formed of plain blocks or rudely moulded. The arches are generally plain, but are occasionally worked with rude and massive mouldings, as the chancel-arch at Wittering Church, Northamptonshire; some arches are constructed with bricks (probably all of them taken from some Roman building, as at Brixworth) or thin stones, and these usually have a course of stones or bricks laid upon the top of the arch, as at Britford Church, Wiltshire: the arches are always semicircular, but some small openings, such as doors and windows, have pointed or triangular heads formed of two straight stones placed on end upon the imposts, and resting against each other at the top, as at Barnack. The windows are not large, and, when splayed, have often nearly or quite as much splay externally as internally. In belfries and other situations where they do not require to be glazed, they are frequently of two or more lights, divided by small shafts or pillars, which are very usually made like balusters, and encircled with bands of rude mouldings. In the old portion of St. Alban's Abbey, erected in the latter half of the 11th century, specimens are seen. These generally have capitals, or imposts, formed of long stones reaching entirely through the wall; in some instances the balusters are oblong in plan, as in the tower of St. Michael's Church, Oxford, and in others two are placed together, one behind the other, in order to give better support to these long capitals.

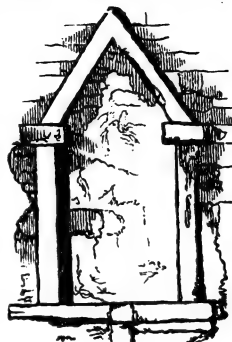

Window, with Ornaments on the Sill; and Shaft, with Section. Belfry Window, with Section.

Details of the Tower, Sompting, Sussex.

The whole of these peculiarities are not to be met with in any one building; and in some churches in which several of them are to be found they are associated with other features, evidently original, which so clearly belong to the Norman style as to prove that these buildings are not of Saxon date, as at the churches of Daglingworth, Gloucestershire, and Syston, Lincolnshire. In other instances the lower parts of build-

ings consist exclusively of this peculiar kind of construction, and are surmounted by pure Norman work which has been raised upon it subsequently to the first erection, as at the tower of Clapham Church, Bedfordshire, and Woodstone, near Peterborough. This last class of buildings appears to

Barnack, Northamptonshire.

Corhampton, Hants.

preponderate in favor of the Saxon theory; for, although the Norman additions have been observed not to be remarkably early in that style, it is not very probable that so material a change would have been made in the architecture unless a considerable interval had elapsed between the erection of the different parts. Some of the churches in which the peculiarities under consideration are found are clearly Norman (and not early in the style), but it may reasonably be supposed that in many parts of the country the Saxon style would have lingered for a considerable time after the Norman invasion, and would have continued to be employed (with an increasing admixture of Norman features) in buildings erected by native workmen.

The following is a tolerably complete list of examples of the Saxon style:

- Bedfordshire*—Knotting; Clapham, tower.
- Berkshire*—Wickham, tower; Cholesey, tower.
- Buckinghamshire*—Caversfield, tower; Iver; Lavendon, tower, nave, and chancel.
- Cambridgeshire*—St. Benet's and St. Giles's, Cambridge.
- Cornwall*—Tintagel.
- Derbyshire*—Repton, east end, and crypt.
- Durham*—Monks' Wearmouth, tower; Jarrow, walls of church and chancel, and ruins near it.
- Essex*—Boreham, church; Colchester, Trinity Church, part of the tower, etc.; Felstead, church; Great Maplestead, north door.
- Gloucestershire*—Daglingworth Church, except the tower; Deerhurst, tower; Miserden, church; Stretton, north door-way; Upleaden, chancel-arch.
- Hampshire*—Boarhunt; Corhampton; Headbourne Worthy; Hinton Ampner; Little Sombourn; Kilmeston; Titchborne.
- Hertfordshire*—St. Michael's, at St. Alban's.
- Kent*—Dover, part of the ruined church in the Castle; Swanscombe, tower; Knotting.
- Leicestershire*—Barrow on Soar; Barrow on Tugby.
- Lincolnshire*—Aukborough; Barton on the Humber, St. Peter's, tower; Branson; Caburn; Clee, tower; Holton-le-Clay, tower and chancel-arch; Heapham; Lincoln, St. Peter's at Gout's; St. Mary-le-Wigford; Nettleton; Ropsley, part of the west end; Rothwell; Scartho; Skellingthorpe; Skillington, part of the church; Springthorpe; Stow, transepts; Swallow; Syston, tower; Waith, tower and chancel-arch; Winterton.
- Middlesex*—Kingsbury, part of church (now hidden by plastering).
- Norfolk*—Norwich, St. Julien's; Beeston St. Lawrence; Dunham Magna, church; Elmham, ruins of bishop's palace; Howe; Newton, tower.
- Northamptonshire*—Barnack, tower; Brigstock, church; Brixworth, church; Earl's Barton, tower; Green's Norton, west end; Pattishall; Stow-nine-churches; Witterington, chancel.
- Northumberland*—Bolam, tower; Rywell, St. Andrew; Rywell; Corbridge; Hexham, crypt; Ovingham; Whittingham.

Oxfordshire—St. Michael's, Oxford, tower; Northleigh, tower.

Shropshire—Barrow, chancel-arch; Church Stretton; Clee; Stanton Lacey, nave and transept; Stottesdon.

Somersetshire—Cranmore, door-head; Milbourne Port.

Suffolk—Barham, part of church; Debenham; Claydon, part of church; Flixton; Gosbeck, part of church; Hemingstone; Ilkettshall; Leiston.

Surrey—Albury; Stoke d'Abernion, some portions.

Sussex—Bishopstone, church; Bosham, tower; St. Botolph, chancel-arch; Burwash; Sompington, tower; Worth; Yapton.

Warwickshire—Wooten Wawen, substructure of tower.

Wiltshire—North Burcombe, east end; Brytford, north and south doors; Bremhill, west end; Somerford Keynes.

Worcestershire—Wyre Piddle, chancel-arch.

Yorkshire—Bardsey; Kirkdale, west end and chancel-arch; Kirk Homerton; Loughton-en-le-Morthen, north door-way; Maltby; Ripon minster, crypt, called Wilfred's Needle; York Cathedral, portion of crypt (Bloxham); York, church of St. Mary, Bishop-hill Junior.

SAY, SAMUEL H., an English dissenting divine, was born in the year 1675. He entered as a pupil in the academy of Rev. Thomas Rowe, London, about 1692. Finishing his studies, he became chaplain to Thomas Scott, Lyminge, in Kent, in whose family he remained three years. Thence he removed to Andover, in Hampshire; then to Yarmouth, in Norfolk; and soon after to Lowestoff, in Suffolk, where he labored for eighteen years. He was co-pastor with Rev. Samuel Baxter at Ipswich nine years, and succeeded Dr. Edmund Calamy in Westminster in 1734. He died in 1743. He wrote, *Sermon* (Lond. 1736, 8vo):—*Poems and Essays* (ibid. 1745, 4to; 1749, 4to).

Saybrook Platform, a confession of faith and a compendium of rules for the government of the churches, adopted by an assembly of Congregational ministers and lay delegates convened by order of the Legislature of Connecticut, at Saybrook, Sept. 9, 1708. The synod consisted of sixteen members—twelve clerical and four lay—who represented the councils of Hartford, Fairfield, New London, and New Haven counties. As to doctrine, they adopted for recommendation to the General Assembly of the colony the confession assented to by the elders and messengers assembled at Boston, May 12, 1680, which was the Savoy Confession with some small alterations, adding also the doctrinal parts of the Westminster Confession. In regard to Church government and discipline, they adopted fifteen articles, the substance of which was to provide (1) for one or more *con-sociations* in each county, with appellate and final jurisdiction, to which particular churches might refer in difficult cases; (2) for one or more *associations* in each county, consisting of the ministers, who should meet at least twice a year to consult on the common interest of the churches, and to perform certain other offices, such as the examination and recommendation of candidates for the ministry; (3) for a *general association*, to be composed of one or more delegates from each of the district associations, to meet once a year. The proceedings of the synod were approved by the Assembly of the colony, Oct., 1708, and it ordained "that all the churches within this government that are or shall be thus united in doctrine, worship, and discipline be, and for the future shall be owned and acknowledged, established by law; provided always that nothing herein shall be intended or construed to hinder or prevent any society that is or shall be allowed by the laws of this government, who soberly differ or dissent from the united churches hereby established, from exercising worship and discipline in their own way, according to their consciences." The decrees of the Saybrook Platform, both as regards doctrine and government, are not binding on the churches, but are only advisory in their character. See Trumbull, *Hist. of Connecticut*, vol. i, ch. xix; *Congregational Order*; Bacon, *Discourse* at Norwich, Conn., June, 1859.

Sayei, in Hindû mythology, is the daughter of Wiswakarma, and probably identical with *Sangia*. She was

married to the sun-god, and bore him Jama, the god of the underworld.

Sayer, EZRA, a minister of the Methodist Episcopal Church, was originally a member of the Troy Conference, and was transferred to the Missouri Conference in 1850. He preached at Shelbyville, Edina, Memphis, and Kirksville, but, in 1860, he took a superannuated relation. He took up his residence near Shelbyville, preaching as his health would permit until the summer of 1864, when he died. Mr. Sayer was a preacher of no common abilities, fulfilling the duties of his station so as to win the confidence and respect of all with whom he came in contact. See *Min. of Annual Conf.* 1865, p. 7.

Saying, a distinct or sustained monotone in sacred music analogous to the old "saying without note," neither singing nor reading.

Sayings, TRADITIONAL, OF CHRIST. There can be no doubt that, besides the words of Christ which are mentioned in the gospels, others of more or less significance were spoken by him, and what John (xx, 30; xxi, 25) says of the works of Christ, we may equally apply to his words. Paul mentions (Acts xx, 35) a saying of Christ, *μακάριόν ἐστι διδόναι ἢ λαμβάνειν* (i. e. "It is more blessed to give than to receive"), which we look for in vain in the canonical gospels. The following examples contain those sayings of Christ which the ancient Church has designated as such; and we put them together, not because we ascribe them altogether to apocryphal authors, but because they have no canonical authority in their favor:

1. "On the same day, having seen one working on the Sabbath, he said to him, O man, if indeed thou knowest what thou doest, thou art blessed; but if thou knowest not, thou art cursed, and art a transgressor of the law." This very remarkable saying occurs in Cod. D and in Cod. Græc. β Rob. Stephani after Luke vi, 4. Whether or not these words were originally in Luke's Gospel, we cannot decide, but that they convey an evangelical meaning is certain (comp. Loissell. *Opusc.* p. 20; Paulus Colomesius, *Observation. Sacr.* p. 143).

2. "But ye seek to increase from little, and from greater to less. When ye go and are bidden to dinner (*δειπνήσατε*), sit not down in the highest seats, lest a more honorable man than thou come, and he that bade thee come and say to thee, Take a lower seat, and you be ashamed. But when thou sit down in a lower seat, and a less honorable man than thou come, then he that bade thee will say unto thee, Go up higher, and this will be profitable to thee." This saying is also found in Cod. D or Cantabrig. and in some other codd. after Matt. xx, 28 (comp. Griesbach, *N. T.* ad loc.; Tischendorf, *N. T.* ad loc.). That this addition was well known may be seen from the fact that Juvenius (q. v.), in his *Hist. Evang.* 3, 613 sq., has given it in the following verses:

"At vos ex minimis opibus transcendere vultis,
Et sic e summis lapsi comprehenditis imos.
Si vos quisque vocat cœnæ convivia ponens
Cornibus in summis devitet ponere membra
Quisque sapit, veniet forsan si nobilis alter,
Turpiter eximio cogetur cedere cornu
Quem tumor inflat cordis per summa locarat.
Sin contentus erit mediocria prendere cœna
Inferiora dehinc si mox convivia subibit,
Ad potiora pudeus transibit strata tororum."

3. "The Lord says in the Gospel, If ye keep not that which is small, who will give you that which is great? For I say unto you that he who is faithful in very little is faithful also in much." This is found by Clem. Rom. (*Epist. II ad Corinth.* 8; comp. Iren. *Adv. Hæres.* ii, 64).

4. "And Jesus says, For those that are sick, I was sick; and for those that hunger, I suffered hunger; and for those that thirst, I suffered thirst." It is difficult to say whether this citation, which is found by Origen (*Comment. in Matt.* tom. xiii [tom. iii, 563, ed. De la Rue]), can claim any originality or not (comp. Matt. xxv, 35; 1 Cor. ix, 20–22).

5. "Ask great things, and the small shall be added

unto you; ask heavenly things, and the earthly shall be added unto you." This saying, which is found in Clem. Alex. (*Strom.* I, i, 416 [ed. Pott, ii, 488]; Orig. *De Orat.* ii, 43; *Opp.* i, 197, 219), seems not to be taken from an apocryphal gospel (comp. Grabe, *Spicileg.* i, 14), or from an interpolated codex (Fabricius, *Cod. Apocr. N. T.* i, 329), but has been freely cited from Matt. vi, 33. Such license is often used in common life, when quoting the sentence of another, which is not done verbatim, but with such words as the circumstances and the connection of speech require.

6. "Show yourselves tried money-changers" (*γίνεσθε γραπεζίται δόκμοι*). This saying of Christ, which is found in Clement. *Homil.* ii, 51; iii, 50; xviii, 20; Epiphanius. *Hæres.* xlv, 2; Orig. *Ad Joh.* tom. xix, 8, 20, p. 268; Jerome, *Epist.* 119 (ed. Vallars, i, 815); Socrates, *Hist. Eccl.* iii, 16, is first cited without any authority (in the *Apostol. Constit.* ii, 36), then as a passage of Scripture by Clem. Alex. (*Strom.* I, i, 425), and also as an apostolic, but more especially Pauline, commandment (comp. Dionys. Alex. ap. Euseb. *Hist. Eccl.* vii, 7; Cyrill. Alex. *Ad Jes.* ii, 56). Under these circumstances, it will be difficult to decide who the author of this saying is.

7. "Let us resist all iniquity, and hold it in hatred," quoted as the words of Christ by Barnabas (*Epist. Catholica*, 4); and *ibid.* 7 we read, "They who wish to see me and lay hold of my kingdom must receive me by affliction and suffering."

8. "If only one of Israel will repent, and believe in God through my name, his sins shall be forgiven. After twelve years go ye into the world, lest one should say, We have not heard." In Clem. Alex. (*Strom.* [ed. Pott], vi, 762), Peter quotes these words as those of the Lord, and Eusebius (*Hist. Eccl.* v, 18) mentions this command of Christ, *ἐπὶ δώδεκα ἔτεσι μὴ χωρισθῆναι τῆς Ἱερουσαλῆμ*.

9. "The Lord said, Should ye be with me gathered in my bosom, and not do my commandments, I will cast you off, and say to you, Go from me, I know you not whence you are, workers of iniquity." This we read in Clem. Rom. (*Epist. ad Corinth.* ii, 4). In the same epistle (5), we read,

10. "The Lord saith, Ye shall be lambs in the midst of wolves. But Peter answered him, What, then, should the wolves tear in pieces the lambs? Jesus said to Peter, Let not the lambs fear the wolves after they are dead; and do you fear not those who kill you and can do nothing to you; but fear him who after you are dead hath power over soul and body to cast them into hell-fire." While there is some resemblance in this narrative with Matt. x, 16, 28; Luke xii, 4, 5, yet the whole manner of this conversation betrays too much its apocryphal origin.

11. "Keep the flesh pure and the soul unspotted, that ye may receive (*ἀπολάβητε*; not as some read, *ἀπολάβωμεν*, "that we may receive") eternal life" (*Epist.* 8).

12. "Our Lord Jesus Christ said, In whatsoever I may find you, in this will I also judge you." This saying, which is found in Justin. Mart. (*Dial. c. Tryph.* [ed. Marani], p. 143), is ascribed by Clem. Alex. (*Quis Dives Salvetur*, § 40) to God; by Johannes Climacus (*in Scala Paradisi*, vii, p. 159, and in the *Vita B. Antonii*, c. 15, in *Vite Patrum*, p. 41) to the prophet Ezekiel (comp. Ezek. vii, 3, 8; xviii, 30; xxiv, 14; xxxiii, 20, with Fabricius, *Cod. Apocr.* i, 333). A comparison of the passages in Ezekiel will, however, prove that these parallels are insufficient, and some apocryphal gospel is probably the authority for this saying.

13. "The days will come in which vines shall spring up, each having ten thousand stocks, and on each stock ten thousand branches, and on each branch ten thousand shoots, and on each shoot ten thousand bunches, and on each bunch ten thousand grapes, and each grape when pressed shall give five-and-twenty measures of wine. And when any saint shall have seized one bunch, another shall cry, I am a better bunch; take me; through me bless the Lord. Likewise also he said that a grain

of wheat shall produce ten thousand ears of corn, and each grain of wheat shall produce ten pounds of fine pure flour; and so all other fruits and seeds and each herb according to its proper nature. And that all animals, using for food what is received from the earth, shall live in peace and concord with one another, subject to men with all subjection. And when Judas the traitor believed not, and asked, How, then, shall such productions proceed from the Lord? the Lord said, They shall see who shall come to these times." This narrative of the millennium Irenæus (*Adv. Hæres.* v, 33) describes as delivered by John to Papias. Since, however, this tradition belongs to Papias, whom Eusebius (*Hist. Eccl.* iii, 39) describes as an *ἀνδρα σμικρὸν τὸν νοῖν*, we must deny from the very beginning the authority of Christ as having uttered these words. Besides, the whole tenor of this narrative so conflicts with the dignity contained in all the words of Christ, that, without the least shadow of a doubt, we can ascribe to it an apocryphal origin. The description of the millennium reminds us of the Rabbinic representations of the same, especially as we find it in the *Talkut Shimoni* (fol. 7, col. 1, No. 20), and which is too trivial to be translated. A German translation is given by Eisenmenger (*Entdecktes Judenthum*, ii, 309 sq.). An examination of the Koran (sur. 18, 32; 37, 49; 38, 58; 56, 38, etc.) will also show that the Mohammedan representation of Paradise is less sensual than that given above from a Christian source.

14. Pseudo-Linus (*De Passione Petri*; comp. Fabricius, *Cod. Apocr. N. T.* i, 335, 775) quotes a mystical saying of the Lord: "Unless ye turn your right into the left and the left into the right, and that which is above into that which is below, and that which is before you into that which is behind, ye will not know the kingdom of God."

15. "The Lord being asked by Salome when his kingdom will come, said, When the two shall be one, and that which is without as that which is within, and the male with the female neither male nor female." This quotation, which is found by Clem. Rom. (*Epist. ad Corinth.* 12), is, according to Clem. Alex. (*Strom.* [ed. Pott], iii, 553), taken from the Gospel of the Egyptians. From the same gospel, Clem. (*ibid.* p. 532) has preserved the following conversation of Christ with Salome:

16. "When Salome asked the Lord, How long shall men die? he said, As long as women bear children. Then Salome answered, I have done well that I did not bear (*καλῶς οὖν ἐποίησα μὴ τεκοῦσα*); but the Lord replied, Thou mayest eat of every herb, but of that which has bitterness do not eat." And further on (p. 540) he states, "I am come to make an end to the works of the woman—of the woman, viz. the lust; to the works, viz. to the birth and death."

17. "He that wanders shall reign, and he that reigns shall rest" (Clem. Alex. *Strom.* i, 453), from the Hebrew Gospel.

18. "I came to put an end to sacrifices; and unless ye cease from sacrificing, God's anger will not cease from you" (*Evang. Ebion. ap. Epiph. Hæres.* xxx, 16).

19. "My mystery is for me and for the sons of my house" (Clem. Alex. *Strom.* v, 684).

20. "In the Gospel according to the Hebrews, the Saviour himself says, Just now my mother, the Holy Spirit, took me by one of my hairs, and bore me away to the great mountain Thabor." This very singular saying is quoted by Origen, in *Joann.* tom. ii (ed. De la Rue, iv, 64); Jerome, *Comment. in Jes.* 11, 2, lib. ii; in *Micham*, vii, 6. That the Holy Ghost should be presented here as a *genus femininum* must not be looked for in the Gnostic idea of the Holy Ghost as female principle (comp. Fabricius, *Cod. Apocr.* i, 362 sq.), but finds its explanation in the words of Jerome (*Comment. in Jes.* 40, 11), "Nemo autem in hac parte scandalizari debet, quod dicatur apud Hebræos spiritus genere feminino, cum nostra lingua appellatur genere masculino, et Græco sermone neutro; in divinitate enim nullus est sexus."

21. "Never be joyful except when ye shall look on

your brother in love"—so from the Hebrew Gospel by Jerome (*Comment. ad Ephes. v. 4*).

See Grabe, *Spicilegium*, i, 12 sq.; Fabricius, *Codex Apoc. N. T.* i, 321 sq.; Körner, *De Sermonibus Christi apud apocryphos* (Lips. 1776); Hoffmann, *Das Leben Jesu nach den Apokryphen* (ibid. 1851), p. 317 sq.; Westcott, *Introduction to the Study of the Gospels* (Boston, 1867), p. 445 sq. (B. P.)

Sayutshiam, in Hindû mythology, is a degree of blessedness or godliness which relieves man from the necessity of being born again on earth. It may be attained by solitude, virtue, and self-examination, and is at all times assured to such Brahmins as become Yogis, their state being so exalted as to make them more than equal to the gods and to exempt them from every form of trial.

Sazoma, in Lamaism, is one of the two legal wives of Cio Conciva or Xaka, the second person in the trinity of Lamaism.

Scab (סֶבַע, *garâb*, Deut. xxviii, 27; elsewhere "scurvy," a diseased scurf on the skin; סֶבַעֲתָה, *mis-pâchath*, Lev. xiii, 6, 7, 8; a harmless cutaneous eruption; סֶבַעֲתָה, *sappâchath*, ver. 2; xiv, 56, the mange in the hair causing it to fall out; kindred with these last two is סֶבַעֲתָה for סֶבַעֲתָה, *saphâch*, to "smite with a scab," Isa. iii, 17, i. e. premature baldness; סֶבַעֲתָה, *yallê-pheth*, Lev. xxi, 20; xxii, 22, an itching or tetter in the skin). See DISEASE; LEPROSY.

Scabbard (סֶבַעֲתָה, *tâar*, Jer. xlvii, 6; elsewhere "sheath"). See SWORD.

Scæus, in Greek mythology, was one of the twelve sons of Hippocoon, who expelled Icarus and Tyndareus from Lacedæmon, but were afterwards themselves overcome and slain by Hercules.

Scaffold (סֶבַעֲתָה, *kiyôr*, 2 Chron. vi, 13; elsewhere used of the "laver" and "pans" for the sacred service), a platform or pulpit (q. v.) for public speaking; probably raised from the floor, but whether round (as the name would seem to denote) or square (as the dimensions would imply) is uncertain.

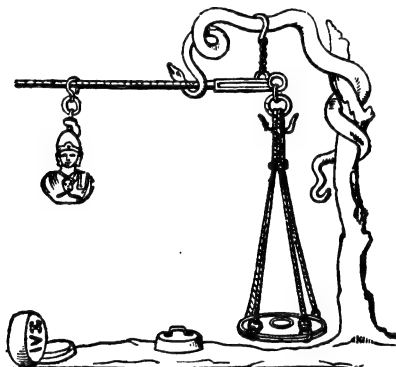

Scala Santa (Ital. for *holy stair*), a celebrated staircase, consisting of twenty-eight white marble steps, in a little chapel of the Church of St. John Lateran at Rome. Romanists assert that this is the staircase which Christ several times ascended and descended when he appeared before Pilate, and that it was carried by angels from Jerusalem to Rome. Multitudes of pilgrims creep up the steps of the Scala Santa on their knees with roses in their hands, kissing each step as they ascend. On reaching the top, they repeat a prayer. The performance of this ceremony is regarded as being particularly meritorious, entitling the devout pilgrim to plenary indulgence. It was while thus ascending these holy stairs that Luther thought he heard the words "The just shall live by faith," and, mortified at the degradation to which his superstition had brought him, fled from the spot.

Certain churches in England had similar staircases, which enjoyed the privilege of affording composition for a visit to Rome—at Westminster Abbey, in 1504; St. Mary's Chapel, at Boston; St. Mary's Chapel in the Austin Canons' Church, Norwich; and at Windsor, with a college of ten priests, until 1504.

Scale: 1, of fishes (סֶבַעֲתָה, *kaskêseth*, Lev. xi, 9, 10, 12; Deut. xiv, 10; Ezek. xxix, 4; so of the *laminae* of a coat of "mail," 1 Sam. xvii, 5); similarly *λεπίς* (a *flake*) of incrustations from the eyes (Acts ix, 18); but in Job xli, 15 (Heb. 7) the scaly armor of the crocodile is figuratively denoted (סֶבַעֲתָה, *strong ones of shields*, A. V. "scales"); 2, of balances (סֶבַעֲתָה, *pêles*, in the sing. only, "weight," Prov. xvi, 11; "scales," Isa. xl, 12; always associated with סֶבַעֲתָה, the *balance*

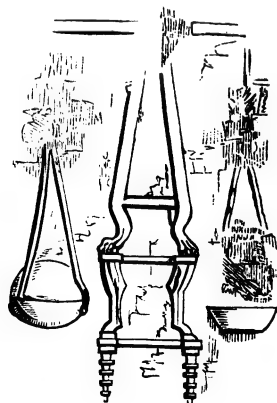

proper); 3, as a verb, to *scale* the walls of a city (סֶבַעֲתָה, *olah*, Prov. xxi, 22, to go up, as elsewhere often). See LADDER.

Before the introduction of coins, balances were of the utmost importance for the weighing of gold and silver in every commercial transaction (Gen. xxiii, 16; xliii, 21; Isa. xlv, 6; Jer. xxxii, 9), so that a balance was required to be of exquisite delicacy. Allusions to this are found in Isa. xl, 15; Ecclus. xxviii, 29, "small dust of the balance," "a little grain of the balance;" and all dishonesty in the treatment of the scales is sternly forbidden and denounced (Lev. xix, 35; Hos. xii, 7; Amos viii, 5; Mic. vi, 11; Prov. xi, 1; xvi, 11). Hence arose the Rabbinic rule that the scales should be made of marble which could not wear away. The above term סֶבַעֲתָה, *pêles* (rendered "weight" Prov. xvi, 11 [Sept. *ρόπη*], and "scales" Isa. xl, 12 [Sept. *σκαλμός*]), is said by Kimchi (on Isa. xxvi, 7) to be properly the *beam* of the balance. In his Lexicon he says it is the part in which the tongue moves, and which the weigher holds in his hand. Gesenius (*Thesaur. s. v.*) supposed it was a *steelyard*. That the steelyard was an invention known

Trutina, or Steelyard. (From the Museum of the Capitol at Rome.)

to the ancients is certain, for specimens of them, elaborately adorned, have been found at Pompeii and Herculaneum (*Mus. Borbon.* i, 55). Still it was probably not known until the Roman æra, and indeed is said to have been called *Trutina Campana*, from its invention in Campania (Smith, *Dict. of Class. Ant.* s. v. "*Trutina*"). No traces of its use have been found either in the tombs or temples of Egypt or Assyria, and this is a sufficient proof that the instrument was unknown in those countries. Hence there is no evidence that this instrument was known to the Hebrews. Of the material of which

Ancient Assyrian Scales. (From the sculptures at Khor-sabad.)

the balance was made we have no information. See **BALANCE**.

It is thought that the Jews knew the constellation *Libra* as one of the signs of the zodiac (2 Kings xxxiii, 5; Job xxxviii, 32). See **ASTROLOGY**.

Scaliger, JOSEPH JUSTUS, son of Julius Cæsar Scaliger, a learned critic, and his rival in learning and arrogance, was born, in 1540, at Agen, and was educated at the college of Bordeaux, and, finally, by his father and Turnebus. Languages he acquired with wonderful ease, and is said to have been master of no less than thirteen. His friends denominated him "an ocean of science," and "the masterpiece of nature." He died in 1609, professor of belles-lettres at Leyden. His works, most of which are commentaries on the classics, are numerous. Of his other productions, one of the most valuable is the treatise *De Emendatione Temporum*.

Scall (invariably נֶתֶק, *nêthek*, the *menge*, or dis-eased falling-out of the hair of the head or beard, Lev. xiii, 30 sq.). See **LEPROSY**.

Scalp (סָקֶרֶת, *kodkôd*, Psa. xlvi, 21; "pate," Psa. vii, 16; the *crown* of the head [as elsewhere rendered], so called from the *parting* of the hair at that spot).

Scamander, in Greek mythology, was (1) a son of Oceanus and Tethys, a river-god in Troas, originally named *Xanthus*. He married the nymph *Idæa*, and became the father of Teucer and Glauca. Hector's son, ordinarily called *Astyanax*, bore the appellation *Scamandrius*, derived from the name of this deity. (2) A nephew of the above, the son of Glauca and Deimachus.

Scamandroicê, in Greek mythology, was the name occasionally given to *Calyce*, the mother of Cycnus.

Scamilli, plain blocks or subplinths, placed under columns, statues, etc., to elevate them. They differ from ordinary pedestals in having no mouldings about them, and in being usually of smaller size.

Scandinavia, a large peninsula in the north of Europe, bounded on the north by the Arctic Ocean; on the west by the Atlantic, North Sea, Scager Rack, Cattegat, and Sound; on the south and east by the Baltic Sea, Gulf of Bothnia, and Finland, with which it is connected by an isthmus 825 miles wide. This peninsula includes the two kingdoms Norway (q. v.) and Sweden (q. v.). The ancient Scandinavia, or *Scandia*, included Northern Denmark as well as the peninsula that still retains the name. It is first mentioned by Pliny, who, unaware that the peninsula was attached to Finland on the north, considered Scandinavia as an island.

Scandinavian Architecture. Many of the earlier Norwegian and Swedish cathedrals were built by English or French workmen. There were six basilicas in Norway, with towers at the end of the choir-aisles. In Denmark there are eight round churches and one octagonal. Roeskilde, Ribe, and Thorsager are apsidal; but the general characteristics of the Danish churches are a square east end, and an immense south porch and parvise. The wooden churches of Norway are probably of Byzantine origin, the plans having been brought back by the Varangians.

Scandinavian Mythology. See **NORSE MYTHOLOGY**.

Scandinavian Versions.—1. *The Norse or Icelandic*.—The first version into this language was made by Oddur Gotshalkson, son of a bishop of Holum, in Iceland. He attended the lectures of Luther and Melancthon, and on his return to Iceland entered upon a translation of the Scriptures. To avoid persecution, he commenced his work in a small cell in a cow-house, and completed the New Test. in 1539. Finding it difficult, from the state of public opinion, to print it in Iceland,

he sailed for Denmark, and published it at Copenhagen, under the patronage of Christian III. The translation, made from the Vulgate, corrected in some cases according to Luther's translation, was published in 1540. From this time on, parts of the Old Test. were published, until at length, in 1584, the entire Bible was printed in Icelandic at Holum. The work was conducted by Gudbrand Thorlakson, bishop of Holum, and has been called "a faithful mirror of Luther's German version;" and, on account of the purity of its diction, it is still held in high esteem. In 1609 a revised edition of the New Test. was published by bishop Gudbrand at Holum, with the title *Thad Nya Testamentum, a Islensku æfverset og lesid epter theim rieltustu Utleggingum, sem til hafu feingist* (printed at Holum i Hialltadal, anno MDCIX). In 1644 a revised edition of the entire Bible was published by Thorlak Skuleson, the grandson of Gudbrand, and his successor in the episcopate. In 1728 another edition was published, under the inspection of Stein Jonson, bishop of Holum. Following the Danish Bible too closely, this edition, on account of Danicisms, was found to be scarcely intelligible to the Icelanders, and hence never obtained much circulation. In 1747 a fourth edition, according to the text of 1644, was published at Copenhagen; a fifth in 1750; a sixth in 1807, chiefly at the expense of the British and Foreign Bible Society; and a seventh in 1813 by the same society, and often since. Since the year 1863 a revised edition of the New Test. and Psalms has been circulated by the British and Foreign Bible Society, and in 1867 the entire revised Bible, which is now in circulation, left the press at the expense of the same society.

2. *Danish*.—The earliest translation of any portion of the Scriptures into Danish is contained in a MS. preserved in the Royal Library of Copenhagen, supposed to have been written in the 13th or beginning of the 14th century. It proceeds no further than the second book of Kings. In 1515, Pedersen, who is said to have been the first Lutheran clergyman in Zealand, published at Paris a Danish version of the Gospels and Epistles appointed to be read in churches. It was reprinted at Leipsic in 1518. The whole New Test., *Det Nye Testament*, was translated by Hans Mikkelsen, sometimes called John Michaelis, and published at Leipsic in 1524, and reprinted at Antwerp in 1529. This version was executed by the command and under the patronage of Christian II. An improved edition of Mikkelsen's New Test. was published by Pedersen in 1529 at Antwerp, and republished, with the Psalms, in 1531. In 1550 the whole Bible was published in Danish at Copenhagen. This translation was undertaken at the suggestion of Bugenhagen, the celebrated Reformer, who had been invited to the court of Copenhagen to assist in the correction of ecclesiastical abuses. A revision of the entire version was undertaken in 1586 by the command of Frederick II, which was published in 1589, with Luther's notes, under the title *Biblia det er den gantske hellige Skrift, paa Danske igen offverseet oc prentet efter salige oc Hoglofftige Ikukommelse, Kong Frederichs den II Befalning. Met Register, alle D. Lutheri Fortæler, hans Udlegning i Broedden, oc Viti Theodori Summarier* (prentet i Kjøbenhavn aff Matz Vingærdt, anno 1589, fol.). In 1604 king Christian IV appointed Dr. Resen, bishop of Zealand, to superintend a fresh revision of the Scriptures, which was published in 1607, with the title *Biblia paa Danske*, etc. In 1633 an edition from the revised text of 1589 was published at Copenhagen—*Biblia det er den gantske hellige Skrift*, etc.—and in 1647 a revised edition from Resen's Bible, designated "Swaning's Bible," so called after the corrector Hans Swaning, archbishop of Zealand, was published, which was again edited in 1670. In 1714 a College of Missions was established at Copenhagen, which issued several editions of the Scriptures according to Swaning's text: one in 1717, a second in 1718, followed in 1722 by a third, and in 1728 by a fourth issue. In 1728 the mission press was destroyed by fire, and the

Orphan House then obtained the exclusive privilege of printing the Danish Bible; and several editions were published by that institution between the years 1732 and 1745. In the meantime efforts were made to obtain a more correct and faithful edition of the Scriptures, and in 1748 the committee appointed by royal authority published a revised New Test.; and since that time numerous other editions were printed before the formation of the Danish Bible Society in 1814. In the year 1810 the British and Foreign Bible Society printed an edition of the Danish New Test. from the Copenhagen edition of 1799, the press being superintended by the Rev. W. F. Rosing, minister of the Danish church in London. A second edition was published in 1814. In the following year another revision of the Bible was commenced at Copenhagen by royal authority. Bishop Muentzer, together with five learned professors, constituted the commission of revision; and in 1819 an edition of the New Test., as corrected and revised by them, was published, followed by a fourth edition of the entire Bible in 1824. The committee of the Danish Bible Society has been engaged for several years past in the task of revising the Danish Old Test., and in 1871 a thoroughly revised text of the Danish Bible was published, which has also been adopted by the British and Foreign Bible Society. The facilities for the circulation of the Protestant Bible in the kingdom of Denmark have within recent years been greatly increased by an arrangement happily come to between the British and Foreign Bible Society of London and the Orphan Institution at Copenhagen, which latter body possesses by law the exclusive right to print the Scriptures within the Danish realm. Prior to 1855 all editions of the Scriptures produced at Copenhagen were accompanied by the Apocrypha and explanatory notes, and hence the Bible Society was by its rules precluded from taking any part in their circulation. In that year, however, at the instance of the London society, the directors of the Orphan House agreed to produce the New Test. free from all notes and Apocryphal references. The concession thus happily obtained was at once acted on, and an edition of 10,000 Danish New Testaments was produced for the London society under the auspices of the Copenhagen Orphan Institution, and passed into rapid circulation. In 1859 a subsequent edition of 5000 was found necessary to meet the demands made upon the society's agency, which increase from year to year. As to the circulation of the entire Bible, without Apocrypha and explanatory notes, the society was prevented from doing so until 1872, when, after many negotiations, permission was obtained to circulate Bibles according to the rules laid down by the society, but with the conditions: 1. That the summaries and the references to parallel passages (with the exception of those which relate to the Apocryphal books) which are found in the editions of the Orphan House be also inserted in the editions published by the society in Denmark. 2. That the title-page of these editions be as follows: *Bibelen eller den Hellige Skrift, indeholdende det Gamle og det Nye Testamente Kanoniske Bøger* ("The Bible, or the Holy Scriptures, containing the Canonical Books of the Old and New Testaments"). 3. The fee to be paid to the Orphan House is provisionally fixed at one mark for each copy. We have stated above that the revised Danish text which was published in 1871 has also been adopted by the British and Foreign Bible Society. This was done after those marginal renderings which savor of "note or comment" had been stricken out. The annual report of 1874 stated the fact that "the first edition of the revised Danish Bible has left the press, the proofs having been read by the Rev. J. Plenge. This is the first edition of the complete Bible printed by the Orphan House at Copenhagen directly for the society."

3. *Norwegian*.—Although the Norwegian and Danish Bibles were originally the same, yet the revisions of later times have made them different. Since about 1860

the Norwegian Bible, with slightly revised text, was published both by the Norwegian and the British Bible Society. A revision of the New Test. was begun about the year 1871, at the expense and by the authority of the Norwegian Bible Society, with the sanction of the chief of the Royal Church and Education departments. The changes introduced rarely touch the interpretation of the text, but are chiefly intended to express the same sense as before, only in language more conformed to the requirements of modern usage. Of the Old Test., the Pentateuch, in a revised form, was published in 1876.

4. *Swedish*.—A version of the Scriptures into Swedish is said to have been made in the 14th century by order of St. Brigit, or Bridget, who, about the year 1344, founded the religious order called, from her, the Brigittines. A translation of the New Test., according to Luther's German version (the first Swedish version of which we have any definite account), was undertaken, by command of Gustavus Vasa, in 1523, by Laurentius Andreas, and printed in 1526, in folio, at Stockholm, with the title *Thet Nya Testamentit på Swensko*. The first Swedish version of the entire Bible was published at Upsala in 1541, with the Apocrypha, the Old Test. being translated by Laurentius and Olaus Petri from Luther's German version of 1534, and the New Test. was that of Laurentius Andreas, printed in 1526. Another version of the New Test., prepared by Amund Laurent, was published at Stockholm in 1550, and again in 1601 and 1621; and in the course of subsequent years several editions of the Psalms were printed. At the commencement of the 17th century, Charles IX ordered Jonas Petri, bishop of Stregnaes, and other learned men, to collate Luther's editions of 1534 and 1545, noting such discrepancies as appeared to them of any importance, with the view of producing an improved edition of the Swedish translation. These notes, when completed, were called *Observationes Stregneses*; and it was decreed in the Synod of Stockholm, in 1602, that they should be incorporated with the old version in a new edition of the Bible. From various causes, this new edition was not published until 1618, when it was printed in folio at Stockholm, with the following title: *Biblia thet aer all then Helgha Skrift på Swensko. Effter förre Bibliens Text, oförändrat medh Försprik på the Boeker ther förr inge wor, medh Summarier för Capitel, Marginalier, flere Concordantier, samt nyttighe Förklaringer och Register, etc., förmerat och efter then stormåttigaste högborne Förstes och Herres, Herr Gustaff Adolffs, Suerrikes Göthes och Wendes Konungs, Befalning* (tryckt i Stockholm, anno 1618). In 1622 not a copy of this edition remained on sale, and a reprint was therefore issued at Lubeck, followed by several successive editions at Leyden, and by two editions (in 1636 and 1646) at Stockholm. In 1650 the Stregnaes Bible was printed under the care of bishop Matthia, which was executed very negligently. The edition of 1618 was also reprinted several times, but with many deviations from the text. A revised edition of the entire Bible was undertaken under the reign of Charles XII, which was published in 1703, with the title *Biblia thet är all then Heliga Skrift på Swensko, efter Konung Carl then Tolfes Befalning* (Stockholm, 1703). Another revised edition appeared in 1709 at the same place. The preparation for this edition was begun by John Gezel, bishop of Abo, who died in 1690, but the work was completed and published by his son. In the course of the 18th century so many editions of the Danish Scriptures appeared that the country was generally considered well supplied with Bibles. When, however, in 1808, Dr. Paterson visited the country, the fact was ascertained that the poorer inhabitants, on account of the high price of Bibles, were almost destitute of the Word of God. The consequence was the formation of the Evangelical Society, which issued several editions for the poor, aided by grants from the British and Foreign Bible Society. In 1815 the Swedish Bible Society was formed, which, with its numerous auxiliary societies, continues the im-

portant work of printing and disseminating the Scriptures. Till 1826 it received much assistance from the British and Foreign Bible Society, when the decision of the Apocryphal question in London severed the connection between the two societies. In order to maintain the circulation of Bibles in Sweden without the Apocrypha, several editions of the Old and New Testaments have been issued by the British and Foreign Bible Society. Their first edition, which was stereotyped, was published in 1828. The text adopted was that of the last edition of the Swedish Bible Society. Several editions from the same text have since been printed by the same society in London, and likewise at Stockholm, through the medium of their agency maintained there. A revision of the old text is now under preparation. The total number of copies of Swedish Scriptures issued by the British and Foreign Bible Society up to March 31, 1877, amounted to 2,599,261, of which 452,879 were Bibles, 1,912,782 New Testaments and New Testaments with the Psalms, 218,650 portions of the Old Test., and 14,950 portions of the New Test.

5. *Faroese*.—Into this dialect only the Gospel of St. Matthew has been translated, about the year 1817, by the Rev. Mr. Schroeter, rector of one of the churches in the Faroe Isles. It was corrected by Mr. Lyngbye, of Jutland, who also superintended the printing of St. Matthew's Gospel, of which 1500 copies were issued. This is the only book of the New Test. that has ever been printed or translated into Faroese.

See Lorck, *Bibelgeschichte*, i, 203 sq., 208 sq., 399 sq.; Göze, *Sammlung merkwürdiger Bibeln*, p. 277 sq.; *Index Bibliorum in Christiano-Ernestina Bibliotheca*, p. 13, 42, 66; *Bibliotheca Biblica, oder Verzeichniss der Bibel-Sammlung der Herzogin von Braunschweig*, etc., p. 182 sq.; *The Bible of Every Land*, p. 214 sq.; Schinmeyer, *Versuch einer Geschichte der schwedischen Bibel-Uebersetzungen und Ausgaben* (Flensburg, 1777). (B. P.)

Scape-goat (Heb. **זֵזַעַל**, *Azazel*) is the name given in the A. V. to one of the two goats used in the sin-offering for the entire community of Israel on the great day of atonement, the goat which was to be sent away into the wilderness. To determine which of the two goats was to be slain, and which sent alive into the wilderness, it was ordered that the priest should "cast lots upon the two goats; one lot for the Lord [Jehovah], and the other lot for the scape-goat" (Lev. xvi, 8), but literally for *Azazel* (**זֵזַעַל**), a word nowhere else used. There can be no doubt that this has the appearance of being some sort of personage, or interest personified, standing over against Jehovah, or somehow contradistinguished from him. But opinions have from early times been divided on the subject.

1. The one followed by our translators, which regards it as a name for the goat itself, is of great antiquity, and has numbers on its side—Symmachus (*τράγος ἀπερχόμενος*), Aquila (*τράγος ἀπολειψόμενος*), the Vulgate (*hircus emissarius*), Luther, and many moderns, also recently Hoffmann. The term so understood is viewed as a compound of **זֵזַעַל**, goat, and **זָלַח**, to go away. The chief objections to it are that **זֵזַעַל** is never used precisely of a goat; in the plural it bears the sense of *goats* generally, but in the singular it designates only *she-goat*; and in Lev. xvi, 10 and 26, the goat and Azazel are expressly distinguished from each other, "the goat (**זֵזַעַל**) for Azazel." These are fatal objections, and have led to the general abandonment of the view.

2. By others it has been taken as the name of a place, either some mountain in the desert (Pseudo-Jonathan, Aben-Ezra, Jarchi), or a lonely and desolate region (Bochart, Deyling, Carpzov, Jahn). But this, also, is at variance with the natural import of the statements, especially with the expression in ver. 10, "to let him go for Azazel into the wilderness," which would then mean, for the wilderness into the wilderness. Nor could Jehovah

on the one side, and a place on the other, form a proper antithesis.

3. Others, again, have taken the word as a *pealpal* form of the Arabic verb **زَالَ**, to remove, formed by modification from **زَالَ**, so that the meaning comes to be for a complete removing or dismissal (Tholuck, Steudel, Winer, Bähr). Grammatically, no objection can be urged against this view; and it undoubtedly accords well with the general import of this part of the rite. "The true expiation," to use the words of Bähr, "was effected by the blood of the first goat, which was set apart for Jehovah; on the other hand, the ceremony with the other goat appears as a mere addition made for special reasons, a kind of complement to the wiping-away of the sins which had already been effected by means of the sacrifice. . . . After the expiation had been accomplished by the sprinkling of the blood, the sin was still further to be carried away into the desert. What the first goat, which died as a sin-offering, was no longer in a condition to set forth was supplied by the second, which was, as it were, one with the first, inasmuch as it carried the sin which had been covered entirely away, and that into the desert or desolate place, where it was quite forgotten; so that the idea of expiation, or the extermination of sin, was rendered thereby absolutely perfect" (Mic. vii, 19). In this view of the matter, the casting of the lots had for its object the assigning of one goat to Jehovah, namely, for an atonement to his justice, and the other to complete removal or bearing away into the oblivion of the desert—namely, of the sin which had been atoned; an explanation which accords well with the general idea of the transaction, and does no violence to the language. The objection of Hengstenberg, that it gives a cold and empty appearance to the peculiar word *Azazel*, a word coined for the occasion, to suppose it to have expressed only the comparatively common idea of complete removal, may perhaps be obviated by conceiving this idea to have been for the occasion invested with a kind of personified existence—much as Sheol, the region of departed spirits, became personified—the one the coverer or dark receptacle of people's lives, the other of their (forgiven) sins. Hence also, probably, the reason of the word being confined to this one occasion, there being no other in respect to which such utter personified oblivion could be predicated.

4. But there is still another class of writers who are disposed to claim for the word a more distinctly personal existence, and who would refer it directly to Satan. This view is certainly of high antiquity, and is expressed in the reading of the Sept. *ἀποποιῆσις*, which means, not scape-goat, or sent away, but *the turner away*, the *avorter*. The expression of Josephus is somewhat dubious (*Ant.* iii, 10, 3), but it seems also to favor the same view; and it was very common with the rabbins, as in later times it has the support of many authorities—Spenser, Ammon, Rosenmüller, Gesenius, etc., who hold it to be equivalent to the Roman *overruncus*, or evil daemon, which was supposed to inhabit desert places, and who needed to be propitiated; but adopted also, though purged of this idolatrous connection, by Witsius, Meyer, Altling, Hengstenberg (in his *Bücher Moses*, transl. by Robbins, N. Y. 1843); also quite recently by Vaihinger (in Herzog) and Kurtz (*Sacrificial Worship of the Old Testament*). These writers hold that the view in question best preserves the contrast between the two goats—one for Jehovah, and one for the great adversary Azazel—the latter a being as well as the former, and a being who (as daemons generally) was supposed to have his peculiar dwelling in the desert. The goat, however, that was sent to this evil spirit—emphatically the removed or separate one—was no sacrifice, but rather a witness that the accepted sacrifice had been made. It proclaimed, as it were, "that the horrible wilderness, the abode of impure spirits, is alone the place to which the sins of the people, as originally foreign to human

nature and society, properly belong; that Azazel, the abominable, the sinner from the beginning (John viii, 44), is the one from whom they have proceeded, and to whom they must again with abhorrence be sent back, after the solemn atonement and absolution of the congregation have been accomplished" (Yaihinger). No doubt, as thus explained, the leading import of the transaction with this goat is in proper accordance with the service of the day; but it cannot appear otherwise than strange that, in the most sacred rite of the old covenant, Satan should be so formally recognised as, according to this view, he must have been; that he should there be recognised under a name which suggests a quite different idea concerning him than that under which he is elsewhere presented; and that, notwithstanding he was so publicly and so regularly associated with this name, it should never again be employed as a personal designation. Such peculiarities are rather startling, and dispose us, on the whole, to concur in the view which ranks third in the list of opinions now exhibited. See AZAZEL.

Scapular, or Scapulary (Lat. *scapula*, the *shoulder-blade*), originally a small garment without sleeves, a part of the habit of several religious orders in the Church of Rome. The several fraternities are distinguished by the color, shape, and material of these holy badges. It was first introduced by St. Benedict in lieu of a heavy cowl for the shoulders. Beirut informs us that "the badge which is called the holy scapulary is made of two small pieces of woollen stuff, about the extent of a hand, hanging by two little laces down from the neck upon both the breast and back of the devout person who wears it." The scapular usually has on it a picture of the Virgin Mary or the initials "I. H. S." on one piece, and "J. M. J." (for Jesus, Mary, and Joseph) or two hearts on the other. It appears to have been invented by an English Carmelite friar named Simon Stock, in 1251. According to the Romish legend, he received the original scapular from the Virgin as a distinguishing badge of the Carmelite order. It is much worn by strict Romanists, in the belief that the devil dreads this terrible weapon. It is supposed to effectually preserve against death by drowning or by fire, and, indeed, against all that might injure either the soul or the body. Besides this "Scapular of Mount Carmel," there are three others, likewise made of two pieces of woollen cloth. The four scapulars may all be worn at once. In this case, each of the two parts is composed of four pieces, which are sewed together like the leaves of a book; and the two parts are joined together by two tape strings about eighteen inches long. Of these four leaves or pieces in each part, the "Scapular of Mount Carmel" is brown and about four inches square; the "Scapular of our Lady of the Seven Dolors" is black and somewhat smaller; the "Scapular of the Immaculate Conception" is blue and still smaller; the "Scapular of the Most Holy Trinity" is white and the smallest, with a

Scapular of Mount Carmel.

cross of red and blue wool in the middle of it (Baronius, *Romanism as it is*, p. 538). Many graces and indulgences are attached to the wearing of the scapulars by many papal bulls; one of these, the bull *Sabbatina*, secures to the wearer, by direct promise from the Virgin to pope John XXI, deliverance from purgatorial fire on the first Saturday after death.

Scarf, a piece of silk or other material, hanging from the neck, worn over the rochet or surplice. It is not mentioned in the rubric of the English ritual, but is worn by our bishops and dignitaries of the Church.

It has been used from the primitive ages by the clergy, when the presbyters and bishops wore a scarf in the administration of the sacraments, and on some other occasions. According to Walcott (*Sacred Archaeology*), it properly belonged to the doctors of divinity and dignitaries, is called *talaga* in Italy and Malta, and is worn by the doctors of theology.

Scarlatti, ALESSANDRO, an Italian musical composer, was born at Naples in 1659. He received a good musical education, and, at the age of twenty-one, wrote his first opera. Little is known of his life except that he was master of the royal chapel under Christina of Sweden in 1680, and after her death filled the same office in the church of Santa Maria Maggiore in Rome. He also taught in various musical conservatories. He died Oct. 24, 1725. His principal works are about thirty in number, chiefly upon secular subjects, but among them are several oratorios, one called *The Sacrifice of Abraham*:—two renderings of the *Stabat Mater*:—and six *Masses*. See Fetis, *Biog. Univ. des Musiciens*.

Scarlet often occurs in Scripture associated with purple and blue. The words so translated occur in the following forms: 1. שָׁנִי, *shani*, and שָׁנִי, *shanim*, alone, Gen. xxxviii, 28-30; Josh. ii, 18-21; 2 Sam. i, 24; Prov. xxxi, 21; Cant. iv, 3; Jer. iv, 30; Sept. κόκκινον, Vulg. *coccinum*; Isa. i, 18, φοινικοῦν, *coccinum*. 2. שָׁנִי, *shani*, תּוֹלְאֵת, *tol'ath shani*, Exod. xxv, 4; xxvi, 1, 31, 36; xxvii, 16; xxviii, 5, 6, 8, 15; xxxv, 6, 23, 25; xxxviii, 18, 23; xxxix, 3; Numb. iv, 8, κόκκινον, and κόκκινον with διτλοῦν, *κεκλωσμένον*, κλώσων, *διανενησμένον*, Vulg. *bis tinctus, coccus bis tinctus, and vermiculus*. 3. שָׁנִי, *shani*, תּוֹלְאֵת, *sheni' tol'ath*, Lev. xiv, 4, 6, 49, 51, 52; Numb. xix, 6; Sept. *kokkion*, with κεκλωσμένον, and κλώστών; *vermiculus, coccus, and with bis tinctus*. 4. תּוֹלְאֵת, *tol'ath*, alone, Isa. i, 18, κόκκινον, *vermiculus*; Lam. iv, 5, Vulg. *croceis*; Nah. ii, 3, *coccineis*. In the New Test., Matt. xxvii, 28; Heb. ix, 19; Rev. xvii, 3, 4, xviii, 12, 16; *κόκκινος, coccineus*. The first of these words, *shani*, is by some derived from *shana'h*, שָׁנָה, "to repeat," and is thus interpreted to mean "double dyed," but which, Gesenius observes, is applicable only to the Tyrian purple (see Braunius, *De Vest.* i, 15, § 214, p. 237; Bochart, *Hieroz.* i, 3, p. 525-527). Gesenius prefers an Arabic root meaning *to shine*, because scarlet garments were admired for their brightness; but Jerome asserts that the word means *coccinatus* (*Epist. ad Fabiolam*). It is certain that *tol'ath* denotes a worm, grub, or insect, and the Sept. and Vulg. plainly understood by it the *coccus*, from which the ancients procured a blood-red crimson dye, the *Coccus ilicis* of Linnæus, class iv, Tetragynia, the *kermez* of the Arabians, whence used to be derived the French word *cramoisi*, and our *crimson*; but Kilian gives *carmensinum*, because made from a worm, which, in the Phœnician tongue, is called *carmen*. Hesychius defines *coccus* as that from which the Phœnician dye is obtained. It was the female of this remarkable insect that was employed; and though supplanted by the cochineal (*Coccus cacti*), it is still used for the purpose in India and Persia. It attains the size and form of a pea, is of a violet-black color, covered with a whitish powder, adhering to plants, chiefly various species of oak, and so closely resembling grains that its insect nature was not generally known for many centuries. According to Beckman, the epithet *vermiculatus* was applied to it during the Middle Ages, when this fact became generally understood, and that hence is derived the word *vermilion*. Hence the Hebrew words mean both the *coccus* itself, and the deep red or bright rich *crimson* which was derived from it (as in Cant. iv, 3, "thy lips are like a thread of scarlet"); and so the word "scarlet" signified in the time of our translators, rather than the color now called by that name, and which was unknown in the time of James I. This

insect is widely distributed over many of the south-eastern countries of the ancient world. It occurs abundantly in Spain (Kirby and Spence, *Introduction to Entomology* [1828], i, 319, 320). It is found on the *Quercus coccifera*, or *kermes* oak, in Palestine (Kitto, *Physical History*, p. 219). Pliny speaks of the *coccus* as a red color much esteemed, which he distinguishes from purple (*Hist. Nat.* ix, 65), and describes as a gay, red, lively bright, approaching the color of fire (*ibid.* and xxi, 22). All the ancients concur in saying that this dye was made from a sort of little grains which were gathered from the holm-oak (Theophrast. *Hist. Plant.* iii, 16; Pliny, xvi, 12; Dioscorides, iv, 48; Pausan. x, 36). They not only call them grains, but speak of them as the vegetable productions of the oak itself (Plutarch, *Thesaur.* p. 7); and Pliny (*Hist. Nat.* xvi, 12) calls them *cusculia*, from the Greek κοσκίλλειν, which signifies "to cut little excrescences," because they cut or scrape off these small grains of the oak. Yet he was not entirely ignorant of their insect character, for he speaks of it becoming a worm (xxiv, 4). It seems, however, that the color thus obtained was not durable (xxii, 8). It was known at a very early period in Canaan (Gen. xxxviii, 28); it was one of the colors of the high-priest's ephod (Exod. xxviii, 6), and of its girdle (ver. 8), of the breastplate (ver. 15), and of cloths for sacred uses (Numb. iv, 8); it was used in cleansing the leper (Lev. xiv, 4), to indicate, as Abarbanel thinks, that a healthy complexion was restored to him. It was the dress of females in the time of Saul (2 Sam. i, 24); of opulent persons in later times (Lam. iv, 5); of the Babylonian and Median soldiers, who also wore red shields (Nah. ii, 4; comp. "Scuta lectissimis coloribus distinguunt," Tacitus, *De Mor. Germ.* c. 6, and Philostratus, *Epist. de Lacedæmonis*). Three mistranslations of the word occur in our version, "She is not afraid of the snow for her household: for all her household are clothed with scarlet" (Prov. xxxi, 21). Since there is no connection between the color and a defence from the cold, it would be better rendered, as in the margin, "double garments." (Comp. Sept. ἐνδεδυμένοι; Vulg. *vestiti duplicibus*.) The next verse of the Sept. begins Δισσὰς χλαίνας ἐποίησε τῇ ἀνδρὶ αὐτῆς, *She hath made double garments for her husband*. In Isa. i, 18 and Jer. iv, 30 the word should be rendered "scarlet," and not "crimson." The final reference to scarlet is in regard to pagan Rome, which, like all cities, is represented as a female; and since everybody wore scarlet in Rome, and especially during war, she is described as being arrayed in that color. In Exod. xxxix, 3, it is said, "They did beat gold into their plates, and cut into wires, to work in the blue, and in the purple, and in the scarlet, and in the fine linen," which is explained to mean that these five kinds—blue, purple, scarlet, fine linen, and gold—were twisted into one thread; thus a thread of gold with six threads of blue, and so with the rest, after which they twisted all these threads into one (Braunius, i, 17, 26). It seems plain, from Exod. xxxv, 25, that the blue and purple and scarlet were spun by hand from wool already dyed of these colors. The white ground was invariably designated by the term "fine linen." The cloth was thus in stripes or checks of different materials. Wilkinson remarks that the color was in like manner imparted by the Egyptians to the thread, etc.—that is, cloth was not dyed after being woven (*Manners and Customs*, iii, 125). It will have been perceived that great difficulty attends the attempt to determine the precise distinctions of colors known to the ancients by the various preceding names. The only possible method whereby they could have conveyed them to our minds would have been by comparing them to the colors of natural objects, whose appearance was immutable and whose identity was beyond question. Such an attempt has been made by bishop Wilkins in his *Real Character*. We may illustrate the utility of these requisites by the color blue, which is defined to mean "the color produced or exposed to the view by the blowing away, or clearing

away, or dispersing of the clouds" (*Encyclop. Metropol.*). But, as is well known, the shades of ethereal blue vary in different countries, and even in different altitudes of the same country; hence the word blue, if illustrated by this standard, would convey a different idea to the inhabitants of different regions. It is most likely that all our ideas of sensible impressions are liable to errors of association. It is, however, satisfactory to know that, like all other dubious matters, these are of minor importance. We add a further reference to Goguet, *Origin of Laws, Arts, and Sciences*, ii, 95, etc. (Edinb. 1764). See COLOR.

The natural history of the κόκκος may be thus summed up. It is a genus of insects belonging to the order Homoptera, of which the males have a single pair of wings and an obsolete mouth; while the females have no wings, but a perfect mouth (*rostrum*) formed for piercing plants and sucking their juices. They live on trees and plants of various kinds. Upwards of thirty species are included in the catalogue of British insects; but of these many have probably been introduced on exotic plants. There are numerous species, many of which are known to yield rich dyes, and several have been employed in the arts. Up to the time of the discovery of America none could compete with the species which infests the evergreen oaks (*Coccus ilicis*); but that has been thrown into the shade by the superior productivity, if not the superior color, of a Mexican species (*C. cacti*), whence we obtain cochineal. The insect called *kermes* by the Arabs is abundant wherever the tree on which it lives is common. All over the south of Eu-

Excrescences on the Oak made by the *Coccus ilicis*.

rope and throughout Western Asia this occurs in extensive forests. The hills of the south of Judah about Hebron, the sides of Carmel and of Tabor, the slopes of Gilead and Bashan, besides many other localities in Palestine, are sheeted with forests and groves of the evergreen oaks, from which a copious harvest of *coccus* may be annually gathered. It is no wonder, then, that the dye was so early familiar to the people of Canaan. It is in that stage of the insect when the larva is about fully grown that it contains the coloring matter in greatest abundance. The little scales are picked from the tree and simply dried, when they yield their dye by infusion in water. To make this permanent, what is called a *mordant* is added—a substance which, having no coloring faculty in itself, acts chemically as a bond of union between the dye and the textile material, and often modifies the tint. The ancients used an impure alum for this purpose. Pliny tells us that thus was obtained from the κόκκος a color of the most brilliant character (*Hist. Nat.* ix, 65; xxi, 22). The hue now produced by the *Kermes coccus* with alum is a rich blood-red; but if the same mordant be used as with cochineal—solution of tin—it yields a scarlet fully as brilliant as that rich American dye, and perhaps more permanent (Bancroft, *Perm. Col.* i, 404). The far greater proportion of coloring matter to the bulk in the latter will always, however, prevent the *kermes* from regaining its commercial importance. See CRIMSON.

Scattergood, SAMUEL, an English clergyman of the latter part of the 17th century, was a fellow of Trinity College, Oxford, vicar of Blockly, Worcestershire (1678), and died in 1696. A volume of his *Sermons* was published (Lond. 1723, 2 vols. 8vo; reprinted 1810).

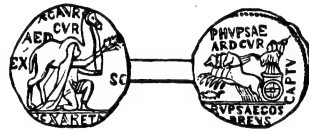

Scaurus, M. ÆMILIUS, a Roman governor of Syria in New-Test. times, was the eldest son of his father of the same name, and stepson of the dictator Sulla, whom his mother, Cæcilia, married after the death of his father. In the third Mithridatic war, he served under Pompey as quæstor. The latter sent him to Damascus with an army, and from thence he marched into Judæa to settle the disputes between the brothers Hyrcanus and Aristobulus. Both of them offered him large sums of money; but he decided for Aristobulus, probably because he bid the highest, B.C. 64. After driving Hyrcanus out of Judæa, Scaurus returned to Damascus. Upon Pompey's arrival at this city in the following year, an accusation was brought against Scaurus of having been bribed by Aristobulus; but, though Pompey reversed his decision and placed Hyrcanus upon the throne, he took no notice of the charges, and left Scaurus in the command of Syria with two legions. Scaurus remained in Syria till B.C. 59, when he was succeeded by L. Marcius Philippus. During his government of Syria he made a predatory incursion into Arabia Petraea, but withdrew on the payment of three hundred talents by Aretas, the king of the country.

On his return to Rome he became a candidate for the curule ædileship, which he held in B.C. 58, the year in which P. Clodius was tribune. The extraordinary splendor with which he celebrated the public games surpassed everything of the kind that had been previously witnessed in Rome, and it is by them that his name has been chiefly handed down to posterity. The temporary theatre which he built accommodated 80,000 spectators, and was adorned in the most magnificent manner. Three hundred and sixty pillars decorated the stage, arranged in three stories, of which the lowest was made of white marble, the middle one of glass, and the highest of gilt wood. Between the pillars there were three thousand statues, besides paintings and other ornaments. The combats of wild beasts were equally astonishing. A hundred and fifty panthers were exhibited in the circus, and five crocodiles and a hippopotamus were seen for the first time at Rome. But Scaurus purchased the favor of the people in these shows rather too dearly. So costly were they that they not only absorbed all the property which his father had left him and the treasures which he had accumulated in the East, but compelled him to borrow money of the usurers in order to defray the expenses.

In B.C. 56 Scaurus was prætor, during which year he presided in the court in which P. Sestius was accused, who was defended by Cicero. In the following year he governed the province of Sardinia, which he plundered without mercy, as he wanted money both to pay his debts and to purchase the consulship. On his return to Rome in B.C. 54, he became a candidate for the consulship; but before the consular elections took place his competitors, at the beginning of July, got P. Valerius Triarius and three others to accuse him of *repetundæ* in Sardinia, thus hoping to get rid of a formidable opponent. His guilt was certain; there were numerous witnesses against him; and M. Cato, who presided as prætor, was not to be corrupted, and was favorable to Triarius. Still, Scaurus did not despair. He was defended by Cicero and Hortensius, as well as by four other orators. Many of the most distinguished men at Rome, and among them nine persons of consular rank, pleaded on his behalf; while the tears of Scaurus himself, and his appeals to the splendor of his ædileship, produced a powerful effect upon the judges. Thus, notwithstanding his guilt, he was acquitted on the 2d of September, almost unanimously. Soon afterwards, and in the course of the same year, he was again accused by Triarius on a charge of ambitus (Cicero, *Ad Att.* iv, 16, 7, 8; iv, 17, 2; *Ad Q. Fr.* iii, 2, 3). Drumann says that he was condemned in this year and went into exile. But this appears to be a mistake; for although it is evident from the preceding passages in Cicero's letters that Scaurus was accused of ambitus in B.C. 54,

it is equally clear from the testimony of Appian (*B. C.* ii, 24) that he was condemned in the third consulship of Pompey, B.C. 52. Hence it is probable that Scaurus was acquitted in B.C. 54, and accused again in B.C. 52 under Pompey's new law against ambitus. From this time the name of Scaurus does not occur again. He married Mucia, who had been previously the wife of Pompey, and by her he had one son (Josephus, *Ant.* xiv, 3-5; *War.* i, 7; Appian, *Syr.* 51; Cicero, *Pro Sest.* 54; *De Off.* ii, 16; Pliny, *H. N.* xxxvi, 2; xxxvi, 15, s. 24, et alibi; Val. Max. ii, 4, 6; Cicero, *Ad Q. Fr.* ii, 15, 4; ii, 16, 3; iii, 1, 4, 5; iii, 2, 3; *Ad Att.* iv, 15, 7, 9; iv, 16, 7, 8; iv, 17, 2; *De Off.* i, 39; Ascon. *Argum. in Scaur.* and the fragments of Cicero's oration for Scaurus).

The following coin was struck in the curule ædileship of Scaurus and his colleague, P. Plautius Hypsæus. The subject of the obverse relates to Hypsæus, and that of the reverse to Scaurus. The former represents Jupiter in a quadriga, with P. HYPSEAEVS. AED. CVR. C. HYPSEAE. COS. PREIVER. CAPTV.; the latter part of the legend referring to the conquest of Privernum by C. Plautius Hypsæus, in B.C. 341. On the obverse side is a camel, with Aretas kneeling by the side of the animal, and holding an olive-branch in his hand. The subject refers to the conquest of Aretas by Scaurus mentioned above. The legend is M. SCAVR. AED. CVR. EX. S. C., and below REX ARETAS (Eckhel, v, 131, 275). See ARETAS.

Coin of M. Æmilius Scaurus, Jun.

Scenophylæces. See CEIMELIARCHÆ.

Scenophylacium, the innermost part of the *diakonicon*, or vestry of the church, and the repository of the sacred vessels and such *anathemata* or presents as were reputed among the chiefest treasures of the church. It was otherwise called *Secretarium*, because, as Du Fresnoy conjectures, the consistory or tribunal of the church was kept here. See Bingham, *Antiq. of the Christian Church*, i, 311.

Scæphrus, in Greek mythology, was a son of Tegeates, king of Tegea. He had an interview with Apollo in the temple at Tegea, and his brother Limon, believing that its object was to lodge a complaint against himself, slew him. Limon was himself slain by an arrow from Diana's quiver; but a great dearth came to pass, nevertheless, and the oracle advised that mourning ceremonies be observed in memory of Scæphrus. Games were accordingly instituted in honor of Apollo and Diana, in which a priestess of the latter, armed with bow and arrow, was expected to pursue any individual, in imitation of the pursuit of Limon by Diana.

Scepticism (from Gr. *σέπτομαι*, *I consider*) strictly denotes that condition in which the mind is before it has arrived at conclusive opinions—when it is still in the act of investigating or reflecting. Scepticism is therefore the opposite of dogmatism. Disbelief is quite a secondary meaning of the term. The Sceptics (disciples of Pyrrho of Elis) aimed at an undisturbed tranquillity of mind, to be attained by a constant balancing of opposing arguments, thus reducing everything to a state of uncertainty and doubt. Popularly, the word is employed to signify the rejection of all religion—infirmity.

Scepticism has assumed several forms, of which the following are among the most common. (i) *Pantheism*, or antisupernaturalism. Spinoza, the leader of this class, talks of nothing less than demonstration, and of being infallibly led to each conclusion by arguments which admit of no reply; a geometrical method of dem-

onstration, the use of which, he said, made it unnecessary to attend to the arguments of opponents. (ii) The *academic* form, which originated with the Sophists, and which Bayle revived, the essence of which consists in opposing all the systems of speculative belief to each other. Academic doubt is ever seeking, for the avowed purpose of never finding; and perpetually reasoning, in order that it may never come to any conclusion. (iii) The *absolute* form, which strikes at the root of all opinions, and appears to found a system of universal doubt in the human understanding itself. Of this kind of scepticism the writings of Hume furnish the great and unrivalled example in modern times. (iv) *Ridicule*. This contains no philosophy, but is a mere series of doubting and jesting. Such was the scepticism of Voltaire. (v) The *historical* form: this is contained in a narrative relating to the times and circumstances with which religion is chiefly concerned; and while preserving an outward regard to morals, misrepresents with irony the miraculous history of the Bible, and takes care, without absolutely falsifying facts, to place it in an absurd and improbable point of view. The history of Gibbon, dealing much in insinuation and very little in argument, is, perhaps, the most dangerous production in this class which has yet appeared, because it least admits of a reply. For who, as Paley observes, "can refute a sneer?" (vi) *Sentimental* infidelity. Such was the unbelief of Rousseau. Other infidels would destroy Christianity without having fixed on any other system to substitute in its place; but, if Rousseau has no system, he has abundance of "sentiments" and imaginations, and has a dim poetical deity of his own to worship, though he can assign no definite attributes to it, nor form any positive conception of his shadowy god.

The most modern form of scepticism is rationalism (q. v.), which strictly signifies that method of thought which, in matters of religion, not only allows the use of reason, but considers it indispensable. The term has now, however, acquired a wider meaning, and stands in opposition to supernaturalism (q. v.), or the belief in that which transcends, or, as others view it, contradicts both nature and reason—as, for example, miracles.

Sceptics. See SCEPTICISM.

Sceptre (Heb. שֵׁבֶט, *she'bet*), in its primary signification, like the equivalent *αἰήπτρον* (for the root of the Hebrew and Greek words seems identical; comp. also English *shaft*), denotes a *staff* of wood (Ezek. xix, 11), about the height of a man, which the ancient kings and chiefs bore as insignia of honor (Homer, *Iliad*, i, 234, 245; ii, 185 sq.; Amos i, 5; Zech. x, 11; Wisd. x, 14; comp. Gen. xlix, 10; Numb. xxiv, 17; Isa. xiv, 5; *wand*, Lev. xxvii, 32). As such it is thought by some to have originated in the shepherd's staff, since the first kings were mostly nomad princes (Strabo, xvi, 783; comp. Ps. xxix). There were, however, some nations among whom the agricultural life must have been the earliest known; and we should not among

them expect to find the shepherd's staff advanced to symbolical honor. Accordingly, Diodorus Siculus (iii, 3) informs us that the sceptre of the Egyptian kings bore the shape of a plough. The symbols of dominion, as represented on the Egyptian monuments, are various. That of Osiris was a flail and crook (Wilkinson, *Anc. Egypt*, i, 257); that of the queens, besides the crown (q. v.), was

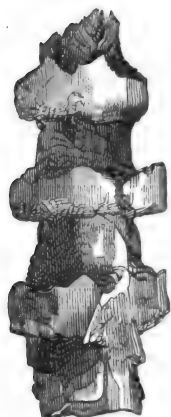

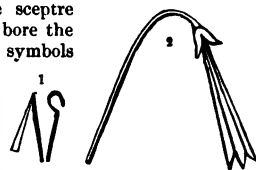

Ancient Egyptian Sceptres—1, of Osiris; 2, of the Queens.

two loose feathers on their head (*ibid.* i, 276). A carved ivory staff discovered at Nimrud is supposed to have been a sceptre (Layard, *Nin. and Bab.* p. 195). A golden sceptre—that is, perhaps, one washed or plated with gold—is mentioned in Ezek. iv, 11 (comp. Xenophon, *Cyrop.* viii, 7, 13; Homer, *Iliad*, i, 15; ii, 268; *Odys.* xi, 91). Other decorations of Oriental sceptres are noticed by Strabo (xvi, 746). Inclining the sceptre was a mark of kingly favor (Esth. iv, 11), and the kissing it a token of submission (v, 2). Saul appears to have carried his javelin as a mark of superiority (2 Sam. viii, 14; comp. 1 Sam. xv, 10; xxii, 6). The use of the staff as a symbol of authority was not confined to kings, it might be used by any leader, as instanced in Judg. v, 14, where for "pen of the writer," as in the A. V., we should read "sceptre of the leader." Indeed, no instance of the sceptre being actually handled by a Jewish king occurs in the Bible; the allusions to it are all of a metaphorical character, and describe it simply as one of the insignia of supreme power (Psa. xlv, 6; Bar. vi, 14). The term *shebet* is rendered in the A. V. "rod" in two passages where *sceptre* is substantially meant, viz. in Psa. ii, 9, where "sceptre of iron" is an expression for strong authority, and in Psa. cxxv, 3; a use derived from the employment of the same word as an ordinary "rod" of correction (Exod. xxi, 10, and often), and even for beating out grain (Isa. xxviii, 27). See Rod.

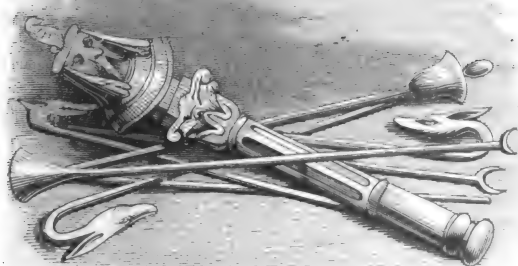

Scē'va (properly *Skeuas*, Σκευᾶς), a Jew residing at Ephesus at the time of Paul's second visit to that city (Acts xix, 14–16), A.D. 52. He is described as a "high-priest" (*ἀρχιερεὺς*), either as having exercised the office at Jerusalem, or as being chief of one of the twenty-four classes. His seven sons attempted to exorcise spirits by using the name of Jesus, and on one occasion severe injury was inflicted by the dæmoniac on two of them (as implied in the term *ἀποφορίσων*, the true reading in ver. 16 instead of *αὐτῶν*).

Schaaf, CHARLES, a German Orientalist, was born at Huys, electorate of Cologne, in 1646. He was educated at Duisburg, and became professor of Oriental languages in that university in 1677. In 1679 he took the same position in the university at Leyden, where he continued until 1729, when he died of apoplexy. His works are, *Opus Aramæan.* (1686, 8vo):—*Novum Testamentum Syriacum, cum Versione Latina* (1708, 4to):—*Epitome Grammaticæ Hebraicæ* (1716, 8vo):—*Sermo Academicus de Linguarum Orientalium Scientia*. In 1711 he prepared a catalogue of all the Hebrew, Chaldee, Syriac, and Samaritan books and MSS. of the Leyden University Library.

Schaats, GIDEON, the second pastor of the Reformed Church in Albany, N. Y., was born in

Part of Ivory Sceptre discovered at Nimrud.

Group of Egyptian Sceptres. (From the monuments.)

Holland in 1597, and at first was a schoolmaster at Beest. Having been ordained by the Classis of Amsterdam, he was sent to this country with the Rev. Samuel Drisius, a man of great learning, who preached in Dutch, English, and French, and was one of the ministers of the Dutch Church in New York from 1652 to 1671, being colleague with Dr. John Megapolensis. Drisius had previously been pastor of a Reformed Dutch Church in London. In addition to preaching in New York, he used to go once a month to Staten Island to preach to the French Vaudois or Waldenses, who had fled to Holland from persecutions in Piedmont, and were by the liberality of the city of Amsterdam enabled to emigrate to the New Netherlands. Mr. Schaats was forty-five years old when he came to this country, and his ministry here extended over thirty years. One of his three children—his eldest son—was killed in the massacre and burning of Schenectady, Feb. 10, 1690. During his pastorate in Albany, the governor (Sir Edmund Andross) compelled dominie Schaats to receive as a colleague the Rev. Nicholas Van Ranslaer, a Church-of-England-man, who was recommended to Andross by the duke of York, and who attempted to obtain a living by laying claim to the pulpit and also to the manor of Rensselaerwyck. Van Ranslaer officiated for about a year, when he died. The people refused to acknowledge him, as also did the Classis of Amsterdam. He was strongly suspected of being a papist in disguise. Mr. Schaats was aided in the controversy with Andross by Rev. William Van Nieuwenhuysen of New York, who was sent to Albany for the purpose, and incurred the governor's bitterest enmity on this account. The latter part of Mr. Schaats's ministry was marked by congregational and domestic troubles. He died in 1674. See Rogers, *Historical Discourse* (1858); Corwin, *Manual of Reformed Ch.*; Murphy, *Anthology of New Netherlands*. (W. J. R. T.)

Schade, Georg, a Danish jurist in Altona, afterwards in Kiel, was born in 1711. He was the author of a deistical work, *Die unwandelbare und ewige Religion der ältesten Naturforscher*, etc. (Leips. 1760), in which he attempts an absolute demonstration of the chief doctrines of faith and practice, independently of all revelation. He even constructs a complete theory of the resurrection of the body and of the future life. Soon after this book appeared, a pretended refutation of it was published at Altona by a so-named professor R. Goisee, with the evident design of simply calling attention to the first work. The magistracy of Hamburg honored Schade's book with a public burning, and the king of Denmark deposed him from his office and banished him. It was only on the accession of Christian VII (1766) that he was recalled and restored to office. Thenceforth he devoted himself exclusively to his judicial duties, until his death in 1795. See Herzog, *Real-Encyklop.* xx, 686-688. (J. P. L.)

Schade, Johann Caspar, an eminent pietist, was born in 1666. He studied at Leipsic (1685-89), came into intimacy with Francke, and shared in the religious awakening of which Francke was subsequently a leader. In 1690 Schade was called to the Church of St. Nicolas, in Berlin. Spener had just previously begun his fruitful ministry in this church. The two other colleagues were also pietistically-minded. Here now began for Schade a very laborious and fruitful ministry. His zeal was seraphic, his temperament ascetic. He abstained from marriage that he might be more wholly devoted to Christ. Soon there arose differences between him and Spener. Schade knew no moderation in the pursuit of what he regarded as duty. He raised his voice against the abuses of private confession, and Spener refuted him. After much agitation, a governmental decision of 1698 removed the exaction of private confession and absolution, and permitted a merely general public confession in its place. But Schade did not live to enjoy this release from what had been to him an oppressive duty. He died in July of the same year.

See *Evangelische Kirchenzeitung*, 1860, No. 489 sq.; Herzog, *Real-Encyklop.* (J. P. L.)

Schadow, Friedrich Wilhelm von, a German painter, was born at Berlin, Sept. 6, 1789. His early studies in art were directed by his father, but in 1806 he abandoned them for the military service, in which he remained for four years. In Rome he afterwards studied under Cornelius and Overbeck, became a convert to Catholicism, and assisted his masters in the decoration of several villas and churches. In 1819 he became a member of the Academy of Fine Arts at Berlin, and in 1827 he was made director of the Academy at Düsseldorf. Here his peculiar religious views and mystical tendencies led to a break with his pupils, and his school was divided, the seceding party being led by Lessing. Schadow was made a nobleman in 1843. He published a pamphlet entitled *Sur l'Influence du Christianisme sur les Arts* (Düsseldorf, 1842):—and *Der Moderne Vasari* (Berlin, 1854). He died in 1862. Of his paintings in Rome, the most remarkable are *A Holy Family*, *The Virgin Mary*, and *The Union of Poetry and Sculpture*. In Berlin is his *Four Evangelists*, and at Frankfort *The Wise Virgins* and *The Foolish Virgins*. See Uechtritz, *Blicke in das Düsseldorfer Künstlerleben*; Püttmann, *Die Düsseldorfer Malerschule*.

Schall, Johann Adam von, a Jesuit missionary to China, was born at Cologne in 1591. He entered the Jesuit order in 1611, and was selected, partly because of his knowledge of mathematics and astronomy, to form one of the mission to China in 1620. He not only formed a successful mission, but, on account of his learning, was invited to the imperial court at Peking. Through his influence with the emperor, he obtained an edict authorizing the building of Catholic churches and liberty of preaching throughout the empire. In the space of fourteen years the Jesuit missionaries are said to have received 100,000 proselytes. Upon the death of the emperor the edict was revoked. Schall was thrown into prison and sentenced to death, was released, again imprisoned, and died Aug. 15, 1669. A large MS. collection of his remains in Chinese, amounting to fourteen volumes in 4to, is preserved in the Vatican Library. See Hoefler, *Nouv. Biog. Générale*, s. v.

Schalling, Martin, a Lutheran divine, was born at Strasburg, April 21, 1532. He studied at Wittemberg, and was pastor at Regensburg, Vilseck (in Upper Palatine), and Amberg. In the latter place he was deposed because he would not subscribe to the *Formula Concordiæ*. He died at Nuremberg, being pastor of St. Mary's, Dec. 29, 1608. He was a pious man, of whose hymn, *Herzlich lieb hab' ich dich, O Herr* (Eng. transl. in Schaff's *Christ in Song*, p. 609, "O Lord! I love thee from my heart"), Gellert said that it was "worth more than many volumes of new hymns, which have no other merit than that of a smoother language." The hymn which we have mentioned, and which is based on Ps. xviii and lxxiii, was a favorite of Spener, Gellert, the duchess of Orleans (daughter of Louis Philippe), and others. See Koch, *Gesch. des deutschen Kirchenliedes*, ii, 282 sq.; viii, 265; Knapp, *Evangel. Liederschatz*, p. 1342, s. v.; Rittelmeyer, *Die evangelischen Kirchenliederdichter des Elsasses* (Jena, 1856), p. 52 sq. (B. P.)

Schamyl. See SHAMYL.

Schartauans, a recent sect in Sweden, named after Schartau, a clergyman, whom they profess to follow. When Schartau died, he left some skeletons of sermons and a large number of devoted followers. An idolatry of the man and his skeleton sermons commenced, and with it a new æra of Christian development, especially in Southern Sweden. It is neither High-Church nor Low-Church nor Broad-Church, but a hard, stony stereotype form—a certain way of preaching, talking, looking, and moving. The Schartauans dislike all lay activity—will join in no missionary work, in no Bible society

—because that is to yoke with unbelievers; nor will they speak with any one on religious subjects unless he is an exclusive Schartauan. Another distinguishing feature is a great horror of the Moravians, founded on some unpleasant experience of Schartau's own. Schartaivism crept into Gothenburg about twenty years ago.

Schedius, in Greek mythology, was (1) the son of Iphitus and grandson of Naubolus, who led the Phocians, in connection with his brother Epistrophus, to Troy. He fell by Hector's hand in the stead of Ajax. (2) A son of Perimides, likewise leader of the Phocians, and killed by Hector.

Scheelstrate, EMMANUEL DE, a Belgian antiquarian and theologian, was born at Antwerp in 1649. In his youth he became much interested in ecclesiastical history, and travelled in France and Italy for the purpose of meeting with the learned men of his day. His first work—on the pontifical prerogative—gained for him a canonry and the position of chorister in the cathedral at Antwerp. Innocent XI called him to Rome, and made him librarian of the Vatican and canon of St. John Lateran. He died in Rome April 6, 1692. Scheelstrate was a great scholar and a most prolific writer, in most of his works maintaining the great dignity of the pope and endeavoring to extend his jurisdiction. Of his works we mention, *Antiquitas Illustrata circa Concilia Generalia*, etc. (Antwerp, 1678, 4to):—*Ecclesia Africana sub Primate Carthaginensi* (ibid. 1679, 4to), in which he endeavored to prove that this Church recognised the pope as patriarch:—*Acta Constantiensis Concilii* (ibid. 1683):—*De Auctoritate Patriarchali et Metropolitana* (ibid. 1687, 4to). See Dupin, *Auteurs Ecclésiast.*; Nicéron, *Memoirs*.

Scheffer, ARY, a French painter, was born at Dort, in Holland, Feb. 18, 1795. His studies were carried on in Paris under baron Guérin, and in 1812 his first picture appeared. His earlier pieces were in the line of historical and genre painting, and have become well known through engravings as *The Death of St. Louis*, *The Sister of Charity*, and *The Soldier's Widow*. In the romantic style which was so prevalent at the time, Scheffer did not succeed so well, and felt that his power lay in a different direction. The inspiration given to his pencil by the works of Goethe and Byron is shown by his pictures *Giaour*, *Faust*, and a series of others. In religious painting, his *Christ the Comforter* and *Christ the Remunerator*, *The Shepherds Led by the Angel*, *Christ in the Garden*, show a deep religious feeling, and are works of power and great beauty. One of his finest sentimental pieces is *Francesca di Rimini and her Lover Meeting Dante and Virgil in Hell*. As a portrait-painter he achieved great success, and the portraits of Lafayette, Lamartine, and others show his power. Scheffer worked incessantly, and his drawing is truthful and full of grace, his touch firm and well adapted to his style, and his color, though often wanting in mellowness, is still very beautiful. He was undoubtedly a great artist, and received the honor due to his talent. He was made commandant of the Legion of Honor in 1848, and died June 15, 1858.

Scheffer, JOHANN (*Angelus Silesius*), a Catholic mystic of Germany of great speculative power and poetic fervor, was born at Breslau in 1624, of Polish Protestant parents, and received his early schooling at the Elisabethanum of that city. In 1643 he went to Strassburg to study medicine, but soon afterwards retired to Holland, where he spent several years, partly at Leyden. Here he became interested in the writings of Jacob Böhme, which exerted a decided influence on his subsequent life. His religious studies did not, however, interrupt his professional preparation, and in 1647 he went to the University of Padua, where he graduated July 9, 1648. Returning to Silesia, he served three years as family physician to a duke. Here it soon became evident that he could not content himself with the

stiff Lutheranism of the day, and he soon became suspected by the local clergy. The court preacher, Freitag, forbade the publication of his poems because of their mystical tone. He found a patron, however, in Franckenberg, a Silesian nobleman, who was also attracted by Böhme. A poem which he published in memory of Franckenberg in 1652 seems to have brought him into trouble. Soon afterwards he left the service of the duke, and on June 12, 1653, entered the Catholic Church at Breslau, at the age of twenty-nine. His conversion raised no little outcry against him. His motives were assailed. This led him to publish at Olmütz, in 1653, his *Fundamental Reasons for Quitting Lutheranism*, in which he gave fifty-five reasons for regarding Lutheran doctrine as erroneous and eighty-three for accepting Catholicism. "In the whole matter," said he, "I have acted simply as an honest, conscientious Christian." After his conversion he remained in Breslau, occupied with religious meditation and writing. In 1657 appeared simultaneously his two chief works, *Der cherubinische Wandersmann* and *Geistliche Hirtenlieder*. In 1661 he was consecrated to the priesthood, and thenceforth acted as an almost bigoted champion of Romanism. In 1664 he was made the intimate counsellor of the bishop of Breslau. For seven or eight years he was now engaged in bittered controversies with the Protestant Church. Among his assailants were Chemnitz of Jena and Alberti of Leipsic. Abuse, caricature, and violence characterized both sides of the controversy. Many of these later writings he collected and published under the title *Ecclesiologia* (Neisse and Glatz, 1677, fol.). His controversial activity seems to have rapidly consumed his strength, as he died at the early age of fifty-three. Of permanent results of his attacks upon Protestantism there is no trace. His writings soon fell into neglect, and it is only in quite recent times that they have met with full appreciation. They bear the stamp of deep conviction, and give evidence of wide acquaintance with the writings of the fathers and the mystics (see Grupp, *Die römische Kirche* [Dresden, 1840], and, on the Catholic side, Wittmann, *Angelus Silesius* [Augsburg, 1842]). But it is more as a poet than as a polemic that Scheffer holds a place in literature. His work *Der cherubinische Wandersmann* consists of a collection of 1675 brief utterances, mostly in Alexandrine verses of two to four lines each, unconnected and without systematic sequence. The title explains itself from the fact that the book aims at pointing out the way whereby man, estranged from God by sin and buried in the love of the world, is to find his way back to communion with God. The undertone of these brief verses is of a strongly mystical character, and is entirely free from confessional distinctions. That we can return to God only by profound contemplation of God; and that the more we gaze upon God with open face and submit ourselves to him in perfect resignation and patience, so much the more are we essentially united to God and made possessors of all that is God's—such is the thought that constantly recurs under a thousand images, and spreads a fragrance over every page. The Christian element in this thought is found in the fact that Scheffer presents the incarnation and redemption as the effective means of our return to God; but he also insists, mystic-like, that the process of incarnation must in some degree repeat itself in us, so that we also may become sons of God like Christ. That some of Scheffer's utterances have a leaning towards pantheism (e. g., "I am as great as God, and he is as small as I;" "When I love God more than myself, then I give to him as much as he gives to me") is not to be denied. But this may be explained partly from the intensely aphoristic form of expression at which the author aims, and partly from actual inconsistency of thought. In his second edition he earnestly repudiates all pantheism, and asserts that he never intends to imply the cessation of the creaturely character of man, but only that our regenerated nature may become so filled with grace as that God shall be, to us, all and in all. Be-

sides, he constantly emphasizes the distinctness of the world from God and the moral freedom of man. With all their defects, these apophorisms are unquestionably among the richest fruits in the whole literature of Christian mysticism. They were highly esteemed by Arnold of Giessen, and by Leibnitz. In recent times the *Wandersmann* has received the warmest praises from Friedrich Schlegel, and has been reissued in whole (Sulzbach, 1829) or in extracts (F. Horn, Varnhagen von Ense, W. Müller, and others). But the poetic fame of Scheffler rests still more upon his volume of hymns, *Seelenlust* (1657-68; latest ed. Stuttgart, 1846), many of which have found a permanent place in the whole Protestant German Church. The latest of Scheffler's poetic works consists of a very realistic presentation of the *Last Things* (Schweidnitz, 1675), but it adds nothing to his fame. As to personal character, Scheffler is not without great inconsistencies. It is hard to believe that the profound sweetness of the poet and the fanatical zealotry of the controversialist could dwell in the same heart. Evidently the two natures of the man dwelt side by side, neither entirely mastering the other. The sources for the life of Scheffler are given in A. Kahlert's *Angelus Silesius* (Breslau, 1853). See Herzog, *Real-Encyklop.* xiii, 478-485; Gervinus, *Lit. Gesch.*; *Westminster Rev.* Oct. 1855; Hagenbach, *Hist. of Doctrines*, ii, 204. (J. P. L.)

Scheid, EVERARD, an eminent Dutch philologist, was born at Arnheim in 1742, and became professor of Oriental literature at Leyden. He died in 1795. Among his works are, *An Arabic Grammar:—Dissertation on the Song of Hezekiah in Isaiah* (Leyden, 1759):—*Book of Genesis Revised:—Minerva, seu de Causis Latine Lingue*.

Schein, JOHANN HERMANN, was born Jan. 20, 1587, at Gruenhahn, near Zwickau. He studied philosophy and theology at Leipsic. Being, however, besides, an excellent musician, he was called in 1615 as precentor to the famous Thomas School at Leipsic, where he died Nov. 19, 1630. He is the author of the beautiful hymn *Mach's mit mir, Gott, nach deiner Gue!* (Engl. transl. "Deal with me, God, in mercy now," in the *Choral Book*, No. 191). See Koch, *Gesch. des deutschen Kirchenliedes*, iii, 88 sq.; viii, 624; Knapp, *Evangel. Liederschatz*, p. 1342, s. v. (B. P.)

Schell, LEVI, a Lutheran minister, was born Sept. 9, 1823, at Berne, Schoharie County, N. Y. Having prepared himself for the ministry at Hartwick Seminary, he was licensed in 1853, and accepted a call as pastor of St. Thomas's Lutheran Church at Churchtown, N. Y., where he spent twelve years and a half, laboring with all the enthusiasm and intensity of his ardent nature. In 1866 he followed a call to the Clay and Cicero pastorate in Onondaga County, which he soon exchanged in 1867 with West Sandlake, in Rensselaer County. Having spent six years at West Sandlake, he accepted in 1873 a call to West Camp, where, however, his valuable and successful labors were interrupted in 1876 by sickness of so serious a character that he was compelled to discontinue preaching. In 1877 he again entered upon his duties, but in May, 1878, he was obliged to close his pastoral labors. He entertained the hope that he would again be enabled to resume his loved work of proclaiming the tidings of salvation, but his impaired constitution had finally to succumb, and he died Dec. 27, 1878, at the age of fifty-five years, and after twenty-five years of arduous and successful labor in the ministry of Jesus Christ. (B. P.)

Schelling, FRIEDRICH WILHELM JOSEPH VON, one of the (Kant, Fichte, Schelling, Hegel) great speculative philosophers of modern Germany, was born at Leonberg, near Stuttgart, in 1775. His father, though but a rural clergyman, was an eminent scholar in Oriental and Rabbinical literature. Young Schelling showed early indications of his great powers. At fifteen he entered the University of Tübingen, intending to make theology his profession. Here he formed an

intimate friendship with the student (afterwards rival) Hegel who was five years his senior, as also with the unfortunate poet Hölderlin. Lessing, Herder, and Kant were the admired heroes of these young geniuses. Also they were enthusiastically stirred by the new political ideas of the outbreking French Revolution.

Writings.—Schelling's first attempt at authorship was his essay for his master's degree in his eighteenth year, *Antiquissimi de Prima Malorum Origine Philosophematis explicandi Gen. iii Tentamen Criticum* (1792). A year later he published a paper, *Ueber Mythen* (on the myths and sagas of antiquity), which shows how deeply the religious ideas of the ancients were already occupying the young scholar. The year 1794, in which Fichte began his philosophical fame at Jena, was a turning-point in the history of Schelling. Fichte's *Wissenschaftslehre* at once set into ferment the kindred speculative powers of Schelling, who, from thenceforth for two decades, sent forth a rapid succession of works which have assured him a place among the great speculatists of the race. Adopting Fichte's idealism, he spiritedly defended it in the following papers: *Ueber die Möglichkeit einer Form der Philosophie* (1794):—*Vom Ich als Princip der Philosophie* (1795):—*Philosophische Briefe über Dogmatismus und Kriticismus* (1795):—*Neue Deduktion des Naturrechts* (1795):—*Allgemeine Uebersicht der neuesten philosophischen Literatur* (1795). These papers show a gradual advance towards independence of thought and towards the chief features of the author's subsequent peculiar positions. In 1796 Schelling went to Leipsic and gave special attention to the study of physics. Here he began to meditate that peculiar Philosophy of Nature which took so striking a form when he began to lecture at Jena in 1798. At first he taught side by side with Fichte; and when Fichte went to Berlin, in 1799, he remained the chief philosophical star at Jena. Hardly could there be conceived a more favorable place for the young philosopher than Jena at this time was. It was the philosophical focus of Germany. Reinhold had there expounded Kant; Goethe's spirit hovered over the place; Schiller, Humboldt, and the Schlegels were closely related to the university. Circumstances combined to invest philosophy here with an atmosphere of poetry. Schelling's Philosophy of Nature, which was partly a creature and partly a creator of this atmosphere, was therefore very enthusiastically received. It was presented in a variety of writings: *Ideen zu einer Philosophie der Natur* (1797):—*Von der Weltseele* (1798):—*System der Naturphilosophie* (1799). While elaborating these works, Schelling also subjected the Fichtean philosophy of the Ego to a further development, positing the *Ego* as an antithesis to *Nature* (see his *System des transcendentalen Idealismus* [1800]). But, unable to rest in this dualism, he attempted to conciliate the antithesis in a higher unity in his *Identitäts-system* (1801). This thought is the inspiration of a fresh series of works: *Bruno, oder über das göttliche und das weltliche Princip der Dinge* (1802):—*Vorlesungen über die Methode des akademischen Studiums* (1803):—*Philosophie und Religion* (1804):—*Darlegung des wahren Verhältnisses der Naturphilosophie zur verbesserten Fichteschen Lehre* (1806). How great was the influence of Schelling in this period is vividly depicted in the pages of such men as Steffens, Schubert, and Schlosser. In 1803 Schelling was called by the Bavarian government to the University of Würzburg; here he wrought in the same spirit as at Jena. On account of political changes he left this post after two years, and retired to Munich, where, in 1807, he was made secretary of the Academy of Sciences.

This is a transition period in the philosophy of Schelling. His greater originality and independence lie in his Jena period. He now begins to drift towards syncretism and a mystical theosophy. It is an effort to escape from pantheism towards Christianity, or rather to find a system which shall express the truth of both. The works which give expression to this ten-

dency—they appear less frequently than previously—are: *Das Verhältniss der bildenden Künste zur Natur* (1807);—*Das Wesen der menschlichen Freiheit* (1809);—the harsh work against Jacobi, *Denkmal der Schrift von den göttlichen Dingen* (1812); and essays in the *Allgem. Zeitschrift* (Munich, 1813).

After the year 1815 there begins an almost uninterrupted silence of nearly forty years in Schelling's life. In 1820 he lectured for a brief period at Erlangen. In 1826 he was made professor of philosophy at the new University of Munich. His lectures here formed an epoch in the life of many rising young men. In 1841 he accepted a call to Berlin. The lectures here delivered formed a strong antithesis to the dominant Hegelianism, and are the best expression of his later system. His last years were devoted to editing his later form of doctrine for the press. Death overtook him in Aug. 1854, while seeking relief at the baths of Ragaz, in Switzerland, at the age of seventy-nine. Soon after his death (1856) the publication of his collective works was begun by his son (a clergyman), K. F. A. Schelling. They embrace a first division of ten volumes and a second of four volumes (Stuttgart and Augsburg, 1856 sq.).

Philosophy.—The philosophy of Schelling does not present a definite, self-consistent unity. It was in an almost constant state of self-modification. But it presents two pretty definite, crystallizing climax-points—his early *pantheistic idealism* and his later *Christian theosophy*. Between these climax-points lies his long period of almost total retirement from public life. As a whole, however, the growth of his thoughts may be distributed under the following five phases:

- (1.) *Schelling as a disciple of Fichte.*
- (2.) *His philosophy of nature and his transcendental idealism.*
- (3.) *His system of identity.*
- (4.) *His transition period.*
- (5.) *His theosophic approach to Christianity.*

(1.) Schelling began his thought-system by absorbing and championing the reigning philosophy of the day—to wit, the system of Kant as modified by Fichte. By Fichte the idealism of Kant was emphasized into exclusive validity. According to Fichte, there is no other reality than the absolute activity of the *Ego*. It is true, this activity of the *Ego* is conditioned by an *object*—the *Not-me*. But this *Not-me* cannot be derived from any reality exterior to the *Ego*; that is, from any *thing per se*. On the contrary, the *Not-me*, the external world of thought and observation, is really an unconscious creation of the *Ego*, which the *Ego* then subsequently raises to an object of conscious contemplation. But which is the absolute reality with Fichte, the *Ego* as unconscious or as conscious? If as *unconscious*, then God, the All, is unconscious; and the empirical consciousness of man is delusive and unreal, and is destined to vanish into unconsciousness. If as *conscious*, then God, the supreme reality, has no existence save in the transitional flux of vanishing, finite *Egos*: he is in eternal process of becoming and of passing away. Between these two consequences Fichte's system constantly oscillated, tending at the one pole to self-annihilation, and at the other to self-deification. The latter tendency prevailed more in his earlier, and the former in his later, life. It was as an enthusiast for this rigid idealism of Fichte that Schelling made his philosophical *début*. With Fichte he denied self-consciousness and personality to the absolute being; and he insisted that for the idea of a divine revelation there can be no place, save in the mythological phraseology of the populace. The history of religions he regarded as only a "progressive, symbolic manifestation of the ideas of the absolute reason." The philosophies and religions of the ancient world present in an imperfect and, as it were, unconscious form that which modern thought has developed in full consciousness of its own processes. Perhaps the chief feature in which Schelling differed from Fichte from the very outset was that he found a deeper sig-

nificance in the different forms of religion than Fichte had done.

(2.) Schelling's second phase (1796–1800) sprang from his growing conviction that a mere subjective idealism could not do justice to the empirical objective world by which we are met on every hand. He did not mean by this to give up the results of his idealism; he only meant to reach the same results upon another path—to rediscover the reason of the subject in the objective reason of the world of nature. Thereby he introduced a new stadium into his philosophy: constructive or *creative* knowledge was put into the place of the previous *critical* knowledge. As previously the *Ego* had concentrated itself absolutely upon itself, so now this *Ego*, the subject, was to expand itself over the universe and find the laws of its own intuitions there reflected. Out of *subjective* idealism sprang, thus, an *objective* idealism. From the standpoint of this idealism the *moral* element loses its importance, and *speculative* knowledge is the one thing important. The intention of Schelling in his Philosophy of Nature was simply to complement the idealism of Fichte; but in reality it grew into a direct antithesis to it. With Fichte, nature was merely a *means* for the development of the subject. With Schelling, it was a manifestation-form of the absolute *Ego*, and had essence and significance *in itself*. *Nature was spirit visible; spirit was nature invisible*. This conception seemed strikingly new and important. It was hailed with very great enthusiasm. Nature was to Schelling a perpetual movement of self-balancing force. By the varied interaction of attraction and repulsion are produced the infinitely varied forms of organic life. *Matter* is balanced force. Nature, when rising above the antithesis of attraction and repulsion, becomes *light*. Light is, as it were, the soul, the thought of nature. Under the influence of light, matter evolves itself dynamically in the phenomena of magnetism, electricity, chemistry. The antithesis of crude matter and light is harmonized in the higher stage of organic life. Here light *inheres* in the objects; it is their vitality, their *life*. Matter becomes here a mere incident of the vitalizing principle. The stages of the dynamic process constitute the great divisions of organic life. The preponderance of objectivity or of subjectivity determines the characteristics of the three great kingdoms of organic nature—the vegetable, the animal, and the human or moral. Matter is the background upon which these three kingdoms stand out as higher stages of evolved being. Through it they stand related and are united into a unitary cosmos.

In his Philosophy of Nature Schelling thus traces the objective world in its ascent from the crudest objective stage to the highest subjective; that is, from matter to moral freedom (so far as the latter exists). But, not content with this, he now reverses the process. He starts from the highest point reached by natural philosophy—to wit, self-conscious man—and reconstructs the whole system of philosophy from a subjective standpoint. In this—his Transcendental Idealism—he traces, accordingly, the objective as rising from the subjective. He divides his subject-matter here into the theoretical, the practical, and (that which unites the two) the artistic. In the theoretical part Schelling considers the various stadia of knowledge in their relation to the various stadia of matter. Matter is extinct mind. The acts and phases of self-consciousness are rediscoverable in the forces of nature and in the stages of their development. All the forces of the world are ultimately reducible to powers of ideal representation. Organization is necessary; for intelligence must view itself in its productive, successive transition from cause to effect. This it cannot do without making that succession permanent or representing it as at rest; and succession represented as at rest is organization. Intelligence is a never-ending effort at self-organization. Among the successive stages of organization there must be one which the subject is forced to regard as identical with

himself. It is only through the fact that there are other intelligences than myself that the world is made objective to me. It is only through commerce with other individuals that I can come to the consciousness of my freedom. The intercommunication of rational individuals through the medium of the objective world is the condition of freedom. But whether all free beings shall, or shall not, confine their action within such limits as leave free play to the freedom of each other is not left to chance, but is safeguarded by the higher law of justice. Justice rules in the interests of freedom with all the inviolability of a law of nature. All attempts to supplant the reign of absolute justice by an arbitrary, artificial statute code have ever proved futile and abortive. The guarantee of a good constitution in each state must lie, in the last resort, in the subordination of all states to the common law of absolute righteousness. The gradual approach towards a realization of righteousness is the substance of history. History, as a whole, is a progressive realization and manifestation of the Absolute. It is only through history as a whole that the full proof of God's existence can become manifest. All single intelligences may be regarded as integral parts of God or the moral order of the world. This divine order will fully exist as soon as individual intelligences establish it. Towards this consummation history is constantly advancing in consequence of a pre-established harmony between the objective necessary and the subjective free. This harmony is conceivable only on the supposition of the existence of a higher element, superior to both, as being the ground of the identity of the absolutely subjective and the absolutely objective, the conscious and the unconscious, whose original separation took place simply in order to the phenomenal manifestation of free action. If the phenomenal manifestation of freedom is necessarily unending, then history itself is a never-completed revelation of the Absolute, which disrupts itself, in view of this manifestation, into the conscious and the unconscious; but which is, in the inaccessible light in which it dwells, the eternal identity of both and the eternal ground of their harmony. To this higher element of identity *no predicates can be given*. Hence it cannot be an object of knowledge, but only of *practical postulation*—that is, of *faith or religion*. If we turn our attention exclusively to the orderliness of the objective world, we fall into a system of *futilism*. If, on the contrary, we regard only the subjective, we land in *irreligion or anarchy*. But if we rise to the thought of that higher identity of both we attain to a system of *providence*—that is, of religion in the true sense of the word. It is true, Schelling leaves here untouched the very pertinent question how this higher Absolute to which no predicates can be assigned can be described as *provident*. How he would have met the question we leave undecided.

The transcendental idealism of Schelling had grown under his hands into a complete system of philosophy. It was therefore not only co-ordinate with his philosophy of nature, but also super-ordinate. But with this twofold presentation of his system from the two poles of the finite (Nature and the Ego) Schelling was not satisfied. He now felt that what he had found as the goal of his highest previous effort—to wit, the principle of absolute identity—should be laid as the beginning at the foundation. This brings us to the third stage of his philosophizing.

(3.) The epoch of his System of Identity. In this system everything is derived from the absolute reason, taken in the sense of the absolute identity of subject and object. The highest law of this principle is its identity with itself ($A=A$). It is absolutely infinite and one. Whatever *is*, is this absolute itself. Single finite things exist only in reflection. As this absolute identity is everything, it is at the same time the totality of everything. It is not the source or the *cause* of everything, but it is *itself* everything. In his concep-

tion of this absolute identity, Schelling seems to involve himself in a shadow of self-contradiction. He makes it, on the one hand, an absolute *indifference*; as such it is purely negative, and hence cannot be made the basis of a positive universe. On the other hand, he makes it the *identity* of everything—that is, he makes it the most positive of all things. In this absolute identity, Schelling distinguishes *essence* and *form*. In respect to form, it is an infinite self-knowing; it can know itself, however, only as subject and object. But as this subject and object spring from identity, their only difference must be quantitative, not qualitative; that is, the absolute identity can differentiate and posit itself under a preponderance of the subjective or of the objective, but not under a form from which one of the elements is entirely absent. Any equation that can be contrasted with $A=A$ must be simply equivalent to $A=B$. The whole conception may therefore be expressed under the form of an unending magnetic line with one indifference-point and two poles, at the one of which A preponderates, and at the other B, thus:

$$\begin{array}{ccc} \overset{+}{A}=B & & \overset{+}{A}=B \\ \hline & A=A & \end{array}$$

At every point in this line all three elements are present. Every single object is therefore one of the forms of the essence of the absolute, and in each of these forms the absolute identity is *entire*, seeing that it is *per se* indivisible. The preponderance of the objective or real is *nature*. The first relative totality in nature is *matter*; and the ideal antithesis of matter is *light*; and from the combination of matter and light springs organic life. But it is only in an infinite self-knowing that the absolute identity is *actu* real, and hence only in the sphere of the subjective and ideal. This sphere Schelling identifies with the *true*, the *good* (religion), and the *beautiful* (art). The absolute identity is therefore the essence of nature simply in that it is the *ground* of its actual existence. Everything is nature which falls outside of absolute being. This differentiation of essence as, on the one hand, the actuality of things, and as, on the other, simply the *ground* of their actuality, was justly regarded by Schelling as one of the most important connecting links between his earlier and his later system.

The filling-up of the outlines of his system of identity Schelling left incomplete; he gave chiefly the objective phase. Of the subjective or spiritual phase we have only fragmentary sketches. As filled out in his oral lectures, this phase contained the germs of his later and more theistic system. Religion is presented, not as a product of development from a state of barbarism, but as a product of instruction from higher beings. But Christianity is regarded as inferior to the great religions of the Orient; and yet Schelling insists, as against illuminism and the subjective moralism of Kant, on the necessity of the chief theological ideas of the Bible. His thoughts are these: As the universe differentiates itself, as real and ideal, into nature and history, so history itself is likewise divided. The Oriental and pagan world is the nature side of history; Christianity, on the contrary, is the ideal or moral side. The pagan religions are religions of nature; the gods are but forces of nature; the infinite is subordinated to the finite; hence the multitudinousness of deities. But in Christianity the finite is subordinated to the one infinite; hence the unity of the divine nature. In Christianity mythology can only rise from deterioration and popular ignorance. In paganism mythology is primitive, and religion can rise only from an intellectual advance beyond the primitive elements. The stream of history rises through three stages. The *stage of nature* came to its climax in the religion and poesy of the Greeks: it was a time of unconscious identity with nature, and nature was regarded as a manifestation of eternal necessity. The *period of catastrophe*, or of conflict between natural necessity and moral freedom was

the tragic age of the decline of ancient civilization. The period of harmonization, or of providence, was inaugurated by Christianity. (This division corresponds in part with the one made in the author's *Transcendental Idealism*.) It is only in Christ that God becomes truly objective. But this is an eternal process, and the incarnation is not a merely temporal, empirical act; Christ offers up in his own person the finite, and thereby renders possible the coming of the Spirit as the light of the new world; this spirit brings, conducts, the finite back to God. From philosophic speculation Schelling looked for the new birth of essential, or esoteric, Christianity, and the proclamation of the absolute Gospel.

Connected with these views is Schelling's next speculative work, *Philosophy and Religion* (1804). It is a self-defence against Eschenmayer. In it religion is presented as the "conciliation of the finite with God;" but the finite is regarded as *per se* fallen. "God is not the positively creative cause of the finite; the finite cannot directly spring of the absolute, and it sustains to the absolute no direct relation." The finite is regarded simply as *not real*, as delusive. The general background of this work is an idealistic mysticism, derived in part from Plato and Plotinus, but also much resembling the transmigratory systems of the Orient; it fails to do justice to the ideas of morality and freedom.

(4) With this work on *Philosophy and Religion* Schelling begins his transition to a more positive Christianity. All of his works subsequent to his *System of Identity* bear a more or less mystical coloring and become less and less rigidly systematic in form; at first the mysticism resembles that of the Eleusinian mysteries and of Neo-Platonism; subsequently it approaches Christianity on the footsteps of Böhme. But this appropriation of mystical views was entirely independent on the part of Schelling; he seems to have been forced into them by a growing feeling of incomplete satisfaction with his previous views. And it is to be regretted that he did not openly concede the erroneousness of his earlier system or systems, but constantly represented his later system as simply complementive of his previous ones.

But his change of view is very radical. It came to definite expression for the first time in 1809, in his discussion of the nature of human freedom. Here is to be found in embryo the very essence of his final system. Schelling gives up monism. *Monism* cannot solve the riddle of good and evil, and gives no play to creaturely freedom. Idealism must be complemented by realism. Idealism is the soul of philosophy; realism is its vital body; it is only from the union of the two that a vital whole can result. A few of Schelling's positions here are these: As nothing exists before or outside of God, so he has the ground of his existence within himself. This ground of his existence is not God *per se*, but it is a nature in God; this nature is inseparable from God, but yet it is distinguishable; it is not actually, but only logically, antecedent to God. It is only from this nature in God that the diversity and multiplicity of finite things is explicable. In order that these things be other than God, it must be that they have the ground of their existence in something which is *not* God; that is, in that in God which is not God himself. The further development of these thoughts brings us to

(5) Schelling's Later System. The thoughts here met with are unquestionably among the most brilliant and suggestive that are anywhere to be found in the field of the philosophy of religion. At the threshold of this system we meet with an examination of the implications of creaturely freedom. Among the fruitful conclusions here reached is this, that purely rational, logical thought is incapable of leading us to a knowledge of reality. This conclusion leads to a distribution of philosophy into *negative* and *positive*. By this distinction, Schelling comes into sharp antithesis to Hegel, who endeavored to comprehend the real by the processes of mere abstract thought. In the view of Schelling,

this is impossible. Pure thought, pure reason, cannot *a priori* comprehend the existence of the objective world of reality. What a thing is and that it is (*quid sit et quod sit*) are clearly to be distinguished. The *what*, the essence of a thing, may be expressed in thought, in ideas. But the knowledge that it exists is given by something outside of thought—to wit, its existence itself. This knowledge comes to us from *experience*, and not from reason. Existence cannot, therefore, be *demonstrated*; it can only be *experienced*. It is only through this knowledge from experience that thought reaches to true knowledge. A negative or ideal philosophy has to do only with the *possible*. It is only a positive philosophy that can rise to contact with the *real* and with that which springs from the real—to wit, *freedom* and *free action*. But as the whole of the results of freedom is not yet complete, a positive philosophy cannot be presented in as rounded a systematic form as is possible with the negative. The highest attainment of negative philosophy is to show *how* the highest principle is *in idea*. The connecting link which leads over from the negative to the positive form of philosophy is the conviction, forced upon us by experience, that God must be more than mere idea—that is, that he is *real*. As negative philosophy is the *a-priorism* of the empirical, so positive philosophy is the *empiricism* of the a-prioristic—that is, it is philosophical empiricism.

Positive philosophy can assume a starting-point almost anywhere—thus: "I will that which is higher than substance, to wit, the Lord of all being." From this initial assumption it then proceeds *deductively*, and the experience which results reacts as verification of the assumed starting-point. The world is here the *posterius*; the unconditioned *prius* is God. And the whole drama of human history is an accumulative proof that this *posterius* is from this *prius*. It is only in the sphere of positive philosophy that we reach the field of religion—that is, of a real (not merely ideal) relation of man to God. The transition from a negative to a positive philosophy is like that from the law to the Gospel. For a purely rational science, the idea of an objective religion does not exist. Religion originates *practically* through a longing and desire of the *spirit*, which cannot be satisfied with the merely ideal God of speculation. This longing is not an expression of the practical reason, as Kant would have it, but rather of the individual *personality*. It is not the generic, but the specific, that leads to God; for it is not the generic element of man (the reason), but the specific (the personality), that calls for happiness. The individual, as personality, calls for a person who is outside of and above the world—a Heart—with which it may commune. The object and content of positive philosophy are furnished by *revelation*. But revelation is not philosophy, even as a ledge of rocks is not geology; it becomes philosophy only when thought digests and constructs it. Revelation is as essential to religious knowledge as the crust of the earth is to geological knowledge; hence the absolute defect of rationalism; reason is not competent to judge as to what revelation *should* be, but only to construct the revelation which *is*.

Having speculatively reached the ideal of the Absolute Being, and being forced by the *heart* to assume that this Being is objectively *real*, the philosopher is now ready for the predicate of this highest reality. This Being would not be perfect if he had not the liberty of positing himself outside of himself; but this is a liberty, and not a necessity. God is, *before* the world, master of the world; that is, he is able to posit it or not to posit it. The world is therefore a consequence, not of the divine nature, but of the divine will. But God does not posit himself into the world. God does not become *real* in consequence of creation; and yet he would not be real without the power of creation. Monotheism is true, but not in the sense of theism. Theism admits God as a personality, but this personality is an empty

undifferentiated infinity, and has within itself no potentiality, no basis for a world outside of God. God is *per se* a plurality of potencies, and he is the totality of these potencies. And the great error of pantheism is not that it holds that there is no being outside of God, and that all existence is God's existence, "for all hearts cheerfully and joyously concede this;" but it consists in assigning to God a necessary and involuntary identity with whatsoever *is*. It is only from this idea of monotheism as distinguished from theism and pantheism that a transition to the truth of the trinity is possible. The entire God—that is, God as the totality of the divine potencies—is the Creator, the Father; and he is Father only in that he confronts the possibility of what is to be; and his fatherhood is fully realized only with the full actualization of creation. In the act of creation the absolute personality evolves its own self-existing essence out of itself. This act of creation is a *generating*, and the divine essence so evolved is the Son. A second evolution constitutes the Spirit. The fatherly potency furnishes the material of creatural objects; the Son their form; the Spirit their perfection.

Revelation in the Old Test. lingers under the forms of mythology. In the New Test. these forms are entirely dispensed with. The focus of the new religion is the person of Christ, not as teacher or legislator, but as *content*. The person of Christ is both historical and prehistorical; as prehistorical he presided over pre-Christian history; as historical he laid aside his glory and identified himself with man in order to raise human nature into communion with God. Christ resumed the glory which he had laid aside only *gradually* and by moral process. This process began at his baptism. It is only on the complete victory of Christ over death that he could send the Spirit as comforter.

Schelling closes his philosophy of revelation with a glance at the history of the Church. He distinguishes here a prehistorical, a historical, and a post-historical Church. The latter will not appear in the present æon. The condition of the prehistorical is that of a merely subjective (negative) unity; that of the historical is a state of division as preparatory to its transition to a state of free, positive unity. The historical stage of the Church begins at the point where Christianity attains to domination in the Roman empire. Here it had to face, under a new form, all the might of the once defeated Evil Spirit. In giving itself an outer constitution, the Church appeared at first as a mere realistic, material, formal unity; as such it was of a merely *authoritative* legal character, and the more rigidly this legal character developed itself, so much the more was the *ideal* (spiritual) character driven into the background. But at the Reformation the *ideal* element came to open revolt with the *realistic*, and it then inaugurated a new phase of Church history. Both Christ and the apostles place the advance of the Church in a growth in knowledge; and the character of this new phase is, and will be, that mankind recognise more and more the supreme fact that Christianity is the highest stadium of human science. The three conditions of the Church are typified in the three apostles—Peter, Paul, and John. Peter has the violent, aggressive nature that characterizes every beginning; Paul is steady and constructive; John has the gentle repose of maturity. The true Church is neither of the three, but the synthesis of all; its foundation was laid by Peter; its body was edified by Paul; its content was breathed into it by John. Even as God consists not simply of one person, so the Church is not embodied simply in one apostle. Peter is rather the apostle of the Father: he sees most deeply into the past. Paul is really the apostle of the Son: he is full of light. John is the mouth-piece of the Spirit: he has the deep "words" of spiritual truth and warmth.

As a whole, no system of modern philosophy has more fully allied itself with Christianity than that of Schelling; he, of all the great speculatists, has alone treated this religion as "real history." To Schelling Chris-

tianity is a higher, a supernatural stream of history flowing upon the bosom of the ocean of cosmic history. He treats this history, not atomistically, but genetically. This genetic method of theologizing has become the prevalent characteristic of modern theology. Schleiermacher, Nietzsche, Rothe, Lange, Martensen, have all practiced it. Its general trait is an earnest endeavor to co-ordinate the parts into the whole, and to grasp the whole as a vital unity; and its stimulative relation to contemporary theological thought is an evident result of this its chief trait; and that in its details it may frequently be erroneous, or that many of its speculations are over-presumptuous, does not destroy its value as a whole.

Few thinkers have had more enthusiastic disciples than Schelling. G. M. Klein espoused his system of identity. J. J. Wagner defended the earlier Schelling against the so-called later. G. A. F. Ast applied his method to the study of Plato. T. A. Rixner became a fruitful student of the history of philosophy. L. Oken applied Schelling's thoughts to an elaborate philosophy of nature; Nees von Esenbeck applied them to the physiology of plants; B. H. Blasche, to pedagogics and religious philosophy; J. P. V. Troxler, to the science of cognition. A. K. A. Eschenmayer received here his fundamental inspiration. J. Görres adapted Schelling to Roman Catholic tendencies. G. H. Von Schubert reflected him in a popular Christian mysticism. K. F. Burdach made large use of his philosophy of nature. K. G. Carus represented him in psychology and craniology; H. C. Oersted, in physics; K. W. F. Solger, in æsthetics; H. Steffens, in general religious philosophy; J. E. Von Berger, in the philosophy of law. F. Von Baader developed and remoulded Schelling's later views into a very rich and elaborate system of Christian theosophy. K. C. F. Krause applied Schelling's views to general literature and freemasonry. F. G. Stahl was largely influenced by the later Schelling in his philosophy of law and in his discussion of the relations of Church and State. Coleridge received much inspiration from the early Schelling, and through Coleridge this influence went over into the pantheistic traits of Wordsworth. Agassiz was inspired by Schelling's views of nature. And many of the brilliant hypotheses which have played so large a rôle in modern physics—such as the metamorphosis of plants, the homologies of the skeleton, the origin of species—are really found in germ in the early works of Schelling.

On Schelling, consult Herzog, *Real-Encyklop.* xiii, 503-551; Ueberweg, *Hist. of Philosophy*, vol. ii; Hagenbach, *Hist. of Doctrine*; Hurst, *Hist. of Rationalism*; Bowen, *Modern Philosophy*; and all works on modern German speculation. (J. P. L.)

Schelling, Joseph F., general superintendent at Maulbrunn in Württemberg, was born in 1737, and died in 1812. Among his contributions to Biblical literature are the writings of Solomon translated into Latin, with notes (Stuttgart, 1806), and a *Dissertation on the Use of the Arabic to a Thorough Knowledge of Hebrew* (Stuttgart, 1771).

Schenck, George, a (Dutch) Reformed minister, was born at Mattewan, N. Y., Jan. 27, 1816, and graduated at Yale College, August, 1837. During his boyhood he was crippled for life by a severe fall while skating. Hip-disease ensued in its most painful form. He was helpless for three or four years, and was never after able to walk without crutch or cane and a high boot. But this affliction was sanctified to his conversion during his collegiate life. He studied theology in the New Brunswick Seminary, and after graduation, in 1840, settled as pastor of the Reformed Church of Bedminster, N. J. This was his only charge—a very large, intelligent, well-trained country congregation, which has enjoyed a long succession of able ministers. Mr. Schenck was distinguished as a preacher of unusual power in the exposition of Scripture and in the application of it to

the consciences of his hearers. He was at times brilliant, always earnest, and "never feared the face of clay." His fine social qualities, deep piety, and skill as a physician of souls, endeared him to his people. His energy was marvellous. "What he began, he expected to do. His body was like a little craft driven by a tremendous engine; and for just that reason, no doubt, the timbers so soon fell apart. He preached, as he wrote to a friend, 'with all his might.' He was no less zealous as a pastor." His tastes were refined, literary, scholarly. But everything was bent to his life-work as a minister. In the general affairs of the Church, in the temperance cause and educational movements, he was conspicuous for "zeal with knowledge." His ministry was greatly blessed in conversions and revivals, and in the edification of the Church. He died in 1852, of palsy, which struck him down just after he came from a Sabbath afternoon lecture and a visit to a sick man. With characteristic modesty, he never but twice consented to frequent requests to appear in print. *A Sermon on the Second Coming of Christ* (1843) and an *Address on Music* (in which he was a proficient) (1849) are all of his publications. See *Memorial Sermon*, by Dr. T. W. Chambers; *Letter of Rev. H. D. Ganse*; Sprague's *Annals of the Amer. Pulpit*. (W. J. R. T.)

Schenk, Hartmann, a Lutheran divine, was born April 7, 1634, at Ruhla, near Eisenach. He studied at Helmstädt and Jena, and was pastor at Bibra and Völkershausen. His motto was, "Mea Hereditas Servator," and he died May 2, 1681. He was a man of prayer, who not only prayed himself, but also taught others how to pray. He wrote some hymns, which are still in use in the German churches. See G. Ludovici, *De Hymnis et Hymnopoëis Hennebergicis* (Schleusingen, 1703), p. 27; Wezel, *Hymno-pæographia* (Herrnstadt, 1724), iii, 49; Koch, *Gesch. des deutschen Kirchenliedes*, iii, 427; Knapp, *Evangel. Liederschatz*, p. 1343. (B. P.)

Schenk, Heinrich Theobald, a Lutheran hymn-writer, was born at Alsfeld, and became headmaster of the school at Giessen, and afterwards chief pastor there, where he died in 1727. He is the author of *Wer sind die vor Gottes Throne* (based on Rev. vii, 13-17), transl. into English by E. Cox, in *Hymns from the German*, p. 91, "Who are these, like stars appearing." See Koch, *Gesch. des deutschen Kirchenliedes*, iv, 535; Knapp, *Evangel. Liederschatz*, p. 1343. (B. P.)

Schermerhorn, John F., a (Dutch) Reformed minister, was born about 1785, graduated at Union College 1809, and entered the ministry of the Congregational Church, which he left in 1813 for the Dutch Reformed Church. He was first settled at Middleburgh, N. Y., 1817-27. In 1817 he visited Upper Canada with Rev. Jacob Van Vechten, and labored three months among the Dutch churches there. He was appointed Secretary of Domestic Missions, 1828 or 1829, by the Northern Board of the Missionary Society of the Reformed Dutch Church to call forth the resources of the Church and determine the proper missionary fields. Subsequently he was appointed general agent for the whole Church. His energy and zeal gave a new impetus to the benevolence of the Church. Among the substantial fruits of his labors was the organization of the Reformed churches in Utica, Ithaca, and Geneva, besides others in less prominent places. But serious difficulties embarrassed his administration, and he resigned the office in 1832. He never afterwards held a pastoral charge, but was frequently a leading member of the ecclesiastical assemblies, and continued to interest himself in the benevolent movements of the Church. In 1832 president Jackson, of whom he was a warm personal and political friend, appointed him one of a commission to remove the Cherokee and Chickasaw Indians beyond the Mississippi. This work also brought with it some unhappy complications, which hindered his subsequent usefulness. He was a powerful preacher, a public debater of unusual mental vigor, acuteness,

tact, and argumentative ability. His restless brain was always teeming with great schemes, which often were Utopian in their results. In conversation he was entertaining and suggestive beyond most men. His sympathies were tender; and, when preaching or conversing on the great themes of the Gospel, he not only felt deeply, but possessed great power over the hearts and consciences of his hearers. He labored much and successfully in revivals of religion as a helper to his brethren. In person he was very large, robust, and commanding. He died in 1850 after a short illness. See *Memoir of Peter Labagh, D.D.*, by G. A. Todd, D.D., p. 52, 120, 161-163. (W. J. R. T.)

Schermerhorn, Richard E., a Methodist Episcopal minister, was born in Nassau, Rensselaer County, N. Y., experienced religion at the age of nineteen, was received on trial by the New York Conference in 1826, transferred in the same year to the Maine Conference, admitted into full connection in 1828, and successively appointed to the Scarborough and Gotham circuits, and Belfast, Hallowell, Bangor, Buxport, and Gardiner stations. In 1834-35 he was appointed to Augusta district, and also elected as delegate to the General Conference. He died April 18, 1836. He was a man well read, of uniform and deep piety, good preaching talents, and successful in the great object of the ministry. See *Minutes of Conferences*, ii, 409.

Scheuchzer, John James, a Swiss naturalist and physician, was born in 1672, at Zurich, where he was professor of mathematics and natural philosophy. He died in 1733. He was the author of several scientific works: *Natural History of the Bible*, in Latin and German (1732-37, 8 vols. fol.):—*Natural History of Switzerland* (1708, 3 vols.).

Schian, Johann Robert, a German Protestant divine, was born Oct. 31, 1828, in Loewen. In 1852 he completed his theological studies at Breslau, was appointed deacon at Liegnitz in 1858, and afterwards first deacon in the same place, where he died, Jan. 16, 1876. He was one of the most prominent ministers in Silesia; and, besides a number of sermons, he wrote, *Ratio quæ intercesserit inter Melancthonem et Lutherum explicatur et quid attribuerit ad Ecclesiam Evangelicam constituentem exponitur* (Göttinge, 1855). See Zuchold, *Bibliotheca Theol.* ii, 1137; *Theologisches Jahrbuch*, 1877, p. 228. (B. P.)

Schiavone, Andrea Medula (or Medola), an Italian painter and engraver, was born at Sebenico, in Dalmatia, in 1522. He was of obscure parentage, and went to Venice at an early age, where he gained a livelihood as a house-painter. In his leisure hours he studied the works of Giorgione and Titian. The latter artist, hearing of his poverty and seeing his ability, employed him, with Tintoretto and others, in ornamenting the grand hall of the library of San Marco. His designs were good, but the drawing so defective as to render him unable to compete successfully with his rival Tintoretto. It was only after his death that his works were appreciated. His life was miserable. He died in Venice in 1582. His principal works are, *The Eternal Father among the Angels*:—*John the Baptist in the Desert*:—*The Visit of the Virgin to Elizabeth*:—*The Death of Abel*:—and *The Assumption of the Virgin*. Etchings by him are found after his own compositions, and copies of Raphael and others.

Schickard, Wilhelm, a learned German Orientalist and distinguished astronomer, was born at Herrenberg, near Tübingen, April 22, 1592. When he had finished his theological course, he was for a while vicar in his native town, but in 1613 returned to Tübingen, and there gave lessons in Hebrew. In 1616 he was pastor at Nürtingen, continuing his studies in various languages. An acquaintance which sprang up between him and Kepler led to his turning his attention to mathematics, to which he afterwards gave much of his time.

To occupy his spare moments, he learned the art of engraving upon wood, and made use of this acquirement in constructing a celestial globe and astronomical charts. In 1618 he became professor of Hebrew at Tübingen, and added to his knowledge of languages by studying Syriac, Arabic, Chaldean, Turkish, and Persian, all without any teacher or instruction save what he gained himself. In 1628 he was made member of the College of Arts, and in 1629 was elected inspector of the schools at Stuttgart. He occupied in 1631 the chair of astronomy at Tübingen, without giving up his Hebrew professorship. After the battle of Tübingen he retired to Austria, but returned later only to meet the plague, which bereft him of nearly his entire family, and finally terminated his own life, Oct. 23, 1635. His writings are numerous, all relating either to Oriental languages or astronomy. His most valuable work is *Jus Regium Hebræorum*, or מלכות המלך, especially in the edition of Carpvov (Leips. 1674). See *Vita Schickardi*; Balth. Viassus, *Apotheosis Schickardi*; Fürst, *Bibliotheca Judaica*, iii, 270 sq.; Steinschneider, *Bibliographisches Handbuch*, p. 125 sq.; *Catalogus Librorum Hebr. in Bibl. Bodleiana*, p. 2565; R. Simon, *Hist. Critique*, p. 474; Diestel, *Gesch. des alten Testaments*, p. 322 sq., 334, 449, 501, 521; Hoefer, *Nouv. Biog. Générale*, s. v.

Schincke, JOHANN CHRISTIAN GOTTHILF, a German theologian, was born in 1782 at Querfurt, and died in 1839 as pastor of Wispitz, in Anhalt-Köthen. He wrote, *Metakritische Beobachtungen über die preuss. Agende* (Halle, 1824);—*Jesus Christus, ein Erbauungsbuch* (ibid. 1826);—*Evangelische Geschichten und Reden in frommen Dichtergaben* (ibid. 1826);—*Biblische Alterthumskunde in alphabetischer Folge* (Neustadt, 1837-40);—*Sammlung von auserlesenen Gebeten* (Halle, 1843). See *Regensburger Real-Encyklop.* s. v.; Zuchold, *Bibl. Theolog.* ii, 1140. (B. P.)

Schindler, VALENTIN, who died in 1604, is the author of the first polyglot lexicon, containing the Hebrew, Chaldean, Syriac, Talmudico-Rabbinic, and Arabic. It was first published at Hanau in 1612, and in a fourth edition in 1695. Besides, he also wrote, *Tractatus de Accentibus Hebr.* etc. (Wittenberg, 1596);—*Compendium Grammaticæ Hebraicæ* (ibid. 1602; 2d ed. 1613), and other linguistic treatises. See Fürst, *Bibliotheca Judaica*, iii, 274; Steinschneider, *Bibliographisches Handbuch*, p. 127; *Catalogus Librorum Hebr. in Bibl. Bodleiana*, p. 2566 sq.; Gesenius, *Geschichte der hebr. Sprache*, § 34; Diestel, *Gesch. des alten Testaments*, p. 447, 452. (B. P.)

Schinmeyer, JOHANN ADOLF, a Lutheran divine and doctor of divinity, was born in 1733 at Stettin. Having completed his studies, he was appointed in 1757 deacon at Itzehoe; in 1764 he was made archdeacon and professor of Oriental languages at Stettin; in 1774 he became pastor of the German congregation at Stockholm; and in 1778 he was appointed general superintendent at Greifswalde. In 1779 he was called for the same office to Lubeck, where he died May 3, 1796. Besides his *Lebensbeschreibungen der drei schwedischen Reformatoren, des Kanzlers Lor. Andersen, Olaf Petersen und Lor. Petersen* (Lubeck, 1783), he published *Versuch einer vollständigen Geschichte der schwedischen Bibelübersetzungen und Ausgaben, mit Anzeige und Beurtheilung ihres Werthes* (Flensburg, 1777), the best work on the earlier Swedish Bible versions. (B. P.)

Schinner, MATTHEW, a Romish bishop in Switzerland, and a cardinal just before the outbreak of the Reformation, was born in 1470. He studied at Zurich and Como, and became early noted for shrewdness and scholarship. In 1509 he was made bishop of Sion, and soon thereafter was called into diplomatic service by Leo X. In 1511 he received the cardinal's hat. He intrigued against the French in Italy, and was the agent for procuring an army of 20,000 Swiss by which, in 1512, the French were expelled from Lombardy. For this service the pope heaped titles and wealth upon Schinner, and

gave to the Swiss for all time to come the appellation *Defensores Ecclesiasticæ Libertatis*. Zwingli took part in the campaign, and depicted in bright colors the glory of the occasion. Schinner now made his headquarters as papal legate at Milan. Fresh dangers from France arising again, he hastened to England (1514), and endeavored, by his *Oratio Philippica ad excitandos contra Galliam Britannos*, to entangle Henry VIII in war with Francis I. On his return, he inspired the Swiss to resist the French at Marignano. When the Reformation began in Switzerland, this cardinal-statesman gave it at first a warm greeting. Zwingli met him at Einsiedeln and Zurich, and showed him from the Scriptures his reasons for rejecting the errors of popery, and the cardinal expressed himself as very desirous of co-operating in the work of renovation. When Luther's life was in danger in Germany, the cardinal joined with those who offered him safety and refuge. On reading Luther's works, he exclaimed, "Disputet Eccius quantum velit, Lutherus veritatem scribit!" But temporal interests held him fast to the old Church. He was even induced actively to oppose the new doctrines. His last few years were spent in Rome. He died soon after assisting in the election of Adrian VI, Oct. 2, 1522. See Herzog, *Real-Encyklop.* xx, 691-694; Hoefer, *Nouv. Biog. Générale*, s. v. (J. P. L.)

Schinos. See MASTIC.

Schirmer, MICHAEL, a Lutheran minister, was born at Leipsic in 1606. In 1636 he was called as master of the Grayfriars' Grammar-school at Berlin, where he died May 4, 1673. On account of his many troubles, he was called "the German Job." He is the author of some hymns, the most popular of which is his *O heil'ger Geist keh'r bei uns ein* (Engl. transl. in *Choral Book for England*, No. 70, "O Holy Spirit, enter in"). See Dietrich, *Berlinische Kloster- und Schul-Historie* (Berlin, 1752); Bachmann, *M. Schirmer nach seinem Leben u. Dichten* (ibid. 1859); Koch, *Gesch. des deutschen Kirchenliedes*, iii, 333 sq.; viii, 8, 92; Knapp, *Evangel. Liederschatz*, p. 1343. (B. P.)

Schism. See HERESY.

Schism Bill, an act passed in the reign of queen Anne rendering Nonconformist teachers of schools liable to three months' imprisonment. It was also laid down as imperative upon every schoolmaster that he should receive the sacrament of the Church of England, take the oaths, and teach only the Church catechism. If he should attend a conventicle, he was incapacitated and imprisoned. The queen, however, died on the very day that the act was to have received her signature, and consequently, though it had passed both houses, it fell to the ground.

Schism Overture, an overture which came before the Scottish General Assembly of 1766, and was produced by alarm at the rapid spread of secession. The overture affirms that a hundred and twenty meeting-houses had been erected, and raised the question, What shall be done to remedy so great an evil? also, whether a committee might not be appointed to correspond with presbyteries and gentlemen of property and influence, and report? The overture was rejected by a vote of 19 to 85. The argument turned chiefly on the law of patronage.

Schisms. Various great schisms are found in the history of the Church. There was the great schism which divided the Eastern and Western churches. In the Western Church there were early schisms—(1) *the schism of Hippolytus at Rome*, A.D. 220-235 [see CALIXTUS; HIPPOLYTUS]; (2) *the schism of Felicissimus at Carthage*, about A.D. 250, which was in reality an opposition to the episcopal authority of Cyprian under the lead of Novatus [see NOVATIANS]; (3) *the schism of Novatium, a presbyter at Rome*, A.D. 251. There was also the *schism of Meletius*. The Popish Church was rent by a great schism in the 14th century. Seventy

years did the popes reside at Avignon, and after this one party chose Urban VI and another party Clement VII. France held by the last and England by the first, and for the next half century the rival popes claimed each to be the infallible head of the Church.

Schlatter, MICHAEL, a Swiss missionary, was born at St. Gall, July 14, 1716. Educated at St. Gall, he became a clergyman, and in 1746 offered himself to the synods of North and South Holland as a missionary to the German Reformed emigrants in Pennsylvania. He was pastor of the Reformed churches of Philadelphia and Germantown from 1746 to 1751, and organized churches in Pennsylvania, New Jersey, Maryland, and Virginia. He effected the organization of the Synod of the German Reformed Church in America in Sept., 1747. He revisited Europe in 1751, and secured six other ministers for the United States. In 1757 he acted as chaplain to an expedition to Nova Scotia against the French, and, espousing the cause of the colonists when the Revolution broke out, was imprisoned in 1777. He died near Philadelphia in October, 1790.

Schlegel, Johann Adolf, a German preacher and poet, was born at Meissen Sept. 18, 1721. His early studies were carried on at Pforte, and in 1741 he entered the University of Leipzig, where he became acquainted with Gellert, Rabener, Gaestner, and many other writers of talent. In 1744 he edited, in concert with several friends, *Bremische Beiträge und Vermischte Schriften* (1744 and 1757), which aided in purifying the German literary taste. In 1751 he was professor in the school at Pforte, but in 1754 left to teach theology at Zerbst. There his sermons gained for him a fine reputation for eloquence. He became pastor at Hanover in 1759, and in 1780 was promoted to the office of ecclesiastical superintendent. He died at Hanover Sept. 16, 1793. His poems have not been very highly esteemed, though some of his chants are yet sung in the Protestant churches of Germany. Besides these, he wrote, *Sammlung einiger Predigten* (Leips. 1754-64):—*Predigten über die Leidensgeschichte Jesu Christi* (ibid. 1773-74, 3 vols. 8vo). His two sons, August Wilhelm and Karl Wilhelm Friedrich (q. v.), acquired great celebrity. See Schlichtegroll, *Nekrolog*.

Schlegel, Karl Wilhelm Friedrich von, a German author, was born in Hanover, March 10, 1772. He studied at Göttingen and Leipsic. In 1808 he, together with his wife, embraced the Roman Catholic religion, and went to Vienna, where he was appointed imperial secretary at the headquarters of the archduke Charles. He accompanied the duke to the battle-field, issuing patriotic proclamations against Napoleon. He was afterwards secretary of the Austrian embassy till 1818. The rest of his life he spent in lecturing in Vienna and Dresden. He was especially remarkable as a critic and thinker of great originality, and his principal works are, *Griechen und Römer* (1797):—*Geschichte der Poesie der Griechen und Römer* (1798):—*Ueber die Sprache und Weisheit der Inder* (1808):—*Vorlesungen über die neuere Geschichte* (1811):—*Philosophie des Lebens* (1828):—*Philosophie der Geschichte* (1829, 2 vols.):—and *Philosophie der Sprache* (1830).

Schleiermacher, FRIEDRICH DANIEL ERNST, was a theologian of the Reformed Church of Germany, who, standing on the border-line between the decline of rationalism and the birth of the new evangelical school of Germany, exerted an influence for good in all the higher fields of thought which has rarely been equalled by any mind in any age ("the greatest divine of the 19th century," says P. Schaff, *Credentials*, i, 451). He was born at Breslau, Nov. 21, 1768. His father was an humble army chaplain of Calvinistic faith, upright life, and rather cold and harsh temper. His mother (*née* Stubenrauch), a pastor's daughter, was sprightly, prudent, and pious. Young Schleiermacher's health was delicate. His education up to his fifteenth year was derived

chiefly from his parents. In 1783 he was sent to the school of the Moravian Brethren at Niesky. Here he made rapid strides in knowledge; but he also began to be troubled with religious doubts. At the age of seventeen he entered the higher school of the same brethren at Barby. Here he was brought face to face with a body of doctrine which, not being able to command his full assent, had the effect of forcing him to begin the construction of a system of his own. His first chief doubts related to the substitutional atonement of Christ and the eternity of future punishment. The attempts of his teachers to remove these doubts had no other effect than to sadden him, and to convince him that his religious life would have to be nurtured outside of Moravian circles. He was frank enough to open his heart and explain his doubts to his dry, traditional father. The father rudely answered him, "O foolish son, who has bewitched thee that thou obeyest not the truth and crucifiest the Saviour afresh?" Subsequent correspondence, however, brought the father into a more Christian frame of mind, and finally led each to esteem and respect the other in a far higher degree than before. With great difficulty having obtained his father's consent, he entered the University of Halle in the spring of 1787. While thus breaking his outward connection with the Moravians, he yet bore away with him from them a spirit of tender, subjective religiousness which ever after lingered like a heavenly aroma over everything which he printed or spoke. In Halle he lived with an uncle, and studied and heard lectures just as he pleased. He was not very methodical. He heard the aged rationalist Semler, devoured the works of Wolf, Kant, and Jacobi, became familiar with modern languages, and pursued mathematics. At this time he wrote: "I am not sure that I can construct the whole field of knowledge into such a system that I can readily assign to every question its place and its solution; but I am sure that the nearest approach to it will be made by a candid hearing of the reasons on both sides, and by not settling upon anything with positiveness until this has previously been done." These words of the youth truly express the spirit that led him throughout life. While not in every case attaining to definitive results, he yet incessantly worked towards that goal; and his one life-aim was to ascertain as nearly as practicable the limits of attainable human knowledge. Leaving Halle in 1790, he passed his theological examination in Berlin, and, on the recommendation of F. S. G. Sack, became private instructor in the pious family of the count Dohna-Schlobitten in East Prussia. Differing, ultimately, with the count on certain pedagogic principles, he returned to Berlin and taught, for a while, an orphan school (1793), then preached as vicar to pastor Schumann at Landsberg, on the Wartha (1794), and finally was made one of the two pastors at the Charité, the chief hospital in Berlin, a position which he filled until 1802. From 1796 onwards, his intellectual life took on a marvellous richness of flow and depth. Surrounded with such persons as Brinkmann, Scharnhorst, Alexander Dohna, Henrietta Herz, Dorothea Veit, he breathed the most stimulating atmosphere of the Prussian capital. In his scientific and philosophical studies he made vast acquisitions. By his intimacy with the younger Schlegel he was partially imbued with the spirit of the romantic school in art. From this influence the clearness of his moral consciousness was momentarily disturbed. Hence arose his *Letters* upon Schlegel's romance, *Lucinde* (*Vertraute Briefe*, 1801), which, though well-meant and full of moral earnestness, brought upon him no little odium. They can, at best, be called only a beautiful commentary to a bad text. Hence, also, sprang his romantic friendship with Leonore Grunow, the childless wife of a Berlin pastor, which was absolutely broken off only in 1805. Much satisfactory light is thrown upon this single shadow in his life by his letters to his sister Charlotte and to Henrietta Herz. These incidental matters did not interfere

with the steady maturing of his intellectual and theological systems. It was, perhaps, the richest development period (from his twenty-eighth to his thirty-second year) in his life. Hence it is to be explained that with so little previous literary experience (he had only helped Sack translate Blair's *Sermons*, and himself translated Fawcett's *Sermons* and contributed a few essays to periodicals) he was able at once to electrify the nation by such a master-work as his *Reden* (discourses on religion [1799]) and his *Monologen* (1800). Leaving behind him these earnest protests against the prevalent spirit of irreligion, he now repaired (1802) to the post of court preacher at Stolpe, in East Pomerania. Here he passed two laborious years, and wrought upon his German translation of Plato. Here appeared his first strictly philosophical work, *Kritik aller bisherigen Sittenlehren* (1803). In 1804 he was transferred to Halle and made professor extraordinary of theology. It was a trying change; his own system of theology was not yet matured in his mind; and nothing but the great practical wisdom and originality of a Schleiermacher would have succeeded under the circumstances. He began at once to lecture in a very original manner on New-Test. exegesis, dogmatics, and ethics. He also preached frequently, re-establishing the academic worship which had fallen into neglect. He was soon made professor in ordinary. Although he attracted general attention, yet he was not congenial to the members of the theological faculty. Only Niemeyer and Vater drew near to him; Knapp and Nösselt did not appreciate him. His lectures and sermons made strange and contradictory impressions. Was he an atheist, a Spinozist, or a super-orthodox pietist? Some thought the one; some the other. At this period he produced his *Weihnachtsfeier* (1806) and his commentary on *Timothy* (1807). The ravages of the French invasion interrupting now his labors at Halle, he returned to Berlin (autumn of 1807) and became pastor of Trinity Church (Dreifaltigkeitskirche). In 1808 he married the widow of his young friend, Von Willich. In 1810 he was made professor in ordinary of the new University of Berlin and a member of two scientific associations. Here the most influential half of his life begins. He was of the small circle of great men who called the new university into being and gave to it fame. Here he passed from a rhapsodical to a dogmatic theologian; from a proclaimer of religious philosophy to an expounder of the Word of God. It is not a revolution, however, but only a growth. Besides his scholastic labors, Schleiermacher took a lively part in the troubled politics of his country. In the darkest hours of Napoleonic oppression, he was unwearied in pulpit labors, counselling patience and inspiring with hope. He gave also much thought to the Church agitation which afterwards culminated in the "Union" of the Lutherans and the Reformed. The most important production of his first ten years in Berlin was his *Glaubenslehre*. From 1818 to 1822 he labored with De Wette and Lücke in editing the *Theologische Zeitschrift*, which, ignoring the vulgar difference between rationalism and supernaturalism, represented a more general and a higher form of religious and philosophical science. Though not one of the founders of the *Studien und Kritiken* (1828), yet his contributions to its earlier numbers helped to give it its high character. But it was to his actual work of teaching that the strength of his life was given. He lectured from two to three hours per day, except Saturdays. His intercourse with the other members of the university—with Fichte, Savigny, and Hegel, with Buttmann, Böckh, and Lachmann, with De Wette, Marheineke, and Neander—was deeply beneficial on both sides. The subjects which he taught were hermeneutics, ethics, dogmatics, dialectics, psychology, and philosophy, besides other incidental subjects. To his sermons he gave but a few moments on Saturdays, rarely throwing upon paper more than a few outlines. The majority of his published sermons arose from notes taken

down by his auditors and then revised by himself. In society Schleiermacher took great delight, though not always himself the greatest talker. Society did not weary, but recreate him. To the students he was by far not so familiar as Neander, but the time he gave to them left indelible impressions. In his domestic life he was peculiarly happy. Only the death of his sole son (1829) cast a shadow into his life from which he seemed never fully to recover. Still he fulfilled all his offices and was busy with his pen to the very last. His oft-expressed wish that he might die in the full possession of his consciousness was graciously granted to him. Early in February, 1834, he was attacked with inflammation of the lungs, which closed his life on the 12th. His dying hours were those of a resigned, joyous follower of Christ. His very last act and words were the administering of the eucharist to himself and his friends.

From these outlines of Schleiermacher's outward life we pass to a brief notice of his chief literary and theological productions, following in the main the article (forty-four pages) by Gass in Herzog's *Real-Encyklop.* xiii. He stood, as we have said, between the death and the birth of two ages. Combining the tendencies of the two—the rationalistic and the evangelical—in his own person, he helped to bury the one and to inaugurate the other. Yet he himself belonged to neither. He gave the death-blow to rationalism, cast away the rubbish, and laid the foundations of the new evangelical edifice; but he did not fully build it. His intellectual history is the history of the Christian consciousness of his epoch. It is a growth. It has a dawn, a crystallizing period, and a philosophic maturity. It can be traced distinctly in the thirty-one volumes of his collective works as edited by his friend Jonas and others, from 1834 to 1864.

His career was opened by his *Reden*, addresses to cultivated unbelievers (1800). This work made an epoch in the German nation. It called the cultivated circles away from their pride in a high-sounding philosophy and from their contempt of what they called religion. There is no incongruity, said the young prophet, between culture and religion. The culture that despises religion is but shallow presumption; the religion that despises culture is but a caricature. The foundations of religion are as deep as intuition and as broad as humanity. Each individual of the race is a vital member of the universe. By the universe he is sustained and furthered. In every life there come moments when this dependence on the universe is thrust upon the consciousness and made the very life of the soul. Such moments are as a conception, a birth, of the Eternal and Absolute within the limits of the finite and dependent. Religion is art, taste, a consciousness of the All. In becoming conscious of the Infinite we have the sentiment of our immortality. Religion is not mere dogmas and systems. It is the deepest and truest life of humanity itself. Men may sneer at religion, but they cannot get away from religion. Scorners turn from dry dogmatics to living nature. But what do they revere in nature? Not dead matter, not prosy, chemical elements, but rather nature's orderly march, its adaptation of means to ends. But this is, after all, the very essence of religion; it is a sympathy with the eternal basis of all being. Religion is thus universal. We can escape it only by putting out our reason. It is not from wholeness, but only from partialness, of vision that the cultivated turn aside from religion. The first three of the discourses treat, thus, of the nature of religion in general. The last two give a survey of religion in its historical reality. As the essence of religion is communion of feeling with the Absolute, the One, so its tendency is to organize man into communities and to express itself in organized worship. As there are infinite varieties of manifestation in nature, so the apprehension of the Infinite in the soul of man takes place under endless varieties. Hence the multiplicity of historical religions. But there are here points of greater

and of less approximation. Ancient Israel stood exceptionally close to the Infinite. In Jesus of Nazareth, the One, the Infinite reached its (or his) intensest manifestation. Such is the general drift of these celebrated *Reden*. They were accused of a tendency to pantheism, though Schleiermacher resented the imputation. They were certainly not positively Christian. But they tended towards Christianity, and they unquestionably produced a more fruitful effect on the specific audience which they addressed than if they had been of more confessionally orthodox form. This effect was sudden and immense. In his preface to the third edition (1821) Schleiermacher had occasion playfully to remark that there was then really a greater call for discourses to the over-righteous and the creed-worshippers among the cultivated than to unbelievers. The *Monologen*, with which Schleiermacher greeted the dawn of the 19th century, stand, as an *ethical* work, by the side of the *religious* tendency of the *Reden*. They are a self-scrutinizing and self-exhorting journey through the religious consciousness. Man should not be simply one of the monotonous members of the universe; but he should, by self-concentration and self-virtualization, develop himself into a rich and relatively independent individual. Means to this are reflection, meditation, retirement from too great absorption in dissipation, business, and external routine—in other words, the due consecrating of our secular life with the devotional element. As in the *Reden* an influence of Spinoza has been noticed, so in the *Monologen* some have found a trace of Fichte. These two works present their author in the first stadium of his development. The *Christmas Celebration* (*Weihnachtsfeier* [1806]) is a transition step towards positive theology. It is a charming dialogue, in the fashion of Plato, on the significance of the birth of Christ. The three speakers defend, each his peculiar view. Neither of them represents the author's exclusive views, but rather all of them in turn.

When we pass to Schleiermacher's critical treatment of the Bible, we meet with his least satisfactory works. And yet there was combined with his rather negative tendency very much which has enriched the results of exegetics. Ignoring the dogma of inspiration, he laid free hand upon the sacred book, just as upon the dialogues of Plato, or any other ancient documents. But he did not doubt the substantial genuineness of the Bible, and he was confident that critical science is capable of drawing the line between the essential and the non-essential. His posthumously edited lectures on introduction to the New-Test. hermeneutics and criticism have not fully answered all expectations.

In his outlines of theology (*Kurze Darstellung des theologischen Studiums*), which appeared first in 1810, and then, enriched with notes, in 1830, Schleiermacher assumes very positive dogmatic ground. He bases himself upon the objective fact of the Protestant Christian consciousness. Theology is a positive science, the elements of which are evolved from the Christian consciousness and from the exigencies of Church government. It is not a branch of philosophical science in general. With philosophy it must neither interfere nor be dominated by philosophy. Its truth is ascertained by historical criticism and by the comparative study of other religions. This forms the *philosophical* part. Its product is the *historical*, and out of the philosophical and historical parts results directly the *practical* part. This little work is of great originality, and has exerted wide influence. Its classification, however, has not been extensively followed.

The richest product of Schleiermacher's life is his dogmatics (*Der christliche Glaube nach den Grundsätzen der evangelischen Kirche*), which was first published in 1821 (2 vols.), then, in a much enriched and revised edition, in 1831. It is a monument of genius, and has been called the greatest theological product of the 19th century. Dogmatics is here presented, not as a speculative science, but as the systematized contents of the Prot-

estant Christian consciousness. The essence of this consciousness is defined, not as knowledge or action, but as *feeling*, and as a feeling differing from all others in being a direct consciousness of the absolute. More specifically, it is a *feeling of absolute dependence*. This feeling is for the first time clearly realized in Christian monotheism. The principal defect of this definition is that it makes no adequate room for creaturely freedom. A second definition is given of the specifically *Christian* consciousness. Thus, qualitatively it is a transition from the moral condition of unhappiness into that of happiness; historically, it is an effect of the life of Christ. The two elements must stand in perfect union. This union gives the limits within which the healthy Christian life must move, and beyond which lie the shoals of all error and heresy. Redemption is infringed upon by any view of human ability which overlooks the absolute *necessity* of redemption. Christ is infringed upon by any view which makes him either *too near* to or *too remote* from the ordinary conditions of human life. Accordingly, we find, in fact, two opposite christological and two anthropological heresies—the *Ebionite* and the *Docetic*, the *Pelagian* and the *Manichean*. From this starting-point, and within these limits, the dogmatic theologian has free movement. It is his privilege to seize the historical results of the past, to shape them into self-consistency, and to impress upon them in turn the historical coloring of the present. Thus the body of Christian doctrines is at no point definitively complete, but is in constant process of maturing. The dogmatics of Schleiermacher made an epoch in theology. It superseded old modes of defending Christianity, and inaugurated new and better ones. It did not begin with dry proofs of the existence of God; it found God already given in the Christian consciousness. It did not make Christ simply a part of the Christian system; it made him its beginning, its middle, and its end. In the distribution of the subject-matter of his work, Schleiermacher studies (1) man as conscious of God prior to the experience of the antithesis of sin and grace; next, after becoming conscious of such an antithesis, as (2) the subject of sin, and (3) as the subject of grace: or the states of innocence, sin, and grace. Each of these divisions is subdivided in a threefold manner, describing respectively the condition of man, the attributes of God, and the constitution of the world, as they relate to the three above-named states. Thus Schleiermacher's method departs from all previous methods. While the schoolmen begin with God and his attributes, and then pass to man; while the reformers usually begin with the rule of faith, the Bible, and then, passing to the Deity, proceed in the scholastic manner, Schleiermacher, on the contrary, begins and ends with the human consciousness and its contents. The development of this scheme showed clearly that the old form of rationalism was shallow and worthless. It emancipated religion from its entanglement with philosophical systems and placed it in the realm of feeling. It showed that spiritual insight—an awakened heart—is just as necessary to the appreciation of Christian theology as æsthetic insight is to the enjoyment of art. But with these healthful principles Schleiermacher associated consequences which were of damaging tendency. As he made the human intuitions the criterion of absolute appeal in art and morals, so he made the collective Christian consciousness the ultimate test of religious truth. The value of the apostolic testimony in Scripture arises, therefore, not from its being an absolute objective standard, but from its being the clearest existing expression of the Christian consciousness in the earliest and purest age. The Church existed before the New Testament. The New Testament appeals to the religious consciousness, but does not dictate to it. Inspiration is not mere genius: it is the outgoing of the religious consciousness; it is but a higher degree of what is common to the pious intuitions of saintly men in all ages. The Bible is a record of religious truth, not its

formal organ. It is a reflection of the Christian consciousness of the apostolic age, but not a mechanical criterion for all ages. By such views as these Schleiermacher made himself absolutely dependent upon the utterances of the religious consciousness. Hence he is unable fully to appreciate such points of doctrine as are not clearly given in this consciousness. Thus sin is understood rather as unholiness than as guilt before God; redemption rather as sanctification than as justification; Christ's death as a simple incident in his life of self-sacrifice; atonement as the setting-forth of the union of God with man; the mode of attaining to salvation as a spiritual realization of this union through the embracing of Christ in love (see Farrar, *Free Thought*, p. 245-247). The Holy Ghost is presented as simply the collective Spirit of the Church, as resulting from the union of human nature with the divine. With the exception of the doctrines of immortality, eternal life, and retribution, all the other opinions in regard to man's future are questions of mere hope and speculation. The doctrine of the Trinity is not a direct utterance of the religious consciousness, nor was it a separate article of the early Christian faith; hence it does not really possess the character of an independent dogma, which the Church afterwards gave to it. The Trinity is, in fact, not a designation of Deity, but rather of the revelation of Deity. Schleiermacher inclines to an improved Sabellianism. The scholastic idea of a tripersonal God is, in his view, an undogmatic philosopheme, while the simpler old Protestant conception is a logical self-contradiction (see *Theol. Zeitschrift*, pt. iii [transl. in *Bible Repos.* Andover, vol. v]). The reception which the public gave to Schleiermacher's dogmatics was very varying. Rationalism was displeased: the first volume was too speculative, the second too pietistic. Wegscheider regarded it as a pious representation of essential orthodoxy. The orthodox party warmly welcomed it, though without full approval. Braniss and Delbrück criticised it sharply. The latter declared it inconsistent with the foundations of Protestantism. But it speedily recovered from these shocks; and within a few years it numbered among its disciples such men as Twisten, Lücke, Nitzsch, Ullmann, Baumgarten-Crusius, Schwarz, and Gass. These men studied it, elucidated it, wrote upon it. It came to honor in nearly all the German universities. In some of them it was made the basis of special courses of lectures. But it speedily became evident that the body of disciples might be divided into three chief groups. Some held more to the negative, critical elements; others to the evangelically positive; others to the middle course of the master. Among the more positively evangelical of his disciples were Twisten, Nitzsch, Julius Müller, Hagenbach, Tholuck, Sack, Bleek, Usteri, Olshausen, Dörner, Erbkam, Martensen, Liebner, Lange, Eberard, Auberlen, Rothe, Schöberlein, Palmer, and a host of others.

In the field of *ethics* the influence of Schleiermacher was only less than in that of dogmatics; but he was not privileged to bring his thoughts to satisfactory completion and consistency. He began with a revolutionary and unhistorical criticism of previous systems in his *Kritik aller bisherigen Sittenlehren* in 1803. His personal views he began to elaborate in a series of essays in 1819. The substance of his lectures on ethics was edited by Schweizer (*Entwurf der Sittenlehre*) in 1835, also more briefly by Twisten (*Grundriss der philosophischen Ethik*) in 1841. His positively Christian ethics (*Die christliche Sitte*) was edited by Jonas in 1843. From these varied presentations it is difficult, if not impossible, to derive a single consistent view. The classification is artificial and unsatisfactory (see a severe criticism upon it in Wuttke's *Christian Ethics* [Engl. transl.], i, 361-371). The fruitfulness of Schleiermacher in this field was rather in furnishing impulses to other authors than as the creator of a finished system.

Next in importance stand his works on pedagogics (*Erziehungslehre*), edited by C. Platz in 1849, and his

Practical Theology (*Praktische Theologie*), edited by Friedrichs. Of less worth are his lectures on Church history (*Kirchengeschichte*), edited by Bonnel in 1840. For the light thrown upon his inner religious life, none of Schleiermacher's writings are more interesting than his sermons. There are thus far published ten volumes. Of these four were revised by the author, and six have been prepared by others, mostly by Dr. Sydow. These sermons are from every period of his life, and of every class. The larger number, however, are not textual or exegetical, but synthetic, the regular development of a theme. In contents they stand midway between the instructive and the hortatory. The great preacher placed himself on the same level as his audience, and, while enriching their conception of Christianity, endeavored to inspire them to a fuller realization of it in their lives. The uniform central point of his utterance was Christ, the Redeemer. Dr. Schaff (see *Creeds of Christendom*, i, 880) ascribes this intense love of Christ in Schleiermacher to his early Moravian education. He says, "It is a remarkable fact that the great German theologian Schleiermacher was cradled in the Moravian community, and conceived there his love for Christian union and personal devotion to Christ, which guided him through the labyrinth of speculation and scepticism, and triumphed on his death-bed. He shook almost every dogma of orthodoxy, and was willing, if necessary, to sacrifice all if he could only retain a perfect and sinless Saviour." He is inexhaustible in the variety and novelty of ways in which he impresses this vital point. This singleness of aim, however, does not imply monotony, but is consistent with very wide variety of matter. There is scarcely a single point in the circle of Christian doctrine which is not the theme of some of these sermons; hence they are often read from a merely dogmatic interest. They will long be esteemed among the richest fruits of the German pulpit.

Among the latest volumes edited from Schleiermacher's remains are his lectures on psychology (*Psychologie*), by George (1864) and his *Life of Jesus* (*Leben Jesu*), by Rutenik (1864). His correspondence with J. C. Gass was edited by W. Gass in 1852, and that with other friends appeared under the title *Aus Schleiermacher's Leben* (1858-62, 4 vols.). A brief autobiography, reaching only to 1794, was issued in Niedner's *Zeitschrift* in 1851.

For sources for Schleiermacher's life (besides his own writings and letters), see G. Bauer, *Karakteristik*, in *Stud. u. Krit.* 1859; Auberlen, *Ein Charakterbild* (Basle, 1859); Kosack, *Jugendleben* (Elberf. 1861); K. Schwarz (Gotha, 1861); E. Maier (1863); Baxmann (Bonn, 1864); Dilthey (1867); Schenkel (1868). On his doctrines, see Braniss, *Ueber Schleiermacher's Glaubenslehre* (Berl. 1822); F. Delbrück, *Erörterungen* (Bonn, 1827); C. Baur, *Primæ Rationalismi et Supranaturalismi Historiæ Capita Potiora* (1827); Baumgarten-Crusius, *Schleiermacher's Denkart u. Verdienst* (1834); Lücke, *Erinnerungen*, in *Stud. u. Krit.* 1834; H. Schmid, *Ueber Schleiermacher's Glaubenslehre* (Leips. 1835); Rosenkranz, *Kritik* (1836); Baur, *Die christliche Gnosis* (Tübingen, 1835); Weissenborn, *Darstellung u. Kritik der Glaubenslehre* (1849); Schaller, *Vorlesungen über Schleiermacher* (Halle, 1844). On his ethics, see Twisten's preface to his edition of Schleiermacher's *Phil. Ethik*; Vorländer, *Schleiermacher's Sittenlehre* (1851); Herzog, in *Stud. u. Krit.* 1848; Reuter, in *Stud. u. Krit.* 1844. On his sermons, see *Stud. u. Krit.* 1831, 1848. See also Schürer, *Religionsbegriff* (Leips. 1848); P. Schmidt, *Spinoza u. Schleiermacher* (Berl. 1868); also *Opuscles*, by Carl Beck (Reutlingen, 1869); F. Zachler (Breslau, 1869); W. Bender (Worms, 1868); P. Leo (Jena, 1868); Hossbach (Berl. 1868); also article in *Christ. Exam.* vol. liii; *Westm. Rev.* July, 1861; *Meth. Quar. Rev.* April, 1869; *Brit. and For. Evang. Rev.* April, 1862; July, 1866; Oct. 1876; *Princeton Rev.* April, 1866; *Universalist Rev.* April, 1869; *Mercersb. Rev.* April, 1871; *Fresh Quar. Rev.* Oct. 1868. (J. P. L.)

Schleusner, JOHN FREDERIC, D.D., professor of theology in Wittenberg, was born in Leipsic Jan. 16, 1756, and studied theology and philology in the university of that city. He was appointed professor of theology in Göttingen in 1784, and in 1795 professor of theology and provost of the college church in Wittenberg. He devoted himself principally to the lexicography of the Greek Scriptures. After the removal of the University of Wittenberg, he was associate director of the theological seminary. He died Feb. 21, 1831. Among his principal works are, *Lexicon Græco-Lat. in Novum Testamentum* (Leips. 1792; last ed. 1819, 2 vols.);—*Thesaurus, sive Lexicon in LXX* (Leips. 1821, 5 vols.), reprinted in Glasgow (2 vols.) and London (3 vols.). The lexicon on the New Test. has been superseded by later works, but that on the Sept. has yet found no substitute.

Schlurick, FRIEDRICH JULIUS HERMANN, doctor of theology and member of the Evangelical Lutheran Consistory in Dresden, was born at Dresden in 1815. From 1838 to 1841 he was professor at the Kreuzschule of his native place; from 1841 to 1851 he labored in Meissen; and from 1851 he was superintendent in Pirna, where he died, June 3, 1875. See Zuchold, *Bibliotheca Theol.* ii, 1148; *Theolog. Jahrbuch*, 1876, p. 365. (B. P.)

Schmalkald, LEAGUE OF, the name given to the defensive alliance concluded provisionally for nine years at Schmalkalden, Feb. 27, 1531, between nine Protestant princes and eleven imperial cities, with whom five other princes and ten imperial cities subsequently made common cause; and the elector of Saxony and the landgrave of Hesse were appointed chiefs of the league and empowered to manage its affairs. The object of this formidable alliance—which included the whole of Northern Germany, Denmark, Saxony, and Württemberg, and portions of Bavaria and Switzerland—was for the common defence of the religion and political freedom of the Protestants against the emperor Charles V and the Catholic states. The league was not rendered superfluous by the religious peace of Nuremberg in 1532; and on the rumor that the emperor was meditating new hostile measures against the Protestants, another meeting of the confederates was held Dec. 24, 1535, which resolved to raise a permanent army of 10,000 foot and 2000 cavalry, and to prolong the league for ten years. The confederation was further consolidated by articles of guarantee which were drawn up by Luther at Wittenberg in 1536, and, being subscribed by the theologians present at the meeting of the league at Schmalkalden in February, 1537, were called the *Articles of Schmalkald*. Against the league the emperor, engaged as he was at the time in contests with the Turks and French, found himself unable to contend, though supported by the Holy League, a Catholic confederation formed (in 1538) in opposition to the Protestant one. But impolitic management, mutual jealousies, and conflicting petty interests dissipated their energies and prevented united action. The "War of Schmalkald" commenced by the advance of the army of the league, under Sebastian Schärtlin, into Swabia, to bar the approach of the imperial army from Italy. Schärtlin forced his way to the banks of the Danube, but the miserable jealousy of the Saxon princes paralyzed his action. The emperor, by a proclamation bearing date July 20, 1546, put the two chiefs of the league under the ban of the empire; Maurice, duke of Saxony, took possession of the electorate by virtue of an imperial decree; and the Protestant army was forced to retreat. The elector of Saxony reconquered his electorate in the autumn of 1546; but meantime the imperial army subdued the northern members of the League of Schmalkald, and advanced into Franconia to meet the combined armies of Saxony and Hesse. The latter were totally routed at Mühlberg (April 24, 1547), and both chiefs fell into the emperor's hands. This defeat, which has been ascribed to treason, and was, perhaps, as much owing to this cause as to weakness, finished the war.

The object of the league—the guarantee of the liberty of religion to the Protestants—was subsequently effected by Maurice, now elector of Saxony, who, by a brilliant feat of diplomacy and generalship, compelled the emperor to grant the treaty of Passau (July 31, 1552), by which this freedom was secured.

Schmaltz, MORITZ FERDINAND, doctor of theology, born in 1785 at Stolpen, near Dresden, was first pastor in Wehlen. In 1816 he was called as evangelical minister and member of consistory to Vienna, where he remained till 1819, when he was called to the pastorate in Neustadt, Dresden, which position he occupied until 1833, when he was called to become the head pastor of St. Jacobi in Hamburg, where he died, Feb. 15, 1860. Schmaltz published a great many sermons, which make a library in themselves. See Zuchold, *Bibl. Theolog.* ii, 1149 sq.; Winer, *Handbuch der theol. Literatur*, i, 75; Hagenbach, *Hist. of Doctrines*, ii, 210, 212. (B. P.)

Schmalzgruber, FRANZ, a Jesuit, was born in 1663 at Griesbach. He first lectured on logic and moral theology at Ingolstadt, then on canon-law, and died in 1735. He wrote *Index Ecclesiasticus* (Ingolst. 1712):—*Judicium Ecclesiasticum* (ibid. 1712):—*Clerus Sæcularis et Regularis* (ibid. 1714, 2 vols.):—*Sponsalia et Matrimonium* (ibid. 1716):—*Crimen Fori Ecclesiasticum* (ibid. 1718, 2 vols.):—*Jus Ecclesiasticum Universum* (ibid. 1719, 6 vols.); Rome, 1833–45, 12 vols.):—*Consilia seu Responsa Juris* (Ingolst. 1722, 2 vols.). See *Regensburger Real-Encyclop.* s. v. (B. P.)

Schmeidler, JOHANN C. HERMANN, a Protestant divine, was born at Breslau, Aug. 28, 1807, where he also died Aug. 16, 1867, after having occupied some of the most important ecclesiastical positions in his native place. He wrote, *Der Untergang des Reiches Judæi* (Breslau, 1831):—*Urkundliche Beiträge zur Geschichte der Haupt-Pfarrkirche St. Maria Magdalena zu Breslau vor der Reformation* (ibid. 1838):—*Urkundliche Geschichte der evang. Haupt- u. Pfarrkirche zu St. Bernhardin in Breslau*, etc. (ibid. 1853). See Zuchold, *Bibl. Theolog.* ii, 1152; Winer, *Handbuch der theol. Literatur*, i, 75. (B. P.)

Schmid, Christian Friedrich, a professor of theology at Tübingen, was born at Bickelsberg, 1794. Educated at Maulbronn and Tübingen, he began to lecture at the latter place in 1819. In 1826 he became professor in ordinary, and labored as such till his death, in 1852. Not prolific as an author, he has yet exerted a very great and evangelical influence on the clergy of Württemberg. A supernaturalist from the start, he worked fruitfully by the side of the more negative Baur, defending vigorously the fundamentals of Christianity, and utilizing the better results of modern Christian speculation. Men like Dorner and Oehler have given public expression to their indebtedness to Schmid. His labors embraced practical, exegetical, and moral theology. His lectures were models of systematic Christian thought. He was not, however, simply a scientific theologian, but his influence was also deeply and positively Christian. His *Biblische Theologie des neuen Test.* appeared in 1853 (4th ed. by Dr. A. Heller, Gotha, 1868); it has enjoyed a wide popularity. His *Christliche Moral*, by the same editor, was published in 1861. See *Erinnerung an C. F. Schmid*, by Palmer and others (Tübingen, 1852); *Stud. u. Krit.* 1856; Wuttke, *Christian Ethics*, i, 374; Hauck, *Jahresbericht*, 1869; Herzog, *Real-Encyclop.* xiii, 604–606. (J. P. L.)

Schmid, Konrad, a coadjutor of Zwingli in the reformation of Switzerland, born in 1476; died (with Zwingli, on the battle-field of Cappel) October, 1531. After studying at Basle, he entered a monastery at Kussnacht, and in 1519 became its commander. This same year Zwingli came as preacher to Zurich, and with him Schmid entered at once into close intimacy. In 1522 he threw aside Latin and preached at Zurich a

stirring sermon in "good German," in which he opposed the excessive claims of the pope and the abuses of image-worship. In a religious conference at Zurich, October, 1523, he acted as *mediator* between the violent iconoclasts and the conservatives. "Let the weak have the images," said he, "as a sort of staff to lean upon until they have taken hold upon Christ; when they once have done this, they will let go the staff as being no longer needful." Also he blamed the coarse manner in which some spoke of the mass, as if it were a mere invention of the devil. At the close of his discourse on this occasion, he recommended to the civil authorities great moderation, and urged them to provide a thorough religious education of the masses. When Zwingli attended the conference with Luther at Marburg (Oct. 1529), Schmid filled his place as preacher in the cathedral of Zurich. He was an able and holy priest of God. See Bullinger, *Reformationsgeschichte*; Herzog, *Real-Encyklop.* s. v. (J. P. L.)

Schmid, Sebastian, D.D., a native of Alsatia, was born Jan. 6, 1617, at Lamperheim, and died Jan. 9, 1696, at Strasburg, where he was professor of theology and canonics. He was a voluminous writer. His principal Biblical works were his translation of the Bible: *Biblia Sacra V. T. et N. ex Linguis Original. in Ling. Lat. translata* (Strasb. 1696, 1708; New Test. 1715):—and his commentaries: *On Genesis* (Strasb. 1697):—*Judges* (ibid. 1684, 1691, 1706):—*Ruth* (ibid. 1696):—*Kings* (ibid. 1687):—*Job* (ibid. 1670, and often):—*Coheloth* (ibid. 1704):—*Isaiah* (Hamb. 1702):—*Jeremiah* (Strasb. 1685; Frankf. 1697, 1706):—*Minor Prophets* (Leips. 1685, 1687, 1698):—*Hosea* (Frankf. 1687):—*Romans, Galatians, and Colossians*, etc. (Hamb. 1704):—*Ephesians* (Strasb. 1684, 1699):—*Hebrews* (ibid. 1680; Leips. 1693, 1722):—1 *John* (Frankf. and Leips. 1687, 1707, 1726). Some of these were posthumous publications; they are all much valued for sound and learned exegesis.

Schmidt, Erasmus, a German scholar, was born in Delitzsch, April 27, 1560. He became professor of Greek and mathematics at Wittenberg, and died in that city Sept. 22, 1637. His chief work is *Concordantie Novi Test.* (Vitemb. 1638, fol.). It was republished in Glasgow (2 vols. 8vo) and in London (1830, 48mo). He also published a highly improved edition of Beza's version of the New Test.

Schmidt, Johann Eusebius, a Lutheran minister, was born in 1669 at Hohenfeld, in Thuringia. A friend and pupil of A. H. Franke, he lived from 1697 as pastor in Siebleben, near Gotha, until his death, in 1745. Schmidt was a fine hymn-writer, and some of his hymns belong to the best of German hymnology, as *Es ist vollbracht, so ruft am Kreuze* (transl. into Engl. by Mills in his *Horæ Germanicæ*, No. 161, "Tis finished! thus in tortures dying"):—*Fahre fort, fahre fort* (Engl. transl. in *Monthly Rel. Mag.* 1866, xxxv, 363, "Onward go, onward go"). See Koch, *Geschichte des deutschen Kirchenliedes*, iv. 402 sq.; viii, 141; Knapp, *Evangel. Liederschatz*, p. 1343. (B. P.)

Schmolck, BENJAMIN, a gifted German hymnologist, was born in Liegnitz, 1672. He studied theology at Leipsic from 1693 to 1697, became assistant pastor to his father at Liegnitz in 1701, but the next year accepted a call to Schweidnitz as dean. Here he spent the rest of his life as a laborious pastor, exerting himself manfully to counteract the intrigues of the Jesuits and to preserve his people in their evangelical faith. In 1708 he was made archdean, in 1712 senior, and in 1714 pastor primarius. After a pastorate of thirty-five years, he entered into rest, 1737. By his hymns and songs, which appeared in various editions from 1704 and on, he has obtained an honorable place among the poets of his Church and nation. Their general tone is that of gentleness and simplicity, and of ardent love to Christ. Many of them, however, betray marks of carelessness in rhetoric and of lack of polish. A complete edition of his poems ap-

peared at Tübingen in 1740. A selection was published by L. Grote at Leipsic in 1860. For his life, see this work of Grote and Herzog, *Real-Encyklop.* xiii, 608, 609. (J. P. L.)

Schmucker, PETER, a minister of the Methodist Episcopal Church, was born in Michelstadt, grand-duchy of Hesse-Darmstadt, Aug. 24, 1784. His parents removed to this country while he was yet an infant, and settled in Virginia. He was converted in his eighteenth year, and entered the ministry of the Lutheran Church in 1814. We cannot specify the congregation he served, but his name is found in 1817 in the printed list of the members of the Evangelical Lutheran Synod of North Carolina; and in 1820 he was one of the delegates who met at Hagerstown, Md., to form the General Synod of the Evangelical Lutheran Church of the United States. Still later we find him recorded as a member of the Evangelical Lutheran Synod of Western Pennsylvania. In 1832 he joined the Methodist Church, and in 1838 entered the Ohio Conference to take charge of the German Mission in Cincinnati. In 1840 he was appointed to Louisville, Ky., and in 1842 sent to New Orleans to begin work among the Germans there. He continued to labor in different parts of the United States until 1848, when ill-health disabled him. From that time he suffered greatly, until relieved by death, Dec. 9, 1860. See *Minutes of Annual Conferences*, 1861, p. 165.

Schnappinger, BONIFACIUS M., a Roman Catholic divine, was born at Neuburg, in Bavaria, Oct. 5, 1762, was first lecturer of theology at Würzburg, then professor of exegesis at Heidelberg, and from 1807 professor of dogmatics at Freiburg. He died Dec. 6, 1832. He published the *New Test.* with annotations (Mannheim, 1807):—*Doctrina Dogmatum Eccles. Christ. Cath. ad usum Acad.* (Augsburg, 1818):—*Entwurf einer kathol.-christl. Religions- u. Dogmengeschichte zu akad. Vorlesungen* (Carlsruhe, 1807). See Winer, *Handbuch der theol. Literatur*, i, 175, 306, 593; ii, 761. (B. P.)

Schneckenburger, MATTHIAS, an eminent modern theologian, born Jan. 17, 1804; died June 13, 1848. He studied Latin at Tuttlingen, Württemberg. In 1819 he began the study of theology at Urach. In 1824 he entered upon more thorough studies at Tübingen. Here his teachers were Steudel, Schmidt, Baur, Haug, and others. Philosophical theology was his favorite study; and the book which delighted him most was Schleiermacher's *Glaubenslehre*. He reached his master's degree in his twentieth year, and held the highest place in a group of thirty-eight competitors. In 1826 he went to Berlin to continue his studies under Schleiermacher, Neander, Marheinecke, and Hegel. With Neander and Marheinecke he formed very close relations, as also with other eminent literary men, e. g. Chamisso and Gans. In 1827 he returned to Württemberg and began to lecture at Tübingen. Among his pupils were Strauss, Vischer, and Märklin. In 1831 he entered into the ministry as preacher at Herrenberg. Although a gifted speaker, he soon felt that not the pulpit, but the professor's chair was his place. In 1834 he accordingly entered the new theological faculty at Berne. By his side stood Hundeshagen, Lutz, and others. His field here was Church history, dogmatics, and exegesis; but it was especially in dogmatics that his greatest interest lay. Here his position was that healthy union of practice and theory which was so characteristic of Zwingli. When the Strauss commotion broke out in Germany (1839), Schneckenburger faced the whole series of questions which it called forth, and began a course of lectures on the influence of philosophy upon theology and on the collisions between modern speculation and Christianity. His position was that of a positive theist and an opponent of Hegel. Very fruitful among his labors in the following years were his studies in comparative dogmatics. His general tendency was unionistic. He did not confine himself to academic labors, but took also

an active part in the Church affairs of the canton of Berne.

In character Schneckenburger was as simple and unassuming as a child. His great defect was a deficiency of self-assertion. In his wedded life he was very unfortunate. His relation to his childless wife was very similar to that of Salmassius to his domineering "Juno." Seeking relief from his domestic unhappiness in a still greater devotion to study, his health soon broke down. He died at the early age of forty-four. It was characteristic of his wife that his valuable papers were for a number of years kept under lock and key. It was only after she had fled from justice to America that they came into the hands of his colleague, Hundeshagen. Among Schneckenburger's writings are the following: *Ueber Glauben, Tradition und Kirche* (Stuttg. 1827); *Ueber das Alter der jüdischen Proselytentaufe* (Berlin, 1828); *Annotatio ad Epistolam Jacobi* (Stuttg. 1832); *Einleitung ins Neue Test.* (ibid. 1832); *Ueber das Evangelium der Aegypter* (Berne, 1834); *Ueber den Begriff der Bildung* (ibid. 1838); *Stapferi, Theologi Bernensis, Christologia* (ibid. 1842); *De Falsi Neronis Fama* (ibid. 1846); *Zur kirchlichen Christologie* (Pforzheim, 1848); *Vergleichende Darstellung des lutherischen und reformirten Lehrbegriffs* (edited by Güder, Stuttg. 1855, 2 pts.). Also numerous contributions to the *Tübinger Zeitschrift*, the *Studien und Kritiken*, the *Theologische Jahrbücher*, and others. See Herzog, *Real-Encyklop.*; *Gedächtnissrede* von Dr. Gelpke (Berne, 1848). (J. P. L.)

Schneider, Benjamin, DD., a missionary of the American Board of the Congregational Church, was born in New Hanover, Pa., Jan. 18, 1807. He joined the Church in Norristown in 1826, and soon after entered Hamilton College, in N. Y. Having remained awhile here, he went to Amherst, where he graduated in 1830. From Amherst he went directly to Andover, and entered the seminary, where the question of becoming a foreign missionary soon took possession of his mind. In June, 1832, he says, "Blessed be God for the prospect I have of consecrating myself to the good work of missions." With this thought uppermost, he pursued his studies. After graduating in 1833, he was married to Miss Abbott. He was ordained in 1833, and Dec. 12 of the same year he sailed from Boston for Smyrna. From 1834 to 1849 he was stationed at Broosa, the ancient capital of the Turkish empire, about ninety miles south of Constantinople. Though a region rich and grand in natural scenery, it was hard to cultivate. The principle of toleration had not been established in the empire, and the missionary was subjected to endless annoyances and persecutions. His chief labors were with the Greek population, and they were far less susceptible to Gospel influences than the Armenians. In 1849 he was called to take up his abode at Aintab, where he had labored for a time previously, and where a wonderful work had begun among the Armenians. Here Dr. Schneider labored until 1868, a period of nineteen years, and his labors were crowned with abundant success. He instructed the candidates for the ministry, and many of the native preachers in Central Turkey received their theological training at his hands. Though he had many things to occupy his attention in laying the foundations, his chief delight was in telling the simple story of the cross to the listening multitudes. Gentle and winning in his manners as he was scholarly, he attracted thousands by his fluency and fervor. Dr. Schaufli, another veteran missionary, in speaking of him, said, "Always when I can, I go to hear Dr. Schneider." The pulpit was his throne, the place of his power. In 1868 it was thought advisable that he should return to Broosa and resume his labors there; and a few years later he seemed to be pointed out by Providence, on account of his scholarly attainments and fitness, as the person to be put in charge of the theological seminary at Marsovan. While laboring here, such was his incessant toil that his health gave way. He was a man of eminent gifts and qualifications, an exact scholar, especially as a linguist. He

IX.—D D

mastered with ease all the foreign tongues he was called to use, and spoke with remarkable ease and fluency. His whole heart was in his work, because he loved it. Thus he lived and died. "His record is in heaven, and his testimony on high." He died in Boston Sept. 14, 1877. (W. P. S.)

Schneider, Johann Jacob, was born Feb. 8, 1797, at Basle, where he also pursued his theological studies. In 1819 he was called to Grenzach, in Baden, and since that time he supplied the pulpit in different places until, in 1859, he was called to Betberg, where he intended to remain. Bodily infirmities came over him and ended his life March 24, 1859. Besides a number of hymns which he composed, he published *Die christlichen Sängers des 19. Jahrhunderts* (Basle, 1847). See *Zum Andenken an J. J. Schneider, Pfarrer zu Betberg* (Basle, 1859); Koch, *Geschichte des deutschen Kirchenliedes*, vii, 367 sq.; Knapp, *Evangel. Liederschutz*, p. 1344; Zuchold, *Bibliotheca Theolog.* ii, 1167. (B. P.)

Schnepf, ERHARD, an assistant in the Lutheran Reformation, born of a noble family at Heilbronn, November, 1498. He studied first at Erfurt, then at Heidelberg. As soon as Luther appeared, Schnepf welcomed his teachings. He preached first at Weinsberg, then (1523) at Wimpfen, where he married. In 1525 he was called by Philip III of Nassau to introduce the reformation at Weilburg. Here his familiarity with Scripture enabled him to triumph in a disputation over Dr. Tervich, of Treves. In 1528 Philip made him a professor in his new university of Marburg, whence he exerted a reformatory influence into Westphalia. He accompanied his patron to the diet of Spire in 1529, and to Augsburg in 1530. In 1534, at the request of duke Ulrich of Württemberg, he united with Blaurer in the reformation of this country. His seat of operation was Stuttgart, while that of Blaurer was Tübingen. In 1544 he accepted a professorship in Tübingen, and represented the more rigid views of Luther in a Zwinglian community. Schnepf refused to accept the *interim*, and in 1548 gave up his position and fled to Heilbronn. At the suggestion of Johann Friedrich of Weimar, he became professor of Hebrew at Jena in 1549, and soon had more than sixty students. Here he became, alongside of Amsdorf and Strigel, one of the most eminent theologians in that region. Up to 1555 he had lived in peace with the synergistic Melancthonians at Wittenberg; but now he became involved in the rigid Lutheran party of Flacius, and he assumed a milder position only at the instance of the duke Johann Friedrich. In the midst of labors abundant, he died at Jena, November, 1558. See Jo. Rosse, *De Vita Schnepfi* (Leips. 1562); Heyd, Blaurer, and Schnepf, in the *Tüb. Zeitschrift*, 1838; Herzog, *Real-Encyklop.* xii, 618–620; Hagenbach, *Hist. of Doctrines*, ii, 314. (J. P. L.)

Schnurrer, CHRISTIAN FRIEDRICH, an eminent Orientalist, professor and preacher at Tübingen, was born at Cannstadt Oct. 28, 1742. He studied at Tübingen, Göttingen, Jena, and Leipsic. Among his teachers were Michaelis, Ernesti, Dathe, Semler, Teller, and Gellert. He visited England and France to extend his familiarity with Oriental MSS. On his return in 1770 he became professor at Tübingen, and began the exegesis of the Old Test. But when, in 1772, he was placed at the head of the theological training-school, he was in the place for which his talents and learning best fitted him. Here he labored with great success for thirty-two years. In 1806 he was made a prelate and brought into close connection with the government. He died at Stuttgart Nov. 10, 1822. Among the many writings of Schnurrer are, *Bibliotheca Arabica* (1799–1806, 7 parts): *Academic Addresses* (in Latin [Tüb. 1828]); *Erläuterungen* (historical [Tüb. 1798]). See Weber, *Schnurrer's Leben* (1823); Herzog, *Real-Encyklop.* xx, 714–718. (J. P. L.)

Schock, CHARLES, a minister of the Methodist Episcopal Church, was born in Stuttgart, Germany,

July 1, 1812, and emigrated to Philadelphia, Pa., 1829. Removing to Wilmington, Del., he there united with the Methodist Episcopal Church. He joined the Philadelphia Conference in 1838. He became supernumerary in 1855, and so remained until his death, which occurred in Philadelphia, March 24, 1872. See *Minutes of Annual Conferences*, 1873, p. 18.

Scholastic Philosophy. See SCHOLASTICISM.

Scholastic Theology, a term used to designate that peculiar phase of theological development which lies between the patristic age and the age of the Reformation. The apostolic age had founded Christianity as a regenerative principle in human society; the patristic age had crystallized the teachings of Christianity as ecclesiastically sanctioned dogmas. The scholastic age now developed and defended and harmonized the dogmas which already were authoritatively accepted and taught by the Church.

The patristic age died away at about the close of the 6th century. The age from the 6th to the 11th century is a period of transition from the patristic to the scholastic age. The scholastic age proper extends from the age of Anselm (died 1109) to the outbreak of the Reformation. In the scholastic age we may readily distinguish three phases—the period of inception and youth; the period of greatest strength and glory; and the period of decline and dissolution.

On the threshold of scholastic theology stands unquestionably the celebrated archbishop of Canterbury, Anselm. He was the first to recognise distinctly the central principle of scholastic theology and to reduce it to mastery application. This principle is the unquestioning acceptance of the traditionally and officially sanctioned body of orthodox doctrine, and the earnest defence of the same by all the resources of logic and reason. The scholastic theologians were therefore not *patres*, generators, of dogmas, but only *doctores*, teachers and defenders; and they were not *doctores* in general, but only *doctores ecclesie*. They taught not merely in the Church, but for the Church and in defence of the Church. Their central task was to conciliate, or at least to cast a bridge over the gulf which lies between, faith and knowledge. The instrument which they chiefly used was formal logic—syllogistic argumentation. Anselm plainly sets before himself a twofold task—to safeguard theology from the charge of inculcating an absolutely blind and irrational faith, and to prove the presumption of a too haughty and self-confiding reason. The first error—the too servilely traditionalistic tendency—had characterized the period since the decline of the patristic age. The second error was represented by some of the early scholastic philosophers, such as Roscelin. But in his attempt to find a system midway between these extremes, Anselm does not himself escape unconsciously vibrating, at times, into one and then into the other. At one time he makes knowledge positively dependent upon faith; at another he goes so far as to assume that reason can of itself demonstrate the absolute necessity of each and every dogma of the whole faith of the Church. In this he unconsciously accepts the very essence of rationalism; and yet nothing is further from his main tendency than an excessive reliance upon mere reason. On the contrary, he is so thoroughly in bondage to the merely formal dogmas of orthodoxy that he is unable to reach any independent appreciation of either the simple word of Scripture or the direct intuitions of the moral consciousness. As a general result his writings are characterized largely by an unsatisfactory logical formalism. Philosophically, Anselm is a Platonic realist.

The same antithesis between faith and knowledge which occupied Anselm's attention reappears after his time. But while with Anselm the traditional, philosophical, and ethical elements were held in comparative equipoise, with some of his successors the centre of gravity was seriously lost. This is particularly the case with

Bernard of Clairvaux and Abelard. Of the two, Bernard (died 1153) was by far the more churchly-minded. He looked upon the speculations of Abelard as daring innovations; he was a man of faith rather than of science; he bowed with awe before the body of Christian dogmas as held by the historical Church; and yet he was not a mere unthinking traditionalist. But he endeavored to appropriate the traditional system with a vital and intelligent faith. His spirit, however, is of a mystical rather than of a philosophical cast. The intellect cannot take by storm the mysteries of salvation; it is only by means of ecstatic contemplation that distant glimpses of their meaning can be obtained. What the soul sees in its mystic soarings are true fore-sights of what will lie open before us in our state of eternal bliss. This position of Bernard led him into violent personal opposition to his great contemporary Abelard.

Abelard (died 1142) had devoted himself at first to dialectics, i. e. philosophy, and had adhered primarily to the nominalists and subsequently to the realists; and those opposite standpoints are frequently clearly recognisable in his writings. Indeed, it is probable that Abelard himself never came to a clear decision between the two systems. His general position, however, seems to have been that which held the *universalia in re*, and which is best designated by the term conceptualism. On devoting himself to theology, Abelard subjected the whole series of dogmas to a vigorous philosophical treatment, endeavoring to commend them to the understanding by a clear presentation of their harmony with reason. He seriously complains of a failure to do this on the part of his predecessors, and insists that the exacting of faith in doctrines before the reasonableness of the doctrines has been explained can only lead to credulity and superstition. Such a course also deprives the Christian subject of the means of convincing the doubter and of refuting the opponent. Moreover, it rests upon an unwise rejecting of the benefits of worldly science growing out of an ungrounded fear of its misuse. But Abelard is not a thorough rationalist; he does not make intellectual processes the generator of faith. He holds simply that philosophical arguments may facilitate the acceptance of Christian doctrine, while the final producer of converting faith is the influence of the Holy Spirit. He further holds that no true and full knowledge can arise without the help of personal faith. Nevertheless, it is the plain duty of the believer to strive after a scientific comprehension of that which the Church presents as a system of formal doctrine. But Abelard differs from Anselm in this—that while Anselm assumes at once the absolute truth of the official system of orthodox doctrines, and tests all philosophy by the touchstone of formal dogmas, Abelard, on the contrary, regards the official doctrines as simply a human development of what exists in germ in the Holy Scriptures, while these Scriptures themselves, together with the primitive creeds, are the real source and norm of all Christian truth. In his work *Sic et Non*, Abelard presents a series of contradictory authorities on the several dogmas with this express purpose—to show that the Church fathers are to be read, not *cum credendi necessitate*, sed *cum judicandi libertate*. He even gave much offence by insisting that the Bible itself is not to be fully appreciated without a discriminating exercise of the understanding. His general tendency was to embrace the natural and the supernatural in a single view, and to establish a bond of unity between all systems of religious faith. His standpoint was that of a formal supernaturalism with a noticeable tendency to material rationalism. The polemical conflicts in which his life was involved prevented him from coming to any very clear self-consistency of system. They also led him, in some cases, to aim rather at a momentary dialectical triumph than at a solid development of Christian truth.

The sharp antitheses of tendency between the mysti-

cism of Bernard and the dialectics of Abelard led to mediatory efforts. Prominent here is the school of the St. Victor. Hugo St. Victor (died cir. 1140) held to the Anselmic position that Scripture and tradition are the objective, and faith the subjective, norm of theological science; but he deviates from Anselm in making a broad distinction between *alia ex ratione*, *alia secundum rationem*, *alia supra rationem*, and *alia contra rationem*, i. e. between *necessaria*, *probabilia*, *mirabilia*, and *incredibilia*. What falls under the first and the fourth head is not an object of faith, but only what falls under the second and third. Under the second head fall the so-called doctrines of natural religion. Here faith is helped by reason (*ratio adjuvatur*), as also reason is perfected by faith (*ratio fide perficitur*). Under the third head fall the specifically Christian doctrines of Scripture and tradition. Here *ratio* does not help faith, because the object is beyond its range, though it may offer grounds for revering the faith which grasps that which is above it. Thus Hugo St. Victor rejects the endeavor of Anselm to demonstrate the *rationalis necessitas* of the orthodox dogmas, and concedes only our philosophical ability to strengthen the *probabilitas* of the dicta of natural religion. And this is essentially the rôle which reason plays in all subsequent medieval theology. The motive of Hugo in thus restricting the rôle of reason was (1) to put a check to the subtle and fruitless freaks of dialectics, and (2) to assure room for full play for his own mystical system. His real position was this: inasmuch as scholastic dialectics is unable to attain to absolute truth, therefore there *must* be a process of immediate intuition whereby the absolute truth is directly laid hold upon with the certainty of actual vision. He further held that there are progressive degrees in which this truth is grasped, depending upon the progress of our subjective sanctification through personal communion with God. In carrying out his system Hugo is guilty of unconsciously transgressing the bounds he had set up for reason, for he subjects the official form of doctrine to no little free criticism; and he endeavors to make clear to reason the grounds of the revealed system of truth. This is simply what was to be expected; for Hugo was to some considerable degree a genius of really productive power. His mystical system as a whole had, however, more indirect than direct influence on his age; it served as a powerful check to the mad freaks of uncured dialectics. He has greater significance as the first systematizer of the whole body of Christian doctrine. In his *Summa Sententiarum* he treats successively of all the dogmas of the Church, sustaining them by citations from Scripture and from the fathers, adducing, then, the various objections of opponents, and finally deciding each case according to Scripture and tradition. His work *De Sacramentis*, though of more speculative power than the *Summa*, has been much less read. And though his *Summa* was subsequently largely displaced by the *Summa* of Peter Lombard, yet the work of Hugo exerted a very important influence upon later scholastics, particularly upon Lombard himself and upon Thomas Aquinas, but very especially upon theologians of a mystical tendency, such as Bonaventura and Gerson.

The contemplative or mystical element of Hugo is carried much further by his pupil Richard St. Victor (died 1173). According to Richard there are six kinds of contemplation. "We know, 1, by the imagination (the sensible impressions made by creation); 2, by reason (perception of law and order in creation); 3, *in* reason according to imagination (symbolical knowledge of nature as a mirror of the spiritual); 4, *in* reason and according to reason (the internal referred to the internal without a sensible image); 5, *above* and not *against* reason (rational knowledge carried to a higher stage by revelation); 6, *above* and (apparently) *against* reason (as, e. g., the mystery of the Trinity). In discussing the Trinity, Richard makes large use of the *trias* of *power*, *wisdom*, and *love*; but he lays greatest stress upon the

latter, to which he ascribes the generation of the Son. There is nothing more perfect than love. But love (*amor*), in order to be charity (*caritas*), must have for its object not itself, but something else. Hence in order to charity there must be a plurality of persons. But love towards creatures is not sufficient, for God can fully love only that which is worthy of the *highest* love. Hence the divine love must have a divine object (the Son). But even this is not the highest love, for love is essentially *social*. The two who love each other must desire that a third party be as fully loved by each as each loves the other; hence the Father and Son agree in loving a third (the Spirit). And since this love to the third party, in order to be perfect, must have a perfect object, hence this third party is equal to the other two. Each is equally divine, and there is no superiority of the one to the other (see Hagenbach, *Hist. of Doct.* i, 420, 467). Richard agreed with Hugo in regarding theology as the central science, and as the mother of all other sciences.

But the drift of the age was averse to the deep and rich speculations of the St. Victorians; it tended rather to concentrate all intellectual acumen upon the logical defence of the formal orthodoxy of the official Church. Hence it led mainly to the production of collections of dogmatic authorities (*summæ sententiarum*). The first real collector of such "sentences," *sententiaris*, was Hugo St. Victor, though the germs and forerunners of them are found as far back as in Vincent of Lerinum (died cir. 450), Gennadius of Marseilles (died cir. 493), and in Isidore of Seville; but it is only with Hugo that the process becomes of a really scientific character. The one motive of these real *sententiaris* is to bring dialectics into close service to orthodoxy. Thus they are not mere slavish compilers of the dicta of the fathers, on the one hand, nor rash speculators, on the other; but they hold the midway between them.

Among the earliest successors of Hugo was Robert Pulleyn, in his *Sententiarum Libri Octo*. He was archdeacon of Rochester, teacher in Paris and Oxford, and finally cardinal (died 1150). His chief polemical endeavor was to counteract the too daring speculations of Abelard; but Robert was far surpassed by the great *magister sententiarum*, Peter Lombard (died 1164). Of his *Sententiarum Libri Quattuor*, Hase says, "It was not so much on account of the ingenuity and depth displayed in the work as because of the position of the author in the Church, and his success in harmonizing antagonisms, as also because of the remarkable perspicuity of his work, that it became the manual of the 12th century and the model of the 13th." The chief themes of his work are the *Trinity*, *creation*, the *incarnation*, and the *sacraments*. As a whole, it is a synopsis of the whole movement of scholastic theology. "With it," says Baur, "really commences the systematization of scholasticism, the endless commenting upon the sentences of the masters." It initiated the movement of tiresome questioning and answering; of laying down theses and antitheses, arguments and counter-arguments; of dividing and splitting up the matter of doctrines *ad infinitum*. Lombard was very successful in keeping the mean way between the blind copyists of tradition (*scrutatores*) and the rash reasoners (*garruli ratiocinatores*). He uses reason in the modest rôle of removing the seeming contradictions in Scripture and tradition. These differences he states very frankly, somewhat in the manner of Abelard's *Sic et Non*, but with a much more intent endeavor to reconcile them. He purposely avoids all ambitious philosophizing, as this seemed to him to jeopardize the dignity and independence of theology. On the whole, therefore, the tendency of Lombard was towards the enslaving of speculation in the ruts of formal tradition. This influence was felt even by writers of much greater originality, and such as had entirely broken with the whole method of the *sententiaris*, as e. g. Thomas Aquinas.

Close upon the steps of Lombard followed the gifted

Peter of Poitiers; and from him on there follow a whole series of commentators upon Lombard, prominent among whom are Alexander Hales, Duns Scotus, and Occam.

But the way opened by Lombard was not docilely followed in by all. Alanus of Ryssel (died 1202), in his *Ars Cath. Fidei*, presents the successive doctrines of the Church as a series of logical steps, endeavoring to develop the one directly from the other. "Heretics and sceptics," says he, "cannot be won over by citations of authorities, therefore we must urge upon them rational arguments." But he wisely adds: "Hæ vero rationes si homines ad credendum inducant, non tamen ad fidem capessendam plene sufficient." In this his position is related to that of Anselm. Lombard was also opposed for his use of Aristotelian logic. Walter St. Victor accuses him of drawing his whole inspiration from this secular fountain (*uno spiritu Aristotelico afflatus*). So also Joachim of Floris. A still more prominent voice against the great current of scholastic theology was that of John of Salisbury. He accused it of fruitlessness, absurdity, and presumption. It sacrificed the essence for the form, the truth for logic; but his critical ability was not supplemented by an adequate productive power. Hence he was unable materially to check the general drift towards scholastic subtleties.

Scholastic theology reached its highest development in the 13th century. Many circumstances contributed to this, especially the more full access to the writings of Aristotle, which was occasioned by the fall of Constantinople (1204). These writings, falling into the hands of a number of well-trained men, served to give theology a much wider and richer scope than it had as yet taken. The whole series of fundamental questions was now elaborately examined afresh. Among the problems discussed were, the sources of our knowledge of theology; the nature and necessity of revelation in contrast with reason and philosophy; the relation of faith to knowledge; whether theology is a science proper; whether it is a theoretical or a practical science; what is its proper object (*materia de qua*) in its contrast with philosophy; wherein Christianity *per se* differs from other religions, etc. The form which theology now assumed was partly that of commentaries upon the sentences of Lombard, and partly that of more original production. It is distinguished, on the one hand, for the immense increase of matter treated of (ethical and dogmatical, metaphysical and physical), and, on the other, by the perfection of the scholastic method, according to which, on every successive point, the authorities and reasons are cited *pro et contra* and a *resolutio* or *conclusio* duly drawn. The whole is followed by a refutation in detail of all contrary views. Yet upon the basis of this uniformity there is manifested a large range of individual peculiarity. This sprang in part from the individual genius of the theologians, but also largely from their personal rivalry; and particularly from the rivalry and hostility that existed between the great monastic orders of Dominicans and Franciscans, and between the schools of the realists and the nominalists. Another characteristic of this climax period of scholasticism consists in the fact that it for the first time brought the whole body of specifically Catholic doctrine to its complete formal expression.

First in time, of the scholastic theologians of this period, is Alexander Hales (died 1245). He won the title of *Doctor Irrefragabilis*. His *Summa Universæ Theologie* shows great breadth of thought; it makes large use of Aristotle, is very methodical in form, and treats of all the fundamental questions; but it introduces a vast amount of irrelevant matter, and, in its attempt to meet every possible point, raises many trivial and even foolish questions. As a whole it lacks real speculative power. It also favors some of the extreme inferences of Roman doctrine, such as the *thesaurus gratiæ* and the *immaculata conceptio passivæ Virginis Mariæ*, and it betrays an occasional Pelagianizing tendency.

Hales is, in many respects, surpassed by the noted

Dominican Albertus Magnus (died 1280). He made a much larger use of Aristotle. His commentaries on Aristotle and on Lombard and his *Summa Theologiae* exhibit an astounding universality of knowledge. His familiarity with mathematics and with the whole body of the natural science of the age won for him the repute of a magician. It is with injustice that some have styled him the *Simia Aristotelis*. He does not simply ape Aristotle, he merely makes free use of his materials; but he also combines therewith not a few of the conceptions of Plato and of the Neo-Platonists. It is true, he does not control his physical facts by an adequate criticism, and he fails to give full development to his speculations. But speculative power he really has, and from the midst of the mass of his chaotic materials there frequently dart forth surprising anticipations of great laws which subsequent scientists have fully developed—a fact which Alexander Humboldt has cheerfully conceded. As to Albert's specifically theological standpoint, he holds that theology is a practical science (*scientia de his quæ ad salutem pertinent*), treating of God and of his works. It is a science, however, not in the interest of science, but in the interest of eternal bliss. It has for its subject-matter the objective *fides catholica*, which faith rests originally upon a *supermundana illuminatio*. This *illuminatio* he attributes not only to prophets and apostles, but also to the fathers. He recognises the two forms of faith—faith as the objective matter to be believed, and faith as a subjective activity of the individual; and upon this latter he bases the capability of attaining to real Christian knowledge. He regards revelation and reason, theology and philosophy, as absolutely in harmony, notwithstanding any seeming conflicts, for they both rest upon experience—theology upon our experience of the supernatural, and philosophy upon our experience of the natural; and the supernatural and the natural, though essentially different, rest both upon the harmonious plan and will of the one God. The supernaturalism of Albertus Magnus stands in close connection with his Platonizing derivation of all creatures, by a descending emanation, from the absolute God. Supernatural grace is needed by the creature *per se*, and irrespective of sin. Without this grace man, even had he not sinned, could not have lifted himself up out of his finiteness into likeness to the infinite God.

But Albertus Magnus did not fully develop his supernaturalism in all its bearings; this was done by his distinguished scholar, the greatest and most influential of all the scholastic theologians, Thomas Aquinas (died 1274). Thomas Aquinas was very successful in vindicating to theology the character of a true science. He set before man as his highest good, as the goal of his blessedness, the vision of God (*visio Dei*). But this supermundane goal lies beyond the scope of creaturely ability, for the natural cannot reach up to the divine. The highest that reason can attain to is a mere mediate knowledge of God through and from his works; and this is the furthest limit to which any of the old philosophers reached. These general religious notions form a sort of *præambula fidei*. They can be reached, thought Aquinas, by way of logical demonstration: e. g. that there is a God, that God is one, etc. But to the supernatural end of man, as presented in Christianity, we can attain only through supernatural revelation. The seal, the witness, of this revelation are the miracles which attend it. Theology is the science which is based on revelation and guided by the light of faith; whereas the other sciences are based on nature and guided by the light of reason. The fact that theology has for its object a something that is to be accepted on authority—viz. faith—does not hinder it from being a science. All other sciences do the same thing; they accept their subject-matter as an objective reality without proof, and then develop themselves therefrom as from an axiom. The axioms of theology are the dogmas of the Church. From these it evolves and proves additional truths and consequences. This gives Aquinas's view

of the relation of reason to faith. Reason cannot prove the articles of faith, for the latter spring from revelation, which is above reason. But rational and theological truths cannot possibly be in conflict, for they both come from God—the one indirectly and the other directly. Yet they do not overlap each other; they stand in different spheres. The rational truths do not reach up to the theological (*deficiunt ab eis*); they are only a *præcambulu* to them. Natural reason serves, therefore, as a preparation for faith; but Thomas Aquinas elsewhere in his system robs reason of even this conceded service, for he really attributes the so-called truths of natural reason to former half-remembered revelations, and regards them as implicitly containing the whole series of Christian dogmas. Another service (so teaches Aquinas) which reason renders to faith is to elucidate the doctrines of faith by means of natural analogies. The possibility of this rests on the fact that all natural objects retain a certain faint resemblance to their Author. Still another use of reason lies in convincing our adversaries. *The singularis modus convincendi adversarios* is really *ex auctoritate Scripturæ divinitus confirmata miraculis*. If the adversary concedes a part of the Christian system, his remaining errors may be removed by developing the implications of the partial truths which he does accept. If he rejects the whole, there remains no other resource than an indirect procedure, viz. by evolving the absurdities which are implied in his errors.

The form which Aquinas thus impressed upon theology was of the greatest influence upon all subsequent theological thought. It retained its sway in German orthodoxy down to the time of Schleiermacher. In the rest of Christendom, Catholic and Protestant, it largely prevails even to the present. Its essential feature is the sharp distinction made between that religious knowledge which is attainable by reason and that which we owe to revelation, as also the designating of revealed truth as *supra sed non contra rationem*. It is within the range of this narrow field that Aquinas usually confines his thoughts. At times, however, he breaks forth in what might have proved very fertile speculations but for the hampering effects of his self-imposed yoke. Occasionally, however, he makes a real sophist's use of this yoke, calling in abruptly the help of mere ecclesiastical authority to veil the absurd consequences to which some of the official definitions of doctrine seemed to lead. In philosophical respects Thomas Aquinas was equally attracted by the opposed systems of Aristotle and Plato. He seems to have oscillated not a little between the central differences of these systems—the realistic ideas of Plato and the *universalia in re* of Aristotle. Under this influence he sometimes assigns too high a rôle to natural reason (e. g. to demonstrate the existence of God), and at others he almost robs it of any power whatever (e. g. when he attributes the truths of natural religion to forgotten revelations). In his ontology Aquinas leans somewhat to the emanation of his master, Albertus Magnus. He does not clearly distinguish between will and nature in God; and his system, as a whole, is deterministic in its implications. In form it is an ideal of artistic construction. It is, however, not merely its form, but also and chiefly the rich fullness of its matter, which secured to it its long ascendancy over the theological activity of the Church.

Contemporary with Aquinas was the gifted and eloquent Bonaventura (died 1274). He is peculiar for the completeness with which he combined the scholastic element with the mystical. His masters were Aristotle and the St. Victorians. Less speculatively original than Aquinas, he is distinguished by a moderation which preserves him from dogmatic extremes, and by a warm religious element which lends to his pages an enduring attraction. This latter element saves him from the trivial subtleties into which his contemporaries so generally fell, and induces him to give great prominence to the simple practical elements of scriptural piety. Well

did he merit the encomium of Gerson: "*Recedit a curiositate quantum potest, non immisceans positiones extraneas, vel doctrinas terminis philosophicis obumbratas more multorum, sed dum studet illuminationi intellectus, totum refert ad pietatem et ad religiositatem affectus.*" Hence to Bonaventura theology, though speculative as to its object, is yet predominantly a merely practical science. As to his mysticism, it does not materially affect the form of his theology; rather is it simply an attending complement serving to supplement the inadequacy of the formally logical element. As a whole, his influence, though permanent, was not so immediately effective as that of Raymond Lull (died 1315). Lull's *Ars Generalis* was a laudable endeavor to simplify and to render more practically effective the whole arsenal of scholastic resources. The enthusiasm with which he undertook to frame a system which would absolutely annihilate the scepticism of the Averroists, and demonstrate Christianity with the evidence of a simple syllogistic inference, is only to be compared with the kindred ambition of Wolf in the 18th century. But the results did not justify his hopes. And though he had a long series of enthusiastic disciples, his logical rationalism failed to produce any long-lasting benefits.

But the figure which stands as a worthy rival of Thomas Aquinas, and whose subtleties brought scholastic theology not only to its meridian of glory, but also to that stage of excessive development which broke the way for its decline, is the Franciscan monk Duns Scotus (died 1308). Scotus was unquestionably an original, creative genius. He impressed upon the course of theological development a specifically new character. He was not merely a personal rival of Aquinas, but he was an independent master. He shared, with the other scholastics, the conviction of the absolute truth of the official orthodoxy of the Church. He differed from Aquinas in making a less impassable gulf between faith and knowledge. He reduced the claims of philosophy, and in the same measure enlarged the scope of theology. With him theology is the science of man in his relations to God, and of God in his relations to the universe. He comes to a clearer conception and a larger use of man as an image of God than is previously met with. From the fact that man is in the likeness of God follows the consequence that man is able to know God, and that the intuitions of essential truth lie in germ in the very nature of the soul. Upon the path of man's likeness to God, Duns Scotus was led to a more clear distinguishing of will from nature in God than had previously been done, as also to the assigning to God's freedom a very large rôle. The creation of the universe was not a matter of pantheistic necessity, but was the result of a special divine volition. God might even have made the world other than as it is, and he might have given to man a different moral law. He might also have adopted a different plan of salvation. Thus, while teaching the great truth of the divine freedom and combating the determinism of Aquinas, Scotus did not guard the divine freedom against irrational arbitrariness by representing it as finding its norm of action in the divine wisdom. This great defect in Scotus's system led directly to the defeat of the most earnest endeavor of his life—viz. to settle Christian science upon an absolutely solid foundation; for it sapped the rational ground of the universe, and thus planted in theology a germ of universal scepticism. The reason of this failure lay not in a lack of ability in Scotus, but in the fundamental mistake of the whole body of scholastic theologians, viz. in the uncritical assumption of the absolute correctness of the formal dogmas of the official Church. This assumption shut them off at once from any adequate appreciation of the two true sources of all theology and philosophy, viz. Scripture and experience.

It was by developing the consequences of the scholastic method to their dangerous extremes that Duns Scotus has the merit of having at the same time raised scholastic theology to its fullest glory and also given an

impulse towards its dissolution. Earliest among those who became conscious of the radical defectiveness of the whole scholastic method was Roger Bacon (died 1294). Bacon declaimed, in an almost Protestant spirit, against the enslavement of theology to human authorities, and pointed towards the Scriptures and experience as the real fountains of truth. But his influence towards the decline of scholasticism had a less potent effect to that end than the further development of scholasticism itself.

Of this third stage in the scholastic movement we can mention but the most prominent features. First of note stands the acute and independent-minded Durand of St. Pourcain (died 1333). Durand held an eclectic relation to the opposed systems of Aquinas and Scotus. He was a nominalist like Scotus, but his nominalism had a realistic background. With Aquinas, he held that man is by nature incapable of knowing the laws of God. The intuitions and generalizations of the human mind have only subjective validity. The true knowledge of God can be derived only from the Scriptures, as officially interpreted by Rome. Theology aims not at the knowledge of the nature of God, but only at such a practical knowledge of God as leads to salvation. Theology relates to the will, and is hence a purely practical science. Faith cannot be begotten by arguments, but is a simple virtue; and its meritoriousness is in proportion to its difficulty. Durand denies even that the light of the Spirit shows us the *evidence* of Gospel truth. This also would destroy the merit of faith. He agrees with Aquinas in exalting the transcendental position of God in regard to man, and with Scotus in giving arbitrary play to the divine will and grace. The outcome of his whole system was to discourage the activity of human reason, and to promote a spirit of unquestioning submissiveness to the official Church. It denied all worth to philosophy, and reduced theology to a mere method of practice.

This attitude of theology was now more fully developed by Occam (died 1347). A disciple of Scotus, he yet varies from him in many points. He boldly opposed some of the claims of the popes, and substituted nominalism for the prevalent scholastic realism. This was a necessary logical outcome. Scholastic realism had utterly failed to resolve the truths of philosophy and theology into any unitary substratum of general knowledge. Hence its sole resource in order to attain to unity of thought was to give up all effort at knowing things *per se*, and to reduce our highest intuitions and ideas to mere creations of our own subjectivity, destitute of objective value. Our highest ideas are mere *fictiones, abstractiones*. This nominalism was so strong with Occam that it gave to his whole system a positively sceptical tendency. Thenceforth nominalism reigns almost without rival in the waning life of scholastic theology.

After the time of Occam the development of theology becomes fitful and sporadic. The influence of Scotus led to a constantly more pronounced Pelagianism. The influence of Aquinas occasioned various attempts at a revival of Augustinian determinism. In a few cases, e. g. Wycliffe and Huss, it became a herald of the Reformation. The last scholastic proper, Gabriel Biel (died 1495), made earnest but fruitless endeavors to prop up the tottering superstructure of the old system. Further attempts in the same direction—by Raimund of Sabunde, Nicolas de Cusa, Gerson, and others of a less scholastic character—were equally unsuccessful, and served only to show the need of a thorough reformation of the whole body of theology.

The latest phenomena in theological science immediately before the Reformation were these three: An effort to revive an earnest Christian mysticism (Gerson and others); a revival of an Aristotelianism of a sceptical tendency (Pomponatius); and a syncretistic and fanciful Neo-Platonism (Ficinus, Picus Mirandula). Of these three, the first was necessarily impotent in its main endeavor, as it still held fast to the old scholastic foun-

dation, while the second and third served only, by their sceptical and pagan tendencies, to give a final thrust at the entire effete system.

The so-called ante-Reformers—Wycliffe, Huss, Jerome, Savonarola, Wessel—still linger under the dominion of scholastic forms and traditions. It was only the radically revolutionary spirit of the Reformers themselves that gave to scholastic theology its definitive death-blow. But even subsequently to this point there have appeared not a few (though unimportant) scholastics, *scholastici post scholasticismum*. Luther himself confesses his indebtedness to scholasticism: "Ego scholasticos non clausis oculis lego, non rejicio omnia eorum, sed non probo omnia." So also Melancthon. And it is only the shallowness of rationalism or the bigotry of ignorance that can declaim (as is often done) against the worthlessness of scholastic theology as a whole. Philosophers like Leibnitz, Hegel, Ritter, Cousin, Rémusat, and Haureau, and theologians like Engelhardt, Rettberg, Liebner, Hasse, Gass, Neander, and Baur, have spoken in a very different tone; and have contributed, in some degree, to acquaint modern times with a part of the rich treasures of thought and speculation which it contains. The dry, superficial 18th century mocked at the scholastics from the simple reason of its ignorance and its incapacity to appreciate them. The revival of theological originality since the time of Schleiermacher and the contemporary new birth of art in the romantic schools of Germany and France have awakened a very different state of mind. Even Semler has frankly declared that many a modern theologian who has abused the scholastics would not have been able to serve them as a mere amanuensis.

Faint reproductions of the scholastic period of Catholic theology have appeared in Protestantism. The 17th century was for the Lutheran and Reformed churches a really scholastic age. The systematic theologians of that century stood in the same relation to the fathers of Protestantism as the mediæval scholastics to the *patres* of Catholicism. So is it with each of the most insignificant sects of Protestantism. Whenever any Church begins to let the writings of any of its eminent ministers stand between it and a free and direct interpretation of the Scriptures in the light of intuition and experience, that moment it enters into its scholastic stage. See Neander, *Church Hist.* vol. iv; Hagenbach, *Hist. of Doctrines*; and especially Herzog, *Real-Encyclop.* (J. P. L.)

Scholasticism (SCHOLASTIC PHILOSOPHY—PHILOSOPHY OF THE SCHOOLMEN), a notable phase of speculation which prevailed throughout the Middle Ages whenever any activity of thought was displayed, and which gave a distinctive character to the reasonings, to the controversies, and to the whole intellectual habit of those centuries. Scholasticism especially denotes the peculiar mode of argumentation then practiced, and the spirit by which it was guided. The Scholastic Philosophy designates the whole body of diverse and often conflicting doctrine which was generated under the scholastic procedure. The Philosophy of the Schoolmen signifies the same thing, but directs attention particularly to the very remarkable succession of acute and profound inquirers who applied and developed the scholastic method. The schoolmen were the theologians, the metaphysicians, the dialecticians, the encyclopædists, the thinkers, and the teachers of the mediæval period. The scholastic philosophy represented the ample and often bewildering, but always systematic, results of their labors, especially after their method had attained its curious but consummate perfection. Scholasticism was the peculiar process of investigation and demonstration pursued by the schoolmen, with various thoroughness but unvarying uniformity, for much more than half a millennium. The schoolmen have long fallen into disrepute; little more than their names are remembered by the majority even of educated persons. Their works are unread and lie mouldering and undisturbed on the

dusty shelves of ancient libraries. Their system has been for nearly three centuries the constant butt of ignorant censure and stolid pretension. Yet a system which endured so long, which engrossed so many minds of wide culture and of marvellous penetration, which attracted so much of contemporaneous regard, which enlisted such intense and general enthusiasm, which filled the intellectual atmosphere for long generations, which almost "ruled the court, the camp, the grove," in the persons of Anselm and Occam and Abelard, cannot be dismissed with a sneer or safely repudiated with indifference. Hallam, following in the wake of Brucker, with whom he was probably unacquainted, has repeated the stale reproaches against the scholastics, though acknowledging that he had read neither the works of the schoolmen themselves nor the historians of their philosophy (*Middle Ages*, ch. ix, pt. ii). But the second-hand censures of Hallam are rendered ridiculous by the measured commendations of Leibnitz, to which he inadequately refers, and by the candid admiration of Sir William Hamilton and other competent judges. Sir William, speaking of Reid's repetition of the current abuse, observes: "This is the vulgar opinion in regard to the scholastic philosophy. The few are, however, now aware that the human mind, though partially, was never more powerfully developed than during the Middle Ages" (Reid, *Works* [ed. Hamilton], p. 268, note; comp. Hamilton, *Discuss.* p. 54, note; 2d ed. St. Hilaire, *De la Logique d'Aristote*, préf. vol. i, p. v; Rémusat, *Abelard*, ii, 282, 548). St. Hilaire justly designates "La scolastique—berceau de l'intelligence moderne." The world cannot afford to disown any of the laborious services by which knowledge and civilization have been advanced, no matter how strange they may now appear. Nor can it wisely forget those who have labored long and earnestly in its behalf. It may always be presumed that whatever occupied the ardent endeavors of many generations had some serious meaning, whether this meaning does or does not lie open to hasty apprehension; and that it solved some serious difficulties of the time and ministered to their removal from the onward path of humanity. It is certainly blindness and arrogance to reject, without careful examination, what we do not understand, because we do not understand it; and not to understand it, because unwilling to make an effort to understand it. There is much which is unsuited to modern habitudes of thought, much which is strange and bewildering under modern associations, and which is futile, perverse, or erroneous in the writings of the schoolmen; much that may be judiciously abandoned as having served its turn and prepared and disciplined modern intelligence. But, as Richard Baxter and Leibnitz—very dissimilar minds—both recognised, there will still remain much that is valuable and deserving of sedulous appreciation. Indeed, to those who have sipped from the original fountains, who have pondered over the divisions of Aquinas or grappled with the distinctions of Duns Scotus, there will appear no extravagance in the question of a recent writer: "What doubts have since been mooted—what difficulties suggested in morals, religion, or politics during three centuries of unfettered religious inquiry which they, the schoolmen, have not anticipated and dissected with the calmness of scientific anatomists?" (Brewer, *Letters and Papers in the Reign of Henry VIII*, vol. iii, p. ccccxiii. Comp. Proudhon, *Création de l'Ordre dans l'Humanité*, III, iii, § 208).

I. *Origin of the Term Scholasticism.*—The word "scholastic" (σχολαστικός) does not occur in classic Greek in the sense so familiar from its customary application to the philosophers of the Middle Ages. Bayle (s. v. "Aristotle") says that it was not used in Aristotle's time to "signify a scholar, a student, or a schoolman." It occurs four times in Aristotle himself, always with the meaning of idle or disengaged—once in distinct opposition to practical. No distinct instance of its mediæval usage is discoverable in Stephens's *Thesaurus*. The ear-

liest approximation to it presents itself in Posidonius (Athen. *Deipnos*, V, xlviii); but it still clings to its primary meaning of unemployed, leisurely. It must be remembered that "school" had originally the same import, and that its Latin name was *ludus* (play). Gradually "scholastic" came to mean "characteristic of the school," particularly a school of rhetoric—the master of such a school, a teacher of rhetoric, an advocate in the courts of law. It is employed in this last sense in a rescript of the emperor Constantius II (*Cod. Theod.* viii, x, 11). It is sometimes with reference to a forensic vocation, sometimes with reference to elegant culture (which the word afterwards denoted), sometimes with reference to rhetorical instruction, that the Eastern Greeks spoke of Eulogius *scholasticus*, Leontius *scholasticus*, Sozomen *scholasticus*, Evagrius *scholasticus*, etc. The term, however, gradually lapsed into new significations, so that in the amusing account which Anna Comnena in the 12th century gives of John Italus (*Alexiad.* V, viii), it is put in contrast with polite, rhetorical accomplishment, and signifies a dialectician. The word is translated "umbratilis," by Possinus, in his version of Anna, in accordance with its classical sense; and this rendering is not changed in the revision of this version by Schopen in the Bonn edition. It is impossible, however, to ignore its indication of logical pursuits. It probably received this significance by importation from the contemporaneous usage in the schools of the West. The fortune of the word in the Latin language was similar to its experiences in the Greek; but there is greater facility in tracing the mutations of its meaning. It does not occur in Cicero. The younger Pliny gives *umbratilis* as its equivalent (ix, Ep. ii). In Quintilian, in the *Dialogue on Orators*, and in Aulus Gellius, it denotes "appertaining to rhetorical schools." In Petronius it designates the pupils of such a school. In the 4th century it was used for elegant, cultivated, refined ("scholasticus, ad Græcas munditias eruditus" [Capitolin. Maximin. Jr. c. iii]). In the 5th century it meant eloquent ("scholastici ac disert") [Salvian, *De Gub. Dei*, præf.]. Several of the meanings were, no doubt, concurrent. The predominant meaning, under the empire of Rome in the West, was a person accomplished in the studies of a school of rhetoric, whether as disciple, teacher, or graduate. Rhetorical education, as the preparation of Cicero and the *Institutes* of Quintilian abundantly attest, had early become universal or encyclopaedical instruction. As rhetorical pursuits declined and as other studies waned, while logic gradually acquired a notable preponderance in the Church and in the ecclesiastical schools, as afterwards in the rising universities of Western Europe, scholasticism became identified with logic. Logic, however, embraced, or assumed to embrace, all subjects in its rigid grasp, as is shown by the commentaries of the greater schoolmen on all the works of Aristotle, and by their violent application of the logic of the schools to all departments of knowledge and action. But the universal range claimed by rhetoric in the Roman schools of rhetoric was never renounced by those who retained the name of scholastics while substituting logic for rhetoric. The process of the transmigration of meanings is easily discernible. School study is the pursuit of those who have leisure and therefore opportunity for learning. Rhetoric became the predominant and exclusive object of school instruction, but comprehended all knowledge. Logic supplanted rhetoric. Analysis and demonstration took the place of rhetorical elegance of expression, and aspired to the dominion of all knowledge. The new teachers and pupils retained the established name; and thus the scholastic of the Middle Ages emerged out of the idler of classical antiquity. The name is early applied to the masters of the cathedral schools.

II. *Nature of Scholasticism.*—The inquiry into the changing import of the name scholastic is equally necessary for the due apprehension of the ordinary employment of the term and for understanding its appropriation by the scholastic philosophers. There is a large

class of words which denote shifting conditions, social fluctuations, expanding or altering forms, that can be duly appreciated only by attention to their historical modifications. Civilization is a word of this kind, scholasticism is another. The definitions of scholasticism given in the dictionaries are for the most part tautological—*idem per idem*—and habitually partial. They convey little information to those not already acquainted with the subject; they generally proceed by cross-reference. The inquirer is baffled by a game of verbal battledore and shuttlecock between the reciprocally implicated terms scholasticism, scholastic philosophy, and schoolmen. The distinctions of the historians of philosophy are of course more satisfactory, but they are seldom adequate. Brucker enters into the history of the term; but Ueberweg is almost dumb on this point. He says (*Hist. Phil.* i, 355), "Scholasticism was the reproduction of ancient philosophy under the control of ecclesiastical doctrine, with an accommodation, in cases of discrepancy between them, of the former to the latter." Then Abelard, who did not touch theology till an advanced period of his career, was not a scholastic during his brilliant course at Paris. Others, who never touched theology at all, were never scholastics. Occam, and those who rejected ecclesiastical authority in whole or in part, were not scholastics. Then Albertus Magnus and Thomas Aquinas and Duns Scotus ceased to be scholastics when composing their vast commentaries on Aristotle; but became so, suddenly, when commenting on Peter Lombard and submitting their speculations to the discipline of the Church. Then Roger Bacon would not be a schoolman. Evidently there is no such compendious definition of scholasticism as Ueberweg and many of his fellow-historians suppose. The application of the Aristotelian logic to the exposition of Christian doctrine, and the subordination of the logical deductions to the orthodox dogmas of the Church, characterized the most brilliant period of scholasticism, and constituted scholastic theology. See SCHOLASTIC THEOLOGY. But these characteristics did not belong to the whole period, nor to all the schoolmen, nor to all the labors of theological scholastics in any period. John Scotus Erigena with his Platonism, and Pico di Mirandola with his Cabalism were schoolmen as much as Bonaventura or Bradwardine. So also were essentially the Jew Maimonides and the Saracen Avicenna. It is necessary to regard the wavering import of the term scholasticism, to note its various use, and to trace the progress of the scholastic procedure, in order to obtain a full knowledge of its meaning, and to detect the grounds of its diverse, and particularly of its most familiar, application.

Scholasticism, so contemplated, will be found to have meant, under the emperors of Rome, the functions of a teacher of rhetoric, embracing all knowledge in his course, then the possession of such knowledge with the refinement which it was supposed to bestow. As universal learning shrank up, even in the times of Cassiodorus, to the Trivium and Quadrivium, scholasticism suffered eclipse, but still claimed dominion over all the learning of the time. When rhetoric was supplanted by logic, scholasticism became the application of deductive reasoning to all departments of inquiry; and, at a later time, in accordance with the temper, associations, and necessities of what is regarded as distinctively the scholastic period, pre-eminently, though never exclusively, to theology.

Scholasticism will thus be the employment of logic, not the Peripatetic philosophy as such, in all departments of learning, whether suited to them or not—the substitution of dialectics for investigation, of authority for facts. Lord Bacon did much, but very much less than his followers, to confirm the delusion that Aristotle handled everything in subservience to the logical science which he had created. Such an error can never be entertained by any one who has read his *Natural History*, his *Parts of Animals*, his *Politics*, or even his *Rhetoric* or his *Ethics*. This exclusive application of

logic to all subjects and on all occasions was alike the defect and the characteristic of the schoolmen, practiced, even when condemned and opposed, by Roger Bacon.

III. *Origin of the Scholastic Mode of Philosophizing.*

—The notices of the origin of the name and of the nature of scholasticism furnish indications of the genetic development of that notable method of speculation. They do not supply the historical explanation of its growth, nor reveal its relation to the changing circumstances in the social and intellectual condition of the darkening ages which determined its appearance and progressive ascendancy. Several writers, among whom may be named Brucker, St. Hilaire, Rémusat, have recognised in John of Damascus the progenitor of the scholastic system. He flourished in the earlier half of the 8th century. Long before him, germs of scholasticism and scholastic tendencies may be detected in both Christian and pagan writers. There are many evidences in Aulus Gellius that eristic dialectics constituted an habitual occupation of scholars before the middle of the 2d century (see especially *Noct. Att.* I, ii). There is a manifest disposition in Tertullian and other fathers of the early Church to treat religious topics in a manner analogous to that pursued a thousand years later by the most illustrious among the schoolmen. Scholasticism was a natural growth, not an arbitrary invention. It may be deemed to have been inevitable that this mode of intellectual procedure should be pursued when a revealed religion, appealing exclusively to faith in the revelation, and whose fundamental tenets "came not by observation," was disseminated amid a highly cultivated but sceptical society, in antagonism to previously existing systems of religious belief, and to all the conclusions of its past thought and experience. Authority, divine authority, was the basis of the new truth, and furnished the premises for controversy and for apologetics alike. The inspired Scriptures were the expression of this divine authority, and were neither to be established by observation nor tested by experiment. In exegesis as well as in polemics there was thus a necessity of proceeding from the maxims of faith to the consequences of such maxims, which could be reached only by deduction. The need of accommodating the arguments adduced to the hostile temperaments and adverse habitudes of a pagan age would naturally soften and obscure the sharp precision and harsh angularities of dialectical demonstration. But the scholastic method, and even the scholastic subtleties and quodlibets, very soon appeared, and may be discerned in early patristic literature. When Christianity became prevalent and was established as the religion of the State, especially as there was a coincident decay of general culture and secular letters, the logical spirit, with its texts, its abstractions, its distinctions, its divisions, and its refinements, became predominant. This tendency is very pronounced in the *Confessions* of St. Augustine, in his other writings, and in the productions of his contemporaries and immediate successors. It is not without reason that Augustine has been signalized as one of the chief promoters of the scholastic method. As letters continued to shrivel up, and as cultivation of intellectual graces and refinements became impossible or mistimed in the midst of social anarchy, barbarian incursion, and general wretchedness, the deductive method of argumentation and exposition would unavoidably prevail. The extension of the practice and the exclusiveness of such pursuits would also be greatly favored by the restriction of study to the ecclesiastical circle, and by the mighty task imposed upon the whole mediæval period of converting the pagan barbarians who had occupied the Western empire, and of civilizing them through the instrumentality of the Christian faith to which they were to be converted. Of course, as logic was the chief method of theological persuasion, the influence of Aristotle and of the Aristotelian spirit grew with the progress of time and with the progress of theological disputation, for there neither is nor ever can be any logic

but that of Aristotle. There does not seem to be any sufficient evidence of the total oblivion of Aristotle and of Aristotle's dialectics at any period of the Middle Ages. The testimony of Ingulph may be spurious, but there are other indications of a meagre acquaintance with Aristotelian logic through secondary channels; and it is admitted that the version of Porphyry's *Introduction*, by Boethius, was known at all times. After the conversion of the pagans in the new kingdoms, and the definite establishment of the ecclesiastical ascendancy of the Roman Church throughout the Western empire, a fresh demand and a constant provocation for the intervention of scholastic procedure arose in the ever-multiplying and often pernicious heresies which occupied provincial councils, and engaged the most zealous and astute minds in their promulgation, their refutation, and their defence. A very cursory perusal of the impugned opinions, whose statement opens the several articles in the *Summa* of Aquinas, or of any similar *summa*, will show what a countless number and endless variety of dogmas required to be examined and settled for the establishment of the religious and ethical doctrine of the times. It was an inestimable service which was rendered in the long and agonizing period of the Middle Ages, in a society without other intellectual discipline or moral control, by the proposition, the ventilation, the discussion, the establishment, or the reprobation of the multitudinous perplexed problems in theology—often affecting government, society, and private conduct. It is not a question here whether the reasoning adopted, the arguments adduced, the conclusions drawn, or the decisions affirmed were correct or pernicious. The process was necessary, the task indispensable, for the effective development of European intelligence. The system does not accord with modern requirements, nor approve itself to modern modes of thought; but it inaugurated those requirements and bred those modes. Feudalism had to be swept away to make room for the growth of society and its larger expansion; but feudalism was a blessing at a time when the imperative demand of society was for confirmed authority and graduated subordination. Any "good custom will corrupt the world;" and no human custom is absolutely good or free from the taint of wrong and prospective mischief. The errors and the defects of scholasticism are nowadays manifest to all, and are habitually exaggerated. The good, "that was buried with it," is not equally apparent or as willingly sought. It requires some knowledge of the schoolmen, of their works, and of their times—a transference of thought from our circumstances and points of view to theirs, and dispassionate reflection—to estimate their difficulties, their aims, and their achievements. One inestimable result of their labors—it is only one—was the definite establishment of the terms of reasoning, metaphysics, and theology, and, as a consequence of their procedure, the enforcement of logical coherence of thought and of precision of language. These things were indispensable preliminaries for the development of modern tongues, modern knowledge, modern enterprise, modern society, and modern government.

That this explanation of the rise and progress of scholasticism is correct is in some measure confirmed by the exhibition of the same tendencies, under analogous circumstances, in the contemporaneous speculation of the Jews and Arabs; for it is a mistake to regard scholasticism as either an ethnical or a theological idiosyncrasy.

In the manner stated, and by steps which can be only obscurely traced, scholasticism gradually assumed that form in which it is usually contemplated by the historians of philosophy; and acquired the fulness, abundance, energy, precision, and predominance which characterized the scholastic philosophy in its most vigorous manifestation.

IV. *Systematic Development of Scholasticism.*—John Scotus Erigena, towards the close of the 9th century, is generally regarded as the first of those distinctively en-

titled schoolmen, though, as has been shown above, he should not be considered the earliest scholastic. The historians of philosophy have variously distributed the course of scholastic philosophy into periods. Ueberweg, who may be taken to represent the latest prevalent view, divides the scholastic age into two parts only: 1. From Scotus Erigena to Amalric, or from the 9th to the 13th century; 2. From the 13th century to the Renaissance. He thus omits both the preliminary tendencies and the expiring efforts, important as the origin and the decadence of the system must be. Sir William Hamilton (Reid, *Works*, Appendix, note B, p. 815) notes John Major, of St. Andrew's (1469–1547), as "the last of the regular schoolmen;" but the spirit survived far into the next century. Brucker does not neglect the early manifestations of scholasticism, but observes that it was conceived during the centuries extending from the 5th to the 8th; that the 9th and 10th were the time of its gestation and formation; that it was born in the 11th; that it passed its boyhood and youth in the 12th; and that it attained full manhood in the 13th. He commences the treatment of what he holds to be the scholastic philosophy proper with the beginning of the 12th century, and divides the history into three periods: 1. From Lanfranc, or Abelard and his disciple Peter Lombard, to the middle of the 13th century, and to Albertus Magnus; 2. From 1220 to Durand of St. Pourcain; 3. From 1330 to Gabriel Biel and the close of the 15th century.

That a great change took place in the scholastic philosophy at the opening of the second period, through the rivalry and energy of the recently instituted orders of the Dominicans and Franciscans, is proved by the character and career of the great schoolmen, and by Roger Bacon's curious vituperation of the "youngsters" who were teaching at Paris. These youngsters—"pueri duorum ordinum studentium" (*Compend. Studii*, v)—were Albertus Magnus, Thomas Aquinas, and their colleagues. The third period is rendered memorable by the names of Duns Scotus and William of Occam, and was marked by an excess of ingenuity, an extravagance of distinctions, and a perverse subtlety which degenerated into vain and puerile captiousness in their successors. It is from the diseased state of scholasticism in its moribund age that the general estimate of the system has been formed. But there is little justice in applying to the whole philosophy the reproaches merited by it in the years of its impotent decline.

For an acquaintance with the character and consequences of the application of scholasticism to theology, for the peculiarities of the sects of the scholastics and of the leading schoolmen, for their rivalries and their antagonisms, reference should be made to the names of the schoolmen in this *Cyclopædia*; to NOMINALISM, REALISM, and SCHOLASTIC THEOLOGY.

V. *Literature.*—The literature of scholasticism is so extensive that it would be equally impracticable and vain to undertake to give here any adequate enumeration of the principal works that have illustrated it. Among the chief sources of information are obviously the *opera omnia* of all the more notable schoolmen and their predecessors, from Joannes Damascenus to Gerson and Petrus Alliatus, or even down to Philip Melancthon. Next in order would come all the chief historians of philosophy. Among works of more special and immediate interest on the subject may be named—Cousin, *Fragments Philosophiques*; *Phil. Scolastique* (Paris, 1840); Rousselot, *Études sur la Phil. dans le Moyen Âge* (ibid. 1840–42); Jourdain, *Recherches Critiques sur l'Âge et l'Origine des Traductions Latines d'Aristote* (ibid. 1843); Caraman, *Hist. des Rev. de la Phil. en France* (ibid. 1845–48); Kaulich, *Gesch. der scholast. Philosophie* (Prague, 1853); Haureau, *La Philosophie Scolastique* (Paris, 1858); Hampden, *The Scholastic Philosophy*, etc. (Oxford, 1862); Erdmann, *Der Entwicklungsgang der Scholastik*, in *Zeitschrift für wissenschaftl.*

Theologie (Halle, 1865), vol. viii; Michaud, *Guillaume de Champeaux et les Écoles de Paris* (Paris, 1867); De Cupély, *Esprit de la Philosophie Scolastique* (ibid. 1868). (G. F. H.)

Scholastics. See SCHOLASTIC THEOLOGY.

Scholefield, ARNOLD, a Methodist Episcopal minister, was born in Nova Scotia; united himself with the Methodist Episcopal Church while quite a youth; was admitted on trial in May, 1810, from which time he travelled and labored in the work of the ministry with great acceptance and usefulness until his health failed in 1828. In 1832 he was again reported effective, and appointed to travel on Troy district, but had not travelled long before he was again rendered ineffective by paralysis, and died in 1837. He was an able and laborious minister of the Gospel, and very ardent in his religious feelings. His sermons were characterized by a peculiar richness and pleasing variety, and were usually delivered with much pathos. See *Minutes of Conferences*, ii, 495; Bangs, *Hist. of the M. E. Church*, iii, 252.

Scholia, short notes of a grammatical or exegetical nature. Many scholia are found on the margin of manuscripts, or interlined, or placed at the end of a book. They have also been extracted and brought together, forming what is called *Cutena Patrum*. See COMMENTARY.

Scholiasts, writers of such brief notes on passages of Scripture. Many of the ancient Christian fathers wrote scholia (q. v.), which have come down to us, and show the views entertained of various portions of the sacred volume. Their value, of course, depends on the learning and critical acumen of the authors. Theodoret, Theophylact, and Eusebius are among the best of them.

Schönemann, KARL TRAUGOTT GOTTLIEB, from 1799 doctor of law and professor of philosophy at Göttingen, was born in 1766 at Eisleben, and died May 2, 1802. He is known as the editor of *Epistolæ Romanorum Pontificum et quæ ad eos Scriptæ sunt*, a *S. Clemente I usque ad Innocent. III*, etc. (Göttingen, 1796). He also published *Bibliotheca Hist.-liter. Patrum Latinorum a Tertulliano principe usque ad Gregorium Magnum et Isidor. Hispal.* (Lips. 1792-94, 2 vols.). See Winer, *Handbuch der theol. Literatur*, i, 694, 854; ii, 763. (B. P.)

Schöner, JOHANN GOTTFRIED, a Lutheran minister, was born April 15, 1749, at Rügheim, near Schweinfurt, where his father was the pastor of the place. He studied at Leipsic and Erlangen, and was deacon of St. Lawrence's at Nuremberg. In 1799 he was taken sick, and died June 18, 1818. He was an excellent, pious man and pastor; and besides other hymns, he wrote the beautiful German hymn *Himmelan, nur himmelan*, which has been translated by Mills, in his *Horæ Germanicæ*, No. 130, "Heavenward, still heavenward." See *Sonntagsbibliothek* (Bielefeld), vi, 4; Koch, *Geschichte d. deutschen Kirchenliedes*, vi, 399 sq.; viii, 570; Knapp, *Evangel. Liederschatz*, p. 1344. (B. P.)

Schöngauer, MARTIN, called *Martin Schön*, a German painter and engraver, was born about 1420, and died at Colmar Feb. 2, 1488. The paintings attributed to this artist are very numerous, but there are only a few which can be proved to be his work; among them is a panel in the church of St. Martin at Colmar. As an engraver his reputation was very high. His style is much more elevated than that of the other early German artists, and many of his heads are full of refined sentiment. His *Carrying the Cross* is a masterpiece; and the *Temptation of St. Anthony* is held in high esteem.

Schönherr, JOHANN HEINRICH, a very remarkable and influential German theosophist, was born at Memel November 30, 1770. At the age of fifteen he was sent to Königsberg to engage in trade. After a year of trial he concluded that he had not found his calling. By great self-denial he succeeded in en-

tering and passing through a gymnasium course, so that at the age of twenty-two he was ready for the university. Even in his gymnasial course he became interested in those deep problems to which his subsequent life was given. But as yet it was a period of inner commotion. His early reverence for the Bible and orthodoxy was shaken by contact with the Kantian philosophy. At first intent on studying theology, he now wavered and began with jurisprudence. Soon he broke off from Kantian principles and endeavored, in his own way, to solve the problem of destiny and immortality. After a year at Königsberg he made an extensive journey, stopping a while at Greifswald and Rostock, and finally studying a whole year at the University of Rinteln. Here at Rinteln his system of theosophy began to take shape. It was rooted in a reaction against Kant's abstract idealism, and was a fervent grasping after realism. He imagined that in the simple words of revelation he had found a complete philosophy of being. "I even saw into the mystery of the Trinity," says he; "and I discovered that the world is a structure that leads to perfection." Leaving Rinteln in 1793, he passed through Göttingen, Erfurt, and Jena, and finally stopped at Leipsic to continue the study of philosophy. Here he led a quiet, studious life until February, 1794, and showed no signs of eccentricity. But of a sudden one morning he came into the room of a friend and inquired the way to the highest mountain of Thuringia, affirming that he must repair thither at once. His manner awakened a belief of his insanity, and he was at once taken to an asylum. Here he at first refused all food. After a month he was released. He returned to Königsberg in the full conviction that he had discovered a new system of religious truth, and with the full determination to devote his life to its propagation. To university studies he gave no further attention, but, gaining his daily bread by private instruction, he explained his thoughts in private, and gradually gathered to himself a little circle of admirers. His earnest assaults upon the prevalent rationalism, and his absolute enthusiasm for the literal written word of God, made a happy impression upon many a youthful heart. Two regular weekly meetings were held, Wednesday and Sunday evenings, at which were had animated discussions on the profoundest problems of philosophy and religion. They extended far into the night, sometimes until daybreak. Ladies also attended. Usually they closed with a hymn and a simple meal. These meetings were held not so much simply to impart a fully developed system as in order to develop and mature on all sides a number of fundamental principles which were regarded as already settled and certain. Hence Schönherr was also himself a seeker of light as well as a giver. As to his outward manner, he was as unpretentious as a child, showing no trace of a desire to rule or to be held in extraordinary esteem. He was simply a thoroughly convinced believer. He believed that he had found the key to a fuller understanding of revelation and a deeper insight into nature, and he felt that a great regeneration of Christendom would go out from his teachings. But he had not the least intention of forming a sect; on the contrary, he was very constant in his attendance upon the regular Church services, and he joined in them with fervent devotion. Although the private meetings at Schönherr's house were never very large, still their very regularity and the striking appearance of Schönherr himself attracted the attention of the police to them. Measures were about to be taken for their suppression, when a casual meeting of Schönherr with the minister of public worship made such a favorable impression as to cause the matter to be dropped. Thenceforth he was left to labor unmolested until his death.

Among the young friends of Schönherr none contributed more than J. W. Ebel (q. v.) to bring his teachings into public notice. Ebel had studied at Königsberg and received the degree of Ph.D. at Leipsic. In 1810

he obtained a place as preacher in Königsberg, where his intimacy with Schönherr was renewed. His preaching soon invited general attention. His manner was attractive, his language imaginative, and his chief themes (conversion and personal holiness) almost novel. Twice the clerical authorities were impelled to call him to give account of his doctrines and of his relations to Schönherr. But no good reason could yet be seen for interfering with him. These failures to find aught against him, especially the last one, in 1814, contributed to give even greater prominence to his ministry and his theosophic views. In 1816 he attained to the most prominent place in the Church of the city. This prominence soon opened the way for the conversion of not a few eminent persons. Even professors of the university and noble dukes and ladies were brought into close intimacy with Schönherr. In the year 1819, however, a violent disagreement arose between Ebel and his master. Ebel had ripened into spiritual independence, and could no longer concede the infallibility to Schönherr which the whole circle had hitherto passively admitted. Besides, he could not admit the scripturalness of some of the later developments of his master's system. And when Schönherr actually proposed physical castigation as a means of hastening on the kingdom of God, and endeavored to sanction it by Scripture texts, Ebel took direct issue with him, and ventured to intimate to him that, while starting well, he had stopped short and was yet entangled in the flesh. Thenceforth there were two parties, the larger one following Ebel. Schönherr continued with his diminished circle just as before. In 1823 he made a journey to St. Petersburg, and the next year another to Berlin; but he made no permanent impression. In 1825 he fell upon the insane notion of constructing a ship which was to move without sail against wind and stream, and to serve as a place of refuge for his followers amid the terrible judgments that were soon to fall upon the world. He actually constructed it. On being launched, it went to pieces amid the derision of the witnessing multitude. This came near entirely breaking up his little band of followers; yet it did not in the least shake his faith in the truth of his system or in his divine call. But his career was now about run. Broken down in health by his self-mortifications and labors, he retired to Spittelhof, in the environs of Königsberg, and there died of consumption, Oct. 15, 1826, attended only by a single maid-servant, who was faithful to him to the last.

What are the outlines of Schönherr's system? He never fully reduced them to writing. Only two small treatises are all he ever published: *Der Sieg der göttlichen Offenbarung*, and *Vom Sieg der göttlichen Offenbarung* (both Königsberg, 1804). But these essays contain only the embryo of his system. In addition there were found among his posthumous papers some brief notes, mostly aphoristic in form. De la Chevalerie, a disciple, also published abstracts of some of his lectures (Königsberg, 1835). All these data were used in preparing the book *Grundzüge* (Leipsic, 1852). From these sources, and from the works of Ebel and Diestel, Schönherr's most prominent disciples, the following not very clear outlines of a system may be gathered. The actual universe consists of a dualism; but the dualism can and should rise to unity. At the basis of the universe there are two primitive principles or beings. They are equally primitive and are personal and free. These beings exist in space, have a globular form, and are of the colors white and black. There is but one difference between them: the one is strong, the other weak. This difference, rightly taken, is a difference of activity and passivity. The co-operation of the two generates the world of reality. As the system grew towards self-consistency, the two principles assumed the forms of spirit and nature. But in Schönherr's thought they were rather of the nature of water (the weaker) and fire (the stronger). Fire and water lie at the basis of all reality. From their union and interaction arise

the universe and God. The fire poured its light upon the water, and thus became self-conscious. By the mutual action of the two a mutual effect was wrought—namely, the Word. The outer form of the Word is Day. The two first principles are the Mosaic *Elohim*. The stronger one is Jehovah; the weaker one is *matter*. From the absolute submissiveness of the latter to the former results the absolute harmony and order of the universe. To preserve and virtualize this harmony is the object of creation and providence. Creation is but another word for the plastic operation of the stronger upon the feebler principle. The Trinity is thus explained: the primitive essence of God is fire or light; this is the Spirit. The immanent power of God is the Father. The product of the essence and the power is consciousness, or the Word—that is, the Son of God. The contact of the Spirit with matter produced not only the Son of God, but also the whole series of spiritual beings. The kingdom of evil was produced by one of these highest beings turning away from light and allying himself with matter. The origin of sin in man is explained in the most realistic manner. Man, tempted by Lucifer, took into his blood the destructive substance of the tree of good and evil. Through the blood the evil is propagated as depravity in all after-generations. The theory of redemption is also very realistically conceived. By the fall man disturbed the harmony of the two principles of being. By redemption this harmony is re-established. But how? By a realistic implantation into nature of a healthful, harmonious leaven. Yet how? Thus: man's life lies in his blood. By the corruption of man's blood the whole life of nature is poisoned and depraved. Inside of humanity there is, therefore, no healthful starting-point. The healthful leaven must then be furnished from on high. It is furnished in the ideal human person of Jesus Christ, in whom the absolute mastery of the active over the passive principle is realized. The healthful, undepraved blood of Jesus is the redeeming principle. When he permitted the spirit of disorder to shed his precious blood on the cross, this blood flowed out and over into the realm of nature, or passivity and sin; and there it became the potent leaven which will ultimately transfigure, and glorify, and introduce order into the whole field of darkness. As the spilling of the actual blood of Jesus upon the lap of nature is the means of regenerating the cosmos, so the right partaking of the blood of Christ in the eucharist is the means of regenerating the depravity of human nature. As with redemption, so with the resurrection, the ascension, and the outpouring of the Holy Ghost. All are explained in a realistic and physical manner.

As to the proximate coming of the kingdom of God on earth, Schönherr had peculiar and very detailed views. How soon the state of perfection should break in depended largely on the use of human freedom. To freedom a very high rôle is attributed. By freedom man, in some sense, takes the place of God. By freedom he interferes with omnipotence and omniscience. How he will help to shape the future history of the universe is not absolutely foreknown even by God. It lies within the discretion of man, by fidelity to his own possibilities, to inaugurate a new phase in the history of humanity. But there are two absolutely differing classes of men. There are central natures and subervient natures. The latter revolve about the former as planets about the sun. Let a central nature only be faithful, and he carries a whole galaxy with him into the realm of light. As such a central nature Schönherr unquestionably regarded himself. Faith in himself was the very essence of his character. Nor did he ever waver in this. Hence his oft-expressed anticipation of a speedy transformation of humanity. He would be faithful, and would carry his brethren with him over into the realm of light.

After the death of Schönherr, the pastor Ebel took up the work of his master. It was a principle of the

whole system that the essential thing is not knowledge, but faithfulness. Upon this maxim Ebel proceeded. In the pulpit and before the multitude he preached only the common doctrines of the catechism; but in private he gathered about his own person an elect circle of the initiated. Among them were great lords and ladies, professors and students. Best known among them are pastor Diestel and the commentator Olsbansen. These were mostly "central natures;" while the uninitiated masses were but subordinate natures. The two corresponded to the two primitive principles of being, the active and the passive. But the main leader of the circle was Ebel. As the circle drew closer around him, the personal confession of every secret sin was introduced as a special means of rapid advancement in holiness. This gave Ebel an almost papal power over the consciences of the circle. It proved the means of a violent outburst which took place in 1826. Many of the chiefs of the circle left it and at once began an assault upon Ebel. For a while Ebel was prostrated by sickness, and dropped from the public attention. In 1834 he came again before the public. But a fresh storm broke out, and very soon involved Ebel and Diestel in one of the most notorious lawsuits of modern times. The two preachers were charged with unchurchly doctrines, immoral practices, and heresy. The trial lasted from 1835 to 1841, and resulted in deposing the accused from office, but in acquitting them of intentional immorality. The result was to entirely discredit the theosophy of Schönherr. Thenceforth it has had no organic existence, though isolated theologians have, here and there, studied it with more or less admiration. See, besides the works already mentioned, *Die Schutzwehr* (Königsberg, 1834); *Gegenseitige Liebe* (ibid. 1834); *Verstand u. Vernunft im Bunde* (Leipsic, 1837); Diestel, *Ein Zeugenverhör* (ibid. 1838); *Grundzüge* (ibid. 1852) from Schönherr's papers; *Compas de Route* (Königsberg and Mohrungen, 1857), vol. i; *Life of Rudolf Stier* (N. Y. 1874), p. 141, 142; Herzog, *Real-Encyclop.* xiii, 620-647; Hahnenfeld, *Die religiöse Bewegung zu Königsberg* (Leipsic, 1858). (J. P. L.)

School occurs in the A. V. but once (Acts xix, 9) as the rendering of the Greek σχολή (from which the English word is derived), meaning originally *leisure*; hence, a place of tuition. See TYRANNUS.

School Brothers and Sisters, collective names of numerous associations in the Roman Catholic Church, devoted to the education of the young. The first (the

Ursulines) were established at Brescia, 1537. See IGNORANTINES.

1. *School Brothers*.—In the present article only those congregations are mentioned whose members are not priests. The most important school brotherhoods are: 1. The "Brethren of the Christian Schools," founded by Jean Baptiste de la Salle. 2. The "Christian Brothers," founded by Rev. E. Rice, at Waterford, Ireland. These have their central house and superior-general in Dublin, and numerous establishments in Great Britain, Ireland, and the British colonies. 3. The "Brothers Marists," or "Christian Brothers of the Society of Mary," founded at Bordeaux, France, in 1817, by abbé Guillaume Joseph Cheminade; approved by pope Gregory XVI in 1839. The society was introduced into the United States by archbishop Purcell in 1849, and had in 1874 23 establishments in Ohio, Illinois, New York, Pennsylvania, Maryland, Louisiana, and Texas. 4. The "Lamennaisian Brothers," or "Congregation of Christian Instruction," founded in Brittany, in 1820, by abbé Jean de la Menais. They reckoned in 1875 about 800 members and 150 establishments in France. 5. The "Brothers of the Sacred Heart of Jesus and Mary," founded in 1821 at Le Puy, France, by abbé Coindrin. They started in the United States at Mobile in 1847, and in 1874 had establishments in Mississippi, New Orleans, Kentucky, and Indiana. 6. The "Xaverian Brothers," founded at Bruges, Belgium, in 1839, by Théodore Jacques Ryken. They were especially intended to labor in the United States, and were introduced by archbishop Spaulding into Louisville in 1854. In 1875 they had six schools there, one in Baltimore, and the St. Mary's Industrial School for Boys near the city. 7. The "Brothers of Charity," founded in Belgium in 1809, by canon P. Priest, for the education of blind and deaf mutes and training of orphans. In January, 1874, they took charge of the Industrial School of the Angel Guardian in Boston, Mass.

II. *School Sisters*.—The following are the most important of these congregations: 1. The "Ursulines" (q. v.). 2. The "Sisters of the Visitation of Our Lady," founded at Annecy, Savoy, in 1610, by St. Francis of Sales and St. Jeanne Françoise de Chantal. In 1641, at the death of the latter, the order numbered 87 establishments, and in 1700 160 establishments, with 6600 members. It had one establishment in the United States in Washington, in 1808; and in 1890 others in Maryland, Virginia, West Virginia, Kentucky, New York, Pennsylvania, Delaware, Wisconsin, and Minnesota. It was

School Brother, in Travelling Dress.

School Sister, in Outdoor Dress.

first approved by pope Urban VIII in 1626. 3. The "Sisters of Notre Dame." See NOTRE DAME, CONGREGATION OF. 4. "Sisters of Notre Dame de Namur," founded at Amiens, France, in 1804, by père Joseph Désiré Varin, Julie Billiart, and Marie Louise Françoise Blin de Bourdon, and transferred to Namur, Belgium, in 1809. Its object was to educate girls of the middle class; and it was approved by pope Gregory XVI June 28, 1844. It spread rapidly through Belgium, France, Great Britain, and Ireland; and the English government intrusted to the order the direction of normal schools for Roman pupil-teachers. They were called to Cincinnati in 1840 by archbishop Purcell, to Oregon by archbishop Blanchet in 1843, to California in 1851, and to Guatemala in 1859. In 1871 they had 82 establishments (20 in the United States) and 26,000 pupils. 5. "Ladies of the Sacred Heart." See SACRED HEART, LADIES OF THE. These have as their primary object the teaching of young girls; others add the care of orphans, visitation of sick and poor, and the direction of hospitals. Such are (1) the "Ladies of the Incarnate Word," founded in 1625 by Jeanne Marie Chézard de Matel, and approved by Urban VIII in 1633. They have many establishments in France, and eight in Texas. (2) The "Poor Handmaids of Jesus Christ," founded Aug. 15, 1849, at Dernbach, Nassau, by Katharine Kaspar; approved by Pius IX in 1860, and confirmed in 1870. They first established themselves in this country at Fort Wayne, Ind., August, 1868. In 1875 they numbered 45 sisters and five houses. (3) The "Sisters of Our Lady of Charity," or "Eudist Sisters," founded at Caen, Normandy, by abbé Jean Eudes in 1641. In 1835 they became known as the "House of the Good Shepherd." See SHEPHERD, HOUSE OF THE GOOD. (4) The "Presentation Nuns," founded at Cork, Ireland, in 1777, by Miss Nano Nagle, for visiting and teaching, but have since become strictly cloistered. Their first establishment in America was at St. John's, Newfoundland; and in the United States, in New York city, Sept. 8, 1874. (5) "Sisters of Mercy" (q. v.). (6) "Sisters of Charity." See CHARITY, SISTERS OF. (7) The "Gray Nuns," or "Sisters of Charity of Montreal." See CHARITY, SISTERS OF. (8) "Sisters of St. Joseph" (q. v.). See *Appletons' Cyclop.* s. v.; Barnum, *Romanism as it is*.

School, Sunday. See SUNDAY-SCHOOL.

Schoolmaster is the inexact rendering in Gal. iii, 24, 25 of *παιδαγωγός* ("instructor," 1 Cor. iv, 15), which does not signify a *paedagogue* in the modern sense, but a person, usually a slave or freedman, to whose care the boys of a family were anciently committed at the age of six or seven years, who watched over their physical and moral training and accompanied them to the public schools and elsewhere, or provided them with teachers (*παιδομαθεῖς*, Quintilian, i, 11), but did not himself instruct them. See Smith, *Dict. of Class. Antiq.* s. v. "Paedagogue."

Schoolmen. See SCHOLASTICISM.

Schools, ALEXANDRIAN. See ALEXANDRIAN SCHOOLS.

Schools, CHRISTIAN. At a very early period, schools were established in connection with the churches; and if no building was provided for this purpose, the schools were taught in the baptistry and the vestry. This is evident from the observation which Socrates makes upon the education of Julian the Apostate—"that in his youth he frequented the church, where, in those days, the schools were kept." He speaks of the schools of grammar and rhetoric, which, it seems, were then taught at Constantinople in some apartment belonging to the church. Catechetical and charity schools were also established, especially for instruction in scriptural knowledge. The second Council of Châlons, in 813, enacted that bishops should set up schools to teach ordinary literature and a knowledge of the Scriptures. The

sixth General Council of Constantinople recommended the setting-up of charity schools in all the country churches. One of its canons is to this purpose: "that presbyters in country towns and villages should have schools to teach all such children as were sent to them, for which they should exact no reward nor take anything, except the parents of the children thought fit to make them any charitable present by way of voluntary oblation. Another of those canons speaks of schools in churches and monasteries, subject to the bishop's care and direction; from which we may conclude that schools were anciently very common appendants, both of cathedral and country churches" (Bingham, *Antiq. of the Christ. Church*, i, 314). See PÆDAGOGICS.

Schools, HEBREW. As this subject is intimately connected with the question of education and mode of instruction, which cannot be well dealt with separately, we propose to discuss historically these three topics in the present article, which is grounded upon the Biblical notices and the later Talmudical references. See EDUCATION.

I. *In the Patriarchal Period.*—We have nothing indicative of any place of public instruction in Scripture earlier than the Book of Samuel. But it is reasonable to suppose that, as the world became peopled, some measures were taken for the instruction of the young in all those parts of learning that were then known; and particularly among those persons who had the knowledge of the true God, who would naturally be anxious that the seeds of religious learning should be timely sown in their children's minds, and that they should be instructed in everything appertaining to divine rites and worship, of which we have reason to believe that singing and sacred poetry formed a large part. The Jewish doctors, indeed, have given us decided assertions on the subject of primitive teaching. They say that Adam instructed his posterity, and that Enoch succeeded him in the office. Enoch, we know, was a prophet (Jude 14); and in the later parts of the Old Test. we shall see that prophets were public instructors. The Arabians have traditions of Enoch under the name of Edris; that he wrote thirty volumes of revelations; that he was the first who knew astronomy and arithmetic, and wrote with the pen. Eusebius says he was the first who taught the knowledge of the stars, in which he was instructed by the angels of God [see ENOCH]; that on his translation to heaven he was succeeded by Noah, a preacher, or teacher, of righteousness (2 Pet. ii, 6). The next great public instructor, according to the rabbins, was Abraham, concerning whom Josephus relates (*Ant.* i, 8) that he taught the Egyptians astronomy and arithmetic. The ancient historians Berosus and Hecataeus commend his learning; and Eupolimus writes "that he was superior to all men in wisdom, and taught astronomy to the Phenicians." The Targum also countenances the idea that Abraham taught in Haran. Jacob, according to the Jewish doctors, devoted himself to teaching instead of living the life of a hunter, like Esau; for (Gen. xxv, 27) "he was a plain man, dwelling in tents," is expressed by the Targums "he was a perfect man, a minister of the house of doctrine" (i. e. a school of instruction); but all this is mere fancy.

II. *From the Exode to the Captivity.*—Being under a theocracy, and engaged almost exclusively in pastoral and agricultural pursuits, it was most important that the Hebrews, in the early stages of their existence, should educate their youth in a pre-eminently religious, practical, and simple manner. The parents, upon whom the education of the children at first devolved, were therefore strictly enjoined to instruct their offspring in the precepts of the law, in the fear of God (Deut. iv, 9, 10; xxxi, 13; xxxii, 46), and in the symbols which represented the dealings of Providence with their nation in past days, and which were evidently designed to excite the curiosity of the children and to elicit inquiry, thus furnishing the parents with pictorial illustrations to fa-

cillitate the education of those committed to their care (Exod. xii, 26, 27; xiii, 8, 14, 15; Deut. vi, 8, 9, 20, etc.). This work of education was not to be put off for certain occasions, but was to be prosecuted at all times; no opportunity was to be lost. The father was enjoined, in sitting down with his family at the table, at home, abroad, before retiring in the evening, and after getting up in the morning, to train his children in the nurture and admonition of the Lord (ver. 7). The law of God powerfully supported the authority of parents in this task by the injunction of filial obedience contained in the decalogue, as well as by the heavy punishment inflicted upon refractory children (Exod. xx, 12; xxi, 15; Lev. xx, 9; Deut. xxi, 18-21). Still the rigor of parental authority was not to be the sole operative power in the education of children. Parents are reminded that their example may lead their children to happiness or misery (Exod. xx, 5, 6; Deut. iv, 10; v, 9; xxx, 19; xxxii, 46, 47). The force of example in the education of children is most beautifully described in the praise of a royal mother who, with "the law of love upon her tongue," instilled noble sentiments into the heart of her children (Prov. xxxi, 1-9, 25); and such loving words are represented as producing an indelible impression in the picture of a son who, with pious gratitude, dwells upon the wholesome lessons which his father imparted to him in early youth (iv, 3, etc.). Parents are, moreover, advised not to adopt the same indiscriminate process of teaching with all children, but to adapt their instruction to every youth (על פי דרכו) according to his age and inclination, so that he may abide thereby (xxii, 6).

That reading and writing must have formed part of education from the very settlement in Palestine is evident from the fact that the Israelites were commanded to write the precepts of the law upon the door-posts and gates of their respective houses [see MEZUSAH], in order to be continually reminded of their obligations to their Creator (Deut. vi, 9; xx, 20). They were, moreover, enjoined to write the injunctions upon great stones (באריז) very plainly, immediately upon their crossing the Jordan (xxvii, 2-8), so that they might easily be read by every Israelite. Now these admonitions unquestionably presuppose that the people at large could read plain writing; that the deciphering of these memorials was a religious duty; and that it must, therefore, have formed an essential part in the strictly religious education of children. Besides, the manner in which some parts of the sacred oracles were written clearly indicates that the inspired writers reckoned upon the ability of the people to read. Thus the frequent play upon words, as, for instance, in Gen. vi, 8, where "Noah found favor," is obtained by a transposition of the letters in the name נח into חן; Gen. xxxviii, 7, where "Er . . . was wicked" is obtained by a transposition of the letters in the name ער into רע; the alphabetical portions of the Old Test. (Psa. ix, x, xxv, xxxiv, xxxviii, cxi, cxii, cxix, cxlv; Prov. xxxi, 10, etc.; the Lam.), which were intended to assist the memory and mark the gradation of ideas; the substitution of ששך for בבל (Jer. xxv, 26; li, 4), קמר for לב קמר (li, 1), by taking the letters of the alphabet in their reverse order, would have been utterly useless and most unintelligible had not the people for whom they were intended been able to read. If we bear in mind that the understanding of the sacred oracles was not the peculiar prerogative of the priestly caste, but was enjoined upon every Israelite, it becomes self-evident that the knowledge of reading and writing, which, as we have seen, is so inseparable from the understanding of the Scriptures, must have formed a prominent part in the education of children whose sole training was the understanding of the Scriptures. For the same reason arithmetic must have been taught; as the days of the week, the months, the festivals, etc., were not designated by proper names, but

by numerals. The numbers occurring in the Old Testament reach to hundreds of thousands; and we have, moreover, instances of addition (Numb. i, 22, etc.; xxvi, 7, etc.), subtraction (Lev. xxv, 27; xxviii, 18; Numb. iii, 19, 43, 46), multiplication (Lev. v, 8; xxvii, 16-18; Numb. iii, 46-50), and division (Lev. xxv, 27-50). In fact, every art or science which occurs or is alluded to in the Old Testament, and upon the understanding of which depended the understanding of the Scriptures, must to some extent have formed a part of the strictly religious Jewish education.

We have already seen that the education of the children devolved upon the parents. They were the teachers in ordinary cases. This natural duty must have been a pleasant task, a welcome occupation, and a pastime to a people who led a rural life, and whose Sabbaths and festivals freed them from labor a sixth part of the year. See FESTIVAL. In these leisure hours the parents, who were strictly forbidden to engage in any secular work, were in constant contact with their children; and the many symbols, rites, and ceremonies on those occasions were used by them as so many illustrated narratives of the dealings of God. We need, therefore, not wonder that the name *school* does not occur in the Bible previous to the Babylonian captivity; before the Jews were entangled in foreign affairs; before commercial transactions with other nations and other matters had taken so many of the people away from their homes and deprived their children of their natural teachers. The traditional opinion that by שבת חזכמני (2 Sam. xxxiii, 8) is meant a sort of academy (the Midrash, the Chaldee Paraphrase, Kimchi, etc.), or that דלחזרי (Prov. viii, 34) denotes בית המדרש (see Rashi, *ad loc.*), is purely gratuitous.

But though there were no national or elementary schools before the exile, there were cases in which professional teachers had to be resorted to, e. g. when the high position or official duties of the parents rendered parental teaching impossible, or when the parents were in any way incapacitated, when the child's abilities to learn surpassed the father's capabilities to teach, or where the son was preparing himself for a vocation different from that of his father. For such exceptional cases teachers existed from a very early period, as we have seen above. We find that Bezaleel and Aholiab were qualified by God as teachers (בלעזר ואליהור) in certain departments. The Psalmist speaks of his having had many teachers (מכל מלמדי השכלתי [cxix, 99]). Both teachers and pupils are mentioned in connection with the temple choir (1 Chron. xv, 22; xxv, 8); and the prophets, who, by virtue of their superior piety, high attainments, large acquaintance with the political affairs of the world, delivered public lectures on the festivals (2 Kings iv, 22, 23), instructed young men who aspired to a better education in order to fit themselves for public service (1 Sam. x, 5, 10, etc.; 2 Kings ii, 3, etc.; iv, 38, etc.; vi, 1, etc.).

As for the so-called *school of prophets*, no such term occurs in the Old Testament. The institution, however, is substantially referred to in several passages which speak of the "sons of the prophets" (1 Kings xx, 35; 2 Kings ii, 5, etc.), showing some kind of a college for the instruction of the prophetic order from the time of Samuel onward. The intimations on the subject are, indeed, obscure, yet sufficiently clear to warrant the general belief in their existence. In later times they were doubtless merged in the regular synagogical schools referred to below. See PROPHETS, SONS OF.

III. *From the Babylonian Captivity to the Close of the Talmud.*—A new epoch in the education of the Jews began with their return from Babylon. In the captivity, the exiled Jews had to a great extent forgotten their vernacular Hebrew, and they became incompetent to understand their sacred oracles. Ezra, the restorer of the law, as he is called, found it therefore necessary,

immediately on their return to Jerusalem, to gather around him those who were skilled in the law, and with their assistance trained a number of public teachers. The less distinguished of these teachers went into the provincial towns of Judea, gathered disciples, and formed synagogues; while the more accomplished of them remained in Jerusalem, became members of the Great Synagogue, and collected large numbers of young men, whom they instructed in all things appertaining to the law, in the prophets, and in the sayings of the sages of old (Ecclus. ii, 9-11; Mishna, *Aboth*, i, 1). Scrolls were given to children upon which were written passages of Scripture, such as *Shema* (i. e. Deut. vi, 4), or the *Hallel* (i. e. Ps. cxiv-cxviii, cxxxvi), the history of the creation to the deluge (Gen. i-viii, 1), or Lev. i, 18 (comp. Jerusalem Talmud, *Megilla*, iii, 1; *Gittin*, 60 a; *Sopherim*, v, 9). The course of study pursued in the metropolis was more extensive (Prolog. to Ecclus. and Ecclus. xxxviii, 24, etc.; xxxix, 1, etc.), that of provincial towns more limited, while the education of the small and more remote places or villages almost exclusively depended upon what the inhabitants learned when they went up to Jerusalem to celebrate the festivals, and was therefore very insignificant. Hence the phrase *כֹּהֵן הָאֶרֶץ*, *country people*, came to denote the *uneducated*, the *illiterate*; just as *paganus*, or *pagan*, a countryman or villager, is for a similar reason used for *heathen*; while *urbanus*, *urbane*, or *an inhabitant of a city*, denotes an *educated man*.

The schools now began to increase in importance; and the intercourse of the Jews with the Babylonians, the Persians, and the Greeks widened their notions of education, and made them study foreign languages and literature and Hebraize their philosophy. The Essenes, who found it necessary to separate themselves from the nation because of their foreign innovations, also devoted themselves to the education of the children; but their instruction was confined to the divine law and to morals (Josephus, *War*, xi, 8, 12). See *ESSENES*. Simon ben-Shetach (B.C. 80) has the merit of having introduced superior schools into every large provincial town, and ordained that all the youths from the age of sixteen should visit them (Jerusalem *Kethuboth*, viii, 11), introducing government education. So popular did these schools become that while in the pre-exilian period the very name of schools did not exist, we now find in a very short time no less than eleven different expressions for school, e. g. *אֵלֶּיֶם* = *αἵετος*, or *אֵלֶּיֶם* = *αἵετος* (*Midrash Coh*. 91); *אֵסְכֹלָה*, or *אֵסְכֹלָה* = *αἵετος* (*Midrash Shir Hashir*, 15 a); *בֵּית מִדְרָשׁ*, or more frequently *בֵּית הַמִּדְרָשׁ* (*Yebam*. 24 b; *Aboth*, v, 14); *בֵּית אֹלֶפֶן*, *house of learning* (Jonath. on *Exod.* xxxiii, 7); *בֵּית הַסֵּפֶר*, *the house of books* (*Midrash Echa*, 70 b); *בֵּית סוֹפֵר*, *the house of the teacher* (*ibid.* 77 b); *בֵּית רַבֵּן*, *the house of the master* (*Baba Bathra*, 21 a); *בֵּית תַּלְמוּד*, *the house of instruction* (*Gittin*, 58 a); *יִשְׁבֵּיהָ*, or *מִיִּבְתָּהָ*, *the seat*, i. e. where the disciples sat at the feet of their master; *כֶּרֶם*, *the vineyard* (Rashi on *Yebam*. 42 b); and *סִדְרָא*, *an array*, where the disciples were arrayed according to their seniority and acquisitions (*Cholin*, 173 b). The etymologies of some of these words, and the signification of the others, give us in a very striking manner the progressive history of Jewish education, and tell us what foreign elements were introduced into Jewish pedagogy. Some idea may be formed of the deep root juvenile education had struck in the hearts of the Jews from the following declaration in the Talmud: "The world is preserved by the breath of the children in the schools;" "A town in which there is no school must perish;" "Jerusalem was destroyed because the education of children was neglected" (*Sabbath*, 119, b).

As the national education of this period is that which

the apostles and the first disciples of Christ received, and as this must be of the utmost importance and interest to Christians of the present day, we shall now briefly state what the Talmud and the Midrashim consider to constitute the proper education of a respectable Jew, and give their notions of schools and the mode of instruction. We must begin with the schools. A school or teacher was required for every twenty-five children; when a community had only forty children, they might have one master and an assistant (*Baba Bathra*, 21 a). Schools must neither be established in the most densely crowded parts of the town (*Pesachim*, 112 a), nor near a river which has to be crossed by an insecure bridge (*Baba Bathra*, 21), so as not to endanger the health or lives of the children. The proper age for a boy to go to school is six years (*Kethuboth*, 50 a); before that time the father must instruct his son. Thus it is related that R. Chija ben-Abba would never eat his breakfast before he had repeated with his son the lesson which he gave him on the previous day, and taught him at least one new verse (*Kiddush*. 30 a). At the age of five a boy had to study the Bible, at ten the Mishna, and at fifteen the Talmud (*Aboth*, v, 21). Great care was taken that the books from which instruction was imparted should be correctly written (*Pesachim*, 112 a), and that the lessons taught, especially from the Bible, should be in harmony with the capacities and inclinations of the children (*Aboda Zara*, 19 a; *Berach*. 63 a), practical (*Kiddush*. 40 b), few at a time, but weighty (*Vuykra Rabba*, ciii). The parents never ceased to watch that their children should be in the class at the proper time. We are told that Rabba ben-Huna never partook of his breakfast till he had taken his son to school (*Kiddush*. 30 a). Josephus, therefore, did not at all exaggerate when, writing against Apion, he said, "Our principal care of all is to educate our children" (*Apion*, i, 12). "If any of us is asked about our laws, he will more readily tell them all than he will tell his own name, and this in consequence of our having learned them as soon as ever we became sensible of anything, and of our having them, as it were, engraven on our souls. Our transgressors of them are but few, and it is impossible, when any do offend, to escape punishment" (*ibid.* ii, 19). In a similar manner Philo expresses himself: "The Jews looking upon their laws as oracles directly given to them by God himself, and having been instructed in this doctrine from their very earliest infancy, they bear in their souls the images of the commandments contained in these laws as sacred" (*Legat. ad Cajum*, § 31, Mang. ii, 577). "They are taught, in a manner, from their very swaddling-clothes, by their parents and teachers and instructors, and even before that by their holy laws, and also by the unwritten maxims and customs, to believe that there is but one God—their Father and the Creator of the world" (*ibid.* § 16, Mang. ii, 562). Of Timothy we are told that from a child he knew the Holy Scriptures (*ἀπὸ βρέθους τὰ ἐπὶ γράμμαρα οἶδας* [2 Tim. iii, 15]); and a similar statement we find in the Apocryphal book *Susannah*, ver. 3. From all this we can presume that the education and instruction of the children at first devolved upon the parents, who were the teachers, and who in their leisure hours, especially on Sabbaths and festivals, illustrated the many symbols, rites, and ceremonies which were used on different occasions. The importance of education having now become more and more realized, the foundation of schools became more and more a matter of necessity; and the man who immortalized his name by establishing elementary schools was Jesus of Gimlo, who fell by the hands of the zealots during the siege of Jerusalem. After that time children were not allowed to go to school from one city into another; the inhabitants of each city could be obliged to have a school and a teacher (*Baba Bathra*, 21 a), and it was even forbidden to live in a city where there was no school (*Sanhedrin*, 17 a). The number of schools now increased, and flourished throughout the length and breadth of the

land; and though it seems exaggerated when the Talmud states that there were 400 elementary schools in Bechar, each having 400 teachers with 400 children each (*Gittin*, 58 b), and that there were 1000 pupils in the house of the father of Rabban Simeon ben-Gamaliel who were instructed in the Thora, or law, and in the Greek (*Baba Kama*, 83 a), it is certain that the number of schools, teachers, and pupils must have been large in every great place. Maimonides thus describes the school: "The teacher sat at the head, and the pupils surrounded him, as the crown the head, so that every one could see the teacher and hear his words. The teacher did not sit on a chair while the pupils sat on the ground, but all either sat on chairs or on the ground. Formerly it was customary for the teacher to sit and the pupil to stand; but shortly before the destruction of Jerusalem it was so arranged that both the teacher and scholar sat" (*Jad Hachazaka H. T. T.* iii, 2). No unmarried person could teach (*Kiddush*, 82 b), and no choleric person could be a teacher (*Aboth*, ii, 7). The teacher was to be respected by the pupil; yea, the latter was expected to show him greater respect than his own father, and to entertain for him a warmer attachment (*Aboth*, iv, 15; *Pesachim*, 22 b; *Sabbath*, 119 b; *Hora-goth*, 13 a; *Baba Metsia*, 33 a). But, on the other hand, the teacher was, both by word and example, to incite his pupils to everything good and noble; he was to endeavor to secure the confidence, the respect, and the affection, both of parents and children; the latter he was to treat rather with kindness than with rigor. As to the objects the teacher had to teach, the national literature of the people was the main object. As soon as the child could read, the teacher commenced reading Leviticus or Torah Cohanin, and the reason why this book was to be read first was because the little ones are innocent and pure, and the sacrifices symbolize purity, therefore "let the pure ones come and study the law of restoring purity by the sacrifice" (*Vayikra Rabba*, § vii). The curriculum in the study of the law being finished, that of the Mishna began, to be followed by that of the Gemara; the latter, however, belonged to the higher schools. Besides the national literature, languages were also taught, especially the Greek. Thus we read of Rabbi, who said, "What is the use of the Syriac language in Palestine? Let any one study either the Hebrew or the Greek" (*Gittin*, 28 b; *Sotah*, 49 a; *Baba Kama*, 82 b). Besides the linguistic studies, they also studied astronomy, mathematics, and natural sciences. It seems that gymnastic exercises also originally belonged to the curriculum, but were afterwards interdicted as leading to dangerous contact and assimilation with heathens (*Aboda Zara*, 18 b). Beating, if necessary, with a strap, never with a rod, was to be the principal means of correction; and an instance is mentioned where a teacher was deposed for too great severity. The alphabet was taught by drawing the letters on a board till the children remembered them. In reading, well-corrected books were to be used, and the child was to point to the words as he spelled them. The teacher was to make the lesson as plain as possible, and not to lose patience if it was not immediately understood. It was one of the principal duties of an instructor of youth to impress upon their minds and hearts the lessons of morality and chastity. To acquire fluency, pupils were to read aloud, and certain mnemonic rules were devised to facilitate the committing to memory. The number of hours during which junior classes were to be kept in school was limited. As the close air of the schoolroom might prove detrimental during the heat of the day, schools were closed between ten o'clock A.M. and three P.M. For similar reasons school-hours were limited to four hours a day during the period from the 17th Thamus to the 9th Ab, and the teacher forbidden to chastise his pupils during these months. The paramount importance which public instruction had assumed in the life of the nation, we can see from sayings like those above cited: "Jerusalem was destroyed because the instruc-

tion of the young was neglected" (*Sabbath*, 119 b); "The world is only saved by the breath of the school-children" (*ibid.*); "A town in which there is no school must perish" (*ibid.*). The higher schools, or "kallahs," met during certain months in the year only. Three weeks before the term, the dean prepared the students for the lectures to be delivered by the rector; and so arduous became the task, as the number of the disciples increased, that in time no less than seven deans had to be appointed. Yet the mode of teaching was not that of our modern universities. The professors did not deliver lectures which the disciples, like the student in *Faust*, could "comfortably take home in black and white." Here all was life, movement, debate. Question was met by counter-question; answers were given wrapped up in allegories or parables; the inquirer was led to deduce the questionable point for himself by analogy—the nearest approach to the Socratic method. The New Test. furnishes many specimens of this method of instruction. The extent of instruction imparted in these schools embraced almost all sciences preserved in the Talmud. An important part of education, as we shall more particularly see below, was the learning of a trade. Thus we find among the most celebrated "doctors" tentmakers, sandalmakers, weavers, carpenters, tanners, bakers, cooks.

Besides the elementary schools, which were chiefly intended for popular education, there were, as already intimated, also superior colleges, at first confined to Jerusalem, under the management of the presidents and vice-presidents of the Sanhedrim, the *Sopherim*, or "scribes" and "doctors," as they are called in the New Test., and members of the Sanhedrim, who made it one of their principal objects to train young men destined to become the teachers and judges of Israel, and the bearers of "the traditions of the fathers" (*Aboth*, i, 1). Gradually these academies were multiplied in the metropolis, and spread over all the countries where the Jews resided. Akbara, Lydda, Ushach, Sepphoris, Tiberias, Jabne, Nares, Nahardea, Machuza, Selki, Shakan-Zib (El-Sib), Pumbaditha, Sora, and Alexandria, in the process of time, became distinguished for their seats of learning. The following are the presidents and vice-presidents of the colleges which were the depositories of the traditions of the fathers and the supreme arbiters in the sphere of morals and education, together with the most distinguished masters and disciples under each presidency, both in Palestine and Babylon, to the close of the Talmud, in their chronological order (more briefly summarized in part under PUMBADITHA; SORA; etc.):

THE TANAIM EPOCH.

B.C.

	Simon the Just or Pious.....	300
	Antigonus of Soho.....	200-170
a	{ Jose ben-Joeser of Zereda, and Jose ben-Jochanan of Jerusalem, the first pair,	170-140
b	{ Jehoshuah ben-Perachja, and Natai of Arabela.....	140-110
c	{ Simon ben-Shetach, their pupil, and Jehudah ben-Tabai.....	110-65
d	{ Shemaja, and Abtalion.....	65-30
	Hillel I, the Great, the Babylonian, in whose family the presidency became hereditary for fifteen generations (A.D. 10-415). He was first with Menachem and then with Shammai, who founded a separate school.	30-A.D. 10
	The former was designated the school of Hillel, which had eighty disciples, called the elders of the house of Hillel, among whom were Jonathan ben-Uziel the Targumist, Dossa ben-Harchinas, Jonathan his brother, and Jochanan ben-Zakkai; while the latter was denominated the school of Shammai, the immediate disciples or elders of which were Baba ben-Buta, Dotal of Stome, and Zadok, the originator of the Zealots.	
	Simon ben-Hillel I.....	A.D. 10-30
	Gamaliel I, ben-Simon I, called Ha-Zaken the elder, the teacher of the apostle Paul.....	30-50
	Simon II, ben-Gamaliel I.....	50-70
	Jochanan ben-Zakkai, founder of the school of Jabne or Jamnia.....	65-50

Palestine.

A.D.

Gamaliel II, of Jabne, ben-Simon II, and Eleazar ben-Azariah, who was for a little time president in the place of Gamaliel. Here are to be mentioned Eliezer ben-Hyrkanus, brother-in-law of Gamaliel, and founder of the school at Lydda, which continued the only seat of learning in Southern Judæa for several centuries; Joshua ben-Chananja, who established a school at Bekein, in the valley between Jabne and Lydda; Ismael ben-Elieser, the founder of the school known by the name Be-R. Ismael; Aquila, the translator of the Bible; R. Ilai, R. Chaliphtha, Bar-Cochba, the false Messiah..... 50-116

Simon II, ben-Gamaliel II, and R. Nathan, vice-president, author of the Mishna or Tosephta which goes by his name, and of a commentary on *Aboth*. The distinguished men of this presidency are, R. Judah ben-Ilai, of Ushah; R. Jose ben-Chaliphtha, of Sepphoris, author of the history called *Seder Olam*; R. Jochanan, of Alexandria; R. Simon ben-Jochai, of Galilee, the reputed originator of the Cabala and author of the far-famed *Zohar*..... 140-163

Jehudah I, the Holy, Ha-Nasi, ben-Simon III, editor of the Mishna, and called *Rabbi*. His celebrated disciples, who also became heads of schools, were called *semi-Tanaim*, and perfected their master's work, the Mishna. These were R. Janai, whose school was at Akbara; R. Chija=Achija; Ushaja the elder, surnamed "the father of the Mishna;" and Abba Areka, surnamed *Rab*, the founder of the school at Pumbeditha..... 163-193

Gamaliel III, ben-Jehudah I, in whose presidency the college was transferred from Jabne to Tiberias..... 193-220

THE AMORAIM EPOCH.

Jehudah II, ben-Simon III, also called *Rabbi*, the teacher of Origen. The teachers of this period were, R. Chaninah, the most distinguished disciple of Jehudah I, who founded a school at Sepphoris; R. Simlai, the celebrated Haggadist, who reduced the law of Moses to 613 commandments; R. Jose of Maon; R. Chaggai, R. Jehudah ben-Nachmani, etc..... 220-270

Babylon.

A.D.

Nahardea, the centre of learning since the Babylonian exile, and the seat of the rector-general of all the Babylonian colleges. It was destroyed through the adventurer Papa ben-Nazar, in the year A.D. 259.

R. Chanina, nephew of R. Josuah, formed a college in Nachor-Pacor, in the neighborhood of Nahardea, of which he became president; and R. Nechanja or Achija was vice-president..... 138-140

R. Shila was the rector-general at Nahardea; R. Nathan, the last *Tana*, and R. Chija were both educated here. Abba Areka, who also was a student here and afterwards went to Palestine to finish his studies under Jehudah I, brought with him on his first return to Babylou (A.D. 189) the complete Mishna of his master..... cir. 140-190

Samuel the astronomer, also called Mar-Samuel, Arioch, and Jarchini, succeeded R. Shila as rector of the college at Nahardea..... 190-247

Abba Areka, surnamed *Rab*, having returned to his native place a second time, founded a school at Sora, which maintained its celebrity for nearly 800 years, and which attracted about 1200 students in the lifetime of its founder. He was the president of it twenty-eight years..... 219-247

Samuel Jarchini, rector of the college at Nahardea, is elected rector-general of all the schools in Babylou..... 247-257

R. Hana became rector-general. He had only 800 students, as, during his rectorate, R. Jehudah ben-Jecheskel founded a school at Pumbeditha, and R. Chasda founded another school at Sora, which attracted many of his disciples. Nahardea is destroyed (259); the students emigrate into the neighborhood of the Tigris and found a school..... 257-297

Tiberias.

A.D.

Sora.

A.D.

Pumbeditha.

A.D.

Gamaliel IV, ben-Jehudah II. 270-300
Jehudah III, ben-Gamaliel IV, 300-309

Chasda of Kaphri, founder of this school, is rector..... 298-309

R. Jehudah ben-Jesheskel, founder of the school at Pumbeditha, is elected rector-general of all the colleges, and officiates two years..... 297-299

Chasda of Kaphri, founder and rector of the school at Sora, is elected rector-general.... 299-309

Hillel II, ben-Jehudah III, introduced the new calendar, and is said by Epiphanius to have embraced Christianity. The distinguished teachers of this period were R. Jona, R. Jose, and Tanchuma ben-Abba, the renowned Haggadist and reputed author of the *Midrash Tanchuma*..... 330-365

Rabba ben-Huna, succeeded Chasda to the rectorcy, and when he died the college was without a rector for nearly fifty years..... 309-320

Rabba ben-Nachmani, who succeeded Chasda, revived the college to such a degree that he obtained 1200 students..... 309-330

Joseph ben-Chija the blind. He translated the prophets of the Old Test. into Chaldee 330-333

Abaji ben-Cajili, surnamed Nachmani, the nephew of Rabba, succeeded R. Joseph the blind..... 333-338

Rabba ben-Joseph, ben-Chama, who founded the school at Machuza, was elected rector after Abaji..... 338-352

Nachman ben-Isaac held the rectorate four years..... 352-356

Tiberias—continued.

A.D.

Gamaliel V, ben-Hillel II. The teachers of this period were R. Jeremiah, R. Jacob ben-Abba, etc.....	365-385
Jehudah IV, ben-Gamaliel V..	385-400

Gamaliel the last (בְּתַרְאָה), ben-Jehudah IV.....	400-425
---	---------

Sora—continued.

Ashi ben-Simai, surnamed Rabban (<i>our teacher</i>), resuscitated the college of Sora, and was its rector fifty-two years, during which time seven rectors died in Pumbeditha. Ashi immortalized his name by collecting the Babylonian Talmud.....	352-427
R. Jemar, or Mar-Jemar (contracted Maremar), succeeded R. Ashi as rector of the college, and officiated about five years.....	427-432
R. Idi ben-Abin, a disciple of R. Ashi, officiated as rector for twenty years.....	432-452
R. Nachman ben-Huna.....	452-455
Mar bar-R. Ashi, who continued collecting the Talmud, which his father began.....	455-468
Rabba Tusphan. Sora, where one of the oldest Jewish universities stood, was now destroyed by the Persian king Firuz.....	468-474
Rabina II, who, with R. Jose and his colleagues, completed the Talmud.....	468-540

Pumbeditha—continued.

A.D.

R. Chama of Nahardea, Nachman's successor, held the rectorate nineteen years.....	
R. Zebid ben-Ushaja.....	
R. Dimi ben-Chinena of Nahardea.....	
Raphrem ben-Papa.....	
R. Kahana. The celebrated men of this period were Mar-Sutra, Pheluna ben-Nathon, etc.....	
Mar-Sutra.....	
R. Asha ben-Raba.....	
R. Gebiha of Be-Katil.....	

R. Jose.....	
R. Samuel ben-Abahu.....	
R. Sama ben-Raba.....	
R. Rachamai.....	
R. Rephrem II.....	

At first the organization of these schools or colleges was very simple. Besides the president or rector, who was the chief teacher, and an assistant, there were no offices or ranks. Gradually, however, superior and subordinate ranks involuntarily developed themselves, and ultimately assumed the following form: The college, which met during certain months of the year, and was generally called *Methiba* (מֵתִיבָא), *seat of learning*, was presided over by the chief rabbi, who was called *Resh-methiba* (רֵאשׁ מֵתִיבָא), and was elected by the school. Next to this *Resh-methiba* or rector came the *Resh-kalla* (רֵאשׁ כְּלָא), *the chief of the assembly*, whose office it was to expound or simplify to the students, during the first three weeks of the session, the theme upon which the rector had determined to lecture. In later times there were seven *Rashe-kalloth* (רֵאשֵׁי כְּלָאִים), such interpreters, composed of the associates (חֲבֵרִים) and members of the Sanhedrim, varying in rank. The president or teacher occupied a raised seat, the interpreters sat next to the rector on lower seats, while the disciples sat below them at the feet of their teachers (Acts xii, 3).

The mode in which instruction was communicated was chiefly catechetical. After the master had delivered his dictum or theme, the disciples in turn asked different questions (Luke ii, 46), which he frequently answered by parables or counter-questions, a line of conduct also pursued by Christ in accordance with the custom of the time (comp. Matt. xxii, 17-22; Luke xx, 2-4, etc.). Sometimes the teacher introduced the subject by simply asking a question connected with the theme he proposed to propound; the replies given by the different disciples constituted the discussion, which the master at last terminated by declaring which of the answers was the most appropriate. Thus R. Jochanan ben-Zakkai (B.C. 30), on one occasion, wanted to inform his disciples what was the most desirable thing for man to get. He then asked them, "What is the best thing for man to possess?" One replied, "a kind nature;" another, "a good companion;" another, "a good neighbor;" another, "the power to foresee consequences;" while R. Eleazar said "a good heart." Whereupon R. Jochanan

remarked, "I prefer R. Eleazar's answer to you in all your answers are comprehended" (*Abot* i, 12). Who is not reminded thereby of the questions the Saviour to his disciples in Mark viii, 27-30?

Allegories, riddles, stories, etc., formed another part whereby instruction was communicated in these schools. The oppressive heat of the Eastern climate, which was especially felt in the crowded colleges, as we have seen, twelve hundred disciples were sometimes present, tended to make the students drowsy, and a hard subject was discussed. The wise teacher, therefore, when he perceived that the attention began to flag, at once introduced a merry anecdote or a moral story, or propounded a ludicrous riddle, which immediately aroused the disciples and enabled them to go on with his theme. Hence the abundance of sublime and ridiculous parables and stories discussed throughout the Talmud and Midrashim which were these lectures; and hence, also, the parabolic method of teaching adopted by our Saviour.

The extent of instruction, or what constituted the curriculum in these schools, can hardly be defined. An assiduous reader will see from a most cursory glance of the discussions recorded in the Talmud that a wide range of subjects were brought forward in these schools. Theology, philosophy, jurisprudence, astronomy, medicine, botany, geography, arithmetic, agriculture, were all themes which alternately occupied the attention of masters and disciples. In fact, the Talmud, which has preserved the topics discussed in the schools, is an encyclopædia of all the sciences of that time. It shows that in many departments of science the Jewish teachers have anticipated modern discoveries. To do justice to the subject would require far more space than the limits of this article allow to quote instances in confirmation of the fact. We can therefore only refer the reader to the treatises mentioned below.

Besides the abstruse theological and scientific subjects, etiquette occupied a prominent part in the curriculum of the college, and was regarded as a fundamental part of education. The most minute details were given as to the behavior of students toward their parents, their teachers, their superiors in age

Every one met in the street must be saluted (*Aboth*, iv, 10). Not to respond to a salutation is characterized as committing a robbery (*Berach*, 6 b). An ordinary man is to be saluted with the words, "Peace be with thee!" a teacher, "Peace be with thee, my teacher and my master!" (Rashi on *Berach*, 27 b); and a king, "Peace be with thee, my king! peace!" (*Gittin*, 62 a). Salutations in the house of prayer are not allowed (*Derech Eretz*, 10). One must rise before a learned man (*Kethuboth*, 103 b), and before the hoary head, even if he be a non-Israelite (*Kiddush*, 33 b). When three persons walk together, the superior is to walk in the middle (*Eruv*, 54 b); the teacher must always be on the right of the pupil in walking (*Yoma*, 37 a). One must not leave a friend without asking his permission (*Derech Eretz*, 2); when leaving one's teacher the disciple must say, "I am dismissed;" whereupon the response is, "Depart in peace!" (*Berach*, 64 a). Never enter a house suddenly and without notice (*Kethuboth*, 62 b); nor sit down before the superior has seated himself (*Jerus. Kethuboth*, 25); nor lean in the company of superiors (*Derech Eretz*, § vi). "Seven things are seen in the conduct of an educated man, and seven in the behavior of an uneducated person: 1. An educated man will be quiet in the presence of one more educated than himself; 2. Will not interrupt any one speaking; 3. Will not give a hasty reply; 4. Will ask appropriate questions; 5. Will give suitable answers; 6. Will answer the first thing first, and the last thing last; and 7. Will candidly say when he does not know anything. The reverse of these things will be seen in the uneducated" (*Aboth*, v, 10).

Another most essential part of education was the learning of a trade. Thus R. Gamaliel declares, "learning, no matter of what kind, if unaccompanied by a trade, ends in nothing and leads to sin" (*Aboth*, ii, 2). R. Judah ben-Ilai, called "the wise," "the first orator," had a trade, and used to say, "labor honors the laborer" (*Nedarim*, 49 b). R. Ismael, the great astronomer and powerful opponent of Gamaliel II, was a needle-maker (*Jerus. Berach*, iv, 1); R. Jose ben-Chalapha, of Sephoris, was a tanner (*Sabbath*, 49 b). These rabbins, like the apostle Paul, gloried in the fact that they could maintain themselves and teach independently of payment, and hence took a pride in their respective trades, which were attached to their names, viz., rabbi Johanan, the shoemaker; rabbi Simon, the weaver; rabbi Joseph, the carpenter. This will account for the apparent anomaly that the apostle Paul, a thorough student, should have been a tent-maker.

Though female education was necessarily limited, owing to the position which women occupied in the East, yet it must not be supposed that it was altogether neglected. The fact that mothers had to take part in the education of their children would of itself show that their own education must have been attended to. We are, however, not confined to this inference. The 31st chapter of Proverbs gives us a description of what was the education of a woman and a housewife in the Old Test. In the Talmud we find the daughters of R. Samuel were even first-rate students of the *Halacha* (*Kethuboth*, 23 a; *Jerus. Ibid.*, ii, 6). R. Johanan ben-Napucha not only urges the study of Greek as a necessary part of a man's education, but recommends it also for women as a desirable accomplishment (*Jerus. Sota*, s. f.). To show the desirableness of uniting with Hebrew the study of Greek, this celebrated rabbi, in accordance with the ancient practice, illustrates it by a passage of Scripture (*Gen. ix, 23*): "Because the two sons of Noah, Shem and Japheth, unitedly covered the nakedness of their father with one garment; Shem (representing the Jews) obtained the fringed garment, the *Talith*; Japheth (representing the Greeks) got the philosopher's garment, i. e. *Pallium*," which ought to be united again (*Midrash Rabba* [Gen. xxxvi]). Hence R. Abbahu was not only himself a consummate Greek scholar, but had his daughter instructed in this classical language, since he regarded it as necessary to a good female education, and quot-

ed R. Johanan as an authority upon this subject (*Jerus. Sabbath*, iii, 1; *Sota*, s. f.).

V. *Literature*.—The best works upon this subject are the Talmud and Midrashim; but as these are not generally accessible, we mention the masterly works of Zunz, *Die gottesdienstlichen Vorträge der Juden* (Berlin, 1832); Frankel, *Der gerichtliche Beweis* (ibid. 1846); *Monatsschrift*, i, 509, etc.; Wunderbar, *Biblisches-talmudische Medicin* (Riga and Leips. 1850-60); Lewysohn, *Die Zoologie des Talmuds* (Frankfort-on-the-Main, 1858); Grätz, *Geschichte der Juden*, vols. iii and iv; Ben-Chananja, i, 417, 460, 512; ii, 66, 167, 210, 258; iii, 539; Edersheim, *History of the Jewish Nation*, p. 297 sq.; Schürer, *Lehrbuch der neutestamentlichen Zeitgeschichte*, p. 466 sq.; Hartmann, *Die enge Verbindung des A. T. mit dem Neuen*, p. 377-384; Gfrörer, *Jahrhundert des Heils*, i, 156-192; Van Gelder, *Die Volksschule des jüdischen Alterthums nach talmudischen und rabbinischen Quellen* (Berl. 1872); Marcus, *Zur Schul-Pädagogik des Talmud* (ibid. 1866).

There are numerous monographs on the subject: Held, *De Jud. Scholis* (Norimb. 1664); Heubner, *De Academiis Hebræor.* (Vitemb. 1703); Lund, *De Scholis et Academiis Heb.* (Upsal. 1707); Reineccius, *De Scholis Hebr.* (Weissenb. 1722); Sennert, *De Scholis et Academiis Hebr.* in his *Heptas Exercit.* (Vitemb. 1657); Sgambalo, *De Acad. Jud.* (Neap. 1703); Weisner, *De Scholis et Academiis Hebr.* (Heidelb. 1782); Zorn, *De Scholis Jud.* (Sedin. 1716); and others cited by Volbeding, *Index Program.* p. 138. On the *Schools of the Prophets*: Hernig, *Von den Schulen d. Proph.* (Bresl. 1777); Winckler, *Vindicatio Scholæ Samuelis* (Hildesh. 1754); Silberrod, *De Prophetarum Filiis* (Jen. 1710). See PROPHETS, SCHOOLS OF.

SCHOOLS, PARISH. See PARISH SCHOOLS.

SCHOOLS, SINGING. The high estimation in which singers were held in the ancient Church appears from the institution of schools for their instruction and training, and the great attention which was paid to these schools and their presidents. Such schools were established as early as the 6th century, and became common in various parts of Europe, particularly in France and Germany. The most celebrated was that founded at Rome by Gregory the Great, which was the model of many others afterwards established. From these schools originated the famous Gregorian chant, a plain system of church music, which the choir and people sang in unison. The prior or principal of these schools was a man of considerable dignity and influence in the Church. The name of this officer at Rome was *archicantor ecclesiæ Romanæ*, and elsewhere *primicerius* (or prior) *scholæ cantorum*. See Coleman, *Christ. Antig.* p. 124; Riddle, *Christ. Antig.* p. 307. See SINGING.

Schoonmaker, Henricus, a (Dutch) Reformed minister, was born at Rochester, Ulster Co., N. Y., in 1739. He was converted early in life under the ministry of the Rev. Henricus Frelinghuysen, and studied theology with the Rev. John H. Goetschius, who became his father-in-law. Dr. Schoonmaker was one of the first ministers of the Reformed Church who were licensed by the cætus, independently of the Church in Holland. He was called immediately (1763) to the churches of Poughkeepsie and Fishkill. When the ministers arrived to ordain him, they found the church doors barred against them by the Conferentie party, and the service was conducted under the shade of a large tree in a wagon, in which upon his knees the candidate took his vows in presence of a large congregation. A ministry thus begun was not likely to be fruitless. His labors were greatly blessed, notwithstanding the opposition to which he was constantly exposed. In 1774 he removed to Acquackanonck (now Passaic), N. J., and subsequently gave a portion of his services to the neighboring church of Toteroo (now Paterson). In 1816 he resigned his charge, and died in 1820, having survived nearly all of his contemporaries. His grateful people continued his salary for life. He was the last

but one of the old Dutch clergy who preached only in the language of Holland. Dr. Livingston pronounced him the most eloquent preacher in that tongue whom he had ever heard in this country. He was always popular in the pulpit, and his style was nervous, eloquent, and powerful. His life was blameless, and his ministry of over half a century was full of good fruits. See Sprague, *Annals of the Amer. Pulpit*; Kip, *Historical Discourse*. (W. J. R. T.)

Schoonmaker, Jacob, D.D., a son of the foregoing, was born May 11, 1777, at Acquackanonck (now Passaic), N. J. He graduated at Columbia College in 1799, and pursued his theological studies under Drs. Solomon Froeligh and John H. Livingston. He was licensed in 1801, and the next year became the pastor of the united churches of Jamaica and Newtown, L. I. This associate relation lasted until 1849, when the Newtown church became independent. He remained pastor at Jamaica one year longer, when on Aug. 6, 1850, he preached his farewell sermon, and then retired from the active ministry on account of age and infirmities. He died April 10, 1852, finishing his course with joy. Dr. Schoonmaker was a large, portly man, with a very benevolent countenance and a sweet savor of cheerful piety in his whole aspect and demeanor. He was dignified, courteous, discreet—a faithful preacher, a devoted pastor, a sound evangelical theologian of the Calvinistic school—an active supporter of the educational institutions and benevolent agencies of the Church, and a workman who needed not to be ashamed. He was a father among his people, and, while cherishing the most profound attachment to his own Church, was truly catholic in feeling towards all who love Christ. See Sprague, *Annals of the Amer. Pulpit*, vol. ix. (W. J. R. T.)

Schoonmaker, Martinus, a minister of the (Dutch) Reformed Church, was born at Rochester, Ulster Co., N. Y., in 1737. He studied under Goetschius and Marinus, and was licensed to preach in 1765. His ministry was spent on Long Island, embracing the churches of Brooklyn, Flatbush, New Utrecht, Flatlands, Bushwick, and Gravesend. From 1765 to 1783 Harlem was also included in his extensive bishopric. All of these have long been separate and important churches. His labors were necessarily very arduous, but he bore them with untiring zeal and energy down to his old age, which was so vigorous that at fourscore his sight, hearing, and other faculties were as perfect as in former years. He was universally beloved and revered, without an enemy, and yet living in troublous times. He resided at Flatbush, while the care of all the churches of Kings County came upon him daily. During the Revolutionary war he was an ardent patriot, and it is related that on his personal word and statement he secured from the Congress in session at Harlem the release of a person who was suspected and imprisoned as a Tory. He preached only in the Holland language. His memory is held in high esteem as one of the fathers of the Church and a relic of the old race of venerable Dutch dominies. He died in 1824. See Corwin, *Manual of the Reformed Church*. (W. J. R. T.)

Schöpf, JOSEPH W., a Lutheran theologian, was born at Chemnitz, April 12, 1793, and died July 15, 1831, at Dresden. He published, *Die symbolischen Bücher der evangelisch-lutherischen Kirche, deutsch mit Anmerkungen und Erklärungen*, etc. (Leips. 1828, 2 vols.)—*Die Widerlegung der augsburgischen Confession*, etc. (ibid. 1830):—*Der Geistliche und unsere Zeit* (Dresden, 1831). See Zuchold, *Bibliotheca Theol.* ii, 1173; Winer, *Handbuch der theol. Literatur*. (B. P.)

Schotanus, CHRISTIAN, a Dutch savant and historian, was born at Scheng, near Franeker, Aug. 16, 1603. He entered the Church, and in 1627 was pastor in his native village. He remained there till 1629, when he removed to Cornjum, where he spent ten years. At the end of that time he became professor of Greek in the Academy of Franeker, and subsequently added ec-

clesiastical history to his other labors. His death, which occurred Nov. 12, 1671, was caused by extreme cold and exposure. His principal works are, *Notæ ad Evangelia et Epistolas* (Leeuwarden, 1647, 12mo):—*Catechesis* (Franeker, 1653):—*Collegium Miscellaneorum Theologicorum* (ibid. 1654, 12mo):—*Beschryving van Friesland* (Leeuwarden, 1656-64, with plates and maps):—*Bibliotheca Historiæ Sacræ V. T.* (Franeker, 1662-64, 2 vols. fol.):—*Hæctas Disputationum Theologicarum* (ibid. 1664, 4to):—and an *Ecclesiastical and Civil History of Friesland* (down to 1558).—Hoefer, *Nouv. Biog. Générale*, s. v.

Schott, Christian Heinrich, a German doctor of philosophy, was born at Schneeberg in 1803, and died May 1, 1840, at Boritz, near Meissen, where he had been pastor since 1830. He published, *Biblische Handconcordanz* (Leips. 1827):—*Züge aus dem Leben der Christen der drei ersten Jahrhunderte* (ibid. 1829):—*Das Leben unseres Herrn u. Heilandes Jesu Christi* (ibid. 1830):—*Geschichte der deutschen Bibelübersetzung Martin Luthers* (ibid. 1835). See Zuchold, *Bibliotheca Theol.* ii, 1174 sq.; Winer, *Handbuch der theol. Literatur*, i, 764. (B. P.)

Schott, Heinrich August, an eminent German theologian of the so-called supernaturalist school, was born at Leipsic, Dec. 5, 1780, and died Dec. 29, 1835. He began his university studies at the age of sixteen, and was soon distinguished for his fine Latin style and for his progress in theology. Among his teachers at Leipsic were Beck, Platner, Carns, and Keil. In 1801 he began to give lectures, and in 1803 he became one of the university preachers. His edition of the works of Dionysius of Halicarnassus (1804) gave him a place in the world of learning; still more so his edition of the New Testament with Latin translation (Leips. 1805). In 1809 he became professor of theology at Wittenberg, and lectured with great success on dogmatics, hermeneutics, and sacred eloquence. His *Epitome Theologiae Christianæ* (1811) was an able work, but its usefulness was diminished by its complicated style. In 1812 he went to Jena, and there spent the rest of his fruitful life. The nucleus of a preachers' seminary which he there formed was richly endowed in 1817. His lectures were delivered in Latin. His work on eloquence, *Die Theorie der Beredsamkeit* (Leips. 1815; 2d ed. 1828), is his best title to lasting fame; but his *Isagogæ Historico-critica in Libros Novi Fœderis Sacros* (Jen. 1830) is abundant in erudition, and still deserves study. In character Schott was upright, simple, and deeply pious. His motto expressed his life—"proving, believing, diligent." He was a scholar and a theologian of the noblest type. He died in 1835. See his *Life* by Danz (Leips. 1836); Herzog, *Real-Encyklop.* xiii, 698-701. (J. P. L.)

Schott, Leopold, a German rabbi, was born at Randegg, Baden, June 27, 1807. Having finished his rabbinical studies at Hechingen and Carlsruhe, in 1829 he went to Heidelberg to attend the lectures at the university, at the same time pursuing his rabbinical studies with Salomon Fürst. In 1831, after having passed his examination, he was appointed religious instructor in his native place. In 1833 he was appointed for the rabbinate of his native city. He died Jan. 20, 1869, at Bühl, Baden. He contributed a number of essays to the *Zeitung des Judenthums* and the *Orient*, and published a number of *Sermons*. See Fürst, *Bibl. Jud.* iii, 286; Kayserling, *Bibliothek jud. Kanzelredner*, ii, 293 sq. (B. P.)

Schottin, JOHANN D. FR., Dr., a German preacher, was born Jan. 4, 1789, at Heigendorf, in Weimar. He belonged to a Huguenot family, whose name was originally *Chaudien*, which the father of Johann D. Fr. changed into Schottin. Having completed his studies at Jena, he was in 1814 appointed pastor at Köstritz, in Reuss, where he remained till his end, May 16, 1866. He was an excellent pulpit orator, but the many calls which he received from Hamburg, Bremen, and Jena he refused. He is best known as one of the most recent German hymn-writers. Besides, he published a number of devotional works. See Zuchold, *Bibliotheca Theol.* iii,

1176; *Literarischer Handweiser*, 1866, p. 309; Koch, *Geschichte des deutschen Kirchenliedes*, vii, 75. (B. P.)

Schrader, Clemens, a Roman Catholic divine, was born in 1820 at Itzum, in Hanover. He studied philosophy and theology at the *Collegium Germanicum* in Rome. In 1843 he was made doctor of philosophy, in 1846 he received holy orders, and in 1848 he was made doctor of theology. In 1850 he was appointed professor of dogmatics in Louvain; in 1851 he was called to Rome as professor of introduction to the New Test., where he afterwards also lectured on dogmatics; and in 1857 he was called to the Vienna University. This office he was obliged to resign, as he would not subscribe in 1868 to the new laws of the state. Since then he lived mostly in France, and died at Poitiers Feb. 23, 1875. He wrote *Theses Theologicæ* and *De Unitate Ecclesiæ*. In popular writings he explained the Syllabus, etc. See *Literarischer Handweiser*, 1875, p. 158. (B. P.)

Schrader, Johann Heinrich Ludolf, a Reformed minister of Germany, was born July 12, 1800, at Gifhorn, in Lüneburg, and died at Frankfort-on-the-Main Jan. 11, 1875, where he had been pastor since 1830. He published a number of *Sermons*. See Zuchold, *Bibl. Theol.* ii, 117 sq.; Winer, *Handbuch der theol. Literatur*, p. 765; *Theologisches Jahrbuch*, 1876, p. 365. (B. P.)

Schramm, Johann Conrad, doctor and professor of theology at Helmstädt, where he died Feb. 25, 1739, is the author of, *De Usu et Abusu Originum Linguæ Sanctæ* (Helmstädt, 1707):—*Programma, quo Preliminaria Disputationum cum Judæis Traduntur* (ibid. 1718):—*Disputatio de Mysteriis Veterum Judæorum Philosophicis* (ibid. 1708):—*Prolusio de Poesi Hebræorum in Codice Sacro* (ibid. 1723):—*Introductio in Dialecticam Cabbaleorum*, etc. (Brunswick, 1703):—*Disputatio de Symboli Apostolici in Talmude Ruderibus* (Helmstädt, 1706):—*Program. de Lectione, Præcipuo Ling. Hebr. Adjumento* (ibid. 1708). See Fürst, *Bibl. Jud.* iii, 287; Steinschneider, *Bibliogr. Handbuch*, p. 128; Winer, *Handbuch der theol. Literatur*, p. 765; supplement, p. 300. (B. P.)

Schramm, Johann Heinrich, doctor and professor of theology, was born March 20, 1676, at Gerkenhausen. In 1701 he was appointed professor of elocution, history, and Greek at Herborn; in 1707 he was made member of consistory and preacher at Dillenburg; in 1709 he was appointed professor of theology at Herborn; in 1721 he was called to Marburg, and in 1723 to Herborn, where he died, Jan. 20, 1753. He wrote, *Dissertatio Inaug. de Manipulo Hordeaceo, cujus Oblatione Messum suam Auspicabantur Judæi Jusque Mysterio* (Frankf. a. O. 1706):—*Dissertatio de Holocaustis Judæorum et Gentilium Κακοζήλια* (Herborn):—*Dissertatio de Mysterio Holocaustorum* (ibid.):—*Dissertatio de Bestia Arundineti ad Psa. lxxviii, 31* (ibid. 1713):—*Dissertatio de Vigilibus Veterum* (ibid.); etc. See Fürst, *Bibl. Jud.* iii, 287 sq.; Winer, *Handbuch der theol. Literatur*, p. 765. (B. P.)

Schreck, William, a minister of the Methodist Episcopal Church, was born near Osnabrück, Lower Prussia, about 1816. Emigrating to this country, he united with the Church, and was received into the Indiana Conference. He was afterwards a member of the South-west German Conference. He labored as an itinerant minister for thirty-two years, and died on Herman Circuit, Ill., March 30, 1874. He was a pious, liberal, energetic man, serving the Church with holy consecration. See *Minutes of Annual Conferences*, 1874, p. 88.

Schreiber, Heinrich, a Roman Catholic divine of Germany, was born July 14, 1793, at Freiburg, in Breisgau, where he also completed his studies. In 1816 he received holy orders, in 1822 he was made president of the gymnasium, and in 1826 he was appointed professor of moral theology at the university there. In 1831-34 he published his *Manual of Moral Theology* (2 vols.), in which he protested against a life-long vow and cel-

bacy. The archbishop was ordered to make him promise to keep such views in future to himself, but against such a promise Schreiber publicly protested. He was obliged to resign his theological chair, but was given a chair in the philosophical faculty, until, in 1845, he had to resign this position also on account of his joining the German Catholic movement, and died Nov. 20, 1873. His most important work is his *Ausführliche Geschichte der Stadt und Universität Freiburg* (1857-60, 7 vols.). He also wrote *Der deutsche Bauernkrieg* (Freiburg, 1863-66, 3 vols.); etc. See *Theologisches Universal-Lexikon*, s. v.; *Literarischer Handweiser*, 1873, p. 17; Winer, *Handbuch der theologischen Literatur*, i, 286, 484; ii, 765; Zuchold, *Bibliotheca Theol.* iii, 1179. (B. P.)

Schröckh, Johann Matthias, a Protestant theologian of Germany of eminent culture and extended usefulness in the department of historical learning, was born at Vienna July 26, 1733, and was early destined for the pulpit. His education was obtained chiefly at the Lutheran Gymnasium of Presburg, the Steinmetz School at Klosterbergen, near Magdeburg, and the University of Göttingen. Mosheim and J. D. Michaelis were then in the faculty of the latter institution, and their influence over Schröckh was such that his attention became predominantly fixed on history and the Oriental languages, and he was led to form habits of independent research, and to cultivate an attractive historical style—qualities which adhered to him through life. After his graduation, he was associated with an uncle, Prof. Karl A. Bell, of Leipsic, in editing several learned periodicals; but he also found time to perfect his knowledge of Greek and Roman antiquities under the tuition of professors Christ and Ernesti. In 1756 he received the master's degree, and became a tutor in the university, and subsequently custodian of the library, and in 1761 he was made professor extraordinary. The uncertainty of further preferment in the University of Leipsic, and the unsatisfactory income which he derived from literary labors, now decided him to accept a call to the chair of poetry in the University of Wittenberg, which he held until 1775, when he was transferred to the chair of history, in the duties of which station he spent the remainder of his life. He projected a three years' course, in which he was accustomed to traverse not only the history of literature, the Church, the Reformation, theology, and Christian antiquities, but also that of European states, Germany and Saxony in particular, and also of diplomacy; and, in addition to these labors, he issued numerous reviews, editions of works written by his friends, and independent works of more or less importance. His fidelity to his work was acknowledged by the government at Dresden, who transmitted to him a testimonial in writing and an honorary donation, together with the offer of a titular patent as councillor of state, which latter he declined. He was married to Frederica Pitzschig, by whom he had four children, all of whom died in early childhood; and he died Aug. 2, 1808, in consequence of a fall experienced in his library, on the seventy-fifth anniversary of his birth.

As a writer of history, Schröckh was thoroughly qualified by his learning, impartial love of truth and devotion to morality, untiring industry in the work of collection and research, and the clearness, simplicity, and logic of his style. He was deficient in the critical apprehension and philosophical penetration needed to discover the internal connection of events; and his style, as a whole, lacks the picturesque coloring and pregnancy of meaning which characterize a classical writer. He was not a master in the art of descriptive writing, but, nevertheless, a meritorious and successful author. His works were numerous, but have been superseded by more complete and thorough books of later origin. They include biographies of learned men, and of other persons eminent in the history of the world; textbooks and manuals of history, and other similar works, none of which possess permanent value. The *Historia Religionis et Ecclesiæ Christianæ in Usum Leo-*

tionum, published in a seventh edition by Marheinecke in 1828, is noticeable chiefly because of its wealth of material, its judicious references to sources and helps, the systematic arrangement of its contents, and its excellent Latin. The great work of his life, beyond question, is the *Ausführliche Geschichte der christlichen Kirche*, in 45 vols., the last two of which were completed by Prof. Tzschirner after the author's death. The work covers eighteen centuries of the Christian Church, and is characterized by impartiality and completeness to a remarkable degree. No work has yet appeared which combines so great magnitude with so many advantages as does that of Schröcker, though the earlier volumes, being intended simply to furnish a comprehensive course of reading in Church history, leave much to be desired on the part of cultured readers.

See an article by Schröcker in R. G. Bayer's *Allgem. Magazin für Prediger*, etc., vol. v, No. 2, p. 209-222; Politz, *J. M. Schröcker's Nekrolog* (Wittenberg, 1808); and notices respecting the life of Schröcker contributed to the *Allgem. Zeitung*, 1808, Nos. 247 and 248, p. 985-989. A faithful and instructive delineation is given by his friend K. L. Nitzsch in *J. M. Schröcker's Studienweise u. Maximen* (Weimar, 1809). H. G. Tzschirner's *J. M. Schröcker's Leben, Charakter, u. Schriften* was prefixed to pt. x of Schröcker's *Kirchengeschichte seit der Reformation*, and has also been published separately since 1812, with portrait. A complete list of Schröcker's works is given in Mensel's *Gelehrtes Deutschland*, viii, 814 sq.; x, 627, and xv, 381. See also Wähler, *Gesch. d. hist. Forschung u. Kunst*, vol. ii, pt. ii, p. 813 sq.; Stäudlin, *Gesch. u. Lit. d. Kirchengesch.* (Hanover, 1827); Baur, *Epochen d. christl. Kirchengesch.-Schreibung* (Tub. 1852).

Schröder, Friedrich Wilhelm Julius, a Reformed theologian of Germany, who died Feb. 27, 1876, at Elberfeld, where he had succeeded the celebrated Krummacher as pastor of the First Reformed Church, is the author of a *Commentary on Genesis* (Berlin, 1844):—*Vesperlänge* (ibid. 1846, 2 vols.):—a *Commentary on Deuteronomy* (prepared for Lange's *Bible-work* [Elberfeld, 1866]):—a *Commentary on Ezekiel* (also prepared for Lange's work). Besides, he published a number of *Essays, Sermons*, etc. See Zuchold, *Bibl. Theol.* ii, 1182 sq.; *Theol. Jahrbuch*, 1877, p. 228. (B. P.)

Schröder, Johann Heinrich, a Lutheran minister of Germany, was born in 1666 at Hallerspringe, in the principality of Calenberg, in Hanover. He was a pupil of the celebrated philanthropist A. H. Francke, and studied under him at Leipzig. In 1696 he became pastor at Merseburg, near Magdeburg. He wrote a few hymns which are still in use in the German Church, and died June 30, 1699. Of his hymns we mention, *Fins ist Noth, ach Herr dore Eine* (transl. by E. Cox, "One thing needful, then, Lord Jesus," in *Hymns from the German*, p. 216):—*Jesu, hilf siegen, du Fürst des Lebens* (transl. by Mills, "Jesus, help conquer! thou Prince everliving," in *Horæ Germanicæ*, p. 126). See Harnisch, in *Evangel. Kirchenzeitung*, 1857, No. 89; Koch, *Gesch. d. deutsch. Kirchenliedes*, iv, 381 sq.; viii, 426 sq.; Knapp, *Evangel. Liederschatz*, p. 1344. (B. P.)

Schröder, Nicolaus Wilhelm, professor of Oriental languages and antiquities at Groningen, was born at Marburg, Aug. 22, 1721, and died May 30, 1798. He is known as the author of *Comment. Philologicocriticus de Vestitu Mulierum Ebræarum ad Jes. iii, 10-24* (Leyden, 1745). He also published a number of treatises bearing on Oriental languages and certain sections of the Bible, as *De Confusione Sermonis Babelica*:—*De Voto Jephtæ*:—*De Tabernaculo Molochi et Stella Dei Remphan*, etc. See Fürst, *Bibl. Jud.* iii, 291; Steinschneider, *Bibliog. Handbuch*, p. 128; Winer, *Handbuch der theol. Literatur*. (B. P.)

Schubart, Christian Friedrich Daniel, a Lutheran divine of Germany, was born at Obersonthem, in the county of Limburg, March 26, 1736, and died as

court and theatre poet at Stuttgart, Oct. 10, 1791. He is the author of the beautiful hymn *Alles ist euer! O Worte des ewigen Lebens* (transl. into English in *Hymns from the Land of Luther*, p. 61, "All things are yours, O sweet message of mercy divine"), and of *Kommt heut an euren Stüb* (based on Luke ii, 22-32, which Mills translated in his *Horæ Germanicæ*, p. 275, "Ye who with years are sinking"). See Schubart, *Gesammelte Schriften* (Stuttgart, 1839-40), vol. i-viii; Strauss, *Schubarts Leben in seinen Briefen* (Berlin, 1849, 2 vols.); Koch, *Gesch. d. deutsch. Kirchenliedes*, vi, 376 sq.; Knapp, *Evangel. Liederschatz*, p. 1344. (B. P.)

Schubert, Gottlieb Heinrich von, a German philosopher and mystic, who for more than half a century exerted a very extended and beneficent popular influence in almost every field of thought, was born in Saxony, April 26, 1780. His parents were pious and peculiar. In his fifth year he learned from his mother such a lesson on the death of Christ as remained a benediction to him to his latest hour. He studied at Greiz and Weimar, and at the latter place was taken into the house of Herder. He also came into contact with Goethe and Jean Paul. In 1799 he began to study theology at Leipsic, but in 1801 he changed theology for medicine, and went to Jena. Here he came under the personal and scientific influence of Schelling—an influence that lasted during life—as also under that of the naturalist William Ritter. In 1803 he married, and began the practice of medicine at Altenburg, supplementing his scanty fees by private lessons and other makeshifts. Here he wrote a romance, *Die Kirche und die Götter*. In 1805 he removed to Freiburg, where he began his great work *Ähnungen einer allgemeinen Geschichte des Lebens*, in which he endeavored to reduce to uniform laws the whole field of nature and humanity. Schelling applauded, but many shook their heads in doubt. In 1807 he went to Dresden and gave some public lectures, from which arose his strange and able work *Ansichten von der Nachtseite der Naturwissenschaft*. In 1809, by the help of Schelling, he was made rector of a scientific school at Nuremberg. Here he wrote his *Symbolik des Traumes*, also *Altes und Neues aus dem Gebiet der inneren Seelenkunde* (1815). This last work made a great sensation, and occasioned congratulations from Harms and Neander. Works in the same warmly religious vein are, *Erzählungen* (4 vols.):—*Biographien und Erzählungen* (3 vols.):—and *Der Erwerb* (an autobiography, 3 vols.). His last work was *Erinnerungen an die Herzogin Helene von Orleans*. Schubert left Nuremberg in 1816; in 1819 he became professor at Erlangen; in 1827 he went to the new University of Munich. His latter years were passed in peace and affluence. He died July 1, 1860. See *Evangel. Kirchenzeitung*, 1860, No. 62; Herzog, *Real-Encyklop.* (J. P. L.)

Schuderoff, Johann Georg Jonathan, a German Protestant minister, was born in 1766 at Gotha. In 1790 he was appointed minister at Drakendorf, near Jena; in 1797 subdeacon at Altenburg; in 1805 archdeacon; in 1806 first pastor and superintendent at Ronneburg, and in 1824 member of consistory. In 1836 he retired from the ministry, and died in 1843. He wrote: *Ueber allgemeine Union der christl. Bekenntnisse* (Neustadt, 1829):—*Symboloklausur oder Symbolatrie?* (ibid. 1831):—*Ueber Consistorialverfassung in der deutsch-protestantischen Kirche* (ibid. 1831):—*Glaube u. Vernunft in ihren Verzweigungen* (ibid. 1843), etc. See Zuchold, *Bibl. Theol.* ii, 1188; *Regensburger Real-Encyklop.* s. v. (B. P.)

Schudt, Johann Jakob, a German Jewish writer, was born Jan. 14, 1664, at Frankfurt-on-the-Main, where he also died, Feb. 14, 1722, as the rector of the gymnasium. Schudt is well known as the author of the *Memorabilia Judaica*, or *Jüdische Merkwürdigkeiten* (Frankf. 1714-17, 4 pts.). This may be regarded as the most important of his works, which are enumerated by Fürst in his *Bibl. Jud.* iii, 292 sq. See also Steinschneider, *Bibliog. Handbuch*, s. v.; Winer, *Handbuch der theol. Literatur*. (B. P.)

Schultens, Albert, an eminent Dutch Orientalist, the father of modern Hebrew grammar, was born at Groningen, 1686, and early destined to a theological career. He studied the original languages of the Bible—Chaldee, Syriac, and Rabbinic—and after a time Arabic. The earliest fruit of these studies was a public disputation with Gussetius, at the age of eighteen, in which he maintained that the study of Arabic is indispensably necessary to a knowledge of Hebrew. After completing his studies, he visited Leyden and Utrecht, and became acquainted with Reland, through whom he published his first book, *Animadv. Philolog. in Jobum* (Utrecht, 1708, 8vo). Having returned to his home, he became candidate in theology, and in the following year (July 4, 1709) received the degree of doctor in that science. He then returned to Leyden to make use of its library. In 1711 he assumed the pastorate of the Church at Wassenaer, but exchanged that post after two years for the chair of Oriental languages in the Academy of Franeker. In 1729 he was placed in charge of the Leyden Theological Seminary and made custodian of the Warner MSS. He served three years, doing the work of a professor without enjoying the title or receiving any remuneration, after which period a chair of Arabic was specially created for him, with which the additional professorship of Hebrew antiquities was connected in 1740. He held these positions without interruption to the time of his death, Jan. 26, 1750.

The services which Schultens rendered to philological science are of great value. He was the first to overturn the notion that Hebrew is the original language given to man by God, by showing that that tongue is simply a branch of the Shemitic family, and finds an essential and indispensable aid in the comparison of the Arabic. Besides defending this position in his early disputation with Gussetius, he enforced its claims in the work *Origines Hebrææ*. This opened a new path to Hebrew grammar and Biblical exegesis, and also contributed materially to the advancement of the study of Oriental languages and the attainment of its subsequent independent position. Numerous pupils helped to spread the knowledge of his views and methods, and founded the Dutch school of grammar and exegesis. The faults of Schultens are too great readiness in the tracing of analogies and the forming of combinations, and a lack of thorough criticism in the application of the Arabic.

Of the writings of Schultens, aside from the purely Arabic—such as editions of the *Rudimenta* (1733) and the *Grammatica* (1748) of Erpenius:—*Vita Saladini* (Lugd. Bat. 1733, fol.);—*Monum. Vetustiora Arab.* (Leyd. 1740, 4to);—*Historia Joctimidarum* (Harderov. 1786, 4to)—we mention those which have reference to Hebrew grammar and Biblical literature: *Origines Hebrææ*, etc. (Franeker, 1734–38, 2 vols. 4to), and a preliminary work, *De Defectibus Hodiernæ Linguae Hebr.* (ibid. 1731, 4to; new ed. of both works, Leyd. 1761, 2 vols. 4to);—*Institutiones ad Fundam. Linguae Hebr.*, etc. (Leyd. 1737, 1756, 4to);—*Vetus et Regia Via Hebraizandi*, etc. (Lugd. 1738), a rejoinder to his opponents, which he carries further in *Excursus Primus ad Caput Primum Viæ Veteris et Regiæ Hebraizandi*, etc., and *Excursus Secundus et Tertius* (Leyd. 1739, 4to);—*Institutiones Aramææ* (Lugd. Bat. 1745–49), a work containing a Chaldee and Syriac grammar, without preface or other guide to inquiry, and probably interrupted by the author's death, as it is broken off in the middle. Of his exegetical works the chief are, *Liber Jobi, Nova Versio ad Hebr. Fontem et Comment.*, etc. (Lugd. Bat. 1737, 2 vols. 4to);—*Proverbia Salomonis*, etc. (ibid. 1748, 4to), an abridgment of which was published by G. J. L. Vogel (Halle, 1769, 8vo). Ten separately printed dissertations and addresses were published by his son in *Opera Minora*, etc. (Lugd. 1769, 4to), and also a number of dissertations read before him by his pupils, in *Sylloge Diss. Philolog.-exeget.* (Leidæ et Leovard. pars i, 1772; pars ii, 1775, 4to). Schultens left also several commentaries and a Hebrew lexicon in MS. See Vriemoot,

Elogium Schultensii, in *Athenæ Frisiacæ*, p. 762–771; Herzog, *Real-Encyklop.* s. v.

Schultens, Heinrich Albert, an Orientalist, the son of Johann Jacob, and grandson of Albert Schultens (q. v.), was born at Herborn, Central Germany, Feb. 15, 1749. He began the study of Greek and Latin, under the direction of the most celebrated instructors of Leyden, at the age of seven years, and followed it with that of Oriental languages and antiquities. He also became acquainted with the English, French, and German among modern tongues. In 1772 he visited England to make use of the Bodleian Library; and on his return, though not yet twenty-four years of age, was made professor of Oriental languages in the Academy of Amsterdam, and in 1782 he was inducted into the chair previously occupied by his father and grandfather. His literary labors were expended chiefly on Arabic authors, and the continued effort required to prepare the *Proverbs of Meidan* undermined his health. He died of a slow fever, Aug. 12, 1793. Everard Scheid, his friend and successor, delivered his eulogium. For his life, comp. *Series Continuatæ Histor. Batar.* per Wagenaer, pars i, p. 364–380; also the unimportant sketch by Rink, *H. A. Schultens*, etc. (Riga, 1794, 8vo).

Schultens, Johann Jacob, a theologian and Orientalist, the son of Albert Schultens (q. v.), was born at Franeker, in the Netherlands, in 1716, educated under the eye of his father, and appointed professor of theology and Oriental languages in the Academy of Herborn in 1742. He held that post during seven years, was then transferred to the Academy of Leyden, and five months afterwards became the successor of his father in the theological seminary. He died in 1778. The only writings published by him were his inaugurals, *Dissert. de Utilitate Dialect. ad tuendam Integritatem Codicis Hebr.* (Leyd. 1742) (also in the *Syllog. Dissertat.* p. 231–439; see lit. art. "Albert Schultens");—*De Fruct. in Theol. Redundantibus ex Peritiore Linguarum Orient. Cognitione* (ibid. 1749);—*Dissert. Theol. Inaug. ad Locum Apostoli Philipp. cap. ii, v. 5–11* (*Syllog. Dissertat.* p. 443–518), and some new editions of single works written by his father.

Schultetus. See SCULTETUS.

Schulthess, JOHANNES, Dr., the Swiss compeer of Paulus and Röhr in the advocacy of the older rationalism, was born Sept. 28, 1763, and received a predominantly philological training. His earliest labors were expended in behalf of reforms in the public schools (see *Schweizer Schulfreund*, 1812, etc.). His *Kinderbibel des alten Testaments* and his *Schweizer Kinderfreund* were highly esteemed as text-books. He became a professor of the Zurich gymnasium, and prebendary in 1816, and from that time devoted himself to the department of New-Test. exegesis. He endeavored to ground his rationalism on the Bible itself, even at the cost of violence to the text. In 1824 he published a commentary on the Epistle of St. James, and in 1822 he gave to the world his dogmatical views, in a pamphlet entitled *Rationalism, u. Supranaturalism. Kanon, Tradition u. Scripton*, a work in which Orelli participated. His *Revision d. kirchl. Lehrbegriffs* (1823–26) served a similar purpose. From 1826 to 1830 he edited the *Amalen* founded by Wachler, Schwarz at Heidelberg at the same time publishing a periodical in the interests of his peculiar theological views. In the revived conflict (1820 sq.) respecting the Lord's supper between the Lutheran and Reformed churches, he gave himself out as the defender of true Zwinglianism (comp. his *Evangel. Lehre vom heil. Abendmahl* [Leips. 1824]). He likewise felt himself called to resist the movements of his time towards ultramontanism, but no less all tendencies towards "mysticism and pietism." He had, in short, a thoroughly polemical nature, which involved him in controversies with all who would not adopt his frequently venturesome hypotheses, rationalists no less than orthodox theologians; but in the privacy of social

intercourse he displayed, especially in his later years, a friendly, genial spirit, in which nothing of the controversialist was apparent. He also combined with his rationalism a simple piety whose centre was a firm faith in the all-controlling goodness of God. After the University of Zurich had been founded, in 1833, Schulthess became ordinary professor in that institution. He had received the degree of doctor in theology from Jena, Nov., 1817. He died Nov. 10, 1836, leaving, as his most important legacy to theological science, an edition of the works of Zwingli which he had published in connection with Schuler. The clergymen trained by him generally entered into different paths from those in which he walked—the older ones through the influence of Schleiermacher, and the younger under the guidance of Nitzsch, Tholuck, Jul. Müller, etc. The most trustworthy source for his biography is the *Denkschrift zur hundertjähr. Jubelfeier d. Schulthess. Familienfonds*, etc., by his son Johann (Zurich, 1859).

Schulting, Cornelius, a learned Dutch ecclesiastic, was born at Steenwyk, Overijssel, about 1540. His family was distinguished and honorable. After studying at Cologne, he took the ecclesiastical habit, taught philosophy in the college at Laurentianum, and afterwards became its principal. He had charge of the faculty of arts at Cologne, and was canon of the cathedral. He died April 23, 1604. His writings show erudition and a great range of reading. We mention, *Bibliotheca Ecclesiastica*, etc. (Cologne, 1599, 4 vols. fol.):—*Ecclesiastica Disciplina*, etc. (ibid. 1599, 8vo):—*Bibliotheca Catholica* (ibid. 1602, 2 vols. 4to):—*Hierarchica Anacrisis* (ibid. 1604, fol.). See Sweert, *Athenæ Belgicæ*; Hartzheim, *Bibl. Colon.*

Schulz, David, a German rationalist, was born in Lower Silesia, Nov. 29, 1779, and after protracted preliminary studies was admitted to the University of Halle in 1803, where he devoted himself largely to philosophical studies and became strongly interested in the lectures of Fr. A. Wolf. In 1806 he received the degree of Ph.D. and the position of docent in the philosophical faculty of his alma mater. Soon afterwards the university was suspended, and Schulz followed a call to Leipzig in 1807; but on the restoration of the University of Halle he returned and taught successful courses on the classical writers, the books of the New Test., and Roman antiquities. The government of Westphalia recognised his services in 1809 by conferring on him the position of extraordinary professor in theology and philosophy; but having obtained, through the influence of Wolf and W. von Humboldt, an ordinary professorship of theology at Frankfurt-on-the-Oder, he left Halle for that place. In 1810 he received the theological doctorate. In 1811 the university was transferred to Breslau, and from that period Schulz concentrated his energies wholly on the science of theology. His lectures extended over the greater portion of its field, and discussed encyclopædia, New-Test. introduction, criticism, and hermeneutics, exegesis of nearly the entire New Test., Church history, introduction to systematic theology, dogmatics, and repeatedly, for students of the entire university, the nature of Christianity. He delivered the academical address in connection with the tercentenary of the Reformation in 1817, and that of June 25, 1830, in commemoration of the submission of the Augsburg Confession. In 1819 he was made consistorial councillor, and soon afterwards director of the commission of examiners in science, as also director of the pedagogical seminary for learned schools. In 1845 he imprudently signed a declaration against the efforts of "a small party in the evangelical Church, which yet was powerful by reason of support from without," and in consequence was deprived of the position of royal consistorial councillor, though permitted to retain the title and emoluments of that office. His influence de-

clined after 1848, as did also his physical energies. The loss of sight compelled his withdrawal from academical occupations during the last years of his life, and, after protracted sufferings, he died Feb. 17, 1854.

Schulz's theological attitude was that of ordinary rationalism. He considered his mission to be the unifying of Christianity and humanity by more clearly apprehending and presenting the fundamental truths of the former, etc. He was not a pioneer, but a conservative rationalist, and contributed greatly to protract the rule of the rationalist tendency. His exegetical writings are not without scientific value, but those of a polemical character are immoderately violent. All of his writings suffer from diffuseness and repetition. A certain force of individuality must be conceded to him, since he was able to attract large numbers of students to his lectures, which were entirely without arrangement, and was able to exercise an almost intolerable dominion over the entire Church of Silesia during a protracted period, so that the Lutheran separation in that province is often charged to his overbearing influence. His passionate nature could not brook opposition, and rendered it difficult for him to submit to the decrease of his party, which was apparent in his later years.

The works of Schulz mostly belong to the departments of exegesis and New-Test. text criticism, but are occasionally polemical writings. We mention, *Brief an die Hebräer*, etc. (Bresl. 1818):—*Parabel vom Verwalter*, *Luc. xvi. 1 sq.* (ibid. 1821):—*Christ. Lehre vom heil. Abendmahl* (Leips. 1824; 2d ed., with sketch of doctrine of Lord's supper, ibid. 1831):—*Was heisst Glauben, u. wer sind die Ungläubigen?* etc., with supplement discussing original sin (ibid. 1830, 1834):—*Geistesgaben d. ersten Christen*, etc. (Bresl. 1836):—*Prog. de Codice IV Evangel. Biblioth. Rhedigerianæ*, etc. (Vratisl. 1814):—*Novum Test. Græce, Textum ad Fidem Codd., Verss. et Patrum rec. et Lect. Var. Adjecit J. J. Griesbach, vol. i, Evangelia completectens; et tertium emend. et auct. cur. D. S.* (Berol. 1827):—*Disputatio de Codice D. Cantabrigiensis* (Vratisl. 1833):—*De Doctorum Academ. Officiis* (ibid. 1827):—*Theol. Lehreinheit auf den evangel. Universitäten u. deren Beschränkung durch symbol. Bücher* (Bresl. 1830) (Von Cölln being joined with Schulz in the authorship of this work).

Schulz, Johann Christoph Fr., a German doctor and professor of theology, was born May 18, 1747, at Wertheim. From 1783 he was professor at Giessen; in 1786 he was made first preacher and superintendent of the Alsfeld diocese, and died Jan. 26, 1806. He wrote, *Scholia in Vet. Test.* (Norimb. 1797):—*Psalmus 49 Varietibus Lectionis Observationibusque Philologicis Illustratus* (Göttingen, 1769, 1771, 2 pts.):—*De Ellipsis Hebraicis*, etc. (Lips. 1782-93):—*Der 2te Brief Pauli an die Korinther* (Halle, 1785, etc.). See Winer, *Handbuch der theol. Literatur*, ii, 769; Fürst, *Bibl. Jud.* iii, 295 sq.; Steinschneider, *Bibliograph. Handbuch*, p. 130. (B. P.)

Schulze, Benjamin Wilhelm Dan., a German theologian, was born at Berlin, Jan. 17, 1715, where he also died, March 17, 1790. He wrote, *Commentatio et Dissertatio Apologetica, qua Inquiritur, num Puncta Vocalia r̥q̃ Kethib n̄ Subjecta ad Keri sint Referenda*:—*Vollständigere Kritik über die gewöhnlichen Ausgaben der hebr. Bibel*, etc. (Berlin, 1764):—*Conjecturæ Historico-criticæ Sadduceorum inter Judæos Sectæ Novam Lucem Accendentes* (Halle, 1799):—*Addamenta Variantium Lectionum e Gersoniana Sacri Codicis Editione Collectarum* (ibid. 1768):—*Conjecturæ Crit. ad Illustrationem Ps. xxii, 13* (ibid. 1769). See Winer, *Handbuch der theol. Literatur*, ii, 770; Fürst, *Bibl. Jud.* iii, 296. (B. P.)

Schulze, Ernst August, a German professor of theology, was born Aug. 8, 1721, at Berlin, and died May 3, 1786, as pastor of the German Reformed Church at Frankfurt-on-the-Oder. He wrote, *Commentatio de Fic-*

tis Hierosolymorum Privilegiis (Francof. 1756):—*Dissertatio de Variis Judæorum Erroribus in Descriptione Templi* (ibid. 1758):—*Commentatio de Hebræorum Antiquitatum Vestigiis in Horatii Eclogis* (Hague, 1774):—*Dissertatio de Juda Galilæo et ejus Secta* (Francof. 1761):—*Dissertatio de Herodiana Puerorum Bethlehemiticorum Cæde* (ibid. 1765):—*Compendium Archeologie Hebræicæ* (Dresden, 1798). See Winer, *Handbuch der theol. Literatur*, ii, 770; Fürst, *Bibl. Judaica*, iii, 296. (B. P.)

Schulze, Johann Ludwig, a German doctor and professor of theology, was born at Halle, Dec. 17, 1734, and died there, May 1, 1799. He wrote, *Dissertatio qua Mutationes in Textu Cod. Alexandrini a Græbio Factæ ex Conjectura, ad Examen Revocantur* (Halle, 1768):—*Chaldaicorum Danielis et Esræ Capitum Interpretatio Hebræica* (ibid. 1782):—*Dissertatio ad Cohel. xii, 1-3* (ibid. 1768). He also edited Simonis *Lexicon Manuale* and Altingii *Synopsis Institutionum Chaldaicarum*. See Winer, *Handbuch der theol. Literatur*, ii, 770; Fürst, *Bibl. Judaica*, iii, 297. (B. P.)

Schumann, Christian Heinrich, a German doctor of theology, was born at Neukirchen Dec. 25, 1787. His first appointment was that of collaborator at Meissen. In 1815 he was made co-rector at Annaberg, in 1825 deacon, and in 1827 pastor there, until in 1835 he became superintendent. He died at Dresden Dec. 11, 1858. He wrote, *De Cultu Jesu* (Annaberg, 1841):—*Stimmen aus dem Hause des Herrn über Zeitereignisse und Zeitbedürfnisse* (ibid. 1849). See Winer, *Handbuch der theol. Literatur*, Supplement, p. 301; Zuchold, *Bibl. Theol.* ii, 1199. (B. P.)

Schumann, Gustav Adolph, a German theologian, was born at Weickelsdorf, near Zeitz, in 1803. In 1826 he became academical private teacher; in 1829 he was made professor extraordinary at Leipsic; and died at Meissen April 11, 1841. He wrote, *Vita Mosii: Pars I, De Infantia Mosii* (Lips. 1826):—*De Libertate Interpretis Dissertatio* (Meissen, 1840):—*Melanchthon Redivivus, oder der ideale Geist des Christenthums* (Leips. 1837). See Winer, *Handbuch der theol. Literatur*, ii, 770; Supplement, p. 301; Fürst, *Bibl. Judaica*, iii, 297; Zuchold, *Bibl. Theol.* ii, 1199. (B. P.)

Schumman, Johannes, a distinguished clergyman of the (Dutch) Reformed Church, a medical practitioner of considerable skill, and a Revolutionary patriot whose services to his country were most vigorous and fearless, was born Aug. 18, 1712, of German parents, at West Camp, N. Y., studied theology under Frelinghuysen and Goetschius, and received and accepted a call to the united churches of Catskill and Coxsackie, N. Y., upon condition that, at their expense, he should go to Holland to complete his education. This he did in 1752; and in 1753, after a rigid examination, he was licensed and ordained by the Classis of Amsterdam, and returned to take charge of the churches, in which he spent his entire ministry of forty-one years. His powerful voice, earnest manner, and burning fervor of piety, with uncompromising attachment to the principles of theology, his honest zeal, and indefatigable perseverance and industry, were the secrets of his success. He was a warm coetus man in the great controversy of his Church respecting independence of the mother Church in Holland. In the same spirit, his patriotism made him a famous leader of the people of the whole region of which Catskill is the centre against British rule. Indians and Tories abounded in that country and around his own residence. Emissaries of George III were frequently passing through those river counties carrying messages between New York and Canada and stirring up the savages and the Tories to treacherous plots and deeds of cruelty. Of course he was the chief object of their hatred. But he prayed and thundered from his pulpit. He rode undaunted to discharge his official duties in his church at Coxsackie, fifteen miles distant from Catskill and through a wilderness that exposed him to constant dangers from his country's foes. He

aided in organizing committees of safety and in the military defences. He went armed, but his chief trust was in God. Nothing daunted or depressed his lofty daring for liberty and his native land. To this day Ulster, Greene, and Albany counties are full of traditions of his fame. He is the hero of a historical novel entitled *The Dutch Dominie of the Catskills*, by the late Rev. David Murdock, D.D., who was his successor at Catskill, 1842-51. His medical services were gratuitously rendered for the benefit of his people, "and without respect of persons." A few days before he died he preached at Coxsackie his last sermon, on the Saviour's words "It is finished;" and then he went home to finish his own work in the full assurance of faith, May 16, 1794. See Sprague, *Annals of the Amer. Pulpit*, vol. ix. (W. J. R. T.)

Schupp, Johann Balthasar, a German pastor and critic, was born at Giessen in 1610. In his fifteenth year he entered the University of Giessen. At first he studied law, then theology. After a long journey among the German universities, he tarried at Rostock (1629-31) and took his master's degree. Then he visited Holland and heard Salmasius and Voss. On his return he acted as professor of history and oratory for ten years at Marburg. In 1643 he added to his duties that of a pastor. Desiring to give himself entirely to the ministry, he accepted the place of court preacher at Braubach in 1646. The landgrave of Hesse-Braubach commissioned him to take part in the negotiation of the Peace of Westphalia (1648). At Münster he had the honor of preaching the first sermon in commemoration of the peace. Here a call came to him to the place of chief pastor of St. James's, Hamburg. Entering upon his duties in 1649, he labored the remaining twelve years of his life with great zeal and popularity. He was thoroughly evangelical, preaching not exclusively Christ for us, but Christ in us, and insisting upon thorough heart-conversion. His manner was free and popular, a great contrast to the prevalent scholastic method. His success turned his colleagues into spies and enemies. Bitter calumnies were invented against him. Satirical pamphlets flew on every hand. The magistracy interfered, and imposed silence on both sides. But the violence of the assaults broke down the health of the faithful man. He died in great joy, a truly candida anima, in 1661. Schupp published, *Volumen Orationum Solemnium et Panegyricarum* (1642):—*Traktaten über Staat, Kirche und Schule*:—*Morgen- und Abend-Lieder*. His collective works were edited by his son (Hanau, 1663), and have had several editions. See *In Schuppii Obitum* (Francof. 1685); Herzog, *Real-Encyklop.* xx, 749-755. (J. P. L.)

Schureman, John, D.D., a (Dutch) Reformed minister, son of Hon. James Schureman, United States Senator from New Jersey, was born near New Brunswick, N. J., Oct. 19, 1778. Of pious lineage, he devoted himself to Christ in early youth. At seventeen he graduated from Queen's College (1795), and then studied theology with Dr. Livingston. He was licensed in 1800, settled at Bedminster, N. J., from 1801 to 1807, when he removed to the Church at Millstone, and in 1809 accepted a call to the Collegiate Dutch Reformed Church in New York at the same time with Dr. Jacob Brodhead. Here he sustained himself with satisfaction to his people, but, on account of feeble health, in 1811 he accepted the vice-presidency and chair of moral philosophy and belles-lettres in Queen's College at New Brunswick. For a short time, 1813, he was pastor of the Dutch Reformed Church in that city, but disease soon obliged him to desist. In 1815 the General Synod appointed him professor of ecclesiastical history and pastoral theology in the theological seminary under their care in New Brunswick. Here for five years he fulfilled his duties with profit to the institution and honor to himself. He died in 1818 of typhus fever. Dr. Schureman was blessed with a clear, vigorous, accurate, and well-disciplined mind, and with an uncommonly amiable temper

which made him, like Daniel, "a man greatly beloved." His piety was tender, devout, and universally acknowledged by all who knew him. His preaching partook of these characteristics, and was always popular, but not strong or brilliant. He was judicious, solid, calm, and full of unction. His short career gave promise of usefulness and of power, but was blighted by early death, and yet makes his memory very precious among the departed worthies of the Reformed Church. See Ludlow, *Memorial*; Sprague, *Annals of the Amer. Pulpit*; De Witt, *Historical Discourse*. (W. J. R. T.)

Schürmann, ANNA MARIA VON, a prominent disciple and supporter of Labadie (q. v.), was born at Cologne, Nov. 5, 1607, of Reformed parents. Persecution drove her parents in 1610 to the district of Juliers, whence the family removed to Franeker, and, after the death of her father, to Utrecht. Anna Maria was possessed of extraordinary intellectual qualities, which were further developed by careful training and instruction, so that she became familiarly acquainted with many ancient and modern languages—the Latin, Greek, Hebrew, Italian, Spanish, Arabic, Syriac, and Coptic—and was able to write letters in them all; was a proficient in mathematics and history; and was no less celebrated for her skill in the more ornamental branches of music, drawing, painting, carving, wax-work, and embroidery. Her attainments won for her the title of the *Tenth Muse*, the Celebrated Maid of Utrecht. The serious, pious temper, and the love for the word of God which she had manifested from her childhood, now gave way to vanity; but the influence of Labadie, whom she encountered when more than fifty years of age, led to a thorough conversion. She recalled all her writings, associated herself with Labadie in his home and life, defended him and his followers with her pen and supported them with her purse. A peculiar mystical relationship subsisted between her and Labadie, but no charge of improper conduct has ever been raised against her. After Labadie's death she retired to Wierwert, in Friesland, where she died in 1678, after a protracted and painful illness. Her last work, entitled *Eukleria*, and containing a review of her life, its tendencies and results, was completed just before her end. See Göbel, *Gesch. d. christl. Lebens*, etc., p. 272–280, 783.

Schut, CORNELIUS, a Flemish painter, was born at Antwerp in 1597. He was a pupil of Rubens; and when he had finished his studies in 1619, he worked with great success in churches and convents. His best painting is in the cupola of the Cathedral at Antwerp, and represents the *Assumption of the Virgin*; and the *Martyrdom of St. George* in the museum of the same city shows his skill. Schut possessed a brilliant imagination and great facility of execution, which, in a large measure, compensated for his feebleness of design. He is considered one of the best of Rubens's pupils.

Schütz, JOHANN JACOB, a German hymnist, was born Sept. 7, 1640, at Frankfort-on-the-Main, where he also died, May 22, 1690. He was very intimate with Spener and Joachim Neander. The only hymn which he wrote was ascribed to Hugo Grotius. It is an ornament of German hymnology, the well-known *Sei Lob und Ehr' dem höchsten Gut* (Engl. transl. in *Lyra Germanica*, ii, 196, "All praise and thanks to God most high"). See Koch, *Gesch. des deutschen Kirchenliedes*, iv, 218 sq.; Rambach, *Anthologie christl. Gesänge*, iii, 229; Wange-mann, *Kirchenlied*, p. 298; *Theologisches Universal-Lexikon*, s. v. (B. P.)

Schwab, JOHANN BAPTIST, a Roman Catholic divine of Germany, born in 1811 at Hassfurt, was made priest in 1834 and doctor of theology in 1839. In 1840 he was appointed professor of Church history and canon law at Würzburg. In 1851 he was deposed on account of his heterodox views, and died Dec. 28, 1875, at Würz-

burg. He published, *Paul von Samosata* (Würzburg, 1839):—*Ueber das Verhältniss der christlichen Beredtsamkeit zur antiker* (1849):—*Johannes Gerson, Professor der Theologie und Kanzler der Universität Paris* (1858). See *Literarischer Handweiser*, 1873, p. 18; Zuchold, *Bibl. Theol.* iii, 1202. (B. P.)

Schwabe, JOHANN FRIEDRICH HEINRICH, a Protestant divine of Germany, was born in 1779 at Eichelborn, near Weimar. He studied theology at Jena, and entered upon his first ministerial duties in 1802 at Wormstedt. From that time on till his death, which took place in 1834, he occupied the most important ecclesiastical positions in the grand-duchy of Hesse. He wrote, *Specimen Theologiæ Comparatiæ exhibens Κλε-ἀνθους ὕμνον εἰς Δία, cum Disciplina Christiana Comparatum*, etc. (Jena, 1819):—*Verhältniss der stoischen Moral zum Christenthum* (ibid. 1820):—*Examen aus der Reformationsgeschichte* (Neustadt, 1839). He also published several volumes of *Sermons*. See Zuchold, *Bibl. Theol.* ii, 1202 sq.; *Regensburger Real-Encyklop.* s. v. (B. P.)

Schwartz, Christian Friedrich, a German missionary to India. He was born at Sonnenburg, in Brandenburg, Oct. 26, 1726, and educated at Halle. While there he studied the Tamil, in order to aid the missionary Schultz in translating the Bible. He was ordained at Copenhagen in 1749, and on Jan. 29, 1750, embarked from England for India as missionary. He reached Tranquebar July 30. He remained there until, in 1767, he was transferred to the English society and stationed at Trichinopoly. In 1779 he went to Tanjore, where he spent the remainder of his life. He was greatly esteemed by both Europeans and natives. The rajah of Tanjore committed to him the education of his son and successor, and Hyder Ali received him as ambassador after refusing all others. He died in 1798. After his death the rajah of Tanjore and the East India Company each erected a monument to his memory.

Schwartz, Peter (in Latin *Niger*), a German theologian, was born early in the 15th century. His early history is unknown, except that he received a good education and entered the Order of St. Dominic. He travelled widely, and in every way endeavored to add to his knowledge of the laws and customs of the Jews. His knowledge of Hebrew was so great that in 1474 he carried on a discussion with several rabbis in that language at Ratisbon. At that time he was teaching at Würzburg, but left to take charge of the College of Buda, in Hungary. He died in 1481. Many of the works of Niger are lost—indeed, but two important ones remain: *Tractatus ad Judeorum Perfidiam Extirpandam Confectus* (Essling, 1477, fol.; transl. into German under the title *Stella Messias* [ibid. 1477, 4to]):—*Clypeus Thomistarum* (Venice, 1482, fol.).

Schwartz, MORITZ GOTTHILF, a German theologian, was born in 1802 at Weissenfels. He studied the Oriental languages, and was appointed professor of the Coptic language and literature at the University of Berlin. His death occurred in 1848. He published, *Prolegomena in Religionem Veterum Ægyptiorum* (Berl. 1832):—*Das alte Aegypten* (Leips. 1843):—*Psalterium in Dialecto Coptica Lingue Memphiticam*, etc. (ibid. 1843):—*Quatuor Evangelia in Dialecto Lingue Copticae Memphitica Prescripta*, etc. (pars i, vol. i, *Evangelia Matthæi et Marci continens* [ibid. 1846]):—*Koptische Grammatik* (ed. by H. Steinthal [Berl. 1850]):—*Pistis Sophia* (Coptic, with a Latin transl., ed. by Petermann [ibid. 1851]). See the *Regensburger Real-Encyklop.* s. v. (B. P.)

Schwarz, Charles, Dr., a German preacher, was born at Wreschen, in the duchy of Posen, in the year 1817, of Jewish parentage. Having passed the gymnasium, he entered the university at Berlin; and here it was that, when twenty years of age, he openly pro-

fessed his faith in Christ. He now betook himself to the study of theology; went to Halle, where he attended the lectures of Gesenius, Tholuck, Erdmann, and Julius Müller, and afterwards to Berlin, where Neander, Hengstenberg, and Twisten were his teachers. Having completed his studies, he offered himself to the London Jews' Society, was ordained by the bishop of London, and appointed for Constantinople. On his way to the latter city, he went to Pesth, in Hungary, where he stayed for about a year, in the meantime becoming acquainted with Dr. Duncan of Scotland. In Constantinople he only stayed one year, severed his connection with the London society, and entered the services of the Free Church of Scotland, which appointed him as a missionary to Berlin, where he labored from 1844 till 1848. From Berlin he went to Amsterdam, where he soon attracted the attention of Jews and Christians. The church which he built there soon became the nucleus of Christian life for the whole city, and the weekly, which he issued under the title *De Hervort*, soon spread all over the Netherlands. His labors in Amsterdam were greatly blessed—a circumstance which excited the hatred of the Jews, who boasted themselves of being the descendants of those exiles who came from Spain and Portugal, and who, in their fanatical ignorance, could not endure that some of their brethren should leave Judaism and become Christians. With incredible fanaticism they persecuted all converts. It was on Sunday morning, Aug. 1, 1858, when Schwarz had entered the pulpit to preach to about 1200 people, that while in silent prayer he was stabbed in the side by a young Jew, who had followed the preacher without being seen. For a long time his life was endangered, but he finally recovered. He continued for six years longer in his work at Amsterdam, when, in 1864, he exchanged the scene of his long labors for London. Here a large field was opened to him, in which he also labored till Aug. 24, 1870, when he was called to his rest. To Jews and Gentiles, Schwarz preached in English, Dutch, and German, and many of those whom he led to Christ are now ambassadors of the cross. See *Friedensbote für Israel*, 1871, p. 33 sq.; *Saat auf Hoffnung*, vii, 383; viii, 80; *Missionsblatt für Israel*, 1874, p. 83 sq., 92 sq. (B. P.)

Schwarz, J. C. E., a German doctor and professor of theology, was born at Halle, June 20, 1802. After 1829 he labored at Jena, holding the highest ecclesiastical positions, and died there May 18, 1870. He published a number of *Sermons*, which are all enumerated in Zuchold, *Bibliotheca Theologica*, ii, 1205. See also Winer, *Handbuch der theol. Literatur*, ii, 772; *Literarischer Handweiser*, 1870, p. 491. (B. P.)

Schwarz, Josef, a German Jew, was born Oct. 22, 1804, at Floss, in Bavaria. When seventeen years of age he entered the University of Würzburg. In 1833 he arrived in Palestine, and died at Jerusalem Feb. 5, 1865. Schwarz is best known by his works on Palestine. Thus he published, *Hebräische Karte über Palestina* (Würzburg, 1829, and often):—**תבואת השמש**, or *Astronomical and Physical Explanations of the Holy Land* (Jerusalem, 1843):—**הבואה הארץ**, or *Geography of Palestine* (ibid. 1845):—**תוצאות הארץ**, or *Natural History of the Holy Land* (ibid. 1845):—**מנשה הארץ**, or *History of Palestine till 1845* (ibid. 1845). Some of his works were translated into German. His *Geography* was translated into English by Is. Leeser: *A Descriptive Geography and Brief Historical Sketch of Palestine* (Phila. 1850). See Fürst, *Bibl. Jud.* iii, 300 sq. (B. P.)

Schwarz, William, a minister of the Methodist Episcopal Church, was born in Oberachern, grand-duchy of Baden, Germany, Feb. 14, 1826. He was brought up a Roman Catholic, and attended the high-schools of Rastadt and Freiburg, intending to prepare for the priesthood. He came to America in 1845, and united with the Church in New York the next year. In De-

cember, 1846, he was licensed to preach, and in May, 1848, was received into the New York Conference. He was sent as missionary to Germany in 1858, and labored also in Switzerland and Paris. He was transferred to the East-German Conference, and arrived in the United States in May, 1874. His appointment was Melrose, N. Y., where he died March 13, 1875. See *Minutes of Annual Conferences*, 1875, p. 45.

Schwarzburg-Rudolstadt, the name of two German hymnists.

1. **ÆMILIA JULIANA**, countess of Schwarzburg-Rudolstadt, daughter of the count Adalbert Friedrich von Barby, was born Aug. 19, 1637, at Rudolstadt, where she died Dec. 3, 1706. She wrote over four hundred hymns, among others the well-known *Wer weiss wie nahe mir mein Ende?* ("Who knows how near my end may be?" *Lyra Germanica*, ii, 267), which is said to have been written on the occasion of the sudden death of duke George of Saxe-Eisenach while hunting. Her *Hymns* have been published by Dr. Pasig (Halle, 1855). Comp. also Koch, *Gesch. d. deutsch. Kirchenliedes*, iv, 56 sq.

2. **LUDMILLA ELISABETH**. One of her hymns, *Zeuch uns nach dir, so eilen wir*, is found in an Engl. transl. in the *Monthly Relig. Mag.* xxxvii, 1867, p. 338. See **LUDMILLA**. (B. P.)

Schwarzenberg, JOHANN VON, a prominent German statesman, warrior, and author of works for the people in the days of the Reformation, was born Dec. 25, 1463, received a knightly training, and was not less distinguished by herculean stature and physical strength than by courage and skill in the use of arms. A rebuke from his father determined him to avoid all frivolity and immorality of life, and with iron will he persisted through life in attaining to a high moral character. He participated in the expedition to the Holy Land undertaken by the elector Frederick the Wise in 1493 (concerning which see Spalatin, *Hist. Nachl.*, published by Neudecker and Preller, i, 76), and after his return accompanied the emperor Maximilian in his German and Italian campaigns. But though he acquired the reputation of a brave and skilful soldier, he soon turned aside to the work of aiding to fit the State for the accomplishment of its great mission to promote peace and justice, and also the morality and prosperity of its subjects. His first field was in the episcopal principality of Bamberg, where he occupied the post of prime minister (*Hofmeister*) at the beginning of the 16th century, under the bishops Henry III and George of Limburg; and his first notable work was the introduction of a reform in the execution of capital punishments, which subsequently became the law of the empire (the so-called *Carolina* of 1532).

While recognising the need of reform in the State, Schwarzenberg was also convinced of the need of reform in the Church; and as he found opportunity to make himself felt for good in statesmanship, so he readily admitted the claims of duty on him from the side of religion and morality. He was thoroughly prepared for the beginning of the Reformation through zealous study of the Bible, which had, even before Luther appeared, revealed to him the vast difference between genuine Christianity and the actual life of the Church. He was profoundly impressed with the conviction that the creature owes the most perfect obedience to the will of God as revealed in Scripture, and this conviction was the leading motive of his life; but he had likewise learned to know the weakness of human nature, and therefore laid hold on the doctrines of grace in the Bible with all his heart. He naturally threw the weight of his official station, the convincing power of his speech, the iron energies of his will, and the combining and constructive powers of his statesmanship into the scale in favor of the Reformation, and thus became a most powerful instrument for promoting its success. As its progress was rather promoted than hindered by the bishop George, Bamberg soon became a stronghold for the defence and also a cen-

tre from which to carry forward the extension of the evangelical cause. Schwarzenberg's influence was powerfully felt even in the administration of the empire. He had been the representative or companion of his prince in several diets, and had won a high reputation for ability. In 1522-23 he was not only a member of the regency of the empire, but its soul (see Ranke, *Ref. Gesch.* ii, 48 sq.); and it was that body which replied to the brief of pope Hadrian VI with a refusal to stamp out Lutheranism as he had demanded, and urged instead that the estates be convoked in some German city to institute reforms of evils conceded by the pope to exist—a measure which, with some slight modifications, became an edict of the empire early in 1523, and secured a period of quiet during which the Reformation might gather strength.

While Schwarzenberg was thus laboring for the cause of religion in the political field, he was also busy in the domain of literature, and published a number of works designed for the elevation of morals among the people. The earliest of his popular writings was a poem entitled *Kummertrost*, which was called forth by the death of his wife in 1502. He afterwards edited a collection of minor didactic poems under the title *Memorial der Tugend*, and published a poem in condemnation of the practices of the robber-knights, who sought occasion for quarrel that they might have opportunity for plunder, as also one denouncing the drinking usages of his countrymen. Another method adopted by him to promote virtue among the people was the publication of suitable classical works, freely rendered, and accompanied with pertinent remarks from his own pen. Among such works were Cicero's *De Officiis* and the first book of *Tusculan Questions*, the *De Senectute*, and the *De Amicitia*. Himself unacquainted with the ancient languages, he would employ scholars to translate such works into German, and afterwards would popularize them, always using the language of a master, and adding rhymes and illustrations to give more force to the book. The *Teutsche Cicero* was frequently republished during the 16th century.

Bishop George died in 1522 and was succeeded by bishop Wigand, who was at first undecided, then controlled by the Romish clergy, and finally (June, 1524) joined a league organized to enforce the Edict of Worms. Schwarzenberg at once took his daughter out of a convent in Bamberg, and frankly justified his conduct in a letter to the bishop by advancing his evangelical motives (published, with a preface by Andr. Osiander, Nuremb. 1524; comp. Luther's Letter to Schwarzenberg, dated Dec. 21, 1524, in De Wette, ii, 581), and at the age of more than sixty years resigned his position in the principality. The controversy which had arisen broke out in his own family. His son Christoph issued an anonymous book aimed against the Reformed teaching, and designed to counteract the determinative influence of Schwarzenberg with the whole of the numerous family, to which the latter replied in 1524 with the frequently republished *Beschwörung der alten teuflichen Schlange mit dem göttlichen Wort*, a dogmatical work, intended to demolish the false authorities on which his son had built, and to set forth the teachings of the Scriptures in their purity. Some further discussion took place in this dispute, but without eliciting any additional work of importance.

After leaving Bamberg, Schwarzenberg was employed in the Franconian principalities of Brandenburg in a capacity similar to that he had just vacated. The two margraves, Casimir and George, were in sympathy with his ideas—the former through his purpose of securing a strong government, the latter through his unconditional devotion to the cause of the Reformation. Margrave George was absent from his territories, however; and when the emperor took measures to counteract the decrees of the Diet of Nuremberg, the administration of the principality became less decidedly partial to the Reformation. The Peasants' War, too, seemed to effect

a change in Casimir's attitude towards the new religion. In 1526, while the Diet of Spire was in session, Schwarzenberg was at the court of duke Albert of Prussia to represent his government on the occasion of the duke's marriage (see Spies, *Brandenburg Münzbelustigungen*, ii, 29), and availed himself of the opportunity to plead the cause of the Reformation with king Sigismund of Poland and the bishop of Cracow. (Comp. Strobel, *Joh. von Schwarzenberg, zween sehr merkw. Briefe* [Nuremb. 1775]). Duke Albert asked permission to retain Schwarzenberg at his court, at least for a single year, but without success.

After returning to his home, Schwarzenberg demanded in the Territorial Diet, Oct. 1526, that organizations on the evangelical plan be formed, and offered suggestions towards that end. Casimir attempted to temporize, but in vain, and accordingly joined the army of king Ferdinand in Hungary, where he died, Sept. 21, 1527. Margrave George now assumed the government, and at once took decided ground in favor of the Reformation. In March, 1528, the first visitation of the churches was undertaken in connection with Nuremberg. The objections of neighboring bishops, and the warnings of king Ferdinand were disregarded, and a papal brief intended to change the margrave's attitude was returned unopened. A delegated assembly from Franconia and Nuremberg met at Schwabach June 15, and agreed on articles to govern the exclusion of unevangelical persons from the Church. A meeting between the margrave and the elector of Saxony, having relation to ecclesiastical matters, took place in October, 1528, but Schwarzenberg was unable to be present because of sickness, and on the 21st of that month he died at Nuremberg.

See Rossbach, *Verfasser d. Bamb., Brandenb. u. d. heil. Reichs peinl. Gerichts, Joh. Freih. v. Schwarzenberg*, in Schott's *Jurist. Wochenbl.* 3d year, p. 273 sq., and Longolius, *Nachr. von Brandenburg-Culmbach*, iv, 53 sq., who among older writers furnish isolated particulars only; Christ, *De Joh. Schwartzbergico* (Halle, 1726), has reference only to the literary activity of its subject. A very inadequate sketch of the life of Schwarzenberg, which scarcely mentions his relation to the Reformation, appeared in Jagemann and Nöllner's *Zeitschr. f. deutsch. Strafrechtswiss.* i, 133 sq. See also Strömer, *Zween sehr merkw. Briefe*, already cited; Lith, *Erläut. d. Ref.-Hist. a. d. Brandenb.*, in Onolzbach *Archiv*, 1733; Ranke, *Ref. Gesch.* ut sup.; and especially E. Herrmann, *Joh. Freih. zu Schwarzenberg*, etc. (Leips. 1841). The editions of Schwarzenberg's writings are given in Gödeke's *Grundriss zur Gesch. d. deutschen Dichtung*, i, 214.

Schwebel, Johann (1), an evangelical theologian and Reformer in the palatinate Zweibrücken, Rhenish Bavaria, was born in 1490 at Pforzheim, in Baden, and received his early education in the famous Latin school of that town, from which men like Capito Hedio, Gryneus, Haller, etc., came forth. It is not known that Schwebel studied at any higher school. He entered the Order of the Holy Ghost while yet very young, and transferred to it the whole of his property, some part being afterwards returned to him through the intervention of the margrave Philip. In 1514 he was consecrated priest. He spent his time in studying the Scriptures and the writings of the fathers, and thus learned to know the perversions of doctrine and corruption of practice in the creed and worship of the Church; and his surroundings, as also the events of the time, aided to confirm the purpose he had formed of publicly antagonizing the evils he had found. The dispute of the Dominicans of Cologne with Reuchlin (q. v.) had united all the friends of classical and Biblical learning in an endeavor to combat scholasticism, monkish obscurantism, and the exaggerated demands of the Roman curia. Many reformatory spirits were then in Pforzheim or that vicinity; e. g. Gerbel, Capito, Pellican and Sebastian Mynster, Bucer, Ecolampadius, and Irenicus.

Luther's *Theses* became known in 1517, and in the following year, April 25, Luther himself was at Heidelberg engaged in the famous disputation. Melancthon, too, wrote frequently to Schwebel from Wittenberg, and sent him extracts from his lectures on Matthew and Romans (*Cent. Epist.* p. 3), etc.

Such influences served to prepare Schwebel for his reformatory career. He laid aside the garb of his order, and in 1519 became an evangelical preacher in his native town, but was speedily expelled by the margrave Philip. He fled to Franz von Sickingen, and sought, from the asylum furnished by that staunch defender of the Reformation, to influence his countrymen by means of letters. Towards the close of 1522 he published a work entitled *Ermahnung zu dem Questionieren, abzustellen überflüssige Kosten*, in which he censured the abuses connected with the collection of alms in the Romish Church, all intended to secure money to the clergy, from the pope to the lowest monk. He was permitted to return to Pforzheim, and on April 10, 1524, preached there on the theme of the "Good Shepherd." A small evangelical congregation was thus gathered, and was at this time placed under the pastoral care of Johann Unger, who had been tutor in the family of Melancthon, and who remained its pastor until his death, in 1553 (Vierordt, *De Johanne Ungero*, Carolsr. 1844).

While Schwebel was present in the Castle of Sickingen that nobleman introduced the celebration of the mass in the German tongue, and Schwebel heartily approved of the innovation (*Cent. Epist.* p. 337). In 1524 he married, and, like other Reformers, was censured for that step, but defended himself in two treatises on marriage, and particularly the marriage of priests. Sickingen's unfortunate campaign against the elector of Treves and his allies (begun in September, 1522) necessitated the dismissal of his theological guests, and Schwebel went to Zweibrücken, where he became court-preacher and superintendent of the churches of the duchy. He secured the confidence of his patron, the count-palatine Louis II, and found powerful co-laborers in the persons of Jacob Schorr and Jerome Bock, who belonged to the train of that prince. In 1524 Schwebel expounded Matthew, John, and Romans, though he afterwards preached usually on the pericope assigned to the day. His discourses were founded on the Epistle to the Romans. He taught that the chief elements of Christian doctrine are, (1) repentance (*pœnitentia*); (2) justification by faith; (3) love to God and our neighbor; (4) the doctrine of sufferings (*crux*) as conservers of faith; (5) believing prayer in behalf of ourselves and others (*ibid.* p. 16). Elsewhere he says that works grow out of faith; man has free-will, but only to evil naturally, and only by grace to good (*Teutsche Schriften*, i, 81). He regards the sacraments as signs of the grace or the will of God towards us, and as symbols of love among Christians. The bread and wine in the supper become a spiritual food when received by faith.

Besides the German sermon, Schwebel introduced catechetical instruction covering the Decalogue, the Apostles' Creed, the Lord's Prayer, and the words of institution in the sacramental service; and he substituted the singing of German for Latin hymns. In 1529 he prepared a form of Church government, which was approved by Bucer (*Cent. Epist.* p. 133), and continued, in connection with the evangelical clergy of that region, to give attention to this subject for many years (*Teutsche Schriften*, p. 317, 379, etc.). For ten years Schwebel guided the Reformation in Zweibrücken alone. His health began to fail and his strength to decline, and in 1533 he attempted to resign his office, in which purpose he was strengthened by the troubles caused by an assistant named Georgius, who denied original sin and infant baptism, and disturbed the peace of the Church. He was, however, prevailed on to remain, and in that year Caspar Glaser and Michael Hilspach were called to his aid (comp. Croll, *Hist. Scholæ Hornb.* p. 18, 19). Schwebel was prohibited by his official position from

attending any of the larger conferences in which religious and ecclesiastical matters were discussed, but he maintained a steady correspondence with most of the Reformers, particularly Melancthon, Bucer, and Capito. His advice was sought with reference to the desired settlement of the sacramental difficulty, which was attempted in the *Concord of Stuttgart* in 1584, and sought to be confirmed by the *Wittenberg Concord*. The latter document was signed by Schwebel and his colleagues, but with the reservation implied in the words "Vidimus et legimus exemplar concordie." He was essentially a man of peace, and not disposed to let usages and ceremonies cause divisions in the Church (see *Cent. Epist.* p. 297, 351). In few words, Schwebel occupied a position in dogmatics largely identical with that of Melancthon as represented in the *Loc Communes* and the Latin edition of his *Articles of Visitation*; and in Church organization he held to the Reformed system of a presbyterial and synodal constitution emanating from the congregation. If such organization was left uncompleted in his day, he had at least prepared the way for its ultimate consummation. He fell a victim to the plague when scarce fifty years of age, May 19, 1540, and his wife died two days later.

Schwebel's printed works are, *Opera Theologica-rum* (pt. i, Biponti, 1595, 8vo):—*Centuria Epistolarum* (*ibid.* 1597, 8vo):—*Scripta Theologica*, etc., a mere reprint of the two previous works, with preface omitted (*ibid.* 1605, 8vo):—*Teutsche Schriften* (Zweibrück. 1598):—*Ermahnung zu d. Quest. abzustellen überflüss. Kosten* (1522):—*Sermon on the Good Shepherd* (1524).

Schwebel, Johann (2), a supporter of the Reformation in Strasburg, was born at Bischoffingen, near Breisach, in 1499, and was for a time a Cistercian monk at Thennenbach. He left the convent in 1524, and, because of his familiarity with ancient languages, secured the position of teacher at Strasburg, where he died, in 1566. See Röhrich, *Gesch. d. Ref. im Elsass*, i, 255; ii, 55; Vierordt, *Gesch. der bad. Ref.* i, 126.—Herzog, *Real-Encyklop.* s. v.

Schwedler, JOHANN CHRISTOPH, a Lutheran minister of Germany, was born at Krobosdorf, Silesia, Dec. 21, 1672. He studied at Leipsic, and in 1697 was appointed assistant deacon in Niederwiese, in Upper Lusatia. In 1701 he was appointed to the pastorate of that place, and died Jan. 12, 1730. He is the author of about 500 hymns, the most beautiful of which is his "*Wollt ihr wissen, was mein Preis*," translated into English in *Hymnologia Christiana*, No. 620, "Ask ye what great thing I know." See Wessel, *Hymnop.* iv, 463 sq.; Otto, *Lexikon oberlausitzischer Schriftsteller*, III, i, 248 sq.; Koch, *Gesch. d. deutsch. Kirchenliedes*, v, 225 sq.; Knapp, *Evangel. Liederschatz*, s. v. (B. P.)

Schwegler, ALBERT, a German rationalist, perhaps, after Baur, the leading representative of the modern Tübingen school. His father was pastor in the village of Michelbach, Württemberg, and there Albert was born, Feb. 10, 1819. His early instruction was directed by his father, and was supplemented by the schools of Schwäbisch-Hall and Schönlthal, so that he entered the evangelical seminary at Tübingen in 1836 with rare preparatory acquirements. He immediately entered on the study of the Hegelian philosophy, and was so fascinated that he could find no pleasure in the study of Schleiermacher, which he had also undertaken, and considered the relation of that theologian to Christianity as evidence of his intellectual narrowness. Philosophical speculation was less suited to his mind, however, than historical inquiry. He was consequently mightily impressed on its appearance with Strauss's *Leben Jesu*, which he regarded as the culmination of the entire tendency in which the relation of theology to philosophy had been developed. The measures taken by the authorities against Strauss served only to heighten Schwegler's enthusiasm for that author. The longer he studied

that work, however, the more reason did he find for doubt. He believed that the text of the Gospels would afford a more solid historical basis than Strauss had found. His philosophical opinions, too, were becoming uncertain; he came to believe that the Hegelian system did not concede sufficient importance to the factor of personality, and questioned whether philosophy might not become more largely Christian than it then was; and in the end he acknowledged that he could not be certain that he should not become a pietist at last.

While in this state of uncertainty he became a disciple of F. Chr. Baur, in whom he imagined that he had found what he desired. He thoroughly mastered that theologian's theory of the conditions of early Christianity, and subsequently elaborated it in various essays and treatises. While a student, he solved two problems set by the theological faculty—one of which concerned the relation of the ideal to the historical Christ, and the other the Montanist heresy—and obtained both prizes. A brilliant examination, supplemented by the reception of a first prize in homiletics and another in catechetics, brought his student life to a close in 1840. He remained at Tübingen, employed in literary labors, during nine months longer. In 1841 he published his prize essay on Montanism in an enlarged form, under the title *Der Montanismus u. d. christl. Kirche d. 2ten Jahrhunderts*, and afterwards travelled through Germany to Holland and Belgium, with the result that he was confirmed in the tendency he had begun to cultivate. On his return to Tübingen in 1842, he was obliged to assume charge of the affairs of the Church at the neighboring village of Bebenhausen; but he had determined on a literary and academical career, and continued in that relation less than a year. In the autumn of 1843 he qualified himself for a tutorship in the theological seminary by reading before the philosophical faculty an essay on the *Symposium* of Plato, but without obtaining the desired place. In 1844 he, with a number of friends, founded the *Jahrbücher der Gegenwart*, and became the actual editor. His rejection from the theological seminary had the effect to intensify his devotion to the system of Baur, as appears from the work entitled *Das nachapostol. Zeitalter* (Tüb. 1846). This work was finished in six months, and is far inferior to the earlier work on Montanism. Its fundamental proposition is, that primitive Christianity was simple Ebionitism. In 1847 Schwegger published the *Clementine Homilies*, and in 1852 the *Ecclesiastical History* of Eusebius. All his subsequent works are outside the field of theology—*Aristot. Metaphysik* (1847);—*Gesch. d. Philosophie* (1848);—*Römische Gesch.*, of which vol. iii appeared in 1858, carrying the description forward to the Licinian laws. This volume is preceded by a life of the author, from which the data for this article are obtained. Schwegger had in 1848 been made extraordinary professor for Roman literature and antiquities, and afterwards obtained also the chair of ancient history. He died suddenly, Jan. 5, 1857.

Schweinitz, Hans Christoph von, a German hymnist, was born in 1645 at Rudelsdorf, in the Silesian principality of Schweidnitz, and died in 1722. His hymn *Wird das nicht Freude sein*, which he wrote at the death of his first wife, Theodora, has become one of the gems of the German hymns. It has also been translated into English, "Will that not joyful be!" (*Hymns from the Land of Luther*, p. 9). See Otto, *Lexikon oberlausitzischer Schriftsteller* (Görlitz, 1803); Koch, *Gesch. des deutschen Kirchenliedes*, iv, 34 sq.; Knapp, *Evangel. Liederschatz*, s. v. (B. P.)

Schweinitz, Lewis David von, Ph.D., an American clergyman and botanist, was born in Bethlehem, Pa., Feb. 13, 1780. He went to Germany in 1793, where he finished his education and remained till 1812, when he returned to America, and settled at Salem, N. C., as clergyman and superintendent of the financial

affairs of the Moravian Church, South. He returned in 1821 to his native place—Bethlehem—and resided there until his death, Feb. 8, 1834. He was an enthusiastic scientist, making botany his special study. By his own researches he added more than 1400 new species to the catalogues of the American flora, the greater part being fungi, which had been previously but little studied. His principal botanical works are the following: *Conspectus Fungorum Lusatie* (Leips. 1805);—*Synopsis Fungorum Carolinæ Superioris* (edited by Dr. Schwergelien, 1818);—*Specimen Floræ Americæ Septentrionalis Cryptogamicæ* (1821);—*Monograph of the Genus Viola* (1821);—*Catalogue of Plants Collected in the North-west Territory by Say* (1824);—*Monograph upon the American Species of the Genus Carex* (1825);—and *Synopsis Fungorum in America Boreali Media Degentium* (1832).

Schwenkfeld, KASPAR VON, founder of the religious sect named after him, Schwenkfeldians (q. v.). He was born in Ossig, Silesia, in 1490; was a nobleman of ancient lineage, councillor to the duke of Liegnitz, and an earnest advocate of the Reformation. While holding the chief Reformers in the highest esteem, he differed from them on the following points: 1. Schwenkfeld inverted the words of Christ, "this is my body," and read "my body is this"—i. e. such as this bread, which is broken and consumed; a true and real food, which nourisheth, satisfieth, and delighteth the soul. 2. He denied that the external Word had any power to enlighten and renew the mind, but ascribed this power to the internal Word, which, according to his notion, was Christ himself. 3. He would not allow Christ's human nature, in its exalted state, to be called a creature or a created substance, as such a denomination appeared to him infinitely below its majestic dignity, united as it is in that glorious state with the divine essence. He died in Ulm about 1561. His character was never impugned by any of his opponents, and his numerous writings (including *Bekenntnis und Rechenschaft von den Hauptpunkten des christlichen Glaubens* [1547], and nearly 100 treatises) are among the most valuable sources of the history of the Reformation.

Schwenkfeldians, or **Schwenkfelders**, a religious sect in the 16th century deriving its name from Kaspar Schwenkfeld (q. v.). He often declared his unwillingness to form a separate sect, but after his death numbers who had embraced his views were subjected to severe persecution, especially from the Lutheran clergy. In 1719 the Jesuits endeavored to effect the conversion of this people, but, failing, they reduced them to slavery. They fled into Lusatia and other parts of Saxony; but protection being withdrawn there after eight years (1734), a number of them emigrated to Altona, Denmark. Many others, by the permission of the English government, came to Pennsylvania; and though in 1742 they were all invited back to Silesia, with the promise of the return of their estates and the full enjoyment of toleration, none could ever be induced to return. They celebrated their arrival in Pennsylvania by a "festival in grateful memory of all mercies and divine favors manifested to them by the Father of mercies." They still continue to celebrate the anniversary. Reference to the peculiarities of doctrine is made in the article SCHWENKFELD (q. v.). This sect has a service in reference to infants unknown among other religious bodies. As soon as a child is born, a preacher is called in to pray for its happiness and prosperity, exhorting the parents to bring it up in the fear of the Lord. A similar service is held in the church as soon as the mother is able to attend with the child. In their government they are Congregational, electing annually the minister, trustees, and other officers of their Church. They choose their pastors by lot, instructing them in their duties if uneducated when chosen. They number about 300 families, from 800 to 1000 communicants, 5 ministers, and as many churches. The language for social intercourse and private worship is German.

Schwestriones, a name of reproach, "Sisterers," given to the Lollards and Beghards (q. v.).

Schyn, HERMANN, author of the *Historia Mennonitarum* [see MENNO; MENNONITES], was born at Amsterdam in 1662, and studied at Leyden and Utrecht, being made M.D. in 1682. After settling at Rotterdam as a physician, he began the study of theology, and in 1686 was chosen preacher by the congregation of Mennonites in that city. In 1690 he removed to Amsterdam, and entered on a career in which he administered the duties of the sacred office during thirty-seven years with fidelity and success. He died in 1727. As a preacher he had a leaning towards the Cocceian tendency (q. v.), and followed the farfetched analytical-exegetical method of the time, but was none the less practical and fervent—somewhat given to the use of mystical phrases, as may be seen in the collection of his sermons, *Heilige Keurstoffen* (1733).

Schyn became known as a writer on practical themes through his *Mensch in Christus* (1721–25) and *Beletselen d. Geestelyken Levens* (1727), and also as an advocate of union among his coreligionists through the *Ontwerp toe Vereeniging der Doopsgezinden* (1723). His principal fame was obtained, however, in the publication of the *Historia Mennonitarum* (Amst. 1723, 1729, 2 vols. [first in Dutch, *Korte Hist.*]). See *Blauptot ten Cate, Geschied. der Doopsgezinden*, etc., ii, 136, and the literature there given; Krohn, *Gesch. der Wiedertäufer*, p. 136 sq.

Sciaditis, in Greek mythology, was an appellative of *Diana*, who possessed a temple at Scia, in Arcadia, which had been built by Aristodemus.

Sciallius, in Greek mythology, was an appellative of *Apollo*.

Sciamanacy, or **Sciomancy** (Gr. *σκιά*, a shadow, and *μαγεία*, divination), a species of divination, by which it was pretended the dead were brought from the shades below. See *DIVINATION*; *NECROMANCY*.

Sciapōdēs was a name in Greek mythology. A fable of the ancient Greeks recites that a people lived in India whose feet were so large as to be capable of serving as umbrellas. The Sciapodes (*shadow-footed* people) were accordingly in the habit of seating themselves and interposing a foot between the sun and their persons.

Scias, in Greek mythology, was a nymph from the forests of Tanagra, the wife of Cephissus and mother of Elinus. Eunostos, a son of the latter, became notorious through his indifference towards Ochine, the daughter of Colonus.

Science (ἡ μάθησις, *maddā*; Dan. i, 4, *knowledge*, as elsewhere rendered). In one passage only (1 Tim. vi, 20) this word has also been given by our translators as the equivalent of the Greek term γνῶσις, a word which is used about thirty times in the New Test., but which in all other passages is properly rendered *knowledge*. It doubtless here refers to the so-called *gnosis*, or that affectation of spiritual knowledge which set itself in array against the Gospel of Christ, and which boasted of its superior insight into the nature of things. It was from this sort of pretentious knowing that the *Gnostics* derived their name, and they were among the earliest corrupters of the simplicity of the Gospel of Christ. See *GNOSTICS*. Many readers have erroneously supposed that Paul is speaking of something else than the "knowledge" of which both the Judaizing and the mystic sects of the apostolic age continually boasted, against which he so urgently warns men (1 Cor. viii, 1, 7), the counterfeit of the true knowledge which he prizes so highly (xii, 8; xiii, 2; Phil. i, 9; Col. iii, 10).

It was not until after the accession of David that the Jews became remarkable for their intellectual culture; but the patriarchs probably possessed a considerable knowledge of practical astronomy [see *ASTRONOMY*],

such as is still popular among pastoral tribes, probably corrupting it by an admixture of judicial astrology. See *ASTROLOGY*. The literature of the Hebrews was chiefly limited to ethics, religion, the history of their nation, and to natural history, on which Solomon wrote several treatises no longer extant. If the phenomena mentioned in Scripture had been described with the accuracy of modern physical science, they would have been unintelligible to the persons for whose use the sacred writings were originally designed. The most numerous references to Oriental science occur in the book of Job (see Schmidt, *Biblischer Physikus* [Züllichau, 1731, 1748]).

In modern times the appeal of rationalists and semi-infidels has especially been to the discoveries of science, especially geology (q. v.), as militating against the Bible; but in every instance a careful and candid comparison has shown their compatibility. See *INTERPRETATION, BIBLICAL*.

SCIENCE AND REVELATION. It is an undeniable fact that there is a controversy between scientists and theologians, but we propose to answer in this article the question, Is there any antagonism between science and revelation? It may be well to define the position which some of the most distinguished scientists take, and which they claim to be alone tenable. Prof. Huxley says, "There is but one kind of knowledge, and but one method of acquiring it;" that that kind of knowledge makes "scepticism the highest of duties, blind faith the one unpardonable sin." He describes all faith as "blind" which accepts anything on any kind of authority but that of scientific experience. He describes true religion as "worship, 'for the most part of the silent sort,' at the altar of the Unknown and Unknowable," and proclaims "justification, not by faith, but by verification," as the gospel of modern science (*Lay Sermon*, read at St. Martin's Hall, London, and published in the *Fortnightly Review*, Jan. 15, 1866). He further says that "the improver of natural knowledge absolutely refuses to acknowledge authority as such," and maintains that the method of the inductive sciences is the only method by which any human creature can arrive at any sort of truth. The natural consequence is that such men find themselves opposed to revelation, which assumes that man by searching cannot find all truth, and therefore teaches what is, otherwise, unknown and unknowable. Many scientists assert that their investigations prove the falsity of the statements and teachings of Scripture. That the conclusions of scientists may not harmonize with what they believe to be the teachings of Scripture we readily admit; but that the real facts taught in the one contradict, antagonize, those revealed by the other we as unhesitatingly deny. In fact, revelation, as we hope to show, really has no controversy with science. Let us glance at some of the alleged contradictions.

1. *Genesis*.—The first chapters of this book have been the great bone of contention, theologians having been wont to assume that Moses asserts the formation of the entire universe, or at least of our own globe, with all its internal and superficial furniture, in six literal days; while scientists at present in the main contend for an immense period of astronomical and geological eras, which they claim that they read in the nebular reductions, the rocky strata, and the vital evolutions. But a close inspection of the phraseology of Moses shows that he has not committed himself to either of these opposite opinions. He simply states in ver. 1 the fact of God's creation of our own planet and its solar system, substantially as they now exist, without specifying any particulars as to the time, mode, or order of the process; and in the following verses he narrates successive stages of a subsequent special creation of the present vegetable and animal tribes, either over the earth generally or possibly in a particular locality only. The Bible and modern science thus appear to be discoursing upon two entirely different subjects, and cannot possibly contradict each other.

2. *The Antiquity of Man*.—The questions of the antiquity and unity of the human race upon the earth are indeed more explicitly touched upon in the Bible, but modern science has hitherto adduced nothing adequate to overthrow the Biblical testimony. Presumptions to the contrary, it is true, have been raised in some quarters by certain phenomena; but these admit of so ready an explanation on other grounds, and are rebutted by so many other facts, that scientists at large still hold fast to the opinion that man is of comparatively recent origin, and must have sprung from a single family.

3. *The Flood*.—The universality of Noah's flood as to the surface of the globe, although we admit the first inference from the Biblical account, is found on a closer examination not to be necessarily intended by its language; and a consideration of its uselessness and impracticability for the mere purpose of drowning a few thousands in a particular locality induced expositors to limit its prevalence long before the modern scientific objections were thought of.

4. *The Resurrection, etc.*—The doctrine of the survival of the soul after death, and of the resurrection of the body, are coming more and more to be seen to be not only not incompatible with physiological science, but to be almost necessary deductions from psychological and metaphysical reasoning, even apart from revelation. If the miraculous element be admitted into nature, and hard facts demand its occasional intervention, as well as its primal impulse, all difficulty on physical grounds vanishes from these problems of the future world. The imperceptible but frequent renewal of the material organism actually furnishes a striking illustration of the continuity of identity in the midst of apparent dissolution and atomic change.

5. *Alleged Unscientific Statements*.—But it is said that certain specific statements of Scripture are shown by science to be false. For instance, in natural history the cone and the hare are classed with the ruminants (Lev. xi, 5, 6; Deut. xiv, 7), whereas in fact they have no cud; and the ant with non-hibernating insects (Prov. vi, 6-8; xxx, 25), whereas in truth it lies torpid all winter. The answer to this is that the Scripture writers give a correct account of an actual phenomenon, although their descriptions are not couched in scientific terms. Their language is always optical, i. e. in accordance with the exterior or apparent phenomena. As, in the case of the hare, they undoubtedly refer to the constant motions of the lips, which *seems* like chewing the cud. They were not mistaken as to the fact which they meant to state, nor do they use language which when properly interpreted conveys a false impression. If their hearers or readers already had an impression scientifically erroneous in some respects, they were not bound to correct that impression, provided it did not interfere with the purpose or truth which they had in view. Popular language always uses this liberty, but it is not therefore chargeable with untruth. Science is simply systematized knowledge, and therein it differs from popular or general information. The facts remain the same both to the scientific and unscientific man; they are only viewed in a different light and with different associations. The Biblical writers, of course, having no scientific notions or standpoint after the Baconian school, ignore its nomenclature, and express themselves in the plain language of fact or sensible phenomena. They broach no theories, they employ no technical terms; they confine themselves to actual things in their phenomenal forms. This is a universal rule with them. Hence they seem to disagree with science whenever its rigid canon of verbal precision is applied to them, for of course their vocabulary is different; but the dispute is about words only, while the things meant are identically the same. The sacred writers, in scholastic phrase, if you please, use solecisms in grammar, inelegancies in rhetoric, the *argumentum ad hominem* in logic, an unscientific terminology throughout—for such was their vernacular; but they never fall into error as to matter

of fact. The conflict between science and revelation, when carefully scrutinized, is seen to be only a disagreement between particular theories of particular scientists and particular interpretations of particular passages of Scripture. And, furthermore, when the scientific principle of thought is compared with the theological, or the unveiling of the Holy Ghost to men, they are found to be on two absolutely different planes, and unable, properly compared, to clash with each other. The fundamental error of the scientists of our day is in their method. It is mechanical, external, superficial, false. They exalt the senses, which are the mere servitors of mind, into the mind's masters, and terrible is the bondage to which they thus doom the spirit of man. Admit that mind is a force, and that there is an infinite mind, and then that in Scripture which to many scientists is most objectionable, viz. the miraculous, becomes natural and easy of belief. The main body of scientists of the present day are firm believers in Christianity, and science has no warmer advocates than are to be found among Christian believers. See REASON AND RELIGION.

Scillus, in Greek mythology, was the father of Alesius, one of the suitors of the beautiful Hippodamia. The town of Alesia, in Elis, is said to have derived its name from his son.

Sciomancy. See SCIAMANCY.

Sciooppius, KASPAR, a noted German controversialist, was born at Neumark, in the Palatinate, May 27, 1576. He studied at Heidelberg, Altdorf, and Ingolstadt, and in 1597 visited Italy, Bohemia, Poland, and Holland. He had already become favorably known by his Latin verse and his notes upon different Latin authors. In 1598 he abjured Protestantism and became a Roman Catholic, in consequence of which the pope gave him the title of a knight of St. Peter, and soon afterwards made him Comes Apostolicus de Claravalle. He also settled upon him a pension of 600 florins. Sciooppius, after becoming Roman Catholic, studied theology, and published some smaller works, partly to extenuate his own conduct, and partly to sustain the pope against the Protestants. Henceforth his career is a series of fierce onslaughts, chiefly against the Protestants, but also directed against all whom accident or malice led him to hate. The first person whom he selected was Joseph Scaliger, who had left the Romish Church and espoused Protestantism. In 1607 he launched against him his *Scaliger Hypobolimus*, in which he also attacks Henry IV of France. Sent in 1608 by the court of Rome to the Diet of Ratisbon for the purpose of observing the religious condition of Germany, he published in the same year more than twenty pamphlets against the Protestants, recommending the Catholic powers to exterminate them. At Venice, in the following year, he was imprisoned for a short time (three or four days) because of his endeavor to persuade Paolo Sarpi to come over to the pope's party. He next visited Vienna, and the emperor, a devoted Catholic, gave him a favorable reception, made him councillor to his court, and raised him to the rank of count palatine. In 1611 he published two works, one called *Ecclesiasticus Autoritati Ser. D. Jacobi, Magnæ Britanniæ Regis, Oppositus*, and the other, *Collyrium Regium, Ser. D. Jacobi, Magnæ Britanniæ Regis*, etc., both being directed against James I of England, but the first also containing fresh attacks on Henry IV of France. Sciooppius returned to Italy, but shortly (in 1613) went to Madrid, where he was dreadfully beaten by the servants of lord Digby, the English ambassador, in retaliation for the abuse of his sovereign. He fled to Ingolstadt, where he published his *Legatus Latro* against the ambassador. In 1617 he settled in Milan, Italy, where he resided for the next twelve years. Returning to Germany in 1630, he requested from the Diet of Regensburg a pension, which being refused through the influence of the Jesuits, he became a bitter enemy to the order. He first attacked them anonymously, but in 1634 openly, in a work called

Astrologia Ecclesiastica. His life being endangered by these attacks, he retired to Padua, where he began to occupy himself with writing a commentary on the Apocalypse; but before he had completed this work he died, Nov. 19, 1649. Of Scoppius's works, the principal are, *Poemata Varia* (Heidelb. 1593):—*Verisimilium Libri Quatuor*, etc. (Norimb. 1596):—*Suspectæ Lectiones* (ibid. 1597):—*De Arte Critica* (ibid. 1597):—*Symbola Critica in Apuleii Opera* (Augsb. 1605):—*Observationes Linguae Latinae* (Frankf. 1609):—*De Rhetoricarum Exercitationum Generibus* (Milan, 1628); and others.

Sciras, in Greek mythology, was an appellation of *Minerva*, a temple being dedicated to her under this name in Phalerum, the harbor of Athens, and another on Salamis.

Sciron, in Greek mythology, was (1) a notorious robber who established himself on the rocks between Athens and Megara, where he compelled the passers-by to wash his feet, and afterwards kicked them into the sea, upon which a large turtle seized and devoured them. Theseus served him as he had formerly served others. (2) The son of Pylas. He married a daughter of Pandion, and disputed with Nisus, a son of Pandion, the supremacy over Megara. Æacus, being appointed to arbitrate between them, gave the government to Nisus, and the conduct of the army in time of war to Sciron. Others designate him as the husband of Chariclo, the father of Endeis, the son-in-law of Cychreus, and the father-in-law of Æacus.

Sclavina, a long gown worn by Romish pilgrims.

Slavonic Versions. See SLAVONIC VERSIONS.

Scofield, ALANSON, a Presbyterian minister, was born in Albany County, N. Y., Sept. 3, 1800, and worked at his trade as a tanner until he was of age. He then commenced a course of study, and graduated at Union College, N. Y., in 1830. After studying theology about one year at Andover, Mass., he entered Princeton Seminary in the fall of 1831, and remained two years. He was licensed by the Presbytery of Albany Oct. 8, 1833, and dismissed Feb. 6, 1838, to the Presbytery of Geneva as a licentiate. He was in the service of the American Education Society for six years, and resided at Auburn, N. Y., until 1839. He was ordained Oct. 3 of the same year, and was pastor of the Church of West Fayette, Seneca Co., N. Y., from 1839 to 1845, and three years stated supply of the Church at Red Hook, N. Y. In 1848 he removed to Michigan, and was stated supply for two years at Augusta. Afterwards he served the Church at Stony Creek, in the Presbytery of Wastenaw, as pastor from 1849 to 1856. Then he was stated supply at Cornumia and Newburg, in the Presbytery of Saginaw, Mich., for a period of four years, first at Fremont, and afterwards at Quincy. In 1864 or 1865 he was transferred from the Presbytery of Saginaw to that of Coldwater. About the year 1868 he removed to California, Mich., where he resided during the remainder of his life, serving the Church in that place, the whole or part of his time, as its stated supply. He became in 1871, by a change in the presbyteries necessitated by the reunion, a member of the Monroe Presbytery. During the last four years of his life he was in the service of the Presbyterian Board of Publication as a missionary. He died suddenly of apoplexy on Sabbath morning, June 18, 1876. Mr. Scofield was a man of immense physical vigor, of untiring energy, wonderful tenacity of purpose, skilled as a debater, genial and warm-hearted, earnest and sound in doctrine, and thoroughly devoted to the interests of the Church. (W. P. S.)

Scolitas, in Greek mythology, was a surname of *Pan*, whose brazen effigy stood at Megalopolis.

Scoptzy. See SKOPTZY.

Scopos (Σκοπός, a watchman or mark), the popular epithet given by Josephus to an eminence at seven furlongs' distance, on the north, from Jerusalem, whence Cestius approached the city from Gabaon (el-Jib), and

Titus from Gophna (Jifna), the latter obtaining a fine view of the Temple (*War*, ii, 19, 4; v, 2, 8). Dr. Robinson locates it on the high level tract and brow upon the Nablûs road, being the extension of the Olivet range (*Bib. Res.* i, 407), a position in which Barclay (*City of the Great King*, p. 74) and Porter (*Handb. for Syria*, p. 118) coincide. According to Lieut. Conder, this spot is still called by the equivalent Arabic name *El-Meshârif*, and answers to all the requirements of the military notices (*Quar. Statement of the "Pal. Explor. Fund,"* April, 1874, p. 111; comp. p. 94). See JERUSALEM.

Scoresby, WILLIAM, D.D., an English clergyman and Arctic explorer, was born at Cropton, Yorkshire, Oct. 5, 1789. He commenced a seafaring life at the age of ten, and in his twenty-first year succeeded his father as commander of the *Resolution*, and carried on the business of whale-fishing. In 1822 he explored the east coast of Greenland, and upon his return devoted himself to study, entering Queen's College, Cambridge, from which he graduated as B.D. in 1834. In 1839 he received the degree of D.D., and labored faithfully as chaplain of the Mariners' Church in Liverpool, and afterwards at Bradford, Yorkshire, till failing health compelled him to retire to Torquay. He here engaged in scientific and philanthropic labors. For the better prosecution of his researches he made a voyage to the United States in 1847, and to Australia in 1853, returning from the last-named country in 1856, enfeebled by the arduous labors which he had undergone. He died at Torquay March 21, 1857. His principal works are, *An Account of the Arctic Regions* (1820, 2 vols.):—*Journal of a Voyage to the Northern Whale Fishery* (1823):—*Discourses to Seamen* (1831):—*Zoistic Magnetism* (1849):—*Sabbaths in the Arctic Regions* (1850); and others. His *Life* has been written by his nephew, R. E. Scoresby-Jackson (London, 1861).

Scorpion (שְׂפָרִיָּס, *akrâb*, Deut. viii, 15; Ezek. ii, 6; σκοπιος, Luke x, 19; xi, 12; Rev. ix, 3, 5, 10), a well-known injurious insect of hot climates, belonging to the class *Arachnida* and order *Pulmonaria*, which is shaped very much like a lobster. It lives in damp places under stones, in clefts of walls, cellars, etc.; and in summer nights even creeps about in streets and on steps (Russell, *Aleppo*, ii, 119). The head and breast are closely joined, and there are two large feelers in front. The eyes are arranged much as in the spiders—one pair in the centre of the thorax, the rest symmetrically on each side of the front. In the genus *Scorpio* proper there are six of these organs, in *Buthus* eight, and in *Androctonus* twelve. All these, however, may be quite correctly considered as scorpions. There are eight feet, covered with hair. There is a very active tail, of six joints, which ends in a crooked point (Pliny, xi, 62) like a fowl's claw (Schulz, *Leitung*, iv, 351). They are carnivorous in their habits, and move along in a threatening attitude with the tail elevated. The sting, which is situated at the extremity of the tail, has at its base a gland that secretes a poisonous fluid, which is discharged into the wound by two minute orifices at its extremity. The scorpion makes a painful wound in men and beasts (Pliny, xi, 62; Höst, *Murkokko*, p. 302; comp. Minutoli, *Trav.* p. 205) which produces fatal results (Pliny, xi, 30; Sonnini, *Trav.* ii, 312; Prosp. Alpin. *Rer. Ægypt.* p. 206; comp. Latorle, *Voyage*, p. 50), unless speedy remedies be provided (such as scarifying the wound, sucking out the poison, etc. [Russegger, *Reis.* II, ii, 223]). This is true, however, only of the Oriental scorpion (though Thomson, *Land and Book*, i, 379, says its bite is never fatal in Syria), that mentioned in the Bible (see description and plates in Rüsel, *Insecten-Belustig.* iii, 370 sq., Tab. 65; comp. Sir. xxvi, 10; Ezek. ii, 6); for the wound of the European, or *Italian*, scorpion is less dangerous. The former is distinguished by its shining black breastplate, which has given it the name *Scorpio afer*. (Many plates are given in Ehrenberg's

Icon. et Descript. Animal. Icon. i, *Der Animal Evertebr.*; but without descriptions. Three kinds of scorpions are named in the *Descript. de l'Égypte*, xxii, 409 sq.) The wilderness of Sinai is especially alluded to as being inhabited by scorpions at the time of the Exodus (Deut. viii, 15), and to this day these animals are common in the same district as well as in some parts of Palestine. Ehrenberg (*Symb. Phys.*) enumerates five species as occurring near Mt. Sinai, some of which are found also in the Lebanon. Ezekiel (ii, 6) is told to be in no fear of the rebellious Israelites—here compared to scorpions. There are many scorpions in Palestine—in the plains of Jordan, on the mountains of Judah, etc. (Troilo, *Trav.* p. 433; Schulz, *Leitung*, iv, 352, Thomson, *Land and Book*, i, 378 sq.), and they are proverbially common in Baniās (Cæsarea Philippi). A part of the mountains bordering on Palestine in the south was named from them *Acrabbin*. See Bochart, *Hieroz.* iii, 538 sq.; Shaw, *Trav.* p. 168. On the scorpion of Asia Minor, see Van Lennep, *Bible Lands*, p. 309 sq.; and on those of Egypt, Olivier, *Voyage*, v, 171. Those found in Europe seldom exceed two or three inches in length, but in the tropical climates they are occasionally found six inches long. Those of Palestine are from one to three inches in length. There are few animals more formidable, and none more irascible, than the scorpion; but, happily for mankind, they are equally destructive to their own species as to other animals. Maupertius put about a hundred of them together in the same glass; and they scarcely came into contact when they began to exert all their rage in mutual destruction, so that in a few days there remained but fourteen, which had killed and devoured all the rest. But their malignity is still more apparent in their cruelty to their offspring. He enclosed a female scorpion, big with young, in a glass vessel, and she was seen to devour them as fast as they were extruded. There was only one of the number that escaped the general destruction—by taking refuge on the back of its parent; and this soon after avenged the cause of its brethren by killing the old one in its turn. Such is the terrible nature of this insect; and it is even asserted that when placed in circumstances of danger, from which it perceives no way of escape, it will sting itself to death. Ordinarily, however, it is said to be extremely fond of its young, which it carries about on its back.

A scorpion for an egg (Luke xi, 12) was probably a proverbial expression. According to Erasmus, the Greeks had a similar proverb (*ἀντί περκῆς σκορπίον*). But the creature has, of course, no likeness to an egg, as some have supposed that this passage implies (comp. Thomson, *Land and Book*, i, 379 sq.). The apostles were endued with power to resist the stings of serpents and scorpions (Luke x, 19). In the vision of St. John (Rev. ix, 3, 10) the locusts that came out of the smoke of the bottomless pit are said to have had "tails like unto

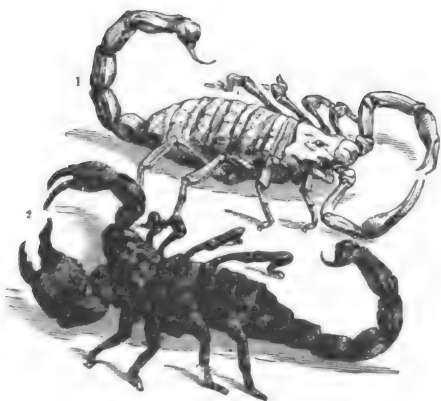

scorpions," while the pain resulting from this creature's sting is alluded to in ver. 5. The prophecy here has received many fanciful interpretations. See REVELATION, BOOK OF. The "scorpions" of 1 Kings xii, 11, 14; 2 Chron. x, 11, 14, have clearly no allusion whatever to the animal, but to some instrument of scourging, unless, indeed, the expression is a mere figure. Celsius (*Hierob.* ii, 45) thinks the "scorpion" scourge was the spiny stem of what the Arabs call *Hedek*, the *Solanum melongena*, var. *esculentum*, egg-plant, because, according to Abul-Fadli, this plant, from the resemblance of its spines to the sting of a scorpion, was sometimes called the "scorpion thorn;" but, in all probability, this instrument of punishment was in the form of a whip armed with iron points, "Virga—si nodosa vel aculeata, scorpion rectissimo nomine vocatur, qui arcuato vulnere in corpus infigitur" (Isidore, *Orig. Lat.* 5, 27; and see Jahn, *Bibl. Ant.* p. 287). In the Greek of 1 Macc. vi, 51, some kind of war missile is mentioned under the name *σκόρπιον*; but we want information both as to its form and the reason of its name. See Smith, *Dict. of Class. Antiquities*, art. "Tormentum." Another tropical use of the word is given in the Mishna (*Chelim*, xii, 3).

Scorpios, in mythological astronomy, was the *Scorpion* in the circle of the zodiac, a monster which Diana sent to encounter Orion when pursued by the latter.

Scot, REGINALD, was the younger son of John Scot of Scotshall, near Smeeth, Kent, England, and was born in the first half of the 16th century. He studied at Oxford, and upon his return home devoted himself exclusively to learned pursuits. His famous work, *The Discoverie of Witchcraft*, was published in 1584, and is designed to combat the prevalent belief on the subject. It called forth the *Dæmonology* of James I, who informs us that he wrote it "chiefly against the damnable opinions of Wierus and Scot, the latter of whom is not ashamed in public print to deny there can be such a thing as witchcraft." Scot's work passed through three editions and was translated into French and German. It was ordered to be burned by the common hangman, and copies of it are now extremely rare. He published *A Perfect Platform of a Hop Garden* (1576). His death occurred in 1599.

Scotch Baptists. In Scotland a particular class of Baptists has long existed under this name. With the exception of baptism, they are nearly allied in sentiment to the old Scotch Independents—followers of Robert Dale (q. v.). Mr. Carmichael, pastor of an Antiburgher congregation at Cupar, in Angus, having changed his views, was baptized in 1765 by Dr. Gill in London. Returning to Edinburgh, he administered that ordinance to five others. In 1769 he was joined in the pastorate by a Mr. M'Lean, who bore an important part during the various internal dissensions which arose. Churches founded in Edinburgh, Glasgow, and Dundee, after great depression, gathered strength and influence, and in 1795 several societies were formed in the north of England. At the census of 1851 they were returned as having fifteen meeting-houses in England with 2037 sittings. The Scotch Baptists are Calvinists; are strictly congregational; they observe the love-feast, and upon certain occasions the kiss of charity, and also wash one another's feet when it is really serviceable as an act of hospitality; they abstain from eating blood and things strangled; advocate plain attire; they hold, with respect to marriage, that, while one of the parties being an unbeliever does not dissolve that relation when once entered into, it is the duty of Christians to marry only in the Lord. For further information consult the works of M'Lean, Inglis, Braidwood, and Jones, and that of their great opponent, Andrew Fuller, *Treatise on Sandemanianism*. See Eadie, *Eccles. Cyclop.* s. v.; Blunt, *Dict. of Sects*, s. v.; *Religions of the World* (Lond. 1877).

classical architecture. The old English name for a corresponding moulding very frequently employed in Gothic architecture is *casement*. See COLUMN.

Scotists, a philosophico-religious school which arose at the end of the 13th and the beginning of the 14th century. It derived its origin from John Duns Scotus (q. v.), and was especially opposed to the Thomists (q. v.). Scotus supposed that rational knowledge arose indirectly from divine illumination, in so far as the human mind discovers divine ideas in the objects of which they have been the types. Hence all science belongs to theologians. The struggle between the Scotists and the Thomists turned principally upon theological questions relative to liberty, grace, and predestination. One great question in particular was keenly discussed by the two rival sects for a long period, and indeed still divides the doctors of the Church of Rome at the present day—viz. whether the sacraments confer grace morally or physically? The physical efficacy of the sacraments was maintained by the Thomists, while their moral efficacy was inculcated by the Scotists. The followers of Duns Scotus alleged both original sin and grace to be the invariable attributes of all men, and thus they held them to be developments of the spiritual world in the ordinary course of providence. At the Reformation in the 16th century, when the Protestant party had succeeded in directing the attention of the Church to these delicate points, the Jesuits adopted the views of the Scotists. The Scotists defend the pretended immaculate conception of the Virgin Mary.

Scotitas, in Greek mythology, was a surname of *Jupiter* in Laconia.

Scotland, one of the three kingdoms of the British empire in Europe, and part of the island of Great Britain. In addition to the mainland, there are several groups of islands on the north and west coast. The extreme north point of the islands is Unst, in the Shetland group, lat. 60° 50', and their most westerly point St. Kilda, in the Hebrides, long. 8° 35' W. The greatest length of the mainland, from Dunnet Head, in the north, to the Mull of Galloway, in the south, is about 280 miles; and its greatest breadth, from Buchan Ness, in the east, to Ardnamurchan Point, in the west, about 170 miles. Scotland is geographically divided into two distinct regions—the Highlands, north of the Grampian Mountains, and the Lowlands, south of that range. *Geologically*, Scotland is divided into three distinct regions: 1. The southern, or Older Palæozoic, which includes the region between the southern boundary and a line running east-northeast from Girvan, on the Frith of Clyde, to the Siccar Point, on the east coast. 2. The central, or Newer Palæozoic, consisting of the Devonian or Old Red Sandstone and the Carboniferous formations, embraces the basins of the friths of Clyde, Forth, and Tay, with an area of about 5000 square miles. 3. The northern division, of crystalline and metamorphic rocks, comprises the whole of the remainder of Scotland, and has an area of 19,000 square miles. The climate is so tempered by the influence of the ocean that, notwithstanding the high northern latitude of the country, the thermometer rarely falls to zero, nor does it often rise above 80° in summer; the mean temperature is 47°.

Politically, the kingdom is divided into thirty-three counties, grouped in eight geographical divisions, with a total area of 30,463 square miles, of which the islands comprise about 5000. The population in 1871 was 3,360,018, of whom 1,603,143 were males and 1,756,875 females. The people are divided into the Highlanders and the Lowlanders, two distinct stocks, differing in language, manners, and dress. The language of the Highlanders is the Erse, or Gaelic, a Celtic dialect bearing no analogy to the English. The peculiarities of language, costume, etc., are gradually falling into disuse. Their chief vices are intemperance and unchastity; so that in 1872 nine per cent. of the births were illegitimate, the proportion rising to sixteen and four tenths per cent. in Banff. In general government Scotland forms an integral part of the United Kingdom, standing on the same footing with England, except in regard to law and law-courts and the form of Church government, upon which points express stipulations exist in the articles of union between the two kingdoms. The nobles elect of their own sixteen peers to represent them in the House of Lords, and in 1874 the country was represented in the House of Commons by sixty members.

History.—The original Scotland (or Scotia) was Ireland, and the Scots (or Scoti), at their first appearance in authentic history, were the people of Ireland. Scotland was known to the Romans by the name of *Caledonia*, and was inhabited by savage tribes of Celtic race. They were polygamists and idolaters, their religion being druidical. They were hardy and brave, and offered to their Roman invaders a fierce and obstinate resistance. In the reign of Titus (A.D. 79–81), Julius Agricola led a Roman army beyond the friths of Forth and Clyde, and in 84 defeated the Caledonians under Galgacus. He and his Roman successors failed to thoroughly subdue the country, and withdrew in the early part of the 5th century. Between the two walls in the province Valentia (Northumberland, Dumfriesshire, etc.) dwelt five tribes who had become practically Romanized and civilized, and who, after the withdrawal of the Romans, formed a union called "Regnum Cumbrense." The Saxons arrived in Scotland in 449, conquered and settled the Lowlands, and one of their leaders, Edwin, founded the present capital, Edinburgh (Edwinstown). About 503 the Scots, from Ireland, crossed over to Scotland and settled on the west coast, establishing a kingdom under Fergus, son of Erc. His nation had been converted to Christianity by St. Patrick. Under Conal, his grandson, Columba began the conversion of the northern Picts. In the middle of the 9th century the Scots acquired a predominance in the country, the Picts disappearing as a people (probably amalgamated and absorbed by the Scots) during the reign of Kenneth, who became king in 836. In 866 the Danes, under the vikings, began to invade Scotland, and continued their incursions, until, in 1014, after a series of defeats by Malcolm II, they gave up the contest. During the reign of Constantine (904–953), the seat of the ecclesiastical primacy was transferred from Dunkeld to St. Andrew's, and the regal residence fixed at Scone. At the latter place, in the sixth year of his reign, Kenneth, the bishop, and the Scots swore to observe the laws and discipline of the faith and the rights of the churches and the gospels. This seems to indicate the meeting of some sort of council, civil or ecclesiastical, or, more probably, a combination of both, according to the form prevalent at this period both among the Celtic and Teutonic nations. During the reign of Malcolm III (1057–1093), a great social and political revolution occurred in Scotland. In 1072 William the Conqueror invaded Scotland and secured homage from Malcolm as his feudal superior, which homage became a source of much dispute between the two countries. Malcolm's residence in England, and his marriage with the English princess Margaret, led to the introduction of English customs, language, and population into the north-

ern and western districts. King Kenneth transferred his residence to Forteviot, in Strathearn, which had been the Pictish capital, fixing, soon after, the ecclesiastical metropolis of the United Kingdom at Dunkeld, where he built a church dedicated to St. Columba. The condition of the country was greatly improved under David (1124-1153), the youngest son of Malcolm, who was all to Scotland that Alfred was to England. Conforming to the rules of the Church and the principles of religion, he never forgot that he, not the clergy, was to rule. He introduced a system of written law superseding the old Celtic traditional usages. David was as great a reformer in the Church as in the State. He established dioceses, encouraged the erection and endowment of parishes, provided for the maintenance of the clergy by means of tithes, and, displacing the old Celtic monastic bodies, introduced the Benedictine and Augustinian orders. There followed several centuries of internal strife and war with England, resulting in much distress and great disorder. During the reign of James V there were much religious agitation and discord. The practical corruptions of the Church were greater than in almost any other country of Europe, and, as a consequence, the principles of the Reformation were pushed further than elsewhere. The Roman Catholic system being overthrown, a contest began between Episcopacy and Presbyterianism, James VI struggling hard to establish an absolute supremacy both in Church and State. The opponents of the crown bound themselves together, first by the National Covenant, and afterwards, in alliance with the English Puritans, by the Solemn League and Covenant. The Act of Union (with England) was formally ratified by the Parliament of Scotland Jan. 16, 1707; it continued unpopular for many years, but the discontent has gradually ceased. For further discussion of the mental and religious life of Scotland consult *Church in Scotland*, in the *Westminster Rev.* Jan. 1868; *Religious Life in Scotland*, *ibid.* July, 1871; Rudloff, *Hist. of Reformation*.

SCOTLAND, CHURCHES OF. See the following articles.

SCOTLAND, EPISCOPAL CHURCH OF. In the latter part of the 16th century, the Scottish nation, disgusted with the lasciviousness, inconsistency, and oppression of the Romish clergy, became unanimous for reform. The papal party soon dwindled to nothing—their bishops forsook their sees and went abroad; but the ancient churches of St. Andrew's, Glasgow, etc., still continued, and were presided over by archbishops and bishops, some of whom had been constituted *before* the Reformation. Of this old episcopate, James Beaton, archbishop of Glasgow, was the last survivor, dying April 24, 1603. James I revived the order (October, 1610), when John Spottiswood, Andrew Lamb, and Gavin Hamilton were consecrated respectively bishops of Glasgow, Brechin, and Galloway by the bishops of London, Ely, and Bath. But the Solemn League and Covenant followed soon after, and this succession came to an end in the person of Thomas Sydserf, bishop of Orkney, who died in 1663. Charles II was scarcely seated upon the throne when he was advised to restore episcopacy, and to suppress, if not all at once, yet by gradual encroachments, the Presbyterian government in the Scotch Church. By the advice of James Sharp, lord Clarendon, high in favor with the king, discouraged the recall of the old Episcopalians who had been long absent from Scotland. The management of the whole affair was left to Sharp, who was placed at the head of the establishment as archbishop of St. Andrew's. On Dec. 15 (or 16), 1661, James Sharp, Andrew Fairfull (Fairfoul), Robert Leighton, and James Hamilton were consecrated to the sees of St. Andrew's, Glasgow, Dunblane, and Galloway by the bishops of London, Worcester, Carlisle, and Llandaff. The selection was unfortunate. Sharp was chiefly known, through the whole period of his episcopate, as the unrelenting foe of the Presby-

terians; Hamilton was good-natured and weak, and both he and Fairfull had been zealous in past times to enforce the Covenant; Leighton was a man of primitive holiness and an accomplished scholar, but in other respects not qualified for his office. The conduct of Sharp, especially in forbidding the clergy to meet in their presbyteries "till such time as the bishops should appoint," greatly irritated the people. The first act of the new Parliament vested the whole government and jurisdiction of the Church in the several dioceses in the bishops, whereas previously the presbyteries had possessed a voice in the administration of the diocese. A proclamation was issued that all who had not obeyed the late act—that is, who held their livings only by virtue of a call from the people and an appointment by the presbytery—should desist from preaching and other ministerial functions. Above two hundred churches were closed in one day, often men of weight and ability being displaced by men unfit, by lack of education and morals, for the pulpit. The Conventicle Act (q. v.), passed by the English Parliament in 1663, was immediately adopted by the Scotch Legislature. Another act followed, substituting a national synod in the place of the General Assembly. The business of the synod was to be laid before it by the crown, and if agreed to by the president, the archbishop of St. Andrew's, and sanctioned by the king, it then became one of the ecclesiastical laws of the land. In 1666 the Covenanters rose in arms, but were entirely subdued, many of them being hanged for rebellion. The course of Sharp in securing hostile legislation and in persecuting the Covenanters was disapproved of by many of the clergy and bishops of the Church. A compromise was proposed by Leighton and approved of by Charles (1667). It was substantially to the effect that the Church should be governed jointly by the bishops and clergy assembled in ecclesiastical court, the bishop acting only as president; that the Presbyterian ministers, in taking their seats, might declare that their recognition of a bishop was made only for the sake of peace. Other concessions were made, so that the episcopacy was reduced to the lowest point of authority compatible with its bare existence. But neither the Covenanters nor Episcopalians would accept the compromise, and matters grew worse until, in 1679, Sharp was assassinated; then a rebellion, and fresh severities on the part of the government. In 1688 the Scotch Convention, in their claim of rights, stated the conditions upon which they admitted William, prince of Orange, to the vacant throne. They affirmed in this state paper that "all prelacy was a great and insupportable grievance." The bishops retired from the convention, the Presbyterians were left to carry matters as they pleased, and episcopacy was once more abolished. At this date the Episcopal Church of Scotland stood thus: there were two archiepiscopal provinces—St. Andrew's and Glasgow—with twelve bishoprics. The clergymen were about 900, some of whom transferred their allegiance to William and Mary, but the greater part declined to do so, and formed a union with the Nonjurors of England, with whom their history is closely entwined for ninety years, until the latter disappeared. In 1702 queen Anne wrote to the privy council, expressing her desire that the Episcopal clergy should be permitted the free exercise of public worship—an act of generosity, as they still declined the oath of allegiance to the reigning family. The next year the Episcopalians presented her an address, in which they mention the suffering of the clergy in 1688 and 1689, and to which the queen returned a kind and gracious answer. Such toleration gave great offence, and the General Assembly addressed their remonstrances to the lord high commissioner. The Act of Union, by which England and Scotland were united, took place May 1, 1707, but did not immediately benefit the Episcopalians, even the English regiments stationed in Scotland not being allowed the use of the English Prayer-book. Queen Anne died in 1714, and the next

year the rebellion broke out in behalf of the Pretender. The Episcopalians were supposed to be favorable to his cause, and were regarded with distrust, and met with very harsh usage. On taking the oath of allegiance, the Episcopal clergy were again permitted, by an act passed in 1719, to officiate in public and to use the English liturgy. They were undisturbed by the authorities until the second rebellion, in 1745, the principal cause of distraction being the controversy among themselves between the Nonjurors (q. v.) and their opponents. The second rebellion of 1745 nearly completed the destruction of Scotch Episcopalianism. The house of Hanover naturally regarded a Church whose bishops were appointed by the Pretender with suspicion. An act was passed forbidding every Episcopal clergyman to officiate without taking the oaths to the government, and in 1746 making more than four persons besides the clergyman's family an illegal meeting. In 1748 it was enacted that none but English or Irish letters of orders should be deemed sufficient to qualify any minister for the exercise of his office in Scotland, and the clergy were only permitted to officiate in their own houses. This state of things continued till the accession of George III in 1760. In 1765 the communion office was revised by the bishops, and brought to its present state. From this period the Church has used the English liturgy, with the exception of the communion office. From the time when the bishops met at Aberdeen and acknowledged George III as their rightful sovereign, the Church ceased to be a Nonjuring Church. In 1792 an act was passed which relieved them from the penalties imposed by the various acts of queen Anne, George I, and George II, but forbade the clergy from officiating in England "except in the case of such as shall have been ordained by some bishop of the Church of England or of Ireland." This prohibition was so far removed in 1840 as to allow them to thus officiate "only with the special permission of the bishop in writing, such permission extending only to two Sundays at a time." The Scottish bishops early in the present century resumed the titles which they had been compelled to lay aside, but these titles are not allowed by law. The Thirty-nine Articles of the Church of England were made the standard of faith, and in 1863 the Prayer-book was adopted as the authorized service-book of the Episcopal Church, permission being given in certain cases to use the Scottish communion office. Several flourishing congregations of English Episcopalians still (1854) declined to recognise the authority of the Scotch bishops or hold communion with their Church, regarding its usages and doctrines on the subject of the eucharist as unscriptural. In 1864 all restrictions on the clergy were removed, save that an English or Irish bishop might refuse institution to a Scottish clergyman on his first presentation to a benefice in England or Ireland. The dioceses of the Scottish Episcopal Church are seven, viz. Moray, Aberdeen, Brechin, Argyle, St. Andrew's, Edinburgh, and Glasgow. The bishops are chosen by the clergy of the diocese and by representatives of the lay communicants, a majority of both orders being necessary to a valid election. One of the bishops, under the name of "primus," chosen by the other bishops, presides at all meetings of the bishops, and has certain other privileges, but possesses no metropolitan authority. The highest judicial body is the Episcopal College, composed of all the bishops. The highest legislative body is a General Synod, composed of two houses—the one of the bishops, and the other of the deans and the representatives of the clergy. Since 1834 the Church has increased quite rapidly. The livings are generally very small, the minimum fixed income being £100 a year, and very few rating higher, unless the ministers have private incomes. Few of the middling class are connected with the Episcopal Church, its members being made up principally of the wealthy nobles and the poor peasantry. In 1841 Trinity College was founded at Glenalmond, in Perthshire, and St. Ninian's Cathedral at Perth was consecrated by the bish-

op of Brechin in 1851. See Burnet, *Hist. of his Own Times*; Spottiswood, *Hist. of the Church of Scotland* (1625; new ed. Edinb. 1847–51, 3 vols. 8vo); Collier, *Eccles. Hist.*; Bishop Skinner, *Eccles. Hist. of Scotland*, etc. (Lond. 1788, 2 vols. 8vo); Russell, *Hist. of the Church in Scotland* (ibid. 1834, 2 vols. 8vo); Lathbury, *Hist. of the Nonjurors*; Cunningham, *Church Hist. of Scotland*; Grub, *Eccles. Hist. of Scotland*; also Marsden, *Dict. of Christian Churches*, s. v.; *Religions of the World* (ibid. 1877).

SCOTLAND, PRESBYTERIAN CHURCHES OF. For information respecting the Established Church of Scotland, the Reformed Presbyterian Church, United Presbyterian Church, Free Church of Scotland, see **PRESBYTERIAN CHURCHES**.

SCOTLAND, RELIEF CHURCH or SYNOD OF, one of the seceding bodies in Scotland which arose out of opposition to the system of Patronage (q. v.). A majority of the Presbytery of Dunfermline having refused to take part in the induction of a minister to the parish of Inverkeithing who was unacceptable to the people, they were cited in 1752 before the General Assembly and ordered to proceed with the settlement of Mr. Richardson, the minister mentioned. Although three formed a legal quorum, and it was well known that three members of the presbytery were willing to comply with the command of the assembly, yet the quorum was raised to five. Three ministers were present on the day appointed for the settlement; but as they were not a quorum, nothing was done. Of the six who refused to comply with the appointment of the Supreme Court, it was resolved that one should be deposed. On Saturday, the day after their report was presented to the assembly, each of the six was singly placed before the bar of the house. Three seemed to yield, two remained firm. Thomas Gillespie, minister of Carnock, came forward with a protestation defending his conduct, and as a result was deposed from the ministry; the vote standing 56 for deposition and 102 declining to vote. Rightly judging that he was illegally and unrighteously deposed, Mr. Gillespie preached next Lord's day in the open air at Carnock. He went to Dunfermline a few months after, and the General Assembly refusing, the next year, to remove his sentence of deposition, he laid the foundation of a new secession. He labored alone until 1757, when a similar congregation was formed by Thomas Boston (son of Boston of Ettrick) at Jedburgh, in consequence of the forcible intrusion of a minister into that parish where the people desired that Boston should be appointed. A third congregation was formed from a similar cause in 1760. The first Relief Presbytery was formed Oct. 22, 1761, and consisted of Gillespie, Boston, and Thomas Colier, according to the words of the original minute, "for the relief of Christians oppressed in their Christian privileges." Its first synod was formed in Edinburgh in 1773, and in 1794 a hymn-book was sanctioned by the synod. In 1807 it numbered about 60 congregations with 36,000 members, and in 1847, 7 presbyteries, 114 congregations, and about 45,000 members. In 1834 proposals were made for a union between the Secession and Relief synods, which was consummated, at Edinburgh, May 13, 1847, under the name of the United Presbyterian Church (q. v.). See Blunt, *Dict. of Sects*, s. v.; Eadie, *Eccles. Cyclop.* s. v. See **PRESBYTERIAN CHURCHES**.

Scotopites, one of the many names of the Circumcellions (q. v.). It is found in Isidore Hispalensis, and in Gratian's *Decretals*, II, xxiv, 3.

Scott, Andrew J., a minister of the Methodist Episcopal Church, was born in Philadelphia, Pa., about 1846. His conversion occurred when he was sixteen, and he was received on trial by the New Jersey Conference in 1866, but was soon disabled by disease which resulted in his death, Jan. 2, 1871. Mr. Scott was affable, kind, and sincere, and as a minister be-

yond reproach. See *Minutes of Ann. Conferences*, 1871, p. 63.

Scott, Archibald, a Presbyterian minister, was a native of Scotland, and migrated in his boyhood and alone to the colony of Pennsylvania, about 1760. He is said to have been originally a laboring man, and to have pored over his books while his horses were feeding. Dr. Cooper, a worthy physician of the colony, being impressed with Scott's remarkable aptitude for learning, was instrumental in introducing him into the family and school of a Mr. Finley, where he enjoyed the advantages of a thorough academical education, which he compensated for in some measure by working on the farm. During the period of his connection with this school he joined the Presbyterian Church, and, for the time, began to entertain some thoughts of entering the ministry. He was for several years a student of theology under the supervision of principal Graham, of Liberty Hall Academy, and during this period supported himself by conducting an academy of high reputation in Augusta County, Va., at which Dr. Campbell laid the foundation of his accurate scholarship. He was licensed to preach by the Hanover Presbytery, Oct. 31, 1777, and was ordained and installed pastor of the united churches of Hebron and Bethel, in Augusta County, in December, 1778, which relation continued for more than twenty years, and was at last dissolved by his death, March 4, 1799. Mr. Scott's charge was a very scattered one, comprehending a district some twenty miles square. Like most of his brethren, he also had a very inadequate salary during the Revolution; but he never suffered anything to divert him from his great work as a minister of the Gospel. "He entered warmly into the American cause, and exhorted his people to fight for freedom. It was his practice to assemble all the children and youth of his charge in different neighborhoods on week-days, to attend to catechetical instruction. It was in this employment that he was engaged on that memorable Saturday of June when the alarm of the approach of colonel Tarleton and his British dragoons spread consternation from Staunton throughout the surrounding valley of Virginia. It is said that Mr. Scott, like his two neighboring brethren, Graham and Brown, exhorted the stripling youths of his congregation to arm themselves and go with their neighbors, to stand with their arms at Rock Fish Gap, on the Blue Ridge Mountains, to dispute the pass with the invader and his legion." It was the recollection of that stand that gave occasion to those memorable words of general Washington—"If I should be beaten by the British forces, I will retreat with my broken army to the Blue Ridge and call the boys of West Augusta around me, and there I will plant the flag of my country." Mr. Scott was greatly beloved and esteemed in his day. He possessed a logical and discriminating mind, and was a strong, vigorous thinker; his preaching is said to have been in a high degree instructive, and often eloquent and powerful. He attached much importance and devoted much time to the religious instruction of the young. Besides the Shorter Catechism which he used, he introduced what was known as *The Mother's Catechism*, a work extending to 32 pp. 8vo, the appendix of which he wrote himself. See Sprague, *Annals of the Amer. Pulpit*, iii, 387; Allibone, *Dict. of Brit. and Amer. Authors*, s.v.; Davidson, *Hist. of the Presb. Church in Kentucky*, p. 29; Foote, *Sketches of Virginia* (2d series). (J. L. S.)

Scott, Charles W., a minister of the Methodist Episcopal Church, was born in Morgan County, O., May 10, 1845, and joined the Church in his eighteenth year. He was admitted into the Pittsburgh Conference in 1866; was superannuated in 1874, and died of consumption, Jan. 28, 1875. He was studious, careful, amiable, devout, and conscientious. See *Minutes of Annual Conferences*, 1875, p. 36.

Scott, Daniel, a Dissenting minister, the son of a merchant in London, was educated with Butler and

Secker under a Mr. Jones, at Tewkesbury, Gloucestershire, from whose seminary he removed to Utrecht, Holland, where he took the degree of LL.D. V. there he changed his views concerning the mode of baptism, and became a Baptist. Returning to England he settled in London, or Colchester, and devoted time to writing. He was never married, and died in retirement near London, March 29, 1759. His works are, *Essay towards a Demonstration of the Sure Trinity* (Anon. 1725, 1738):—*A New Version of Matthew's Gospel*, etc. (1741):—*Appendix to H. Stephens's Greek Lexicon* (1745, 2 vols. 4to).

Scott, David, a Presbyterian minister, was born in Philadelphia, Pa., March 13, 1849. When a lad, his parents removed to New York city, and he received his early lessons in the public schools. At the age of fifteen he entered the employ of the Manhattan Gas Company as a book-keeper, and until he graduated spent his vacations in earning the money needed for his education. He was prepared for college at the Lawrenceville (N. J.) High-school, under Rev. Samuel M. Hamill, D.D. He united on profession of his faith with the Fifteenth Street Church (now Phillips Memorial Church), New York city, at the age of fifteen. He was graduated from the College of New Jersey in 1873, taking a fellowship in the classics of the conditions of which is that the recipient spend one year abroad in some European university. Immediately after leaving college, Mr. Scott entered Princeton Theological Seminary and studied one year at the end of which time he went to Leipsic, Germany, where he pursued the study of theology and philosophy for one year; then returning, he entered the same class in the seminary, and, having finished the remaining two years, was graduated in 1877. He was licensed by the Presbytery of New York, April 4, 1876, and ordained by the same presbytery as an evangelist of the Fourteenth Street Presbyterian Church, June 1, 1877. For nearly a year (from September, 1876, to March, 1877) Mr. Scott was tutor of Latin and Greek in Princeton College, N. J., while pursuing his studies in the seminary. Having been accepted as a missionary by the Presbyterian Board of Foreign Missions, he embarked with his wife, Sept. 1, 1877, for Teheran, Persia. There he remained about sixteen months, during which time he had well mastered the Persian language, when, on account of the continued illness of his wife, by the advice of physicians and of the mission, he returned to the United States, intending again to resume his work in Teheran as soon as possible. He arrived in New York near the end of March, almost immediately afterwards grew ill, and died in that city, April 1, 1879. He was a young man of excellent abilities and of fine scholarship, and his death is regarded as a sad loss to the cause of foreign missions. (W. P. S.)

Scott, Elisha J., a minister of the Methodist Episcopal Church, was born in Greensborough, N. C., Aug. 11, 1803, and joined the Baptist Church at the age of twelve. He continued in that Church until seven years, when he joined the Methodist Episcopal Church, and in 1828 entered the New England Conference. He was ordained deacon June 27, 1830, and elder Aug. 11, 1832. After fifteen years he was superannuated, and was then superannuated for seven years, when he became again effective. He traveled the Montpelier District, Vermont Conference, for years, and took once more a superannuated relation which he held until his death, at Montpelier, Jan. 1866. He was for several years the Conference secretary, delegate to the General Conference in 1836, and editor of the *Vermont Christian Messenger*. See *Minutes of Annual Conferences*, 1866, p. 129.

Scott, Jacob, a minister of the Baptist denomination, was born in Boston, March 1, 1815, and was a graduate of Brown University in the class of 1836, and of the Newton Theological Institution in the class of

His ordination occurred at Petersburg, Va., September, 1842. He was pastor at Petersburg and Hampton, Va., and for two years chaplain at the University of Virginia. Subsequently he had charge of important churches in Portland, Me.; Fall River, Mass.; and Yonkers, N. Y. He was obliged, on account of his health, to retire from the ministry. For some time he was superintendent of schools in Malden, Mass., where he died, Dec. 10, 1871. (J. C. S.)

Scott, James (1), D.D., a (Dutch) Reformed minister, was born Sept. 27, 1809, at Glasgow, Scotland, in the house in which Mary Queen of Scots took refuge after the battle of Langside. His father, who was educated for the ministry, but never preached on account of ill-health, died when James was four years old. At fifteen he united with the Church of Lochwinnoch, and, although struggling with very limited means, he prosecuted his studies at the University of Glasgow for three years, and afterwards at the college in Belfast, Ireland, for two years. Having married in Ireland, he removed to the United States in 1832, studied theology under care of the New York Presbytery, and was licensed by them in 1834. His first settlement was in the Presbyterian Church, German Valley, N. J., for eight years. In 1843 he accepted the call of the First Reformed Church, Newark, N. J., with which his remaining ministry was spent. Few men have achieved such thorough pastoral success as he did in this Church, which was greatly reduced and broken down when he took it, and grew during his fifteen years of service to be next to the largest Church in its entire denomination, numbering over six hundred communicants, and flourishing outwardly and spiritually. A large debt was removed, and three new and healthy churches grew out of it within this period. Dr. Scott's mind was synthetic rather than analytical. He was highly imaginative, a great lover of nature and art, literary in his tastes, and excelled in descriptive writing and in illustrative and pictorial address. His style teemed with figures. Rhetorical in manner and vivid in coloring, with a large, robust frame, a clear, strong voice, a full, canny Scotch face lighted up with benevolent smiles, and an attractive delivery, his preaching always drew large, popular audiences. But he was not content merely with this; his sermons were instructive, expository, free of theological technicalities, earnest, full of cheering Gospel truth, pathetic, faithful, and finely adapted to times, seasons, and occasions. His range of topics was unusually wide, embracing, among ordinary themes, full courses of pulpit lectures on Church history, prophecy, the religious condition of Europe, the Pentateuch, Ruth, Psalms, Canticles, harmony of the Gospels, Acts of the Apostles, Revelation, and an unfinished course on Esther. As a pastor he was almost unrivalled. He knew everybody among his people and all about them. Young people and children were his particular delight and care. Among the sick and poor and wretched his attentions were untiring. Beyond his own congregation he was so thoroughly well known and identified with every good public interest in Newark that he was justly called at his funeral the curate of the city. He devoted himself with zeal to the organization of the admirable Newark Library Association, to various educational movements, such as the public schools of Newark, the endowment of Rutgers College, and the preparation of a series of school-books. In all evangelical mission work, like that among the Germans, Sunday-schools, and the poor, he was a leading spirit. His disposition was remarkably cheerful, sunny, unsuspecting, frank, generous, self-conscious, and pleasantly egotistical at times, upright, bold, and faithful. He wrote much for newspapers, conducted a constant foreign correspondence with eminent men, and delivered literary lectures and addresses, and was always eminent for public spirit. The poet Robert Pollok was his bosom friend. He prepared an excellent life of this favorite author of *The Course of Time*, which was published by the Carters,

New York, and has had a large circulation. He also wrote much in verse, and left a posthumous manuscript poem, with directions for its publication. But his crowning distinction was his thoroughly devoted Christian ministerial life. It was radiant with the results of faithful service. His death was sudden. He rose from his bed and was going to his bath on a Saturday morning, when he was seized with the fatal disease of which he had entertained frequent apprehensions. Immediately he said, "This is paralysis—this is death. I am not afraid to die; I am ready." His last message, just before he became unconscious, was, "Give my love to all my people. Tell them they were in my dying thoughts, and that when dying I sent my blessing to my young people." In his own words respecting his friend Pollok, "There was no death-struggle, no agony, no convulsion. His soul went out of the body all noiseless and fast, like Peter from the prison when the angel took off the fetters, opened the gate, and delivered him." He died May 10, 1858. In addition to the above notice, see *Life, Letters, and Literary Remains of Robert Pollok* (N. Y. 12mo). Dr. Scott published *An Essay on the Course of Time:—The Guardian Angel* (N. Y. 12mo), a poem in three books:—he also had a share in the series of school-books produced by a literary association and entitled *The American System of Education:—the article Malachi* in the annual known as *The Saviour, Prophets, and Apostles*; and wrote many papers in British and American periodicals. See Wilson, *Presb. Hist. Almanac*, 1860, p. 204; *Lond. Critic*, 1859†; Allibone, *Dict. of Brit. and Amer. Authors*, s. v. (W. J. R. T.)

Scott, James (2), a Presbyterian minister, was born in Armagh County, Ireland, Aug. 1, 1825. He made a profession of religion in his sixteenth year, immediately began his preparatory studies for the ministry, and graduated with honor at the University of Glasgow, Scotland, in 1848. Soon after, he emigrated to America; graduated at Princeton Theological Seminary, N. J., in 1852; was licensed by Luzerne Presbytery in 1851; taught in the academy at Attleborough, Bucks Co., Pa., until 1853; was ordained pastor of the Church at Holmsburg, Pa., June 6, 1854, which relation lasted for seven years, during which time he was zealous and faithful. In 1859 he was a commissioner to the General Assembly of the Presbyterian Church, which met at Indianapolis, Ind. He died Aug. 28, 1861. See Wilson, *Presb. Hist. Almanac*, 1862, p. 117. (J. L. S.)

Scott, John (1), D.D., a learned English divine, son of Thomas Scott (grazier), was born in the parish of Chippenham, Wiltshire, in 1638. Not being intended for a profession, he served an apprenticeship in London, much against his will, for about three years. He quitted his trade and went to Oxford, entering as a commoner of New Inn in 1657. He left the university without taking a degree, and being ordained, came to London, where he officiated in the perpetual curacy of Trinity in the Minories, and as minister of St. Thomas's in Southwark. In 1677 he was presented to the rectory of St. Peter le Poor in London, and was collated to a prebend in St. Paul's Cathedral in 1684. In 1685 he was made both B.D. and D.D. In 1691 he succeeded Sharp, afterwards archbishop of York, in the rectory of St. Giles in the Fields; and in the same year was made canon of Windsor. He died in 1694, and was buried in St. Giles's Church. He wrote, *The Christian Life* (pt. i, 1681, 8vo; pt. ii, 1685; pt. iii, 1686):—two pieces against the Romanists (1688):—*Sermons*, etc. His whole *Works*, including *Sermons*, etc., were published in 2 vols. fol. in 1704.

Scott, John (2), a minister of the Methodist Episcopal Church, was born in Emmes, Ireland. At the age of seventeen he was converted, and joined the Church. Coming to America, he united with the Methodist Church in St. John's, N. B. He was licensed to preach in 1822, and in 1825 was received on trial in the

Pittsburgh Conference. He was ordained deacon in 1827, and elder in 1829. The Erie Conference was formed in 1836, and he became one of its members. He was made a superannuate in 1847, but became effective the next year. In 1853 he was again superannuated, and held this relation until his death, Sept. 2, 1861. See *Minutes of Annual Conferences*, 1862, p. 124.

Scott, Milo, a minister of the Methodist Episcopal Church, was born in New Berlin, Chenango Co., N. Y., in 1818, and joined the Church in 1836. He was licensed to preach in 1842, and joined the Genesee Conference in 1843. After a brief illness of four days, he died Oct. 1, 1864. See *Minutes of Annual Conferences*, 1864, p. 210.

Scott, Orange, a noted Methodist preacher, was born in Brookfield, Vt., Feb. 13, 1800, and up to his twentieth year had attended school but thirteen months. He was converted at a camp-meeting, in September, 1820, and immediately joined the Methodist Church. Next year he commenced preaching on Bernard Circuit, and in 1822 he was received into the New England Conference. His labors were crowned with abundant conversions, and he studied hard to make up the defects of his early education. In 1830 he was made presiding elder of Springfield district, and in 1834 of the Providence district. In 1832 he declined an offer to serve one of the wealthiest congregational churches in Rhode Island. The same year he was elected a delegate to the General Conference. About this time he became a controversial antislavery advocate, and in the General Conference of 1836 he carried through stringent resolutions on the subject. He subsequently labored with great success as pastor in Lowell and elsewhere. Being dissatisfied with the action of the General Conference of 1840 on the subject of slavery, he retired from the Church, and was largely influential in the formation of the Wesleyan Methodist Church (q. v.), of which he was the book-agent till his death, which occurred in great peace at Newark, N. J., July 31, 1847.

Scott, Robert, a minister of the Methodist Episcopal Church, South, was born about 1805. He was received into the Virginia Conference on trial in 1829, and was graduated to deacon's and elder's orders in 1831 and 1833. For twenty-eight years he labored in the itinerant ministry, and in 1857 took a supernumerary relation. He died in 1866. See *Minutes of Annual Conferences*, 1866, p. 7.

Scott, Thomas, D.D., a clergyman of the Church of England, was a native of Lincolnshire. He was born Feb. 16, 1747, at Braytoft, a small farm-house five miles from Spilsby. He was educated at Bennington from his eighth to his tenth year, and the following five years he studied at Scorton. At the age of sixteen he was bound apprentice to a medical practitioner at Alford, but at the end of two months the master was dissatisfied with his behavior, and sent him home. He was now employed about the farm for some time, and compelled to labor in the most servile occupations—sometimes tending the sheep, and at others following the plough. In this menial situation he continued for more than nine years, yet continually cherishing the wish of becoming a clergyman. Thoughts of the university, of learning, and of study often presented themselves to his mind; and he at length consulted a clergyman at Boston, who encouraged his attempt at qualifying himself for the ministry; and having acquired a competent knowledge of Greek as well as Latin, he eventually obtained ordination from Dr. Green, bishop of Lincoln, Sept. 20, 1772. His first curacy was that of Stoke Goldington and Gayhurst, Buckinghamshire, from which he removed in 1775 to Ravenstone. In the spring of 1777 he settled in Weston Underwood, succeeding Mr. John Newton to the curacy of Olney in 1781. In 1785 he was removed from Olney to the chaplainship of the Lock Hospital, near Hyde Park Corner, and held, besides two lectureships in the city. In 1803 he obtained

the living of Aston-Sandford, in Buckinghamshire, which he held to the period of his death, April 16, 1821. It was an exceedingly small parish, but he could not be prevailed on to seek a larger, on account of the paucity of baptisms and burials which took place—a circumstance which, in some measure, relieved his scruples respecting the service as prescribed in the ritual. He first appeared as an author in a small volume entitled *The Force of Truth* (1779), in which he details the singular events which issued in his change of mind and character. This little piece has gone through not less than twenty editions. But his most important work, and that which has rendered him one of the most influential divines of the present day, is *A Family Bible, with Original Notes, Practical Observations, and Marginal References* (1796, 4 vols. 4to; 9th ed., with the author's last corrections and improvements, 1825, 6 vols. 4to). He was also the author of a great number of pieces, which have recently been collected and published uniformly (10 vols. 8vo), including *Remarks on the Bishop of Lincoln's Refutation of Calvinism:—Essays on Important Subjects:—Sermons, Tracts, etc.* He left in MS., at the period of his decease, a copious account of his own life, replete with interest, which has been published by his son, and very extensively read. See *Memoirs of Thomas Scott*, by his son.

Scott, William C., a Presbyterian minister, was born in Martinsburg, Berkeley Co., Va., Jan. 13, 1817. He was conducted through his academical course principally by his father, the Rev. William N. Scott, who, to support his family and educate his own children, had opened a school, which he continued for twenty years. He was converted in October, 1831, in a revival commenced in connection with the meeting of the Synod of Virginia, and united with his father's Church in the spring of 1832. It was about this time that he first felt his call to preach the Gospel. He graduated at South Hanover College, Ind., in 1837, and at the Union Theological Seminary, Va., in 1840. Here the depth of his piety, the high literary merit of his performances, and the vigor and originality of his intellect marked him as a candidate for the ministry of no ordinary promise. In April, 1840, he was licensed by the presbytery of Winchester, and during the ensuing autumn became a stated supply to three churches on Staunton River—namely, Providence, in Halifax Co., and Cub Creek and Bethesda, in Charlotte Co. In 1842 he was ordained pastor of the churches of Providence and Bethesda, where he continued to labor till the spring of 1846, when he became pastor of the church in Farmville, Va. Before he had been three years in this charge, a bronchial trouble had so far developed itself that he was compelled to resign his pastorate, and retired to a small farm which he owned among his first congregation. After two years' abstinence from all public service, he was able again to preach, and was called with perfect unanimity to become a second time the pastor of the Bethesda church. Here he labored until his death, which occurred Oct. 23, 1854. Mr. Scott was the author of *Genius and Faith, or Poetry and Religion in their Mutual Relations* (N. Y. 1853). This work is highly commended as "a treasury of invaluable thought, and in respect to which it is difficult to say whether the poetical, the philosophical, or the Christian element has the predominance." His intellect was of a high character, and his preaching always marked by careful preparation, by uncommon elegance of composition, and by clearness and accuracy of statement. See Sprague, *Annals of the Amer. Pulpit*, iv, 802; Allibone, *Dict. of Brit. and Amer. Authors*, s. v. (J. L. S.)

Scott, William D., a minister of the Methodist Episcopal Church, South, was born in Mecklenburg County, Va., Feb. 1808. He graduated at the Medical University, Philadelphia, March 2, 1830, moved to Trenton, and engaged in the practice of his profession. He was licensed to preach Aug. 15, 1840; admitted into the

travelling ministry in 1841; ordained deacon Nov. 6, 1842, and elder Nov. 25, 1844. In 1845, because of failing health, he was superannuated, and in 1850 became effective again; but in 1851 he was once more superannuated, and held that relation until his death, Oct. 3, 1874. We record here as a part of his history that he bequeathed a hundred acres of land each to the Vanderbilt University and the Indian Mission Conference. See *Minutes of Annual Conferences*, 1874, p. 63.

Scott, William M'Kendree, D.D., an eminent Presbyterian divine and educator, was born in Jefferson County, O., in 1817. He graduated at Jefferson College, Pa., and at Princeton Theological Seminary, N. J., in 1846. He was licensed by the West Lexington Presbytery, and in 1847 was elected professor of languages in Centre College, Danville, Ky.; and, accepting a call of the First Presbyterian Church in that place, he was ordained by the Transylvania Presbytery in 1848. In January, 1856, he became pastor of the Seventh Presbyterian Church, Cincinnati, O., which relation existed for two years, when, in 1859, the General Assembly elected him professor of Biblical literature and exegesis in the Theological Seminary of the North-west at Chicago, Ill. His health had been gradually declining for some time, and in the autumn of 1861 he visited Princeton, N. J., where he hoped, among his kindred and friends, to recuperate his wasted energies; but his hopes were vain, and he died Dec. 22, 1861, at the residence of his father-in-law, Rev. Dr. Charles Hodge. The death of Dr. Scott produced a deep impression upon the Church. The board of directors of the Theological Seminary of the North-west adopted a series of resolutions, and the presbytery of Chicago the following minute: "As a teacher, he was thorough and accurate. Much of his time was given to the work of instruction, and he had fully prepared himself for it. . . . As an expounder of God's Word, he was at all times, whether in the lecture-room or the pulpit, lucid, impressive, and evangelical, attracting all by the originality and freshness of his views. As a presbyter, he loved the courts of the Church; and being thoroughly conversant with the theory and practice of our system, he was an invaluable member in all complex and difficult cases." See Wilson, *Presb. Hist. Almanac*, 1863, p. 204. (J. L. S.)

Scottish Philosophy is an appellation currently applied to the method and principles of philosophizing and also to certain positive doctrines which were taught by several professors in the universities of Scotland. Prominent among these were Thomas Reid (1710-96), professor of philosophy in King's College, Aberdeen (1752-63), professor of moral philosophy in the University of Glasgow (1763-96); Dugald Stewart (1753-1828), professor of moral philosophy in the University of Edinburgh (1785-1810); Dr. Thomas Brown (1778-1820), colleague with Stewart as professor of moral philosophy (1810-20); and Sir William Hamilton (1788-1856), professor of logic and metaphysics in the University of Edinburgh (1836-56). Besides these *coryphæi* of the Scottish school, others should be named who were more or less conspicuous in the various metaphysical discussions which preceded or accompanied the lectures and writings of these leaders, whether favorable or adverse—viz.: Francis Hutcheson (1694-1747), professor of moral philosophy in the University of Glasgow (1729-46); George Turnbull (1698-1748), regent of Marischal College, Aberdeen (1721-27); David Hume (1711-76); Adam Smith (1723-90), professor of logic in the University of Glasgow (1751), professor of moral philosophy in the same (1752-63); James Beattie (1735-1803), professor of moral philosophy in Marischal College (1760-1802); Thomas Chalmers (1780-1847), professor of moral philosophy in the University of St. Andrew's (1823-27), professor of theology in the University of Edinburgh (1827-43); John Wilson (1785-1854), professor of moral philosophy in the University of Edinburgh (1820-54); and James Frederick Ferrier (1808-64), pro-

fessor of moral philosophy in the University of St. Andrew's (1845-64).

Of all these, Dr. Thomas Reid, by common consent, is the central, if not the most eminent, person in what is known distinctively as the Scottish school. He was the first to give a definite statement and a positive form to the principles which have given it a character and a name. He was aroused to this by the conclusions which were derived by Berkeley and Hume from certain fundamental doctrines of Locke's *Essay* which had been generally accepted as beyond question. Prominent among these were his doctrines of representative ideas in sense-perception and his definition of knowledge, as also the assertion that sensation and reflection are the only sources of knowledge. These principles had been used by Berkeley, with certain additions of his own, to demonstrate that the material world is known to us only as a system of ideas which are made steadfast and trustworthy so far as they are held in being by the act and in the mind of God. Hume pushed Berkeley's argument one step further, and proved that we have no more direct and certain knowledge of spirit than we have of matter; and, moreover, that the relation of causation cannot be derived from either sensation or reflection, and is resolvable into custom, or the habitual association of ideas. Hume had also astonished and offended the community by his views of morality, miracles, and the usually accepted argument for the existence of God. Against these views, Reid asserted the doctrine of the direct perception of material qualities, and the positive suggestion or belief of material objects. He also insisted that there are certain original principles of belief which cannot be derived from either sensation or reflection. These he called First Truths, First Principles, Principles of Common-sense, etc. Hence the Scottish philosophy was very generally styled the "Common-sense Philosophy." Under this designation it was expounded in a popular treatise by James Oswald (*ob.* 1793) and James Beattie (1735-1803). The principal works of Reid were, *Inquiry into the Human Mind, or Principles of Common-sense* (Lond. 1763); *Essays on the Intellectual Powers of Man* (1785); *Essays on the Active Powers of Man* (1788).

Next to Reid in significance is Dugald Stewart for his undeviating and almost literal adherence to the doctrines of his teacher. He was more learned than Reid, more elegant, and more imaginative; but he did little else than illustrate and enforce the doctrines of Reid by examples and confirmations from his copious reading in a style which was ornate and carefully wrought. His influence was not confined to Great Britain. His lectures were attended by pupils from France, who subsequently were active in the reform of philosophy in their own country. His treatises were more numerous than those of Reid. In 1792 he published vol. i of *The Elements of the Philosophy of the Human Mind*; in 1814 vol. ii; in 1827 vol. iii; in 1793 *The Outline of Moral Philosophy*; in 1810 his *Philosophical Essays*, which are more severely and purely metaphysical than any of his other writings; in 1815 and 1821 parts i and ii of his *General View of the Progress of Metaphysical, Ethical, and Political Science since the Revival of Letters*, in which his critical taste and erudition are abundantly displayed; in 1828 *The Philosophy of the Active and Moral Powers*.

Dr. Thomas Brown should be named next to Dugald Stewart, not only because he was his immediate successor, nor because his combination of subtle analysis with rhetorical exuberance made him immensely popular for a time, but because he introduced new elements into the field of discussion, and gave an important impulse to a direction of thought which is now striving to displace the fundamental principles taught by Reid. We refer to the prominence given to the so-called association of ideas, to which Brown, following Stewart somewhat, assigned a very great significance in the explanation of psychological phenomena and philosophical beliefs. James Mill, John Stuart Mill, and Alexander

Bain were all influenced by the philosophizing of Brown. The modern doctrine of inseparable associations was received through Brown from Hume till it arrayed itself in direct opposition to the so-called introspective theory of Hamilton in the criticism of his philosophy by John Stuart Mill. But although Brown in this and some other particulars deviated from the traditions of Reid and Stewart, he still held fast to the doctrine of irresistible beliefs as the foundation of philosophic truth. Though he accepted Hume's conception of the causal relation, he did not, with Hume, resolve our belief in its constancy into custom or experience. His analysis of the sense perceptions opened the way for the physiological psychology which has since been so earnestly prosecuted. For these and other reasons Brown is a considerable figure among the Scottish philosophers.

Still more considerable is Sir William Hamilton, whose astonishing erudition, subtle logic, and massive strength revived the interest in the old questions which had begun to wane, and gave a new direction to the old inquiries and discussions. His first published contributions were several articles in the *Edinburgh Review*; viz. the first on *Cousin and the Philosophy of the Conditioned* (1827), others on the *Philosophy of Perception* (1830), and *Recent Publications in Logical Science* (1833). In 1836 he was elected professor of logic and metaphysics in the University of Edinburgh. In 1856 he published the first instalment of the works of Thomas Reid, with notes and illustrations, which remained unfinished till after his death. This work, in short foot-notes and long, learned appendices, contains some of his most valuable contributions to philosophy. His *Lectures on Metaphysics and Logic* were published after his death under the direction of Rev. H. L. Mansel and Prof. John Veitch (1859, 1860, 4 vols.). Prof. Veitch also published his *Memoirs* (1869). Hamilton's philosophical teachings may be classed as follows. He was true to Reid's doctrine that common-sense is the foundation and the criterion of all true and trustworthy philosophy. He expended immense research in the effort to show that this view was sanctioned by the most eminent of ancient and modern philosophers. At the same time, he endeavored to formulate more accurate conceptions and more satisfactory definitions of common-sense and its relations to the criteria of truth. His doctrine of the intuitions, or first principles, is a great advance upon that of Reid in philosophical exactness. Hamilton followed Reid in rejecting the doctrine of representative perception, tracing out with laborious erudition the several theories held by the advocates of this doctrine, and refuting them at every point. His classification of these theories is a masterpiece of ingenuity, acuteness, and learning. His own theory is an attempt to reconcile the latest results of physiological research with the doctrine of natural realism as taught by Reid. While he held, with Reid, to the necessity of *a priori* or intuitive truths, he sought to reconcile or modify this position by his doctrine of the relativity of knowledge. His philosophy of the conditioned was the result of an effort to adjust the Scottish with the Kantian theory of the *a priori* element in knowledge. In doing this, he coincided more nearly with Jacobi than with any other German philosopher, although he differed from Jacobi in his fondness for scholastic distinctions and learned erudition. In formal logic he was eminently at home, both in its subtle refinements and its special literature. He elaborated a new and original scheme of logical symbolization on the basis of the doctrine of the quantification of the predicate, to which he attached great importance. Whatever may be the fate of his peculiar teachings, his influence will long be felt and acknowledged in reawakening an interest in metaphysical speculation and a respect for profound metaphysical studies in Great Britain and every English-speaking country. See HAMILTON, SIR WILLIAM.

Besides these four leaders of the Scottish school, Hutcheson deserves especial honor for anticipating in

fact, though not with effect upon the course of speculation, some of the most important positions that were taken by Reid in dissent from Locke. It would seem as if Hutcheson had himself been influenced by a small but able school of Irish critics of Locke, whose home was in Trinity College, Dublin. George Turnbull should not be overlooked, who was the instructor of Reid, and, in some sense, anticipated many of his doctrines. The subtle and consequent David Hume should not be forgotten, for without Hume the Scottish metaphysics would never have had existence. Hume not only waked Kant from his dogmatic slumber, but compelled Reid into the position of an earnest and patient inquirer into the correctness of the current philosophy received from Locke. To Hume's acuteness and subtlety does the world owe the birth, beginnings, and character of the two most significant schools of philosophy in modern times, viz. the German and the Scottish. Adam Smith did not fall into the ranks with Reid; but he wrote the ingenious *Theory of Moral Sentiments*, the ethical principles of which have been enforced in the present generation with a new accession of energy and zeal. Thomas Chalmers was not an originator of special philosophical opinions, but he expounded and enforced profound ethical and metaphysical principles with contagious energy and inspiring enthusiasm. John Wilson was more of a poet than a philosopher, but he brought rare gifts and rarer eloquence to the illustration of ethical themes. The acute and brilliant Ferrier may never have made a single convert to his theory of consciousness, but he could not fail to kindle a genuine interest in philosophical studies by his subtle analysis and his lucid statements. It does not fall within our task to characterize living teachers and writers; otherwise we might speak of Prof. Henry Calderwood, the daring critic of Hamilton when Hamilton was in his prime; Prof. A. D. Frazer, the subtle and sympathizing biographer and editor of Berkeley; Prof. Veitch, the genial biographer of Hamilton and Stewart; and the indomitable and tenacious Alexander Bain, whose zeal and learning must sooner or later arouse antagonists and critics who shall effectively protest against the extremes to which he carries his associational theories. Two other writers should not be overlooked, James Hutchison Stirling, M.D., the author of the *Secret of Hegel*, the critic of Hamilton, and the able antagonist of Huxley in his *As Regards Protoplasm*; and Prof. Simon S. Laurie, the ingenious author of *Philosophy of Ethics and Notes Expository and Critical on Certain British Theories of Morals*, give ample proof that the interest in philosophical studies is not likely to die out, and that, in some form or other, a Scottish philosophy will continue to be taught and defended which will not be unworthy of Reid and Hamilton. Nor should we fail to give just honor to Dr. James McCosh, who was trained in the Scottish philosophy, and has done so much to expound and defend, in an independent and critical spirit, its most important and distinctive principles in his well-known works, and has also written the history of the Scottish school with an enthusiastic interest and faithful research.

The Scottish philosophy has had no inconsiderable influence on the Continent, especially in France. Dugald Stewart attracted many pupils from that country, and among them the distinguished Royer Collard, who lectured in the Sorbonne in the years 1811-14, which lectures were the first significant indications of a reaction against the traditional system of Condillac. The fragments of these lectures were subsequently published in connection with a translation of the works of Reid made by Theodore Jouffroy, who, with Victor Cousin, was a pupil of Collard. The Eclectic and the more modern Historical French schools show abundant traces of indebtedness to the Scottish philosophy and the impulses which it received from the Scottish teachers with whom it began. This influence has been gratefully acknowledged by Royer Collard, Theodore Jouffroy, Victor Cousin, and many of Cousin's pupils.

See McCosh, *The Scottish Philosophy, Biographical, Expository, Critical, from Hutcheson to Hamilton* (N. Y. 1875); Cousin, *Philosophie Écossaise* (Paris, 1863, 4th ed.); Ueberweg, *History of Philosophy*, etc., translated by Prof. George S. Morris (N. Y. 1872-74), app. i, § 27-46. (N. P.)

Scotus, Duns. See DUNS SCOTUS.

Scotus (*Erigena*), JOHN, a very notable philosopher of the Carolingian period, who reanimated in his own person the long-slighted speculations of the Neo-Platonists, and communicated the impulse which, after two centuries, eventuated in the earnest and brilliant labors of the schoolmen. The age in which Scotus Erigena lived is so distant; it is so obscure and confused, or, at least, presents so little to attract interest in modern times; his works are so unfamiliar and so rare, that his name is little regarded, and his career is seldom deemed worthy of consideration. Indeed, so slight is the general acquaintance with himself and his productions that he is at times confounded with the much later philosopher of somewhat similar name, Duns Scotus (q. v.). Yet John Scotus Erigena was a very remarkable phenomenon for the age in which he appeared. He bisects the long interval between Boethius and William of Champeaux, and is the sole luminary—obsured and soon swallowed up by the gloom which irradiates the darkness of speculation in Western Christendom—during those centuries. There may be little of permanent value in his doctrines; there may have been scarcely any direct influence exercised by them on his own age and on the ages that ensued; there may be a very imperfect appreciation of the philosophy which he revived, remodelled, and transmitted; there may be little profundity when he is compared with his eminent predecessors and his more illustrious successors; but there was great intellectual boldness in his career. There were vigor and originality in his profession and exposition of the elder and almost forgotten doctrines in a dull and declining day. A profound impression was communicated by him to his own and to subsequent times, though it was conveyed by devious and unnoted channels, and through long and strangely disguised modes of transmission. A full and penetrating appreciation of this lonely and memorable dreamer in relation to the creeds, the thoughts, the interests, and the fortunes of his times might throw unexpected light on the history of philosophy and of theology, and even upon the confused struggles—social, political, and intellectual—of the 9th and 10th centuries, the dreariest because the least comprehended period of Christian history.

I. Life.—The origin, and the place and date of birth of John Scotus Erigena are all involved in obscurity and are wholly uncertain. According to one account, he was born on the western borders of England and was of royal Saxon blood. According to another tradition, he came from the western highlands of Scotland, and from the monastic establishments of St. Columba. The generally received opinion, however, is that he was Irish, and acquired his learning in the religious houses of Ireland, which then preserved a higher culture and education than were to be found elsewhere in Western Europe outside of the Saracenic schools in Spain. We may safely acquiesce in M. Guizot's positive declaration that he was of Irish extraction and of Irish training; but this is a conviction, not an established fact. There is conjecture in the conclusion, as well as in M. Guizot's other assumption, that he was called *Scotus* from his race, and *Erigena* from his country. Scotus, in the 9th century, meant distinctly an Irishman. Erigena was its Greek equivalent, and may have been adopted by John of Ireland as an Hellenic affectation in consequence of his Greek studies, Greek tastes, and translations from the Greek. It may have been assumed in order to distinguish him from the multitude of other Irish Johns, or Scotch Johns; it may have been conferred in the same spirit in which Alcuin bestowed classical or Scripture

names upon Charlemagne and his studious contemporaries. These are only conjectures. Certain knowledge have we none on this subject, or on the place of his birth, or the time of his birth. He is supposed to have been born between 810 and 815; and no grave error will be committed by provisionally accepting the earlier as the correct date. Current rumors in his own day and generation represented him as having acquired his singular and varied knowledge, like the elder Greek sages, by travels in Greece, Asia, Egypt, Italy, and France. Such traditions are unquestionable delusions; but that he did travel extensively is rendered probable by a citation from his works, adduced by M. Guizot, which seems to make distinct reference to such wanderings. The peculiar direction of his studies, the character of his learning, the scheme of his philosophy, his addition to the Greek and to the Neo-Platonic speculations, might all suggest personal acquaintance with the Greeks and the countries of the Greeks. It has scarcely been noticed that the Pythagorean sect, or, at any rate, the Pythagorean doctrine, in connection with its Neo-Platonic developments, continued to maintain itself, even beyond the 9th century, in Constantinople and in other parts of the Byzantine empire. This is clearly established by the declarations of Anna Comnena; but it escaped the regard of M. Guizot while he was awkwardly endeavoring to trace the dissemination of Neo-Platonic influences from the 5th to the 9th century. Wherever Scotus may have strayed, wherever he may have been educated, nothing is heard of him till he appears at the court of Charles the Bald of France. Whether an exile from his own country, or a pilgrim in search of knowledge or of sustenance, or invited by the king to aid in promoting liberal pursuits, he was cordially welcomed by the monarch, who made a zealous effort in a distracted time to renew the plans of his grandfather Charlemagne for the advancement of learning. Erigena went to Paris, and was placed at the head of the School of the Palace. There is no agreement of opinion in regard to the date of this migration. It is variously assigned to the years 840, 843, 847, 850, and 870. It could not well have been before 843, when Charles ascended the throne. It could not have been later than 850, when the controversy in regard to Gottschalk was raging. Scotus Erigena would be between thirty and forty, probably, at the time. We have little information in regard to his personal appearance. He was small in stature and slender in frame; but the physical deficiencies which would invite only contempt in that muscular age were compensated by the brilliancy of his mind, the amiability of his temperament, and the quickness of his wit in social intercourse. The French king became warmly attached to him, and made him his constant companion and intimate friend. Charles was himself devoted to letters. He invited teachers from other countries, and is said to have attracted many Greeks to his schools. Employment was found for Erigena beyond the *Cathedra Palatina*. He was requested by the king to translate a treatise *On the Celestial Hierarchy*, falsely ascribed to Dionysius the Areopagite, who was just as erroneously identified with St. Denys, the supposed apostle of Christianity at Paris. The works of the alleged Areopagite had been sent in 824, by the Greek emperor Michael the Stutterer, as a present to the Frank emperor Louis le Débonnaire. They were held in high regard in France—not the less high because they were Greek and unintelligible. John Scotus complied with the king's request and translated the book into Latin, adhering, however, so closely to the words of his foreign text as to indicate that the knowledge which he had of the Greek, as of the Hebrew and Arabic, was neither elegant nor profound. His reputation, or his position in the king's favor, drew the regards of Hincmar, archbishop of Rheims, who was involved in the controversy respecting predestination between Rabanus Maurus, of Mentz, and Gottschalk. The archbishop requested John to refute the polemic of Gottschalk. This task was executed with zeal, but it laid

him open to the charge of heresy and provoked fresh logomachy. His polemic was denounced by Prudentius of Troyes and Florus of Lyons, who invited the censures of the Church on nineteen propositions corresponding to the nineteen chapters of the essay *De Prædestinatione*. We shall not enter into the nice distinctions of the different species of predestination, which lead, by so many slightly divergent routes, to heresy. The controversialists, like "the infernal peers,"

"Reason'd high
Of providence, foreknowledge, will, and fate;
Fix'd fate, free-will, foreknowledge absolute;
And found no end, in wandering mazes lost."

The master of the Palatine School added to his version of *The Celestial Hierarchy* translations of the other works credited to Dionysius the Areopagite. At some subsequent time he completed his own system of philosophy under the title *De Divisione Nature*, or, rather, with the Greek designation *Περὶ φυσικῆς μερισμοῦ*. The controversial tracts of John had raised up antagonists and enemies; his philosophical tenets occasioned perplexity and alarm. Pope Nicholas, in 867, complained to Charles the Bald that works of doubtful tendency—the versions of Dionysius Areopagita—had been promulgated by John Scotus without having been first submitted to the approval of the apostolic see. He required the king, therefore, to send Scotus to Rome to explain and justify his procedure, or, at least, to dismiss him from the superintendence of the Palatine School. The king's action is unknown: *silentium tegit altum*. That he did anything is improbable; but Scotus Erigena drops almost entirely out of view after 867. He is sometimes said to have withdrawn into seclusion in France. He is otherwise said to have returned to England after the death of Charles, and to have been placed by king Alfred at the head of his new school at Oxford, whence he was driven by the commotions of the students. According to Matthew of Westminster and Roger de Hoveden, he was intrusted with the school at the monastery of Meldun, where, having enraged his pupils by his severity, he was murdered by them with their styles (stillettos). This last story has, however, been transferred to the philosopher from another and somewhat later Joannes Scotus, who taught at Athelney. John Erigena seems to have ended his days in France, and to have died before 876. A letter written in that year to Charles the Bald by Anastasius Bibliothecarius speaks of him as if he were dead. He passed away like a bright meteor flashing through the midnight darkness, visible only in a brief transit, undiscoverable in its earlier and in its later course.

II. *Works*.—The principal works of Scotus Erigena—the works which gave him reputation and provoked censure—have been already mentioned, and will have to be noticed again in examining his doctrine. Several other tractates were written by him, or have been assigned to him. We cannot determine the dates or the sequence of his intellectual labors. His translations were probably communicated, in their progress, to the circle of curious inquirers with whom he was associated in the royal court, and might thus become partially known long before their completion. There was no such definite chronology in respect to literary productions in the days of manuscript as has been usual since the introduction of printing. We cannot, therefore, arrange the works of Erigena according to any chronological scheme. He translated all the works of the alleged Areopagite: *The Celestial Hierarchy*;—*The Ecclesiastical Hierarchy*;—*The Book of the Divine Names*;—*The Mystical Theology*;—and his *Ten Letters*. Some of these may have been previously rendered into Latin. He translated the *Scholia* of Maximus on the writings of Dionysius. He composed a tractate *On the Eucharist*, in which he denied the dogma of the real presence, and anticipated the position of Ralph Cudworth, that the sacrament of the Lord's supper is only a commemoration of his sacrifice: *tantum memoria veri corporis et*

sanguinis ejus. It is not obvious how this opinion is consistent with the realistic or the pantheistic character of the philosophy of Scotus, but its coherence may be detected. Erigena is said to have left behind him a work *On the Vision of God*, and other disputations, which have been lost. The reveries of Plotinus, and the reverie upon reveries of Marcilius Ficinus, might enable us to recompose some image of the theory of the *Vision of God* if we could imitate the German fashion of reconstructing the unknown out of our inner consciousness. A treatise *On the Duties of Man* was ascribed to him by the abbot Trithemius, and several other productions have been attributed to him with little reason.

III. *Philosophy*.—It is not proposed to enter further into the theological positions of Erigena than may be necessary to show their relations to his speculative doctrine and to interpret it, or to be interpreted by it. There is a close correspondence between his theology and his philosophy, as must always be the case when different lines of thought are pursued by the same person with earnestness and sincerity. Moreover, the distinctive character of any philosophical doctrine is easily and briefly determined, notwithstanding variety of manifestations and multiplicity of details, by detecting the fundamental or cardinal principle, which must control those manifestations and details if there be honesty of purpose and consecution of thought. Such a principle may be readily discerned in the tenets of Scotus Erigena and in their developments. The essential unity of the divine nature is his central dogma, whence everything proceeds, and whence arises his heterodoxy in regard to the Trinity. Whether he reached this position by independent reflection, or deduced it from logical postulates, or derived it from Neo-Platonic suggestions, or from all sources unconsciously combined, this seems to be the prolific germ of his whole system. He distinctly acknowledges his obligation to Dionysius; yet the obligation was not one of servile acceptance, but of original development. However the spirit may be disguised under hard dialectical forms and under derivative arguments and phrases, there is a genuine and vigorous originality in John Scotus which is evinced in many ways. The unity of the divine nature is his point of departure. Hence, all things proceed from God; all things subsist in God; all things terminate in God. The procedure of Erigena is this, and it gives the title to his work *On the Division of Nature*. The generic division of nature is fourfold: (1) the nature that creates and is not created; (2) the nature that is created and creates; (3) the nature that is created, but does not create; (4) the nature which is neither created nor creates. It will be observed that there is a gradual and delusive sliding of meanings in the application of the slippery and perplexing word "nature," and that the term cannot be strictly applied to that which is not created; therefore neither to the first nor to the fourth genus. It is necessary to note this, as the errors and heresies charged upon Erigena are in part due to the insufficiency and indistinctness of all language—defects which he strenuously asserts himself. Turning to his four divisions, it is obvious that the nature which creates and is not created is the divinity; but the divinity as an abstract conception, a metaphysical entity, the Neo-Platonic *Unum* or *Unitas*, not a personal God: that the nature which is created but creates is also a vague abstraction, but must mean the forces, or laws, or ideas regulating all secondary creation—operating, therefore, simply by the impulse and constraint of their Creator: that the nature which is created but does not create is the only one which corresponds with the ordinary conception of the term, and signifies the concrete result of the action of the laws imposed and of the forces communicated by the Supreme Nature—sustained, therefore, by him, and subsisting in him because supported by his laws and by his continuous action; and that the nature which neither creates nor is created is a nonentity, an unknown and indefinable potentiality, possible but un-

imaginable—the impalpable and inapprehensible which lies beyond the present sphere of the existent or of the conceivable. This fourth nature might be altogether rejected, but it would make a fatal breach in this rarefied scheme of philosophy. Erigena justifies and provides for it in his first and most general division of things—into those which are and those which are not. There is a very marked Erigenism, or Hibernicism, in the second category. It is necessary, however, to the doctrine; for he declares that even God is, in a certain sense, non-existent. He is, and he is not. Absurd and blasphemous as such a proposition appears, it finds a parallel, as M. Caraman points out, in a similar utterance by Fénelon. What is meant is simply, as the context in both cases reveals, that all language is inadequate—all known qualities, perfections, characteristics, terms, improper—for the definition of the Divinity; that beyond all utterance, beyond all imagination, is everything appertaining to the Divine Essence. So far as this perfect nature lies without the apprehensible realm of the created and of the uncreated, it is for us non-existent, since *esse* and *scire* are one and correlative. There may be extravagance of conception and exaggeration of expression in such a thesis, but it is not necessarily either irreverent or absurd in its import. The fourth nature, then, as it is only *in posse*, belongs to the Divine Nature, or to the yet unmanifested operations of its reserved will and power.

The tendency of this quadrifid nature is evidently to pantheism, if it is not already pantheistic. The tendency is apparently pressed to its consummation in the development of the scheme, which is controlled in form and in statement by the text of Dionysius and the spirit of Neo-Platonism. Hence flow these tenets: "God, who alone truly exists, is the essence of all things; as Dionysius the Areopagite says, 'God is the beginning, the middle, and the end: the beginning, because all things come from him and participate in his essence; the middle, because all things subsist in him and by him; the end, because all things move towards him to attain repose, the limit of their motion, and the stability of his perfection,'" etc. "Nothing subsists outside of the Divine Nature; it alone properly and truly exists in all things, and nothing properly and truly exists which it is not. . . . Creation is the procession of God through primordial causes to the invisible and visible effects of such causation. . . . Matter is only apparent; there is no real substance but the Divine Essence." It is not surprising that Scotus Erigena has been frequently regarded as the precursor of Spinoza, though Brucker distinguishes between the pantheism of the former and the atheism which he erroneously attributes to the latter.

If the language which Scotus employed is received literally; if the phraseology which he borrows from Neo-Platonic sources or from the shaping influences of Neo-Platonic mysticism is alone considered, it is impossible to regard his philosophy as anything else but pantheism. His writings were, of course, accepted literally by his contemporaries so far as they were understood. The hazardous consequences of his doctrine were the more readily apprehended, as certain explicit dogmas were obviously at variance with the teachings of the Church, such as the denial of transubstantiation and the subordination of authority to reason. That such should be the censure of the 9th century is much more pardonable than that metaphysicians of the 19th should rarely see in *The Division of Nature* anything but crude and unmitigated pantheism. Crude it is not, for it is characterized throughout by acute penetration and vigorous thought. Unmitigated it is not, for there is a cautious asseveration of the restrictions and impotency of the human mind and of language. The Divine Nature, in regard to which he boldly speculates, is declared by him to be unutterable, ineffable, incomprehensible, supersensational, supersubstantial, superdivine. In his struggles to grasp the inapprehensible, he invents terms transcending all human appreciation, like a Byzantine emperor

devising titles of *hypersuperlative* dignity. Some palliation may be offered even for the apparent pantheism, which is, perhaps, more in the framework and phraseology of the doctrine—in the inevitable vagueness of the expression—than in the actual contemplation of the author. It must, indeed, be acknowledged that all inaccuracies or imbecilities of language react upon those from whom they proceed, modify all subsequent deductions, and infect the mind of the propounder without his cognizance and contrary to his design. But, while the immediate and derivative consequences of such aberrations should be fully recognised, they should be treated as aberrations, and, therefore, as undesigned. Such tenderness of consideration is merited by Scotus Erigena, an earnest thinker, and the first original thinker in philosophy in mediæval Christendom, when the materials of thought and the materials of expression were as yet loose and indeterminate. Examining the *De Divisione Naturæ* with the caution and reservations which such tenderness prescribes, it may be conjectured that, when Erigena speaks of God being all things and of all things being God, he really means little more than is implied in the Scripture phrase: "in whom we live, and move, and have our being;" that when he speaks of all things proceeding from God, and of all things returning to him, he does not intend to assert the mere evolution of Deity into shifting phenomenal forms, or the reabsorption into his essence of the emanations which have streamed out from his nature, but only that the divine power of creation, in its eternal operation, accompanies all the developments of creation and attends the latest modes of change. Erigena asseverates creation throughout; he does not identify the Divinity with created forms, nor does he deny the separable character of such forms in any of their stages. These views are inconsistent with intentional pantheism. These considerations can, however, only be suggested, not explained or developed.

The absolute and transcendental perfection of the Divine Nature, which was regarded as indwelling in all derivative existence, led Erigena to deny the eternity of punishments. In the same manner may be explained his anticipation of the doctrine of Leibnitz, that evil is not a positive entity, but only the privation of good. To the same principle may also be referred his position in regard to predestination, which repudiated predestination to damnation.

Much of the questionable doctrine of Scotus Erigena sprang from his dialectical procedure. Following Aristotle, but imperfectly understanding him, he regarded division as the highest function of philosophy. Hence came the title and the treatment of his principal work. Hauréau pointed out his identification of the degrees of abstraction with the grades of existence, and Ueberweg charges him with "hypostatizing the *Tabula Logica*." There is some truth in these charges, but they must not be pressed too far. It is, however, to this predominance of the dialectical procedure; to the conjunction of reason with authority; to the co-ordination of philosophy and theology; to the formal statement and refutation of objections; and to the array of scriptural, patristic, and other testimonies in support of his conclusions, that Scotus Erigena owes his title to be considered the precursor of the schoolmen. He also furnishes the prelude to the great controversy between the Realists and Nominalists by his doctrine of ideas and his qualified realism.

IV. *Influence*.—M. Guizot conceives that the influence of Scotus Erigena died with him. This is true in respect to his direct and ostensible influence, which was scarcely noticeable even in the maturity of his career. He was outside of his age. Deep night and the obscurity of all philosophical inquiry followed his disappearance from the scene. But he had awakened reflection, though soon diverted into other currents. He had scattered seeds which lay dormant, not dead, in the soil. The impulse communicated by him must have been obscurely transmitted to other times, since pope Honorius

III, in 1225—nearly four hundred years later—deemed it expedient to fulminate a pontifical censure against the *Division of Nature*. This was during the Albigensian crusades, when the pope ordered diligent search to be made for the work, and the burning of such copies as might be found. To this cause its extreme rarity may be referred.

V. Authorities.—There has been no collected edition of the works of John Scotus Erigena. His several works have been published separately, at different times. The first edition of the *De Divisione Naturæ* was edited by Gale (Oxon. 1681, fol.). It has since been edited by Schlüter (Münster, 1838), and by Floss (Paris, 1853), in Migne's *Bibliotheca*. M. Guizot stated that he had been unable to find the *De Divisione Naturæ* in any of the libraries of Paris. He acknowledges the kindness shown him in searching for it. His inquiries in England had been attended with like disappointment. He remarks that "many foreign writers who have spoken of this work have not had it before them any more than myself in its entire state. Of this they ought to have made their readers aware," as we now do, *ex parte nostra*, in regard to the complete texts of Erigena.

Notices, more or less comprehensive and satisfactory, are to be found in Pagi, *Crit. ad Annal. Baronii*, Ann. 850-51; Brucker, *Hist. Crit. Philosophie*, iii, 614-625; Hjört, *Johann Scotus Erigena*, etc. (Copenhagen, 1823); Staudenmaier, *Johannes Scotus Erigena* (Frankf. 1834); Saint-René Taillandier, *Scot Erigène*, etc. (Paris, 1843); id. *Erigène et la Philos. Schol.* (Strasb. 1843); Möller, *Joh. Scotus Erigena* (Mayence, 1844); Caraman, *Hist. des Rér. de la Philosophie*, etc. (Paris); Christlieb, *Leben u. Lehre des Joh. Scot. Erigeni* (Gotha, 1860); Hermens, *Das Leben des Scotus Erigena* (Jena, 1868); Schmid, *Der Mysticismus des Mittelalters* (ibid. 1824); Ampère, *Hist. Litt. de France*, tome iii, s. v.; Guizot, *Hist. de la Civ. en France*, leç. xxxix. (G. F. H.)

Scougal, HENRY, an eminent Scottish divine, the second son of Patrick Scougal, bishop of Aberdeen, was born in June, 1650, at Salton, in East Lothian. At the age of fifteen he entered the University of Aberdeen, and had no sooner finished his studies than he was promoted to a professorship (1669). At the age of twenty-three he was admitted into holy orders, and settled at Auchterless, near Aberdeen. In 1674 he was appointed professor of divinity in King's College, Aberdeen. He died at the early age of twenty-eight, June 20, 1678, and was buried in King's College Church, Old Aberdeen. His principal work is entitled *The Life of God in the Soul of Man* (Anon. 1671, ed. by bishop Burnet).

Scourge (usually some form of שׁוֹט, *shút*, to lash; שׁוֹט, *shót*, Job v, 21; ix, 23; Isa. x, 26; xxviii, 18, a whip, as elsewhere rendered; שׁוֹטֵט, *sháyit*, Isa. xxviii, 15; שׁוֹטֵט, *shotét*, Josh. xxiii, 13; but in Lev. xix, 20, בִּקְלוֹרֶת, *bikkóreth*, chastisement in general; פָּגַעְלוֹן, the Lat. *flagellum*, or whip, John ii, 15; so the verb *παγαλλών*, Matt. xxvii, 26; Mark xv, 15; *μαστιγῇ*, a severe kind of whip, Acts xxii, 24; Heb. xi, 36; tropically, "plague," Mark iii, 10, etc.; so in a literal sense the verb *μαστιγύω*, Matt. x, 17; xx, 19; xxiii, 34; Mark x, 34; Luke xviii, 33; John xix, 1; Heb. xii, 6; or *μαστιζω*, Acts xxii, 25). The punishment of scourging was very common among the Jews. Moses ordains (Deut. xxv. 1-3) that if there be a controversy between men, and they come to judgment, then the judges may judge them; and if the wicked man were found worthy to be beaten, the judge was to cause him to lie down, and to be beaten before his face, according to his fault, by a certain number of, but not exceeding forty, stripes. There were two ways of giving the lash—one with thongs or whips made of rope-ends or straps of leather, the other with rods or twigs. In later times the offender was stripped from his shoulders to his middle and tied by his arms to a low pillar, that he might lean forward and the executioner the more easily strike his

back. Some maintain that they never gave more nor less than thirty-nine strokes, but that in greater faults they struck with proportionate violence. Others think that when the fault and circumstances required it, they might increase the number of blows. Paul informs us (2 Cor. xi, 24) that at five different times he received thirty-nine stripes from the Jews; which seems to imply that this was a fixed number, not to be exceeded. The apostle also clearly shows that correction with rods was different from that with a whip, for he says, "Thrice was I beaten with rods." The rabbins affirm that punishment by the scourge was not ignominious, and that it could not be objected as a disgrace to those who had suffered it. They maintain, too, that no Israelite, not even the king or the high-priest, was exempt from this law. This must be understood, however, of the whipping inflicted in their synagogues, which was rather a legal and particular penalty than a public and shameful correction. Philo, speaking of the manner in which Flaccus treated the Jews of Alexandria, says he made them suffer the punishment of the whip, which, he remarks, is not less importunate to a free man than death itself. Our Saviour, speaking of the pains and ignominy of his passion, commonly puts his scourging in the second place (Matt. xx, 19; Mark x, 34; Luke xviii, 32). The punishment of scourging was specially prescribed by the law in the case of a betrothed bond-woman guilty of unchastity, and perhaps in the case of both the guilty persons (Lev. xix, 20). Women were subject to scourging in Egypt, as they still are by the law of the Koran for incontinence (Sale, *Koran*, ch. iv, note, and xxiv; Lane, *Modern Egypt*, i, 147; Wilkinson, *Ancient Egypt*, abridg. ii, 211). The instrument of punishment in ancient Egypt, as it is also in modern times generally in the East, was usually the stick, applied to the soles of the feet—*bastinado* (id. *loc. cit.*; Chardin, vi, 114; Lane, *Modern Egypt*, i, 146). See **BASTINADO**. A more severe scourge is possibly implied in the term "scorpions," whips armed with pointed balls of lead, the "horrible flagellum" of Horace, though it is more probably merely a vivid figure. Under the Roman method the culprit was stripped, stretched with cords or thongs on a frame (*divaricatio*), and beaten with rods. After the Porcian law (B.C. 300), Roman citizens were exempted from scourging, but slaves and foreigners were liable to be beaten, even to death. This infliction, as a method of extorting a confession, was not unusual among the Romans, and was sometimes practiced by the Jews themselves. The same punishment was also occasionally inflicted for ecclesiastical offences (Matt. x, 17; Acts xxvi, 11), and sometimes as an instant mode of chastisement (John ii, 15). See Gesenius, *Thesaur.* p. 1062; Isidore, *Orig.* v, 27; Horace, 1 *Sat.* ii, 41; iii, 119; Prov. xxvi, 3; Acts xvi, 22, and Grotius, *ad loc.* xxii, 24, 25; 1 Kings xii, 11; Cicero, *Ver.* iii, 28, 29; *Pro Rub.* 4; Liv. x, 9; Sallust, *Cat.* 51; and the monographs of Krumbholz, *De Servatore Fustibus Cæso* (in the *Bibl. Brem.* viii, 35 sq.); Sagittarius, *De Flagellatione Christi* (Jen. 1674); Strauch, *De Ritu Flagellandi apud Judæos* (Viteb. 1668); Hilpert, id. (Helmst. 1652); Seypel, *De Ritu Flagellandi apud Romanos* (Viteb. 1668); Schöpf, *De Flagellatione Apostolorum* (Viteb. 1683). See **PUNISHMENT**; **WHIP**.

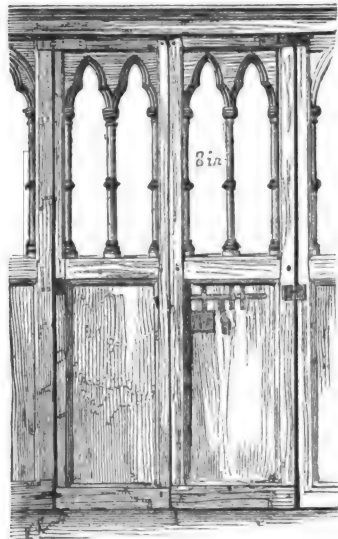

SCOURGING, a practice sanctioned by the Romish Church, whereby an individual, for the mortifying of the flesh, voluntarily scourges himself. This is resorted to in many monasteries at regular intervals, frequently as often as three times a week, and in many cases much oftener. The act is also performed at Rome on particular days during Lent. See **FLAGELLANTES**.

Screech-owl (לַיְלִית, *lāyith*, prob. from לַיְלִית, *night*, and so designating some nocturnal creature; Sept. *ὄνοκινταυροι*; Aquila, *ἀλφιδ*; Symmachus, *λαμία*; Vulg. *lamia*; marg. "night-monster"), a creature mentioned in connection with the desolation that was to mark Edom. According to the rabbins, the *lāyith* was a noc-

turnal spectre in the form of a beautiful woman that carried off children at night and destroyed them (see Bochart, *Hieroz.* iii, 829; Gesenius, *Thesaur.* s. v.; Buxtorf, *Lex. Chald. et Talm.* p. 1140). With the *lilith* may be compared the *ghule* of the Arabian fables. The old versions support the opinion of Bochart that a spectre is intended. As to the *ὄνοκίστραυροι* of the Sept. and the *lamia* of the Vulg. translations of Isaiah, see the *Hieroz.* iii, 832, and Gesenius (*Jesaja*, i, 915-920). Michaelis (*Suppl.* p. 1443) observes on this word, "In the poetical description of desolation, we borrow images even from fables." Among Oriental nocturnal birds we have *Strix ulula*, *S. brachyotus*, or short-eared owl, likewise found in Egypt and Arabia, as well as to the north of Syria, a bold, pugnacious bird, residing in ruined buildings, mistaken by commentators for the screech-owl, *S. stridula*, and supposed by some to be the *lilith* of the Bible. The spectral species, again, confounded with the goat-sucker, is, we believe, *S. coromanda* [see NIGHT-HAWK], and the same as *S. orientalis* of Hasselquist, who makes it synonymous with *massasa* and with the Syrian *bana*, but apparently only upon the evidence of the vulgar, who believe in the "spectral lady" appearance of the *lilith* and *bana*, and in its propensity to lacerate infants, of which this bird, together with the *S. ulula* and *bubo* of antiquity, is accused. The original version of the story, however, refers, not to an owl or goat-sucker, but to the poetical *Strix* of the ancients, a *lamia* with breasts, that is, a harpy or a vampire, being a blood-sucking species of the bat family (Ovid, *Fast.* vi, 139, and the fables of C. Titinius, quoted by Gesner, *De Strige*, p. 738). See BAT. If, however, some animal be denoted by the Hebrew term, the screech-owl (*S. flammea*) may well be supposed to represent it, for this bird is found in the Bible lands (see Tristram, *Ibis*, i, 26, 46), and is, as is well known, a frequent inhabitant of ruined places. The statement of Irby and Mangles relative to Petra illustrates the passage in Isaiah under consideration: "The screaming of eagles, hawks, and owls, which were soaring above our heads in considerable numbers, seemingly annoyed at any one approaching their lonely habitation, added much to the singularity of the scene" (see also Stephens, *Incid. of Trav.* ii, 76). Kitto (*Pict. Bible*, note *ad loc.*) might perhaps refer the *lilith* to the eagle-owl, or *Bubo maximus*, which

is found in many parts of the world, and haunts old ruins and other places where it is not liable to interruption. Like others of its tribe, it remains silent in its solitude during the day, but comes forth at night from its retreat, adding, by its strange appearance and dismal tones, to the gloom of the scenes which it delights to frequent. The ground color of its plumage is brown mingled with yellow, diversified with wavy curves, bars, and dashes of black. Its length is about two feet; the legs are feathered to the toes, and the iris of the eye exhibits a bright orange color. See OWL.

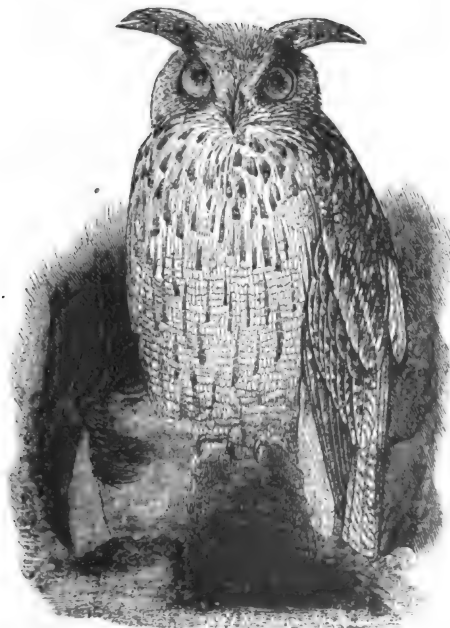

Screen, a partition, enclosure, or parclose separating a portion of a room or of a church from the rest. In the domestic halls of the Middle Ages a screen was almost invariably fixed across the lower end, so as to part off a small space, which became a lobby (with a gallery above it) within the main entrance doors, the approach to the body of the hall being by one or more doorways through the screen. These were of wood, with the lower part, to the height of a few feet, formed of close panelling, and the upper part of open-work. The passage behind the screen for the use of the servants was called "the Screens." In churches, screens were

Stanton Harcourt, Oxfordshire, cir. 1260.

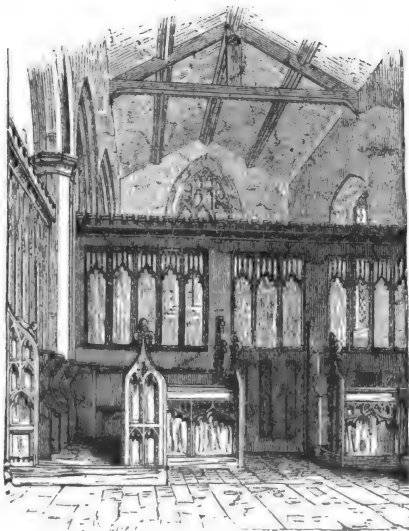

used in various situations, to enclose the choir, to separate subordinate chapels, to protect tombs, etc. That at the west end of the choir or chancel was often called the *rood-screen*, from the rood having been placed over it previous to the Reformation. Screens were formed either of wood or stone, and were enriched not only with mouldings and carvings, but also with most brilliant coloring and gilding. The screens at the west end and sides of the choir in cathedrals and large churches were usually close throughout their whole height, as they also occasionally were in other situations; but in general the lower part only, to the height of about four feet from the ground, was close, and the remainder was of open-work. The oldest piece of screen-work that has been noticed is at Compton Church, Surrey; it is of wood, of transition character from Norman to Early English, consisting of a series of small octagonal shafts with carved capitals supporting plain semicircular arches, and forms the front of an upper chapel over the eastern part of the chancel.

Of the Early English style the existing examples are almost invariably of stone. Some are close walls, more or less ornamented with panelling, arcades, and other decorations; and some are close only at the bottom, and have the upper part formed of a series of open arches. Specimens of wooden screens of very early Decorated

Bubo maximus.

date remain at Stanton Harcourt, Oxfordshire, and at Sparsholt, Berkshire, and in the north aisle of the choir of Chester Cathedral: these have the lower part of plain boarding, and the upper of small feathered arches supported on circular banded shafts. Stone screens of this date are variously, and often very highly, enriched. Some have the upper part of open-work, similar to those of wood; and others are entirely close, and are enriched with arcades, panels, niches, pinnacles, diapering, and other decorations characteristic of the style: specimens remain at Lincoln and several other cathedrals and large churches. *Perpendicular* screens exist in great variety in very many churches, both of wood and stone. Some of them are profusely ornamented with panellings, niches, statues, pinnacles, tabernacle-work, carvings, and other enrichments. The lower part usually consists of close panels, and the upper part of open-work divided by mullions supporting tracery; but sometimes the whole is close, with the same general arrangement of panelling. The illustration given from Fyfield Church, Berkshire, is an example of a *parclose*.

Parclose Screen, Fyfield, Berkshire, cir. 1480.

Scribe (סֹפֵר, *sophér*, a writer; γραμματεὺς), a word the early appearance of which in Heb. literature shows the antiquity of the art of writing. The name of Kirjath-Sepher ("city of the book," Josh. xv, 15; Judg. i, 12) may possibly connect itself with some early use of the title. In the song of Deborah (v, 14) the word appears to point to military functions of some kind. The "pen of the writer" of the A. V. has been thought to be the rod or sceptre of the commander numbering or marshalling his troops; but it may naturally signify only that those unused to warfare in the emergency exchanged the pen for the sword. The title appears with more distinctness in the early history of the monarchy. They must not be confounded, however, with the שְׂרָרִים, *shoterim* (likewise literally *recorders*) from whom they are expressly distinguished (2 Chron. xxvi, 11), as the latter were rather inspectors than writers. See **OFFICER**. Three men are mentioned as successively filling the office of scribe under David and Solomon (2 Sam. viii, 17; xx, 25; 1 Kings iv, 3, in this instance two simultaneously). Their functions are not specified, but

the high place assigned to them, side by side with the high-priest and the captain of the host, implies power and honor. We may think of them as the king's secretaries, writing his letters, drawing up his decrees, managing his finances (comp. the work of the scribe under Joash, 2 Kings xii, 10). At a later period the word again connects itself with the act of numbering the military forces of the country (Jer. lii, 25, and probably Isa. xxxiii, 18). Other associations, however, began to gather round it about the same period. The zeal of Hezekiah led him to foster the growth of a body of men whose work it was to transcribe old records, or to put in writing what had been handed down orally (Prov. xxv, 1). To this pe-

riod accordingly belongs the new significance of the title. It no longer designates only an officer of the king's court, but a class, students and interpreters of

Scribes Writing down the Number of the Slain. (Koyunjik.)

the law, boasting of their wisdom (Jer. viii, 8). See SCRIBES.

As in ancient times comparatively few could write, this was, in fact, a learned profession. Such persons, evidently official characters, are frequently depicted on the Egyptian monuments, as that nation was proverbial for recording everything relating both to public and private life. On the Assyrian monuments they likewise appear, but less prominently, and only in the later sculptures (Layard, *Ninereh*, ii, 146). In the East to-day professional letter-writers may be found in the streets plying their vocation in behalf of the uneducated. See WRITING.

SCRIBES, JEWISH. These persons (called in Heb. סופרים, *sopherim*; Gr. γραμματεῖς) were originally merely writers or copyists of the law, who followed this business as a mode of livelihood; but eventually they rose to the rank of a learned profession—becoming the doctors of the law and interpreters of the Scriptures. As such they frequently appear in the New Test., and occasionally in the later books of the Old; and their office gradually became of still more importance after the dissolution of the Jewish commonwealth. (The following article embraces both the Scripture allusions and the Talmudical references to the subject.)

The prominent position occupied by the scribes in the Gospel history would of itself make a knowledge of their life and teaching essential to any clear conception of our Lord's work. It was by their influence that the later form of Judaism had been determined. Such as it was when the "new doctrine" was first proclaimed, it had become through them. Far more than priests or Levites, they represented the religious life of the people. On the one hand, we must know what they were in order to understand the innumerable points of contrast presented by our Lord's acts and words. On the other, we must not forget that there were also, inevitably, points of resemblance. Opposed as his teaching was, in its deepest principles, to theirs, he was yet, in the eyes of men, as one of their order—a scribe among scribes, a rabbi among rabbins (John i, 49; iii, 2; vi, 25, etc. Comp. Schöttgen, *Hor. Heb.* ii, "Christus Rabbino-rum Summus").

The rise, progress, and influence of the Jewish doctors and interpreters of the law are properly divided into five distinct periods, which are indicated by the special appellations under which they were designated in successive times.

I. THE SOPHERIM, or "Scribes," properly so called.—

1. *The Name and its Signification.*—In the earlier records of the Old Test. the name *Sophér* (סופר, participle of ספר, *to write, to count*) is given to officers of state whose functions were to write the king's letters, draw up his decrees (2 Kings xii, 10; 2 Chron. xxiv, 11), and to number and write down the military forces as well as the prisoners (Judg. v, 14; 2 Kings xxv, 19; Isa. xxxiii, 18; Jer. lii, 25). As learning was intimately connected with the art of writing, and as these two accomplishments were always associated together in ancient days, these scribes occupied a distinguished position. Hence they are mentioned side by side with the high-priest and the captain of the host (2 Kings xii, 10; 2 Chron. xxiv, 11); and hence, too, the term *Sopher* (סופר) became in the post-exile period the honorable appellation of one who copied the law for himself or others, one skilled in the divine law, an interpreter of the Scriptures (Jer. viii, 8; Ezra vii, 6, 12; Neh. viii, 1, etc.). The authority of most Hebrew scholars is with this etymology of the word (Gesen. s. v.). Ewald, however (*Poet. Büch.* i, 126), takes סופר as equivalent to שופט, "a judge."

In their anxiety to preserve the text of Holy Writ as well as to point out the import of its injunctions, these scribes counted every letter and classified every precept of the law. To indicate this, the Talmud, in

IX.—G G

accordance with its general practice always to deduce from the name the various actions of the man, derives the appellation *sopher* from ספר, *to count*, maintaining that this name was given to those who counted the letters of the law (*Kiddush*, 30 a), as well as from ספר, *to number, to arrange, to classify*, submitting that the name was also given to them because they classified the precepts of Scripture (Jerus. *Shekalim*, v, 1). They had ascertained that the central letter of the whole law was the *vav* of נָחֻךְ in Lev. xi, 42, and wrote it accordingly in a larger character (Lightfoot, *On Luke* x). They counted up, in like manner, the precepts of the law that answered to the number of Abraham's servants or Jacob's descendants.

The Greek equivalent answers to the derived, rather than the original, meaning of the word. The γραμματεὺς of a Greek state was not the mere writer, but the keeper and registrar, of public documents (Thucyd. iv, 118; vii, 10; so in Acts xix, 35). The scribes of Jerusalem were, in like manner, the custodians and interpreters of the γράμματα upon which the polity of the nation rested. Other words applied to the same class are found in the New Test. Νομικοὶ appears in Matt. xxii, 35; Luke vii, 30; x, 25; xiv, 3; νομοδιδάσκαλοι in Luke v, 17; Acts v, 34. Attempts have been made, but not very successfully, to reduce the several terms to a classification. All that can be said is that γραμματεὺς appears the most generic term; that in Luke xi, 45 it is contrasted with νομικός; that νομοδιδάσκαλος, as in Acts v, 34, seems the highest of the three. Josephus (*Ant.* xvii, 6, 2) paraphrases the technical word by ἐξηγηταὶ νόμων. Lightfoot's arrangement, though conjectural, is worth giving (*Harm.* § 77). The "scribes," as such, were those who occupied themselves with the Mikra. Next above them were the "lawyers," students of the Mishna, acting as assessors, though not voting in the Sanhedrim. The "doctors of the law" were expounders of the Gemara, and actual members of the Sanhedrim. (Comp. Carpzov, *App. Crit.* i, 7; Leusden, *Phil. Hebr.* c. 23; Leyrer, in Herzog's *Real-Encyclop.* s. v. "Schriftgelehrte.")

2. *Date and Institution.*—The period of the Sopherim begins with the return of the Jews from the Babylonian captivity, and ends with the death of Simon the Just (B.C. cir. 458-300), embracing nearly a hundred and sixty years. Though there were popular teachers of the law in the Babylonian captivity, as is evident from Ezra viii, 16, where these official instructors are denominated *skilled in the law* (בכרינים), and from the fact that Ezra himself was at the head of such a class (Ezra vii, 12, 21; comp. Neh. xii, 13); yet the language in which the sacred oracles were written was gradually dying out, and Hebrew ceased, in many instances, to be the language of the people (ver. 24). This rendered the understanding of the Scriptures by the people at large a difficult matter. Besides, the newly altered state after the return from the Babylonian captivity, which called for new enactments as well as for the expansion and modification of some Pentateuchal laws, imperatively demanded that an authoritative body of teachers should so explain the law, which was regarded as the only rule of practice, as to adapt it to present circumstances. Hence Ezra, who reorganized the new state, also organized such a body of interpreters, of which he was the chief. It is for this reason that he is called *Sopher*—one occupied with books, interpreter of the Book (vii, 6, 11, 12, 21; Neh. viii, 1, 4, 9, 13; xii, 26, 36), that he is denominated the second Moses (*Sanhedrin*, 21 b; *Tosiphta*, *ibid.* cap. iv; Jerus. *Megilla*, i, 9); and that it is said "when the Thora was forgotten by Israel, Ezra came from Babylon and restored it again" (*Succa*, 20 a; comp. 2 Esdras xiv, 21-47). The skilled in the law, both from among the tribe of Aaron and the laity, who, with Ezra, and after his death to the time of the *Tanaim*, thus interpreted and fixed the divine law, are denominated

Sopherim—"scribes," in the strict sense of the word. Many of these *Sopherim* were members of the Great Synagogue which was formed by Nehemiah after the death of Ezra; hence the terms *Sopherim* and the *men of the Great Synagogue* (אנשי כנסת הגדולה) are frequently interchanged; and hence, too, the canons which were enacted during this period are sometimes recorded in the name of the former and sometimes in the name of the latter, though they proceed from one and the same body. Reserving those enactments which are recorded in the name of the Great Synagogue for that article [see SYNAGOGUE, THE GREAT], we shall here specify the most important acts and monuments which have come down to us as proceeding from the *Sopherim*.

3. *The Work of the Sopherim*.—At the outset, the words of Ezra vii, 10 describe the high ideal of the new office. The scribe is "to seek (דָּרַשׁ) the law of the Lord and to do it, and to teach in Israel statutes and judgments." This, far more than his priesthood, was the true glory of Ezra. In the eyes even of the Persian king he was "a scribe of the law of the God of heaven" (vii, 12). He was assisted in his work by others, chiefly Levites. Publicly they read and expounded the law, perhaps, also, translated it from the already obsolescent Hebrew into the Aramaic of the people (Neh. viii, 8-13). In the succeeding age they appear as a distinct class—"the families of the scribes," with a local habitation (1 Chron. ii, 55). They compile, as in the two books of Chronicles, *excerpta* and epitomes of larger histories (1 Chron. xxix, 29; 2 Chron. ix, 29). The occurrence of the word *midrash* ("the story" [margin, "the commentary"]) ["of the prophet Iddo"], afterwards so memorable, in 2 Chron. xiii, 22, shows that the work of commenting and expounding had already begun.

In the later period, it is not too much to say that the work of these *Sopherim* embraces the whole field of civil and religious law, both as it is contained in the written Word of God and as it obtained in the course of time; and that it is most essential to the criticism and interpretation of the Old Test. to understand these enactments, inasmuch as they materially affect the text of the Hebrew Scriptures. This will be evident from the following brief description of some of the *Sopheric* work.

(1.) In accordance with the primary meaning of their name, the scribes, or *Sopherim*, copied the Pentateuch, the phylacteries, and Mezuzoth for the people (*Pesachim*, 50 b), since it was only the codices which proceeded from these authoritative teachers that could be relied upon.

(2.) They guarded the Bible against any interpolations or corruptions, and for this purpose counted the letters of the Scriptures. Thus the scribes tell us that in five instances (Gen. xviii, 5; xxiv, 35; Numb. xxxi, 2; Psa. xxxvi, 7; lxviii, 26), a *vav* crept into the text through a vitiated provincial pronunciation, for which reason these *Sopheric* corrections are called the *emendations of the scribes* (סִפְרֵי נִדְרִים, *Nedarim*, 37 b [see KERI AND KETHIB; MASORAH]; Ginsburg's translation of *Jacob ben-Chajim's Introduction to the Rabbinic Bible*, p. 12).

(3.) They read the law before the people in the synagogues on stated occasions, for which reason Ezra, the chief scribe, is denominated (ἀναγνώστης) the prelector of the law (1 Esdras viii, 8). Hence the usage of the word scribe, or *Sopher* (סֹפֵר), in post-Biblical Hebrew to denote a *public reader of the law* (*Sabbath*, 31 a). Moreover, they indicated to the people when words were in pause or when they were in the plural or simply had dual forms, as is the case with אֶרֶץ, מִצְרִים, etc. These indications are called the *reading of the scribes* (מִקְרָא סִפְרֵי).

(4.) They propounded the duties inculcated in the Scriptures to the people at large on Sabbath and festivals, and delivered lectures to their disciples in the weekdays in the colleges, on the profounder import of Holy

Writ. These expositions are called *Sopheric comments* (פִּירוּשֵׁי סֹפְרִים).

(5.) They defined the limits of each precept, and determined the manner in which the sundry commands of the divine law are to be performed—e. g. they fixed the passages of Scripture meant by "the words of command" which the Lord enjoined the Israelites "to bind for a sign upon their hands, and to be as frontlets between their eyes" (Exod. xiii, 9, 16; Deut. vi, 8; xi, 18, with *Menachoth*, 34 b [see PHYLACTERY]); the portions of the Bible to be recited at morning and evening prayer as indicated in the words "thou shalt talk about them . . . when thou liest down and when thou risest up" (Deut. vi, 7), etc. These definitions of the injunctions are denominated the *measures of the scribes* (שִׁיעוּרֵי סִפְרֵי), which, though in theory they are distinguished from the letter of the Bible (דְּבַרֵי הַתּוֹרָה), yet in authority are equal to it, and are regarded as *divinely legal* (מִדְּאִוְרֵיחָא).

(6.) They fixed the traditional law, which was in the mouth and memory of the people.

(7.) They enacted prohibitory laws, called *fences* (גְּזֵרֹת, גִּזְרֵי, גִּזְרֵי, גִּזְרֵי), to guard the Biblical precepts from being violated, and these enactments are styled the *precepts of the scribes or the Sopherim, the injunctions of the elders*; and in the New Test. the *traditions of the elders* (Matt. xv, 2; Mark vii, 3), the *traditions of the fathers* (Gal. i, 14). Hence, as the phrase רִבְרֵי סֹפְרִים is not only used to express the *Sopheric expositions of the Pentateuch*, but more especially to denote the *definitions and hedges of the scribes superadded to the divine law*, it is frequently identical with the phrase *oral law* (הִלְכוֹת, שֶׁבֶכֶל פֹּה). Hence, too, the remark which often occurs in the Talmudic writings, "a subject the basis of which is in the words of the Pentateuch, but the definition or superstructure of which is from the words of the scribes" (*Sanhedrin*, 87 a; Jerus. *ibid.* xi, 4; *Kiddush*, 77 a); when the simple letter of the inspired code is spoken of in contradistinction to the definitions and hedges of the scribes.

(8.) They removed anthropomorphisms and other delicate expressions from the Scriptures by introducing alterations into the text, of which the following seventeen instances are especially recorded: i. For the original reading, וַיְהִי עֹרְנִי עֲמֹד לְפָנֵי אֲבְרָהָם, "and *Jehovah* still stood before *Abraham*" (Gen. xviii, 22), they substituted עֹרְנִי עֲמֹד לְפָנֵי יְהוָה, "and *Abraham* still stood before *Jehovah*," because it appeared offensive to say that the Deity stood before the patriarch. ii. For the remark of Moses in his prayer, "Kill me, I pray thee, . . . that I may not see (בְּרִינָךְ) thy evil" (Numb. xi, 15)—i. e. the punishment wherewith thou visitest Israel—they substituted "that I may not see (בְּרִיעָתִי) my evil," because it might seem as if Moses ascribed evil to the Deity. iii. They altered "Let her not be as one dead, who proceeded from the womb of (אִמִּי) our mother, and half of (בְּשָׂרִי) our flesh be consumed" (Numb. xii, 12) into "Let her not be as one dead-born, which, when it proceeds from the womb of (אִמִּי) *us* mother, has half (בְּשָׂרִי) *us* flesh consumed." iv. They changed "For his sons cursed (אֱלֹהִים) God" (1 Sam. iii, 13), which is still retained in the Sept., into "for his sons cursed (לָהֶם) themselves," because it was too offensive to say that the sons of Eli cursed God, and that Eli knew it and did not reprove them for it. v. "Will God see (בְּעֵינֵי) with his eye?" (2 Sam. xvi, 12) they altered into "Will God look (בְּעֵינֵי) at my affliction?" because it was too anthropomorphic. vi. "To his God (לְאֱלֹהֵיוֹ), O Israel, . . . and Israel went (לְאֱלֹהֵיוֹ) to their God" (1 Kings xii, 16), they altered into "To your tents (לְאֹהֲלֵיכֶם), O Ie-

rael, . . . and Israel departed (לְאֶהֱרִי) to their tents;" because the separation of Israel from the house of David was regarded as a necessary transition to idolatry, it was looked upon as leaving God and the sanctuary for the worship of idols in tents. vii. For the same reason they altered 2 Chron. x, 16, which is a parallel passage. viii. "My people have changed (כְּבוֹדִי) my glory for an idol" (Jer. ii, 11) they altered into "have changed (כְּבוֹדִי) their glory into an idol," because it is too offensive to say such a thing. ix. "They have put the rod to (אָסַר) my nose" (Ezek. viii, 17) they changed into "They have put the rod to (אָסַר) their nose." x. "They have changed (כְּבוֹדִי) my glory into shame" (Hos. iv, 7) they altered into "I will change their glory into shame" (כְּבוֹדִי בְּכִלְוֹן אֲמִיר) for the same reason which dictated the eighth alteration. xi. "Thou diest not" (חַיִּים), addressed by the prophet to God (Hab. i, 12), they altered into "We shall not die" (נָמוּת), because it was deemed improper. xii. "The apple of (עֵינִי) mine eye" (Zech. ii, 12) they altered into "The apple of (עֵינִי) his eye," for the reason which called forth the ninth emendation. xiii. "Ye make (אִירָה) me expire" (Mal. i, 13) they altered into "Ye weary (אִירָה) it," because of its being too gross an anthropomorphism. xiv. "They have changed (כְּבוֹדִי) my glory into the similitude of an ox" (Psa. cvi, 20) they altered into "They have changed (כְּבוֹדִי) their glory into the similitude of an ox," for the same reason which called forth the alterations in Jer. ii, 11 and Hos. iv, 7, or emendations eighth and ninth. xv. "Am I a burden (עֹלִי) to thee?" (Job vii, 20), which Job addresses to God, they altered into "So that I am a burden (אֵלֵי) to myself," to remove its offensiveness. xvi. "They condemned (אָתָּה אֱלֹהִים, or אָתָּה הָרִיץ) God, or the divine justice" (Job xxxii, 8), they altered into "They condemned (אִירָה) Job," for the same reason which called forth the fifteenth emendation. xvii. "Thou wilt remember, and thy soul will mourn over me" (וְנִשְׁכַּח נַפְשִׁי [Lam. iii, 20]), they altered into "and my soul is humbled within me" (וְנִשְׁכַּח עָלַי נַפְשִׁי), because of the seeming impropriety on the part of the sacred writer to say that God will mourn. These alterations are denominated the *seventeen emendations of the scribes* (הַסּוּפְרִים הַיְּהוּדִים), or simply *Tikum Sopherim* (הַקִּיּוּם הַסּוּפְרִים) = the emendations of the scribes, and are given in the *Massora Magna* on Num. i, 1; xi, 15, Psa. cvi, 20; Ezek. viii, 17; Hab. i, 12; and in the *Massora Finalis* (ס), 13. (Comp. Pinsker in the *Kerem Chemed* [Berlin, 1856], ix, 52 sq.; Geiger, *Urschrift und Uebersetzungen der Bibel*, p. 308 sq.; Frensdorff, *Ochlah W'ochlah* [Hanover, 1864], p. 37 sq.; Ginsburg, *The Introduction of Jacob ben-Chayim to the Rabbinic Bible*, Hebrew and English [Lond. 1865], p. 28, etc.; Wedell, *De Emendationibus a Sopherim in Libris V. T. Propositis* [Vratislaviæ, 1869].)

4. *The Manner in which the Sopherim Transmitted their Work.*—Their great reverence for the divine law, their extraordinary modesty and humility, as well as their fear lest any of their writings should be raised to the dignity of Holy Writ, prevented the scribes, or Sopherim, from embodying their expositions and enactments in separate treatises. This is the reason why there are no books of the scribes extant, and why they most scrupulously abstained from dogmatizing, so much so that the phrase *the laws of the scribes* (הַלְכוֹת סוּפְרִים) does not occur. It was the later doctors of the law (הַנְּאִרִים = νομοδιδασκαλοι) who canonized the opinions of the scribes (דְּבָרֵי סוּפְרִים), which, it was claimed, had been transmitted orally and through diverse signs.

These signs (סִמְנִים) or indications (רְמִזִּים) the scribes are said to have put down in the margins of the copies of the Hebrew Scriptures to indicate to them the interpretations and definitions which their predecessors, contemporaries, and they themselves put on certain passages, and these signs are held to have formed the foundation of the *Keri* and *Kethib*, *plene* and *defective*, etc., of later times. Thus, for instance, from Exod. xxi, 8 they deduce that it is the bounden duty of the master to marry his maiden who was sold to him for this purpose, though the law tolerates an alternative, and to indicate this opinion the scribes put in the margin against יִרְדָּה אִשָּׁר, "whom he will not betroth," the word לִי with ו instead of א, i. e. *whom he ought to betroth* (comp. *Bekoroth*, 13 a; Rashi on Exod. xxi, 8). Again, in Lev. xxv, 29, 30, it is enacted that if a house in a walled city has been sold and is not redeemed within a year, it becomes the absolute property of the purchaser. Now, the scribes defined the phrase *walled city* to mean a city which had walls in the time of the conquest of Canaan by Joshua, though these walls were afterwards removed; and to indicate this they put in the margin against חוֹמָה אִשָּׁר, "which had a wall," the word לִי with ו instead of א, i. e. *which has no wall now* (comp. *Erachin*, 32 a; *Shebuth*, 16 a; Rashi on Lev. xxv, 30, 31; Maimonides, *Iad Ha-Chezaka Hilchoth Shemita Ve-Jobel*, xii, 15). They concluded from Lev. xxiii, 4 that the proclamation or fixing of the new moon devolved upon the supreme court at Jerusalem (Mishna, *Rosh-hashanah*, i, 8, 9; ii, 5, 7), and to indicate this the scribes wrote the defective אָתָּה, "ye shall pronounce," i. e. *בְּקוֹרֵשׁ*, "it is sanctified" [see *New Moon*], instead of the plene אִירָה. The scribes also indicated that certain commandments are not to be restricted to Jerusalem, but are to be kept wherever the Jews reside, by writing in such instances the defective מִשְׁבְּחֵיכֶם, i. e. *in your desolations*, instead of the plene מִשְׁבְּחֵיכֶם, *your dwellings* (Lev. xxiii, 14, 31). These signs are the basis of the *Masorah*, and account for many of the various readings which obtained in the course of time. For further information on this most important branch of the Sopheric work, we must refer to the elaborate treatise of Krochmal, entitled *More Neboche Ha-Zeman*, sec. xiii, p. 161, etc.

5. *The Authority of the Sopherim.*—Though the scribes of this period themselves did not issue their expositions of what they believed to be the doctrines of Holy Writ with the declaration that "except every one do keep them whole and undefiled, without doubt he shall perish everlastingly," or "except a man believe them faithfully, he cannot be saved," but simply stated them as their opinions about the teachings of the divine law, yet the doctors of the law who succeeded the Sopherim accepted these expositions as final, and decreed that whosoever gainsays their authority commits a capital offence. As the penalty attached to the violation of some of the Mosaic injunctions and prohibitions was not very serious, inasmuch as the law distinguished between the diverse kinds of transgression, while there is no distinction made in the Sopheric enactments, since the same amount of guilt and the same kind of punishment were incurred in case any one of their precepts was violated, the sages of the Mishna remark, "To be against the words of the scribes is more punishable than to be against the words of the Bible; he who, in order to transgress the Scriptures, says phylacteries are not enjoined in Holy Writ, is acquitted, but he who says that there ought to be five compartments in the phylacteries, thus adding to the decisions of the scribes, is guilty" (*Sanhedrin*, xi, 3). Hence also the Talmudic exposition of Eccles. xii, 9, which is as follows: "Above these, my son, beware; of making many books there is no end;" i. e. my son, take care of the decisions of the

scribes above the words of the Bible, for in the words of Scripture there are both (עשה) injunctions and (לא תעשה) prohibitions [the transgression of some of these involves only a slight punishment], while the transgression of any one of the precepts of the scribes is a capital offence. And if thou shouldst say, seeing that they are so weighty, Why are they not written down? [reply] "To make many books there is no end" (*Eruvin*, 21 b). It is probable, however, that these bold statements, which appear to exalt the expositions of men above the Word of God, are really due to the succeeding period, which we will characterize in its place, and to which we relegate much that relates to the office and its influence.

II. *The TANAIM, or Teachers of the Law of New-Test. Times.*—1. *Name and Date of the Tanaim.*—The appellation *Tanaim* is Aramaic (תנאים, sing. תנאי, frequentative of the Chaldee תנח = Hebrew שנה, to repeat), and literally denotes *repeaters of the law, or teachers of the law*. The Hebrew equivalent for this title is שניי הלכות, while in the New Test. this class of teachers are denominated νομοδιδασκαλοι (Luke v, 17; Acts v, 34). These teachers of the law are also called the *sages*, the *wise* (חכמים, σοφοί), *elders* (זקנים, πρεσβύτεροι, *Succa*, 46; *Sabbath*, 64), and in later times *rabbanan* (רבנן) = *our teacher, rabbari* (= Παββουρι, Mark x, 51; John xx, 16), *rabbon*, and *rabbi*. See *RABBI*. It is only rarely that the great doctors of this period are called סופרים, *scribes* (comp. *Kelim*, 13 b). The period of the Tanaim begins with the famous Antigonus of Soho (B.C. 200), and terminates with Gamaliel III ben-Jehudah I (A.D. 220), in whose presidency the Sanhedrim, and with it the college, was transferred from Jabneh to Tiberias, thus extending over 420 years.

2. *The Work of the Tanaim.*—The labors and tenets of these doctors of the law are of the greatest interest to the Christian student of the New Test., inasmuch as it was in their midst that our Saviour appeared; and as both Christ and his apostles frequently refer to the teachings, and often employ the very language of the Tanaim. The chief aim of the doctors of the law during this period was—

(1.) To fix and formularize the views and expositions of their predecessors, the Sopherim, and to pass them as laws. Thus fixed and established, these views were termed *Halachôth* (הלכות) = *laws*: they are composed in Hebrew and expressed in laconic and often enigmatical formulæ. The formularizing of these Halachoth was especially needed, since the successive ascendancy of the Persians, Egyptians, Syrians, and Romans over Palestine greatly influenced the habits and conduct of the Jewish people, and since the scribes themselves, as we have seen, did not set forth their opinions as final. The relation which the work of the Tanaim, or the νομοδιδασκαλοι, in this department bears to that of the scribes will be better understood by an example. The scribes deduced from the words "When thou liest down and when thou risest up" (בשכבך ובקומך, Deut. vi, 7), that it is the duty of every Israelite to repeat both morning and evening the sections of the law (i. e. Deut. vi, 4-9; xi, 13-21) which proclaim the unity of God, without specifying the hours during which the passages are to be recited; while the νομοδιδασκαλοι, accepting this deduction of the scribes as law (הלכה), fixed the time when this declaration about the unity of God is to be made by every Israelite, without mentioning the length of the section to be recited, or that it is a duty to do so, because they founded it upon the interpretation of the Sopherim (Mishna, *Berakoth*, i, 1-5).

(2.) The Tanaim compiled exegetical rules (מדרה) to show how these opinions of the scribes, as well as the expansion of these views by doctors of the law, are to be deduced from the Scriptures. See ISMAËL BEN-

ELISA; SCRIPTURE, INTERPRETATION AMONG THE JEWS. The study of the connection between the opinions of the scribes formularized into Halachoth, the Bible was called the *Midrash*, or *exposition of the Scriptures* (מדרש הכתובים).

(3.) They developed the ritual and judicial law hinted at in the Pentateuch in accordance with the requirements of the time and the ever-changing circumstances of the nation. As the period over which the work of these teachers of the law extended was long, and as the older doctors of this period gave their definitions of the Halachoth in extremely brief and sometimes obscure formulæ, many of the Halachoth, like the Scriptures, needed further elucidation and became the object of study and discussion in the later Tanaim. These discussions, as well as the different modes of exposition whereby the sundry Halachoth were connected with the Bible, which rendered them mental characteristics and idiosyncrasies of the individual teachers and schools, were gradually collected and rubricated, and now constitute the contents of the *Tanaim* and the commentaries on the Pentateuch, the *Mechilta*, *Siphra*, and *Siphri*, a description of which is given in the article MIDRASH. For the other Halachoth the most distinguished among these doctors of the law, we must refer to the article SANHEDRIM. It must be remembered that this supreme court and chief seat of the law dates from the commencement of the Tanaim.

3. *Development of Doctrine under the Tanaim.*—It is characteristic of the scribes of the earlier period, that, with the exception of Ezra and Zadok (Neh. xiii, 13), we have no record of their names. A law was honored then collectively as the men of the Great Synagogue, the true successors of the prophets (*Pirke Aboth*, i, 1); but the men themselves by whose agency the Scriptures of the Old Test. were written in their present characters, compiled in their present form, and to their present number, remain unknown to us. It is perhaps, was so important a work done so silently, has been well argued (*Jost, Judenthum*, i, 42), that it was so of set purpose. The one aim of the Tanaim was to promote reverence for the law, and to lay the groundwork of the people's life. They wrote nothing of their own, lest less worthy additions should be raised to a level with those of the original God. If interpretation were needed, their law should be oral only. No precepts should be perpetuated as resting on their authority. In the words of the *Mishna*, they devoted themselves to the *Mikra*, the recitation, reading, as in Neh. viii, 8), the careful study of the text, and laid down rules for transcribing the law with the most scrupulous precision (comp. the tract *Shema* in the Jerusalem Gemara).

(2.) A saying is ascribed to Simon the Just (B.C. 300-290), the last of the succession of the great Sopherim, which embodies the principle which they had acted, and enables us to trace the stage of the growth of their system. "Our fathers taught us," he said, "three things: to be cautious in judging, to train many scholars, and to set the law before the people" (*Pirke Aboth*, i, 1; comp. *Jost*). They wished to make the law of Moses the rule for the whole nation and for individual men. It lies in the nature of every such law, of every in half-systematic code, that it raises questions which does not solve. Circumstances change, while the law remains the same. The infinite variety of life cases which it has not contemplated. A Roman Greek jurist would have dealt with these on principles of equity or polity. The Jewish law could recognise no principles beyond the precept of the law. To him they all stood on the same footing, all equally divine. All possible cases must be decided within their range, decided by their authority.

(3.) The result showed that in this, as in other instances, the idolatry of the letter was destructive

very reverence in which it had originated. Step by step the scribes were led to conclusions at which we may believe the earlier representatives of the order would have started back with horror. Decisions on fresh questions were accumulated into a complex system of casuistry. The new precepts, still transmitted orally, more precisely fitting into the circumstances of men's lives than the old, came practically to take their place. The "Words of the Scribes" (דברי סופרים), now used as a technical phrase for these decisions) were honored above the law (Lightfoot, *Harm.* vol. i, § 77; Jost, *Judenth.* i, 93). It was a greater crime to offend against them than against the law. They were as wine, while the precepts of the law were as water. The first step was taken towards annulling the commandments of God for the sake of their own traditions. The casuistry became at once subtle and prurient, evading the plainest duties, tampering with conscience (Matt. xv, 1-6; xxiii, 16-23). The right relation of moral and ceremonial laws was not only forgotten, but absolutely inverted. This was the result of the profound reverence for the letter which gave no heed to the "word abiding in them" (John v, 38).

(4.) The history of the full development of these tendencies will be found elsewhere. See TALMUD. Here it will be enough to notice in what way the teaching of the scribes in our Lord's time was making to that result. Their first work was to report the decisions of previous rabbins. These, as we have just seen, were the *Halachoth* (that which goes, the current precepts of the schools)—precepts binding on the conscience. As they accumulated, they had to be compiled and classified. A new code, a second *corpus juris*, the Mishna (δευτερεύουσα), grew out of them, to become in its turn the subject of fresh questions and commentaries. Here ultimately the spirit of the commentators took a wider range. The anecdotes of the schools or courts of law, the *obiter dicta* of rabbins, the wildest fables of Jewish superstition (Tit. i, 14), were brought in, with or without any relation to the context, and the *Gemara* (completeness) filled up the measure of the institutes of Rabbinic law. The Mishna and the Gemara together were known as the Talmud (instruction), the "necessary doctrine and erudition" of every learned Jew (Jost, *Judenth.* ii, 202-222).

(5.) Side by side with this was a development in another direction. The sacred books were not studied as a code of laws only. To search into their meaning had from the first belonged to the ideal office of the scribe. He who so searched was secure, in the language of the scribes themselves, of everlasting life (John v, 39; see *Pirke Aboth*, ii, 8). But here also the book suggested thoughts which could not logically be deduced from it. Men came to it with new beliefs, new in form, if not in essence, and, not finding any ground for them in a literal interpretation, were compelled to have recourse to an interpretation which was the reverse of literal. The fruit of this effort to find what was not there appears in the *Midrashim* (searchings, investigations) on the several books of the Old Test. The process by which the meaning, moral or mystical, was elicited was known as *Hagadah* (saying, opinion). There was obviously no assignable limit to such a process. It became a proverb that no one ought to spend a day in the Beth-ham-Midrash ("the house of the interpreter") without lighting on something new. But there lay a stage higher even than the Hagadah. The mystical school of interpretation culminated in the *Cabala* (reception, the received doctrine). Every letter, every number, became pregnant with mysteries. With the strangest possible distortion of its original meaning, the Greek word which had been the representative of the most exact of all sciences was chosen for the wildest of all interpretations. The *Gematria* (= γεωμετρία) showed to what depths the wrong path could lead men. The mind of the interpreter, obstinately shutting out the light of day, moved

in its self-chosen darkness amid a world of fantastic images (comp. Carpzov, *App. Crit.* i, 7; Schöttgen, *Hor. Heb. de Mess.* i, 4; Zunz, *Gottesdienstl. Vorträge*, p. 42-61; Jost, *Judenth.* iii, 65-81).

4. *Some of the Distinguished Doctors of the Law of this Period and their Tenets.*—As the presidents and vice-presidents of the chief seat of learning during the whole of this period are given in chronological order in the article SCHOOLS (HEBREW), we shall here only mention such of the doctors of the law as have influenced the Jewish mind and the religious opinions of the nation, and by their teaching prepared the way for Christianity. Foremost among these doctors of the law are to be mentioned:

a. Antigonos of Soho (B.C. 200-170), whose famous maxim, according to tradition, gave rise to Sadduceism and Boethusianism [see SADDUCEE], and who received the traditions of the fathers from Simon the Just, and transmitted them to his successors (*Aboth*, i, 3). The tenet of the Sadducees, however, never commanded the adhesion of more than a small minority. It tended, by maintaining the sufficiency of the letter of the law, to destroy the very occupation of a scribe, and the class, as such, belonged to the party of its opponents. The words "scribes" and "Pharisees" were bound together by the closest possible alliance (Matt. xxiii, *passim*; Luke v, 30). See PHARISEE. Within that party there were shades and subdivisions, and to understand their relation to each other in our Lord's time, or their connection with his life and teaching, we must look back to what is known of the five pairs (זוגות) of teachers who represented the scribal succession. Why two, and two only, are named in each case we can only conjecture, but the Rabbinic tradition that one was always the nasi, or president, of the Sanhedrim as a council, the other the *ab-beth-din* (father of the House of Judgment), presiding in the supreme court, or in the Sanhedrim when it sat as such, is not improbable (Jost, *Judenth.* i, 160).

b. Jose ben-Joeser of Zereda and his companion, Jose ben-Jochanan of Jerusalem, who were the first of the four pairs (זוגות) that headed the Sanhedrim and the doctors of the law as president and vice-president (B.C. 170-140). Jose ben-Joeser was a priest, and played an important part in the Maccabæan struggles. He was the spiritual head of the *Chasidim* (Mishna, *Chagigah*, ii, 7), also called *scribes* (γραμματεῖς, 1 Macc. vii, 12, 13; 2 Macc. vi, 18), who afterwards developed themselves into the Essenes [see CHASIDIM; ESSENES]; was among the "company of Assideans who were mighty men of Israel, even all such as were voluntarily devoted unto the law," and the high-priest of the sixty who were slain by Bacchides through the treachery of Alcimus (1 Macc. ii, 42; vii, 12-16, with *Chagigah*, 18 b; *Bereshith Rabba*, חולדות, § lxxv). The grand maxim of Jose ben-Joeser was, "Let thy house be the place of assembly for the sages, sit in the dust of their feet, and eagerly drink in their words" (*Aboth*, i, 4). Bearing in mind the distracted state of the Jewish people at that time, and the fearful strides which Hellenism made among the highest sacerdotal functionaries, and which threatened to overthrow the ancestral doctrines, this solemn admonition of the martyr that every household should form itself into a band of defenders of the faith, headed by *sages*—i. e. *scribes*, or *doctors of the law*—and that every Israelite should strive to be instructed in the religion of his forefathers (the phrase "to be enveloped in the dust of their feet" has its origin in the ancient custom of disciples sitting on the ground and sometimes in the dust at the feet of their teachers), will be appreciated. This will also explain the maxim of his colleague Jose ben-Jochanan: "Let thy house be wide open, let the poor be thy guests, and do not talk too much with women" (*Aboth*, i, 5). To erect a wall of partition between the apostate Hellenists, who desecrated the sanctuary, and the faithful, as well as to

prevent the residence of Jews among the Syrians, and check Hellenistic luxuries, these two doctors of the law enacted that contact with the soil of any foreign country, and the use of glass utensils, impart Levitical defilement (*Sabbath*, 14 b). These rigorous laws of Levitical purity laid the foundation of the withdrawal of the Essenes from the community at large, and of the ritual and doctrinal difference between the Pharisees and Sadducees, as hitherto the differences of these two parties were chiefly political. Hence the remark in the Mishna: "Since the death of Jose ben-Joeser of Zereda and Jose ben-Jochanan of Jerusalem, the unity in the schools has ceased" (*Sotah*, ix, 9). The precepts ascribed to them indicate a tendency to a greater elaboration of all rules connected with ceremonial defilement. Their desire to *separate* themselves and their disciples from all occasions of defilement may have furnished the starting-point for the name of Pharisee. The brave struggle with the Syrian kings had turned chiefly on questions of this nature, and it was the wish of the two teachers to prepare the people for any future conflict by founding a fraternity (the *Chaberim*, or associates) bound to the strictest observance of the law. Every member of the order, on his admission, pledged himself to this in the presence of three Chaberim. They looked on each other as brothers. The rest of the nation they looked on as "the people of the earth." The spirit of scribedom was growing. The above precept associated with the name of Jose ben-Joeser pointed to a further growth (*Jost*, i, 233). It was hardly checked by the taunt of the Sadducees that "these Pharisees would purify the sun itself" (*ibid.* i, 217). See PHARISEE.

c. Jochanan, the high-priest and governor of Jerusalem, ben-Simon, ben-Mattathias, commonly called John Hyrcanus (B.C. 135-106), was a distinguished Pharisaic scribe, or doctor of the law. The enactments which he passed, as recorded in the Mishna, show his endeavors to render the Temple service uniform, his humane feelings, and his desire to alleviate the unnecessary burdens of the law. Though Ezra, to punish the Levites for their backwardness in returning from Babylon, deprived them of their tithes or transferred them to the priests (*Ezra* ii, 36-42; viii, 15; *Neh.* vii, 43-45; comp. with Mishna, *Maaser Shen*, v, 15; *Sotah*, ix, 10; Babylon Talmud, *Yebamoth*, 86 b; *Kethuboth*, 26 a), yet the formula consisting of Deut. xxvi, 13-15, and called confession (וְרָרָה), in which the Israelite had to declare in the Temple before God that he had paid the tithes to the *Levite*, continued to be recited at the time of the evening sacrifice on the last day of Passover. There was also a custom of singing every morning in the Temple *Psa.* xlv, 23-26 as part of the hymnal service, and of wounding the sacrifices on their head for the blood to run into their eyes, so as momentarily to blind them in order that they might be bound easily. Moreover, up to the time of Jochanan the high-priest—John Hyrcanus, the people worked during the middle days of the festivals. See PASSOVER; TABERNACLES, FEAST OF. "Now Jochanan the high-priest did away with the confession about the Levitical tithes (because it was now inapplicable); he also ordered the discontinuance of chanting 'Awake!' (*Psa.* xlv, 23, etc., because the singing of it every morning made it appear as if God were asleep) and the wounding of the sacrifices (because it was cruel); interdicted working on the middle days of the festivals, since up to his days the hammer was busily at work in Jerusalem, and ordered buyers of questionable produce, whether it had been tithed or not, to tithe it" (*Mishna, Maaser Shen*, v, 16; *Sotah*, ix, 10).

d. Jehoshuah ben-Perachja and his colleague, Natai of Arabela, who were the second of the four pairs (זוֹרֵי) that headed the Sanhedrim and the doctors of the law as president and vice-president (B.C. 140-110). Though their surviving maxims are very few, yet they are indicative of the irreparable breach which was then made between the Pharisees and the Sadducees. In harmony

with the wisdom, humanity, consistency, and leniency of John Hyrcanus, under whose pontificate and rule these two distinguished doctors of the law taught, Jehoshuah ben-Perachja propounded the maxim, "Procure for thyself a teacher, gain to thyself a friend, and judge every man by the rule of innocence" (*Aboth*, i, 6). If, however, we render this saying thus: "Take to thyself a teacher (*Rab*), get to thyself an associate (*Chaber*), judge every man on his better side," we shall see that, while its last clause attracts us by its candor, it nevertheless shows how easily even a fair-minded man might come to recognise no bonds of fellowship outside the limits of his sect or order (*Jost*, i, 227-233). His colleague, Natai of Arabela, at all events, who regarded the foreign policy of the Sadducees as desecration of God's holy heritage [see SADDUCEE], and as working into the hands of those very enemies whom they had only just driven from the holy city (1 Macc. xiii, etc.), taught: "Keep aloof from wicked neighbors, have no fellowship with sinners, and reject not the belief in retribution" (*Aboth*, i, 7). It was this maxim which brought about the final separation between the Pharisees and the Sadducees in the time of Hyrcanus. The gulf thus created was deepened by an unhappy circumstance which made John Hyrcanus desert the ranks of the Pharisees and go over to the Sadducees, and which gave the first impulse to the bloody sufferings and the ultimate destruction of his country and people, for whose independence and religion he and his family fought so bravely. The circumstance is as follows: Having returned from a glorious victory, and being pleased with the condition of the people at home, Hyrcanus gave a banquet, to which he invited both Pharisees and Sadducees. As he was enjoying himself in the midst of his guests, he, instigated by the Sadducees, asked the Pharisees to tell him whether there was any command which he had transgressed, that he might make amends, since it was his great desire to make the law of God his rule of life. To this one of the Pharisees replied: "Let Hyrcanus be satisfied with the regal crown and give the priestly diadem to some one more worthy of it; because before his birth his mother was taken captive from the Maccabean home, in a raid of the Syrians upon Modin, and it is illegal for the son of a captive to officiate as a priest, much more as high-priest." The Sadducees, who had thus far succeeded, tried to persuade Hyrcanus that the Pharisees did this designedly in order to lower him in the eyes of the people. To ascertain it, Hyrcanus demanded of the Sanhedrim to sentence the offender to capital punishment. But the Pharisaic doctors of the law, who had no special enactment against indignities heaped upon a sovereign, who believed and taught that all men are alike in the sight of God, and whose very president at this time propounded the maxim of leniency, said that according to the law they could only give him forty stripes save one, which was the regular punishment for slanderers. It was this which made Hyrcanus go over to the Sadducees, massacre many of the Scribes, and fill the Sanhedrim with Sadducees (comp. Josephus, *Ant.* xiii, 10, 5, 6, with *Kiddushin*, 66 a; Grätz, *Geschichte der Juden* (2d ed.), iii, 453).

e. This deplorable condition, however, soon passed by, and the Scribes were again in the ascendancy in the reign of Alexander Jannaeus, son of John Hyrcanus, when Simon ben-Shetach (q. v.), brother of queen Salome (*Berakoth*, 48 a), was the president of the Sanhedrim, and Jehudah ben-Tabai vice-president (B.C. 110-65). Though Simon ben-Shetach had for a time to quit the court and hide himself, because he was accused of treason against the sovereign, yet Alexander Jannaeus reinstated him upon the solicitation of the Parthian ambassadors, who missed at the royal table the wisdom of this scribe, which they had so much enjoyed on a former occasion. He allowed himself to be elected member of the Sanhedrim, which was then filled with the Sadducees whom John Hyrcanus had put there, and by his

wisdom repeatedly in the presence of the queen and king confounded these Sadducees by puzzling questions about the treatment, without tradition, of such legal cases as are not mentioned in the Mosaic law, so much so that they gradually quitted the supreme court, and Simon filled the vacancies with the scribes. The calamitous event which happened at the Feast of Tabernacles while Alexander Jannæus was officiating in the Temple [see TABERNACLES, FEAST OF] checked for a time the progress of the scribes, but it was more than made up by the fact that this sovereign, on his death-bed, committed his wife to the care of the Pharisees (Josephus, *Ant.* xiii, 16, 1, 2). Under Simon ben-Shetach and Jehudah ben-Tabai the Sanhedrim was entirely cleared of the Sadducees, and a festival day was instituted (March 17, B.C. 78) to commemorate the return of the residue of the scribes (פליטת ספרים) who went into exile in the days of John Hyrcanus. The reconstruction of the Sanhedrim, however, was not the only important work effected by these two doctors of the law. To render divorce difficult, Simon ben-Shetach decreed that the money of marriage-settlement, which was at first deposited with the wife's father, and afterwards laid out in household furniture—thus being no loss to the husband in case he divorced his wife—should amount at least to two silver *mina* (about £7 10s.) if the bride were a maiden, and half that sum to a widow; that the husband should invest it in his business, so as to render it a matter of great inconvenience and difficulty to draw it out, and that the whole of his property should be pledged for the payment of this settlement (כתובה, *שטחאפף*), thus precluding the possibility of her being defrauded of it by unprincipled heirs (Babylon *Kethuboth*, 82 b; Jerusalem *Kethuboth*, cap. viii, end; *Sabbath*, xiv, 6; xvi, 6). See MARRIAGE. Simon ben-Shetach, moreover, introduced superior schools into every provincial town, and ordained that all the youths from the age of sixteen should visit them (Jerusalem *Kethuboth*, viii, 11), which created a new epoch in the education of the nation. See SCHOOLS. Their zeal, however, to uphold the law in opposition to the Sadducees led them to commit rigorous acts towards their antagonists (Josephus, *Ant.* xiii, 16, 1); and on one occasion Jehudah ben-Tabai, to eradicate the Sadducean notions from the people [see SADDUCEE], condemned to death a false witness in a capital trial (*Maccoth*, v, b). But when Simon ben-Shetach reprimanded his colleague for this unlawful act, Jehudah ben-Tabai, who was then president of the Sanhedrim, was so truly penitent that he at once gave up the presidency, threw himself on the grave of the man he had condemned, crying most bitterly, and beseeching God to take his own life as an atonement for the one he had judicially taken away (*ibid.*). This rash act taught him greater leniency for the future, and accounts for his precept to judges: "Only as long as the accused stand before thee regard them as transgressors of the law; but regard them as innocent immediately after they are released, and have suffered the penalty of the law" (*Aboth*, i, 8). The following may be mentioned as an instance of Simon ben-Shetach's extraordinary conscientiousness, which must have greatly impressed itself upon the minds of the people, and prepared the way for the reception of the truth as it is in Jesus. The Sadducees, out of revenge for his rigorous measures against them, suborned two witnesses, who testified that his son committed a capital crime. He was accordingly sentenced to death. As he was led to the place of execution, the witnesses, being filled with horror that they had condemned innocent blood, confessed that they had borne false witness. But as the law from time immemorial had enacted that "the evidence once given and accepted cannot be revoked" (Maimonides, *Iad Ha-Chezaka Hilechoth Eduth*, iii, 5), and though Simon's fatherly feelings for a moment made him hesitate about the propriety of the execution, yet his son, to uphold the dig-

nity of the law, exclaimed to him, "Father, if thou wishest that salvation should come to Israel through thee, pay no regard to my life," and accordingly the son died a martyr to the honor of the law (Jerusalem *Chagigah*, ii, 2; *Sanhedrin*, i, 5; vii, 8). This noble sacrifice on the part of Simon ben-Shetach evidently made him lay down the maxim, "Test witnesses most carefully, and be cautious in questioning them, lest they learn therefrom how to impart to their falsehood the garb of truth" (*Aboth*, i, 9). No wonder that tradition celebrates Simon ben-Shetach as "the restorer of the divine law to its pristine glory" (*Kiddushin*).

f. Shemaja (=Σαμαίας, Josephus, *Ant.* xiv, 9, 4) and Abtalion (=Πολλιων, *ibid.* xv, 1, 10, 4) are the two great doctors of the law who now succeeded to the presidency and vice-presidency (B.C. 65-30) as the fourth pair (זוגות). They are generally considered as having been proselytes; but this is precluded by the fact that they were at the head of the Sanhedrim, and that according to the Jewish law no proselyte could even be an ordinary member of the seventy-one. Indeed, Grätz (iii, 481) has shown that they were Alexandrian Jews, and that the notion of their having been proselytes rests upon the misinterpretation of a passage in the Talmud. Though very few of their enactments have come down to us, yet the influence which their great learning and unflinching integrity gave them among the people at large, and especially among the succeeding doctors of the law, was such as to secure for any question an authoritative reception if it could be traced to have been propounded by Shemaja and Abtalion (Mishna, *Edayoth*, i, 3; *Pesachim*, 66 a), who were styled the two *magnates of their day* (גדולי הדין). The two maxims of these distinguished scribes which have survived reflect the deplorable condition of the Jews under the Roman yoke. Thus Shemaja urged on his disciples, "Love a handicraft, bate the rabbinate, and befriend not thyself with the worldly powers" (*Aboth*, i, 10); while Abtalion said, "Sages, be careful in your utterances, lest ye draw upon yourselves the punishment of exile, and ye be banished to a place where the water is poisonous [i. e. of seductive influence], and the disciples who go with you drink thereof and die, and thus bring reproach upon the sacred name of God" (*ibid.* i, 11). Some idea may be formed of Shemaja's unflinching integrity from his conduct at the trial of Herod before the Sanhedrim. When this magnate was summoned before the supreme tribunal to answer the accusation of the mothers whose children he had slain, and when his armed appearance and his retinue of soldiers frightened the other members of the court into silence, Shemaja, the president, had the courage to pronounce the sentence of death against him (Josephus, *Ant.* xiv, 9, 4). When he showed himself to be irresistible, they had the wisdom to submit, and were suffered to continue their work in peace. Their glory was, however, in great measure gone. The doors of their school were no longer thrown open to all comers so that crowds might listen to the teacher. A fixed fee had to be paid on entrance. The regulation was probably intended to discourage the attendance of the young men of Jerusalem at the scribes' classes; and apparently it had that effect (*Jost*, i, 248-253). On the death of Shemaja and Abtalion, there were no qualified successors to take their place. Two sons of Bethera, otherwise unknown, for a time occupied it, but they were themselves conscious of their incompetence. A question was brought before them which neither they nor any of the other scribes could answer. At last they asked, in their perplexity, "Was there none present who had been a disciple of the two who had been so honored?" The question was answered by Hillel the Babylonian, known also, then or afterwards, as the son of David. He solved the difficulty, appealed to principles, and when they demanded authority as well as argument, ended by saying, "So have I heard from my masters Shemaja and Abtalion." This was decisive.

The sons of Bethera withdrew. Hillel was invited by acclamation to enter on his high office. His alleged descent from the house of David may have added to his popularity.

g. The name of Hillel (born cir. B.C. 112) has hardly received the notice due to it from students of the Gospel history. The noblest and most genial representative of his order, we may see in him the best fruit which the system of the scribes was capable of producing. It is instructive to mark at once how far he prepared the way for the higher teaching which was to follow, how far he inevitably fell short of it. The starting-point of his career is given in a tale which, though deformed by Rabbinic exaggerations, is yet fresh and genial enough. The young student had come from Golah, in Babylonia, to study under Shemaja and Abtalion. He was poor and had no money. The new rule requiring payment was in force. For the most part, he worked for his livelihood, kept himself with half his earnings, and paid the rest as the fee to the college porter. On one day, however, he had failed to find employment. The doorkeeper refused him entrance; but his zeal for knowledge was not to be baffled. He stationed himself outside, under a window, to catch what he could of the words of the scribes within. It was winter, and the snow began to fall, but he remained there still. It fell till it lay upon him six cubits high (!) and the window was darkened and blocked up. At last the two teachers noticed it, sent out to see what caused it, and, when they found out, received the eager scholar without payment. "For such a man," said Shemaja, "one might even break the Sabbath" (Geiger, in Ugolini *Thesaur.* xxi; Jost, i, 254). In the earlier days of his activity, Hillel had as his colleague Menachem, probably the same as the Essene Manaen of Josephus (*Ant.* xv, 10, 5). He, however, was tempted by the growing power of Herod, and, with a large number (eighty in the Rabbinic tradition) of his followers, entered the king's service and abandoned at once his calling as scribe and his habits of devotion. They appeared publicly in the gorgeous apparel, glittering with gold, which was inconsistent with both (Jost, i, 259). The place thus vacant was soon filled by Shammai. The two were held in nearly equal honor. One, in Jewish language, was the Nasi, the other the Ab-beth-din, of the Sanhedrim. They did not teach, however, as their predecessors had done, in entire harmony with each other. Within the party of the Pharisees, within the order of the scribes, there came for the first time to be two schools with distinctly opposed tendencies—one vehemently, rigidly orthodox, the other orthodox also, but with an orthodoxy which, in the language of modern politics, might be classed as liberal-conservative. The points on which they differed were almost innumerable (comp. Geiger, *ut sup.*). In most of them—questions as to the causes and degrees of uncleanness, as to the law of contracts or of wills—we can find little or no interest. On the former class of subjects the school of Shammai represented the extremest development of the Pharisaic spirit. Everything that could possibly have been touched by a heathen or an unclean Israelite became itself unclean. "Defilement" was as a contagious disease which it was hardly possible to avoid even with the careful scrupulosity described in Mark vii, 1-4. They were, in like manner, rigidly sabbatarian. It was unlawful to do anything before the Sabbath which would in any sense be in operation during it, e. g. to put cloth into a dye-vat, or nets into the sea. It was unlawful on the Sabbath itself to give money to the poor, or to teach children, or to visit the sick. They maintained the marriage law in its strictness, and held that nothing but the adultery of the wife could justify repudiation (Jost, i, 257-269). We must not think of them, however, as rigid and austere in their lives. The religious world of Judaism presented the inconsistencies which it has often presented since. The "straitest sect" was also the most secular. Shammai himself was said to be rich, luxurious, self-indulgent.

Hillel remained to the day of his death as poor as in his youth (Geiger, *loc. cit.*). The teaching of Hillel showed some capacity for wider thoughts. His personal character was more lovable and attractive. While on the one side he taught from a mind well stored with the traditions of the elders, he was, on the other, anything but a slavish follower of those traditions. He was the first to lay down principles for an equitable construction of the law with a dialectic precision which seems almost to imply a Greek culture (Jost, i, 257). When the letter of a law, as e. g. that of the year of release, was no longer suited to the times, and was working, so far as it was kept at all, only for evil, he suggested an interpretation which met the difficulty or practically set it aside. His teaching as to divorce was in like manner an adaptation to the temper of the age. It was lawful for a man to put away his wife for any cause of disfavor, even for so slight an offence as that of spoiling his dinner by her bad cooking (Geiger, *loc. cit.*). The genial character of the man comes out in some of his sayings, which remind us of the tone of Jesus the son of Sirach, and present some faint approximations to a higher teaching: "Trust not thyself to the day of thy death." "Judge not thy neighbor till thou art in his place." "Leave nothing dark and obscure, saying to thyself, I will explain it when I have time; for how knowest thou whether the time will come?" (comp. James iv, 13-15). "He who gains a good name, gains it for himself; but he who gains a knowledge of the law, gains everlasting life" (comp. John v, 39; *Abot*, ii, 5-8). In one memorable rule we find the nearest approach that had as yet been made to the great commandment of the Gospel: "Do nothing to thy neighbor that thou wouldest not that he should do to thee." The contrast showed itself in the conduct of the followers not less than in the teachers. The disciples of Shammai were conspicuous for their fierceness, appealed to popular passions, used the sword to decide their controversies. Out of that school grew the party of the Zealots, fierce, fanatical, vindictive, the political bigots of Pharisaism (Jost, i, 267-269). Those of Hillel were, like their master (comp. e. g. the advice of Gamaliel, Acts v, 34-42), cautious, gentle, tolerant, unwilling to make enemies, content to let things take their course. One school resisted, the other was disposed to foster, the study of Greek literature. One sought to impose upon the proselyte from heathenism the full burden of the law, the other that he should be treated with some sympathy and indulgence. See PROSELYTE. One subject of debate between the schools exhibits the contrast as going deeper than these questions, touching upon the great problems of the universe. "Was the state of man so full of misery that it would have been better for him never to have been? Or was this life, with all its suffering, still the gift of God, to be valued and used as a training for something higher than itself?" The school of Shammai took, as might be expected, the darker, that of Hillel the brighter and the wiser, view (Jost, i, 264).

Outwardly the teaching of our Lord must have appeared to men different in many ways from both. While they repeated the traditions of the elders, he "spoke as one having authority," "not as the scribes" (Matt. vii, 29; comp. the constantly recurring "I say unto you"). While they confined their teaching to the class of scholars, he "had compassion on the multitudes" (ix, 36). While they were to be found only in the council or in their schools, he journeyed through the cities and villages (iv, 23; ix, 35; etc.). While they spoke of the kingdom of God vaguely, as a thing far off, he proclaimed that it had already come nigh to men (iv, 17). But, in most of the points at issue between the two parties, he must have appeared in direct antagonism to the school of Shammai, in sympathy with that of Hillel. In the questions that gathered round the law of the Sabbath (xii, 1-14; 2 John v, 1-16; etc.) and the idea of purity (Matt. xv, 1-11, and its parallels), this was obviously the case. Even in the controversy about divorce, while

his chief work was to assert the truth, which the disputants on both sides were losing sight of, he recognised, it must be remembered, the rule of Hillel as being a true interpretation of the law (xix, 8). When he summed up the great commandment in which the law and the prophets were fulfilled, he reproduced and ennobled the precept which had been given by that teacher to his disciples (vii, 12; xxii, 34-40). So far, on the other hand, as the temper of the Hillel school was one of mere adaptation to the feeling of the people, cleaving to tradition, wanting in the intuition of a higher life, the teaching of Christ must have been felt as unsparingly condemning it.

h. It adds to the interest of this inquiry to remember that Hillel himself lived, according to the tradition of the rabbins, to the great age of 120, and may therefore have been present among the doctors of Luke ii, 46, and that Gamaliel, his grandson and substantially his successor, was at the head of this school during the whole of the ministry of Christ, as well as in the early portion of the history of the Acts. We are thus able to explain the fact which so many passages in the gospels lead us to infer—the existence all along of a party among the scribes themselves more or less disposed to recognise Jesus of Nazareth as a teacher (John iii, 1; Mark x, 17), not far from the kingdom of God (xii, 34), advocates of a policy of toleration (John vii, 51), but, on the other hand, timid and time-serving, unable to confess even their half-belief (xii, 42), afraid to take their stand against the strange alliance of extremes which brought together the Sadducean section of the priesthood and the ultra-Pharisaic followers of Shammai. When the last great crisis came, they apparently contented themselves with a policy of absence (Luke xxiii, 50, 51), possibly were not even summoned, and thus the council which condemned our Lord was a packed meeting of the confederate parties, not a formally constituted Sanhedrim. All its proceedings, the hasty investigation, the immediate sentence, were vitiated by irregularity (Jost, i, 407-409). Afterwards, when the fear of violence was once over, and popular feeling had turned, we find Gamaliel summoning courage to maintain openly the policy of a tolerant expectation (Acts v, 34).

5. *Education and Life.*—(1.) The special training for a scribe's office began, probably, about the age of thirteen. According to the *Pirke Aboth* (v, 24), the child began to read the Mikra at five and the Mishna at ten. Three years later every Israelite became a child of the law (*Bar-Mitsvah*), and was bound to study and obey it. The great mass of men rested in the scanty teaching of their synagogues, in knowing and repeating their Tephillim, the texts inscribed on their phylacteries. For the boy who was destined by his parents, or who devoted himself, to the calling of a scribe, something more was required. He made his way to Jerusalem, and applied for admission to the school of some famous rabbi. If he were poor, it was the duty of the synagogue of his town or village to provide for the payment of his fees, and in part also for his maintenance. His power to learn was tested by an examination on entrance. If he passed it, he became a "chosen one" (בְּחֹרֶת, comp. John xv, 16), and entered on his work as a disciple (Carpzov, *App. Crit.* i, 7). The master and his scholars met, the former sitting on a high chair, the elder pupils (הַלְמִירִים) on a lower bench, the younger (קְטָנִים) on the ground, both literally "at his feet." The class-room might be the chamber of the Temple set apart for this purpose, or the private school of the rabbi. In addition to the rabbi, or head master, there were assistant teachers, and one interpreter, or crier, whose function it was to proclaim aloud to the whole school what the rabbi had spoken in a whisper (comp. Matt. x, 27). The education was chiefly catechetical, the pupil submitting cases and asking questions, the teacher examining the pupil (Luke ii). The questions might be ethical, "What was the great commandment of all? What must a man do to

inherit eternal life?" or casuistic, "What might a man do or leave undone on the Sabbath?" or ceremonial, "What did or did not render him unclean?" We are left to wonder what were the questions and answers of the schoolroom of Luke ii, 46; but those proposed to our Lord by his own disciples, or by the scribes, as tests of his proficiency, may fairly be taken as types of what was commonly discussed. The Apocryphal gospels, as usual, mock our curiosity with the most irritating puerilities. (Comp. *Evangel. Infant.* c. 45, in Tischendorf, *Codex Apoc. N. T.*). In due time the pupil passed on to the laws of property, of contracts, and of evidence. So far he was within the circle of the Halachah, the simple exposition of the traditional "words of the scribes." He might remain content with this, or might pass on to the higher knowledge of the Beth-ham-Midrash, with its inexhaustible stores of mystical interpretation. In both cases, pre-eminently in the latter, parables entered largely into the method of instruction. The teacher uttered the similitude, and left it to his hearers to interpret for themselves. See PARABLE. That the relation between the two was often one of genial and kindly feeling we may infer from the saying of one famous scribe, "I have learned much from the rabbins my teachers, I have learned more from the rabbins my colleagues, I have learned most of all from my disciples" (Carpzov, *App. Crit.* i, 7).

(2.) After a sufficient period of training, probably at the age of thirty, the probationer was solemnly admitted to his office. The presiding rabbi pronounced the formula, "I admit thee, and thou art admitted to the chair of the scribe," solemnly ordained him by the imposition of hands (the כִּבְדָּה = χειροθεσία), and gave to him, as the symbol of his work, tablets on which he was to note down the sayings of the wise, and the "key of knowledge" (comp. Luke xi, 52), with which he was to open or to shut the treasures of divine wisdom. So admitted, he took his place as a *Chaber*, or member of the fraternity, was no longer ἀπάμματος και ιδιώτης (Acts iv, 13), was separated entirely from the multitude, the brute herd that knew not the law, the "cursed" "people of the earth" (John vii, 15, 49). (For all the details in the above section, and many others, comp. the elaborate treatises by Ursinus, *Antiqq. Heb.*, and Heubner, *De Academicis Ilebæorum*, in Ugolini *Thesaur.* ch. xxi.)

(3.) There still remained for the disciple after his admission the choice of a variety of functions, the chances of failure and success. He might give himself to any one of the branches of study, or combine two or more of them. He might rise to high places, become a doctor of the law, an arbitrator in family litigations (Luke xii, 14), the head of a school, a member of the Sanhedrim. He might have to content himself with the humbler work of a transcriber, copying the law and the prophets for the use of synagogues, or Tephillim for that of the devout (Otho, *Lex. Rabbin.* s. v. "Phylacteria"), or a notary writing out contracts of sale, covenants of espousals, bills of repudiation. The position of the more fortunate was, of course, attractive enough. Theoretically, indeed, the office of the scribe was not to be a source of wealth. It is doubtful how far the fees paid by the pupils were appropriated by the teacher (Buxtorf, *Synag. Judaic.* c. 46). The great Hillel worked as a day-laborer. Paul's work as a tentmaker, our Lord's work as a carpenter, were quite compatible with the popular conception of the most honored rabbi. The indirect payments were, however, considerable enough. Scholars brought gifts. Rich and devout widows maintained a rabbi as an act of piety, often to the injury of their own kindred (Matt. xxiii, 14). Each act of the notary's office, or the arbitration of the jurist, would be attended by an honorarium.

(4.) In regard to social position, there was a like contradiction between theory and practice. The older scribes had had no titles [see RABBI]; Shemaja, as we have seen, warned his disciples against them. In our

Lord's time the passion for distinction was insatiable. The ascending scale of Rab, Rabbi, Rabban (we are reminded of our own Reverend, Very Reverend, Right Reverend), presented so many steps on the ladder of ambition (Serupius, *De Tit. Rabbi*, in Ugolino, ch. xxii). Other forms of worldliness were not far off. The later Rabbinic saying that "the disciples of the wise have a right to a goodly house, a fair wife, and a soft couch" reflected probably the luxury of an earlier time (Ursini *Antiqq. Heb.* c. 5, *ut sup.*). The salutations in the market-place (Matt. xxiii, 7), the reverential kiss offered by the scholars to their master, or by rabbins to each other, the greeting of Abba, father (ver. 9, and Lightfoot, *Hor. Heb.* ad loc.), the long *σολαί*, as contrasted with the simple *χίτων* and *ὑμᾶτων* of our Lord and his disciples, with the broad blue zizith or fringe (the *κράσπεδον* of Matt. xxiii, 5), the Tephillim of ostentatious size—all these go to make up the picture of a scribe's life. Drawing to themselves, as they did, nearly all the energy and thought of Judaism, the close hereditary caste of the priesthood was powerless to compete with them. Unless the priest became a scribe also, he remained in obscurity. The order, as such, became contemptible and base. For the scribes there were the best places at feasts, the chief seats in synagogues (ver. 6; Luke xiv, 7).

(5.) The character of the order in this period was marked, under these influences, by a deep, incurable hypocrisy, all the more perilous because, in most cases, it was unconscious. We must not infer from this that all were alike tainted, or that the work which they had done, and the worth of their office, were not recognised by Him who rebuked them for their evil. Some there were not far from the kingdom of God, taking their place side by side with prophets and wise men among the instruments by which the wisdom of God was teaching men (Matt. xxiii, 34). The name was still honorable. The apostles themselves were to be scribes in the kingdom of God (xiii, 52). The Lord himself did not refuse the salutations which hailed him as a rabbi. In "Zenas the lawyer" (*νομικός*, Tit. iii, 13) and Apollos "mighty in the Scriptures," sent apparently for the special purpose of dealing with the *μῆτραι νομικαί* which prevailed at Crete (Tit. iii, 9), we may recognise the work which members of the order were capable of doing for the edifying of the Church of Christ.

III. *The AMORAIM, or Later Doctors of the Law.*—1. *Name and Date.*—The name *Amoraim* (אַמוראים, sing. אַמוראי, from אָמר, to say, to hold forth, to expound), like the appellation *Tanaim*, is Aramaic; it literally denotes *recorders, expositors*, and was given, after the redaction of the Mishna, to those "wise men" and "doctors of the law" who alone constituted the authorized recorders and expositors of the received Halachah. The period of the Amoraim begins with the immediate disciples of R. Jehudah the Holy (A.D. 220), and terminates with the completion of the Babylonian Talmud (cir. A.D. 500), embracing nearly 270 years.

2. *The Work of the Amoraim.*—As the title implies, these Amoraim had to examine, decide, and expound the import of the Mishna for general practice. After the redaction of the Mishna by Jehudah the Holy (A.D. 163-193), this *corpus juris* became the canonical code, and constituted the source of study and the rule of practice, both in Babylon, whither it was imported immediately after its appearance by the celebrated Rab (q. v.), and in Palestine. These commentaries and discussions on the Mishna in the two countries are embodied in the two Talmuds, or more properly Gemaras, which are named after them—viz. Jerusalem and Babylon. The Jerusalem Talmud was made up in Tiberias about A.D. 400, because the Christian government took away from the doctors of the law the right of ordination, thus causing the extinction of the patriarchate and the declension of the Palestinian school; while the Babylonian Talmud was not closed finally till the period

of the Saboraim, as the schools were still greatly flourishing in Babylon under the presidency of *Resh Methib-ta* (רִישׁ מֵתִיבְתָּא), or *heads of schools*, and the *Resh Galutha* (רִישׁ גָּלוּתָא), or the *princes of the exiles*, as they were called. See MIDRASH; TALMUD. For the distinguished doctors of the law who occupied the patriarchate, and were the presidents and vice-presidents of colleges during this period, we must refer to the article SCHOOLS, JEWISH, where they are enumerated in chronological order.

IV. *The SABORAIM, or the Teachers of the Law after the Conclusion of the Talmud.*—1. *Name and Date.*—The appellation *Saboraim* (סבוראים, from the Aramaic סָבַר, to think, to discern, to judge) properly signifies *decisiones*, and was given to those doctors of the law who determined the law (הִלְכָה) from a careful examination of all the pros and cons (סברא) urged by the Amoraim in their controversies on divine, legal, and ritual questions contained in the Talmud. Hence the remark of Sherira Gaon (A.D. 968-998), "Though no independent legislation existed after the cessation of the Amoraim, yet there continued exposition and weighing of the transmitted and prevalent opinions; and it is from this weighing of opinions that the doctors derive their name, Saboraim" (Grätz, v, 426). The period of the Saboraim extends from about A.D. 500 to A.D. 657. This period, however, is divisible into two parts, and it is only the first part—i. e. from the death of Rabina, A.D. 500, to the death of R. Giza and R. Simuna, A.D. 550—which can properly be denominated the real *Saboraim epoch*; while the second part, which consists of the interval between the real Saboraim and the rise of the Gaonim, from A.D. 550 to 657, has no proper designation, because the doctors who lived at this time and the work which they did are alike unimportant and desultory.

2. *The Work of the Saboraim.*—Unlike their predecessors the Tanaim and Amoraim, and their successors the Gaonim, these doctors of the law neither formed a succession of teachers nor were they engaged in any new work. They were a circle of literati and teachers, who supplemented and completed the work of the Amoraim. They explained all doubtful questions in the Talmud, made new additions to it both from oral traditions and MS. notes, inserted into it all the anecdotes which were current in the different schools, closed it, and wrote it down in the form in which we now have it. Hence their work had nothing to do with theories, but was pre-eminently practical. The chief men among these Saboraim which have come down to us by name are R. Giza, the president of the college at Sora, and R. Simuna, the president of the college at Pumbeditha and Rabai of Rob. Their disciples and successors who belong to this period are unknown (Grätz, v, 15 sq.; 422 sq.).

V. *The GAONIM, or the Last Doctors of the Law in the Chain of Rabbinic Succession.*—1. *Name and Date.*—It is now difficult to ascertain the etymology of *Gaon* (גָּאוֹן), the title of the chief doctors of the law who succeeded the Saboraim. One thing, however, is certain—namely, that it is not Hebrew, since both in the Bible and in the Talmud this word signifies *pride, haughtiness*, while here it is an honorable appellation given exclusively to the presidents of the two distinguished colleges at Sora and Pumbeditha. Now, the period in which it originated may throw some light on the etymology of this title. Grätz (v, 139, 477) has shown that this title obtained A.D. cir. 658. When Ali, the son-in-law and vizier of Mohammed, was elected caliph (655), and the Islamites were divided into two parties, one for and the other against him, both the Babylonian Jews and the Nestorian Christians decided in his favor and rendered him great assistance. Maremes, who supported Ali's commander-in-chief in the siege of Mosul, was nominated *Catholicos*, while R. Isaac, the president of

the college at Sora, who at the head of several thousand Jews aided Ali in the capture of Firuz-Shabur (May, 657), was rewarded with the title Gaon (*excellence*). Accordingly the title גאון is either of Arabic or Persian origin, and properly belonged to the presidents of the Sora college, who alone bore the appellation at the beginning. The president of the subordinate sister college at Pumbaditha was called the *head of the college* (Heb. ראש ישיבה, Aramaic ריש מתיבה) by the Babylonians; and the appellation Gaon, whereby they were sometimes styled, obtained at first among the non-Babylonian Jews, who were not thoroughly acquainted with the dignities of the respective colleges in Babylon. It was only after 917, when Pumbaditha became of equal importance with Sora, and especially after 942-1038, when Sora, after the death of Saadia, began to decay altogether, and Pumbaditha continued alone to be the college of the doctors of the law, that the presidents of its college, like those of Sora, were described by the title Gaon. The period of the Gaonim extends from A.D. 657 to 1034 in Sora, and from 657 to 1038 in Pumbaditha, during which time the former college had no less than thirty-five presidents and the latter forty-three. See PUMBADITHA; SORA.

2. As to the *organization* of these colleges, the president of each school sat in front; next to him in rank was the *superior judge* (Heb. אב בית דין; Aramaic דיינא רבנא), who discharged the judicial functions, and was presumptive successor to the Gaonate. Then came the ten who constituted the more limited synod, seven of whom were at the head of the assembled students (ראשי כלור), and three associates (חברים); these sat with their faces towards the president. Then came the college of one hundred members, subdivided into two uneven bodies—the one consisting of seventy members and representing the Great Sanhedrim (q. v.), the other consisting of thirty members and representing the Smaller Sanhedrim. Of these hundred, the seventy only were ordained; they bore the title of *teachers* (אלופים, *magistri*), or the *ordained sages* (הכמני הסמוכים), and were capable of advancing to the highest office, while the other thirty were simply candidates (בני קיימי), and do not seem to have been legally entitled to a seat or voice. The seventy sat in seven rows, each consisting of ten, and being under one of the seven heads of the college. They transmitted their membership to their sons.

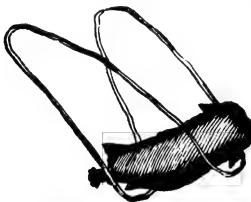

3. *The Work and Authority of these Colleges.*—In later times these colleges assembled together for two months in the year—viz. in Adar (=March) and Elul (=September). In these sittings the members explained difficult points in the Talmud, discussed and answered all the legal and ritual questions which were sent in during the vacation from the different Jewish communities abroad, and enacted new laws for the guidance and regulation of the dispersed congregations, in accordance with the requirements of the ever-shifting circumstances of the nation and the sundry localities. Each member of the college took part in the discussions; the president summed up the various opinions, decided the question, and ordered the secretary to write down the decision. All the decisions which were passed through the session were read over again by the president before the assembly was dissolved, were signed in the name of the college, sealed with the college seal, and forwarded by special messengers to the respective communities, who, in return, sent gifts to the college, which constituted the extraordinary revenue of these schools for training the doctors of the law. Their ordinary income was derived from regular taxes which the college fixed for those communities which were under their jurisdiction. Thus the jurisdiction of Sora extended over the south of Irak, with the two important cities Wasit and Bassra, to Ophir (=India), and its annual income, even

when it began to decline, amounted to 1500 ducats; while that of Pumbaditha extended over the north of Irak up to Khorassan. The president, with the superior judge and the seven heads of the college, appointed judges for each district, and gave them regular *diplomas*. As these judges, or *dayanim* (דיינים), had not only to decide civil questions, but also to settle religious matters; they were also the *rabbins* of the respective communities, and selected for themselves, in each place, two learned members of the congregation, who were styled *elders* (זקנים), and with them constituted the judicial and rabbinic college. This local college had to issue all the legal instruments—such as marriage contracts, letters of divorce, bills of exchange, business contracts, receipts, etc. Though each of the two imperial colleges had the power of governing itself and of managing its own affairs and dependencies, yet the College of Sora was, at first, over that of Pumbaditha, as may be seen from the following facts: (1.) In the absence of the prince of the exiles, the gaon of Sora was regent, and called in the taxes from all the Jewish communities. (2.) The College of Sora got two shares of the taxes, while Pumbaditha only got one share. (3.) The president of Sora took precedence of the president of Pumbaditha, even though the former happened to be a young man and the latter an old man. In later times, however, the College of Pumbaditha rose to the dignity of Sora, and eventually eclipsed it. These seats of learning, in which were trained the doctors of the law—the successors of the ancient scribes—and which represented the unbroken chain of tradition and ordination, were extinguished in the middle of the 11th century.

VI. *Literature.*—Krochmal, *More Neboche Ha-Seman* (Lemberg, 1851), p. 161, etc.; Frankel, *Monatsschrift für Geschichte und Wissenschaft des Judenthums* (Dessau, 1852), i, 203 sq., 403 sq.; Steinschneider, *Jewish Literature* (Lond. 1857), p. 3, etc.; *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, p. 2615, etc.; Grätz, in Frankel's *Monatsschrift* (Leips. 1857), vii, 336 sq., 381 sq.; *Geschichte der Juden*, vols. iv and v; Frankel, *Hodegetica in Mischnam* (Lips. 1859); and the Latin monographs of Syrbius (Vitemb. 1670), Georgius (ibid. 1734), and Hect (Francof. 1737); also Pick, *The Scribes in the Time of Christ* (in the *Lutheran Quarterly*, 1878, p. 249 sq.).

Scrip, an old Saxon name for *satchel* (*Bible Educator*, iv, 209), is used in the A. V. as a rendering of the Heb. גַּלְקוּט, *galkût* (from גָּלַץ, *to collect*; Sept. συλλογή), in 1 Sam. xvii, 40, where it appears as a synonym for קַבֵּי חֲרָעִים (*τὰ κάδιον τὸ ποιμεικόν*), the bag in which the shepherds of Palestine carried their food or other necessities. In Symmachus and the Vulg. *pera*, and in the marginal reading of A. V. "scrip," appear in 2 Kings iv, 42 for the צִקְלֹן, *tsiklôn*, which in the text of the A. V. is translated *husk* (comp. Gesen. s. v.). The *πίρα* of the New Test. appears in our Lord's command to his disciples as distinguished from the ζώνη (Matt. x, 10; Mark vi, 8) and the βαλλάντιον (Luke x, 4; xxii, 35, 36), and its nature and use are sufficiently defined by the lexicographers. The English word has a meaning precisely equivalent to that of the Greek. Connected, as it probably is, with *scraper*, *scrip*, the scrip was used for articles of food. It belonged especially to shepherds (*As You Like It*, act iii, sc. 2). It was made of leather (Milton, *Comus*, 626). The later sense of *scrip* as a written certificate is, it need hardly be said, of different origin or meaning; the word, on its first use in English, was written *script* (Chaucer). The scrip of the ancient peasants was of leather, used especially to carry their food on a journey (ἡ ἡρα τῶν ἀγρωῶν, Suid.; ἄρμα τι ἀγρόφορον, Ammon.), and slung over their shoulders. In the Talmudic writers the word תְּרִמִּי is used as denoting the same thing, and is named as part of the equipment both of shepherds in their com-

mon life and of proselytes coming on a pilgrimage to Jerusalem (Lightfoot, *Hor. Heb.* on Matt. x, 10). The ζώνη, on the other hand, was the loose girdle, in the folds of which money was often kept for the sake of safety [see GIRDLE]; the βαλλάντιον (*sacculus*, Vulg.), was the smaller bag used exclusively for money (Luke xii, 33). See BAG. Lightfoot, on the authority of rabbi Nathan, describes the scrip as "a kind of vesture, which was a little upper garment in which were many places sewed, where they put anything they met with that they had occasion to use; so that this was a kind of apron with divers purses or pockets made in it, in which the Jews put their necessities as we do in our pockets, which apron they could readily put off or on, wear or lay aside, as they saw occasion. As in such an apron they had their pockets, so in the scarf or girdle wherewithal they girded their undercoats they had their purses. Their girdles were ordinarily of linen, and in them they kept their money when they travelled or went from home on their business" (*Temple Service*, ix, 121). See PURSE. Notwithstanding the great hospitality of the Orientals, travellers cannot always calculate upon obtaining a supply of food in their cottages, for most of the peasants are so poor that they can rarely afford to keep more provisions than will meet the immediate wants of their families. Pedestrian travellers and shepherds are therefore accustomed to take with them a satchel, or wallet, in which they carry some dry food and other little articles likely to be useful on a journey. It was in such a bag that David carried the pebble with which he smote the boasting champion of the Philistines (1 Sam. xvii, 40). When Christ sent forth his apostles, he forbade them to provide themselves with these satchels; and nothing can more forcibly show the completeness of their dependence on Divine Providence, while executing their mission, than their neglecting to supply themselves with what all other travellers would have regarded as an indispensable requisite (Matt. x, 10; Mark vi, 8; Luke ix, 3; comp. Luke xxii, 35, 36). They were to appear in every town or village as men unlike all other travellers, freely doing without that which others looked on as essential. The fresh rule given in Luke xxii, 35, 36, perhaps, also, the facts that Judas was the bearer of the bag (γλωσσόκομον, John xii, 6), and that when the disciples were without bread they were ashamed of their forgetfulness (Mark viii, 14-16), show that the command was not intended to be permanent. The scrip is often made of haircloth, and is of various forms. In Palestine, however, it is usually made of leather (Porter, *Damascus*, ii, 109). In the south of Spain, where many of the usages introduced by the Mohammedan conquerors are still retained, the scrip is usually of goat-skin, and is generally carried over the shoulder. The purse, which some inaccurate commentators have confounded with the scrip, was always suspended from the girdle. A kind of sanctity is attributed to the scrip by some of the Eastern Jews, as it preserves their food from being polluted by being brought into contact with those whom they are taught to regard as unclean or profane (see Hackett, *Illustrations of Scripture*, p. 97). Thomson found the farmers, in the vicinity of the Lake of Gennesaret, carrying wallets made of the skins of kids stripped off whole and roughly tanned; and he supposes these to be the scrip of the Bible (*Land and Book*, i, 532 sq.).

Modern Oriental Wallet.

clean or profane (see Hackett, *Illustrations of Scripture*, p. 97). Thomson found the farmers, in the vicinity of the Lake of Gennesaret, carrying wallets made of the skins of kids stripped off whole and roughly tanned; and he supposes these to be the scrip of the Bible (*Land and Book*, i, 532 sq.).

Scriptoria, the desks of religious houses at which the monks wrote in the scriptorium.

Scriptorium. In the Middle Ages, when learning was neglected elsewhere, such literature as there was

found a refuge in monasteries. In every great there was an apartment called *scriptorium*, or *antiquarii*, where writers were constantly employed copying psalters, missals, Church music, and such works as they could obtain. The monks in these writing-rooms were enjoined to pursue their occupation in silence, and cautiously to avoid mistakes in grammar, spelling, or pointing. In some cases authors prefixed their works a solemn adjuration to the transcriber to copy them correctly. When a number of copies of the same work was to be made, it was usual to employ several persons at the same time in writing; each, except the writer of the first skin, began where the other was to leave off. Sometimes they wrote at one other person, called the *dictator*, who held the book and dictated; hence the errors in orthography in the ancient MSS. These *scriptoria* were ordinarily arranged that benches were placed one behind another for the copyists, so that a master or person standing at one end and naming a word or musical note, it could be quickly copied by all, each naming it in succession. These writing monks were sometimes distinguished by the name of *librarii*, a term applied to the copyists or *scriptores* who gained a living by writing, but the more usual designation was *antiquarii*. Isidore of Seville says, "The *librarii* transcribed both old and new works, the *antiquarii* only those that were ancient, hence they derived their name." It was the duty of the librarian, or precursor of the monastery, to provide writing-monks with the books they were to copy, and with the materials necessary for their occupation. They were also forbidden to write anything without the permission. The junior monks were usually employed in the transcription of ordinary books, and were ordained that "the gospels, psalters, and such other books should be carefully written by monks of age." Nuns were occasionally employed in a way.

Scripturalists, a term sometimes applied to those who insist on account of their fundamental doctrine that the Scriptures are the only sufficient rule of faith and obedience. The Jews also occasionally use the word to denote those who reject the Mishna and rely solely to the Old-Test. Scriptures.

Scripture (כְּתוּבִים, *kethâb*, Dan. x, 21, *writing*, where rendered; in the New Test. γραφή, of the same signification, but always rendered "Scripture") is a term which signifies the books to which, individually and collectively, this title has been applied, will be found under BIBLE; CANON; and SCRIPTURES, HOLY. It falls within the scope of this article to trace the history of the word, and to determine its exact meaning in the language of the Old and New Testaments, with which modern researches and speculation have been thrown upon the subject.

1. It is not till the return from the Captivity that the word meets us with any distinctive force. In the earlier books we read of the law, the book of the law (Exod. xxxii, 16), the commandments written in tables of testimony are said to be "the writing" (γραφὴ Θεοῦ), but there is no special sense attached to the word taken by itself. In the passage from Daniel (אֲרָמִי בְּכַתְּבֵי, Sept. ἐν γραφαῖ ἀληθείας), where A. V. has "the Scripture of truth," the words probably mean more than "a true writing." The thought of the Scripture as a whole is hardly found there: the statement there given was certainly not a quotation from any Biblical book. The doubtless is to the divine purposes, which are figured by the word represented as a book of destiny (comp. Ps. cxxxv, 5, 18 (בְּכַתְּבֵי, Sept. κατὰ τὴν γραφήν—A. V. "it was written"), and is probably connected with the profound reverence for the sacred books which the earlier scribes to confine their own teaching to o-

dition, and gave therefore to "the writing" a distinctive pre-eminence. See SCRIBES. The same feeling showed itself in the constant formula of quotation, "It is written," often without the addition of any words defining the passage quoted (Matt. iv, 4, 6; xxi, 13; xxvi, 24). The Greek word, as will be seen, kept its ground in this sense. A slight change passed over that of the Hebrew, and led to the substitution of another. The כְּתוּבִים (*kethubim* = writings), in the Jewish arrangement of the Old Test., was used for a part, and not the whole, of the Old Test. (the Hagiographa [q. v.]), while another form of the same root (*kethib*) came to have a technical significance as applied to the text, which, though written in the MSS. of the Hebrew Scriptures, might or might not be recognised as *keri*, the right intelligible reading to be read in the congregation. Another word was therefore wanted, and it was found in the Mikra (מִקְרָא, Neh. viii, 8), or "reading," the thing read or recited, recitation. (The same root, it may be noticed, is found in the title of the sacred book of Islam [*Koran* = recitation].) This, accordingly, we find as the equivalent for the collective γραφαί. The boy at the age of five begins the study of the Mikra, at ten passes on to the Mishna (*Pirke Aboth*, v, 24). The old word has not, however, disappeared, and כְּתוּבִים, "the writing," is used with the same connotation (*ibid.* iii, 10).

2. With this meaning the word γραφή passed into the language of the New Test. Used in the singular, it is applied chiefly to this or that passage quoted from the Old Test. (Mark xii, 10; John vii, 38; xiii, 18; xix, 37; Luke iv, 21; Rom. ix, 17; Gal. iii, 8, et al.). In Acts viii, 32 (ἡ περιοχὴ τῆς γραφῆς) it takes a somewhat larger extension, as denoting the *writing* of Isaiah; but in ver. 35 the more limited meaning reappears. In two passages of some difficulty, some have seen the wider, some the narrower, sense.

(1.) Πᾶσα γραφή θεόπνευστος (2 Tim. iii, 16) has been translated in the A. V. "All Scripture is given by inspiration of God," as if γραφή, though without the article, were taken as equivalent to the Old Test. as a whole (comp. πᾶσα οἰκοδομή, Eph. ii, 21; πᾶσα ἱεροσούλμα, Matt. ii, 3), and θεόπνευστος, the predicate asserted of it. This is doubtless the correct construction. Even if we should retain the narrower meaning, however, we might still take θεόπνευστος as the predicate. "Every Scripture—sc. every separate portion—is divinely inspired." It has been urged, however, that this assertion of a truth, which both Paul and Timothy held in common, would be less suitable to the context than the assigning of that truth as a ground for the further inference drawn from it; and so there is a large amount of authority in favor of the rendering, "Every γραφή, being inspired, is also profitable . . ." (comp. Meyer, Alford, Wordsworth, Ellicott, Wiesinger, ad loc.). But this renders the latter clause unbalanced, and the καὶ is evidently intended as a copulative, and not as a mere expletive adverb. There does not seem any ground for making the meaning of γραφή dependent on the adjective θεόπνευστος ("every inspired writing"), as if we recognised a γραφή not inspired. The *usus loquendi* of the New Test. is uniform in this respect, and the word γραφή is never used of any common or secular writing.

(2.) The meaning of the genitive in πᾶσα προφητεία γραφῆς (2 Pet. i, 20) seems at first sight, anarthrous though it be, distinctly collective. "Every prophecy of (i. e. contained in) the Old-Test. Scripture." A closer examination of the passage will perhaps lead to a different conclusion. The apostle, after speaking of the vision on the holy mount, goes on, "We have as something yet firmer, the prophetic word" (here, probably, including the utterances of New-Test. προφηταί, as well as the writings of the Old Test.). So ὁ προφητικός λόγος is used by Philo of the words of Moses (*Leg. Al.* iii, 14; i, 95, ed. Mang.). He, of course, could recognise no prophets but those of the Old Test. Clement

of Rome (ii, 11) uses it of a prophecy not included in the canons. Men did well to give heed to that word. They needed one caution in dealing with it. They were to remember that no προφητεία γραφῆς, no such prophetic utterance starting from, resting on, a γραφή, came from the ἰδία ἐπιλυσίς, the individual power of interpretation of the speaker, but was, like the γραφή itself, inspired. It was the law of προφητεία, of the later as well as the earlier, that men of God spake "borne along by the Holy Spirit." So in the only other instance in which the genitive is found (Rom. xv, 4), ἡ παράκλησις τῶν γραφῶν is the counsel, admonition, drawn from the Scriptures. Λόγος παρακλήσεως appears in Acts xiii, 15 as the received term for such an address, the sermon of the Synagogue. Παράκλησις itself was so closely allied with προφητεία (comp. Barnabas = υἱὸς προφητείας = υἱὸς παρακλήσεως) that the expressions of the two apostles may be regarded as substantially identical.

3. In the plural, as might be expected, the collective meaning is prominent. Sometimes we have simply αἱ γραφαί (Matt. xxi, 42; xxii, 29; John v, 39; Acts xvii, 11; 1 Cor. xv, 3). Sometimes πᾶσαι αἱ γραφαί (Luke xxiv, 27). The epithets ἄγιοι (Rom. i, 2), προφητικαί (xvi, 26), are sometimes joined with it. In 2 Pet. iii, 16 we find an extension of the term to the epistles of Paul; but it remains uncertain whether αἱ λοιπαὶ γραφαί are the Scriptures of the Old Test. exclusively, or include other writings then extant dealing with the same topics. There seems little doubt that such writings did exist. A comparison of Rom. xvi, 26 with Ephes. iii, 5 might even suggest the conclusion that in both there is the same assertion that what had not been revealed before was now manifested by the Spirit to the apostles and prophets of the Church, and so that the "prophetic writings" to which Paul refers are, like the spoken words of New-Test. prophets, those that reveal things not made known before, the knowledge of the mystery of Christ.

It is noticeable that in the 2d Epistle of Clement of Rome (ch. xi) we have a long citation of this nature, not from the Old Test., quoted as ὁ προφητικός λόγος (comp. 2 Pet. i, 19), and that in the 1st Epistle (ch. cxiii) the same is quoted as ἡ γραφή. Looking to the special fulness of the prophetic gifts in the Church of Corinth (1 Cor. i, 5; xiv, 1), it is obviously probable that some of the spoken prophecies would be committed to writing; and it is a striking coincidence that both the apostolic and the post-apostolic references are connected, first with that Church, and next with that of Rome, which was so largely influenced by it.

4. In one passage, τὰ ἐκ γράμματος (2 Tim. iii, 15) answers to "The Holy Scriptures" of the A. V. Taken by itself, the word might, as in John vii, 15; Acts xxvi, 24, have a wider range, including the whole circle of Rabbinic education. As determined, however, by the use of other Hellenistic writers, Philo (*Leg. ad Caium*, ii, 574, ed. Mang.), Josephus (*Ant. Proem.* 3, x, 10, § 4; *Cont. Apion.* i, 26), there can be no doubt that it is accurately translated with this special meaning.

SCRIPTURE, APOCRYPHAL. The books which we now call Apocryphal were read in some of the early churches, but not in all. They were utterly forbidden in the Church of Jerusalem, as appears from Cyril (*Catech.* 4, n. 22, p. 66, 67), where he directs the catechumens to read no Apocryphal books, but only the canonical, which he names as they are now found in the Bible, with the exception of Revelation. The like determination was made for some other churches by the Council of Laodicea (*Conc. Laodic.* can. 59). In some churches they were allowed to be read with a mark of distinction, as books of piety and moral instruction, to edify the people; but they were never named as inspired books, nor made use of to confirm articles of faith. They were sometimes spoken of as canonical, taking that word in a large sense for such books as were in the rule, or canon, or catalogue of books authorized to be read in the

Church. See Bingham, *Christian Antiq.* bk. xiv, ch. iii, § 15. See APOCRYPHA.

SCRIPTURE, INTERPRETATION OF, JEWISH. We here present some details supplementary to the art. INTERPRETATION (q. v.).

1. *Among the Rabbinic Jews.*—Immediately after the close of the canon, the study of the Old Test. became an object of scientific treatment. A number of God-fearing men arose, who, by their instruction, encouragement, and solemn admonitions, rooted and builded up the people in their most holy faith. The first among these was Ezra, who read and explained the law to the people (Neh. viii, 8). As the Bible formed the central point around which their legends, sermons, lectures, discussions, investigations, etc., clustered, a homiletico-exegetical literature was, in the course of time, developed, which was called *Midrash* (מדרש). This Midrash again developed itself in the *Halachah* (הלכה), i. e. *current law, fixed rule of life*; also called *שמעיהא*, *what was heard or accepted*, and *Hagadah* (הגדה), i. e. *what was said*, without having the authority of a law, i. e. *free exposition, homilies, moral sayings, and legends*. Starting from the principle that Scripture, especially the Pentateuch, contained an answer to every question, the text was explained in a fourfold manner, viz.: 1, פשוט, in a *simple, primary, or literal*; 2, דרש, *secondary, homiletic, or spiritual*; 3, רמז, *allegorical*; 4, סוד, *recondite or mysterious sense*, which was afterwards designated by the acrostic *Pardes* (q. v.). These four modes of interpretation were also espoused by the celebrated Nicholas de Lyra (q. v.), which he describes in the well-known couplet—

“Littera gesta docet, quid credas Allegoria,
Moralis quid agas, quo tendas anagogia.”

Long before De Lyra, we also find a threefold mode of interpretation by Origen, viz.: *παραφρασις*, *ψυχικός*, and *πνευματικός* (comp. *περί ἀρχαῶν*, lib. iv, c. 2). As the Midrashic literature has already been treated in the art. MIDRASH (q. v.), we can only refer to it. The fourfold mode of interpretation, however, was not sufficient for the explanation, and, according to the old saying that “the law can be interpreted in forty-nine different modes” (התורה נדרשת בִּמְנֵי פְנִימִי, *Midrash Rabb. Lev.* § xxvi, p. 149 b), all impossibilities could be made possible. Hence the necessity arose for laying down and fixing certain laws for the interpretation of the Scripture. This was done by Hillel the Great (q. v.) by his *מדרה*, *7, or seven rules*, according to which the law was to be explained, viz.:

1. *Inference from minor to major* (קל יהומר). Thus, e. g., in Exod. xxii, 13 it is not said whether the borrower of a thing is responsible for theft. In ver. 9–11, however, it is declared that the depositary who can free himself from making restitution in cases of death or accident must make restitution when the animal is stolen; while in ver. 13 the borrower is even obliged to make restitution in cases of death or accident. Hence the inference made from the minor (i. e. the depositary) to the major (i. e. the borrower) that he (in xxii, 13) is all the more responsible for theft (*Baba Metsia*, 95 a; comp. also for other examples, *Berakoth*, ix, 5 med.; *Beza*, v, 2; *Sanhedrin*, vi, 5; *Eduyoth*, vi, 2).

2. *The analogy of ideas or analogous inferences* (גזירה שוה). This rule was employed by Hillel himself against the sons of Bathaira, who pretended not to know whether or not the Paschal lamb might be slain on the Sabbath, when the evening of the Passover happened to fall on that day. Hillel affirmed this question on the ground of the analogous inference. In Numb. xxviii, 2 it is said concerning the daily sacrifice, “to offer it in its time” (בְּמוֹעֲדוֹ); and it is also said respecting the Paschal lamb, “let the children of Israel keep it in its time” (בְּמוֹעֲדוֹ, Numb. ix, 2). He thus

concluded, since the daily sacrifice can be offered on the Sabbath, so likewise can the Paschal lamb (*Pesachim*, vi, 2; Jerus. *Pesachim*, 66 a; Tosephta *Pesachim*, c. 4).

3. *Analogy of two objects in one verse* (בנין אב, מכחיב אחד). Thus in Lev. xv, 4 two objects are mentioned, the bed and the chair (מִשְׁכַּב וּמִיטָה), which, though belonging to two different classes, have the common quality of serving for repose. And as these are declared to be unclean when touched by him who has an issue, and to have the power of defiling both men and garments through contact, it is inferred that all things which serve for resting may be rendered unclean by him who has an issue, and then defile both men and garments.

4. *Analogy of two objects in two verses* (בנין אב, משני כתיבין), e. g., though the command to light the lamps in the sanctuary (נרות, Lev. xxiv, 4) is different from the command “to put out of the camp every leper” (Numb. v, 2), inasmuch as the former is enjoined for all times (ver. 3), while the latter enjoins only the speedy carrying-out of the injunction (ver. 4); yet, because they both have in common the word צו, *command*, the conclusion is that every law with regard to which the expression צו is used must at once and forever be carried out.

5. *General and special* (כלל ופרט). Hereby is meant that wherever a special statement follows a general one, the definition of the special is to be applied to the general use. Thus in Lev. i, 2 we read, “If any man of you bring an offering to the Lord, from cattle, from oxen, and from sheep.” Here cattle is a general expression, and may denote different kinds of animals. Oxen and sheep is the special whereby the general is defined, and therewith it is rendered coextensive. Hence it is inferred that only oxen and small cattle may be brought as sacrifices, but not beasts.

6. *Analogy of another passage* (קריצא בן ממקום אחר), being an extension of 3 and 4.

7. *The connection* (דבר הלמד מענינו). Thus the prohibition in Lev. xx, 11, “Ye shall not steal,” only refers to stealing money, because the whole connection treats upon money matters.

To these exegetical principles Nahum of Gimso (q. v.) not only added another canon, but he also maintained that certain defined particles employed in the text were to be looked upon as so many indications of a hidden meaning in the words. In this he was opposed by Nechunjah ben-Ha-Kanah (q. v.), on the one hand, and seconded by Akiba (q. v.), on the other, who not only adopted this principle, but went much beyond it. Starting with an erroneous notion of the character of inspiration, he refused to submit the sacred text to the same critical rules as other writings. He maintained that *every sentence, word, and particle* in the Bible must have its use and meaning. He denied that mere rhetorical figures, repetitions, or accumulations occurred in the Bible. *Every word, syllable, and letter* which was not absolutely requisite to express the meaning which it was desired to convey, must, he maintained, serve some ulterior purpose, and be intended to indicate a special meaning. Akiba reduced his views to a system. The seven exegetical principles of Hillel were enlarged into forty-nine, and were strictly applied to every possible case, irrespective of the consequences of such conclusions. Great as the authority of Akiba was, yet as formerly Nechunjah ben-Ha-Kanah had opposed the exegetical principles of Nahum of Gimso, so now rabbi Ismael ben-Elisa (q. v.) rejected those of rabbi Akiba, and kept by the rules of Hillel, which he somewhat altered by rejecting one, adding another, and subdividing a third into five parts. These principles of rabbi Ismael are known as his thirteen exegetical canons, the *תלשע עשרה*.

מדות, by which alone the Scriptures are to be interpreted (שחוררה נדרשה בהם), and which are:

1. *Inference from minor to major* (קל וחמר). 2. *The comparison of words or ideas* (גזירה שוה). 3. *Building of the father, or the chief, law from one verse, and the chief law from two verses* (בנין אב מכתוב אחד ובנין אב משני). (כתובים).
 4. *General and special* (פרט וכלל). 5. *Special and general* (כלל ופרט). 6. *General, special, and general* (כלל ופרט וכלל). 7. *A general subject which requires a special one, and a special which requires a general subject* (כלל הצריך לפרט ופרט הצריך לכלל).
 8. *When a special law is enacted for something which has already been comprised in a general law, it shows that it is also to be applied to the whole class* (כלל שהיה בכלל ויצא מן הכלל ללמד לא ללמד על עצמו יצא). (אנא ללמד על הכלל כולן יצא).
 9. *When a subject included in a general description is excepted from it for another enactment, while it remains in all other respects like it, it is excepted to be alleviated, but not aggravated* (דבר שהיה בכלל ויצא לטעון טעון אחר שהוא כעניני דבר להחמיר).
 10. *When a subject included in a general description is excepted from it for another enactment, while it is also not like it in other respects, it is excepted both to be alleviated and aggravated, i. e. its connection with the general law entirely ceases* (כלל שהיה בכלל ויצא לטעון טעון אחר שלא כעניניו יצא להקל ולהחמיר).
 11. *If a subject included in a general description has been excepted from it for the enactment of a new and opposite law, it cannot be restored again to the general class unless the Bible itself expressly restores it* (דבר שהיה בכלל ויצא לידון בדבר החדש אי אהה יכול להחזיר לכללו עד שיחזירנו הכתוב בפירוש).
 12. *The sense of an indefinite statement must either be determined from its connection, or from the form and tendency of the statement itself* (דבר הלמד מעניניו ודבר הלמד מסופו).
 13. *When two statements seem to contradict each other, a third statement will reconcile them* (שני כתובים).
- המכתישים זה את זה עד שיבוא כחבור השלישי (ויכריע ביניהם).

This canon of Ishmael was soon followed by a more extended one of Elieser ben-Jose the Galilean, of the 2d century, who laid down thirty-two rules, which are given in the art. MIDRASH (q. v.), § iv.

Besides these rules, the Scripture was explained according to the *Notaricon* (q. v.), or according to the *Gematria* (גימטריא), a word borrowed from the Greek, either corresponding to *γλωσσενία* or *γραμματεία*. The idea of this rule was, since every letter is a numeral, to reduce the word to the number it contains, and to explain the word by another of the same quantity. Thus from the words "Lo! three men stood by him" (Gen. xviii, 2), it is deduced that these three angels were *Michael, Gabriel, and Raphael*, because *שלשה* *ויהנה* *ואלו*, *these are Michael, Gabriel, and Raphael*, are of the same numerical value, as will be seen from the following reduction to their numerical value of both these phrases:

$$\begin{array}{r}
 \text{י ה נ ה ש ה} \\
 5+300+30+300+5+50+5+6=701. \\
 \text{א ל ו מ ר כ א ל נ ב ר ר א ל} \\
 30+1+10+200+2+3+30+1+20+10+40+5+30+1 \\
 \text{ו ר פ א ל} \\
 +30+1+30+200+6=701.
 \end{array}$$

From the passage, *And all the inhabitants of the earth were of one language* (Gen. xi, 1), is deduced that all spoke *Hebrew*, *שפה* being changed for its synonym *לשון*, and *הקדש* = 5 + 100 + 4 + 300 = 409, is substituted for its equivalent *אחת* = 1 + 8 + 400 = 409.

Another mode of interpretation was according to the *אל תקרי*, i. e. read not so, but so—a very important rule, which exhibits the beginnings of the Masorah (q. v.). In the 3d and 4th centuries nothing new was added to the exegetical canons, and the rabbins of this period did not go beyond their predecessors. The main study was devoted to that branch of literature which found its climax in the Mishna and Gemara, now constituting what is termed the Talmud (q. v.). In the 7th century, however, "we find ourselves with Jewish scholars who had begun to be awake to the importance of serious inquiry into the true meaning of the written Word of God, and men who brought to the task of such investigations minds not only teeming with the traditions of their forefathers, but educated in the severer science of their own age. Of this class the representative is Saadiah (q. v.) Gaon, who was beyond compare, both as a philologist and theologian, the most competent expositor of Holy Scripture that had hitherto appeared in the schools of Judaism; and who was followed by men yet more powerful, in Aben-Ezra, Rashi, Kimchi, Abarbanel, and others, who have been, or will yet be, treated in this *Cyclopædia*. These commentators do not all adopt the same principle of interpretation. They teach the same doctrines substantially, they write under the influence of similar prejudices more or less strong, and they aim at like objects; but they go to work in different ways. One class address themselves to unfold what they consider to be the simple or literal meaning of the words of Scripture; and of this class, some not only attend to the idioms of the language and the lexicographic import of words, but descend to the niceties of the Masorah, and profess to show how different shades of meaning may be brought out of words by the diacritical use of the vowel-points and accents. Another class bring to their aid the mythical apparatus of the Midrashim, and crowd their pages with the legends and sagas of the Hagadoth. Others, again, advance from the literal into the allegorical mode of exposition, and consider the letter of the document as the signature or indication of a higher and more spiritual teaching; while a fourth school, disdaining all these lower modes of exegesis, seek the transcendental regions of the Cabala."

II. *Among the Hellenistic and Alexandrian Jews.*—While the Talmudic and Rabbinic Judaism, with all its dogmas and pharisaic decisions, stood upon the firm ground of the Old-Test. revelation, it was entirely different with Hellenistic Judaism. Separated from their brethren of Palestine, the Jews of Egypt constituted an almost independent sect. Left to themselves, and set free from those elements which led to the development of Rabbinism in the mother country, the Alexandrian Jews pursued a different direction. They had to defend their faith from the attacks of a philosophical system apparently related to it, but claiming for those initiated into its mysteries a higher spirituality and a loftier elevation. To retain the truths of Platonism in Judaism, to vindicate them for, and to elicit them from, the Old Test., such was the first task of the Alexandrian Jewish apologist. The medium of allegorical exposition served for this purpose, as it necessarily comes into existence everywhere, when the religious faith has taken up an attitude of contradiction to the contents of those documents which yet are received as divine, and are firmly retained (see Gfrörer, *Philo*, i, 69).

The beginnings of this interpretation can be pointed out so early as B.C. 180, in the *Ἐξηγήσεις τῆς Μωυσέως Γραφῆς*, by Aristobulus, an adherent of the Aristotelian philosophy. Homage was done to it by the *Therapeutæ* (q. v.), who, according to Philo (*De Vita Contemplativa* [ed. Mang.], ii, 483), regarded the entire *πονο-θεσία* (that is, the Holy Scriptures) as a living being (*ζῶον*), and held "the words to be the body, and the deeper sense, which is veiled under the words, to be the soul: into this the rational soul gazes, looking into very hidden thoughts by means of the words, as it were by a

mirror" (see Gfrörer, *Philo*, ii, 292 sq.). Josephus, it seems, also fancied this mode, as can be seen from his words in the preface to his *Antiquities*, that Moses, in his works, had only indicated some things, and others he had communicated in allegories worthy of the topics (*τὰ μὲν αἰνιττομένου τοῦ νομοθέτου, τὰ δὲ ἀλληγοροῦντος μετὰ σεμνότητος*). But it reached its zenith in the writings of Philo (q. v.) of Alexandria, the whole of which are occupied with explanations or allegorical interpretations of the books of Moses.

Like most Jewish theologians, Philo places the authority of Moses above that of the other inspired writers, who are considered rather as his interpreters and followers than as his equals. But even in Moses we have to distinguish what he attained by philosophical acquirement from that which he received from God, either in ecstasy (a state more or less attainable by all initiated), in answer to his inquiries, or by direct communications. The results of all these are laid down in the Scriptures. But all deeper spiritual truths appear there veiled; the letter conveying comparatively low and carnal views in order to condescend to the gross and carnal notions of the vulgar, so as to bring at least some truth to them, and perhaps gradually to attract them to higher and more spiritual views. It were impossible, it is ridiculous, to interpret literally many scriptural statements, which, so understood, are contrary to reason, and would degrade Judaism below the level of heathen philosophy. In explaining the supposed allegories of Scripture, the Greek text of the Sept. is rigidly adhered to by Philo, though traces of an imperfect acquaintance with the Hebrew occur. A good deal was, of course, to be left to the exegetical tact of each interpreter, but the following seem to have been some of the principles of Alexandrian exegesis: 1. The terms in the text may be expanded, and its statements applied to any or all topics to which the same expressions might figuratively be applied. Thus the word "place" might, besides its proper meaning, apply to the Logos, and even to God, who contains and fills all. 2. The *idea* conveyed in the text may be deduced from the *words* by showing a similar etymological derivation, and hence an affinity between the words and the idea. 3. Everything not absolutely requisite in the text was supposed to point to some special and hidden meaning. 4. Attention was to be given to the exegetical traditions of the fathers, which especially showed itself in the explanation of proper nouns. 5. Above all, the commentator may, by reaching the ecstatic state of the inspired writer, sympathize with and gain an immediate view of the same truth. 6. Several differing interpretations may all convey portions of truth. Such being the procedure of Philo, the natural consequence was "that he completely altered the peculiar subject-matter and spirit of the religion of the old covenant, whose essential character is constituted by the revelation of God in facts and history; and that he volatilized the truth of God into abstract ideas." See PHILO (JUDÆUS).

III. *Among the Cabalists.*—An entirely different attitude towards the Old Test. was assumed by the Cabalists, the Jewish theosophists of the Middle Ages; for they endeavored to lay a foundation for their theosophic doctrine and theories formed by fusing Greek and Oriental speculations, together with the Old-Test. revelation, in allegorical and mystical interpretations of the Old Test., especially the history of creation in Genesis, and Ezekiel's vision of the chariot of God. For this purpose they availed themselves of the artificial hermeneutical methods of the Talmudical Hagadah. They not only made use of the four modes of interpretation comprised in the mnemotechnic *Pardes*, of the Notaricon and Guimatria mentioned above, but also of the *Tsiruph* (צירוף), an anagram which consists in the change of any word into others by the transposition of the component letters, which form various words. Thus בראשית, "in the beginning," has been anagrammatized

ברית אש, "a covenant of fire," to accord with xxxiii, 2; the *Temurah* (תמורה), or permutation change of the letters of the alphabet, by first its twenty-two letters to eleven couples, couple first with the last, the second with the one next last, etc., as גר דק הצ וז חס טז יב כל, and then forming mysterious words from the substituted letters. They assert that Jeremiah, in order might not provoke the king of Babylon against him, making use of the word *Babylon*, artfully substituted ששך (Jer. li, 41), and that it is the same. Without going into details, we will quote the writer Zunz, who (in his *Gottesdienstliche Vorträge*, 403) characterizes the Cabalistic treatment of Scripture in the following manner: "The contents and the relation of the Biblical and Talmudical doctrines were on to traditional or self-imagined laws for the regulation of the world in the mysteries of the Divinity. The secrets of the law became now the sense of the old precepts and opinions when they had been unriddled. It was believed that these secrets had been deposited in the letter of Scripture, but were accessible only to the initiated or inspired, who knew how to set free the spirits confined in the words. Thus in all that was given by the Scripture and the Fathers, men saw a sum of letters and signs, whose arbitrary combination led to the unveiling of mysteries, and the use of similar means occurred already in the Haggadah, such a spiritualizing of the letter, by means of which the connection of Judaism with the eternal order of the heavens became known, was held to be the highest of the law, the highest attainment of all expository science, the final aim of all wisdom. The contents of the Scriptures, the Halachah as well as the Hagadah, the cabalistic doctrine and the results of philosophy—the law—was the bearer of an order which regulated the world in which God and law were the foundation, the Word was the symbol, but the alleged body of the law was the truth. Into that domain of the 'Mercah' or 'Bereshith' ['the Chariot' and 'the Creation'] one time kept at such a distance from the profane, everything of expository material which antiquity bequeathed was gradually drawn in, and was entered into philosophico-mystical systems of Judaism, the results of the most manifold description." See CABALISM.

IV. *Among the Karaites.*—Their opposition to Judaism would also lead them to a rejection of the Old Testament interpretation. They expounded the Old Testament simply and naturally, and their expositions manifested an obvious effort to reach the true spiritual understanding. In general they have penetrated deeper into the truth of the Old Test. than their opponents.

SCRIPTURES, HOLY, the term generally applied in the Christian Church, since the 2d century, to denote the collective writings of the Old and New Testaments. See **BIBLE**. The names *Scripture*, or "writing" (*ἡ γραφή*, 2 Pet. i, 20), *Scriptures* (*αἱ γραφαί*, Matt. xxii, 29; Acts viii, 24), *Holy Scriptures* (*ἱερὰ γράμματα*, 2 Tim. iii, 15), are those employed in the New Test. to denote exclusively the writings of the Old. See **TESTAMENT**. About A.D. 180, the term *The Holy Scriptures* (*αἱ ἁγία γραφαί*) is used by Theophilus (*Ad Autolyc.* iii, 12) to include the Gospels. Irenæus (ii, 27) calls the whole collection of the books of the Old and New Testaments *The Divine Scriptures* (*θεῖαι γραφαί*), and *The Lord's Scriptures* (Dominicæ Scripturæ, v, 20, 2). By Clement of Alexandria (*Strom.* vii) they are called the *Scriptures* (*γραφαί*), and the *inspired Scriptures* (*αἱ θεοπνευστοὶ γραφαί*). From the end of the 2d and beginning of the 3d century, at which time a collection of the New-Test. writings was generally received, the term came into constant use, and was so applied as to include all the books contained in the version of the Sept., as well as those of the Hebrew canon. See **SCRIPTURE**.

I. Contents of the Scriptures.—The Scriptures are divided into the books held sacred by the Jews, and those held sacred both by Jews and Christians. The former are familiarly known by the name of the *Old Test.*, and the latter by that of the *New*. See **BIBLE**. The Old Test., according to the oldest catalogue extant in the Christian Church, that of Melito, bishop of Sardis in the 2d century, consists of the five books of Moses, or the Pentateuch (viz. Genesis, Exodus, Leviticus, Numbers, and Deuteronomy), Joshua, Judges, and Ruth; four books of Kings and two of *Paralipomena* (Chronicles); the Psalms of David; the Proverbs of Solomon, Ecclesiastes, Canticles, and Job; the prophets Isaiah and Jeremiah; the twelve Prophets; the books of Daniel, Ezekiel, and Ezra, under which head Nehemiah and Esther seem to be included (Eusebius, *Hist. Eccles.* iv, 26). Origen, in the next century, reckons twenty-two books, calling them by their Hebrew names, which consisted generally of the initial word of the book, viz. Breshith, or Genesis; Walmoth, or Exodus; Waikra, or Leviticus; Ammesphekodeim, or Numbers; Ellahadebarim, or Deuteronomy; Joshua ben-Nun; Sophetim, or Judges and Ruth; Samuel; Wahammelech Dabid, or 3 and 4 Kings; Dibre Hajammin, or Chronicles; Ezra, which included Nehemiah; Sepher Tehillim, or Psalms; Mishloth, or Proverbs; Koheleth, or Ecclesiastes; Sir Hasirim, or Canticles; Isaiah; Jeremiah, Lamentations, and the Epistle; Daniel; Ezekiel; Job; and Esther; "besides which," he adds, "is Sarbath Sarbane El, or Maccabees." He omits, perhaps by an oversight, the book of the twelve minor prophets. To the books enumerated in the preceding catalogue, Origen applies the term *canonical Scriptures*, in contradistinction to *secret* (apocryphal) and heretical books. He does not, however, include in these latter the deuterocanonical (*ἐν δεύτερῳ*, see Cyril of Jerusalem, *Catech.* iv, 36) or ecclesiastical books; to which he also applies the terms *Scripture*, the *Divine Word*, and the *Sacred Books* (*De Princip.* ii, 1; in *Opp.* i, 16, 79, etc.; *Cont. Cels.* viii, in *Opp.* i, 778). Jerome enumerates twenty-two books, viz.: 1. The Pentateuch, which he terms *Thora*, or the *Law*. 2. The eight prophets, viz. Joshua, Judges and Ruth, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, and the twelve prophets. 3. Nine Hagiographa, viz. Job, Psalms, Proverbs, Ecclesiastes, Canticles, Daniel, Chronicles, Ezra, and Esther. Some, he adds, enumerate twenty-four books, placing Ruth and Lamentations among the Hagiographa. The other books, read in the churches, but not found in the canon, as Wisdom, Sirach, Judith, Tobit, and the Shepherd, he terms *Apocrypha*. With

IX.—H H

this catalogue agrees his contemporary Rufinus, who accuses Jerome of compiling, or rather plundering (*compilandi*), the Scriptures, in consequence of the rejection by that father of Susanna and the Benedicite. Cyril of Alexandria divides the canonical books into five of Moses, seven other historical, five metrical, and five prophetic.

With these catalogues the Jews also agree. Josephus enumerates twenty-two books—five of Moses, thirteen prophets, and four books of morality. The prophets were divided by the ancient Jews into the early prophets (viz. Joshua, Judges, Samuel, and Kings) and the later prophets, which were again subdivided into the greater (viz. Isaiah, Jeremiah, and Ezekiel) and the twelve lesser prophets. The Talmud and the modern Jews agree with Jerome's division into eight prophets and nine Hagiographa (*Kethubim*).

The canon of the Alexandrian version includes the other books, called ecclesiastical, which we have already given in their order. See **DEUTERO-CANONICAL**. As the early Christians (who were not acquainted with Hebrew) received this version, for which they had the sanction of its employment by the New-Test. writers, and as from it flowed the old Latin and several other ancient versions, we must not be surprised at finding that all these books, being thus placed in the Bible without any mark of distinction, were received indiscriminately by the primitive Christians, and were, equally with the canonical, read in the churches. Jerome, in his Latin translation of the Bible from the Hebrew in the 4th century, introduced a distinction by means of his prefaces, prefixed to each book, which continued to be placed, in all the MSS. and in the early printed editions of Jerome's version, in the body of the text, from which they were for the first time removed to the beginning or end of the Bible after the decree of the Council of Trent in A.D. 1546 (see Rev. G. C. Gorham's *Letter to Van Ess* [Lond. 1826]). Luther was the first who separated these books from the others, and removed them to a place by themselves in his translation. Lonicer, in his edition of the Sept., 1526, followed his example, but gave so much offence by so doing that they were restored to their places by Cephalæus in 1529. They were, however, published in a separate form by Plantin in 1575, and have been, since that period, omitted in many editions of the Sept. Although they were never received into the canon either by the Palestinian or Alexandrian Jews, yet they seem to have been, by the latter, considered as an appendix to the canon (*De Wette, Einleitung*). There are, besides these, many books cited which have long since perished, as the book of Jasher (Josh. x, 13; 2 Sam. i, 18), and the book of the Wars of Jehovah (Numb. xxi, 14). Some books bearing these names have been printed, but they are forgeries. The book of Jasher, however, published at New York in 1840, is not, as would appear from the appendix to Parker's translation of De Wette's *Introduction*, a reprint of the Bristol forgery, but a translation of the much more respectable (though also spurious) book of Jasher which we have already referred to as published at Naples in 1625, and written in excellent Hebrew before the close of the 15th century. See the *American Christian Examiner* for May, 1840. See **JASHER**.

In regard to the order of the books, the Talmudists and the Masoretes, and even some MSS. of the latter, differ from each other. The Alexandrian translators differ from both, and Luther's arrangement, which is generally followed by Protestants, is made entirely according to his own judgment. The modern Hebrew Bibles are thus arranged, viz. five books of Moses; Joshua, Judges, two books of Samuel, two books of Kings; Isaiah, Jeremiah, Ezekiel, and the twelve minor prophets; Psalms, Proverbs, Job, Canticles, Ecclesiastes, Esther, Daniel, Ezra, Nehemiah, and 1 and 2 Chronicles. The New Test. consists of the four Gospels, the Acts, Epistles of Paul, Catholic Epistles, and the Apocalypse; these are

differently arranged in the Greek and Latin MSS. All these writings have been considered in the Christian Church from the earliest period as divinely inspired (θεόπνευστοι, 2 Tim. iii, 14-16), as no doubt the books of the Old Test. were by the Jews (see Talmud, *passim*; Philo, *De Vit. Mosis*, vol. ii; Josephus, *Cont. Apion.* i, 3; and manner of their citation in the New Test.). The early Christian writers also constantly maintain their inspiration (Justin Martyr, *Second Apology*; Irenæus, i, 4; Origen, *Περί Ἀρχῶν*, Præf.), the only difference of opinion being as to its limits. Some of the fathers maintain their verbal inspiration, others only that of the thoughts or sentiments, or that the sacred writers were merely preserved from error (Dupin, *On the Canon*). But the first controversy raised on this subject was in the 16th century, when the theses of the Jesuits [see MACCABEKS], who had maintained the lower notion of inspiration, were condemned by the faculties of Louvain and Douai. Jahn observes (*Introd.*) that on this subject the entire Christian world was divided, and that the condemnation of the theses was not sanctioned by the Church or the Roman primate, and that the Council of Trent has pronounced no judgment on the subject. Henry Holden, doctor of the Sorbonne, published his *Analysis Fidei* in 1652, in which he defended that notion of the fathers which maintained only an exemption from errors appertaining to doctrine. Jahn further observes (*loc. cit.*) that most Protestants, until the middle of the 18th century, defended the most rigid notions of verbal inspiration; but that, from the time of Töllner and Semler, the idea of inspiration was frittered away and eventually discarded. The high notion of inspiration has been recently revived among Protestants, especially in the eloquent work of M. Gausson, of Geneva, *Theopneustia* (1842). The moderate view has been that generally adopted by English divines (Henderson, *On Inspiration*, Horne's *Introd.*; appendix to vol. i), while in America the extreme view of verbal inspiration has, until very recently, prevailed. See INSPIRATION.

II. History and Authenticity of the Holy Scriptures.

—1. *The Old Testament.*—The first Scripture, the Pentateuch, was kept in a sacred place, the tabernacle, both in the wilderness and in the land of Canaan; and the successive sacred writings that were produced before the building of the Temple of Jerusalem were committed to the same safe custody; but when the Temple was built, Solomon removed into it these writings, and commanded that all succeeding Scriptures should be there preserved also. Though the Temple was burned by Nebuchadnezzar, it does not appear that the MSS. were destroyed, for none of the succeeding sacred writers allude to anything of the kind, which they certainly would have done as a matter of deep lamentation. During the captivity, Daniel (ix, 11, 13) alludes to the written law as in existence; and Ezra (Neh. viii, 5, 8) read the book of the law to the people on their return from Babylon. About the time of Ezra, inspiration closed; the Spirit departed from Israel with Malachi, the last of the prophets, or, as the Jews call him, the *seal* of the prophets. Then the canon was formed by Ezra, and the Jews never dared to add, or allow anything to be added, to it. The canon of the Scriptures, as collected by Ezra, is attested by Josephus in his book *Contra Apion.* wherein he mentions the number of the books, the arrangement, and the contents; and adds that after a long lapse of time no one has dared to add, diminish, or alter; and that it is implanted in all Jews from their birth to consider these books the oracles of God, and, if need require, cheerfully to die for them. Five hundred years after Ezra, a complete copy of the canon of Hebrew Scripture was preserved in the Temple, with which all others might be collated. Although Christ often reproached the scribes and Pharisees for their erroneous glosses on Scripture, he never said that they had in any way falsified the Scriptures. Paul (Rom. iii, 2) reckons among their privileges that "to them

were committed the oracles of God," without intimating that they ever abused their privilege by corruption.

The Jewish canonical division of Scripture into great parts—the law, the prophets, and the holy writings (which commence with the Psalms)—is attributed by our Saviour (Luke xxiv, 44) when he alludes to the threefold division: "All things must be fulfilled which were written in the law of Moses, and in the prophets, and in the Psalms, concerning me."

The authenticity of the Old Test. is abundantly proved—(1) by the unintentional testimonies of its authors, who speak in a corroborative manner of persons and facts mentioned in it; such prophets being unquestionably proved to have lived in a later period than the sacred writers whom they allude to, such as Diodorus Siculus, Longinus, Porphyry, etc., who corroborate Moses; (2) by the fact, as pointed out by Grotius, that there do not appear in any of the ancient records any testimonies that contradict those produced in the Old Test.; (3) by the corroborative testimony of many traditions preserved among different nations; (4) by the collation of many hundreds of MSS. of the Old Scriptures written at different periods by various persons, in all of which MSS. the most wonderful similarity is to be observed, the only variations being some trifling ones easily accounted for and explained, and not of the slightest consequence as to doctrine or fact (Dr. Kennicott collated seven hundred MSS. without finding one various reading of any importance); (5) by the agreement of ancient writers, such as the Samaritan Pentateuch, with the Hebrew, which, from the violent enmity between the Jews and Samaritans, could never have been by collusion; (6) by the old Chaldee Targums, or paraphrases, agree so remarkably with the Hebrew as to be more properly versions than paraphrases; (7) by the extraordinary fidelity of the Hebrew writers, who detail simply the words of their great men and their own national history, instead of seeking to exalt themselves and their like over other historians.

2. *The New Testament.*—From the time the canon of the Old Test. was completed till the publication of the books of the New Test., about four hundred and sixty years elapsed. During the life of Jesus, and for some time after his ascension, nothing was written, the subject of his mission seems to have been confined to writing, for the purpose of publication, by his apostles. During the period between his resurrection and the publication of the last of the books of the New Test., the churches possessed miraculous gifts, and the apostles and disciples were enabled to explain the predictions of the Old Test., and to show their fulfilment. After the Gospel had attracted attention, and Christianity was planted, not only in Judæa, but in the East, Italy, Greece, and Asia Minor, the Scriptures of the New Test. were written by the apostles and other inspired men, and intrusted to the keeping of the churches. They had others written narratives on the rise of the new religion, but they were not authenticated (see 1). When authentic documents were required for the information of the churches, and for the promotion of life and godliness in every region, six of the apostles and two disciples, all of whom were content with the Master, were divinely inspired to write. The evangelists may, under divine guidance, have made use of the earlier narratives of others, of public records, and even of private memoranda; but the fact must not be lost sight of that all the writers were divinely guided as to what they wrote.

These several pieces which compose the Scriptures of the New Test. were written in the Greek language, which was then almost universally understood. They were not only received by the churches with the greatest veneration, but were immediately copied and spread about from one Church to another till each

possession of the whole. From the manner in which they were at first circulated, some portions were necessarily longer in reaching certain places than others. While copies of each book would be extensively multiplied, it is, at the same time, a certain fact that no other books besides those which at present compose the volume of the New Test. were admitted by the early churches. The original collection of the several books for the formation of the canon of the New Test. evidently took place *in, or immediately after, the apostolic age*; but it was not any council convened by any bishop or Church that first ascertained and determined their canonical authority. Indeed, the books admitted into the canon were never supposed to derive their authority and validity from any council, inasmuch as the authority of the books existed before any council, and consequently prior to any official or ecclesiastical declarations concerning them. As the several books were assumed to be of complete authority as soon as they were published by their inspired authors, the churches were eager for their possession, and had them transcribed and freely circulated everywhere. Thus, even in the apostolic age, several churches would be in possession of all the writings of the New Test., for the genuineness and authenticity of which they had all the requisite evidence from the highest sources. Though the books of the New Test. were written in the Greek language, the writers were Jews, hence, as might be expected, their compositions evidence Jewish thought, which everywhere gives a Hebrew coloring to the style of their several writings. We have no evidence that the books of the New Test. were ever corrupted; indeed, as these books were the foundation of the Christian faith, alterations were both impossible and impracticable without detection. These books are quoted or alluded to by a series of Christian writers, as well as by the adversaries of the Christian faith, who may be traced back in regular succession from the present time to the apostolic age. Some of the ancient versions, as the Syriac, and several Latin versions, were made at the close of the first, or at the commencement of the second, century. Now the New Test. must necessarily have existed previously to the making of those versions; and a book which was so early and so universally read throughout the East in the Greek and in the Syriac languages, and throughout Europe and Africa in the Latin, must be able to lay claim to a high antiquity; while the correspondence of those versions with our copies of the original Greek attests their genuineness and authenticity.

But though the ancient MSS. of the Scriptures which have descended to our times have not been wilfully altered, they have, nevertheless, been subject to the vicissitudes incident to copying in the course of transmission. Still, the uniformity of the MSS. which are dispersed in so many countries and in so great variety of languages is truly astonishing. The various readings consist almost wholly in palpable errors in transcription, grammatical and verbal differences, such as the insertion or omission of a letter or article, the substitution of a word for its equivalent, or the transposition of a word or two in a sentence. Taken altogether, they neither change nor affect a single doctrine or duty announced or enjoined in the Word of God. From the recent herculean labors in examining the MSS. and collecting the variations, we have for the New Test. the investigations of Mill, Bengel, Wettstein, Griesbach, Matthæi, Scholz, Lachmann, Tischendorf, Mai, Tregelles, and Scrivener, who have examined several hundreds of MSS. and compared their differences. The old versions also, such as the several Syriac copies, the Latin, Gothic, etc., have been compared and their supposed variations added to the lists. Even the quotations found in the fathers have been subjected to the same ordeal, and all their discrepancies and peculiarities seized on and subjoined to the formidable catalogue. The various readings of Greek New-Test. Scriptures, thus multi-

plied by the fidelity of collators, may now amount to more than a *hundred thousand*. This immense combination of labor has established so convincingly the astonishing preservation of the sacred text, copied, nevertheless, so many thousands of times—in Hebrew during thirty-three centuries, and in Greek during eighteen hundred years—that the hopes of the enemies of religion in this channel have been overwhelmed; while the faithful can rejoice in the fact that they possess in all their purity those writings which are able to make them wise unto salvation.

SCRIPTURES, USE OF, IN THE EARLY CHURCH.

We have seen above that great care was taken by the fathers of the Christian Church to secure a speedy translation of the Scriptures into the languages of the several nations as they were converted to Christianity. Eusebius (*De Præp. Evang.* lib. xii, c. 1) says, "They were translated into all languages throughout the world;" while Theodoret (*De Curand. Græcor. Affect. Serm.* 5, t. 4, p. 555) declares "that every nation under heaven had the Scripture in its own tongue." This translation was done to encourage its reading by the people, and, still further to secure this end, it was an ancient custom to have Bibles in the vulgar tongues laid in a convenient part of the church for the people at their leisure to employ themselves in reading. Not only men and women were allowed to read, but children also were encouraged and trained from their infancy to the reading of the Holy Scriptures. Catechumens were obliged to learn the Scriptures as part of their discipline and instruction, and they formed the chief part of the studies of the clergy. Both the clergy and monks were accustomed to have them read to them at their meals, and many became so well versed in the Scriptures that they could repeat them by heart. Nor were the people denied the privilege of reading the Scriptures in their homes, but were rather encouraged to thus prepare themselves for the public services. In these latter the Scripture lessons, which were always two at least, and sometimes three or four, were taken from both the Old and the New Test., except in the Church of Rome, where only epistle and gospel were read. Those who withheld the Scriptures from the people were considered to be guilty of sacrilege; but such an offence was unknown to the ancients. It was considered a crime to yield up the Scriptures to persecutors demanding them, and those thus guilty were styled *traditores*, or betrayers. See Bingham, *Christian Antiq.* (see Index).

Scriven, CHRISTIAN, a Lutheran clergyman and writer of devotional works in the 17th century, the contemporary and friend of Spener, was born at Rendsburg, in Holstein, Jan. 2, 1629. His childhood was spent under the care of a widowed mother in the trying period of the Thirty Years' War; but a wealthy merchant—the brother of Scriven's grandmother—finally made provision for his needs. After suitable preparatory studies, Scriven became a private tutor, and in 1647 entered the University of Rostock. In 1653 he was archdeacon at Stendal, and in 1667 pastor at Magdeburg, with which position he combined other offices, e. g. that of a scholar, and finally a senior in the government of the Church. He refused to leave Magdeburg in answer to repeated calls to Halberstadt, to Berlin, and to the court of Stockholm, but was in advanced age induced to accept the post of court preacher at Quedlinburg. In 1692 he suffered an apoplectic stroke, and on April 5, 1693, he died. He had been married four times, and had had fourteen children born to him, but he outlived all his wives and children except one son and one daughter.

The name of Scriven has lived among the common people through the publication of his *Seelenschatz* (Magdeburg and Leips. 1737; Schaffhausen, 1738 sq., 5 parts in 2 vols. fol.), a manual of devotion which he dedicated to "the Triune God," and which deserves high commendation. Another work deserving of mention is

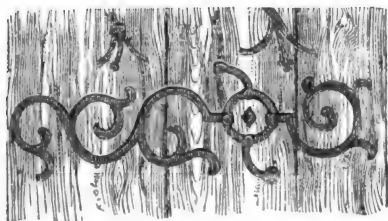

his *Gotthold's Zufällige Andachten* (1st ed. 1671, and often), a sort of Christian parables, 400 in number, which are based on objects in nature and ordinary occurrences in life. The *Siech- u. Siegesbette* describes a sickness through which he passed, and the aids and comforts derived from God's goodness in that time. Pritius has published a work of consolation, entitled *Wittwenrost*, from Scriver's literary remains.

For Scriver's life, see Pritius's preface to the *Seelenschutz*; Christmann, *Biographie* (Nurem. 1829); Hagenbach, *Wesen u. Gesch. d. Reformats*. iv; *Evang. Protestantismus*, ii, 177 sq.

Scrobiculi, a name given among the ancient Romans to altars dedicated to the worship of the infernal deities. They consisted of cavities dug in the earth, into which libations were poured.

Scroll (ספר, *sépher*, Isa. xlviv, 4, a book, as elsewhere; so also βιβλίον, Rev. vi, 14), the form of an ancient book (q. v.).

SCROLL. (1.) A name given to a numerous class of ornaments, which in general character resemble a band

Scroll Moulding.

arranged in undulations or convolutions. (2.) It is also applied to a particular kind of moulding shown in the example from Dorchester church, called the scroll or roll moulding, a marked feature of the Decorated style.

Scrutiny, the inquiry into the faith and manners of candidates for baptism. It was made in the presence of the congregation on seven days the last being Wednesday before Passion-Sunday. The name of each candidate was called; then the deacon bade him prostrate himself five times and rise, in memory of the five wounds of Christ. The sign of the cross was made on his forehead by the sponsor and acolyte; lastly, he was sprinkled with ashes. The custom died out in 860.

SCRUTINY is the name, also, of one of the three canonical modes of electing a pope in the Romish Church. It is the method almost invariably followed, and is thus managed: Blank schedules are supplied to each of the cardinals, who fills them up with his own name and that of the individual for whom he votes. If two thirds of the votes are not in favor of any one person, the cardinals proceed to a second vote by *accessus* (q. v.). See Gardner, *Faiths of the World*, s. v.; Walcott, *Sac. Archæol.* s. v.

Scudder, Catharine Hastings, a missionary to India of the Presbyterian Church, was born in Utica, N. Y., Aug. 22, 1825. She was the daughter of Prof. Thomas Hastings, known and honored throughout the churches of the United States for his successful efforts in raising the standard of church music. In her tenth year, she joined the Presbyterian Church under the pastorate of Dr. Erskine Mason. The development of her piety gave early indications of her destiny as a missionary. When eleven years old, her heart was deeply affected by the fact that the missionaries who had charge of the Ceylon mission schools were obliged to disband some of them for want of funds, and to send back to the darkness of heathenism many of the native children, and her sympathy led to corresponding action. She prepared a constitution, and formed a family association to sew for the heathen, and this association continued in existence until she left home for India, and exchanged manual for

mental and moral labor in behalf of those for whom she felt a life-long solicitude. From the time she determined to devote herself to the missionary work, her character matured rapidly and with remarkable power, and the beauty of the Lord shone in and around her. In September, 1846, she was married to the Rev. William W. Scudder, son of the Rev. John Scudder, M.D., who was about to return to his native India as a missionary in that field, so long the home of his honored father. Soon after, they embarked for India, on the ship *Flavio*. In mid-ocean there was a revival on board, in which several of the roughest sailors were converted. When 280 miles from Madras, a meeting was held, at which there were eight of the seamen hopefully trusting in Christ for salvation. She united with the Church on the first Sabbath after her arrival on the shores of India, and enjoyed a delightful communion season with the Indian Church, full of gratitude to God for having permitted her to arrive on the field of her labors. Her allotted station was the island of Ceylon, and there, as soon as she could master a few words of the language, she commenced her work. She was permitted to prosecute her labors during the short period of two years only. While on a journey with her husband, returning from Madura, she was attacked with cholera, and died March 11, 1849, declaring in her last words that she was happy in Jesus. (W. P. S.)

Scudder, John, M.D., a celebrated missionary in Ceylon and India, was born at Freehold, N. J., Sept. 3, 1793, graduated at Princeton College in 1811, and at the College of Physicians and Surgeons in New York, in 1815. He established himself at once in medical practice in that city with success and lucrative prospects. In 1816 he married Miss Harriet Waterbury, the estimable and efficient companion of his missionary life. In 1819, while waiting to see a patient, he picked up in the anteroom a tract called *The Conversion of the World, or the Claims of Six Hundred Millions, and the Ability and Duty of the Churches respecting them*. Deeply impressed by its appeals, he consulted with his wife prayerfully, and with fasting and great deliberation. They gave themselves up to the foreign missionary service, offered themselves to the American Board, and prepared for their work. His friends were astounded that he should sacrifice his medical prospects of fame and fortune for such a venture. But the vow was made, never to be recalled, and joyously to be fulfilled. He was licensed by the Classis of New York of the Reformed Dutch Church in June, 1819, and they sailed on the 8th of that month for their destination, with Messrs. Winslow, Spalding, and Woodward, to reinforce the Ceylon mission at Tilligally. Here he immediately began his career as a missionary, physician, and minister, although he was not ordained until May 15, 1821, in the Wesleyan chapel at Jaffnapatam, by clergymen of the Congregational, Baptist, and Methodist denominations. In the large hospital which he established, cholera and jungle fever were treated with eminent success, as well as ordinary diseases of the climate. In 1822 a college was organized. In 1824 the mission enjoyed a wonderful revival of religion, which wrought with power at Dr. Scudder's schools. His influence added much to the great prosperity of the Ceylon mission. In 1836 he and Mr. Winslow were transferred to India to establish a printing-press at Madras for publishing the Scriptures and tracts in the Tamil language. The large printing establishment of the Church Missionary Society fell into their hands in 1838. Six millions of pages were printed by these brethren the first year, and more in later years. These were scattered through every open door far and wide among the natives. Dr. Scudder resided at Chintadrepattah, near Madras, and out of these beginnings grew up the Arcot Mission, which was received under the American Board of Christian Foreign Mission in 1852, and subsequently passed into the care of the Reformed Church in America in 1853 as the Arcot Mission of the Reformed Church. After a residence of twenty-three

years abroad, his health having suffered from the climate, Dr. Scudder returned to America in 1842, and remained until 1846. During these four years his time was employed in constant missionary service among the churches of this country. His labors among children and youth were memorable for the crowds that attended his public meetings, and his marvellous success in addressing them and direct influence for their conversion and consecration to the mission work. Upon his return to India, he resumed his work with characteristic zeal and energy. For a short time (1849), he was temporarily connected with the Madura mission. In November of the same year Mrs. Scudder died, and but a few days previously his son Samuel also deceased at New Brunswick, N. J., where he was pursuing his theological studies preparatory to joining his father and brothers in India. The death of this promising young man, in his twenty-second year, called forth one of the most touching appeals for men for his field, and in their absence he resolved to make up for Samuel's loss by personally rendering extra service. This excessive labor brought on serious illness. In 1854, by medical advice, he went to the Cape of Good Hope. The voyage reinvigorated him, and after a brief sojourn at Wynberg, where he was very useful in Christian labors among the English-speaking people, he arranged to return again to his field. But only two days before the ship arrived, he died suddenly of apoplexy, Jan. 13, 1855. Of his fourteen children, nine survive. His seven sons and two daughters became missionaries in the same field with their parents, and in the Arcot Mission of the Reformed Church. Two of the sons have since been obliged to leave India on account of ill-health, and have done good service to the Church at home. One of the daughters was, and the other still is, in missionary work (1870). Besides his numerous communications to the *Missionary Herald* and other serials for thirty-five years, Dr. Scudder issued several publications, which have all had a wide and useful circulation. Among these are, *The Redeemer's Last Command:—The Harvest Perishing:—An Appeal to Mothers:—Knocking at the Door:—Passing over Jordan:—Letters to Children*, etc. Dr. Scudder's distinguishing traits were decision of character, martyr-like attachment to the truth, and steadfastness in prosecuting his plans. He had in him many of the highest elements of moral heroism, a sublime daring to do right irrespective of opposition, a supreme regard for first principles, a scorn of all that was mean and small, a "zeal according to knowledge," and a practical wisdom in accomplishing his purposes which easily overrode mere conventionalities of routine. His intellect was robust, intensely active, and independent. His will was most positive and all-controlling when once he believed himself to be right. Nothing daunted his brave soul. In early life he had for months been the victim of a most terrible spiritual conflict, which ended in a peace that nothing afterwards seriously disturbed. It was the grand victory of his life, which dwarfed all other contests and made self-sacrifice the easy law of his new being. When one told him that he should consult conscience lest he should overwork himself, he said that he had "quashed conscience of that sort long ago." When asked in America, "What are the discouragements of the missionary work?" he replied, "I do not know the word. I long ago erased it from my vocabulary." He fought the battles of temperance among the missions and people, and for the extirpation of caste in the churches of India, with heroic power and triumph. His piety was sweetly expressed in saying to one of his sons "that his ambition was to be one of the inner circle around Jesus in heaven." For years before his death he enjoyed unbroken "assurance of faith." His power and tact in personal religious conversation with almost every one that he met were wonderful. He preached the Gospel in almost every large town in Southern India. He made frequent and extensive tours for this purpose, preaching generally twice a day, and once "he stood at

his post eleven consecutive hours. He did not even stop to eat, but had coffee brought to him." His biography is full of stirring incidents illustrating these and other characteristics of this remarkable man. A *Memoir* of him has been published by his brother-in-law, Rev. J. B. Waterbury, D.D. (N. Y. 1870, 12mo); also a previous volume called *The Missionary Doctor and his Family*, by M. E. Wilmer (Board of Publication of the Reformed Dutch Church). See Sprague, *Annals of the Amer. Pulpit*, vol. ix: Corwin, *Manual of the Reformed Church in America*, p. 204-210. (W. J. R. T.)

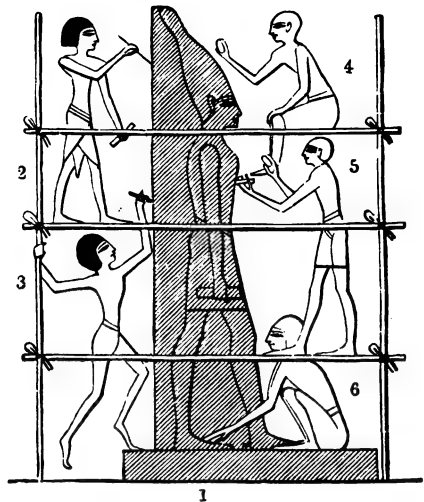

Scudder, John B., a Presbyterian minister, was born near Princeton, N. J., June 8, 1810. He was the oldest son of Jacob Scudder, M.D. He was graduated at Princeton College in 1830, after which he spent one year in teaching in Virginia, and then returned to Princeton and entered the Theological Seminary. A failure of health prevented him from completing his theological course, and he went to Holmesville, Mass., for its recovery. While there he entered actively in the Sabbath-school and prayer and other religious meetings, making himself generally useful as a Christian. After the restoration of his health he had charge of several classical schools in Louisiana and at Memphis, Tenn., and also in Georgia and Florida. The last years of his life were spent in Georgia. Although he was not ordained, he sustained the relation of a lay preacher, and, while engaged as principal of a large school, was much occupied in conducting religious exercises, in distributing religious tracts, and in other earnest and successful efforts to advance the kingdom of Christ in the world. As a collaborer, he was as useful as any in the ministry, and his labors of love were highly appreciated and much blessed. Like Harlan Page, his personal efforts brought many into the kingdom who might have been beyond the reach of ministerial influence. On the morning of July 19, 1876, he was suddenly struck down by apoplexy, and, after exclaiming "How blessed a thing it is to be prepared to die!" he breathed his last. (W. P. S.)

Scul. See SKULL.

Sculpture, HEBREW. By the well-known law (in Exod. xx, 4 sq.; Deut. iv, 16 sq.; xxvii, 15; comp. Diod. Sic. *Ecol.* xi, 1; Strabo, xvi, 761; Josephus, *Cont. Apion.* ii, 6; Ewald, *Isr. Gesch.* ii, 110 sq.; Tacit. *Hist.* v, 5, 4. But see Berthele, *Isr. Gesch.* p. 248) the Israelites were not forbidden to make any image in stone, wood, or metal (Michaelis, *Mos. Recht*, p. 150 sq.), for even in the sanctuary of Jehovah, on the ark of the covenant, there were two cherubs of gold; and flower-work as ornament was placed on the golden candlestick; and the large brazen bathing-vessel in the court (the so-called brazen sea [q. v.]) was supported on twelve brazen oxen (1 Kings vii, 25), though Josephus blames this arrangement as illegal (*Ant.* viii, 7, 5). In the wilderness, too, even Moses set up a brazen serpent (Numb. xxi, 8), and the Philistines offered golden figures as an offering to Jehovah (1 Sam. vi, 17 sq.). But the design was to forbid all worship of images, and also all images of Jehovah (comp. Exod. xx, 5; Josephus, *Ant.* iii, 5, 5; Philo, *Opp.* ii, 591), for a sensual people would easily be led into idolatry by them, or at least would lose much of the spirituality of their ideas of Jehovah (comp. Philo, *Opp.* i, 496); and thus the golden calf of Aaron (Exod. xxxii, 4), the graven image of the children of Dan (Judg. xviii, 31; comp. xvii, 4), and the two golden calves of Jeroboam (1 Kings xii, 28 sq.) were antitheocratic. Yet this Mosaic law prevented the great progress of sculpture, which in all nations has received its greatest impulse from religious faith and worship. (Schnaase, *Gesch. d. bibl. Künste*, i, 257, thinks that the imagination of the Hebrews, as shown in their poetry, was too quick and mercurial for the patient work of sculpture.) Most of their works of brass of this kind were by Phœnician artists (1 Kings vii, 14). An example of sculpture not of a religious character occurs in the audience throne

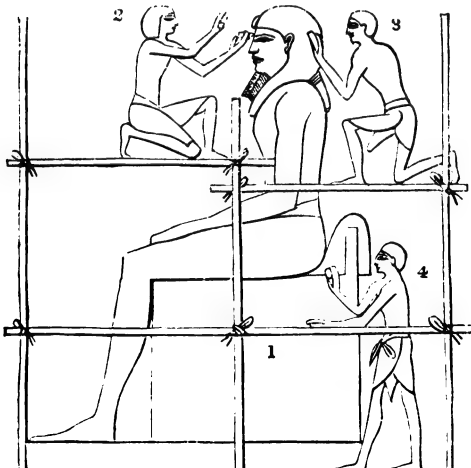

of Solomon, which was supported and surrounded by fourteen finely wrought lions, the symbol of strength (1 Kings x, 19 sq.; 2 Chron. ix, 19 sq.). After the exile, stricter views prevailed; and the orthodox Jews, or followers of the Pharisees, interpreted the Mosaic prohibition of sculpture in general (Josephus, *Ant.* xv, 8, 1; xvii, 5, 2; xviii, 3, 1; *War.* ii, 9, 2; comp. also Maimonides in Hottinger, *Jus. Hebr.* 39), even of architectural ornament (Josephus, *War.* ii, 10, 4; comp. *Ant.* xvii, 6, 2; Tacit. *Hist.* v, 5, 5. Yet according to Josephus, *Ant.* iii, 6, 2, only the images of living creatures were prohibited). Accordingly, a palace of the tetrarch Herod in Tiberias, which was adorned with the figures of beasts, was burned by order of the Sanhedrim, simply because it was thought to violate their law (Josephus, *Life*, 12). Still less were images tolerated in the Temple (*id.* *War.* i, 33, 2; *Ant.* xvii, 6, 2). Even the image of the emperor, carried on the eagles of the soldiers, could not be admitted into Jerusalem (*ibid.* xviii, 3, 1, and 5, 3; comp. *War.* ii, 9, 2; *Ant.* xv, 8, 1 sq.). Yet such rigid views were not universal; at least, at an earlier period, John Hyrcanus adorned his castle beyond the Jordan with colossal animal figures (*ibid.* xii, 4, 11); queen Alexandra had portraits of her children made (*ibid.* xv, 2, 6); and Herod Agrippa possessed statues of his daughters (*ibid.* xix, 9, 1).—Winer.

Hebrew sculpture, such as it was, no doubt was based upon, and sustained by, the art as practiced in Egypt. It was there governed by very strict rules, fixed proportions being established for every figure, which the statuary was not permitted to violate; and hence arises the great sameness in the Egyptian statues, and the stiffness for which they are all remarkable. Isaiah describes the process of idol-making very minutely. "The carpenter stretcheth out his rule; he marketh it out with a line; he fitteth it with planes, and he marketh it out with the compass, and maketh it after the figure of a man, according to the beauty of a man; that it may remain in his house" (xlv, 13). The mode of proceeding will easily be understood by a reference to the accompanying engravings. When a proper block of marble or granite had been procured by the sculptor, the surface was first smoothed, and parallel lines drawn from top to bottom; other lines were then drawn, at equal distances, from side to side, so as to divide the whole into a series of squares. The size of these squares was proportioned to the size of the figure, but the number of them was invariable, whatever might be the dimensions of the figure: nineteen of these squares, according to some authorities, and twenty-one and one fourth according to others, were allowed for the height of the human body; when smaller figures

Standing Figure of a King (Fig. 1), and, like the former, painted to represent granite. (Figs. 4, 6 are polishing it; and figs. 2 and 3 painting and sculpturing the hieroglyphics at the back.)

or ornaments were introduced, the squares were subdivided into smaller squares, proportioned to the less figure. The outline was then traced, and its proportions were invariable. This, which to moderns would seem the most important part of the process, required no great exertion of skill in the Egyptian artist. It was then inspected by the master-sculptor, who wrote on various parts of it, in hieratic characters, such directions as he thought it necessary to give to the inferior artists who actually cut the figure. The colossal statue on which the workmen in the accompanying engraving are engaged appears so far advanced towards completion that the instructions of the master-sculptor have been chiselled away. We are informed by Diodorus Siculus that the most eminent statuary always went to reside for a time in Egypt, as modern artists do in Italy, to study the principles of their art. He particularly mentions Telecles and Theodorus, the sons of Rhœcus, who made the celebrated statue of the Pythian Apollo at Samos, after what he calls "the Egyptian fashion." He explains this fashion to be the separate execution of the parts, for the statue was divided into two parts, at the groin: one half was cut by Telecles at Samos, and the other by Theodorus at Ephesus; yet, when they were joined together, they fitted so exactly that the whole seemed the work of one hand. And this seemed the more admirable when the attitude of the statue was considered, for it had its hands extended, and its legs at a distance from each other, in a moving posture. We thus see that Egyptian sculpture was almost wholly a mechanical process; the laws of the country prohibited the intervention of novelty in subjects considered sacred; and the more effectually to prevent the violation of prescribed rules, it was ordained that the profession of an artist should not be exercised by any common or illiterate person. Wilkinson, indeed, has shown the great probability of the higher artists having been included in the ranks of the priesthood. In some instances, however, we find reason to believe that the Egyptian artists broke through these trammels. In the two granite statues of lions presented by lord Prudhoe to the British Museum, we perceive a boldness and freedom of execution scarcely compatible with a strict adherence to mechanical rule (see Wilkinson, *Ancient Egypt.* ii, 342 sq.).

Ancient Egyptians Polishing (Figs. 2-4) a Colossal Sitting Statue of Granite (Fig. 1).

SCULPTURE, CHRISTIAN. The art of sculpture has an antagonistic principle to overcome in the Christian conception of the world, and its progress has been much

impeded by that fact; for, while this art must deal primarily with physical forms, and, at the most, can only regard the spirit as, with the body, a co-ordinate part of a common whole, the Christian idea exalts the spirit, making of the body a mere instrument and medium of development, which is laid aside when the stage of a higher spiritual existence is reached; and in the measure in which Christianity confines all ideality to the realm of spirit, so does it render impossible the attainment of its ideal to an art which aims to achieve in its representations a unity of spirit and body, of idea and phenomenon. The history of Christian sculpture down to the 16th century accordingly shows that the constant effort of artists was to discover a mode of conception and treatment, i. e. a style, which would enable them to be true to the Christian idea, and, at the same time, to the laws of the plastic art; and the several periods, as well as the sculptors and their productions, differ among themselves chiefly as the consciousness of this task has become apparent and the problem been more or less successfully solved.

Sculpture was neglected, however, during the first period in the history of Christian art (1st to 10th century) to a degree that permitted but a slight recognition of this task. The dislike of heathenism and its idolatries, in which service the noblest efforts of ancient art had been expended, was at first so great that a cultivation of the formative arts was out of the question; and when this aversion lost its controlling power, the energies of Christian art were employed in painting rather than sculpture, the only object being to bring before the faithful representations of scenes and incidents recorded in the Scriptures; and for this purpose paintings and mosaics were more suitable than sculptures. But four statues of a religious character may with certainty be attributed to this period: (1) a marble statue of Hippolytus, bishop of Portus Romanus and martyr, in the former half of the 3d century, the figure seated and wearing a toga, the execution thoroughly ancient in the lower part of the sculpture, while the upper part is a modern renovation; (2) the celebrated bronze statue of St. Peter whose feet the faithful are expected to kiss on festival occasions at Rome, resembling the Hippolytus in style and character, and probably executed at Constantinople in the 5th century; and (3) two statues of the Good Shepherd, one belonging to the 5th or 6th century, and the other to a later period, when ancient Christian art was already in its decline. We have historical information respecting sculptures of a non-religious character also, e. g. equestrian statues of Justinian and Theodoric the Great, but none have been preserved to this time. Such other relics of this period as are still extant belong to the class of sculptures in relief—e. g. the designs found on sarcophagi and tombs, of which a considerable number belonging to the 3d and 6th centuries are known, among them the sarcophagus of Junius Bassus, the præfect of Rome, who died in 359, soon after his conversion to Christianity—one of the most important remains of early Christian sculpture. The carvings in ivory, some of which may date back to the 4th century, also deserve mention. They were employed in the ornamentation of the diptychs (q. v.), and of chairs, book-covers, and other articles. Similar work was done in silver and gold, which metals were largely employed in the ornamenting of doors in churches, pulpits, etc.; but too little has been preserved to enable us to judge of its value in the light of art, and the fact of its having been used so largely as it was serves only to illustrate the craving of the Church for external pomp and show, and the coarse taste of a period which could delight in an excess of glittering tinsel.

The different works in relief which have been preserved to us from the early Christian period all resemble each other in character in the fact that they ignore the peculiar demands of the plastic art as completely as do the representations in color in the art of painting. Both arts were treated in the same spirit and style—a

style that was neither picturesque nor plastic, that did not aim at an organic blending of the diverse elements, nor yet at a modification of the antagonizing principles, but simply at a mechanical combination of the two by seizing on certain elements from either side and disregarding others—specifically the early Christian style. The two arts went hand in hand in the further development of this method; but sculpture appears to have fallen into a decline earlier than painting, since it would seem that only sculptures in stone were executed in Italy as early as the 7th century, and that all work in bronze was obtained from Constantinople. In Byzantium, too, the compromise of the council of 787, by which the Iconoclast controversy was brought to a close, hastened the decline of the art of sculpture by providing that only paintings and reliefs should be allowed in the churches, and that all statuary should be rigidly excluded.

The *Middle-age* style differs from that of the preceding period in that it no longer aims at a mechanical combination of the plastic and the picturesque, but executes all sculptures directly in the spirit and method peculiar to the painter's art. It therefore becomes as picturesque as the architecture of that age, and, like painting, dependent on it. But the further development of this style led sculptors involuntarily to a mode of apprehension and execution more in harmony with the special laws of their art, and thus gave rise to the *Romanesque* in sculpture, which starts out with the traditional old Christian types, but endeavors to impart to them more soul and feeling, and also a more natural form. The aim was not realized at once, but the effort to achieve it gave to the work accomplished something of that plastic character which early Christian art had so persistently perverted and ultimately wiped out. There are in Germany (on the so-called golden gate of the cathedral at Freiberg, in Saxony, and on the pulpit and altar of the church at Weichselburg) magnificent sculptures of this period, whose plastic beauty recalls to mind the masterpieces of antiquity. It is significant that Nicolo Pisano (about 1230), called the father of Italian sculpture, and, at all events, the leading sculptor of the Romanesque school in Italy, suddenly turned away from the old Christian (Byzantine) types and devoted himself to the study of the monuments of antiquity, at least with reference to form and apparel. The Romanesque style, however, was too much an exotic, and did not sufficiently reflect the ideas and tendencies of the Middle Ages to endure. The Gothic took its place, and with it came in a new era, inasmuch as both painting and sculpture turned directly to nature and to the actual world for their ideals. Figures in relief or in statues obtained greater individuality thereby, though beauty of form was entirely disregarded, and all emphasis was laid on adequate expression of the inner life. The plastic character of the sculptor's works was, of course, sacrificed by this method, and it was only natural that the aid of colors should be called in to transform all figures into statuary paintings; but as the Gothic style aimed primarily to express the fundamental truths of the Christian philosophy of the world and of the Christian moral life, and employed natural forms only as the vehicle of such expression, it was readily led to attach importance, in the end, to such beauty of physical form as would adequately represent the beauty of soul in which the ideal of its aspirations had been unified. The picturesque was, in consequence, so greatly modified in many of the later productions of this style that the æsthetical impression does not suffer in any way.

The *third* and most flourishing period in the history of Christian art is characterized by the conscious effort to bring works of art into thorough harmony with the forms and principles of growth in nature, and with the conditions and requirements of art in general, and of every branch of art in particular, so that, independently of tradition and the Church, it may represent the

Christian ideal with artistic freedom and with adequate beauty of form. Sculptors now sought to reconcile the Christian idea with the requirements of their art, special attention being given to works in relief and to a combination of high with low reliefs in their representations, as being most likely to secure the end in view. We can do little more in this place than mention a few of the more successful artists.

In Italy, the celebrated Lorenzo Ghiberti (born at Florence about 1380, died after 1455), one of the greatest masters of Christian sculpture, deserves special mention, as does also his talented rival, Donato di Betto Bardi (1383-1466), called Donatello, and Luca della Robbia (1440-81), and several other Venetian artists. At the beginning of the 16th century a number of masters appeared by the side of Leonardo da Vinci—the Florentines Giovanni Francesco Rustici and Andrea Contucci, and the Venetian Alonzo Lombardi—who succeeded in honoring the idealism of Christianity, and also in doing justice to the claims of realism to natural and living representation in sculpture. Their works fall below the greatest masterpieces in painting by Raphael only as they are unable to represent the transcendental side of Christianity, the transformation of the human into the divine, with equal clearness. Michael Angelo Buonarroti, however, soon displaced these masters in sculpture by the success he secured in his strivings after the grand, overpowering, and extraordinary, in which he paid but little attention to ideal beauty of form or to the requirements of plastic art. The result was that in the middle of the 16th century Italian sculptors had adopted a style which aimed chiefly at effect, and which was marred by ostentation and mannerisms, and often governed by a coarse naturalism.

German sculptors were not favored with the advantages secured to their Italian compeers by the possession of the models of antiquity; but their works nevertheless attained to a degree of perfection during this period which renders them not unworthy to be placed by the side of the products of Italian art. Various monuments of stone erected to the dead in the cathedral at Mayence and other Rhenish churches exhibit a depth and ingenuity of conception and a beauty of form in the sculptures executed by unknown hands in the 15th and 16th centuries which are worthy of special note. The principal work of German sculptors, however, was done in bronze. The Nuremberg artist family, of which Peter Vischer (died 1529) was the most celebrated member, is especially prominent. The best works of the latter artist (especially those in St. Sebald's Church at Nuremberg) will bear comparison with those of the Italian masters, and they even indicate a higher stage in the development of art in Germany than is apparent in the paintings of such masters as Dürer and Holbein, since the works of these artists fail to show that ideality of physical shape and formal beauty which art imperatively requires. But Vischer and a few colleagues stand almost alone, and the height upon which they stood was not maintained by their successors. A rapid decline took place, and by the middle of the 16th century German art, both sculpture and painting, had degenerated into a bare imitation of the Italian masters.

This point marks the transition to the fourth period in the history of Christian art. Great convulsions in the political and religious world gave rise to new impulses, but they affected sculpture less than painting. The products of the early part of this period display warmth of feeling and passion combined with a decidedly naturalistic treatment, in both of which qualities they violate not only the Christian ideal, but the spirit and nature of plastic art itself; and as these qualities show that sculpture and architecture (q. v.) were similarly affected by causes then at work, so the progress of events involved them in a similar degradation. In Italy, Lorenzo Bernini (1598-1680), celebrated both as a sculptor and an architect, an imitator of the style

of Michael Angelo, introduced the same forced style into sculpture which he had given to his buildings, and it became the fashion to affect the imposing and ostentatious, and by the use of all manner of curves and crooks to secure the idea of movement. France at once adopted the new style and added to it the feature of theatrical display. Spain, the Netherlands, and Germany clung to purer methods for a time, but in the 18th century likewise gave way to French taste and the *Rococo* style, which, from that point, increased in affected adornment, coquettish elegancies, and frivolous licentiousness.

A better spirit was aroused by Winckelmann's writings and a growing familiarity with the relics of antiquity. The painter Asmus Jacob Carstens (1754-98) was the first to gain a true conception of the beautiful, and left a number of drawings which are thoroughly penetrated by the spirit of antiquity. With his younger contemporary, Antonio Canova (1757-1822), that spirit entered again into the domain of sculpture, though as yet impure and showing traces of the French style. It is purer in the German Johann Heinrich von Dannecker (1758-1841), and best of all in the gifted Bertel Thorvaldsen (1770-1844). All that has been done, however, though much of it is excellent, serves only to afford further proof that the Christian ideal and the Greek style are irreconcilable with each other; and for this reason some sculptors (of Munich) have gone back to the position occupied by the great masters at the beginning of the 16th century. Nothing definite has been accomplished, and it remains for the future to determine whether Christian sculpture can be carried forward from that point to a higher perfection.

The only modern work dealing specially with the history of Christian sculpture that need be mentioned is Cicognara, *Storia della Scultura, dal suo Risorgimento in Italia sino al Secolo di Napoleone* (Venice, 1813, 3 vols.), much of whose matter is, however, already antiquated.

Sculdet(us), (*Schultz*), ABRAHAM, was born at Grumberg, in Silesia, Aug. 24, 1556, and went to Breslau in 1582. Obligated to leave on account of his father's loss of fortune, he took a situation as tutor in Freistadt, where he enjoyed the opportunity of hearing the sermons of Melancthon and of Abraham Bucholtzer. In 1584 he made a journey to Poland, and the year following to Görlitz, in Lusatia, where he remained two years, attending public lectures and reading private lectures to others. In the same manner he employed himself in the University of Wittenberg and Heidelberg, till he was admitted into the Church in 1594. Officiating in a village church for a few months, he was sent for by the elector to be one of his preachers. In 1598 he was appointed pastor of the Church of St. Francis, Heidelberg, and two years after became a member of the Ecclesiastical Senate. He was appointed court preacher about 1615, which position he retained until he accepted the professorship of divinity in 1618. After the battle of Prague he resolved to return to Heidelberg; but the fury of war had dispersed the students, and he retired to Emden in August, 1622, where he died, Oct. 24, 1625. His principal works are, *Confutatio Disputationis Baronii de Baptismo Constantini* (Neost. 1607, 4to):—*Annales Evangelii per Europam 15. Sæculi Renovati* (Heidelb. 1618, 8vo):—*Axiomata Concionandi* (Han. 1619, 8vo):—*Observationes in Pauli Epistolâ ad Timotheum, Titum, et Philemon*:—*Medulla Patrum* (1634, 4to).

Scum (חֶלֶדָּה, *chelâh*, strictly an *overlaying*), rather, *rust of a pot* (Ezek. xxiv, 6, 11, 12).

Scuophylacium (σκευοφυλάκιον), a recess near the altar corresponding with the mediæval "aumbrye," in which the chalice, paten, and every utensil employed in offering the eucharistic sacrifice were anciently placed immediately after mass. Reference is made to such a receptacle by the councils of Laodicea and Agatha.

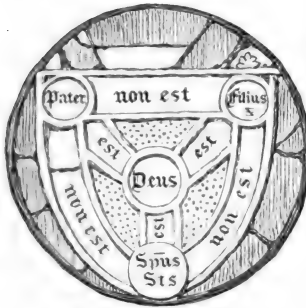

Scurvy (גָּרָב, *garab*, from גָּרַב, *to scratch*), scurf on the skin (Lev. xxi, 20; xxii, 22), perhaps of a malignant kind ("scab," Deut. xxviii, 27). So also the word גָּלְלֶפֶת, *gallépheth*, rendered "scabbed" (Lev. xxi, 20; xxii, 22), signifies a sort of itching *scab, scurf, tetter*, so called as sticking fast. See LEPROSY. The disease known by the name of scurvy in modern times is usually caused by long confinement in cold and damp climates, without fresh provisions, and a due quantity of acescent food. In the progress of the disease the skin becomes dry and scaly, livid spots appear, and the sufferer experiences great debility.

Scutocheon (old form, *scouchon*; Latin, *scutum* = a shield), besides signifying an escutcheon, is also an old name for the angles of buildings or parts of buildings, such as window-jamba, etc., but apparently for those only which are greater than right angles.

Scutum. See POME.

Scutum Fideli (*shield of faith*), a sacred device frequently represented in stone and wood carving,

on monumental brasses, in stained glass, and ancient paintings, in which the doctrines of the Trinity in Unity and the Unity in Trinity were set forth for the instruction of the faithful. The example in the accompanying wood-cut is from the south window of the south transept of Thame Church, Oxfordshire (1829). It has since disappeared.

Scutum Fidei.

Scylla, in Greek mythology, was the daughter of Typhon and Echidna, or of Neptune and the nymph Cratais. The descriptions of this marine monster are sufficiently striking, though they were never followed in the formative arts. Homer makes her to dwell by a rock which reached to the skies, and whose brow was constantly crowned with clouds. The mountain could not be scaled because of its smooth surfaces, and the monster was accordingly able to dwell undisturbed in the cavern which the waves had washed at its foot, and thence to inflict destruction on all who might approach. The giantess had twelve feet, which, however, were less dangerous than might be supposed, because they were

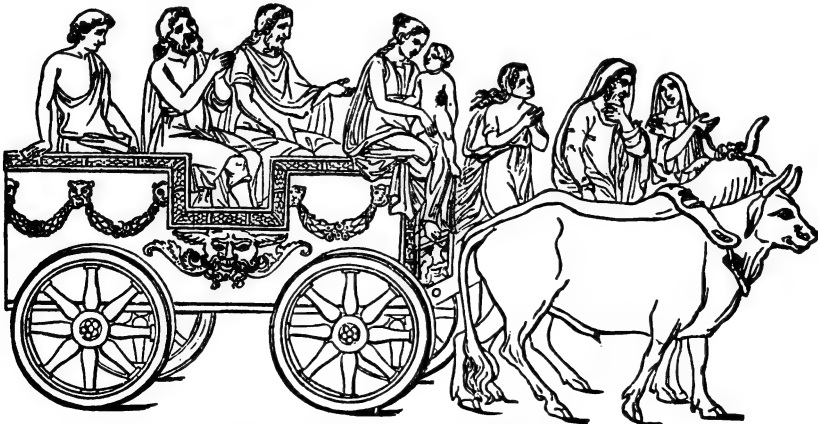

all fastened to the rock; but the horrible body had six long necks, surmounted by six terrible heads, which roared unceasingly under the impulse of hunger and ferocity. The mouth was armed with a triple row of teeth, and every form of creature afforded them a welcome prey. In the absence of other food, they seized on dolphins and seals, but if a ship drew near, it was obliged to sacrifice a portion of its crew. Ulysses came prepared for a conflict, and sought in every way to drive off the monster with spear-thrusts and poles, but was at length obliged to pay for the temerity which led him to navigate the Sicilian straits with the loss of six of his most faithful companions. These waters (between Italy and Sicily) were at that time regarded as impassable because of Scylla and Charybdis (*incidit in Scyllam cupiens vitare Charybdin*), one of which was certain to destroy the navigator. Their terrors are now altogether dissipated, and no fishing-boat dreads these monsters. Scylla is usually represented as a gigantic female figure with an oar raised as if to strike, the body ending in two dolphin tails.

Scyllis, in Greek mythology, was a celebrated architect, who was supposed to be the son of Dædalus by a paramour of unknown name, whose father lived at Gortys, in Crete. Many of the buildings in Sicily were attributed to him and his brother Dipænus.

Scyllius, in Greek mythology, was a surname of *Jupiter* in Crete.

Scythes, in Greek mythology, was a son of Hercules and Echidna.

Scyth'ian (Σκύθης) occurs in Col. iii, 11 as a generalized term for a rude, ignorant, degraded person. In the Gospel, says Paul, "there is neither Greek nor Jew, circumcision nor uncircumcision, barbarian, Scythian, bond nor free; but Christ is all and in all." It was anciently applied sometimes to a particular people, and sometimes to all the nomad tribes which had their seat to the north of the Black and Caspian seas, stretching indefinitely eastward into the unknown regions of Asia. It had thus much the same latitude as "Tartars," and was in like manner synonymous with Barbarian (Βάρβαρος). The same view of Scythian barbarism appears in 2 Macc. iv, 47 and 3 Macc. vii, 5, also in Josephus (*Cont. Apion.* ii, 37) and Parmenio (*ap. Athen.* v, 221). For other similar testimonies, see Wettstein, *Nov. Test.* ii, 292. The Scythians were, in fact, the ancient representatives of the modern Tartars, and, like them, moved from place to place in carts drawn by oxen. It is from this circumstance that they, or a tribe nearly allied to them, may be recognised on the monuments of Egypt. In the latter part of the 7th century B.C., they had become well known as a formidable power through the whole of Western Asia. Forced from their original quarters north of the Caucasian range by the inroads of the Mas-

Ancient Representation of a Scythian Family.

sagetae, they descended into Asia Minor, where they took Sardis (B.C. 629), and maintained a long war with the Lydian monarchs; thence they spread into Media (B.C. 624), where they defeated Cyaxares. They then directed their course to Egypt, and were bribed off by Psammetichus; on their return they attacked the Temple of Venus Urania at Ascalon. They were finally ejected B.C. 596, after having made their name a terror to the whole Eastern world (Herod. i, 103 sq.). The name of Scythopolis, by which Beth-shean was known in our Saviour's time, was regarded as a trace of the Scythian occupation (Pliny, v, 16). This, however, is doubtful. See SCYTHOPOLIS. The Hebrew records are silent respecting this Scythian invasion, though some scholars suppose it to be referred to by the prophets Joel and Zephaniah. The Scythians are described by classical writers as skilful in the use of the bow (Herod. i, 73; iv, 132; Xenoph. *Anab.* iii, 4, 15), and even as the inventors of the bow and arrow (Pliny, vii, 57); they were

A Scythian Horseman. (From the sculptures at Kertch.)

specially famous as mounted bowmen (*ἵπποτοξόται*, Herod. iv, 46; Thucyd. ii, 96); they also enjoyed an ill-fame for their cruel and rapacious habits (Herod. i, 106).

With the memory of these events yet fresh on the minds of his countrymen, Ezekiel seems to select the Scythians, under the name of Gog (q. v.), as the symbol of earthly violence, arrayed against the people of God, but meeting with a signal and utter overthrow. He depicts their avarice and violence (xxxviii, 7-18), and the fearful vengeance executed upon them (ver. 14-23) — a massacre so tremendous that seven months would hardly suffice for the burial of the corpses in the valley which should thenceforth be named Hamon-gog (xxxix, 11-16). The imagery of Ezekiel has been transferred in the Apocalypse to describe the final struggle between Christ and Antichrist (Rev. xx, 8).

As a question of ethnology, the origin of the Scythians presents great difficulties. Many eminent writers, with Niebuhr and Neumann at their head, regard them as a Mongolian, and therefore a non-Japhetic, race. It is unnecessary for us to enter into the general question,

1. A Scythian Footman; 2. A Scythian General.

which is complicated by the undefined and varying applications of the name Scythia and Scythians among ancient writers. So far as the Biblical notices are concerned, it is sufficient to state that the Scythians of Ezekiel's age—the Scythians of Herodotus—were in all probability a Japhetic race. They are distinguished, on the one hand, from the Argippæi, a clearly Mongolian race (Herod. iv, 23), and they are connected, on the other hand, with the Agathyrsi, a clearly Indo-European race (ibid. iv, 10). The mere silence of so observant a writer as Herodotus as to any striking features in the physical conformation of the Scythians must further be regarded as a strong argument in favor of their Japhetic origin. For the geographical and ethnographical relations of the term, see Smith, *Dict. of Class. Geog.* ii, 936-945. Perhaps it may be inferred from Col. iii, 11 that there were Scythians also among the early converts to Christianity. Many of this people lived in Greek and Roman lands, and could have heard the Gospel there, even if some of the first preachers had not already penetrated into Scythia itself. See *Nat. Quar. Rev.* Dec. 1876; *Jour. Sac. Lit.* April, 1853.

Scython, in Greek mythology, was a man whom the poets represent as possessed of the ability to change his sex at will.

Scythopolis (Σκυθῶν πόλις; Peshito-Syriac, *Beisân*; Vulg. *civitas Scytharum*), that is, "the city of the Scythians," occurs in the A. V. of Judith iii, 10 and 2 Macc. xii, 29 only. In the Sept. of Judg. i, 27, however, it is inserted (in both the great MSS.) as the synonym of Beth-shean (q. v.), and this identification is confirmed by the narrative of 1 Macc. v, 52, a parallel account to that of 2 Macc. xii, 29, as well as by the repeated statements of Josephus (*Ant.* v, 1, 22; vi, 14, 8; xii, 8, 5). He uniformly gives the name in the contracted shape (Σκυθόπολις), in which it is also given by Eusebius (*Onomast.* passim), Pliny (*H. N.* v, 18), Strabo (xvi), etc., and which is inaccurately followed in the A. V. Polybius (v, 70, 4) employs the fuller form of the Sept. Beth-shean has now, like so many other places in the Holy Land, regained its ancient name, and is known as *Beisân* only. A mound close to it on the west is called *Tell Shûk*, in which it is perhaps just possible that a trace of Scythopolis may linger. But although there is no doubt whatever of the identity of the place, there is considerable difference of opinion as to the origin of the name. The Sept. (as is evident from the form in which they present it) and Pliny (*H. N.* v, 16) attribute it to the Scythians, who, in the words of the Byzantine historian George Syncellus, "overran Palestine and took possession of Baisan, which from them is called Scythopolis." This has been in modern times generally referred to the invasion recorded by Herodotus (i, 104-106), when the Scythians, after their occupation of Media, passed through Palestine on their road to Egypt (about B.C. 600—a few years before the taking of Jerusalem by Nebuchadnezzar), a statement now recognised as a real fact, though some of the details may be open to question (Rawlinson's *Herod.* i, 246). It is not at all improbable that either on their passage through, or on their return after being repulsed by Psammetichus (Herod. i, 105), some Scythians may have settled in the country (Ewald, *Gesch.* iii, 694, note); and no place would be more likely to attract them than *Beisân*—fertile, most abundantly watered, and in an excellent military position. In the then state of the Holy Land they would hardly meet with much resistance. See SCYTHIAN.

Reland, however (apparently incited thereto by his doubts of the truth of Herodotus's account), discarded this explanation, and suggested that Scythopolis was a corruption of *Succothopolis*—the chief town of the district of Succoth. In this he is supported by Gesenius (*Notes to Burckhardt*, p. 1058) and by Grimm (*Ereg. Handbuch* on 1 Macc. v, 52). Since, however, the objection of Reland to the historical truth of Herodotus is

now removed, the necessity for this suggestion (certainly most ingenious) seems not to exist. The distance of Succoth from Beisán, if we identify the former with *Sakút*, is ten miles; while if the arguments of Mr. Beke are valid, it would be nearly double as far. It is surely gratuitous to suppose that so large, independent, and important a town as Beth-shean was in the earlier history, and as the remains show it to have been in the Greek period, should have taken its name from a comparatively insignificant place at a long distance from it. Dr. Robinson (*Bib. Res.* iii, 330) remarks with justice that had the Greeks derived the name from Succoth, they would have employed that name in its translated form as *Σκπηαί*, and the compound would have been Scenopolis. Reland's derivation is also dismissed without hesitation by Ewald, on the ground that the two names Succoth and Skythes have nothing in common (*Gesch.* iii, 694, note). Dr. Robinson suggests that, after all, *City of the Scythians* may be right, the word *Scythia* being used, as in the New Test., as equivalent to a barbarian or savage. In this sense he thinks it may have been applied to the wild Arabs, who then, as now, inhabited the Ghôr, and at times may have had possession of Beth-shean.

The Canaanites were never expelled from Beth-shean, and the heathen appear to have always maintained a footing there. It is named in the Mishna as the seat of idolatry (*Aboda Zara*, i, 4), and as containing a double population of Jews and heathens. At the beginning of the Roman war (A.D. 65), the heathen rose against the Jews and massacred a large number, according to Josephus (*War*, ii, 18, 3) no less than 13,000, in a wood or grove close to the town. Scythopolis was the largest city of the Decapolis, and the only one of the ten which lay west of Jordan. By Eusebius and Jerome (*Onomast.* s. v. "Bethsan") it is characterized as *πόλις ἐπιδημος* and *urbs nobilis*. It was surrounded by a district of its own the most abundant fertility. It became the seat of a Christian bishop, and its name is found in the lists of signatures as late as the Council of Constantinople, A.D. 536. The latest mention of it under the title of Scythopolis is probably that of William of Tyre (xxii, 16, 26). He mentions it as if it was then actually so called, carefully explaining that it was formerly Bethshan. See BETH-SHEAN.

Sea (Heb. יָם, *yâm*; Chald. יַמְמָא, *yammâ*; ὁ ἁλῶσα, as opposed to land or earth (ἄλῆς, *êrets*, Gen. i, 10), in which all the waters of the earth are included, originated by the separation of its waters from those of the air, or the clouds (ver. 6 sq.). The sea is represented as deep (Psa. lxxviii, 23; Micah vii, 19; Amos ix, 3; Job xxxviii, 16), wide (xi, 9), and mighty (Psa. civ, 25; Job vii, 12; Lament. ii, 13); surrounding the earth at its utmost bounds (Deut. xxx, 13; Psa. cxxxix, 9; comp. the ancient Greek view of *oceanus*, ὠκείανος, Fubiger, *Handb. d. alt. Geogr.* i, 4); the earth, indeed, resting on the ocean (Psa. xxiv, 2). The surface (comp. βυθός, *the deep*, 2 Cor. xi, 25) is roused by winds (Dan. vii, 2; comp. Jonah i, 11, 13) into waves (צָפוּף, Psa. lxxv, 8; cvii, 25; Isa. lxxviii, 18; κύματα, Jude 13; κλύδων, James i, 6), so that it roars and rages (Jer. vi, 23; i, 42; Isa. v, 30; lvii, 20; Psa. xcvi, 11; 1 Chron. xvi, 32), and is only subject to God (Job xxxviii, 11; Psa. lxxxix, 10). The countless inhabitants of the sea (James iii, 7; Rev. viii, 8 sq.) are given to men for food (Gen. ix, 2 sq.), but the people of God may only eat those which are legally clean (Lev. xi, 9 sq.). On the coasts of the sea (Heb. *samah*, שָׁמַיִם) lie great lands; and the *sand of the sea* (חֵרֶץ; Gr. ἄμμος) is proverbial for multitude (Gen. xxii, 17; Josh. xi, 4; 2 Sam. xvii, 11; Job xxix, 18; Hos. i, 10; 1 Macc. xi, 1; Rev. xx, 8, etc.; Homer, *Iliad*, ix, 885; Callim. *Dian.* p. 252; Ovid, *Trist.* iv, 1, 55; *Ars Am.* i, 254. Comp. Pindar, *Olymp.* ii, 178; Calpurn. ii, 72. See also Gesen. *Thesaur.* p. 598 sq.).

It may be remarked that almost all the figures of

speech taken from the sea in Scripture refer either to its power or its danger, and among the woes threatened in punishment of disobedience, one may be remarked as significant of the dread of the sea entertained by a non-seafaring people, the being brought back into Egypt "in ships" (Deut. xxviii, 68). The national feeling on this subject may be contrasted with that of the Greeks in reference to the sea. No mention of the tide is found in Scripture.

The above Heb. word, יָם, *yâm*, is sometimes connected with יְהוֹם, *tehom* (ἄβυσσος, *abyssus*, "the deep," Gen. i, 2; Jonah ii, 5). It also means the *west* (Gesen. *Thesaur.* p. 360, 598). When used for the sea, it very often, but not always, takes the article. Other words for the sea (in the A. V. "deep") are: מְצוּלָה, *metzulâh*, or מְצוּלָה, *metzulâh* (only in the plural), or מְצוּלָה, *tsulâh* simply (ἄβυσσος, βάθος, *abyssus*, *profundum*); מַבְבִּיל, *mabbûl* (κατακλυσμός, *diluvium*, "water-flood," Psa. xxix, 10). Smaller pools were distinguished into אֲגָם, *agâm*, a natural pool or pond (cvii, 35; cxiv, 8; Isa. xxxv, 7; xli, 18, etc.), and בְּרֵכָה, *berekâh*, the same as the Arabic *birkah*, an artificial pool or reservoir (2 Sam. ii, 13; iv, 12; Nahum ii, 9).

The following are the applications of the term *yâm* in Scripture:

1. The "gathering of the waters" (*yammin*), encompassing the land, or what we call in a more or less definite sense "the Ocean." In this sense the term is used in Gen. i, 2, 10, and elsewhere, as Deut. xxx, 13; 1 Kings x, 22; Psa. xxiv, 2; Job xxvi, 8, 12; xxxviii, 8; see Homer, *Iliad*, xiv, 301, 302; Hesiod, *Theog.* 107, 109; and 2 Pet. iii, 5.

2. The word is used, with the article, of some definite part of the great circumambient water, viz.:

(a.) Of the *Mediterranean Sea*, called the "hinder" (אַחֲרֵי, *achar*), the "western," and the "utmost" sea (Deut. xi, 24; xxxiv, 2; Joel ii, 20); "sea of the Philistines" (Exod. xxi, 31); "the great sea" (Numb. xxxiv, 6, 7; Josh. xv, 47); "the sea" (Gen. xlix, 13; Psa. lxxx, 11; cvii, 23; 1 Kings iv, 20, etc.). See MEDITERRANEAN.

(b.) Also frequently of the *Red Sea* (Exod. xv, 4; Josh. xxiv, 6), or one of its gulfs (Numb. xi, 31; Isa. xi, 15), and perhaps (1 Kings x, 22) the sea traversed by Solomon's fleet. See RED SEA.

The place "where two seas met" (τόπος ὁ δι᾽ ἁλῶσος, Acts xxvii, 41) is explained by Conybeare and Howson as a place where the island Salmonetta, off the coast of Malta, in St. Paul's Bay, so intercepts the passage from the sea without to the bay within as to give the appearance of two seas, just as Strabo represents the appearance of the entrance from the Bosphorus into the Euxine; but it seems quite as likely that by the "place of the double sea" is meant one where two currents, caused by the intervention of the island, met and produced an eddy, which made it desirable at once to ground the ship (Conybeare and Howson, ii, 423; Strabo, ii, 124).

3. The term is also applied to the great internal lakes of Palestine, whether fresh or salt; e.g.

(a.) *The Sea of Chinnereth*, יָם כִּנְרֶת (Numb. xxxiv, 11), called in the New Test. "the Sea of Galilee" (Matt. iv, 18), the "Sea of Tiberias" (John xxi, 1), and "the sea (or lake) of Gennesareth" (Matt. xiv, 34; Mark vi, 53; Luke v, 17), which last is but a variation of the Hebrew name. See GALILEE, SEA OF.

(b.) *The Dead Sea*, called in Scripture the *Salt Sea*, יָם הַמֶּלַח (Gen. xiv, 3), the *Sea of the Plain*, or the *Arabah*, יָם הַהַרְרָה (Deut. iv, 40), and the *Eastern Sea*, יָם הַהַרְרָה (Joel ii, 20; Ezek. xlvii, 18; Zech. xiv, 8). It is not named or alluded to in the New Test. It is called by Josephus (*War*, iii, 10, 7) λίμνη Ἀσφαλτιτης, by which name, or in the Latin form of *Lacus Asphaltites*, it was known to the classical writers. See SALT SEA.

(c.) *The Lake Merom* is named once only in Script-

ure, where it is called מֵי מְרוֹם, *waters of Merom* (Josh. xi, 5, 7). By Josephus it is called *Semechonitis* (Σεμεχωνίτις, *Ant.* v, 5, 1), and at present bears the name of *Huleh*: this is the uppermost and smallest of the three lakes on the Jordan. See **MEROM**.

4. The term *yām*, like the Arabic *bahr*, is also applied to great rivers, as the Nile (Isa. xix, 5; Amos viii, 8, A. V. "flood;" Nahum iii, 8; Ezek. xxxii, 2) and the Euphrates (Jer. li, 36). See Stanley, *Syr. and Pal.* App. p. 533; Hackett, *Illust. of Script.* p. 119.

5. Finally, the great copper (יָהֳשֵׁבֶרֶת) or molten (מִצָּק) laver, which stood in the court of Solomon's Temple, is called a *yām* (1 Kings vii, 23-44; 2 Kings xvi, 17, etc.). See **BRAZEN SEA**; **LAVER**.

Sea, Molten. See LAVER.

Seabury, SAMUEL, D.D., an efficient Episcopal minister, and afterwards bishop of Connecticut, was born at Ledyard, Groton, Conn., Nov. 30, 1729, and received his degree of A.B. at Yale College in 1748. In 1751 he went to Scotland, and was ordained in London in 1758. On his return to America, he was successively rector of Christ's Church, New Brunswick, N. J.; Grace Church, Jamaica, Long Island, N. Y.; and St. Peter's Church, Westchester; and in 1764 was made A.M. by Columbia College, and D.D. by Oxford University, England. During the Revolutionary war he acted for a time as chaplain to the British army, and in 1783 was chosen bishop and went to England for consecration. Not being successful, he went to Scotland, where his application was granted, in 1784 at Aberdeen, which was thus the cradle of the American Episcopal Church. On his return he was made rector of St. James's Church, New London, Conn., where he published *A Communion Office*, and aided in a general organization of the Episcopal Church of the United States. He died Feb. 25, 1796. His publications comprise *Charges, Sermons, and Addresses*:—*The Communion Office*, etc.:—*The Duty of Considering our Ways*:—*Discourses on Several Subjects* (1791, 2 vols.):—*An Earnest Persuasive to the Frequent Receiving of the Holy Communion* (republished, 1816). See Sprague, *Annals of the Amer. Pulpit*, v, 149.

Seager, Micah, a minister of the Methodist Episcopal Church, was born in Simsbury, Conn., in July, 1800, and was converted in 1816. In 1818 he was received on trial by the Genesee Conference, in which he performed more than thirty years of active service. He was superannuated in 1854, and held that relation until his death, May 26, 1872. See *Minutes of Annual Conferences*, 1872, p. 115.

Seager, Schuyler, D.D., a minister and educator of the Methodist Episcopal Church, was born in Simsbury, Conn., July 26, 1807. He graduated from the Wesleyan University, Middletown, in 1836, and took his degree of M.A. in 1839. After his graduation he became principal of the Genesee Wesleyan Seminary, N. Y., and held that position until 1844. He was employed in the pastorate from 1844 to 1853, and spent the next six years as principal of Genesee Wesleyan Seminary and Dansville Academy. He then returned to the pastoral work, in which he continued until his death. Among the churches he served were the First Church and Asbury, Rochester; Pearl Street and Grace, Buffalo; Lockport, and Batavia. He was a delegate to the general conferences of 1844 and 1848. At the time of his death he was a member of the Western New York Conference. See *Minutes of Ann. Conferences*, 1875, p. 158.

Seah (סֵאָה, *sēāh*, from the obsolete סֵאָה, *sāh*, to expand), a Hebrew measure, properly for grain (A. V. always "measure;" Gen. xviii, 6; 1 Sam. xxv, 18; 1 Kings xviii, 32; 2 Kings vii, 1, 16, 18); containing, according to the rabbins, the third of an ephah, i. e. nearly one and a half pecks English; according to Jerome (*On Matt. xiii, 33*), a *modius* and a half. From the Aramæan form has sprung the *śārov* of the Sept., New Test., and Josephus. See **METROLOGY**.

Seal (חוֹתָם, *chothām*, σφραγίς). The seal, together with the staff, has been in the East from the earliest times (Gen. xxxviii, 18) the favorite trinket of the men (see Cant. viii, 6; Hag. ii, 23; Jer. xxii, 24; Sir. xvii, 22; comp. Rosenmüller, *Morgenl.* vi, 252). Both are included in the attire of the Babylonians (Herod. i, 195; Strabo, xvi, 746). It was attached, as still in Persia, by a cord, and worn upon the bosom or in a finger-ring on the right hand (Gen. xli, 42; Esth. iii, 10, 8; viii, 2; Jer. xxii, 24; comp. Chardin, iv, 23; v, 454 sq.; Robinson, i, 58, and see especially Longus, *De Annul. Sign.* [Mail. 1615; Lips. 1709]). The art of graving seals is an ancient one (Exod. xxviii, 11). The seal usually contains no figures (yet see the drawing of one found at Cusa, in Ker Porter, *Trav.* i, 425, pl. lxxx, 2), but simply

Ancient Seals. (From originals in British Museum.)

1. Signet cylinder.
2. Signet cylinder of Sennacherib.
3. Seal of chalcedony, with Phœnician inscription.
4. Seal of sapphire chalcedony, with Assyrian inscription.
5. Seal of chalcedony, with Persian inscription.
6. Seal in form of a duck with the head resting on the back.
7. Clay impression from seal of Eazarhaddon. (From Koyunjik.)
8. Clay impression from seal—device, ear of wheat. (From Koyunjik.)
9. Clay impression from seal—device, a scorpion. (From Koyunjik.)

the name of the wearer, sometimes with a sentence from the Koran, and it is customary to give an impression of it instead of a signature (Chardin, i, 289, 355; iii, 112, 362, 366, with plates; Olearius, *Trav.* p. 633; Rosenmüller, *Morgenl.* iii, 205 sq. Comp. Curtius, iii, 6, 7; Herod. iii, 128). For this purpose the seal is moistened with a kind of black ink (Harmer, *Obs.* ii, 468, 470; iii, 478); but in sealing letters (1 Kings xxi, 8; comp. Josephus, *Life*, p. 44), bags (Job xiv, 17), and sacks (Mishna, *Shabb.* viii, 5), as well as doors, clay or sealing-earth was used (*ibid.*). Among the Jews the women also carried seal-rings (*ibid.* vi, 3). Eastern princes confer the dignity of minister or regent by the delivery of the state-seal, or a seal-ring (Gen. xli, 42; Esth. iii, 10; viii, 2; 1 Macc. vi, 15; comp. Curtius, x, 5, 4; Aristoph. *Eq.* 947; see Schulz, *Leitung*, iv, 218 sq.; Tournefort, *Voyage*, ii, 383), and sometimes they invested successors in the same manner (Josephus, *Ant.* xx, 2, 3). In the later language of the Jews the word *chothām* meant a counter or token, perhaps with a seal. Such were used in the second Temple (Mishna, *Shekal.* v, 3 sq.), and a special officer of the seals was stationed there (*ibid.* v, 1). See **RING**.

The seal, with the owner's name or some other device engraven upon it, was usually employed to authenticate public or private documents. Seals for this purpose, made of burned clay, or of copper, silver, gold, or precious stones set in metal, were anciently used in the East. Sometimes the signet-ring was used for this purpose (Gen. xxxviii, 18; Jer. xxxii, 10). If a door had to be sealed, it was first fastened with some ligament, over which was placed some well-compacted clay,

and then impressed with the seal, so that any violation of it would be discovered at once (Job xxxviii, 14; Sol. Song iv, 12; Matt. xxvii, 66). Important documents were sometimes put in sealed bags and enclosed in earthenware vessels for greater security (Deut. xxxii, 34; Jer. xxxii, 14; Job xiv, 17). The seal, if a cylinder, was rolled on the moist clay, hence Job says, "it is turned as clay to the seal" (xxxviii, 14); and sometimes the tablet or impression was placed in the furnace and baked. The term "sealed" is sometimes used figuratively for that which is *permanent* (Isa. viii, 16) and *confirmed* (John vi, 29; Rom. iv, 11), also for that which is to be *kept secret* until the appointed time (Dan. viii, 26; xii, 4, 9). So also the "book or roll sealed with seven seals" symbolized the plan of the divine government, which is *impenetrable* to every creature, but fully comprehended by the Saviour, who is exalted to the throne of the universe (Rev. v, 2-8). The "seal of the living God," on which is supposed to be engraven the name of "Jehovah," which was impressed upon the foreheads of the faithful, symbolizes the indwelling of the Holy Spirit (vii, 2-17; Ephes. i, 13, 14; vi, 30; 2 Cor. i, 22; Ezek. ix, 4, 6; 2 Tim. ii, 19). See **SIGNET**.

SEAL, ABBATIAL, is the official formal seal of an abbot.

SEAL, CONSECRATION OF AN EPISCOPAL. It was customary in many parts of the Church during the Middle Ages to consecrate the seal of a newly made bishop with his vestments and other episcopal insignia. The form of consecration was simple, the seal being blessed with holy-water. At the death of the bishop, his seal or seals (for he had usually more than one) were carefully destroyed.

SEAL, DECANAL, is the official formal seal of the dean of a cathedral or collegiate church.

SEAL (ECCLESIASTICAL USE OF), a piece of metal or other hard substance, e. g. bone or ivory, usually round or elliptical, on which is engraved some device, used for making impressions on wax. The wax set or affixed to an ecclesiastical or legal instrument, duly impressed or stamped with a seal, is likewise designated by the same term. The use of seals as a mark of authenticity to letters and other instruments in writing is very ancient, and was allowed to be sufficient without signing the name, which few could do of old. In 1287, owing to the prevalence of forgeries and the absence of public notaries in England, abbots, priors, deans, archdeacons, their officials and rural deans, capitular bodies, colleges, and convents, were required to have seals. If the office was perpetual, then the name of the man who bore it was engraved on the seal; but rural deans and officials whose office was temporary, had only the name of their office engraved upon it. They resigned their seals at the expiration of their tenure to him by whom they had been commissioned. The name seal is also given to the little stone which covers the sepulchre of relics in an altar.

SEAL, EPISCOPAL, is the official formal seal of a bishop, attached to letters of orders, licenses, deeds of institution, induction, degradation, and other documents. They represent the arms of the diocese, impaled with the personal arms of the bishop. Bishops commonly have two official seals—a large and a small one. These, in England, on their death, are sent to Lambeth Palace to be defaced and destroyed under the direction of the archbishop's official.

SEAL OF BAPTISM. Baptism was often called, in the early Church, "the seal of the Lord," "the seal of Christ," with allusion, perhaps, to Eph. i, 13: iv, 30; John iii, 33, and other similar passages, especially 2 Cor. i, 21, 22. This use of the word is taken from the circumstance that the stamp or impression of a seal upon anything was regarded as a mark of property, or a token that it belonged to a certain owner, namely, the person whose seal it bore. Thus Gregory of Nazianzum (*Orat.*

40) calls baptism the seal and sign of sovereignty, or the token that the baptized person was subject to the dominion and government of God, and lived to obey his will. See Riddle, *Christian Antiq.* p. 484.

SEAL OF CONFESSION, a name for the obligation on a priest never to reveal the secrets of the confessional. See Lee, *Gloss. of Liturgical Terms*, s. v.; Walcott, *Sac. Archaeol.* s. v.

Sealed Books, certain printed copies of the revised Anglican Prayer-book, as settled at the Savoy Conference, issued A.D. 1662, which, having been examined by the commissioners appointed for that purpose, were certified by them to be correct. They were ordered by Parliament to be preserved in certain cathedral and collegiate churches. A folio reprint of the *Sealed Book* was issued by Pickering (1844), and again by Masters (1848, 8vo). See Lee, *Gloss. of Liturgical Terms*, s. v.

Seal-skin. See **BADGER**.

Seam occurs in Scripture only in the epithet ἀπάρτος, "without seam," applied to our Saviour's inner garment ("coat"), which the soldiers at his crucifixion accordingly cast lots for (John xix, 23). Monographs on this fact are cited by Volbeding, *Index Programmatum*, p. 60.

Seaman, RICHARD, a minister of the Methodist Episcopal Church, was born April 28, 1786. He studied medicine, and was admitted to practice in New York when about nineteen. He became a Christian in 1812, and in 1823 was received into the New York Conference, and was regularly appointed until 1845, when he was obliged to take a superannuated relation. He continued to labor as his strength would permit, but for the last thirteen years of his life was a great sufferer from rheumatism. He died Nov. 6, 1864. He was a man of superior judgment, stern integrity, untiring energy, modest, generous, and evangelical. See *Minutes of Annual Conferences*, 1865, p. 100.

Sea-monster is the rendering in Lam. iv, 3 of the Heb. תַּנִּין, *tan*, where the margin has "sea-calves." The root of the word is תָּנָן, *tanán*, "to stretch out," hence it seems to apply to a slim creature that extends itself, and some think it to mean a kind of serpent. Others would render it "jackal." It is variously rendered in the A. V. ("whale," "serpent," etc.), nor is it probable that it was very definite in its application. See **DRAGON**.

Sear occurs in Scripture only in the rendering of the word καυτηράζω, to *brand* ("sear with a hot iron"), in a tropical sense of the conscience (1 Tim. iv, 2). To sear the flesh is to cauterize or burn it, and thus deprive it of the power of sensation. In 1 Tim. iv, 2 the term denotes the effect of habitual sin, by which the conscience becomes so stupefied as to be insensible to the most enormous guilt and the most fearful threatenings of punishment. See **BURNING**.

Searle, Jeremiah, a (Dutch) Reformed minister, was born at Atkinson, N. H., in 1795. He was educated in part at Bowdoin College, Me., and graduated at Union College, N. Y., in 1820. He studied theology with Dr. Andrew Yates, and was licensed by the Congregational Association of Vermont in 1823. His ministerial life was spent in the following Reformed churches: Rotterdam, N. Y., 1823-25; Cossackie, 1825-51; Keyport, N. J., 1851-53; Fallsburgh, N. Y., 1853-61. He was a man of great sweetness of spirit, amiable and beloved; a minister and a workman who needed not to be ashamed; studious, careful in preparation, practical and experimental in preaching; solemn, and yet cheerful, in manner; catholic in his sentiments, yet firm in the faith. He was president of the General Synod in 1850. He died in 1861. His ministry was marked by truly missionary labors, and crowned with two notable revivals of religion. See Corwin, *Manual of the Ref. Church*. (W. J. R. T.)

Searle, Moses C., a Presbyterian minister, was born in Byfield, Mass., Sept. 17, 1797. He graduated at the College of New Jersey, Princeton, in 1821, and at the Theological Seminary in that place in 1824; was licensed by the New Brunswick Presbytery, and, going East, began his labors in Grafton, Mass., being ordained by Newburyport Presbytery in 1826 as pastor of the Congregational Church, Grafton. He subsequently labored in New Hartford, N. Y.; Dorset, Vt.; Haverhill, N. H.; Bradford, and Byfield, Mass., where he died, Dec. 10, 1865. Mr. Searle was a man of deep piety and affectionate disposition, an excellent pastor and good preacher. See Wilson, *Presb. Hist. Almanac*, 1868, p. 226. (J. L. S.)

Searles, ISAAC, a minister of the Methodist Episcopal Church, was born in Hartford, Conn., Oct. 30, 1816, removed to Ohio at an early age, and professed conversion in his seventeenth year. He was received on trial into the Rock River Conference, Aug. 25, 1841; ordained deacon in 1843, and elder in 1845. In 1848 the Wisconsin Conference was formed, and Mr. Searles became one of its members. He was superannuated for a short time, but became effective in 1852; superannuated in 1866, and active in 1867. His last appointment was Brandon, Wis., where he died, Dec. 8, 1870. See *Minutes of Annual Conferences*, 1871, p. 273.

Sears, Allen, a Methodist Episcopal minister, was born in New York State in 1806, received on trial in the Kentucky Conference in 1838, appointed to Taylorsville Circuit as junior preacher, and continued to travel within the bounds of that conference for seven years successively. In 1845 he was transferred to the Indiana Conference, and appointed to Vincennes Station; in 1846, to Spencer Circuit. He died Dec. 4, 1846. He was a man of very strong faith, deep piety, a truly evangelical preacher, and a good pastor. See *Minutes of Annual Conferences*, iv, 185.

Sears, Clinton W., a minister of the Methodist Episcopal Church, was born in Chautauqua County, N. Y., April 27, 1819. He was educated at Yale College and Middletown Wesleyan University. He was a member of the Cincinnati Conference, and had occupied several responsible stations, when, in 1862, he was appointed chaplain of the Ninety-fifth Regiment of Ohio Volunteers. He was seized while in service with the camp dysentery, and returned to his home, July 15, 1863, and died Aug. 25, 1863. Mr. Sears was a good scholar, an able preacher, and a faithful pastor. See *Minutes of Annual Conferences*, 1863, p. 148.

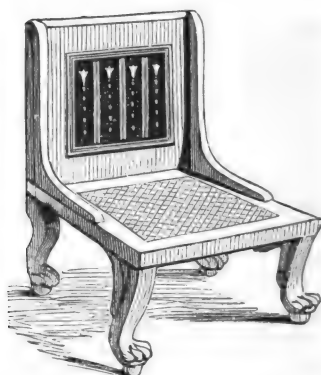

Season (properly **סָעוֹן**, a fixed time; *καὶρός*, often rendered "time" in general, and not specific of a portion of the year). The general division of the year by the Hebrews was into two seasons, "Summer and Winter" (Psa. lxiv, 17; Zech. xiv, 8); but they appear also to have conveniently divided the year into six special seasons: "seed-time and harvest, and cold and heat, and summer and winter" (Gen. i, 14; viii, 22). The same division obtains among many Oriental nations, as the Hindûs and Arabians, at this day. According to this division of the seasons in Palestine, they would seem to have been distributed in the following order: *Summer*, from the middle of August to the middle of October; *Seed-time*, from the middle of October to the middle of December; *Winter*, from the middle of December to the middle of February; *Cold*, from the middle of February to the middle of April; *Heat*, from the middle of April to the middle of August. See AGRICULTURE.

Seasons, CANONICAL. See FESTIVALS.

Seat (usually some form of **יָשֵׁב**, *yashâb*, to sit; *κάθεδρα*). There is no mention made of chairs in the Old Test., but seats of various kinds are named. (1.) **כִּסֵּא**, *kissêh* (from **כָּסָה** *kasâh*, to cover, also occurring twice, Job xxvi, 9; 1 Kings x, 19, in the form **כִּסִּי**), is a throne, a royal throne, as in Deut. xvii, 18:

2 Sam. viii, 13, or the elevated seat of the high-priest, 1 Sam. i, 9; iv, 18, but is sometimes applied to a seat in general, though usually with some honorary distinction, as 1 Sam. ii, 8; Isa. xxii, 23. See THRONE. (2.) **מוֹשָׁב** (*môshâb* from **יָשַׁב**, *yashâb*, to sit), means any seat, as 1 Sam. xx, 18, 25; Job xxix, 7, hence the site of a city, 2 Kings ii, 19; an assembly or session, as Psa. i, 1, and the dwelling of men, Gen. xxv, 49, and often. (3.) The word **תִּכְוֶה** (*tekuvâh* from **תָּכַן** *takân*, to weigh), is rendered "seat" in the A. V., Job xxiii, 3, but means rather dwelling, abode. (4.) Finally, **שִׁבְתָּה** (*shêbeth*, from **יָשַׁב**, see No. 2, above), used substantively, as in Amos vi, 3.

Orientalists usually seat themselves upon mats or carpets on the floor. In the houses of the wealthy there are spread pillows, or cushions, stuffed with cotton; and sometimes broad low sofas, or divans, are used, with arms, stuffed cushions, and costly ornaments. Upon these divans, as well as upon the floor, they sit with the legs bent under, and crossed in a half-kneeling posture. Among some of them Europeans have even introduced chairs. The Ancient Egyptians had chairs and ottomans in great variety and of the most elegant forms,

Ancient Egyptian Chair. (Now in the British Museum.)

much in the modern fashion (Wilkinson, *Anc. Egypt*, i, 58 sq.); and no doubt the wealthy Hebrews imitated them. See HANDICRAFT. In later times the Hebrews adopted the custom of reclining upon couches at table (1 Sam. ix, 22; Amos vi, 4; Esth. vii, 8; Matt. xxiii, 6; Luke vii, 37, 38). Among the Romans a chair of a particular form was used by the magistrates when administering justice, and this is called "the judgment-seat" (Matt. xxvii, 19; Acts xviii, 12, 16; Rom. xiv, 10). See JUDGMENT-SEAT.

The place in which a person is seated regulates, in Eastern nations, the degree of rank or precedence which he claims for himself or receives from others. In Persia the distance from the throne within which the dignitaries of the court and nobles may sit is regulated by the strictest etiquette. The same particularity is observed in every department of public and private life, in the formal divan, in the social feast, and even in the retirement of the domestic chamber. To this peculiarity there are many allusions in Scripture: thus "the seat of Moses," in which the scribes and Pharisees sat, expresses metaphorically the dignity which belonged to their office as teachers or expounders of the law; "the seat of honor," to which allusion is made in the Apocrypha, was the highest seat in the synagogue so much coveted by the Pharisees. Thrones are mentioned only in reference to deity or sovereignty; every other kind of dignity is determined by the seat. It was usual for persons who were greatly respected to be employed as judges or arbitrators; and for such seats were provided in some public place, round which the people respectfully stood, paying the most respectful reverence to the

person deemed worthy of occupying the seat. See ARTITUDE.

Se'ba (Heb. *Seba'*, סֶבָא; Sept. Σαβά, occasionally Σοῦρη, v. r. in Chron. Σαβάρ), the oldest son of Cush (B.C. cir. 2500), and hence a country and people among the Cushites (Gen. x, 7; 1 Chron. i, 9), named in connection with Egyptians, Cushites, and Arabians (Sabæans) (Isa. xliii, 3; xlv, 14; Psa. lxxii, 10), and in Isa. xlv, 14; Ezek. xxiii, 42, as a rich and proud race. (The following account is based in part upon that of Poole, in *Smith's Dict. of the Bible*.)

1. *Name*.—Besides the singular form above, there is given the plural סֶבְאִים (Sept. Σαβαίμ, Ζαβαίμ; Vulg. *Sabaïm*), incorrectly rendered "Sabæans," a name given in the A. V. with more probability to the סֶבְאִי (Joel iii, 8 [Heb. text, iv, 8]); and to *Sheba*, used for the people (Job i, 15); but it would have been better had the original orthography been followed in both cases by such renderings as "people of Seba," "people of Sheba," where the gentile nouns occur. See SABÆAN; SHEBA.

If Seba be of Hebrew or cognate origin, it may be connected with the root סָבָא, *sabá*, "he drank to excess," which would not be inappropriate to a nation seated, as we shall see was that of Seba, in a well-watered country; but the comparison of two other similar names of Cushites, Sabtah (סֶבְטָח) and Sabtechah (סֶבְטָחַ), does not favor this supposition, as they were probably seated in Arabia, like the Cushite Sheba (שֶׁבָא), which is not remote from Seba (סֶבָא), the two letters being not unfrequently interchanged. Gesenius has suggested the Ethiopic *sabeay*, "a man," as the origin of both Seba and Sheba, but this seems unlikely. The ancient Egyptian names of nations or tribes, possibly countries, of Ethiopia, probably mainly, if not wholly, of Nigritian race, *Sahaba*, *Sabara* (Brugsch, *Geogr. Inschr.* ii, 9, tav. xii, K. 1), are more to the point; and it is needless to cite later geographical names of cities, though that of one of the upper confluent of the Nile, Astasobas, compared with Astaboras, and Astapus, seems worthy of notice as perhaps indicating the name of a nation. The proper names of the first and second kings of the Ethiopian 25th dynasty of Egypt, *Shebek* (שֶׁבֶק) and *Shebetek*, may also be compared. Gesenius was led, by an error of the Egyptologists, to connect Sevechus, a Greek transcription of *Shebetek*, with *Sabb* or *Sbak*, the crocodile-headed divinity of Ombos (*Lex. s. v.* שֶׁבֶק).

2. *Biblical Notices*.—Besides the mention of Seba as the first in the list of the sons of Cush (Gen. x, 7; 1 Chron. i, 9), there are but three, or, as some hold, four, notices of the nation. In Psalm lxxii, which has evidently a first reference to the reign of Solomon, Seba is thus spoken of among the distant nations which should do honor to the king: "The kings of Tarshish and of the isles shall bring presents; the kings of Sheba and Seba shall offer gifts" (ver. 10). This mention of Sheba and Seba together is to be compared with the occurrence of a Sheba among the descendants of Cush (Gen. x, 7), and its fulfilment is found in the queen of Sheba's coming to Solomon. There can be little doubt that the Arabian kingdom of Sheba was Cushite as well as Joktanite; and this occurrence of Sheba and Seba together certainly lends some support to this view. On the other hand, the connection of Seba with an Asiatic kingdom is important in reference to the race of its people, which, or at least the ruling class, was, no doubt, not Nigritian. In Isaiah xliii, Seba is spoken of with Egypt, and more particularly with Cush, apparently with some reference to the Exodus, where we read, "I gave Egypt [for] thy ransom, Cush and Seba for thee" (ver. 3). Here, to render Cush by Ethiopia, as in the A. V., is perhaps to miss the sense of the passage, which does not allow us to infer, though it is by no means impossible, that Cush, as

a geographical designation, includes Seba, as it would do if here meaning Ethiopia. Later in the book there is a passage parallel in its indications: "The labor of Egypt and merchandise of Cush, and of the people of Seba, men of stature, shall come over unto thee, and they shall be thine" (xlv, 14). Here there is the same mention together of the three nations, and the same special association of Cush and Seba. The great stature and beauty of the Ethiopians are mentioned by Herodotus, who speaks of them as by report the tallest and handsomest men in the world (iii, 20; comp. 114); and in the present day some of the tribes of the dark races of a type intermediate between the Nigritians and the Egyptians, as well as the Caucasian Abyssinians, are remarkable for their fine form, and certain of the former for their height. The doubtful notice is in Ezekiel, in a difficult passage: "and with men of the multitude of Adam [were] brought drunkards [סֶבְאִים]; but the Keri reads סֶבְאִים, 'people of Seba' from the wilderness, which put bracelets upon their hands, and beautiful crowns upon their heads" (xxiii, 42). The reading of the A. V. in the text is, "with the men of the common sort," and in the margin, "with the men of the multitude of men." The first clause would seem to favor the idea that a nation is meant, but the reading of the text is rather supported by what follows the mention of the "drunkards." Nor is it clear why people of Seba should come from the wilderness.

3. *Identification*.—The list of the sons of Cush seems to indicate the position of the Cushite nation or country Seba. Nimrod, who is mentioned at the close of the list, ruled at first in Babylonia, and apparently afterwards in Assyria: of the names enumerated between Seba and Nimrod, it is highly probable that some belong to Arabia. We may thus conjecture a curve of Cushite settlements, one extremity of which is to be placed in Babylonia; the other, if prolonged far enough in accordance with the mention of the African Cush, in Ethiopia.

The other passages we have examined seem to show (if we omit the last) that Seba was a nation of Africa, bordering on or included in Cush, and in Solomon's time independent and of political importance. We are thus able to conjecture the position of Seba. No ancient Ethiopian kingdom of importance could have excluded the island of Meroë, and therefore this one of Solomon's time may be identified with that which must have arisen in the period of weakness and division of Egypt that followed the empire, and have laid the basis of that power that made *Shebek*, or Sabaco, able to conquer Egypt and found the Ethiopian dynasty which ruled that country as well as Ethiopia.

Josephus says that Saba (Σαβά) was the ancient name of the Ethiopian island and city of Meroë (*Ant. ii*, 10, 2), but he writes Seba, in the notice of the Noachian settlements, Sabas (*ibid.* i, 6, 2). So, too, Strabo and Diodorus Siculus (see Mannert, *Geogr.* p. 199). But the name Meroë is more probably Ethiopic, meaning the *watered land* (see Tuch, *Gen.* p. 222; comp. Knobel, *Isa.* p. 122, who gives Seba a similar meaning). This view of Seba, as identical with Meroë, has been adopted by all the moderns as suited to every passage where it is mentioned (comp. Michaelis, *Spicil.* i, 180 sq.). Certainly the kingdom of Meroë succeeded that of Seba; and the ancient city of the same name may have been the capital, or one of the capitals, of Seba, though we do not find any of its monuments to be even as early as the 25th dynasty. There can be no connection between the two names. According to Josephus and others, Meroë was named after a sister of Cambyses; but this is extremely unlikely, and we prefer taking it from the ancient Egyptian *Meru*, an island, which occurs in the name of a part of Ethiopia that can only be this or a similar tract, *Meru-pet*, "the island of *pet* (Phut?) = the bow," where the bow may have a geographical reference to a bend of the river, and the word island to the country enclosed by that bend and a tributary. See

PHUT. It may be remarked that it seems certain that, from a remote time, Ethiopia below Meroë could never have formed a separate powerful kingdom, and was probably always dependent upon either Meroë or Egypt.

4. *Description.*—Meroë was a large island in Ethiopia, formed by the Astaboras, on the east (Atbara, Takazze), and Astapus (Bahr el-Asrak), on the west (alluded to in Zeph. iii, 10; Isa. xviii, 1), the two arms that unite to form the Blue Nile (Strabo, xvii, 821). See **NILE**. It is mountainous, but fruitful (Heliod. *Ethiop.* x, 5), and its chief city is also called Meroë. This has been from antiquity the seat of a priesthood with an oracle of Jupiter Ammon (Herod. ii, 29), and a trading-place for the caravans of Africa and Arabia (Strabo, xvi, 771; xvii, 786 sq.; Pliny, ii, 75; v, 10; vi, 35; xxxvii, 15; Diod. Sic. i, 33; iii, 5 sq.; Ptolem. iv, 8). It is noted by the ancients as remarkable for the fact that here the sun casts shadows part of the year southward and part northward (comp. Strabo, ii, 135 sq.; Pliny, ii, 75; Lucan, x, 300, 305, etc.: some think this is referred to in Isa. xviii, 1; Zeph. iii, 10). The city lay in the northern extremity of the island (seventy thousand paces from the *entrance*, i. e. the southern extremity—Pliny, vi, 35), five thousand stadia from Syene (Strabo, ii, 114; comp. Pliny, ii, 75), and ten thousand from Alexandria (Strabo, i, 62; ii, 114). The city of Meroë had gained control of the whole island, and sent colonies of priests to Upper Egypt to settle Thebes and Ammonium. In its flourishing period this kingdom was exceedingly powerful (Pliny, vi, 35), and was inhabited by farmers, shepherds, and hunters (Strabo, xvii, 821). Deserts of sand surrounded it (*ibid.*). The priesthood retained power until the third century before Christ, when it was overthrown by a king Ergamenes (under Ptolemy Philadelphus). Thenceforward the power of the city seems to have declined; it disappears from the view of Western writers, and not until the time of Augustus do we begin to hear sparse, and on some points contradictory, accounts of a city somewhere in that region, under queens who bear the common name of Candace (comp. Pliny, vi, 35; Dion Cas. liv, 5; Euseb. *H. E.* ii, 1). But Meroë was deserted, a few houses only remaining.

Modern travellers have striven to find its site, and it is identified with some probability as the ruins almost twenty miles north-east of the Nubian city *Shendy*, in the Dar el-Atbara, a district near Assur forming a peninsula, between the river Atbara, the Nile (Bahr Asrak), and the river Rahad. (See Russegger's *Charte von Nubien*, in his *Reis.*, and ii, 1, 476, 480 sq.; Bruce, *Travels*, iv, 542 sq.; Burckhardt, *Travels in Nubia*, p. 273 sq.; Ruppell, *Arab.* p. 114, 383, with plate v; Cailliaud, *Voyage à Meroë au Fleuve Blanc* [Paris, 1826], 4 vols. with plates; Hoskins, *Travels in Ethiopia, Exhibiting the State of the Country under the Dominion of Meroë* [Lond. 1835], with plates.) This supposition is confirmed by the records of distances left by the ancients, for from Syene to Assur the caravan road is 534 English miles by Russegger's account, 560 by Hoskins's, while the ancient reckoning is equivalent to 568 or 590 English miles—an unimportant difference. So the distance from the beginning of the island to the city was 60 miles (see above), and Russegger found the distance from Assur to the mouth of the Atbara 55, Hoskins 60 miles. See Ludolf, *Comment. Hist. Ethiop.* p. 88 sq.; Delisle, in the *Histoire de l'Académie des Sciences in 1708*, p. 365 sq.; Tzschucke, *Ad Mel.* III, i, 256 sq.; Mannert, *X*, i, 182 sq.; Heeren, *Ideen*, II, i, 352; Forbiger, *Handb.* ii, 814 sq.; Smith, *Dict. of Class. Geog.* s. v. "Meroë." See **ETHIOPIA**.

Sebak. See **THICKET**.

Sebald, Sr., a legendary wonder-worker of the Romish Church, said to have been the son of a Danish king, or, by another tradition, of a peasant. He began his studies at Paris before he was fifteen years of age, and after a few years married a daughter of the king Dagobert, from whom, however, he separated with her

consent after the lapse of a single day, in order to become a hermit and practice a rigid asceticism. After ten years he made a pilgrimage to Rome, and received authority to preach from pope Gregory II. While on the way to Germany he miraculously delivered St. Willibald from death by starvation, and after reaching Bavaria he wrought numerous conversions, gathered churches, and settled near Nuremberg as a hermit. The date of his death is uncertain, being given as A.D. 801, 901, or 1070. He had directed that his body should be laid on a wagon drawn by four bullocks, and buried where the cattle should come to a stop. The place so indicated was before St. Peter's Chapel at Nuremberg, which, accordingly, after having been transformed into a church, took his name. Many wonders were wrought by his lifeless body, in consequence of which he was beatified by pope Gregory X, and canonized by Martin V (1425), while the town of Nuremberg chose him for its patron saint. The 19th of August is set apart for his commemoration. A rich and artistic monument by Peter Vischer, erected to his memory, may be seen in the Church of St. Sebaldus, at Nuremberg.

Se-Baptists, a small and obscure sect which struck off from the Brownists (Independents) early in the 17th century. They received their name from the act of their leader, John Smith, of Amsterdam, in baptizing himself. After entertaining several views, he at last declared for the principles of the Baptists. Upon this he left Amsterdam and settled with his disciples at Ley, where, being at a loss for a proper administrator of the ordinance of baptism, he plunged himself and then performed the ceremony upon others. The Se-Baptists maintain that it is lawful for every one to baptize himself; and the Samokrestschentsi (a small Russian sect of self-baptizers) give as a reason that there is no one on earth sufficiently holy to administer the ordinance aright. See Blunt, *Dict. of Sects*, s. v.; Gardner, *Faiths of the World*, s. v.

Sebastè. See **SAMARIA**.

Sebastian, Sr., a Christian martyr under Diocletian, was born at Narbonne, in Gaul, and educated at Milan. Although a Christian, he entered the Roman army, concealing his religion, with the view of being enabled by his position to assist and protect the Christians. He rose to high favor under Diocletian, and became a member of the emperor's guard. At length he was informed against, and Diocletian used every effort to induce him to renounce the Christian belief, but in vain. He was condemned to be put to death by a troop of Mauritanian archers, who transfixed him with arrows and left him for dead. Some Christians coming to the place of execution to bury him found signs of life remaining, and he was removed to the house of a Christian lady, Irene, and recovered. He would not yield to the persuasions of his friends to remain in seclusion, but intentionally placed himself in the emperor's way. Diocletian condemned him to be beaten to death with clubs in the amphitheatre, and his body was flung into one of the sewers of the city. According to the *Acts of Martyrdom*, it was discovered by means of an apparition, and carried by a Christian lady, Lucina, to the catacomb which is still called by his name. The day of his martyrdom was Jan. 20, 288, but by the Greeks the feast is held Dec. 20.

There is another saint of the same name, who is said to have suffered martyrdom in Armenia.

Se'bat, or rather **SHEBAT** (Heb. *Shebat*, שֶׁבַט, a rod or tribe; Sept. *Σαβάρ*), the fifth month of the Jewish civil year, and the eleventh of the ecclesiastical year, from the new moon of February to that of March; or, according to others, corresponding to our January. See **MONTH**. The name is substantially the same in the Syriac and Arabic. The Jews began in this month to number the years of the trees they planted, the fruits of

which were esteemed impure till the fourth year (Zech. i, 7). See CALENDAR, JEWISH.

Sebbun, in Japanese mythology, is a feast of purification and of expelling the evil spirit, which is done shortly before the advent of the new year. This festival also serves as the date for the settlement of semi-annual payments.

Sebirin (סבירין), or *imaginary readings*, is a technical term of the Masorites to denote that words in the Bible ought to be read so and so, but they are not. This expression is derived from *sabar*, סבר, "to believe, think;" thus we read in Dan. vii, 25 ויסבר, *and he thought*, and in the Chaldee paraphrase on Prov. xiv, 12, "there is a way which is right in the view of man," we read "there is a way which man imagines" (רסבירין), etc. Now there are a number of such *imaginary* or *supposed* readings to be found in the Hebrew text of the Old Test., as the following examples will prove. Thus we read:

האל, *these*, is said to stand eight times for האלה, as in Gen. xix, 25; xxvi, 3; Lev. xviii, 29, etc.

אלפים, *thousand*, is said to stand four times for אלפים, as in Exod. xxxii, 28; Jud. iv, 10, etc.

ויאמר, *and he said*, is said to stand twelve times for ויאמר, "and they said," as in Exod. xiv, 25; Numb. xxxii, 25, etc.

ארץ, *into the land*, is said to stand five times for ארצו, as in Gen. xiv, 25, etc.

אשה, *a wife*, stands three times for אשה, "for a wife," as in 2 Chron. xxi, 6; Ezra ii, 61; Neh. vii, 63.

אשר, *which*, stands four times for כאשר, "as which," Exod. xiv, 13; Lev. vii, 36, 38; Numb. iv, 49.

אשר, *as which*, stands ten times for אשר, "which," Deut. xvi, 10; xxiv, 8; Josh. ii, 7; xiii, 8; xiv, 2; Jer. xliii, 27; Isa. ii, 13; Hos. vii, 12; Jonah i, 14; Hag. i, 12.

אתה, *thou*, stands three times for עתה, "now," as 1 Kings i, 18, 20.

ממנו, *from it*, stands six times for ממנו, "from her," as Lev. vi, 8; xxvii, 9; Josh. i, 7; Judg. xi, 34; 2 Kings iv, 39; 1 Kings xxii, 48.

על, *upon*, stands nine times for עד, "until," as Gen. xlix, 13; Josh. ii, 7; xiii, 16; Judg. vii, 22.

על, *upon*, stands twice for עם, "with," as Gen. xxx, 40; 1 Sam. xx, 8.

Without enlarging upon this list, we will remark for those interested in that subject that these סבירין are given in alphabetical order by Frensdorff in his *Massora Magna*; the first part is entitled *Massoretisches Wörterbuch*, p. 369 sq. See Buxtorf, *Tiberias*, p. 257 sq.; Levita, *Massoreth Ha-Massoreth* (ed. Ginsburg), p. 225 sq. (B. P.)

Sebonde (or **De Sabunde**), RAIMOND, a Spanish philosopher, was born at Barcelona during the 14th century; but his life is little known. He practiced medicine at Toulouse in 1430, and his death is placed in 1432. He wrote, besides several MS. works, *Theologia Naturalis* (Deventer, 1487, fol. and later), in which he sets forth the doctrine of Aquinas after the manner of Raimond Lully. The work was translated by Montaigne (Paris, 1569, 8vo). Of Sebonde's other essays, the principal is entitled *De Natura Hominis* (Cologne, 1501, 4to), an abridgment of the *Theologia Naturalis*. See Hoefler, *Nouv. Biog. Générale*, s. v.

Sebrasse, GOTTLIEB, a minister of the Methodist Episcopal Church, was born in Prussia, Nov. 8, 1833, and came to the United States in 1852. He soon after was converted, and began to preach in 1856; but his health failing, after filling three or four appointments, he retired from the active ministry and settled near Red Wing. He died, from the effects of a fall from his wagon, June 3, 1876. He was a member of the North-

IX.—I 1

west German Conference. See *Minutes of Annual Conferences*, 1876, p. 134.

Sebuæi. See SEBUANS.

Sebuans, the name given to the second of the four Samaritan sects named by Epiphanius, the other three being the Essenes, Gorthæans, and Dositheans. It was originated by Sebu, or Sebuiah; and, partly to suit their own convenience, and partly through hostility to the Jews, kept the sacred festivals at different periods from them—viz. the Passover and Pentecost in autumn, and the Feast of Tabernacles in the time usually allotted for the Passover. This sect was not permitted to worship along with the other Samaritans in the temple on Mount Gerizim. Lightfoot, in his *Horæ Talmudicæ*, considers them to be identical with the *Sabeans*.

Seca'cah [many *Sec'acah*] (Heb. *Sekakah*, סֶכָכָה, *thicket*; Sept. Σοχοχά v. r. Αιοχόζα; Vulg. *Sechacha*, or *Sachacha*), one of the six cities of Judah situated in the Midbar ("wilderness"), that is, the tract bordering on the Dead Sea (Josh. xv, 61). It occurs in the list between Middin and han-Nibshan. It was not known to Eusebius and Jerome (*Onomast.*). From Sinjil, among the highlands of Ephraim, near Seilûn, Dr. Robinson saw a place called *Sekâkeh* (*Bib. Res.* ii, 81, note); but this locality is, of course, out of the question. The place possibly corresponds to the site of *Kusr Antar*, one of two ruined towers on Wady Khureitun (Robinson, *Bib. Res.* ii, 182).

Secchi, GIOVANNI BATTISTA, called *il Caravaggino*, an Italian painter, born at Caravaggio in 1619. He left several important works at Milan; among them are, *Adoration of the Magi*, and a *Pietà*.

Secession Kirk OF SCOTLAND. See PRESBYTERIAN CHURCHES; UNITED PRESBYTERIANS.

Secheni'as (Σεχενίας, Είχονίας), Apocryphal forms of the Heb. name SHECHANIAH (q. v.); namely, (a) the father of Lettus (1 Esdr. viii, 29), or rather of one whose name has dropped out of the text (Ezra viii, 3); (b) the "son" of Jezeluo (1 Esdr. viii, 32) or Jahaziel (Ezra viii, 5).

Se'chu (Heb. with the art. *has-Seku*, הַשְּׁכִי, *the watch-tower*, implying that the place was on or near an elevation; Sept. Σεχι v. r. Σεφε), a region in Ramah, containing a famous well (or rather cistern, בֵּיר, which Saul passed while in pursuit of David (1 Sam. xix, 22). "Assuming that Saul started from Gibeah (Tuleil el-Ful), and that Neby Samwil is Ramah [?], then *Bir Neballa* (the well of Neballa), alleged by a modern traveller (Schwarz, *Palest.* p. 127) to contain a large pit, would be in a suitable position for the great well of Sechu. Schwarz himself (p. 157) would identify it with *Askar*, on the south-east end of Mount Ebal, and the well with Jacob's Well in the plain below; and Van de Velde (*S. and P.* ii, 53 sq.) hesitatingly places it at *Shûk*, in the mountains of Judah north-east of Hebron; but this they are forced into by their respective theories as to the position of Ramathaim-Zophim" (Smith). Sechu is perhaps represented by the present *Khuraib er-Ram*, which still contains a cistern (Robinson, *Later Res.* p. 287), and lies near er-Ram (Ramah) directly on the road from Tuleil el-Ful (Gibeah of Saul).

Sechuana Version. The Sechuana occupies a prominent place in the great Caffre family of languages, and is the most important of all languages of Southern Africa. The first portion of the Sechuana version committed to the press was the Gospel of St. Luke, printed at Cape Town in 1831, under the personal superintendence of Mr. Moffat. In 1841 the whole New Test. was printed in London at the expense of the British and Foreign Bible Society, under the eye of the translator. From that time on Mr. Moffat devoted himself to the translation of the Old Test., which was completed in 1859. A revision of the entire Bible was commenced in

1870 and completed in 1877. Up to March 30, 1878, 7066 Bibles and 10,094 New Testaments with Psalms have been distributed. Comp. *The Bible of Every Land*, but more especially the *Annual Reports of the British and Foreign Bible Society*, which are the only sources for the more recent versions published since the preparation of *The Bible of Every Land*. (B. P.)

Seckendorf, VIRUS LOUIS VON, a noted German statesman of the Reformation period, was born at Aurach, a town of Franconia, Dec. 20, 1626. The great progress in his studies made in his youth coming to the ears of Ernest the Pious, duke of Saxe-Gotha, this prince brought him to Gotha to be educated with his children. After remaining two years, he went in 1642 to Strasburg; and, returning to Gotha in 1646, was made honorary librarian to the duke. In 1651 he was made aulic and ecclesiastical councillor; and in 1663 councillor of state, first minister and sovereign director of the consistory. The year after, he went into the service of Maurice, duke of Saxe-Zeist, as councillor of state and chancellor. He remained with him until his death, in 1681, and led a life of retirement, writing many works. Frederick III, elector of Brandenburg, made him councillor of state and chancellor of the University of Halle, dignities which he did not long enjoy. He died at Halle Dec. 18, 1692. The work of his held in the highest estimation for its utility is *Commentarius Historicus et Apologeticus de Lutheranism* (Lips. 1688-92), written in refutation of Maimbourg's *Histoire du Luthéranisme*. See the literature referred to in Herzog, *Real-Encyclop.* s. v.

Secker, THOMAS, an eminent English prelate, was born in 1693 at Sibthorpe, Nottinghamshire. He belonged to a family of Dissenters, but was influenced (by his own views and by the divisions and disturbances at that period prevailing among the Dissenters) to conform. He therefore never practiced medicine, for which he had studied at London, Paris, and Leyden, but entered Exeter College, Oxford, in 1721. In December, 1722, bishop Talbot ordained him deacon, and not long after, priest. He was presented by the bishop with the rectory of Houghton le Spring in 1724, where he remained until 1727, when he removed to Durham. In July, 1732, Grafton, lord chamberlain, appointed him chaplain to the king. He was instituted to the rectory of St. James's, May 18, 1733, and was consecrated bishop of Bristol Jan. 19, 1735. In May, 1737, Dr. Secker was translated to the bishopric of Oxford; in December, 1750, was promoted to the deanery of St. Paul's; and confirmed archbishop of Canterbury April 21, 1758. He died in London, Aug. 3, 1768. His works comprise *Sermons, Lectures, and Charges* (Lond. 1811, 6 vols.), last edition with a memoir by bishop Porteus.

Second Coming of Christ. See ADVENT, SECOND; MILLENNIUM.

Second Marriage. In the early Church, not only did the more strict Novatians and Montanists esteem a second marriage unlawful, but that error was upheld by several councils (*Conc. Nic.* c. 8; *Ancyran.* c. 19; *Laodic.* c. 1; *Neocæsar.* c. 3; *Constit. Apost.* lib. iii, c. 2; *Athenag. Legat.*; Theophil. Ant. *Ad Autol.* lib. iii; *Iren. Adv. Hæc.* lib. iii, c. 19). When the severity of this principle was relaxed with regard to lay members of the Church, it was still retained with reference to the clergy (Tertull. *De Monog.* c. 11; *Ad Uxor.* lib. i, c. 7; *De Pænit.* c. 9). At length this law was rendered nugatory by the enforcement of celibacy among the clergy. See DIVORCE; MARRIAGE.

Secondary, a clerk who, if learned and expert in music, was eligible for promotion, by the dean, to the place of vicar. He was the canon's personal attendant, and sat in the *secondary* row of stalls; hence his name. At Chichester the secondary sang the daily mass of requiem in the Lady-chapel. It was also a technical term for a cathedral dignitary of second rank and position—a minor canon, precentor.

Second-first SABBATH (Σάββατον δευτερό-πρωτον; Vulg. *Sabbatum secundum primum*; A. V. "second Sabbath after the first") is an expression occurring only in Luke vi, 1, and apparently coined for the occasion, as the compound adj. δευτερό-πρωτος is found nowhere else in all the range of Greek literature. The learned have therefore been greatly divided, or, rather, in doubt, as to its meaning, since it is in itself quite vague and ambiguous. The earliest opinion is that of Epiphanius (*Hæres.* i, 30, 51), followed by Isidore of Pelusium (iii, 110), Suidas (s. v. Σάββατον), Theophylact (*ad loc.*), and cited among later writers by Petavius (i, 61) and Scaliger (*Emend. Temp.* vi, 551), viz. that the Sabbath thus indicated was that which immediately succeeded the Paschal festival; for (argue they) the "morrow after the Sabbath" [i. e. Passover] (מחרת השבת, i. e. ἀπὸ δευτέρου τοῦ Πάσχα) is the point from which the law orders the seven weeks to be reckoned till Pentecost. Hence all the weeks and Sabbaths of that interval are designated from this name (ספירת חנוכה, ἀριθμὸς τοῦ δράγματος, *numerus manipuli*, i. e. the number of the omer, or first-fruits presented as a wave-offering). This is the view embraced by most moderns, quoted in detail by Wolf (*Curæ in N. T.* i, 619 sq., where several arbitrary opinions by various authors are likewise enumerated); see also Köcher (*Analect.* *ad loc.*), Russ (*Harmon. Evangel.* p. 639 sq.), Marsh (*Notes to Michaelis's Introd.* ii, 61). The circumstances of Luke's narrative indicate that the day in question was not (as usually reckoned) the first Sabbath after the second day of unleavened bread, for that usually fell within the Passover week; whereas our Lord, on the occasion referred to, had evidently left Jerusalem at the close of the entire festival, and was on his way back to Galilee. Nor would this have been a natural and appropriate term for such a day, since that would rather have been a "first after the second" (πρωτο-δευτερος), if, indeed, it could have been called *second* at all, seeing it either was simply, or else preceded, the first Sabbath of the series of seven between Passover and Pentecost. It seems rather to have been the first of that series, but the *second* after the beginning of the Paschal week; which circumstance affords a simple and apposite explanation of the compound name. That the incident in our Lord's history occurred at that season is evident from the fact that the grain stood ripe, but unreaped, in the fields; and a comparison of the evangelical narratives makes it apparent likewise that the "fast" which John states (v, 1) that Jesus attended that year at Jerusalem was the Passover. If this collocation is correct, the Sabbath in question could not well have been the one occurring during the Paschal week, as that is preoccupied by John's account (in the same chapter) of the cure at the pool of Bethesda. The only mode of escaping this conclusion is by the unnatural supposition that the former "Sabbath" was merely the Passover-day itself, which, as some claim, is metaphorically thus named in a few cases (*Lev.* xxiii, 11, 15; *comp. Josh.* v, 11). See Mayer, *Commentar.* *ad loc.*; *Hebe, Leben Jesu*, p. 142; *Methodist Quarterly Review*, 1850, p. 492; also the monographs *De Sabbato Deuteroproto*, by Müller (Rost. 1665), Goloner (Viteb. s. a.), Van Til (L. B. 1708). See PASSOVER; PENTECOST; SABBATH.

Secret. See MYSTERY.

Secret Discipline (Lat. *arcani disciplina*), a term used to signify a practice of the early Christian Church of performing the rites of religion with secrecy. It was founded upon the words of Christ, "Give not that which is holy unto the dogs," etc. (*Matt.* vii, 6), and began to be common shortly after the middle of the 2d century. The first reason for its adoption was to guard the more sacred and mysterious doctrines from popular misconception and blasphemy among the pagans. The discipline of the secret appears in several forms: (1.) Both unbelievers and catechumens were

dismissed from the church, when the ordinary service was closed, by one of the deacons, who said, "*Ite, missa est*!"—"Go, the assembly is dismissed." After this the sacrament was administered. (2) The lectures addressed by the presiding teacher to the body of catechumens in general were confined to the general doctrines of Christianity. The more mysterious doctrines, those which regarded the sacraments of baptism and the eucharist, called "*Mystagogic*," were only communicated at the close, and to those only who had undergone the preliminary probation. (3) The eucharist, if referred to at all in the presence of the uninitiated, was spoken of in words so conceived as to conceal its nature. Some very curious examples of this concealment might be cited—e. g. Epiphanius, referring to the formula "this is my body," writes, "This is my *that thing*" (*Τούτο μόν ἔστι τὸ ὄν*). The mysteries thus specially guarded were baptism, the unction, or chrism ordination of priests, the Lord's supper, liturgy, the knowledge of the Holy Trinity, the Creed, and the Lord's Prayer. See Coleman, *Christ. Antiq.* p. 35. See ARCANI DISCIPLINA.

Secret of the Mass, a prayer in the canon of the mass before the preface, and having much the same tenor as the collect. Since the 10th century it is said in a low voice by the celebrant after the *Orate fratres*. In France it was marked with the mystic letters V. D. St. Gregory calls it the Canon of the Secret. According to some writers, it represents that the working of God in the holy communion passes man's understanding; but, as Cramer explains it, Christ's secret conversation which he had with his disciples before his passion. The bells in England were forbidden to be rung during this service in 1701. The secrets were formerly called *super oblata* and may have taken their name from the secretion of gifts and oblations.

Secretæ, any prayers said secretly and not aloud. Anciently, at the commencement of the divine office, the Lord's Prayer and Hail Mary were said silently, as also other portions of the same office. But this rule was abolished in the English Church during the changes which took place three centuries ago, though it still obtains in the Latin communion.—Lee, *Glossary of Liturgical Terms*, s. v.

Secretaria, a name given to the sessions of the councils in the early Christian Church because they were held in the secretarium (q. v.).

Secretarium (or **SECRETUM**), a part of early Christian churches, which was also called *diaconicum* (q. v.). It was called *secretarium*, as Ducange conjectures, because the consistory or tribunal of the Church was here kept, the *secretum* or *secretarium* being a known name for the courts of the civil magistrate. Others suppose it derived its name from its being a place of safety, or the robing-room of the officiating clergy.

Secretarius (1), the confidential correspondent of a bishop, abbot, head of a college, or other ecclesiastical dignitary. (2) A sacristan or sexton.

Sect [in Biblical usage] (*αἵρεσις*, i. e. *division*; hence "heresy," Acts xxiv, 14; 1 Cor. xi, 19; Gal. v, 20; 2 Pet. ii, 1), a religious party (Acts v, 17, etc.); hence *discord* (1 Cor. xi, 19, etc.). Among the Jews there were several sects mentioned in the New Test., distinguished by their practices and opinions, yet united in communion with each other and with the body of their nation. See SECTS, JEWISH. Christianity was originally considered as a new sect of Judaism; hence Tertullus, accusing Paul before Felix, says that he was chief of the seditious sect of the Nazarenes (Acts xxiv, 5); and the Jews of Rome said to the apostle when he arrived in that city that, "as concerning this sect, we know that everywhere it is spoken against" (Acts xxviii, 22). Peter (2 Pet. ii, 1-10) foretells that false teachers should arise among them "who privily shall bring in damnable heresies [or sects], even denying the

Lord that bought them, and bring upon themselves swift destruction." He adds that these people, being great lovers of themselves, are not afraid to introduce new sects, where the word sect is taken in the same sense as heresy. See HERESY.

Among the Greeks the philosophers were divided into different sects; as the Academics, the Stoics, the Peripatetics, the Cynics, the Epicureans, etc. The Jews, in imitation of the Greeks, began to divide themselves into sects about the time of the Maccabees; and it seems as if the Corinthians had a mind to introduce something like this into Christianity when they boasted, I am a disciple of Peter, I of Paul, I of Apollos (1 Cor. i, 12; iii, 22, etc.). See DIVISION.

SECT [in ecclesiastical usage] (Lat. *secta*, cut off), a collective term comprehending all such as follow the doctrines and opinions of some divine, philosopher, etc. By the Roman Catholic Church it is applied to all those religious bodies which separated from her communion. By Protestants, generally, it is employed in no opprobrious sense to signify the various organizations into which the Protestant churches are divided. Separate organization rather than difference of opinion is the meaning conveyed by the term; for great and known differences in opinion, when followed by no external breach in the society, are not considered as constituting distinct sects. Thus High and Low Church are only called parties, because they have not formed separate communions. Among the Jews the term was differently understood, for among them there were no separate communities erected, if we except the Samaritans. The same Temple and the same synagogues were attended alike by Pharisees and Sadducees. They were often of both denominations in the Sanhedrim and even in the priesthood. Another difference was, also, that the name of the sect was not applied to all the people who adopted the same opinions, but solely to the men of eminence among them, who were considered as the leaders of the party. There have been, from time to time, a great number of sects, separating, often on points of no importance, from some other Church organization. These are treated of in separate articles, and it will only be necessary to add here that with respect to certain sects, especially those belonging to the first centuries, we have no other information than such as is afforded by their foes, who were not always scrupulous in their theological warfare. Their statements should, therefore, often be taken with considerable allowance. See SECTS, CHRISTIAN.

Sectarianism, devotion or adhesion to a sect, generally signifies that spirit which makes more of the sect or organization than of the cause of Christ.

Sectaries, a term used to denote those who adhere to the same sect and maintain the same doctrines.

Section, the representation of a building cut asunder vertically so as to show the interior; also of a moulding or other member in architecture cut asunder so as to show its profile.

Section of a Moulding.

Sects, CHRISTIAN. The various sects which have arisen in the Church from time to time are treated of under their several appropriate captions in this *Cyclopædia*. This article has to do simply with the idea of sectarianism, and with the ethical and legal aspects which the question assumes in certain lands.

The word *sect* occurs in classical literature (in Cicero, Tacitus, etc.) in the sense of *seguor*, as involving the idea of separation to some leader rather than that of separation from some body. It consequently might be applied to Christianity itself at the beginning, when devotion to Jesus of Nazareth seemed to be the prominent trait of the new tendency. In a later period the

word came to signify separation *from*, as if derived from *secur*, to cut off. This has continued to be its principal meaning to our day. Protestantism is evidently prohibited from employing the word in this sense by the fundamental principle which concedes the right to personal convictions and the free expression of beliefs; and it is a somewhat unusual term in the vocabulary of American ecclesiasticism, whose occurrence in almost every instance is explained by an implication of heresy as charged upon the ecclesiastical body to which the term is applied.

In European countries where State churches have been established the case is different. Separation has there often been regarded an odious offence, and has sometimes been construed into a crime against the State. The Pietism of the 17th century did something to break down this prejudice by revealing to the world an orthodoxy and piety superior to those of the churches, and the pseudo-enlightenment of later days likewise contributed to this end by advocating an absolute freedom of thought; but in both continental and insular Europe the term sect still carries with it a stigma, and to many minds involves the notion of heinous guilt.

In the Romish Church this term is not in general use, and is employed only as the synonym of heresy or schism. This meaning was adopted by the Reformers and developed, so that Luther regards the sect as a mob and a fanatical clique. Both Lutherans and Reformed refused to tolerate any deviation from scriptural standards as understood by themselves, an apparent inconsequence whose explanation lies in the fact that these men had attained to positive convictions of truth; they saw but a single and exclusive object on which faith might lay hold, and could not conceive of diversities of view respecting that object. The unhappy Peasants' War confirmed Luther in his aversion to the idea of absolute toleration, and his influence contributed towards making sectarianism an offence against both Church and State.

The efforts of men to prevent the development of sects were, however, always counteracted by principles which underlay the ecclesiastical systems held by themselves. Not only does this apply to the principle of Protestantism, that freedom of religious belief is the right of every person, but it is shown in the results of *territorialism* and *collegialism* in the churches of Germany. The former of these systems had for its leading principle the notion that the ruling prince of any territory should possess absolute power over the exercise of religion within his dominions, but that he should regard all religions as equal so long as none of them should endanger the welfare of the State. The latter system practically located all ecclesiastical power in the particular congregation. It is evident that neither of these systems was calculated to repress a tendency towards sectarianism. Another factor in the problem was furnished by the extensive changes made in the map of Europe at the close of the 18th century, the breaking-up of states and dividing of their populations insuring a more cosmopolitan character to the inhabitants of countries, and thus reacting on their relations to the Church. When, finally, it came to be understood that the only claim of an evangelical Church to recognition by the State is that its roots strike down into the faith of the people, the last barrier in the way of complete toleration was practically overthrown. The logic of the situation is clear, and a hearty acceptance of the conclusion to which it leads is delayed only by prejudice and political considerations. In most of the countries of Protestant Europe, however, grave difficulties still prevent the exercise of ecclesiastical functions by dissenting ministers, and the established churches are favored by existing laws.

The relation of private conscience to the question of sectarianism regarded as a separation from an existing Church evidently demands consideration under every ecclesiastical system. Frequently the motive which

leads to the separation of an individual from his Church is not a good one: he is devoted to some specialty which the general Church disregards in her teachings, e. g. Millenarianism, etc., or he finds too much of worldliness, fashion, regard for wealth, etc., in the Church, and too many unworthy members. Clearly, separation from a Church of Christ in which the pure Word of God is preached and the sacraments are duly administered is allowable only in answer to the clear call of duty; and, as a general rule, separation should take place only by compulsion, as in the case of the separation of Luther from the Romish and of Wesley from the Anglican Church. On the whole subject, see Herzog, *Real-Encyklop.* s. v., and the literature there mentioned.

SECTS, JEWISH (Ancient). These were of two kinds, arising from the fact that the differences of opinion, sentiment, and conduct were sometimes of a theosophical and sometimes of a practical character; but, among the ancient Jews, so close was the connection of Church and State that all theological or philosophical views necessarily affected the civil and social relations.

1. *Religious*.—1. *The Pharisees*.—These were the orthodox party, and our Lord testifies to the general correctness of their creed (Matt. xxii, 3). It was chiefly in liturgical and ceremonial particulars that their excessive regard for traditional observances was betrayed. In this regard the Rabbinical Jews of modern times are their acknowledged successors. See **RABBINISM**. In external deportment they were scrupulously exact; but, their motive being a love of popularity and a pride of self-righteousness, they were sternly rebuked by our Lord as arch hypocrites and ecclesiastical tyrants. See **PHARISEE**.

2. *The Sadducees*.—These were next in importance, and of even more aristocratic influence, but they were the rationalists of their day (Acts xxiii, 8). They are represented by inimical writers as the originals of the modern *Karaites* (q. v.). See **SADDUCEE**.

3. *The Essenes*.—These were rather a class of ascetics or Jewish *hermits*, who are not mentioned in the New Test., and are chiefly known from the description of Josephus, who at one time belonged to their fraternity. See **ESSENE**.

II. *Political*.—1. *The Zealots*.—These are mentioned in the New Test. and by Josephus as the violent party who contended for native rights and independence from all foreign influence. They had their type in the *Chusidim* of earlier and later times. See **ASSIDÆAN**. They largely contributed to the final collision of the Jews with the Romans. See **ZELOTES**.

2. *The Herodians*.—These appear, from the slight notices of them (Matt. ii, 16, etc.), to have been the temporizing party, who favored Greco-Roman innovations. They had their originals in the apostates under Antiochus Epiphanes (Dan. xi, 35). See **HERODIAN**.

On the subject generally, see, in addition to the works cited under the articles on each of the above, Serarii, *Drusii et Scaligeri Opusc. de Trib. Judeorum Sectis* (Delph. 1703); separately, Drusius, *De Hassideis* (Frank. 1603); *De Sectis Judaicis* (Arn. 1619); Serarius, *De Tribus Sectis*, etc. (Frank. 1603; Mainz, 1604); Scaliger, *De Tribus Jud. Hæresibus* (Frank. 1605; Arn. 1619); Lund, *De Sectis Judeorum* (Upsal. 1700); Geiger, *Sadducæer und Phariseer* (Bresl. 1863); *Die Ebioniter des Alten Testaments*, in the *Monatsschr. für Gesch. und Wiss. des Judenthums*, Jan. 1869; *Meth. Quar. Rev.* Jan. 1868, p. 128.

SECTS, JEWISH (Modern). In the 17th century existed the sect of the Sabbathaites, so called after Sabbathai-Zebi (q. v.), whose apostasy to Islamism, and death in 1676, did not diminish the number of his followers, but rather increased it; and as there is no calculating the obstinacy of human credulity, his followers gave out that he had been transported to heaven, like Enoch and Elijah. Notwithstanding the constant

and active opposition of the Jewish priesthood, the sect spread in all quarters, and numbered among its members men like Mose Chayim Luzzatto (q. v.). "Sabbathanism," says Milman, "still exists as a sect of Judaism, though, probably, among most of its believers, rather supported by that corporate spirit which holds the followers of a political or religious faction together than by any distinct and definite articles of belief."

But, in the middle of the last century, an extraordinary adventurer named Jacob Frank (q. v.) organized a sect out of the wrecks of the Sabbathatic party, of which we will speak now, although in the order of time an earlier sect, that of the Chasidim, ought to be mentioned. The sect which Frank organized assumed the name of *Soharites* or *Cubalists*, also of *Frankists*. As to the creed of this sect, it leaned towards Christianity rather than Islamism. It rejected the Talmud, but insisted on a hidden sense in the Scriptures. It admitted the Trinity and the incarnation of the Deity, but preserved an artful ambiguity as to the person in whom the Deity was incarnate, whether Jesus Christ or Sabbathai-Zebi. With the death of Frank the whole movement seems to have abated. Of greater significance is the sect of the *Hussidim*, or *Chasidim* (q. v.), or New Saints, or Pietists. The founder of this sect was Rabbi Israel ben-Eliezer Baal-Shem, also called *Besht*, בעש"ט, from the initials of שם טוב. As the tenets of these Saints, who still exist in Poland, Galicia, etc., are given in the article CHASIDIM, we can only refer to it. (B. P.)

Secular Clergy. Parish priests and all who were charged with the cure of souls were named *clerici seculares*, so called as living according to the manners of the time (*seculum*). They were so called in contradistinction to *regular* clergy (q. v.), who belonged to the monastic orders or religious congregations.

Secular Court, DELIVERING UP TO THE, a punishment peculiar to delinquent clergymen. The ancient law comprises it under the name of *curiæ tradi*, and gave to it a different meaning from that which modern use and practice has put upon it. Among the modern canonists it signifies delivering a clergyman up to the secular judge after degradation, to be punished for some great crime with death, or such capital punishment as the Church had no power to inflict. In the old law the *curia* has a larger sense, not only to denote the judge's court, but the corporation of any city. In this there were some servile offices; and when a clergyman was degraded for any offence and reduced to the quality of layman, he was obliged to serve the *curia*, or secular corporation of the city, and that, many times, only in some mean office and servile condition. This was looked upon as being a slave to an earthly power, and precluded him from ever regaining his clerical dignity again, for no *curiale* was allowed to enter the ecclesiastical state. Besides this, there was another way of delivering over delinquent clergymen to the secular courts, which was when they had committed crimes such as were properly of civil cognizance; for clergymen were considered in a double capacity—as ministers of the Church and as members of the commonwealth. See Bingham, *Antiq. of the Christ. Church*, p. 1033.

Secular Power. See SECULAR COURT.

Secular Sermons, in Roman Catholic terminology, are discourses preached at the centennial jubilee of any religious or benevolent institution, association, etc. Their purpose is to review the history and work of the agency in question, or to rehearse the displays of divine grace manifested in and through its life. The scope of such sermons will consequently be determined in each case by the character of the solemnities of which they form a part. An appropriate treatment of the theme selected will include the presentation of noteworthy features belonging to the subject, or the discussion of some religious topic which may be deduced from or il-

lustrated by the occasion in which the celebration takes its rise, followed by direct application of the theme, and concluding with a prayer or doxology or a suitable exhortation. The style and mode of delivery should be solemn. When the celebration is on account of a non-religious subject, the nature of religious discourse requires that it be discussed in its religious or moral bearings.

Secularism, an atheistical movement which prevailed in England during the sixth decade of the present century to an extent that gained it many followers and excited much attention. Its leading apostle was George J. Holyoake, a friend to Robert Owen and his socialistic views. Holyoake and several like-minded associates founded a journal named *The Reasoner*, in 1846, which speedily became the recognised organ of the modern school of English freethinkers. Its governing principle was atheism, though Holyoake and his friends preferred to designate the tendency they represented as *non-theism*, inasmuch as they simply refrained from inquiring whether a Deity exist or not. The term *Secularism* was subsequently applied to the entire movement, whose professed aim was proclaimed to be "to live and die for the world, and to work for the welfare of men in this world." The ethics of the party was comprehended in the phrase "present human improvement by present human means," its law had regard simply to the natural, utilitarian, and artistic aspects of life; its object was merely scientific culture and a suitable provision for the things of this life. The leading, and, indeed, the only principle of the morality of this movement is utility, and the movement itself may be characterized as a thoroughly consistent utilitarianism, and also as an "atheistical ethics built upon the ruins of religion," since no supernatural element is permitted to exercise any influence whatever over the actions of these worldly moralists.

The dogmatics of Secularism, if the term may be applied to a systematic negation of all positive doctrines, is analogous to its ethics in character. It denies that any competent knowledge concerning the existence of God is possessed by the world: matter, though self-existent and eternal, is not God, since it lacks the constituent factors of personality—self-consciousness and free-will. *Experience* teaches that there is no Providence, no Father in heaven. The teleological argument for God's existence is valueless, yielding only a "confused reflection of man's own image:" on the one hand, it leads only to uncertain analogies; on the other, it proves too much, as it becomes necessary, after postulating a most wise Creator of the most wisely arranged creation, to assume a still wiser originator, and so on without end. In this line of argument Holyoake connects himself with the atheistical poet Shelley and the naturalist Geoffroy Saint-Hilaire, and directs his criticism chiefly against Paley's *Natural Theology*. The secularists assert that nothing is known respecting the world beyond the grave, and that we are therefore not to concern ourselves about its conditions; our moral efforts should be wholly expended upon the present world. "If other worlds exist to which we are removed after this life is over, precisely they who have made it their one business to promote the common welfare of mankind in this world will be best able to enjoy them; if there be no hereafter, men evidently stand in their own light if they omit to enjoy this world." (Comp. Holyoake, *The Logic of Death* [Lond. 1849].)

It is to be remarked that the relation between Secularism and the Positivism of Comte (q. v.) is such as to warrant the statement that Secularism is merely the French Positivism translated into English.

See *Positivismus u. Secularismus*, etc., in *Neue Evangel. Kirchenzeitung*, 1863, Nos. 19 and 20; Buchanan, *Faith in God and Modern Atheism Compared* (Lond. 1857, 2 vols.; *The Theory of Secularism* in ii, 223-291, also published separately); *Christian Examiner* for Nov. 1859. See SECULARISTS.

Secularists, the name assumed by a sect of modern unbelievers to express their fundamental tenet that the duties and interests connected with the world which we see around us are those with which alone we have any concern. The Secularists are atheists, so far as they consider the existence of a personal God an open question, for belief in which no sufficient proofs are adduced. They are pantheists, so far as they consider nature to be the only God whose existence can be at all demonstrated. Another essential article of their creed is that "science is the providence of men, and that absolute spiritual dependence may involve material destruction." Science they define to be "those methodized agencies which are at our command; that systematized knowledge which enables us to use the powers of nature for human benefit." The doctrine, then, of the Secularists is that if men properly use the powers of nature which are within their reach, they have no need to resort to prayer, with the view of seeking assistance from heaven. On the subject of morality they maintain that "there exist, independently of Scripture authority, guarantees of morals in human nature, intelligence, and utility." The facts and doctrines of Christianity are, of course, denied by them. Although the Secularists profess to be independent thinkers, their principles are in reality nothing more or less than the echo of rationalism and positivism among the less educated classes of thoughtful men. See Blunt, *Dict. of Sects*, s. v.; Gardner, *Faiths of the World*, s. v.

Secularization, of persons belonging to religious orders in the Roman Catholic Church, is a term which denotes the severing of the vows which bind to poverty and monastic obedience. Permission to this end can proceed only from the papal chair, and is but rarely granted. The persons affected thereby are clergymen in the higher orders of the ministry, who are thus transferred to the secular clergy, and permitted to live outside of their monasteries (*clerici seculares*); and nuns, and the lay brothers and sisters of suppressed convents, who have taken the vows of their orders upon them, and are by this act restored to the world, though *salvo voto castitatis*. Secularization differs from *laicizing*, or entire dissolution of the rule imposed by the order, in that the latter absolves from the vow of chastity and makes marriage valid.

Seculars. In the early Christian Church there existed a distinction between the clergy and laity, the latter being called not only laymen, but also *βιωτικοί*, "seculars" (Chrysostom, *Hom.* 3, in Laz.; *Hom.* 23 in *Rom.*; *Hom.* 35 in 1 *Cor. xiv*; Theodoret, *Com.* in 1 *Cor. xiv*, 16). See Riddle, *Christian Antiquities*, p. 191.

Secundians, a Gnostic sect of the 2d century, owing for their leader Secundus, "who was born," says Hippolytus, "about the same time as Ptolemæus," and thus was contemporary with the immediate followers of Valentinus. Irenæus represents the Secundians as a branch of the Valentinian school (*Hæres.* i, 11, 2); but, although they emanated from that school (Hippolytus, *Refut.* vi, 32, 33), they introduced a principle so distinct as to render Secundus more properly a rival than the disciple of Valentinus. Secundus placed at the head of his *Æons*, whom he appears to have considered as real substances or persons, two principles, Light and Darkness. "He divides the Ogdoad into a pair of Tetrads, a right hand and a left Tetrad, one Light and the other Darkness" (Tertullian, *Adv. Valent.* 38). This admission of the principle of dualism constitutes an essential difference between the Secundians and the Valentinians. It is evidently borrowed from the Oriental philosophy, and brings the Secundians so far nearer the Manichæans. Accordingly, Dörner classes as adherents of the dualism whose character was predominantly physical, the Ophites, Saturnilus, Secundus, and subsequently the Manichæans; as adherents of pantheistic Monism, Valentinus and his widespread school, especially Herac-

leon his contemporary, Ptolemæus, and Marcus (*Person of Christ*, i, append. p. 448). There is also mentioned as a distinction between the Valentinians and Secundus that the latter did not derive the power Acharnoth from any one of the thirty *Æons*, but from the fruits which issued out of their substance (Tertullian, *ut sup.*). He invented first four more *Æons*, and then four in addition (Pseudo-Tertullian, xiii). The Secundians were Docetæ. Augustine (*Hæres.* xii) and Auctor Prædestinati (xii) charge them with gross immorality. The latter adds that they were condemned by Diodorus, bishop of Crete.

Secundinus, the name of two persons in the early Christian Church.

1. A Manichæan of Africa, who wrote against Augustine because of his departure from that heresy. Augustine replied to him, under date of about A.D. 405, in the tract *Contra Secundinum Manichæum*, lib. i, showing why he had embraced orthodox views, and confuting the Manichæans from the letter of his opponent (Migne, *Patrologie*, xlii, *Op. August.* p. 578).

2. A son of the Lombard Restitutus and Dareca, a sister of St. Patrick. He lived in Ireland from A.D. 439, and died at the age of seventy-five, in 459. Secundinus was bishop of Domnach, and composed an ode on St. Patrick during the life of the latter, which was long on the lips of the Irish. It is given in Migne (*Patrologie*, liii, 838). Immediately after having composed the above ode, he died, thus verifying a prediction of St. Patrick. He was buried at Domnach (*Acta Sanctorum*, March 17, p. 523 sq., in the life of St. Patrick).

Secundus (the Lat. word Græcized, *Σεκούνδος*), a Christian of Thessalonica, and one of the party who went with the apostle Paul from Corinth as far as Asia (*ἄχου τῆς Ἀσίας*), probably to Troas or Miletus (all of them so far, some farther), on his return to Jerusalem from his third missionary tour (Acts xx, 4). A.D. 55.

Secundus (heretic). See SECUNDIANS.

Securitas, in Roman mythology, was a personification of security, represented on coins as a quietly gazing matron, with the nether limbs crossed, the left elbow braced against a column, and the right hand placed over the head. She is furnished with a spear, a cornucopia, and an olive or palm branch.

Sedec'as (*Σεδεκίας*), the Græcized form of the Hebrew name Zedekiah (q. v.), applied in the Apocrypha to two men: 1. A person mentioned (Bar. i, 1) as the father of Mæseiah, himself the grandfather of Baruch, and apparently identical with the false prophet Zedekiah in Jer. xxix, 21, 22; 2. The "son of Josiah, king of Judah" (Bar. i, 8), the Zedekiah under whom Jerusalem was destroyed by the Babylonians.

Seder ha-Doroth. See HEILPRIN, JECHIEL.

Seder Kodashim. See MISHNA.

Seder Mo'ed. See MISHNA.

Seder Nashim. See MISHNA.

Seder Nezikin. See MISHNA.

Seder Olam (סֵדֶר עוֹלָם), or the *Succession of the World's History*, is an ancient Jewish chronicle, written by R. Jose ben-Chalaftha, of Sepphoris, who flourished about A.D. 100-150. In thirty chapters it professes to give the history of Israel up to the time of the author, or rather to the termination of the last Jewish war under Bar-cocheba. At the close of the work there are some omissions, which, in part, are compensated by another historical work which bears the same title, but, in contradistinction to the *Seder Olam*, or the *Seder Olam Rabba* (סֵדֶר עוֹלָם רַבָּא)=the *Major Chronicle*, it is designated the *Seder Olam Zutta* (סֵדֶר עוֹלָם זוּטָא)=the *Minor Chronicle*. The best edition of the *Seder Olam* is that by Meyer (Amsterdam, 1699), which appeared together with the *Seder Olam Zutta*, a Latin

translation, and very elaborate annotations. See FÜRST, *Bibl. Judaica*, ii, 107 sq.; ZUNZ, *Gottesdienstl. Vorträge*, p. 85, 138; GRÄTZ, *Gesch. der Juden*, iv, 536 sq.; EDERSHEIM, *Hist. of the Jewish Nation*, p. 263 sq.; STEIN-SCHNEIDER, *Jewish Literature*, p. 32. (B. P.)

Seder Tohorôth. See MISHNA.

Seder Zeraim. See MISHNA.

Sedēs (Lat. *a seat*), a term used by the Latin ecclesiastical writers to denote a bishop's throne, which, with the thrones of his presbyters on each side of it, were arranged in a semicircle above the altar. Some suppose this to have been so arranged in imitation of the Jewish synagogues, in which, according to Maimonides, at the upper end the law was placed in the wall in an arch, and on each side the elders were seated in a semicircle. The bishop's seat was usually covered with some decent material, suitable to the dignity of his office and person. See Bingham, *Antiquities of the Christian Church*, i, 299.

Sedes Apostolica. See APOSTOLICAL.

Sedes Impedita (*a hindered see*). An expression by which the canons designate the state of the papal or an episcopal office when its functions are seriously hindered or altogether interrupted by the force of difficulties from without.

1. The interruption of episcopal functions (*sedes episcopalis impedita*) may be occasioned (1) when outward foes (pagans or heretics) have seized the occupant of the chair and hold him prisoner. In this case the chapter administers the diocese, either directly or through a vicar, until the will of the pope can be ascertained (*Sext. c. 3; De Suppl. Negl. Præl.* i, 8). (2) When a bishop is removed from his diocese and imprisoned by the government of his own country. The chapter must then immediately report the circumstance to the papal chair, and until the case is decided the administration will rest in the hands of the vicar-general on the spot (comp. Phillips and Görres, *Hist.-polit. Blätter*, vol. ii, No. 3, p. 158 sq.). (3) When the bishop has been suspended or excommunicated, or when physical weakness or mental imbecility unfits him for the further exercise of his office. Since in the former case the action emanated directly from the papal chair, and that action operates to destroy the official authority of the vicar-general at the same time (*Sext. c. 1; De Off. Vicar.* i, 18), the pope at once makes provision for the temporary government of the diocese. In the latter case an episcopal coadjutor must be appointed.

2. Papal functions are interrupted (*sedes apostolica impedita*) when the pope is imprisoned and prevented from administering his office, in which case as many cardinals as may be available perform its functions so far as strict necessity requires, or as the provisional directions of the pope himself may allow; or when hostile powers prevent access to the papal chair or render it extremely difficult. In this case the authority of bishops within their dioceses is extended to take such provisional action as may become necessary, but in harmony with the current practice of the apostolical chair.

Sedes Vacans (*a vacant see*), strictly a vacancy of the papal or an episcopal chair, since the term *sedes* (ἑρῶνος) is applied only to *apostolica*, i. e. Roman and other episcopal sees; but it is in use extended to abbeys, prelatures, and all dignities to which the right of collating to benefices belongs. For the rules which govern in the event of the vacation of the papal chair, see CARDINAL; CONCLAVE; POPE. This article will be devoted to the subject with reference to bishoprics only.

A *sedes vacans* occurs by death, resignation, translation, deprivation, etc., and continues until a successor has been regularly installed. The current business of a bishopric during such interim was formerly administered by its presbytery, but subsequently, after the 4th century, by an officer termed *intercessor*, *interventor*,

visitator, or *commendator*. A provision was made that the see should be filled within a year, in order to prevent the seizure of the office by the temporary administrators, and also to hinder secular lords from appropriating the income of a vacant see. Still later the temporary administration was intrusted to the chapters, at first in *spiritualia*, and afterwards in temporalities as well. The modern usage is based on the decisions of the Council of Trent and of the *Congregatio Concilii*. The episcopal jurisdiction during a vacancy inheres in the chapter, but is administered by one or more "economists" and a *capitular vicar*, who may be the general vicar of the late bishop, and all of whom must be appointed within eight days after knowledge of the vacancy has been obtained. The capitular vicar must be a doctor or licentiate of canon law, or else possess abilities in that direction, and must be taken from the chapter if a suitable person can be found. When there is no chapter, or when the chapter neglects to appoint administrators, the metropolitan is empowered to act in its stead if the church be a suffragan church, the oldest suffragan bishop if it be a metropolitan church, and the nearest bishop if it be an exempt church. The capitular vicar is not the agent of the chapter in this instance, but administers independently; and he is not liable to be deprived of his office without sufficient reason, the determining of which does not rest with the chapter, but with the *Congregatio super Negotiis Episcoporum*. Certain general limitations, however, restrict his action. All episcopal rights which inhere in the *ordo episcopalis*, or are delegated by the pope, are in abeyance during the vacancy, except as provision for their exercise is otherwise made by the *curia*, or circumstances compel the employment of a neighboring bishop. A year of mourning (*annus luctus*) is appointed, during which no orders may be conferred within the bishopric, except they become necessary to administer a benefice which has been, or is about to be, received. Nor may the capitular vicar dispose of benefices which are subject to the bishop's collation, or the income of the diocese be in any way employed, except perhaps to pay the salary of the administrator. No real estate may be transferred to other hands, and, in general, no change which might result in disadvantage to the future bishop may be introduced. The *sedes vacans* ends with the installation of the new bishop, who is authorized to exact a complete account of the bishopric and its administration during the interim. A *quasi vacans* is distinguished from the *sedes vacans*, for which see SEDES IMPEDITA.

On the general subject, comp. the literature given in Pütter, *Lit. des deutsch. Staatsrechts*, vol. iii, § 1461; in Klüber's *Fortsetzung*, vol. iv, § 1461, p. 528, 529; Ferraris, *Bibliotheca Canonica*, s. v.; Ritter, *Der Capitular-Vikar* (Münster, 1842); Rau, *Rechte der Domcapitel*, etc., in the *Tüb. theol. Quartalschrift*, 1842, iii, 365-412; Huller, *Die jurist. Persönlichkeit. d. kath. Domcapitel in Deutschland* (Bamberg, 1860).

Sedgwick, OBADIAH, a Nonconformist divine, was born at Marlborough, in Wiltshire, England, in 1600, and educated at Queen's College and at Magdalen Hall, Oxford. He became chaplain to lord Horatio Vere, whom he accompanied to the Netherlands. Returning to Oxford, he was admitted to the reading of sentences in 1629. He preached at St. Mildred's, London, until interrupted by the bishop, and in 1639 became vicar of Coggeshall, Essex. In the rebellion he took part against the Church and State. In 1646 he was preacher at St. Paul's, Covent Garden; and, retiring to Marlborough, he died there in January, 1658. The principal of his works are, *The Fountain Opened* (1657)—*An Exposition of Psalm xliii* (1658, 4to)—*The Anatomy of Secret Sins* (1660)—*Parable of the Prodigal* (1660)—*Synopsis of Christianity*.

Sedilē (plur. *sedilia*), the Latin name for a seat, a term which in modern times has come to be pretty gen-

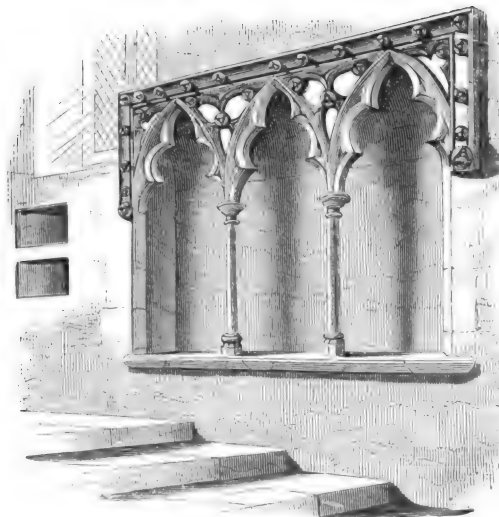

erally applied by way of distinction to the seats on the south side of the choir near the altar in churches, used in the Roman Catholic service by the priest and his attendants, the deacon and subdeacon, during certain parts of the mass; or in the Episcopal Church for the priests and deacons during the eucharistic service. Sedilia were sometimes movable, but more usually in England were formed of masonry and recessed in the wall like niches. Sedilia are comparatively rare on the Continent, but very numerous examples remain in Great Brit-

(though the back is slightly recessed), with stone elbows resembling an arm-chair: this is popularly called the confessional. At Beckley Church, Oxfordshire, is also a single stone seat with one elbow.

Sedition. In the early Church, kings and emperors were looked upon as political parents, whose authority and majesty were reputed sacred and supreme under God. All disloyalty or disrespect shown them, either in word or action, was always severely chastised by the laws of the Church. For the first three hundred years, Christians gloried over the heathens in this, that though the emperors were heathen, and some of them furious persecutors of the Christians, yet there were never any seditious or disloyal persons to be found among them. The fourth Council of Carthage forbids the ordination of any seditious person. The fourth Council of Toledo orders all clergymen that took up arms in any sedition to be degraded from their order, and to be confined to a monastery to do penance all their lives. See Bingham *Antiq. of the Christ. Church*, p. 985 sq.

Sedlnitzky, LEOPOLD VON, formerly prince-bishop of Breslau, was born July 29, 1787, at Gempersdorf, in Austro-Silesia. Appointed for the Church, he was educated accordingly, and in 1798 the cathedral chapter of Breslau already nominated him as dean. In 1804 he commenced his studies at the Breslau University, where ex-Jesuits or their pupils were his teachers. In 1830, Sedlnitzky (not Seldnitzky, as Dr. Kurtz has it) was made provost of the chapter, and in 1835 prince-bishop. In the different positions which Sedlnitzky occupied, he had the best opportunity of seeing the doings of the hierarchy. A rupture with the see of Rome became finally a mere question of time, and on May 10, 1840, he resigned his bishopric. Frederick William IV, then king of Prussia, appointed him as member of the council of state, and thus he was obliged to take up his abode at Berlin. He now studied Church history and symbolics. The authority of the councils lost its power with him, as not founded upon the Holy Scriptures. He saw that the faith in the free grace of God in Christ, and not the episcopal government, was the uniting link of the Church. At first he attended the divine service of his Church, but this he soon abandoned, and listened to the preaching in different evangelical churches. He had a great desire for the Lord's supper, and it was a great pain to him to be deprived of this communion with the Lord and the brethren. After many hard inward struggles, he resolved in 1863 to join the evangelical Church, and in the church of Friedrich Werder he partook of the Lord's supper. From his own means he founded two institutions at Berlin—the Paulinum in 1862 and Johanneum in 1864—both for the education of teachers for the school and Church. In Breslau, also, he founded an institution for evangelical students of theology. Sedlnitzky died May 25, 1871, being the first Roman Catholic bishop who after the time of the Reformation became a convert to the evangelical Church. See Kurtz, *Lehrbuch der Kirchengeschichte* (1874), ii, 262, especially the autobiography of Sedlnitzky, which was published in 1872, and which is an important contribution to modern Church history. For a review of this biography, see Hauck, *Theologischer Jahresbericht*, 1871, vii, 700 sq. (B. P.)

Sedulius, Caius Coelius (or CÆCILIUS), a priest and Christian poet in the reigns of Theodosius II and Valentinian III. Little is known respecting his parentage and life. He is said to have taught philosophy and rhetoric in Italy, and to have subsequently become a priest in Achaia, and ultimately a bishop. The year of his death is not known. He obtains recognition chiefly as the author of a number of religious writings, among

Chesterton, Oxfordshire.

ain, a few of which are of as early date as the latter part of the 12th century; but the majority are later, extending to the end of the Perpendicular style. The earliest form in the catacombs, and repeated at St. David's, was a bishop's throne flanked by collateral seats. In general they contain three separate seats, but occasionally two, or only one, and in a few rare instances four, as at Rothwell Church, Northamptonshire, and Furness Abbey; or five, as at Southwell Minster; sometimes a single seat under one arch, or formed on the back of a window, is found, long enough for two or three persons. They are very commonly placed at different levels, the eastern seat being a step the highest and the western the lowest; but sometimes, when three are used, the two western seats are on the same level, a step below the other, and sometimes the two eastern are level and the western a step below them. The decorations used about them are various, and in enriched buildings they are occasionally highly ornamented, and sometimes sur-

mounted with tabernacle-work, pinnacles, etc. Some ancient sedilia consist of plain benches formed of masses of masonry projecting from the wall, and it is not improbable that such may have once existed in some of the churches in which no traces of these seats are now to be found. At Lenham Church, Kent, is a single seat projecting considerably from the wall

Sedile, Lenham, Kent.

them the hexameter poem *Carmen Paschale*, etc., in which Old-Test. miracles, the miracles of Christ's life, and finally his death, resurrection, and ascension, are treated—the whole in opposition to the heretical views of Arius and Sabellius. Various editions of this poem have been published—by Cellarius (1704), Gallandi (1773), and others, the latest edition being by Arevalo, or Aurival (Rome, 1794). In response to the request of the priest Macedonius, Sedulius translated the work into prose, and called it *Opus Paschale*. Two other hymns are also attributed to him—namely, *Elegia*, or *Collatio Veteris et Novi Testamenti*, and *A Solis Ortus Ordine*, an acrostic on the life of Christ which is sometimes called the *Abeccedarius*.

Sedulius, Scotus (or JUNIOR), a Christian writer of the 8th century, of whose works we possess, *Collectanea in Omnes Epistolas S. Pauli* (first published at Basle [1528], and afterwards in the *Bibliotheca Max.* [Lugd. 1677] tom. vi):—some exegetical labors on the first three Gospels published by cardinal A. Mai in the *Scriptorum Veterum Collectio Nova*, tom. ix:—and a political and religious work entitled *De Rectoribus Christianis et Conventibus Regulis, quibus Res Publica rite Gubernanda est* (first published at Leipsic in 1619). The MS. belonged to the library of the Heidelberg University, with which it was taken to Rome in 1622, and has been admitted into the *Spicilegium Romanum Vaticanum* (Rom. 1339-1844), tom. x, of cardinal Mai. In tom. vii of the latter work may also be found *Explanaciones in Præfationes S. Hieronymi ad Evangelia* by Sedulius. Comp. *Dictionnaire Historique et Critique*, par Pierre Bayle (Rotterdam, 1720), tom. xxx, p. 2562 sq.; *Biog. Universelle* (Paris, 1825), tom. xli, p. 436 sq.

See (properly רָאָה, *ra'ah*; εἶδον, *eidon*), a term used in Scripture not only of the sense of vision by which we perceive external objects, but also of inward perception, of the knowledge of spiritual things, and even of the supernatural sight of hidden things—of prophecy, visions, ecstasies. Hence it is that those persons were formerly called seers who afterwards were called *Nabi*, or prophets, and that prophecies were called visions. See SEER.

The verb *to see* is Hebraistically used to express all kinds of sensations. It is said (Exod. xx, 18) that the Israelites *saw* voices, thunder, lightnings, the sound of the trumpet, and the whole mountain of Sinai covered with clouds or smoke. To see good, or goods, is to enjoy them. "I believed to see the goodness of the Lord in the land of the living" (Psa. xxvii, 13), i. e. I hope that God will bring me back into my own country, into the land of Judæa, where I shall live in peace and prosperity. Job says (vii, 7), "I shall die, and see no more; I shall no longer enjoy the good things of this world." The psalmist says (Psa. iv, 6), "There be many that say, Who will show us any good?" that is, to enjoy any happiness in this life.

By an easy metaphor from this, *to see* the face of the king is to be of his council, his household, or to approach him. The kings of Persia, to maintain their respect and majesty, seldom permitted their subjects to see them, and hardly ever showed themselves in public. None but their most intimate friends or their familiar domestics had the honor of beholding their faces (Esth. i, 10, 14). Frequent allusion is made to this custom in Scripture, which mentions the seven principal angels that see the face of the Lord and appear in his presence (Rev. i, 4).

See (Lat. *sedes*, a seat), the seat of the bishop's throne, and used also to denote the whole extent of his episcopal jurisdiction.

SEE, APOSTOLICAL. This term, under the full form of "holy apostolical see," is now used to designate the jurisdiction and power of the pope as bishop of Rome. But anciently every bishop's see was dignified with the title of *sedes apostolica* [see APOSTOLICAL], as deriving

its authority through its succession from the apostles. See APOSTOLICAL SUCCESSION. Pope Siricius himself (Siric. Ep. iv, c. 1) gives all primates the appellation *apostolici*. St. Augustine, Sidonius Apollinaris, and others make no distinction in favor of the bishop of Rome. See Bingham, *Antiq. of the Christ. Church*, p. 22, 67.

See, ANDREW J., a minister of the Methodist Episcopal Church, South, was born Dec. 6, 1832, and joined the Church when about fifteen. He was licensed to preach in 1854, in the fall of which year he was admitted on trial into the Memphis Conference. He labored without intermission until his death, in 1871. See *Minutes of Annual Conferences*, 1871, p. 577.

Seed (זֶרַע, *zera*; σπέρμα). The seed-time of Palestine (Lev. xxvi, 5) for grain came regularly in November and December (Lightfoot, *Hor. Hebr.* p. 340, 1003; Korte, *Reis.* p. 432). Since the harvest began in the middle of Nisan, the time of growth and culture was about four months (John iv, 35; see Lücke, *ad loc.*). But this was certainly a very general reckoning, and perhaps had become proverbial. (In this passage the word *érti*, yet, does not seem to accord with this explanation; see also Anger, *De Temp. Act. Ap.* p. 24 sq.; Wieseler, *Chronol. Synops.* p. 216 sq.; Jacobi, in *Stud. u. Krit.* 1838, p. 858 sq.). See AGRICULTURE.

Sowing was done by the hand, as often with us, though according to the Gemara (*Baba Metsia*, fol. 105) the Jews used machines also for this purpose (Otho, *Lex. Rab.* p. 685). The seed when sown and the young plants have more enemies in the East than even here: not only drought, hail, mice (1 Sam. vi, 5), fire, but also grasshoppers and locusts (see these words), often destroy promising harvests. The following legal regulations are found in the Pentateuch:

1. Two kinds of seed, as wheat and barley, must not be sown on the same land (Lev. xix, 19; comp. Josephus, *Ant.* iv, 8, 20). The Talmudists (Mishna, *Chilrim*, ii, 8) say that between two fields sown with different seeds must intervene either fallow ground or a ditch, path, or wall; but the law does not include garden beds (*ibid.* iii, 1; *Shab.* ix, 2). Michaelis (*Mos. R. iv*, 320 sq.) strives to show that the lawgiver meant simply to require a careful sorting of the seed, which is recommended by the ancients as very advantageous (Virgil, *Georg.* i, 193 sq.; Varro, *R. R.* i, 52, 1), and which would render impossible the springing-up of weeds (especially the *Lolium temulentum*). But this cannot be supported, and a custom so advantageous to the agriculturist did not need the authority of law. Lappenberg (in the *Brem. u. Verdensch. Biblioth.* v, 937 sq.) gives a purely theological exposition of it; and perhaps other parts of the law furnish an easier explanation of this class of regulations than this one. See DIVERSE. The more exact requirements of the rabbins will be found in the Mishna (*Chilaim*, ch. i-iii). They are very trifling, and sometimes show a disposition to evade the law; but even anciently it was not so strictly enforced as to prevent giving a field of barley a border of spelt (Isa. xxviii, 25; see marg. A. V.). In general the rule is confined to Palestine, and the Jews do not refuse elsewhere to enjoy the fruit of mixed harvests (comp. Hottinger, *Hebr. Leges*, p. 376 sq.; Darsov, *De Modis Seminandi Diversa Semina Hebr. Vet.* [Viteb. 1695]).

2. Lev. xi, 37 sq. provides that seed set apart for sowing should remain clean if the carcass of a creeping beast fell upon it; but if it had been wet, it should be made unclean, perhaps because wet seed takes up impurities far easier than dry (comp. the analogy, ver. 34). Similar is the law of purification in the Zendavesta (ii, 335, Kleuker), and a similar distinction of wet and dry is observed among the Arabs still (Niebuhr, *Beschr.* p. 40).

By an easy metaphor, *seed*, as the prolific principle of future life, is taken in Scripture for *posterity*, whether of man, beasts, trees, etc., all of which are said to be sown and to fructify as the means of producing a suc-

ceeding generation (Jer. xxxi, 27). Hence seed denotes an individual, as Seth in the stead of Abel (Gen. iv, 25 etc.), and the whole line of descent; as the seed of Abraham, of Jacob, etc., the seed royal, etc., much in the same acceptation as children. The seed of Abraham denotes not only those who descend from him by natural issue, but those who imitate his character (Rom. iv, 16), for if he be "the father of the faithful," then the faithful are his seed by character, independent of natural descent; and hence the Messiah is said to see his seed, though, in fact, Jesus left no children by descent, but by grace or conversion only (Isa. liii, 10). This is occasionally restricted to one chief or principal seed, one who by excellence is the seed, as the seed of the woman (Gen. iii, 15; Gal. iii, 16), the seed of Abraham, the seed of David—meaning the most excellent descendant of the woman, of Abraham, of David. Or understand by the "seed of the woman" the offspring of the female sex only, as verified in the supernatural conception of Jesus (Matt. i, 18, etc.; Luke i, 26, etc.), and of which the birth of Abraham's seed (Isaac) was a figure. See below.

Seed is likewise taken figuratively for the Word of God (Luke viii, 5; 1 Pet. i, 23), for a disposition becoming a divine origin (1 John iii, 9), and for truly pious persons (Matt. xiii, 38).

SEED, THE ONE (Gal. iii, 16). The logic of this passage has eluded the search of our best critics, and yet it is worth pursuing, even against hope. The question involved is one purely of grammar, and particularly of Hebrew grammar—namely, How may we determine the number of זרע, when it is plural and when singular? This word, when representing the seed of plants, forms a regular plural like other masculine nouns; but when used for posterity, it never changes its form: in this use it resembles our English word *sheep*. We must, then, have recourse to the construction, and this is found to be very peculiar. The adjective is always singular, like itself, although the subject be numerous as the stars (Ezra ix, 2; Job v, 25; xxi, 8; Psa. xxxvii, 25; cxii, 2). With verbs it is construed as a collective noun, the verb varying according to the circumstances, with no marked peculiarity. In connection with pronouns, the construction is entirely different from both the preceding. A singular pronoun marks an individual, an only one, or one out of many; while a plural pronoun represents all the descendants. This rule is followed invariably by the Sept., which always puts the pronouns of ἀντίπα in the *constructio ad sensum*, just as the apostle does in the text, καὶ τῷ ἀντίπαρι σου. "Ὁς ἐστὶ Χριστός. Peter understood this construction, for we find him inferring a singular seed from Gen. xxii, 17, 18, when speaking to native Jews in the city of Jerusalem before Paul's conversion (Acts iii, 26), as David had set the example a thousand years before (Psa. lxxii, 17). Read this in the Sept.

זרע, in the singular form, takes the pronouns plural in the following places: Gen. xv, 13; xvii, 7; Exod. xxx, 21; Lev. xxi, 17; 2 Kings xvii, 20; 2 Chron. xx, 7, etc.; Neh. ix, 2, etc.; Psa. cvi, 27; Isa. lxi, 9; Jer. xxiii, 8; xxxiii, 26; xli, 27; Ezek. xx, 5–11. זרע, in the same singular form, has pronouns singular in the following: Gen. iii, 15; xxii, 17; xxiv, 60; 1 Sam. i, 11; 2 Sam. vii, 12; 1 Chron. xvii, 11. These passages embrace seventy-one pronouns in all—twenty-three singular and forty-eight plural. They are all the places where the pronoun represents זרע. Pronouns merely in apposition do not come under the rule. This presents a syntax different from the word, showing that *seed* has a double construction. The distinction made by Paul is not between one seed and another, but between the one seed and the many; and if we consider him quoting the same passage with Peter (*loc. cit.*), his argument is fairly sustained by the pronoun "his enemies." *Seed* with a pronoun singular is exactly equivalent to *son*. It is worth noting that the Aramæan relatives of

Rebekah have retained the peculiar syntax of the covenant, where our translators missed the mark, in Gen. xxiv, 60, "Those who hate *him*." Whether these Syrians understood the Messianic aspect of the promise, or whether, like the Sept., *who did not see* the ὁ ἐρχόμενος, they merely followed the grammar, their language conveys the idea of *One* among the thousands of millions who will subdue all *His* haters.

Isa. xlviii, 19, as it stands in our Hebrew Bibles, furnishes an exception to the principle laid down above. If we should attach importance to *one* exception, occurring in a composition highly poetical, against three-score plain examples, it is to be observed that the Sept. has a different reading, and Lowth prefers it—thus removing all difficulty in the case.

With this clue to the Abrahamic covenant, and through it to the protevangel, we arrive with precision at the unity of the seed promised there—the *He* that shall bruise Satan on the head. The masculine singular copied by the Sept. is twice used in that promise. He is the God of peace who bruises Satan (Rom. xvi, 20). (R. H.)

Seeded, a phrase indicating that tapestry, hangings, or church vestments were, for their greater ornamentation, sprinkled over at regular intervals with pearls, anciently called "seeds."

Seekers, a small sect of Puritans which arose in England in 1645, and was afterwards merged in that of the Quakers. The Seekers derived their name from the employment in which they represented themselves as being continually engaged, that of *seeking* for the true Church, ministry, Scriptures, and ordinances, all of which, they alleged, had been lost. Baxter (*Life and Times*, p. 76) says of them, "They taught that our Scripture was uncertain; that present miracles are necessary to faith: that our ministry is null and without authority, and our worship and ordinances unnecessary or vain." They and the Rationalists were promoters of the deism of England. See Hagenbach, *Hist. of Doctrines*, ii, 238.

Seelen, JOHANN HEINRICH VON, a German theologian, was born Aug. 8, 1688, at Asel, near Stade. In 1713 he was called as conrector to Flensburg, in 1715 to Stade, and in 1718 as rector to Lübeck, where he died, Oct. 22, 1762. Seelen was a voluminous writer. His most important work is his *Meditationes Ezegeticae, quibus Varia Utriusque Testamenti Loca Expenduntur et Illustrantur* (Lübeck, 1730–37, 3 pts.). He also wrote dissertations on different passages of the Scripture, for which see Fürst, *Bibliotheca Judaica*, iii, 305 sq.—Winer, *Handbuch der theologischen Literatur*. (B. P.)

Seel-stone, a mediæval mason's term for that stone which was placed on the top of a niche or tabernacle to crown and complete it. "Item, for garnysing ye seel-stone, iis. iyd."

Seely, AMOS W., a (Dutch) Reformed minister, was born in New York city in 1805. He graduated from Union College in 1828, and from Princeton Theological Seminary in 1831. His ministry was spent chiefly in the Reformed Church in Western New York, and was greatly blessed in its results. He was a plain, earnest, practical preacher; a man of guileless character and tender piety. He died in 1865. He published two works which passed through several editions, *Doctrinal Thoughts and Practical Thoughts*. See Corwin, *Manual of the Reformed Church*. (W. J. R. T.)

Seelye, EDWARD E., D.D., a (Dutch) Reformed minister, was born at Lansingburgh, N. Y., in 1819, and graduated at Union College in 1839, and at Princeton Theological Seminary in 1843. Until 1858 his ministry was exercised in the Presbyterian Church of Stillwater, N. Y., from 1843 to 1850, and Sandy Hill, N. Y., from 1850 to 1858. At the latter date he removed to Schenectady as pastor of the First Reformed Church, where he died in 1865. Mr. Seelye's physique was tall, large,

rugged, and indicative of the best of health. His mind was vigorous, comprehensive, and direct. His preaching was orthodox, logical, scholarly, instructive, interesting, and warm-hearted. His delivery was impressive and popular. He left a valuable posthumous work entitled *Bible Emblems*, which has been printed by the American Tract Society, New York. See De Baun [Rev. J. A.], *Tribune*. (W. J. R. T.)

Seemiller, SEBASTIAN, a Roman Catholic doctor of divinity, was born Oct. 17, 1752, at Velden, in Lower Bavaria, and died April 25, 1798. He wrote, *Exercit. Philol.-theologicæ ad Illustranda et Vindicanda quadam Primi Capitis Geneseos Loca* (Nuremb. 1776):—*Hermeneutica Sacra* (Augsburg, 1779):—*De Græcis Bibliorum V. T. Versionibus Dissertatio Historico-critica* (Ingolst. 1788):—*Septem Psalmi Penitentiales* (ibid. 1790):—*Quindecim Psalmi Graduales* (ibid. 1791). See Fürst, *Biblioth. Jud.* iii, 307; Winer, *Handbuch der theol. Literatur*. (B. P.)

Seeney, ROBERT, a minister of the Methodist Episcopal Church, was born Oct. 12, 1797. He graduated at Columbia College in 1817, and soon afterwards united with the Church. In 1820 he was received on trial in the New York Conference, and labored with great acceptability in its most important stations. In 1852 he was placed upon the supernumerary list, but continued to preach until he received a paralytic stroke in the left side. On July 1, 1854, he was attacked by a more violent stroke upon the right side, from which he could not rally. As a preacher, Mr. Seeney was chaste, clear, and forcible; as a Christian he was artless, affable, and faithful. See *Minutes of Annual Conferences*, 1855, p. 545.

Seer is the almost invariable rendering in the A. V. of נָבִי, *chozêh* (which is otherwise translated only in Isa. xxviii, 15, "agreement;" xxx, 10, "prophet;" xlvii, 13, "gazer;" Ezek. xiii, 9, 16; xxii, 28, "that see," etc.), and occasionally (1 Sam. ix, 9–19; 2 Sam. xv, 27; 1 Chron. ix, 22; xxvi, 28; xxix, 29; 2 Chron. xvi, 7, 10) of רוֹעֵה, *rôêh*; while the tantamount and technically used *prophet* is usually denoted by נָבִי, *nabi* (on the meaning and etymology of which see Hartmann, *3d Excurs.* to his *Uebers. d. Michna*, p. 219 sq.; Paulus, *Ezegel. Conservat.* ii, 122 sq.; and the different views of Redsløb, *Der Begr. d. Nabi* [Leips. 1889]; Ewald, *Proph.* 1, 6 sq.; Hävernick, *Einleit. ins A. T.* II, ii, 6 sq.). All three names are used, though applied to different persons (1 Chron. xxix, 29); and the Chronicles hold this distinction throughout—calling, e. g., Samuel *rôêh*, Gad *chozêh*, and Nathan *nabi*—a distinction, to a great extent, lost in the A. V., where the first two are confounded. According to 1 Sam. ix, 9, *rôêh* was the older name for prophet, and it is especially applied to Samuel; *nabi* is the most usual word; *chozêh* perhaps passed from the ritual language into that of history. It is found almost solely in Chronicles.

These words were applied, in Hebrew antiquity, from Samuel's time until after the return from captivity, to men inspired by God (comp. Amos iii, 7; 2 Pet. i, 21, by the *spirit of Jehovah*; Ezek. xi, 5; xxxvii, 1, expressed in different forms; iii, 14; 2 Chron. xxiv, 20; comp. Gesen. *Comment zu Is.* i, 338; *Thesaur.* ii, 742) who comprehended the principles of the theocracy, and were devoted to them, denouncing in energetic terms all that tended to undermine them; though in earlier days the name of prophet had been given to those who stood in relations of confidence with God (Gen. xx, 7; Exod. vii, 1; xv, 20, etc.). Of the activity of these prophets among foreigners but one example is given (Jonah 1, 2 sq.). At first they appear but occasionally, where the welfare of the people is in danger, or as counsellors of the theocratic kings (1 Sam. xxii, 5; 2 Sam. vii, 2 sq.); but when the kingdom was divided, a wider field was open to them (2 Kings xvii, 13 sq.). As the fate of the people drew near, they raised their voices the more earnestly—re-buking now idolatry, religious affectation, immorality;

now the wicked and selfish government, and the false policy of the king and the grandees of the realm; now warning or threatening the thankless people with the judgments of Jehovah; now casting a glance to the ennobled form of the theocracy again arising from this ruin of the national welfare and honor. Public places—markets (Amos v, 10; Isa. xxix, 21), streets, the courts of the Temple (Jer. vii, 1; xix, 14; xxvi, 2; comp. xxix, 26)—were usually the localities of their action (xxv, 2). But they also went, though not welcome then, to the palaces of kings and their noblemen (Isa. xxii, 15), shunning no danger or repulse (Ezek. xiii, 5). Thus their order formed a beneficial balance against the misuse of the royal power, the narrow sympathies and dullness of the priests, the untheocratic tendencies of the people themselves, and accomplished a portion of that which is expected in modern times from representatives of the people and the free press. It would be proper to call the prophets *demagogues*, in the original and best sense, as popular leaders (De Wette, *Christl. Sittenl.* II, i, 32). Since in the theocracy religious and political elements were mingled, the subject and the aim of the efforts of the prophets belonged sometimes to the one class, sometimes to the other; but was never merely political, since a religious reference is found in all. Their views could not be limited to the present, but extended to the future which should succeed it (comp. Von Raumer, *Vorles. über allgemeine Gesch.* i, 153; Ewald, *Proph.* i, 24); but usually not to a distant future, severed by centuries from the present. This we learn by an unprejudiced examination of the prophecies yet remaining, and a comparison of their contents with the historical standpoint of the authors. Indeed, the minute prediction of very distant events, overlapping the immediate future, would have had no purpose for the generation then living, nor would it have furthered the interests of the theocracy as a holy community. Yet Eichhorn has pressed this view too far (*De Prophet. Poes. Hebr. Paralip.*, in the *Comment. Soc. Gotting. Rec.* v). The image of the future suggested by the prophets is naturally connected with the present of the author; hence we can often, as in the Chaldee period, trace a chronological progress from the indefinite and general to the definite and special. Only in one group of prophecies did they leave the relations and circumstances of their own times and direct the people to a distant ideal future, when, not satisfied with the immediate future, they speak of the Messiah and his blessed kingdom to come; and it was this hope of the Messiah and the renewal of their kingdom under him, set forth and cherished by the prophets, which gave the religious life of the nation that new, peculiar impulse which secured them so important a place in the history of religion and of man (comp. Crusius, *Bibl. Theol.* p. 39 sq., 67; De Wette, *Christl. Sittenl.* II, i, 34). The form of the prophetic representations was simple and artless; sometimes in dialogue (Jer. xxviii), yet never without the rhythm which is so natural to the rapid speech of the Orientals; never without imaginative elevation (comp. Ewald, *Ausführ. Lehrb. d. Hebr. Spr.* p. 138 sq.; Umbreit, *De V. T. Prophetis Claris. Antiq. Temp. Orat.* [Heidelb. 1832]; Ewald, *Propheten.* i, 49 sq.), and often was poetical (Amos v, 1 sq.; Isa. v, 1). The early prophecies seem to have been accompanied by music, which was used as an aid to religious feeling (2 Kings iii, 15), and all of them by energetic gestures; and often symbolic actions were connected with them (1 Kings xi, 29 sq.; Jer. xix, 1 sq.; xxviii; xxxv; xliii, 9 sq.; Ezek. iv; xii, 3 sq.; xxiv, 3 sq.; xxxvii, 15 sq.), or symbolic costume (Isa. xx, 2 sq.; comp. Stäudlin, *Neue Beitr. zur Erläut. d. bibl. Proph.* p. 123 sq.; see Jahn, *Einleit.* ii, 395; Gesen. *Com. zu Is.* i, 645). It should be borne in mind that the inhabitants of warmer climates are more prone to such off-hand oratory by their active imagination. Yet the comparisons sometimes instituted between the Hebrew prophets and the Italian improvisadores or the Greek seers (μάντις; Ritter, in Scherer's *Schriftforsch.* i, 372 sq.) are worth-

less (so De Wette, *Pr. de Prophetar. in V. T.* [Berl. 1816]; also in his *Opusc. Theol.* p. 16 sq.; Stiekel, *De Prophet. Heb.*, in Illgen's *Zeitschr.* V, ii, 55 sq.). The impulse to speak in the Hebrew prophets must be sought deeper than in the natural activity of imagination.

At a later day (after the 9th century B.C.; comp. Eichhorn, in his *Biblioth. f. bibl. Lit.* x, 1077 sq.) prophetic writing became connected with prophetic utterance (Ewald, *Isr. Gesch.* iii, 351 sq.), at first to preserve with certainty the contents of important predictions (Isa. viii, 1, 16; comp. xxx, 8), or in obedience to a divine command (Jer. xxx, 2; xxxvi, 2, 28; comp. Rev. i, 11, 19; xxi, 5); hence, perhaps, first simply records of their utterances to the people, and then often addresses penned as soon as conceived and given in writing to the people through amanuenses (comp. Pries, *De Prophetis et Apost. Amanuens. Opera in Scribend. Usis* [Rostock, 1757]), or even borne by messengers to a distance (Jer. xxix; comp. 2 Chron. xxi, 12). The people attached great value to the intercession of the prophets with God (Jer. xlii, 2). This accorded with their relation to Jehovah and was part of their calling (vii, 16; xi, 14; xiv, 11; comp. Job xlii, 8, 10). Besides their labors for the protection and advancement of the theocracy, the prophets were often useful to their countrymen and even to foreigners (2 Kings v) by their medical and scientific knowledge and skill (ii, 19 sq.; iv, 38 sq.; xx, 7 sq.; comp. 1 Kings xiv, 2 sq.), and, filled with the spirit of God, even wrought miracles [see ELIJAH; ELISHA] (comp. Luke vii, 16). So there seem to have been theocratic historians, perhaps before the prophets became writers, who, sharing the views and sympathies of the prophets, wrote the history of a reign or of a period, mingling with it more or fewer prophetic utterances (2 Chron. ix, 29; xii, 15; xiii, 22; xxvi, 22; xxxii, 32; comp. Gesen. *Comment. zu Is.* i, 24 sq.).

The dress of the prophets was usually a long folding mantle (1 Kings xix, 13; 2 Kings ii, 8, 13) of coarse, hairy stuff (Zech. xiii, 4; 2 Kings i, 8), without care as to the cut (hence *sak*, סַק, Isa. xx, 2), and held together by a leather girdle (2 Kings i, 8); a dress which corresponded best with the serious nature of the prophet's calling (comp. Matt. iii, 4; see Henke, *Mag.* iv, 191 sq.; Nicolai, *De Proph. Jud. Vestitu* [Magdeb. 1744]; comp. the cloak or *pallium* of the Greek philosophers; Ferrar, *De Re Vest.* ii, 4, 14. On the clothing of the Eastern dervishes, see Harmer, *Observ.* iii, 374 sq.). It is not strange that the prophets, on the one hand, were the objects of superstitious veneration (comp. 1 Kings xvii, 18), and, on the other, by their bold reproof of all impiety and wickedness, became, as the fate of the state grew certain, more and more subject to the opposition and open persecution of the priesthood and of despotic or idolatrous kings. In the kingdom of Israel they were first oppressed, and almost exterminated (xviii; xix, 14, 19), sharing under Ahab the fate of all pious worshippers of Jehovah. Only under the pressure of necessity did the kings there apply to them (xxii, 7 sq.; 2 Kings iii, 11 sq.; vi, 12 sq.); and they were forbidden to address the people (Amos vii, 10 sq.). This was a censorship wielded by the priests. From 2 Kings iv, 23, we see that on Sabbaths and new moons the pious Israelites met for worship with one of the prophets. But this was not so general as to justify us in saying that the prophets took the place of the Levitical priesthood (comp. ver. 42), although it is certain that the worship and knowledge of Jehovah in the kingdom of Israel were supported mainly through the prophets. In the kingdom of Judah the prophets were early met by infidel mockery (Isa. v, 19; xxviii, 10, 22), or by a sense of security that heeded no alarm (Mic. ii, 6 sq.). We are told that Manasseh slew some prophets every day (Josephus, *Ant. x.* 3, 1; comp. 2 Kings xxi, 16); it is more certain that Asa imprisoned the seer Hanani (2 Chron. xvi, 10); that under Jehoash and Joachim

two prophets atoned for their boldness with their lives (xxiv, 20 sq.; Jer. xxvi, 20 sq.); and that Jeremiah, above all, was the object of the bitter hate and active persecution of the united court and priesthood, who supported themselves by false prophets. See JEREMIAH. But the educated laity and the officers of state thought they had long outgrown the prophetic utterances, and that their views of state policy were deeper; and thus the state became ever more worldly. Afterwards, the remembrance of the abuse offered the prophets was a sad one for the people (Neh. ix, 26; Matt. v, 12; xxiii, 31; Acts vii, 52; 1 Thess. ii, 15), which was little weakened by the zeal of the later Jews to seek out and adorn the tombs of the prophets. False prophets, or orators, who flattered the prevailing political principles, and even did homage to the abandoned wickedness of the times (Jer. xxiii, 14, 15; xxviii, 15), yet gave themselves out as inspired by the Divine Spirit, appear, especially in the last terrible period of the kingdom, in league with the priests (v, 13, 31; vi, 13; viii, 10; xiv, 14); and the true prophets of Jehovah not only came, at times, into open conflict with them (xxvi, 7 sq.; xxviii; comp. v, 15), but spoke by inspiration against them (xiv, 13 sq.; xxiii, 16 sq.; xxvii, 9 sq.; xxix, 31 sq.; Ezek. xiii, 2 sq.; xxii, 25; Hos. ix, 7 sq.; Mic. iii, 11). In the law (Deut. xiii, 1 sq.; xviii, 20) false prophecy was punished with death (Schröder, *De Pseudoprophetis* [Marburg, 1720], ii, 4).

The origin of the prophets, in the meaning we have unfolded, is to be referred to the end of the period of the Judges, or to the time of Samuel (comp. Acts iii, 24), who was himself a prophet (1 Sam. iii, 20), and may be considered as having founded the order by establishing schools of prophets (comp. esp. xix, 24), and to have pointed out its relations to the theocracy. Tholuck (*Literar. Anzeiger*, 1831, i, 38), indeed, makes these schools of the prophets to be merely a union of helpers of the prophets in their arduous office, such as Baruch was, who, besides the study of the law, busied themselves with sacred music; but this lacks support. Prophecy, indeed, could not be taught; and, no doubt, many of the scholars never received the inner prophetic call. But this is true now in our theological schools, yet we do not, on this account, consider them mere institutions for educating clerks, etc. Moses, in the wilderness, had given instances, in his own person, of every kind of prophetic duty; but afterwards, when the great labor to be done was the establishment of the theocratic nation in Palestine, and the spirit of Jehovah raised up warriors (the *Shophim*, or *Judges*), there was little need of sacred oratory (Judg. iv, 4 sq.; vi, 8 sq.; 1 Sam. ii, 27 sq.), and the people saw in their prophets simply *wise men*, *soothsayers* (hence the older name *rôeh* of prophets, which is applied even to Samuel [1 Chron. ix, 22; xxix, 29, etc.], though he is called also *nabi* [1 Sam. iii, 20]), a view which prevailed up to Samuel's time (ix, 8 sq.), while even later the prophets were chiefly sought by the people as wonderful physicians and miracle-workers. It is clear that Samuel by no means first founded *prophecy* among the Hebrews, as, indeed, such a spiritual movement cannot be voluntarily inaugurated among a people; but that he was led on by the establishment of royalty to impart to the prophets his judicial relation (Judg. vi and 1 Sam.). On the schools of the prophets, see Vitringa, *Synag. Vet.* i, 2, 7; Buddei *Hist. Eccl. V. Test.* ii, 276 sq.; Maii *Evercit.* i, 645 sq.; Werenfels, *Diss. de Scholis Proph.* (Basle, 1701); Kahl, *De Proph. Scholl.* (Gött. 1737); Hering, *Abh. von den Schul. der Proph.* (Bresl. 1777); Stäudlin, *Gesch. der Sitten.* i, 203 sq. They existed in various cities, those often which had an ancient character for sanctity, especially Ramah (1 Sam. xix, 19, 20), Jericho (2 Kings ii, 5), at Bethel (ver. 3), at Gilgal (iv, 38), all in the central part of the Holy Land. The pupils, who were not all young or unmarried men (ver. 1), lived together (vi, 1), sometimes in great numbers (ii, 16; comp. 1 Kings xviii, 4, 13), had common fare (2 Kings iv, 38 sq.), and provided together

for their wants. As to the nature of the instruction, we have no particulars. Music and singing were certainly among the subjects taught (1 Sam. x, 5; comp. Forkel, *Gesch. d. Mus.* i, 238, 245, 248, 438 sq.); but, perhaps, more for the cultivation of noble sentiments, and for awakening inner feeling, than as an accompaniment to their exhortations. The cultivation of lyric poetry by them cannot be altogether denied, yet the extent of it has been exaggerated, and the history derives the flourishing of this kind of poetry from a royal minstrel (Nachtigal, in Henke's *Mag.* vi, 38 sq.; see *contra* Bengel, *Supplem. ad Introd. in Lib. Psalm.* [Tüb. 1816] p. 5 sq.; De Wette, *Comm. üb. d. Psalm.* p. 9 sq., 3d ed.). The chief subject of instruction was probably the law, not in its details in writing, but as a great whole, a theocratic conception; and the awakening and cultivation of the true theocratic spirit were the aim of all their labors. The pupils, when the impulse of the spirit came upon them, sometimes made excursions, during which others, who came near them, were momentarily influenced in the same way (1 Sam. x, 5 sq.; xix, 20 sq.); and some were employed, it would seem as a trial of them, as messengers of the prophets (2 Kings ix, 1). The comparison of the schools of the prophets with monkish cloisters (Jerome, *Ep.* 105, ad *Rustic. Monach.* and 58 ad *Paulin.*) is wide of the mark (see Hering, *loc. cit.* 71 sq.); and if any parallel is to be sought for anything so peculiar, that with Pythagorean union (Tennemann, *Gesch. der Phil.* i, 94 sq.) will be found more appropriate. Moreover, it is not to be supposed that all the prophets, or that the most influential of those known to us, were educated in these schools. It was open to every man or woman who felt an inward call to this office to assume the duties of a prophet (Amos vii, 14); and the prophetic inspiration often broke forth suddenly (2 Chron. xx, 14 sq.). There were also instances in which the calling of prophet seemed to be hereditary in one family (1 Kings xvi, 1; comp. Amos vii, 14; on Zech. i, 1, see Rosenmüller, *ad loc.*). Those who had been educated by older prophets seem usually to have been consecrated to their calling by anointing or the delivery of the prophet's mantle (1 Kings xix, 16 sq.; comp. 2 Kings ii, 13 sq.); but it was the inner voice, or a vision, which directly impelled the prophets to step forward as such (Isa. vi; Jer. i, 2; Ezek. i). The cycle of prophetic activity was found, after the division, chiefly in the kingdom of Judah, which, at least outwardly, had remained true to the theocratic constitution, the temple, the priesthood of Jehohah, the dynasty of David; and even after the overthrow of this kingdom, and in exile, there were influential prophets among the Jews. But in the kingdom of Israel (Eichhorn, in his *Biblioth. d. Bibl. Lit.* iv, 193 sq.), whose establishment the prophets had aided, or, at least, not hindered (1 Kings xi, 29 sq.), their influence was interrupted and more of a negative character. In the changes of dynasties they not rarely took some part (xiv, 14 sq.; xvi, 1 sq.; xxi, 17 sq.; 2 Kings ix, 1 sq.), in which they were actuated by religious views. It cannot be doubted that the activity of the prophets, in that long period, was one of the utmost value to the people; the spirit of the theocratic life was continually refreshed by them, and no other people of that age, or of modern times, has had anything comparable to them (comp. Eichhorn, preface to his 4th vol. *Einleit. ins A. T.*). In this point of view, such laments as Psa. lxxiv, 9; Lam. ii, 9, find their full justification.

The prophets mentioned in the Old Test. besides Moses (Deut. xviii, 15; xxxiv, 10), and those whose books remain in the canon, are the following, nearly in chronological order: Samuel, Gad, Nathan [see these names], the two latter under David and Solomon; Ahijah, Shemaiah, Iddo (1 Kings xi, 29; xii, 22; xiv, 4 sq.; 2 Chron. xii, 15; xiii, 22), under Rehoboam and Jeroboam; Azariah, Hananiah, Jehu, Micah, Jehaziel, Eliezer, Oded (2 Chron. xv, 1, 8; xvi, 7; xx, 37; 1 Kings xvi, 1; xxii, 8), under Asa, Baasha, and Jehoshaphat; Elijah, Elisha, Micah, under Ahab and successors; Zech-

ariah (2 Chron. xxiv, 20), under Jehoash; Jonah, under Jeroboam II (2 Kings xiv, 25); Oded, under Ahaz (2 Chron. xxviii, 9); Uriah, under Joiachim (Jer. xxvi, 20); besides three prophetesses—Deborah (Judg. iv, 4), Huldah, a married woman (2 Kings xxii, 14), and Noadiah (Neh. vi, 14), a false prophetess. A far greater number are named, of both sexes, by Clement Alexandrinus (*Strom.* i, 145; he gives *thirty-five*), Epiphanius (in Cotelier's *Not. in Can. Apost.* iv, 6, *seventy-two*), and the Jews (*Seder Olam*, p. 21, *forty-eight prophets, seven prophetesses*). But they act in this without any settled principle, including almost every man of note in the Old Test. among the prophets. Prophecy disappeared on the new establishment of the Jews in Palestine; and, indeed, the last prophets are thought to show less of the living inspiration than the earlier ones; and, after the erection of the second Temple, no seer's voice was heard, although the return of the prophets was hoped for continually (1 Macc. iv, 46; xiv, 41). According to the Talmudists the *Bath kol* sometimes took the place of prophecy. (Comp. Buxtorf, *Lex. Talm.* s. v. *בַּת קוֹל*, and Otho, *Lex. Rab.* p. 82 sq.; see also Schöttgen, *Hor. Hebr.* i, 379, on the unconscious soothsaying of the rabbins. It has been applied to John xi, 51. That in 1 Pet. i, 10 is different.) So entirely was the old inspiration lost that even the patriotism of the Maccabees called forth nothing beyond military heroism. The birth and consecration of the Prince of the Prophets evoked inspired utterances from but two (Luke i, 67; ii, 36). The appearance of Jesus even awakened false prophets, and, during the war of extermination between the Greeks and Romans, "prophet" was synonymous with deceiver and seducer of the people. Only a few scattered utterances of soothsayers occur in the centuries following the captivity (Josephus, *Ant. xiii*, 10, 7; xiii, 11, 2; comp. *War.* vi, 5, 3). See Gürtler, *Systema Theol. Proph.* (Amst. 1702); Witsii *Miscel. Sacr.* bk. i, in 24 chapters, on prophets and prophecy; Carpozov, *Introd. in V. T.* p. 1 sq., and his *Appar.* p. 113 sq.; Eichhorn, *Einleit. ins A. T.* iv, § 512 sq.; Jahn, *Einleit.* II, ii, 324 sq.; Niemeyer, *Charakt.* v, 245 sq.; Herder, *Geist der hebr. P.* ii, 41 sq.; Horst, *Ueber die Proph. der alten Welt*, etc. (Gotha, 1798); Stutzmann, *Geist u. Charakt. d. hebr. Proph.* (Carlsr. 1805); Gramberg, *Religionsid.* ii, 246 sq.; Von Colln, in *Euphron.* (1833) pt. i, ch. v; Knobel, *Der Prophetismus. d. Heb.* (Bresl. 1837) ii, 8; Köster, *Die Propheten d. A. u. N. Test. nach ihren Wesen u. Wirken* (Leips. 1838); Ewald, *Propheten d. alt. Bund.* (Stuttg. 1840) i, 1 sq.; Hävernick, *Einleit. ins A. T.* II, ii, 1 sq.; Baur, *Amos* (Giesl. 1847), p. 1 sq.; Hofmann, *Weisag.* i, 253 sq. The writings of Dorotheus (ed. Fabric. [Hamb. 1714]) contain traditions of the oldest prophets. So those of an unknown writer (*De Vitis Prophet.*), sometimes ascribed to Epiphanius. Comp. Hamaker, *Comment. in Libr. de Vita et Morte Prophet.* (Amst. 1833).

On the meaning of the word "prophet" in the New Test., see the dictionaries. The name was given to certain Christians of both sexes (1 Cor. xi, 5; comp. Acts xxi, 9) who spoke in the public assembly (1 Cor. xi, 4; xiv, 29), who were distinguished from apostles and teachers (xii, 28; xiv, 6; Eph. ii, 20; iv, 11; comp. Acts xiii, 1; Neander, *Pflanz.* i, 205). Prophecy was, among the *charismata*, a spiritual gift of the Holy Spirit (Rom. xii, 6; 1 Cor. xii, 10), and stood next to that of speaking with tongues (xii, 10; xiii, 8; xiv, 22; comp. Acts xix, 6), but is pointed out by Paul as more efficacious for the edifying of the Church (1 Cor. xiv, 3 sq., 22). See, in general, Van Dale, *De Idolol.* p. 201 sq.; Mosheim, *De Illis qui Proph. Vocantur in N. T.* (Helmst. 1732); also in his *Dissert. ad Hist. Eccl.* ii, 125 sq.; Knapp [G.], *De Dono Proph. in Eccl. N. T.* (Halle, 1755); Zacharias, *De Donor. Proph. Variis Grad. in Eccl. Christ.* (Gott. 1767); Koppe, 3. *Exc. zum Brief an die Eph.* p. 148 sq. Thus *prophets* are those Christians who, seized by a momentary inspiration (Acts xix, 6), discoursed to the assembly in their own tongue (comp.

1 Cor. xiv, 5, 24) on divine things, perhaps not unlike preachers among the Quakers. (On the distinction between these and those who spoke with tongues, see xiv, 32; Neander, *Pfanz. d. Christ.* i, 52, 183 sq., 205.) The prediction of events to come was not the office of these prophets, yet they had some insight into the future of the Church. Comp. the Revelation of John; Crusius [B.], *Opusc.* p. 101 sq.; Lücke, *Vollst. Einl. in die Offenb. Joh.* (Bonn, 1832). See PROPHET.

Seething Pot [not *seething-pot*] (סִיחָה, *a pot blown*, i. e. with a fanned fire under it), a kettle violently boiling (Job xli, 20 [Heb. 12]). See POR.

Sefer. See SEFHER.

Seforno. See SFORNO.

Segelia, in Roman mythology, was a rural deity who secured growth to the germinating crops of grain.

Segneri, Paolo (1), an Italian preacher, was born at Nettuno, March 21, 1624, of an old Roman family. In 1638 he entered the Order of the Jesuits at the College of St. Andrew, in Rome, where he taught grammar, and earnestly studied the Scriptures, the fathers, and the classical writers. Unable to obtain authority as a missionary to the Indies, he travelled on foot, from 1665 to 1692, through Italy, especially in Perugia and Mantua, gathering crowds to hear his discourses. Innocent XII called him to Rome in 1692 as his preacher in ordinary; but he was not so popular there, and was shortly appointed theologian to the penitentiary and examiner of bishops. His hearing, however, having failed, he died Dec. 9, 1694, worn out with labor. He wrote several works on practical theology, which are enumerated in Hoefler, *Nouv. Biog. Générale*, s. v.

Segneri, Paolo (2), called *the Younger*, an Italian Jesuit, nephew of the foregoing, was born at Rome, Oct. 18, 1673. He devoted himself to missions, and, after the earthquakes of 1708, he preached to the terrified Romans. At the request of the archduke Como III, he occupied the pulpits of the principal churches of Florence, Modena, and Bologna, and thus induced prince Frederick of Poland to abjure Lutheranism. He died at Sinigaglia, June 15, 1713. He wrote a few works on practical religion.

Se'gub (Heb. *Segub*, שִׁגְיָב [v. r. in Kings *Segib*, שִׁגְיָב], *elevated*; Sept. Σεγούβ, v. r. in Chron. Σερούχ), the name of two Hebrews.

1. The son of Hezron, grandson of Judah. His mother was the daughter of Machir, the "father" of Gilead, and he was himself father of Jair (1 Chron. ii, 21). B.C. cir. 1850.

2. The youngest son of Hiel, the rebuilder of Jericho, who died for his father's sin, according to Joshua's prediction (1 Kings xvi, 34; comp. Josh. vi, 26). B.C. cir. 910. According to Rabbinical tradition, he died when his father had set up the gates of the city. One story says that his father slew him as a sacrifice on the same occasion.

Segur, SETH WILLARD, a Congregational minister, was born at Chittenden, Vt., Dec. 24, 1831. At fifteen years of age he united with the Church, and soon after entered Royalton Academy, where he was fitted for college. He entered Middlebury College, and graduated in 1859. After graduation he entered the Auburn (N. Y.) Theological Seminary, and graduated in 1862. He was licensed by the Royalton Association May 8, 1861, and soon after ordained. He was installed over the Church in Tallmadge, O., June 8, 1862, and, after remaining nine years, resigned. Success attended his ministry, and during his pastorate one hundred and thirty-four were received into the Church. He was next settled at Gloucester, Mass., where he was installed June 14, 1871, and remained until 1873, when he resigned to accept a call to West Medway, over which Church he was duly installed. As a preacher his elocution was easy, graceful, and impressive, and many were drawn to the ways

of righteousness. While on a visit to Tallmadge, he attended a semi-centennial celebration of the Church, taken sick, and after a short illness died, Sept. 1, 1873. (W. P. S.)

Seguy, JOSEPH, a French Roman Catholic, was born at Rodez in 1689. He was early renowned for eloquence, and in 1729 was appointed to deliver before the French Academy a eulogy on St. Louis, which cardinal de Fleury rewarded him with the title of Genlis. His success in other discourses was such that the Academy, in 1736, gave him the prize of poetry. Seguy bore the title of preacher to the king, and continued his ministry till advanced age, when he was promoted to a canonicate that he held at Meaux. He died March 12, 1761. Some of his sermons have been published.

Seho Dagung, in Hindûism, is the name of a magnificent pyramidal temple at Rangoon, apparently covered with gold, and dedicated to the deity of the Birmanese.

Seid, in Norse mythology, was a magical being, universally employed among the Vanes, in which he was descended from the Vanes, was powerful, skilled, and in which she had received instruction from Odin. Nothing definite is known respecting herself; but it would seem that a degree of knowledge of chemistry lay at its base, by which all kinds of metals became known. It was regarded as beneath the dignity of a man, however, and Odin was the only one made use of it.

Seidel, Caspar Timotheus, a Lutheran theologian of Germany, was born Sept. 20, 1703, at Schönberg, Brandenburg, and died as doctor of divinity at Königsbutter, at Helmstädt, May 30, 1758. *Dissertatio, in qua ostenditur Pontifices in Ritibus Pontificis a Praelati Ecclesie Apostolice plane distinctos* (Helmstädt, 1732):—*Programma de Quæstione, Christus Pascham suam Ultimam Uno Eodemque die comederet, necne?* (ibid. 1748):—*Ueber die Sekte der Elcenseiten* (ibid. 1749):—*Ueber die Erklärung der heil. Schrift* (Halle, 1751). See Fürst, *Bibl. Jud.* iii, 308; Winer, *Handb. theol. Literatur*. (B. P.)

Seidel, Gotthold Emanuel Friedrich, a Lutheran theologian of Germany, born at Paderborn, March 10, 1774, was appointed in 1802 deacon at Eggenstein, in 1807 pastor of the church, and in 1829 dean of Nuremberg, where he died Feb. 6, 1838. Seidel published several collections of sermons delivered at Nuremberg, which are enumerated in Zuchold, *Biblioth. Theolog.* p. 1211 sq.; and in *Handbuch der theol. Literatur*. (B. P.)

Seidel, Heinrich Alexander, a Lutheran theologian of Germany, was born Feb. 4, 1811, at Rastatt, in Mecklenburg-Schwerin. He studied at Rostock, Berlin, and in 1839 he was called to the pastorate at Berlin. In 1851 he was made pastor of St. Nikolai in Schwerin, but bodily infirmities obliged him to retire in 1859 from the pastorate, and he died at Schwerin, 1861. Seidel is best known in German hymnology by his spiritual hymns, which he published in two volumes, entitled *Kreuz und Harfe* (Schwerin, 1837, 1839 and 1857). See Zuchold, *Biblioth. Theolog.* p. 1215; Koch, *Geschichte des deutschen Kirchenlieds*, vii, 294 sq. (B. P.)

Seller, GEORG FRIEDRICH, a German theologian, was born Oct. 24, 1733, at Kreussen, near Bayreuth. In 1761 he was deacon at Neustadt-an-der-Heide, in 1766 at Coburg; in 1770, professor of theology at Halle; in 1772, university preacher; in 1773, member of the history and principal of an institute for moral education, founded by himself at Erlangen. He died May 13, 1807. In theology he represented rationalistic views, which he also propagated by his teaching and a writer. His writings, mostly sermons, are many, and have often been republished. O

mention, *Sermons* (1769 sq.; 4th ed. 1798).—*History of the Revealed Religion* (1772; 9th ed. 1800).—*Bibl. Erbauungsbuch* (Erlangen, 1785-94, 17 vols.).—*Opuscula Academica* (ibid. 1793), etc. See the *Theol. Universal-Lexikon*, s. v.; Koch, *Geschichte des deutschen Kirchenliedes*, vi, 223 sq.; Zuchold, *Bibl. Theolog.* p. 1215 sq.; Fürst, *Bibl. Jud.* iii, 308. (B. P.)

Se'ir (Heb. *Se'ir*, שַׁעִיר, *hair* [i. e. rough, by a play upon the name of *Esau*, see Gen. xxv, 25]; Sept. Σηείρ, v. r. in No. 1 Σηείρ, in No. 3 Ἀσάπ), the name of a man and of two mountains.

1. A phylarch or chief of the Horim, who were the former inhabitants of the country afterwards possessed by the Edomites (Gen. xxvi, 20, 21; 1 Chron. i, 38). B.C. ante 1960. The region doubtless derived its name from him (comp. Josephus, *Σαείρα*, *Ant.* ii, 1, 1).

2. MOUNT SEIR (שַׁעִיר הָהָר, Gen. xiv, 6 sq.), or LAND OF SEIR (אֶרֶץ שַׁעִיר, xxxii, 20; xxxvi, 30), was the original name of the mountain ridge extending along the east side of the valley of the Arabah, from the Dead Sea to the Elanitic Gulf. The name (= "the shaggy") was probably in the first instance derived from Seir the Horite, who appears to have been the chief of the aboriginal inhabitants (xxxvi, 20), and then, secondarily, by a paronomasia frequent in such cases, from the rough aspect of the whole country. The view from Aaron's tomb on Hor, in the centre of Mount Seir, is enough to show the appropriateness of the appellation. The sharp and serrated ridges, the jagged rocks and cliffs, the straggling bushes and stunted trees, give the whole scene a sternness and ruggedness almost unparalleled. In the Samaritan Pentateuch, instead of שַׁעִיר, the name גַּבְלָה is used; and in the Jerusalem Targum, in place of "Mount Seir" we find שׁוּרָא דִּגְבְּלָה, *Mount Gabla*. The word *Gabla* signifies "mountain," and is thus descriptive of the region (Reland, *Palæst.* p. 83). The name Gebala, or Gebalene, was applied to this province by Josephus, and also by Eusebius and Jerome (Josephus, *Ant.* ii, 1, 2; *Onomast.* s. v. "Idumæa"). The northern section of Mount Seir, as far as Petra, is still called *Jebâl*, the Arabic form of Gebal. The Mount Seir of the Bible extended much farther south than the modern province, as is shown by the words of Deut. ii, 1-8. In fact, its boundaries are there defined with tolerable exactness. It had the Arabah on the west (ver. 1 and 8); it extended as far south as the head of the Gulf of Akabah (ver. 8); its eastern border ran along the base of the mountain range where the plateau of Arabia begins. Its northern border is not so accurately determined. The land of Israel, as described by Joshua, extended from "the Mount Halak that goeth up to Seir, even unto Baal Gad" (Josh. xi, 17). As no part of Edom was given to Israel, Mount Halak must have been upon its northern border. Now there is a line of "naked" (*halak* signified "naked") white hills or cliffs which runs across the great valley about eight miles south of the Dead Sea, forming the division between the Arabah proper and the deep Ghor north of it. The view of these cliffs, from the shore of the Dead Sea, is very striking. They appear as a line of hills shutting in the valley, and extending up to the mountains of Seir. The impression left by them on the mind of the writer was that this is the very "Mount Halak, that goeth up to Seir" (Robinson, *Bib. Res.* ii, 113, etc.; see Keil on *Josh. xi*, 17). The northern border of the modern district of Jebâl is Wady el-Ahsy, which falls into the Ghor a few miles farther north (Burckhardt, *Syria*, p. 401).

In Deut. xxxiii, 2, Seir appears to be connected with Sinai and Paran; but a careful consideration of that difficult passage proves that the connection is not a geographical one. Moses there only sums up the several glorious manifestations of the divine majesty to the Israelites, without regard either to time or place (comp. *Judg.* v, 4, 5).

Mount Seir was originally inhabited by the Horites, or "troglydites," who were doubtless the excavators of those singular rock-dwellings found in such numbers in the ravines and cliffs around Petra. They were dispossessed, and apparently annihilated, by the posterity of Esau, who "dwelt in their stead" (Deut. ii, 12). The history of Seir thus early merges into that of Edom. Though the country was afterwards called Edom, yet the older name, Seir, did not pass away: it is frequently mentioned in the subsequent history of the Israelites (1 Chron. iv, 42; 2 Chron. xx, 10). Mount Seir is the subject of a terrible prophetic curse pronounced by Ezekiel (ch. xxxv), which seems now to be literally fulfilled: "Thus saith the Lord God, Behold, O Mount Seir, I am against thee, and I will make thee most desolate. I will lay thy cities waste, . . . when the whole earth rejoiceth I will make thee desolate. . . . I will make thee perpetual desolations, and thy cities shall not return, and ye shall know that I am the Lord."

The southern part of this range now bears the appellation *esh-Sherah*, which seems no other than a modification of the ancient name. In modern times these mountains were first visited and described by Burckhardt (*Syria*, p. 40), but they have often since been visited by other travellers, among whom Dr. Robinson has perhaps furnished the best description of them (*Bib. Res.* ii, 551, 552). At the base of the chain are low hills of limestone or argillaceous rock; then lofty masses of porphyry, which constitute the body of the mountain; above these is sandstone broken into irregular ridges and grotesque groups of cliffs; and again, farther back, and higher than all, are long elevated ridges of limestone without precipices. Beyond all these stretches off indefinitely the high plateau of the great eastern desert. The height of the porphyry cliff is estimated by Dr. Robinson at about 2000 feet above the Arabah (the great valley between the Dead Sea and Elanitic Gulf); the elevation of Wady Musa above the same is perhaps 2000 or 2200 feet; while the limestone ridges farther back probably do not fall short of 3000 feet. The whole breath of the mountainous tract between the Arabah and the eastern desert above does not exceed fifteen or twenty geographical miles. These mountains are quite different in character from those which front them on the other (west) side of the Arabah. The latter seem to be not more than two thirds as high as the former, and are wholly desert and sterile; while those on the east appear to enjoy a sufficiency of rain, and are covered with tufts of herbs and occasional trees. The valleys are also full of trees and shrubs and flowers, the eastern and higher parts being extensively cultivated, and yielding good crops. The general appearance of the soil is not unlike that around Hebron, though the face of the country is very different. It is, indeed, the region of which Isaac said to his son Esau, "Behold, thy dwelling shall be [far] from the fatness of the earth, and the dew of heaven from above" (Gen. xxvii, 39). See IDUMÆA.

3. An entirely different mountain from the foregoing formed one of the landmarks on the north boundary of the territory of Judah (Josh. xv, 10 only). It lay westward of Kirjath-jearim, and between it and Beth-she-mesh. If Kuriet el-Enab be the former, and Ain-she-mesh the latter of these two, then Mount Seir cannot fail to be the ridge which lies between the Wady Aly and the Wady Ghurab (Robinson, *Bib. Res.* iii, 155). A village called *Saris* stands on the southern side of this ridge, which Tobler (*Dritte Wanderung*, p. 203) and Schwarz (*Palæst.* p. 97) with great probability identify with Seir, notwithstanding considerable difference in the names. The *Sa'irah*, on the south of the Wady Surar (Robinson, 1st ed. ii, 364), is nearer in orthography, but not so suitable in position. It is possibly the Σωρή, which, in the Alex. MS., is one of the eleven names inserted by the Sept. in Josh. xv, 59. The neighboring names agree. In the Vat. MS. it is Ἐωβήγ.

How the name of Seir came to be located so far to the north of the main seats of the Seirites we have no means of knowing. Perhaps, like other names occurring in the tribe of Benjamin, it is a monument of an incursion by the Edomites which has escaped record. See *OPHNI*, etc. But it is more probable that it derived its name from some peculiarity in the form or appearance of the spot. Dr. Robinson (iii, 155), apparently without intending any allusion to the name of Seir, speaks of the "rugged points which composed the main ridge" of the mountain in question. Such is the meaning of the Hebrew word *Seir*. Whether there is any connection between this mountain and Seirath (q. v.), or *has-Seirah*, is not so clear. The name is not a common one, and it is not unlikely that it may have been attached to the more northern continuation of the hills of Judah which ran up into Benjamin—or, as it was then called, Mount Ephraim.

Se'irath (Heb. with the art. *has-Seirah'*, הַשִּׁירָה, *the shaggy*; Sept. Σεῖρωδά v. r. Σεῖρωδά; Vulg. *Seirath*), the place to which Ehud fled after his murder of Eglon (Judg. iii, 26), and whither, by blasts of his cow-horn, he collected his countrymen for the attack of the Moabites in Jericho (ver. 27). It was in "Mount Ephraim" (ver. 27), a continuation, perhaps, of the same rough wooded hills (such seems to be the signification of *Seir*) which stretched even so far south as to join the territory of Judah (Josh. xv, 10). The definite article prefixed to the name in the original shows that it was a well-known spot in its day.—Smith. It is probably the same as Mount *Seir* (q. v.) just referred to, the *Saris* of the present day.

Seirim. See SATYR.

Seïte, in Lapp mythology, are deities whose office it was to promote the fertility of fields and herds. Very little is known respecting the form they assumed in the popular conception. They are said to have had feet like birds.

Seitonji, in Prussian mythology, were the lowest class of priests, of whom each village had one or more. They were regarded with great awe, but did not, like the other priests, enjoy the respect of the people.

Seja, in Roman mythology, is (1) a surname of Fortuna, to whom Servius Tullius dedicated a temple. (2) A Roman deity of sowing.

Seja, in Hindû mythology, is identical with *Ananda*, the noted serpent which was wound about the mountain Mandar in order to turn it into the Milk Sea.

Se'la (Heb. with the art. *has-Se'la*, הַסֵּלָה, *the rock*, as rendered in Judg. i, 36; 2 Chron. xxv, 12; Obad. 3; and by the Sept. [ῥ] πέτρα; A. V. "Selah" in 2 Kings xiv, 7), the name given in the above passages, and (in the A. V.) in Isa. xvi, 1, to the metropolis of the Edomites in Mount Seir. In the Jewish history it is recorded that Amaziah, king of Judah, "slew of Edom, in the valley of salt, ten thousand, and took Sela by war, and called the name of it Joktheel unto this day" (2 Kings xiv, 7). The parallel narrative of 2 Chron. xxv, 11-13 supplies fuller details. From it we learn that, having beaten the Edomitish army with a great slaughter in the "valley of salt"—the valley south of the Dead Sea—Amaziah took those who were not slain to the cliff, and threw them headlong over it. This cliff is asserted by Eusebius (*Onomast.* Πέτρα) to be "a city of Edom, also called by the Assyrians *Rekem*," by which there is no doubt that he intends *Petra* (see *ibid.* Πέτρην, and the quotations in Stanley's *Sin. and Pal.* p. 94, note). The title thus bestowed is said to have continued "unto this day." This, Keil remarks, is a proof that the history was nearly contemporary with the event, because Amaziah's conquest was lost again by Ahaz less than a century afterwards (2 Chron. xxviii, 17). This latter name seems, however, to have passed away with the Hebrew rule over Edom,

for no further trace of it is to be found; and it is still called by its original name by Isaiah (xvi, 1). These are all the certain notices of the place in Scripture; for it may well be doubted whether it is designated in Judg. i, 36 and Isa. xlii, 11, as some suppose. On the ground of the sameness of signification, it is by common consent identified with the city later known as *Petra*, 500 Roman miles from Gaza (Pliny, vi, 32), the ruins of which, now called those of *Wady Musa*, are found about two days' journey north of the top of the Gulf of Akaba, and three or four south from Jericho. This place was in the midst of Mount Seir, in the neighborhood of Mount Hor (Josephus, *Ant.* iv, 4, 7), and therefore in Edomitish territory, but seems to have afterwards come under the dominion of Moab. In the end of the 4th century B.C. it appears as the headquarters of the Nabathæans, who successfully resisted the attacks of Antigonos (Diod. Sic. [ed. Hanov. 1604] xix, 731), and under them became one of the greatest stations for the approach of Eastern commerce to Rome (id. p. 94; Strabo, xvi, 799; Apul. *Flor.* i, 6). About B.C. 70 Petra appears as the residence of the Arab princes named Aretas (Josephus, *Ant.* xiv, 1, 4; 5, 1; *War.* i, 6, 2; 29, 3). It was by Trajan reduced to subjection to the Roman empire (Dion Cass. lxxviii, 14), and from the next emperor received the name of *Hadrjana*, as appears from the legend of a coin (Reland, *Palest.* p. 931). Josephus (*Ant.* iv, 4, 7) gives the name of Arce ("Ἀρκή") as an earlier synonym for Petra, where, however, it is probable that Ἀρκή or Ἀρκίη (alleged by Eusebius, *Onomast.*, as found in Josephus) should be read. The city Petra lay, though at a high level, in a hollow shut in by mountain-cliffs, and approached only by a narrow ravine through which, and across the city's site, the river winds (Pliny, vi, 32; Strabo, xvi, 779). See PETRA.

Se'la-hammah'lekoth (Heb. סֵלָה הַמַּחֲלָקוֹת, Sept. πέτρα ἡ μερῶν; Vulg. *Petra dividens*), a rock in the wilderness of Maon, the scene of one of those remarkable escapes which are so frequent in the history of Saul's pursuit of David (1 Sam. xxiii, 28). Its name, if interpreted as Hebrew, signifies the "rock of escapes," or "of divisions." The former is the explanation of Gesenius (*Thesaur.* p. 485), the latter of the Targum and the ancient Jewish interpreters (Midrash; Rashi). The escape is that of David; the divisions are those of Saul's mind, undecided whether to remain in pursuit of his enemy or to go after the Philistines; but such explanations, though appropriate to either interpretation, and consistent with the Oriental habit of playing on words, are doubtless mere accommodations. The analogy of topographical nomenclature makes it almost certain that this cliff must have derived its name either from its *smoothness* (one of the radical meanings of סֵלָה) or from some peculiarity of shape or position, such as is indicated in the translations of the Sept. and Vulgate. The *divisions* characteristic of the mountain, or rather *cliff* (for such *Sela* properly means), probably were the seams or *ravines* down its sides, which furnished David the means of escape. According to Lieut. Conder (*Tent Work in Palestine*, ii, 91), the name *Maláky* is still applied to part of a rocky gorge between Ziph and Maon, "seamed with many torrent-beds."

Se'lah (2 Kings xiv, 7). See SELA.

Se'lah (Heb. סֵלָה). This word, which is only found in the poetical books of the Old Test., occurs seventy-one times in the Psalms, and three times in Habakkuk. In sixteen psalms it is found once, in fifteen twice, in seven three times, and in one four times—always at the end of a verse, except in Psa. lv, 19 [20]; lvii, 3 [4], and Hab. iii, 3, 9, where it is in the middle of a verse, though at the end of a clause. All the psalms in which it occurs, except eleven (iii, vii, xxiv, xxii, xlviii, l, lxxxii, lxxxiii, lxxxvii, lxxxix, cxliii), have also the musical direction "to the Chief Musician"

(comp. also Hab. iii, 19); and in these exceptions we find the words מִזְמֹר, *mizmôr* (A. V. "Psalm"), Shiggaion, or Maschil, which sufficiently indicate that they were intended for music. Besides these, in the titles of the psalms in which Selah occurs, we meet with the musical terms Alamoth (xlv), Altschith (lvii, lix, lxxv), Gittith (lxxx, lxxxiv), Mahalath Leannoth (lxxxviii), Michtam (lvii, lix, lx), Neginah (lxi), Neginoth (iv, liv, lv, lxxvii, lxxvi; comp. Hab. iii, 19), and Shushan-eduth (lx); and on this association alone might be formed a strong presumption that, like these, Selah itself is a term which had a meaning in the musical nomenclature of the Hebrews. What that meaning may have been is now a matter of pure conjecture. Of the many theories which have been framed, it is easier to say what is not likely to be the true one than to pronounce certainly upon what is.

1. *The Versions.*—In the far greater number of instances the Targum renders the word by עֲלַמְיָא, "forever;" four times (Psa. xxxii, 4, 7; xxxix, 11 [12]; 4 [6]; עֲלַמְיָא; once (xlv, 8 [9]); עֲלַמְיָא; and (xlviii, 8 [9]); עֲלַמְיָא, with the same meaning, "for ever and ever." In Psa. xlix, 13 [14] it has עֲלַמְיָא דְּהָא, "for the world to come;" in Psa. xxxix, 5 [6] עֲלַמְיָא, "for the life everlasting;" and in Psa. cxl, 5 [6] הַיְיָרָא, "continually." This interpretation, which is the one adopted by the majority of Rabbinical writers, is purely traditional, and based upon no etymology whatever. It is followed by Aquila, who renders "Selah" αἰ; by the *editio quinta* and *editio sexta*, which usually give respectively διαπαντός and εἰς τέλος; by Symmachus (εἰς τὸν αἰῶνα) and Theodotion (εἰς τέλος), in Habakkuk; by the reading of the Alex. MS. (εἰς τέλος) in Hab. iii, 13; by the Peshito-Syriac in Psa. iii, 8 [9]; iv, 2 [3]; xxiv, 10, and Hab. iii, 13; and by Jerome, who has *semper*. In Psa. lv, 19 [20] קִדְמָא, *kédem selah*, is rendered in the Peshito "from before the world." That this rendering is manifestly inappropriate in some passages, as, for instance, Psa. xxi, 2 [3]; xxxii, 4; lxxxi, 7 [8], and Hab. iii, 3, and superfluous in others, as Psa. xlv, 8 [9]; lxxxiv, 4 [5]; lxxxix, 4 [5], was pointed out long since by Aben-Ezra. In the Psalms the uniform rendering of the Sept. is διάψαλμα. Symmachus and Theodotion give the same, except in Psa. ix, 16 [17], where Theodotion has αἰ, and Psa. lii, 5 [7], where Symmachus has εἰς αἰ. In Hab. iii, 13 the Alex. MS. gives εἰς τέλος. In Psa. xxxviii (in the Sept.), 7; lxxx, 7 [8], διάψαλμα is added in the Sept., and in Hab. iii, 7 in the Alex. MS. In Psa. lvii it is put at the end of ver. 2; and in Psa. iii, 8 [9]; xxiv, 10; lxxxviii, 10 [11], it is omitted altogether. In all passages except those already referred to, in which it follows the Targum, the Peshito-Syriac has *dips*, an abbreviation for διάψαλμα. This abbreviation is added in Psa. xlviii, 13 [14]; l, 15 [16]; lxxviii, 13 [14]; lvii, 2; lxxx, 7 [8], at the end of the verse; and in Psa. lii, 3 in the middle of the verse after מְנוּחָא; in Psa. xlix it is put after נִצָּן in ver. 14 [15], and in Psa. lxxviii, after רִצְצָה in ver. 8 [9], and after לְאֵלֵהֶם in ver. 32 [33]. The Vulgate omits it entirely, while in Hab. iii, 3 the *editio sexta* and others give μεταβολή διαψάλματος.

2. *The Church Fathers.*—These generally adopt the rendering διάψαλμα of the Sept. and other translators, although it is in every way as traditional as that of the Targum "forever," and has no foundation in any known etymology. With regard to the meaning of διάψαλμα itself, there are many opinions. Both Origen (*Comm. ad Psa.*, *Opp.* ed. Delarue, ii, 516) and Athanasius (*Synops. Script. Sacr.* xiii) are silent upon this point. Eusebius of Cæsarea (*Præf. in Psa.*) says it marked those passages in which the Holy Spirit ceased for a time to work upon the choir. Gregory of Nyssa (*Tract. 2 in Psa.* cap. x) interprets it as a sudden lull in the midst of

IX.—K k

the psalmody, in order to receive anew the divine inspiration. Chrysostom (*Opp.* ed. Montfaucon, v, 540) takes it to indicate the portion of the psalm which was given to another choir. Augustine (*On Psa. iv*) regards it as an interval of silence in the psalmody. Jerome (*Ep. ad Marcellam*) enumerates the various opinions which have been held upon the subject; that *diapsalma* denotes a change of metre, a cessation of the Spirit's influence, or the beginning of another sense. Others, he says, regard it as indicating a difference of rhythm, and the silence of some kind of music in the choir; but for himself he falls back upon the version of Aquila, and renders Selah by *semper*, with a reference to the custom of the Jews to put at the end of their writings Amen, Selah, or Shalom. In his *Commentary on Psa. iii* he is doubtful whether to regard it as simply a musical sign, or as indicating the perpetuity of the truth contained in the passage after which it is placed; so that, he says, "whosoever Selah (that is, *diapsalma* or *semper*) is put, there we may know that what follows, as well as what precedes, belongs not only to the present time, but to eternity." Theodoret (*Præf. in Psa.*) explains *diapsalma* by μέλους μεταβολή or ἐναλλαγή (as Suidas), "a change of the melody." On the whole, the rendering διάψαλμα rather increases the difficulty, for it does not appear to be the true meaning of Selah, and its own signification is obscure.

3. *Rabbinical Writers.*—The majority of these follow the Targum and the dictum of R. Eliezer (Talm. Babyl. *Erubin*, v, 54) in rendering Selah "forever;" but Aben-Ezra (*On Psa. iii*, 3) showed that in some passages this rendering was inappropriate, and expressed his own opinion that Selah was a word of emphasis, used to give weight and importance to what was said, and to indicate its truth—"but the right explanation is that the meaning of Selah is like 'so it is,' or 'thus,' and 'the matter is true and right.'" Kimchi (*Lex. s. v.*) doubted whether it had any special meaning at all in connection with the sense of the passage in which it was found, and explained it as a musical term. He derives it from סָלַח, *to raise*, elevate, with הַ paragogic, and interprets it as signifying a raising or elevating the voice, as much as to say in this place there was an elevation of the voice in song.

4. *Modern Writers.*—Among these there is the same diversity of opinion. Gesenius (*Thesaur. s. v.*) derives Selah from סָלַח, *salâh*, *to suspend*, of which he thinks it is the imperative Kal, with הַ paragogic, סָלַח, in pause סָלַח. But this form is supported by no parallel instance. In accordance with his derivation, which is harsh, he interprets Selah to mean either "suspend the voice," that is, "be silent," a hint to the singers, or "raise, elevate the stringed instruments." In either case he regards it as denoting a pause in the song, which was filled up by an interlude played by the choir of Levites. Ewald (*Die Dichter des A. B.* i, 179) arrives at substantially the same result by a different process. He derives Selah from סָלַח, *salâh*, *to rise*, whence the substantive סָלַח, which with הַ paragogic becomes in pause סָלַח (comp. מָהַר, from הָרָה, root קָהַר, Gen. xiv, 10). So far as the form of the word is concerned, this derivation is more tenable than the former. Ewald regards the phrase "Higgaion, Selah," in Psa. ix, 16 [17], as the full form, signifying "music, strike up!"—an indication that the voices of the choir were to cease while the instruments alone came in. Hengstenberg follows Gesenius, De Wette, and others, in the rendering *Pause*! but refers it to the contents of the psalm, and understands it of the silence of the music in order to give room for quiet reflection. If this were the case, Selah at the end of a psalm would be superfluous. The same meaning of *pause* or *end* is arrived at by Fürst (*Handv. s. v.*), who derives Selah from a root סָלַח, *salâh*, *to cut off* (a meaning which is perfectly arbitrary), whence the

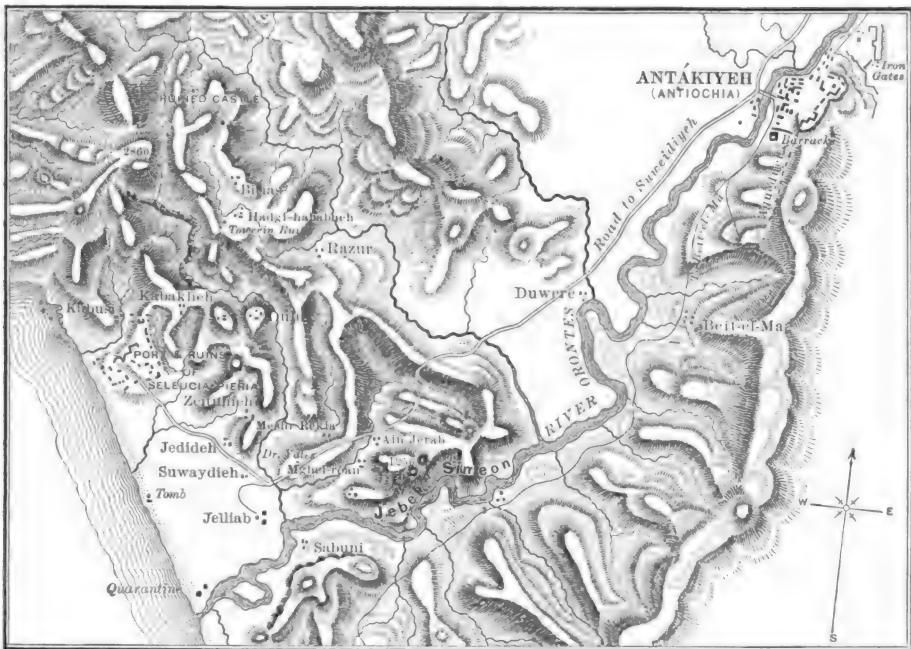

substantive סֶלָה, *sêl*, which with פַּ paragogic becomes in pause סֶלָה־, a form which is without parallel. While etymologists have recourse to such shifts as these, it can scarcely be expected that the true meaning of the word will be evolved by their investigations. Indeed, the question is as far from solution as ever. Beyond the fact that Selah is a musical term, we know absolutely nothing about it, and are entirely in the dark as to its meaning. Sommer (*Bibl. Abhandl.* i, 1-84) has devoted an elaborate discourse to its explanation (translated in the *Bibliotheca Sacra*, 1848, p. 66 sq.). After observing that Selah everywhere appears to mark critical moments in the religious consciousness of the Israelites, and that the music was employed to give expression to the energy of the poet's sentiments on these occasions, he (p. 40) arrives at the conclusion that the word is used "in those passages where, in the Temple Song, the choir of priests who stood opposite to the stage occupied by the Levites were to raise their trumpets (לִבְנֵי), and with the strong tones of this instrument mark the words just spoken, and bear them upwards to the hearing of Jehovah. Probably the Levitical minstrels supported this priestly intercessory music by vigorously striking their harps and psalteries; whence the Greek expression *διὰ ψαλμα*. To this points, moreover, the fuller direction, 'Higgaion, Selah' (Psa. ix, 16); the first word of which denotes the whirr of the stringed instruments (Psa. xcii, 4), the other the raising of the trumpets, both of which were here to sound together. The less important *Higgaion* fell away, when the expression was abbreviated, and *Selah* alone remained." Dr. Davidson (*Introd. to the Old Test.* ii, 248) with good reason rejects this explanation as paltered and artificial, though it is adopted by Keil in Hävernick's *Einführung* (iii, 120-129). He shows that in some passages (as Psa. xxxii, 4, 5; lii, 8; lv, 7, 8) the playing of the priests on the trumpets would be unsuitable, and proposes the following as his own solution of the difficulty: "The word denotes *elevation or ascent*, i. e. *loud, clear*. The music which commonly accompanied the singing was soft and feeble. In cases where it was to burst in more strongly during the silence of the song, *Selah* was the sign. At the end of a verse or strophe, where it commonly stands, the music may have readily been strongest and loudest." It may be remarked of this, as of all the other explanations which have been given, that it is mere conjecture, based on an etymology which, in any other language than Hebrew, would at once be rejected as unsound. A few other opinions may be noticed as belonging to the history of the subject. Michaelis, in despair at being unable to assign any meaning to the word, regarded it as an abbreviation, formed by taking the first or other letters of three other words (*Suppl. ad Lex. Hebr.*), though he declines to conjecture what these may have been, and rejects at once the guess of Meibomius, who extracts the meaning *da capo* from the three words which he suggests. For other conjectures of this kind, see Eichhorn, *Bibliothek*, v, 545. Mattheson was of opinion that the passages where Selah occurred were repeated either by the instruments or by another choir: hence he took it as equal to *ritornello*. Herder regarded it as marking a change of key, while Paulus Burgensis and Schindler assigned to it no meaning, but looked upon it as an enclitic word used to fill up the verse. Buxtorf (*Lex. Hebr.*) derived it from סֶלָה, *salâh*, to spread, lay low; hence used as a sign to lower the voice, like *piano*. In Eichhorn's *Bibliothek* (v, 550) it is suggested that Selah may perhaps signify a scale in music, or indicate a rising or falling in the tone. Köster (*Stud. u. Krit.* 1831) saw in it only a mark to indicate the strophical divisions of the Psalms, but its position in the middle of verses is against this theory. Augusti (*Pract. Einl. in d. Psa.* p. 125) thought it was an exclamation, like *Hallelujah!* and the same view was taken by the late Prof. Lee (*Heb. Gr.* § 243, 2), who classes it

among the interjections, and renders it *Praise!* "For my own part," he says, "I believe it to be descended from the Arabic root *salah*, 'he blessed,' etc., and used not unlike the word *Amen*, or the *doxology*, among ourselves." Delitzsch thinks that the instrumental accompaniment, while the psalm was sung, was soft, and that the Selah indicated loud playing when the singing ceased (*Psalmen*, i, 19). Hupfeld, the other most distinguished scholar among recent commentators on the Psalms, agrees with Delitzsch in general that the *Selah* was the signal for the singing to cease and the instrumental music to be performed alone; and he takes "an interlude" to be the meaning of the obscure word *διὰ ψαλμα*, by which Selah has been rendered in the Sept. We conclude, therefore, as the general drift of modern interpretation, that *Selah* denotes a pause in the vocal performance at certain emphatic points, while the single accompanying instrument carried on the music. If any further information be sought on this subject, it may be found in the treatises contained in Ugolino (vol. xxii), in Noldius (*Concord. Part. Am. et Vind.* No. 1877), in Saalschütz (*Hebr. Poes.* p. 346), and in the essay of Sommer quoted above. See also Stolle, *Selah Philologie Enucleatum* (Wittenb. 1685); Peucer, *De סֶלָה Ebraeorum* (Naumb. 1739); Danville Review, 1864. Selav. See QUAIL.

Selden, JOHN, an eminent lawyer and antiquarian, was born at Salvington, a hamlet in the parish of West Farring, near Worthing, in Sussex, England, Dec. 16, 1584. He received the rudiments of his education at the Free School of Chichester, and at the age of fourteen entered at Hert Hall, Oxford, where, although possessing great abilities, he did not particularly distinguish himself. He entered himself at Clifford's Inn in 1602 for the study of law, and in 1604 removed to the Inner Temple for the completion of his legal studies. He acquired very early a taste for antiquarian research, in which department he afterwards became so eminent. He was, in fact, one of the most learned men of his age. He lived in stirring times, and was, almost inevitably, mixed up with the stormy politics of the period; but he belonged to no extreme party, although a friend of liberty and of the popular cause. He died Nov. 30, 1654. His works are very numerous and learned. The following are those which require special notice here: *De Diis Syris Syntagma Duo* (1617), which contains a history of the idol deities mentioned in Scripture, and a summary of Syrian idolatry;—*De Successione in Bona Defuncti ad Leges Ebraeorum* (1631). An improved edition of this work appeared in 1636, including an additional treatise entitled *De Successione in Pontificatum Ebraeorum*. Both these treatises were republished by the author, with additions, in 1638:—*De Jure Naturali et Gentium juxta Disciplinam Ebraeorum Libri Septem* (1640). In this work the author treats of the seven so-called precepts of Noah, and gives a digest of all the laws of the Jews, distinguishing those which belong to universal law from those which are merely national and local:—*Uxor Ebraica; seu de Nuptiis et Divortio ex Jure Civili, id est Divino et Talmudico, Veterum Ebraeorum Tres Libri* (1646). Everything relating to marriage and divorce among the Jews will be found treated of here:—*De Synedrjio et Praefectura Juridica Veterum Ebraeorum* (1650). In this work, on which Selden spent twelve years, he sets forth everything recorded of the Sanhedrim, or judicial courts of the Jews, with collateral notices of similar institutions in other countries.

Selections of PSALMS. The Psalter, as it stands in the Prayer-book of the Church of England, is divided into sixty portions, agreeing with the average number of mornings and evenings in the month. There are also ten *selections* of Psalms, any one of which may be used instead of the *regular* psalms of the day. These are prefixed to the Psalter, and consist of one or more

Road from Antioch to Seleucia.

psalms, chiefly on the same subject. The following are the subjects of the several selections: 1, the majesty, greatness, and compassion of God; 2, God as an all-seeing judge; 3, penitence and trust in God; 4, contrast between wicked and good; 5, blessedness of the righteous; 6, the Lord a refuge; 7, 8, the happiness and joy of those who wait upon the Lord, etc.; 9, God infinite and worthy of all praise; 10, invitation to unite in praising God.

Se'led (Heb. *id.* גִּלְדִּי, *exultation*; Sept. Σαλαό v. r. Ἀσαλαό), a descendant of Jerahmeel, son of Hezron, being the elder of the two sons of Nadab, and without children (1 Chron. ii, 30). B.C. post 1615.

Selemi'a (Vulg. *Selemia*, the Gr. text being lost), the third named of the five rapid scribes whom Esdras was charged to select for taking down his visions (2 Esdr. xiv, 24).

Selemi'as (Σελεμίας) the Greek form (1 Esdr. ix, 34) of the name of SHELEMIAS (q. v.), one of the "sons" of Bani (Ezra x, 34).

Selennus, in Greek mythology, was a shepherd-boy of Achaia. He was found asleep among his herds by the nymph Argyra, and his youth and beauty led her to bestow on him her favor; but the beauty of man is not constant like that of a nymph, who retains her youth and beauty always, and Argyra accordingly forsook her lover when his charms were no longer fresh and blooming to her eyes. Venus herself endeavored to turn the hard heart of the goddess, but in vain, and Selennus pined away under the agonies of unrequited love. In her compassion Venus now changed him into a stream, on which she conferred the quality of inducing forgetfulness in the minds of all lovers who should bathe in its waters, so that they might be cured of their passion.

Selēnē (Σελήνη, the moon), a goddess worshipped by the ancient Greeks, being the personification of the moon. She is called a daughter of Hyperion and Theia, and, accordingly, a sister of Helios and Eos. She is also called *Phæbe*, as the sister of Phœbus, the god of the sun. In later times Selene was identified with *Artemis*, and the worship of the two became amalgamated. Among the Romans she was called *Luna*, and had a

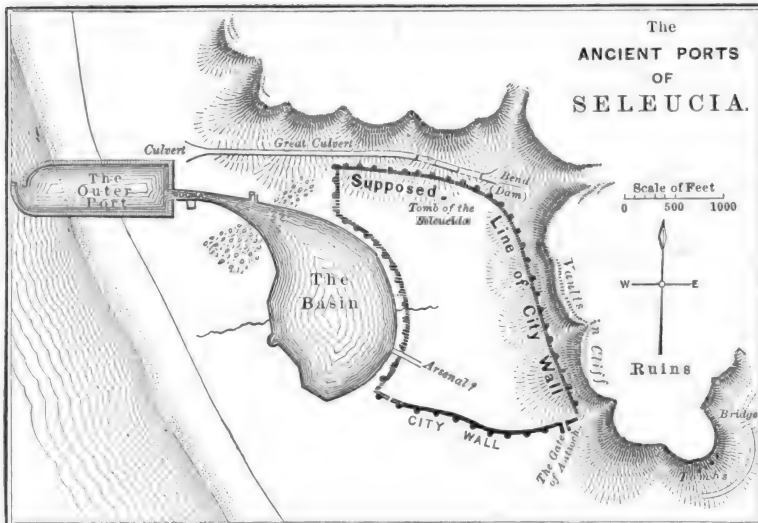

temple on the Aventine at Rome. Selene is described as a very beautiful goddess, with long wings and a golden diadem, and Æschylus called her "the eye of night."

Seleuci'a [some wrongly *Seleu'cia*] (Σελεύκεια), a city of Syria, situated west of Antioch, on the sea-coast, near the mouth of the Orontes; sometimes called *Seleucia Pieria*, from the neighboring Mount Pierus; and also *Seleucia ad Mare*, in order to distinguish it from several other cities of the same name, all of them denominated from Seleucus Nicanor. Its ancient name was *Rivers of Water* ("ῥιδατος ποταμοί. Strabo, xvi, 2, 8). It is fully described by Polybius (5, 39). It was practically the seaport of Antioch (q. v.), as Ostia was of Rome, Neapolis of Philippi, Cenchræ of Corinth, and the Piræus of Athens. The river Orontes, after flowing past Antioch, entered the sea not far from Seleucia. The distance between the two towns was about sixteen miles, chiefly of broken ground, with a large mountain called Coryphæseum on the north near the sea. We are expressly told that Paul, in company with Barnabas, sailed from Seleucia at the beginning of his first missionary circuit (Acts xiii, 4); and it is almost certain that he landed there on his return from it (xiv, 26). The name of the place shows at once that its history was connected with that line of Seleucidæ who reigned at Antioch from the death of Alexander the Great to the close of the Roman republic, and whose dynasty had so intimate a connection with Jewish annals (1 Macc. xi, 8; Josephus, *Ant.* xviii, 9, 8). See SYRIA. This strong

Coin of Seleucia.

fortress and convenient seaport was, in fact, constructed by the first Seleucus (died B.C. 280), and here he was buried. It was taken by Ptolemy Euergetes on his expedition to Syria, but was recovered by Antiochus Epiphanes. It retained its importance in Roman times, and in Paul's day it had the privileges of a free city (Pliny, *H. N.* v, 18). The remains are numerous, the most considerable being an immense excavation extending from the higher part of the city to the sea; but to us the most interesting are the two piers of the old harbor, which still bear the names of Paul and Barnabas. The masonry continues so good that the idea of clearing out and repairing the harbor was entertained, but not executed, by one Ali Pasha, of Aleppo. Accounts of Seleucia were first given by Pococke (*Observations in the East*, xxii, 182), and afterwards in the narrative of the *Euphrates Expedition* by general Chesney, and in his papers in the *Journal of the Royal Geographical Society* (viii, 228 sq.), and also in a paper by Dr. Yates in the *Museum of Classical Antiquities*. The harbor has still more lately been surveyed by captain Allen (*Dead Sea*, etc.). See also Conybeare and Howson, *St. Paul*, i, 137; Lewin, *St. Paul*, i, 116 sq.; Smith, *Dict. of Class. Geog.* s. v.

SELEUCIA (in *Chaldea*), COUNCIL OF, was held in 410, in order to re-establish ecclesiastical discipline in Persia and Mesopotamia. Twenty-seven canons were made.

1. Orders prayers to be made for princes.
2. Contains a profession of faith agreeing with that of Nicaea.
3. Orders that the consecration of a bishop be performed by three bishops at least.
5. Excludes from every ministration priests and deacons who do not observe strict continence.
6. Ordains the same thing with respect to clerks guilty of usury.
7. Excommunicates all who have dealings with enchanters, etc.
10. Directs that priests and other clerks shall eat in a place distinct from the poor.
11. Orders that their sleeping-rooms also shall be separate.
- 15 and 16. Ordain that there shall be but one archdeacon in each diocese, who shall act as the arm and tongue of the bishop to publish and execute his will.
20. Permits the archdeacon to celebrate the holy eucharist in the absence of the bishop, and gives him power to punish deacons under certain circumstances.
25. Forbids bishops to ordain priests and deacons anywhere save before the altar.

See Mansi, *Suppl.* vol. i, col. 285.

SELEUCIA (in *Syria*), COUNCIL OF. This council was held in the Church of St. Tecla, Sept. 27, 359, by

order of the emperor Constantius. One hundred and sixty bishops were present, of whom about one hundred and five were Semi-Arians, forty Anomœans, and thirteen Catholics; among these was St. Hilary of Poitiers, who for four years had been banished into Phrygia. Among the Semi-Arians were George of Laodicea, Silvanus of Tarsus, Macedonius of Constantinople, Basil of Ancyra, and Eustachius of Sebaste. The Anomœans formed the party of Acacius of Cæsarea. The thirteen Catholic bishops, who probably came from Egypt, alone maintained the consubstantiality of the Word. Leonas, the imperial quæstor, had orders to attend the deliberations of the assembly. The bishops forming the party of Acacius, anxious to avoid any inquiry into the several accusations and complaints which they were aware would be brought against them, insisted that, first of all, the questions relating to the faith should be examined, and after some discussion they gained their point. In the very first sitting, however, they openly renounced the Council and the Creed of Nicaea, and maintained that the Son was of a substance different from that of the Father. A discussion ensued between them and the Semi-Arians, which ended in the Acacians leaving the assembly, disgusted with its decision, viz. that the formulary drawn up at Antioch in 341 should be adhered to.

In the second sitting the formulary of Antioch was confirmed by the Semi-Arians, who were alone in the council; while the Acacians drew up a new formulary, condemning both the similarity of substance and the contrary. In the third sitting the dispute was continued, Leonas having been deputed by the Acacians to attend for them, and to deliver their formulary of faith. In the fourth sitting the Acacians declared that they believed the likeness of the Son to the Father to consist in a likeness of will only, and not of essence. The others maintained a likeness of essence also, and no decision was arrived at.

In the fifth sitting the Acacians were summoned to attend to examine the case of St. Cyril, who appealed from the judgment of Acacius, by whom he had been deposed. They refused to attend; and, after having frequently summoned them, the council deposed Acacius, Eudoxius of Antioch, George of Alexandria, and several others. They reduced to the communion of their respective churches, Asterius, Eusebius, and five others, until such time as they should disprove the accusations brought against them. Another bishop was elected to the see of Antioch. The sentence of the council was not, however, carried into effect, as the deposed bishops were able to secure the favor of the emperor.

Seleucians, the followers of Seleucus, a philosopher of Galatia, who, about the year 380, adopted some of the notions of the Valentinians. He taught that Jesus Christ assumed a body only in appearance; that the world was not made by God, but was eternal; that the soul was only an animated fire created by angels; that Christ does not sit at the right hand of the Father in a human body, but that he lodged his body in the

sun, according to *Psa.* xix, 4; and that all the pleasures of happiness consist in corporeal delight. Augustine says that the Seleucians rejected the use of water in baptism, under the pretence that this was not the baptism instituted by Christ, because John, comparing his baptism with that of Christ, says, "I baptize you with water; but he that cometh after me shall baptize you with the Holy Ghost and with fire." They deemed a baptism of fire more suitable to the spiritual nature of man than a baptism of water, since they taught that the soul was a portion of living fire. See HERMIANS.

Seleucidic Æra is that chronology which dates from the victory of Seleucus over Antigonus and the recovery of Babylonia (October, B.C. 312). This "æra of the Seleucidæ" was at one time in general use throughout all Central and Western Asia. The Arabians, who called it the "æra of the two-horned" (*Dhulkarnaim*), meaning Alexander, did not relinquish it till long after the religion of Mohammed had arisen, and the æra of the "Hegira" (the flight of Mohammed from Mecca to Medina) had been introduced. The Jews did not adopt this æra till after they passed from under the dominion of the Egypto-Greeks to that of the Syro-Greeks, when they were obliged to employ it in their civil contracts, and therefore it was designated by them as the *מנין שכרות*, or "æra of contracts," and *מנין יונים*, or "Greek æra." Thenceforth they retained its use upwards of twelve centuries, and employed no other epoch till the final close of the schools on the Euphrates (A.D. 1040), since when they date their æra from the creation. This Seleucidic æra is the same which in the Books of the Maccabees is designated as "the year of the kingdom of the Greeks" (*βασιλείας Ἑλλήνων*, 1 Macc. i, 10), and both books compute by it. The student of history can very easily make use of the Seleucidic æra by bearing in mind that the first year of this æra corresponds to the first year of the 117th Olympiad, or to the year 442 *ab urbe condita*, or to the year B.C. 312. With this guide in his hand he will be enabled to find any year corresponding to that of the Seleucidic æra; thus the year

1 B.C.	is	=	312 Sel.	=	753 ab u. c.	=	194, 4 Olymp.
1 A.D.	"	=	313 "	=	754 "	=	195, 1 "

130 "	"	=	442 "	=	883 "	=	227, 2 "

See ÆRA. (B. P.)

Seleucus (Σέλευκος, a common Greek name), the name of several of the kings of the Greek dominion of Syria (q. v.), hence called that of the Seleucidæ. See ANTIOCHUS. Of these one only is named in Scripture, although several are referred to in *Dan.* xi.

SELEUCUS IV, surnamed *Philopator* (or *Soter*, in Josephus, *Ant.* xii, 4, 10), styled "king of Asia" (2 Macc. iii, 3), that is, of the provinces included in the Syrian monarchy, according to the title claimed by the Seleucidæ, even when they had lost their footing in Asia Minor (comp. 1 Macc. viii, 6; xi, 18, xii, 39, xiii, 32), was the son and successor of Antiochus the Great (see *Appian*, *Syria*, iii, 45). He took part in the disastrous battle of Magnesia (B.C. 190), and three years afterwards, on the death of his father, ascended the throne. He seems to have devoted himself to strengthening the Syrian power, which had been broken down at Magnesia, seeking to keep on good terms with Rome and Egypt till he could find a favorable opportunity for war. He was, however, murdered, after a reign of twelve years (B.C. 175), by Heliodorus (q. v.), one of his own courtiers, "neither in [sudden] anger nor in battle" (*Dan.* xi, 20; see Jerome, *ad loc.*), but by ambitious treachery, without having effected anything of importance. His son Demetrius I Soter [see DEMETRIUS], whom he had sent, while still a boy, as hostage to Rome, after a series of romantic adventures gained the crown in B.C. 162 (1 Macc. vii, 1; 2 Macc. xiv, 1).

The general policy of Seleucus towards the Jews, like that of his father (iii, 2, 3, *καὶ Σέλευκον*), was conciliatory, as the possession of Palestine was of the highest importance in the prospect of an Egyptian war; and he undertook a large share of the expenses of the Temple service (ver. 3, 6). On one occasion, by the false representations of Simon (q. v.), a Jewish officer, he was induced to make an attempt to carry away the treasures deposited in the Temple by means of the same Heliodorus who murdered him. The attempt signally failed, but it does not appear that he afterwards showed any resentment against the Jews (iv, 5, 6); though his want of money to pay the enormous tribute due to the Romans may have compelled him to raise extraordinary revenues, for which cause he is described in Daniel as a "raiser of taxes" (xi, 20; comp. *Livy*, xli, 19). See Manzini's monograph (in Italian) on this prince (Maidland, 1634).

Seleucus. See SELEUCIANS.

Seleznevtshini, a sect of dissenters from the Russo-Greek Church resembling the Strigolniks (q. v.).

Self-baptizers. See SE-BAPTISTS.

Self-deception, deception proceeding from, and practiced upon, one's self, especially in forming judgments or receiving impressions of our own state, character, and conduct. For example: 1. In judging of our own character we are very apt to enhance the good qualities we possess, to give ourselves credit for others that we really have not, and to ignore the evil qualities that should be seen by us. 2. In the matter of our conduct we are very prone to persuade ourselves either that our acts were not wrong, or that the peculiar circumstances under which we were placed were so extenuating as to remove actual guilt. 3. There is a tendency to confound the non-appearance of a vicious affection with its actual extirpation. 4. An improper estimate of the reality of our repentance, faith, works, etc., or of the importance of the same. The range of objects as to which men deceive themselves is very wide, including God, Jesus Christ, the Holy Spirit, Scriptures, experience, etc. The results are great and dangerous, it renders men slaves of procrastination, leads them to overrate themselves, flatters them with an easy victory, and confirms their evil habits. The means of avoiding self-deception are strict self-inquiry, prayer, watchfulness, and diligent study of God's Word.

Self-dedication, the unreserved dedication of ourselves to God with the purpose of serving him in holiness and righteousness.

Self-defence, the act of defending one's self and property from injury. The right of self-defence has been questioned by many, and has also been stoutly advocated. The secular law requires no man to submit passively to the infliction of evil upon his person, but always allows him to defend himself. Of course, the violence used must only be so much as is necessary for defence. Is the principle of self-defence contrary to the Gospel, or should a man choose rather to lose his own life than to save it at the expense of another's? It may be answered that where there is reason to believe that life is at stake one is justified in taking the life of the would-be murderer; for the reason that in attempting a felony he has forfeited his life, and in preserving your own you spare the innocent. It is generally con-

sidered lawful even to kill in the defence of chastity, provided there be no other way of preserving it.

Self-denial, the forbearing to follow one's inclinations or desires. In the scriptural sense it is the renouncing of all those pleasures, profits, views, connections, or practices that are prejudicial to the true interests of the soul. The understanding must be so far denied as not to lean upon it independent of divine instruction (Prov. iii, 5, 6). The will must be denied so far as it opposes the will of God (Eph. v, 17). The affections must be denied when they become inordinate (Col. iii, 5). The gratification of the members of the body must be denied when out of their due course (Rom. vi, 12, 13). The honors of the world and praise of men must be foregone when they become a snare (Heb. xi, 24-26); also worldly emoluments, when to be obtained in an unlawful way or when standing in opposition to religion and usefulness (Matt. iv, 20-22). Friends and relatives must be renounced, so far as they oppose the truth and would influence us to oppose it too (Gen. xii, 1). Our own righteousness must be relinquished, so as not to depend upon it (Phil. iii, 8, 9). Life itself must be laid down if called for in the cause of Christ (Matt. xvi, 24, 25). In fine, everything that is sinful must be denied, however pleasant and apparently advantageous, since, without holiness, no man shall see the Lord (Heb. xii, 14).

Self-examination, the act of examining one's own conduct and motives. It is a duty commanded by God (2 Cor. xiii, 5), and, to result favorably, should be deliberate, frequent, impartial, diligent, wise, and with a desire of amendment. In self-examination reference should always be made to the Word of God as the rule of duty.

Self-government, the wise and conscientious regulation of all our appetites, affections, and habits on Christian principles.

Selfishness, an inordinate self-love, prompting one, for the sake of personal gratification or advantage, to disregard the rights or feelings of other men. It is a negative quality—that is, it consists in *not* considering what is due to one's neighbors through a deficiency of justice or benevolence. Selfishness is contrary to the Scriptures, which command us to have respect for the rights and feelings of others, and forbids us to encroach thereupon.

Self-knowledge, the knowledge of one's own nature, abilities, duties, principles, prejudices, tastes, virtues, and vices. This knowledge is commanded in the Scriptures (Psa. iv, 4; 2 Cor. xiii, 5). It is of great utility, as it leads to humility, contrition, prayer, self-denial, charity. When by self-knowledge we become acquainted with our powers, resolution, and motives, then we secure self-possession. To secure self-knowledge there must be watchfulness, frequent and close attention to the operations of our own mind, study of the Scriptures, and dependence on divine grace.

Self-love (in Greek, *φιλαυτία*), an element of character which is to be carefully distinguished from *selfishness* as being radically different, and not so in degree only. The former is demanded by the moral consciousness in man, while the latter is condemned, and the same distinction prevails in the Scriptures. The one is the basis for motives to self-examination, for prudence and carefulness of life, for self-renewal and improvement; the other the ground in which all "works of the flesh" (Gal. v, 19; comp. 1 Tim. vi, 10) are rooted.

General or philosophical ethics requires self-love in the sense that each person should honor the idea of humanity or the human personality which underlies his own nature, and that he should develop it in every direction. The principle of humanity which asserts the dignity of human nature is the prevailing idea. Theological ethics treats self-love as a disposition which

has for its object the *Christian* personality, which springs from love to God and Christ, which sanctifies the Lord in the heart (1 Pet. iii, 15), protects against all contamination of the flesh and spirit (2 Cor. vii, 1), and seeks to be renewed in the spirit of the mind (Eph. iv, 23) in order that we may be glorified with Christ (2 Cor. iii, 18). The regenerated personality, therefore, constitutes both subject and object in Christian self-love, while, in the natural sentiment, unregenerate man is the substituted entity, and Christian self-love alone is really virtuous, a personal disposition through which the Christian presents himself to God a holy, living sacrifice (Rom. xii, 1).

The intimate relation subsisting between self-love and love to our neighbors is such that they are inseparable and mutually condition each other. Not only does love for others limit our love of self, but the egoist degrades himself in proportion as he indulges in his egotism; and no person is capable of being useful to others in his character and his life who does not in the best sense love and care for himself. Every duty to self may accordingly be viewed as duty to our neighbors, and *vice versa*, if care be taken to guard against the eudæmonism which is so likely to intrude.

In its manifestations Christian self-love assumes a twofold character in which the negative and positive elements predominate at different times. The former element corresponds to *self-respect*, whose influence leads the Christian to avoid everything that may wound, or in any way impair, the dignity conferred on him, and which impels him to cultivate the habit of spiritual watchfulness. Upon this ground the positive element in self-love carries forward the work of renewal, including the whole of Christian development and perfection. And inasmuch as the entire man is concerned in these objects of self-love, it follows that the body must share in the development and other benefits secured to the spirit, though simply as the spirit's minister and instrument (1 Thess. v, 23). At this point Christian self-love passes over into spiritual discipline, and coincides to some extent with Christian asceticism. See Herzog, *Real-Encyclop.* s. v.; Fleming, *Vocab. of Philos.* s. v.

Self-murder. See SUICIDE.

Self-seeking. See COVETOUSNESS.

Selig, GOTTFRIED, a convert from Judaism, whose original name was *Philipp Heynemann*, was born at Weissenfels in 1722. Up to his tenth year he enjoyed the lectures of a private tutor; after this time he was sent first to Dessau and then to Fürth, to attend the Talmudical lectures there. When he was thirteen years of age, his father wished him to become a merchant, but to this proposition he would not yield. His father finally consented to give him a better education, and a candidate of theology was intrusted with his instruction in the German and Latin languages. At times the pupil, who was well acquainted with the objections against Christianity, propounded questions to his teacher which the latter could not answer, because he was not acquainted enough with the Hebrew language. The teacher then invited a certain Herrlich, who was well acquainted with the Hebrew and Rabbinic literature, to meet Philipp several times in order to dispute with him about Christianity. The result was that the sting left in the Jewish heart became the impetus for further searching the Scriptures. About Christmas of 1737, Philipp went to pastor Schumann and handed to him a paper in which certain passages of the New Test. were written down, and of which he desired an explanation. This visit decided his future course, and Sept. 17, 1738, he was baptized at Weissenfels, assuming the name *Gottfried Selig*. In 1767 he came to Leipsic, where Prof. Dathe examined him in *Hebraicis*, and Prof. Bosenck in *Talmudicis et Rabbinicis*, and thus he was enabled to commence his lectures in Rabbinic literature. He died after 1792. He wrote, *Collectio abbreviatarum Hebraicarum ultra 4000 Assurgens* (Leipsic,

1781):—*Kurze und gründliche Anweisung zu einer leichteren Erlernung der jüdisch-deutschen Sprache* (ibid. 1767):—*Der Jude* (ibid. 1767-71, 9 vols.), in which he describes the usages, customs, and doctrines of the Jews according to Rabbinic sources:—*Compendia Votum Hebraico-Rabbinicarum* (ibid. 1780). See Fürst, *Bibl. Jud.* iii, 309; Steinschneider, *Bibliog. Handbuch*, p. 131; Delitzsch, *Saat auf Hoffnung*, viii, 159 sq. (B. P.)

Selingstad, COUNCIL OF (*Concilium Salegunstadiense*). This council was held in August, 1022, by the emperor Henry; Aribio, archbishop of Mayence, presiding. Twenty canons were published.

3. Forbids the celebration of marriages from Advent to the octave of the Epiphany, from Septuagesima to the octave of Easter, during the fourteen days preceding the Feast of John the Baptist, and on fast-days and vigils.

4. Forbids a priest having drunk anything after cock-crow in summer to say mass on the following day; allows of cases of necessity in winter.

6. States that complaints had been made of the conduct of some very foolish priests who were in the habit of throwing the corporal into a fire for the sake of extinguishing it, and strictly prohibits it.

9. Forbids talking in church, or in the church porch.

10. Forbids lay persons, and particularly matrons, to hear daily the gospel "In principio erat verbum;" and particular masses, such as the mass of the Holy Trinity or of St. Michael. The canon seems to imply that this had been done for the sake of divination.

16. Forbids any person to go to Rome without first obtaining the permission of his bishop or his deputy.

13. Notices the folly of those who, being guilty of some crimes, despise the penance imposed by their own priests, and trust to obtaining a plenary absolution from the Roman pontiff. It declares that such indulgence shall not be granted to them, but that in future they shall first fulfil the penance imposed, and then go to Rome, if they choose, having first obtained leave from their own bishop.

After the canons follows an appendix concerning the manner of celebrating a council.

Selinuntius, in Greek mythology, was a surname of *Apollo*, derived from his temple and oracle at Selinus.

Selinus, in Greek mythology, was a son of Neptune, river-god and ruler of Ægialus, and father of Helice, who was married to Ion.

Selleck, BRADLEY, a minister of the Methodist Episcopal Church, was born in Danbury, Conn., Aug. 23, 1784. At the age of twelve he professed conversion, and united with the Church. He received license as local preacher before he was twenty-one. In 1822 he joined the New York Conference, and continued to labor till 1851. He made New York his residence during the remainder of his life, and was much esteemed by ministers and laymen of his own and other churches. He died in New York city, Nov. 4, 1860. See *Minutes of Annual Conferences*, 1861, p. 114.

Selli, the priests among the ancient Greeks who delivered the oracles of Zeus at Dodona. They are mentioned by Homer as having observed a very rigid discipline.

Sellman, HORACE S., a minister of the Methodist Episcopal Church, was born in Brown County, O., Jan. 14, 1821, and professed conversion in 1844. For some time he served the Church as a layman, but in 1846 he entered the Ohio Conference. He preached about thirteen years, when he was seized with hemorrhage of the lungs, and died Feb. 1, 1859. See *Minutes of Annual Conferences*, 1859, p. 234.

Selneccer, NICHOLAS, *Dr.*, an early Lutheran poet and theologian, was born Dec. 6, 1530, at Hersbruck, near Nuremberg, and educated at Wittenberg. He was made court preacher at Dresden in 1557, but obliged to resign in 1561 because he was not in sympathy with the Melancthonian party, then in power. At Jena, where he obtained a professorship, the mildness of his views gave offence to the Flacianists, who governed the university, and they had him deposed. His next position was at Leipsic (1568). In 1570 he was charged with the conduct of the Reformation in Brunswick, and

aided in the founding of the University of Helmstädt. His preference for an unmodified Lutheranism led him at the same time to attempt the work of restraining the growth of Crypto-Calvinism in Saxony, in which he succeeded temporarily by gaining the ear of the elector Augustus. He also took a prominent part in the settling of the *Formula of Concord* (q. v.), translating it (after the attempt of Osiander) into Latin and furnishing it with a preface. He thus excited further opposition from the Crypto-Calvinists, which resulted in his being again deposed on the succession of Christian I and the advent to power of Dr. Crell (q. v.). A brief period of literary activity now followed, first at Leipsic and afterwards at Magdeburg; but he was soon made superintendent at Hildesheim, and intrusted with the ordering of ecclesiastical affairs in other places as well. In the performance of such duties his health gave way, and when the fall of Dr. Crell called him to Leipsic, the journey proved too fatiguing and brought about his death, May 24, 1592.

Selneccer's writings were numerous, but most of them have been forgotten. The more noteworthy are an exposition of the book of Psalms, in various editions and revisions (last ed. Leipsic, 1593), and a large number of hymns. His poetical writings evince talent of no mean order, but are marred by the constant introduction of references to personal troubles, etc., an undue attention to details, and an incessant emphasizing of *pure doctrine*, though the latter feature is preserved from becoming offensive by the fact that it is in the main the expression of the writer's heart. See Wetzel, *Lieder-historie*, vol. iii; Götze, *Septem Dissertt. de N. Seln.* (1723); Koch, *Geschichte des deutschen Kirchenliedes*, vol. i; Müttzell, *Geistl. Lieder der evang. Kirche aus dem 16. Jahrhundert* (Berlin, 1855, 3 vols.); Herzog, *Real-Encyklop.* s. v.; Hagenbach, *Hist. of Doctrines*, ii, 149-151.

Seloure, a mediæval term for a canopy; the inner roof of a room which is sealed or closed with planking.

Selvedge (סֵלְבֵדָה, *katsah'*, an *end*, as often rendered), the edge of a piece of cloth (Exod. xxvi, 4). See TABERNACLE.

Selyns, HENRY, a (Dutch) Reformed minister, was born in Amsterdam, Holland, in 1636. He was regularly educated in one of the universities of that country for the ministry, and licensed by the Classis of Amsterdam as a proponent, or candidate, in 1659. In 1660 he accepted a call made by the Dutch West India Company, through the Classis of Amsterdam, to become the minister of the Dutch Church of Breukkelin (now Brooklyn) for four years. He was ordained in 1660 in Holland, and came to this country with Rev. Harmanus Blom, who was on his way to the Church of Kingston, N. Y. During his ministry at Brooklyn, Mr. Selyns, by special request of Gov. Stuyvesant, came over to New York and preached regularly on Sabbath evenings to the negroes and other poor people, on his farm, or *Bouwery*, and on the present location of St. Mark's Episcopal Church, corner of Ninth Street and Second Avenue. His ministry at these places was very popular and useful. He returned to Holland at the close of his fourth year, in 1664, and took charge of a congregation of poor folks who earned their bread by gathering turf. He was happy in serving them, and declined a pressing invitation in 1670 to come to New York as colleague of the aged pastor of the Collegiate Church, Johannes Megapolensis. The call was renewed and accepted by him in 1682. The period was critical for the Dutch Church, in consequence of the English ascendancy in the province and the establishment of the State Church. "The Dutch were only tolerated, according to capitulation, as dissenters. The governors attempted to exercise arbitrary powers, but the people resisted. Dominie Selyns was fully alive to the importance of the subject, and was rejoiced at the arrival of Gov. Dongan in 1683, who allowed full liberty of conscience." An assembly of the people was soon called, which, among

other matters, established the legal position of the denominations, allowing the churches to choose their own ministers. When Leisler usurped the governor's chair, Mr. Selyns was one of his most formidable opponents, and preached a jubilant sermon over his fall. This conduct divided his congregation, and his salary was partly withheld for years; but he held his ground tenaciously and triumphantly, until by the charter of May 11, 1696, he felt that the liberties of his Church were finally secured. Not till then did he seek relief and a colleague in his large congregation. The Rev. Gualterus (Walter) Du Bois was called in 1699, and for fifty-five years "ministered before the Lord" in that one church. Mr. Selyns died July, 1701. He was the most eminent of the ministers who had yet come from Holland — prudent, sagacious, bold, earnest, of positive convictions, fearless of danger, a defender of the faith, and a peace-maker. He was a successful minister of the Gospel, and had probably more to do in determining the position of the Reformed Dutch Church in America than almost any other man. In spirit towards other churches he was liberal, kindly, and catholic. He held friendly relations with the chief men of the state, and maintained correspondence with eminent literary men of the colonies, such as the Mathers and other notables. He was also a poet, versifying with equal ease in Latin and Dutch. Cotton Mather (in his *Magnalia Christi Americana*, iii, 41) says of him that "he had so nimble a faculty of putting his devout thoughts into verse that he signalized himself by the greatest frequency which perhaps ever man used of sending poems to all persons, in all places, on all occasions; and upon this, as well as upon greater accounts, was a David unto the flocks of our Lord in the wilderness." Murphy, *Anthology of New Netherland*, contains much of his life and poetry. See also De Witt, *Hist. Discourse*; Sprague, *Annals of the Amer. Pulpit*, vol. ix; Corwin, *Manual of the Reformed Church*, p. 213-217. (W. J. R. T.)

Sem (Σήμ), the Græcized form (Luke iii, 36) of the name of SHEM (q. v.), the son of the patriarch Noah.

Semachî'ah (Heb. in the prolonged form *Semachya'hu*, סֶמַחֲיָהוּ, *sustained of Jehovah*; Sept. Σαμαχίας v. r. Σαβαχία), the sixth and last-named son of Shem-ah, the son of Obed-edom (1 Chron. xxvi, 7). B. C. cir. 1013.

Semag, or Semak. See MOSES DE COUCY.

Semamith. See SPIDER.

Semantra (σημαντρα, *signals*), wooden boards, or iron plates full of holes, which the modern Greeks use instead of bells to summon the people to church. These instruments they hold in their hands, and knock them with a hammer or mallet. The same term is sometimes applied to a bell, or a metal drum used for the same purpose.

Semargia, in Slavic mythology, was a goddess personifying *winter* — the cold season of the year — and highly revered among the grand Pantheon at Kief by the Russians.

Semaxii, a name mentioned by Tertullian as sometimes applied to Christian martyrs by their persecutors, from the fact that those who were burned alive were usually tied to a board or stake of about six feet in length, which the Romans called *semaxis*. — Bingham, *Christ. Antiq.* bk. i, ch. ii, § 10.

Sembat, a Paulician who, about the year 840, formed a sect in the province of Ararat by a fusion of Parseism and Paulicianism. He established himself at Thondrac, from which place his sect was called Thondracians (q. v.).

Sembiāni, a Christian sect who were so called from their leader, Sembianus, who condemned the use of all wine. He persuaded his followers that wine was a production of Satan, denied the resurrection of the

body, and rejected most of the books of the Old Test.

Sem'eî (Σεμεΐ), the Græcized form apparently of two Heb. names: 1. SHIM'EI (q. v.), spoken of as (a) one of the "sons of Asom" (1 Esdr. ix, 33), i. e. of Hashum (Ezra x, 33); (b) the son of Cisai and father of Jairus, among the ancestors of Mordecai (Esth. xi, 2, Σεμεΐας). 2. The son of Joseph and father of Mattathias in our Lord's genealogy (Luke iii, 26, v. r. Σεμεΐν), probably SHEMALAH (q. v.), the son of Shechaniah and father of Neariah (1 Chron. iii, 22).

Semêlê, in Greek mythology, was the mother of Bacchus and daughter of Cadmus and Harmonia. See BACCHUS.

Semel'lius (Σεμελλιος, v. r. Σεμέλλιος, Σεβέλλιος), a corrupt Greek form (1 Esdr. ii, 16, 17, 25, 30) of the name of SHIMSHAI (q. v.), the Samaritan scribe (Ezra iv, 8, 9, 17, 23).

Sementirê Feriæ, or SEMENTINA DIES, was kept in seed-time by the Romans for the purpose of praying for a good crop. It lasted only one day, and was fixed by the pontifex maximus.

Semi-Arians, a sect which arose in the 4th century, holding a modified form of Arianism. It was founded by Eusebius of Cæsarea and the sophist Asterius. They were opposed alike to the strict definition of orthodox Nicene theologians like St. Athanasius, and to the equally strict definition which characterized the logical intellectualism of the old Arians. Its symbol was the *Homoiousion*, which they substituted for the orthodox *Homoousion*; that is, the Son was regarded not as of the same substance with the Father, but of a substance like in all things except in not being the Father's substance. They maintained, at the same time, that though the Son and Spirit were separated in substance from the Father, still they were so included in his glory that there was but one God. Unlike the Arians, they declared that our blessed Lord was not a creature, but truly the Son born of the substance of the Father; yet they would not allow him, with the orthodox, simply to be God as the Father was, but asserted that the Son, though distinct in substance from God, was at the same time essentially distinct from every created nature.

The Semi-Arian party first came into prominence at the Council of Nicæa (A.D. 325), under the leadership of Eusebius, bishop of Cæsarea. During the fifty-six years that elapsed between the Council of Nicæa and that of Constantinople (A.D. 325-381) as many as eighty councils are on record, a large number of which were held by the Semi-Arian bishops in support of their contests with the orthodox and with their own sects. The Semi-Arian party had not one uniform definition of faith, but differed from each other on many important points; the only real bond of union was their opposition to the term which unequivocally expressed Catholic doctrine. Nothing, in fact, was more conspicuous than the unsettled variableness of the Semi-Arian creed. Two confessions of faith were drawn up at the Council of the Dedication (Socrates, *Hist. Eccl.* ii, 10), held at Antioch, A.D. 341; another by the bishops of Palestine, a few months afterwards (*ibid.* ii, 18); four years later (A.D. 345) at Antioch; at Sirmium (A.D. 351 [see Sozomen, *Hist. Eccl.* iv, 6]); and again at the same place seven years later (*ibid.*). From about this time a reaction went steadily on, until in A.D. 366 fifty-nine Semi-Arian bishops subscribed an orthodox formula, and were received into the Catholic Church (Socrates, *Hist. Eccl.* iv, 12). There is no evidence of any large number of the party afterwards existing. Many others, doubtless, came back to the Church, not a few plunged into the heresy of the Macedonians [see MACEDONISTS], and some, like Eudoxius of Antioch, became avowed Anomœans. Consult Blunt, *Dict. of Theology*; id. *Dict. of Sects*, s. v.; Hagenbach, *Hist. of Doctrines*, vol. i, § 92; Newman, *Hist. of the Arians*; Pusey, *Councils of the*

Church, ch. v; Gardner, *Faiths of the World*, s. v. See **ARIANISM**; **SABELLIUS**.

Semi-cope, an inferior kind of cope. This term is sometimes applied to a small cope; occasionally to the old black Sarum choral copes, like cloaks without sleeves; and occasionally to a cope of linen, serge, or buckram, unornamented with embroidery.

Semidolites, a sect of Acephali (q. v.), which sprang up originally under the name of *Barsanians* at the end of the 5th century. They had no succession of priests, and professed to keep up the celebration of a valid eucharist by placing a few crumbs of the bread which had been consecrated by Dioscurus in a vessel of meal (*σμιδαλις*, whence their name), and then using as fully consecrated the bread baked from it. See Damasc. *Ad Hæres.* iii; Baronius, *Annal.* ad ann. 535; Neale, *Patriarchate of Alexandria*, ii, 22.

Semi-double, an inferior or secondary ecclesiastical festival, ranking next above a simple feast or bare commemoration.

Semi-frater, a layman or a secular cleric who, having benefited a religious house by gifts or personal service, was regarded as in some way belonging to the order or fraternity, having a share in its prayers during life, and in mortuary masses after death.

Semi-jejunia (*half-fasts*), a name given to the weekly fasts in the ancient Christian Church, because the services of the Church continued on these days no longer than till three o'clock in the afternoon, whereas a perfect and complete fast was never reckoned to end before evening. These half-fasts were also called *Stationes* (q. v.).

Semi-Judaizers (1), a Socinian sect, originated in the 6th century by Francis David, a Hungarian, who was superintendent of the Socinian churches in Transylvania. The principal doctrine which David and his followers maintained was that neither prayer nor any other act of religious worship should be offered to Jesus Christ. Faustus Socinus argued strongly against this tenet; and when all efforts to reclaim the Hungarian heretic were found to be fruitless, the public authorities threw him into prison, where he died at an advanced age, A.D. 1579. The sect, however, survived its founder, and for a long time gave no little trouble to Socinus and his followers in Poland and Lithuania. Faustus Socinus wrote a book expressly against the Semi-Judaizers, while at the same time he strongly admitted that the point in debate between himself and them was of no great importance, since in his own view it was not necessary to salvation that a person should pray to Christ.

(2.) The name Semi-Judaizers was also given to a sect founded near the close of the 16th century by Martin Seidelius, a Silesian, who promulgated various strange doctrines in Poland and the neighboring countries. The chief points of this system were that God had indeed promised a Saviour or a Messiah to the Jewish nation, but that this Messiah had never appeared, and never would appear, because the Jews by their sins had rendered themselves unworthy of so great a deliverer; that of course Jesus Christ was erroneously regarded as the Messiah; that it was his only business and office to explain the laws of nature, which had been greatly obscured, and therefore that whoever shall obey this law as expounded by Jesus Christ will fulfil all the religious duties that God requires of him. While diffusing these erroneous opinions, Seidelius rejected all the books of the New Test. as spurious.

(3.) In Russia, also, a small sect of Semi-Judaizers, called *Sabatniki* (q. v.), exists, which mixes up to a considerable extent Jewish and Christian rites.

Semikin (סמיכין), or *Junctions*, is a Masoretic term to denote "approaching, belonging together, con-

nection," of one word with another. Now, when two or more words are associated together through the addition or diminution of a letter or word, or by the interchange of words which are not in the habit of being joined in this manner, and if it only occurs so in one place, the Masorites remark thereon, לית דסמיך, i. e.

"not extant so joined." Thus, on וירגן ויירש, *and corn and wine* (Gen. xxvii, 37), they remark "not extant so joined," since in all other places where these two words occur the word רגן has not the Vav conjunctive (בלר החיבור (וירגן); and thus the Masorah finalis under the letter Vav, p. 28 a, col. 2, 3, gives a list of sixty-two pairs, both words of which have Vav conjunctive, and are without parallel. The same remark is made on שמיר שריה, *briers, thorns* (Isa. xxvii, 4), since in all other places it is with Vav conjunctive. The sixteen pairs without the Vav conjunctive are given in the Masorah. The same remark is made on שבתון שבת, *Sabbatism, Sabbath* (Exod. xvi, 23), since in all other passages in which these two words are joined they are inverted. Thus in ver. 23 we read שבת שבתון, but everywhere else שבתון שבת. A list of thirty-nine instances which occur in this connection is given by the Masorah in the part entitled *Various Readings* (חלופים קריאה). See Frensdorff, *Ochlah we- Ochlah*, § 253, p. 50, 139 sq.; § 252, p. 50, 138 sq.; § 273, p. 53, 147 sq.; Levita, *Massoreth Ha-Massoreth* (ed. Ginsburg), p. 212 sq.; Buxtorf, *Tiberias, sive Commentarius Masoreticus*, p. 258 sq. (B. P.)

Seminarist, a Roman Catholic priest who has been educated in a seminary.

Seminary-priest, a name given in England to Roman Catholic clergy during the 17th century, on account of their having been educated and prepared for holy orders in one of the foreign seminaries—e. g. Rheims, Douai, or Toulouse.

Semiophōrus (Σημιοφόρος), a Greek term for a *worker of miracles*.

Semi-Pelagianism, the name invented by the schoolmen to mark the middle line of opinion held by the Pelagians (q. v.), on one side, and the predestinarian theory of Augustine, on the other. As early as A.D. 426 the monks of Adrumetum, in Byzacene Africa, having read Augustine's letter to Sixtus (*Ep.* 194), were astounded at the doctrine therein propounded, viz. that men were disposed of eternally, either in the way of happiness or misery, by an arbitrary decree. To their strictures Augustine answered by putting forth his two works *De Gratia et Libero Arbitrio* and *De Correptione et Gratia*. The task of harmonizing these conflicting systems of theology was attempted by John Cassianus (q. v.), and he became the real founder of Semi-Pelagianism. Cassianus acknowledged the universal deterioration of human nature by the fall; but he assigned also an unlimited scope to the divine goodness and love that wills the salvation of all, and bends everything to that end. He expressly condemns the main position of Pelagius: "Let no one imagine that by this we give support to the profane notion of some who assert that the sum of salvation is in our own power, and by ascribing everything to free will make the grace of God to be dispensed according to each man's merit" (*Coll.* xiii, 16). He entirely ignores irresistible grace and absolute decrees of divine predestination, though his doctrine with respect to preventing grace agrees generally with that of Augustine. In fact, he can neither agree with those who make the gift of grace dependent upon human merit, nor with others who deny that man has any power in himself to originate good in his own heart. These opinions doubtless helped to form a general dislike for the theory of irresistible grace and divine predestination. Stanch partisans opposed the Semi-Pelagians, the master-spirit among them being Prosper of

Aquitania (q. v.); while on their side we find certain great names, especially Vincentius of Lerius (q. v.). His *Commonitorium* was directed principally against the doctrinal development of Augustine as being unsupported by the Catholic tradition of the Church (Voss, *Hist. Pelag.* i, 10). In this work he brought forward his three famous tests of the truth of a doctrine, viz. antiquity, universality, and general consent. An appeal to Celestine, the Roman bishop, against the Semi-Pelagians having been unsuccessful, Prosper published several writings in refutation of their doctrines; and upon the death of Celestine, he endeavored to prevail upon Sixtus, his successor, to repress the Semi-Pelagians. Failing in this, Prosper wrote several tracts on behalf of Augustinian doctrine. Shortly after the middle of the 5th century, a question arose between Lucidus, a presbyter, and Faustus, bishop of Riez, in Provence. The bishop admonished Lucidus in person, and afterwards wrote him a letter, setting forth in brief terms his own view of the doctrine of grace. By the advice of the council held at Arles (475), he published a work on the disputed points, *De Gratia et Humanae Mentis Libero Arbitrio*. The book was answered half a century later by Cæsarius of Arles in a treatise of similar title, *De Gratia et Libero Arbitrio*, which, however, is lost. In 520 some Scythian monks assailed the work of Faustus, and presented their confession of faith to the legates of pope Hormisdas in Constantinople, in which they affirmed their belief that the will of man was powerless for any other object than to "discern and desire carnal and worldly matters," etc. They met with a cold reception from the legates, and fared no better with Hormisdas, to whom they appealed. A council was held at Aransio (Orange), in France, July 3, 529, at which twenty-five articles concerning grace and free will, and directed against the Semi-Pelagian doctrine, were drawn up, and subsequently confirmed by Boniface II. A similar expression of doctrine was made by a council at Valence, in the province of Vienne, but the problem remained unsolved how to reconcile the opposing motives—powers of grace and free will. Augustine continued to be regarded as the great light of the Western Church, although in the Middle Ages there was an occasional tendency to dispute his authority. See Hagenebach, *Hist. of Doctrines* (see Index); Möller, in Herzog's *Real-Encyklop.* s. v.; Neander, *Kirchengesch.* (2d ed. Hamb. 1847), ii, 1178-1217; Gardner, *Faiths of the World*, s. v.; Blunt, *Dict. of Theology*, s. v. See PELAGIANISM.

Se'mis (Σεμῖς, v. r. Σεμῖς, Σεμῖς), a Græcized form (1 Esdr. ix, 23) of the name SHIMEI (q. v.) the Levite after the return from Babylon (Ezra x, 23).

Semi-separatists, a name given to certain persons in the 17th century who would listen to the sermons of the Church of England clergymen, but not to the common prayer. They would remain outside of the churches until the prayers were done, and then rush in and hear the sermon. See Pagitt, *Heresiography* (ed. 1662), p. 94.

Semitic Languages. See SHEMITIC LANGUAGES.

Semi-Universalists, an appellation given by Mosheim to those Dutch divines of the Reformed Church in the 17th century who maintained that God indeed wishes to make all men happy, but only on the condition of their believing; and that this faith originates from the sovereign and irresistible operation of God, or from the free, unconditional election of God. These are sometimes called *Hypothetical* or *Conditional Universalists*, and scarcely differ, except in words, from *Infaluparians* (q. v.).

Semler, JOHANN SALOMO, a German theologian in the latter half of the 18th century, who became notorious as the founder of the modern school of so-called

historical critics of the Bible. He was born in 1725 at Saalfeld, where his father held the office of deacon; and from his earliest childhood came under the influence of the pietism of Halle. In obedience to its urgent exhortations, he formed the habit of earnest prayer. His student life at Halle, where he matriculated in 1743, was spent amid similar surroundings; but he failed to obtain peace of mind. He was specially attracted towards Baumgarten (then professor) on account of his massive learning, but appears to have been even too little influenced by the Wolfian logical schematism of that scholar. He devoured books without digesting them, and obtained, as a principal result of his studies, a suspicion which subsequently became the fundamental idea in his theology—namely, that *a difference exists between theology and religion*. In 1750 he was made a master, and soon afterwards began the congenial work of editing the gazette of his native town; but in the following year he was called to the chair of history at Altorf, and six months later to a theological chair at Halle. He delivered lectures on hermeneutics and Church history; and ere long reached the conclusion that "the historical interpretation really belongs to the first century as representing the sum and contents of the conceptions of that age, and must be distinguished from the present application of Scripture, as correctly interpreted, to the instruction of Christians of to-day." His discoveries were submitted to Baumgarten, who encouraged him to continued independence of thought, but warned him that he would thereby arouse the opposition of a class of people who might work material injury to his prospects.

On the death of Baumgarten, in 1757, Semler became the most prominent member of the faculty at Halle, and enjoyed an unequalled popularity despite the confusion, and even barrenness, of his deliveries. As he became bolder in the presentation of his views, he was violently opposed by the orthodox party—periodicals were filled with invectives, and ministerial associations entertained charges against him; but all this served only to increase his popularity, until none of his colleagues could venture to dispute his pre-eminence, though the list included such names as J. G. Knapp, Nösselt, and Gruner, J. L. Schulze, A. Freylinghausen, G. Chr. Knapp, and A. H. Niemayer. In 1779 he wrote a reply to the Wolfenbüttel Fragmentist, however, and also a critique of Bahrdt's *Confession of Faith* (*Antwort auf das Bahrdtsche Glaubensbekenntnis*), in which he zealously contended for the doctrines of the Church and thereby undermined his position. His friends at once charged him with duplicity, and the government, acting through the minister Zedlitz (the patron of Bahrdt), deprived him of the directorship of the theological-pedagogical seminary, on the ground that his recent course had destroyed his hold on the confidence of the public. A number of writings from his pen, devoted, on the one hand, to the promotion of free thought, and, on the other, to the defence of churchly orthodoxy, were issued in the period immediately following, and did much to intensify the opposition raised against him from every side: and when he became a believer in alchemy, in the last years of his life, it was accepted by many as a proof of impaired vigor in his mind. He died in 1791.

Semler's criticism was directed against two points: (1) the traditional view with respect to the canon of the Bible; and (2) the ordinary treatment of Church history, particularly that of the earlier period. His merit consists in having destroyed many errors in consequence of his investigations, and in having opened the way to more correct opinions.

1. *Semler's Exposition of the Canon.*—The traditional view regarded the canon as constituting a unit which is everywhere equally inspired; and this view had been shaken in his own mind by the studies of R. Simon, Clericus, and Wettstein, and also by his own investigations. He became convinced that the opinions of recent times did not correspond with those of the earlier

ages, and that theological views are subject to constant changes (his desultory mind was incapable of attaining to the idea of a progressive development in theology). With respect to the canon, he came to think that the original idea was not that of a fixed norm of doctrine which should be binding for all ages, but rather that of "a catalogue of the books which were read in the assemblies of Christians." These books were brought together through the force of accidental considerations rather than in pursuance of a definite plan. The early Christians decided to accept as divine those books of the Old Test. (whose canon was already variously established by the Palestinians, the Samaritans, and the Alexandrians) which should be found in the Septuagint translation, the latter being regarded as inspired; and as the enumeration of canonical books belonging to the New Test. varied in the early Church, the bishops, for the sake of uniformity, agreed upon a definite number of books which should be used as a *canonica lectio* in the worship of the Church. Semler's investigations into the character of the Old and New Test. texts likewise contributed to overturn the traditional idea of the inspiration of the Scriptures; for while that theory assumed that the text of the Bible had descended unaltered through the centuries to us, he urged that the Holy Spirit had himself caused a revision of the Scriptures by the hand of Ezra, and that it could not be supposed, in the face of historical and diplomatic data, that an extraordinary divine supervision had been exercised over copyists. He insisted, further, that the Scriptural writings show on their face that they were not intended to be a norm of doctrine for all men, since the Old Test. was written for Jews whose religious apprehension was but limited, the Gospel by Matthew for extra-Palestinian Jews, that by John for Christians possessed of Grecian culture. He argues that it was necessary to accommodate the teachings of Christianity to the needs of these various classes, which explains the appeal to miracles and the use of "stories" by Jesus and some of the apostles—the *σάφξ*, according to his opinion—and the emphasizing of the *πνεῦμα* by Paul. The latter apostle sought to adapt his writings to the Jewish modes of thought so long as he entertained the hope of gaining over the Jews in considerable numbers to the new religion—the Epistle to the Hebrews being an illustration; but he eventually abandoned this hope, and so became the first to make Christianity a religion for the world. The Catholic epistles, finally, were intended to unite the two ancient parties of Christendom—the Jewish and the more liberal Pauline. The very beginnings of the historical criticism thus present in outline the results attained by the most recent Tübingen school. With respect to the Apocalypse, Semler regarded it as a sort of Jewish mythology—"the production of an extravagant dreamer"—and wrote much to demonstrate its unfitness for the place it holds in the canon.

Having postulated the theory of accommodation by which the Old Test., and much of the New, lost their authoritative character, Semler was obliged to show what, if any, element of binding truth remains to Christianity after all that is merely local and temporary has been stripped off from the Bible. He finds it in "that which serves to perfect man's moral character," but declares that even this cannot be comprised in any definite set of truths, since different individuals are stimulated to virtue by different portions of the Scriptures. What-ever develops a new and better principle, that leads to the veneration of God in the soul, is Christianity; and that is *inspired* or divine which convinces readers "that they know more respecting spiritual changes and perfections, and are able to derive more actual profit from such changes, than before." He contends that there is such a thing as *objective* truth in Christianity, but that there can be no definite test to indicate whether any individual has apprehended it or not, since the decision can only be the expression of a moral judgment. He even thinks that nothing more than a difference in the

form of expression is involved when the higher moral truths of Christianity are characterized as a *revelation*, or as a *progressive development of the natural reason* (see Schmid, *Die Theol. Semlers*, p. 167).

It is evident that Semler's theories remove the last distinctions between Christianity and Naturalism or Deism; but he nevertheless protests vigorously against being classed with Naturalists, and it was zeal against Naturalism that had led him to enter the lists against the Wolfenbüttel Fragmentist and the *Confession of Bahrdt*, though he had previously (in 1759, in his introduction to Baumgarten's *Glaubenslehre*, p. 51-57) reduced the distinguishing peculiarity of Christianity to a *better morality*. The solution of this contradiction must be found in the distinction Semler made between *private religion* and the *publicly acknowledged teaching of the Church*. He was open to religious impressions, given to prayer and the singing of religious hymns, and earnestly engaged in efforts to promote a *Christian morality*. He assured his students that an inward power, the peculiar privilege of those who possess a Christian knowledge of God, shall be realized by those who form the habit of prayer, and urged them to make the trial. It was, doubtless, owing to these consequences of his early religious training that he condemned all interference with the authoritatively established doctrines of the Church, though his separation of the faith of a private person from the teaching of the Church is open to the suspicion that he was too servile to sacrifice material prosperity in order to uphold a privately recognised truth. He asserted that a private scholar has the right to defend new opinions in the department of his labors; but that, as a teacher appointed by superior authority, it is his duty to follow the beaten track, when required, or else to resign his office. And it is certain that he thus expressed his serious convictions, and that his views in this respect grew out of his religious temperament.
